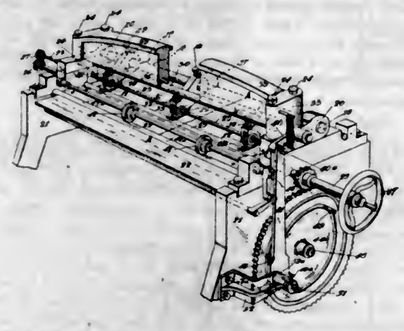
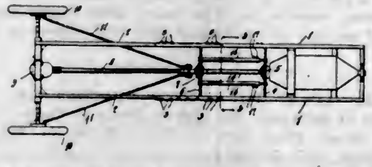
1,678,408. HEADLIGHT LENS. CHARLES H. TUMEY, Sr., San Antonio, Tex. Filed Mar. 4, 1926. Serial No. 92,204. 2 Claims. (Cl. 240—48.4.)



1. A headlight lens, comprising a hemispherical body having its upper portion provided with means to retard the passage of light rays therethrough, the lower portion being transparent, and having its inner surface formed in a series of parallel transversely concaved bands forming ridges therebetween, said ridges being arranged on vertical planes, and the band arranged in the middle of the lower portion being wider than the bands on either side thereof and adapted to direct light rays in front of the lens, said concaved bands on the sides of the middle band being adapted to deflect light rays towards the sides of the lens.

1,678,409. LOCK WASHER. ERNEST WARD, Independence, Mo. Filed Nov. 11, 1926. Serial No. 147,767. 1 Claim. (Cl. 151—38.)

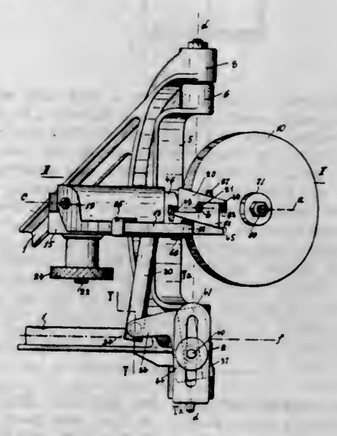


A lock washer comprising a split elastic annular member internally screw threaded and provided with a lug extending radially outward from one end thereof, and a second split elastic annular member having an internal diameter greater than the external diameter of said first member, and having an angular terminal connected to said lug outwardly beyond said first member.

1,678,410. MACHINE FOR PREPARING PAPER TO ENABLE PORTIONS TO BE EASILY DETACHED. WILLIAM WALTER WARRINGTON, Summer Hill, New South Wales, Australia. Filed Dec. 17, 1925, Serial No. 76,068, and in Australia Aug. 6, 1925. 7 Claims. (Cl. 92—68.)

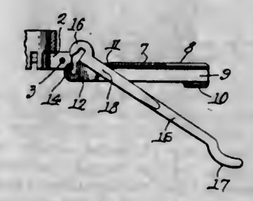
1. A machine for the purpose herein described, comprising a driven shaft, a plurality of wheels mounted thereon and having peripheral teeth, a rotatable anvil mounted in bearings below and axially in the same vertical plane with the driven shaft, adjustable means for maintaining the toothed wheels at a predetermined distance from the rotatable anvil, means whereby the driven shaft and rotatable anvil may be driven in opposite direction so that the wheels upon the driven shaft and the rotatable anvil will travel at the same peripheral speed and means for feeding the paper between the toothed wheels and the rotatable anvil.

1,678,411. EXTENSIBLE CHASSIS FOR AUTOMOBILES. ENNES L. WESTMORELAND, Ogden, Utah. Filed Dec. 31, 1926. Serial No. 158,238. 3 Claims. (Cl. 180—1.)



1. An extensible frame for automobiles, comprising front and rear frame sections, side members of said frame sections formed of channel beams, the channel beams of one section slidable within the channel beams of the other section, a cross beam engaging each section, sections of a telescoping shaft engaging the cross beams, and telescoping bracing members engaging said cross beams.

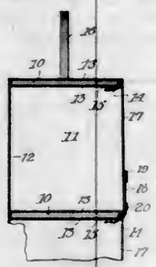
1,678,412. FUSE PLUG. HARRY J. WHEELER, Kansas City, Mo. Filed Jan. 16, 1926. Serial No. 81,820. 1 Claim. (Cl. 200—130.)



In a fuse plug, a socket engaging member comprising a solid body of insulation having a bore in its upper end face forming a fuse receiving chamber and in its lower end face two bores forming terminal housings having communication with opposite sides of said chamber, a threaded metallic sleeve encompassing said body and having a terminal extending through one of said housings to one side of said chamber, a terminal secured to the lower end face of said body and extending through the other one of said housings to the opposite side of said chamber, and a fuse carrying member fitted to the said socket engaging member and comprising a solid insulator body having a central projecting portion guidingly depending in the chamber in said socket engaging member provided in its end face with a fuse receiving limiting groove having therein an elongated fuse element connecting said terminals and supported by a lever pivotally mounted on the end face of the depending portion of the fuse carrying member.

1,678,413. GRINDING MACHINE. ALEXANDER ZÄHRINGER, Stuttgart, Germany. Filed Dec. 22, 1926, Serial No. 156,366, and in Germany Dec. 28, 1925. 4 Claims. (Cl. 51—219.)

1. Machine for grinding spiral drills comprising a frame, a grinding wheel carried in said frame, a bracket pivotally connected to said frame, and adapted to rock about an axis which coincides with the face of the grinding wheel, a support for the drill to be ground secured on said bracket and comprising a hinged flap, the axis of said hinge extending at an angle to the face of the grinding wheel, a chuck for the drill to be ground adapted to be attached to said flap, and mechanism connecting said hinged flap with said bracket so as to impart rocking motion to said bracket when said flap is turned about its hinge.

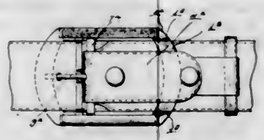


1,678,414. UMBRELLA. AMBROSE A. ZWIEBEL, Wilkes-Barre, Pa. Filed Feb. 3, 1927. Serial No. 165,626. 1 Claim. (Cl. 135—31.)

In a device of the class described, a trough-shaped socket and a retainer bar, the socket and the bar having oppositely facing hooks, the socket being provided with a

longitudinal slot through which the hooked end of the retainer bar extends, whereby the socket and the retainer bar may be disposed in crossed relation and closed together, like a pair of pliers, to cause the hooks to cooperate in forming a pivot eye, the socket being provided with means for engaging the retainer bar to hold the retainer bar within the socket.

1,678,415. COLLAPSIBLE SHOE CABINET. MARTHA W. AHLES, Chicago, Ill. Filed Oct. 30, 1926. Serial No. 145,173. 2 Claims. (Cl. 312—6.)

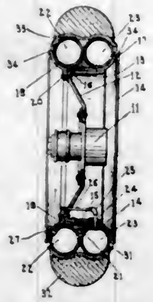


1. A collapsible cabinet having a back and sides of flexible material, sheaths of flexible material and similar in size forming ends and partitions dividing the cabinet into a plurality of compartments, all of the sheaths at their ends being secured to said sides, said sheaths being closed at the rear and having an insert opening at the front, stiff partition members similar in size insertible through said openings into the sheaths to form stiff ends and partitions, said partition members being removable to permit the flexible material to be washed, an individual curtain of flexible material for each compartment secured adjacent the front edge of the sheath at the top thereof, the lower edges of the curtains overlapping the upper edges of adjacent curtains opposite each partition.

1,678,416. MANUFACTURE OF METHYL EUGENOL. WILLIAM GUY ANDREWARTHA, Sydney, New South Wales, Australia. Filed Oct. 20, 1927, Serial No. 227,627, and in Australia Dec. 29, 1926. 2 Claims. (Cl. 260—150.)

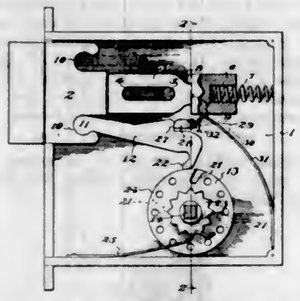
1. The herein described manufacture of methyl-eugenol, which consists in subjecting the mill waste and toppings of Huon pine timber to the action of steam under pressure in a closed vessel for a period within about two hours educting and condensing the vapor, and separating water in the condensate from the product.

1,678,417. BELT BUCKLE. ALWIN H. BECK, Rochester, N. Y., assignor to Hickok Manufacturing Company, Inc., Rochester, N. Y. Filed Apr. 25, 1925. Serial No. 25,912. 10 Claims. (Cl. 24—188.)



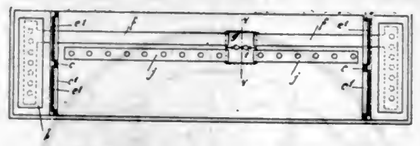
1. A buckle comprising a frame having spring casings extending along opposite sides thereof and formed with longitudinally extending slots, coil springs arranged in said casings, and a belt anchoring member extending between said spring casings having portions extending through the slots and also having enlarged portions within the casings, engaging the ends of the springs and greater in thickness than the width of the slots so as to secure the belt anchoring member to the frame and means for securing the other end of the belt to the buckle frame.

1,678,418. PROCESS FOR TREATING SEEDS TO AUGMENT THEIR CULTURAL VALUE. ALEXANDER CARR BENNETT, Fairfield, New South Wales, Australia. Filed Dec. 15, 1926, Serial No. 155,115, and in Australia Mar. 26, 1926. 1 Claim. (Cl. 47—58.)



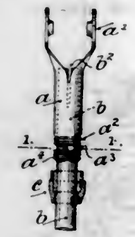
A process of augmenting the cultural value of agricultural seeds, which consists in soaking them in water, spreading them while damp in a layer upon an earthed plate and rolling over them for a period of 5 to 15 minutes more or less, a vacuum tube which is connected to a source of high frequency electrical current, substantially as described.

1,678,419. COMBINATION SOLID AND PNEUMATIC TIRE. MELVIN BOWDAN, Los Angeles, Calif. Filed June 29, 1927. Serial No. 202,237. 1 Claim. (Cl. 152—33.)



A wheel having a felly with a section cylindrical in the transverse direction of the wheel, said felly having flanges, a pair of single tube pneumatic tires circular in cross section when inflated, there being an annular wedge-shaped structure secured to the felly and fitting in the space between the felly and the tires, a solid rim having a plurality of annular curved surfaces, said surfaces being concave on their inner sides considered in a radial section, and a solid rubber tire secured to said rim.

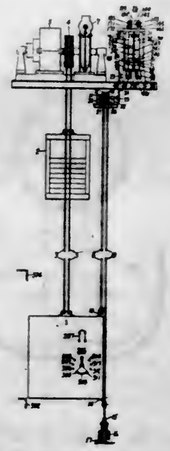
1,678,420. LOCK. ROY E. BROWN, Portland, Oreg., assignor of forty-nine per cent to Percy C. Caffee, Portland, Oreg. Filed July 27, 1927. Serial No. 208,854. 5 Claims. (Cl. 70—53.)



1. In a lock, the combination of a bolt, a drawbar connected therewith, a plurality of tumblers disposed below the drawbar and arranged to be engaged thereby, a knob spindle, a hub member fixed to the outer tumbler and engaged with the knob spindle whereby to rotate therewith, a bushing fitted around said hub member and held against rotation, the intermediate and outer tumblers being loosely mounted upon said bushing, a ratch fixed to the outer face of the outer tumbler, and a detent engaging said ratchet disk.

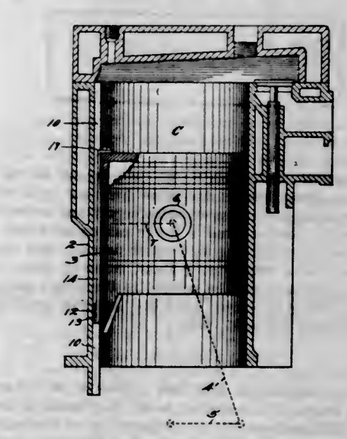
1,678,421. REFRIGERATOR CAR. HENRI CORBLIN, Paris, France. Filed May 9, 1927, Serial No. 190,026, and in France May 14, 1926. 2 Claims. (Cl. 62—24.)

1. A refrigerator car comprising ice-containers arranged at the ends of the car, transverse partitions adjacent said ice containers extending upwardly from the car floor and terminating short of the roof thereof, apertures at the bottom of said partitions adapted to allow of natural circulation of air between the end and middle portions of the car, shutters slidably mounted upon said partitions and adapted to close said bottom apertures, a rotary fan driven by an axle of said car for forced circulation of air, air casings between said middle portions of said car and the vicinity of said ice-containers, and enclosing said rotary fan, and means for automatically moving said shutters to their aperture-closing position as soon as the speed of travel of the train reaches a predetermined rate and for automatically moving said shutters to their aperture-uncovering position during stoppage of the car.



1,678,422. MOVABLE SUPPORT FOR ELECTRIC LIGHT, GAS AND OTHER PURPOSES. JOHN DUGDILL, Hazel Grove, near Stockport, England. Filed Feb. 21, 1928, Serial No. 620,550, and in Great Britain May 13, 1922. 1 Claim. (Cl. 247—31.)

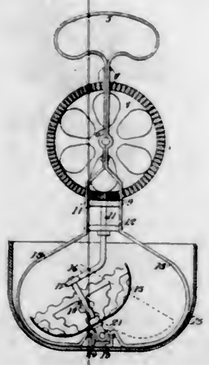
A light fixture support comprising an outer tube having a forked extremity at one end and threaded at the opposite end, an inner tube frictionally fitting within the outer tube to permit resisted relative rotation of the tubes, the inner tube extending beyond the threaded end of the outer tube, a pin projecting from the inner tube and seating in a circumferentially disposed slot formed in the threaded portion of the outer tube, the length of the slot being less than the circumferential length of the treaded portion to thereby limit the relative rotative movements of the tubes, and a ferrule having a sliding fit on the inner tube and interiorly threaded to cooperate with the threaded portion of the outer tube in both directions beyond the slot therein, whereby the slot and pin connection of the tubes is completely covered by the ferrule and the latter acts to connect the portions of the outer tube in both directions beyond the slot to thereby reinforce the outer tube in the slotted area.



1,678,423. LEVELING DEVICE FOR ELEVATORS. EDWARD L. DUNN, East Orange, N. J., assignor to Otis Elevator Company, New York, N. Y., a Corporation of New Jersey. Filed Nov. 6, 1926. Serial No. 146,686. 18 Claims. (Cl. 187—29.)

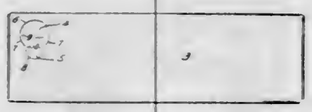
5. In an elevator system, an elevator car; car actuating and stopping mechanism; and a device, comprising a plurality of spaced cams, one for each of a plurality of landings, said cams being rotatable about a common axis and at a speed proportional to the speed of the car, a pair of followers for cooperating with the cams, said followers being movable in a direction parallel to the axis of rotation of the cams and at a speed proportional to that of the car, a pair of operating rods, one for each follower, each of said followers being arranged to slide on its operating rod, means acting through said operating rods

for biasing the followers into cooperating position with the cams, means acting through said operating rods for moving the followers out of cooperating position with the cams against the action of the biasing means, and switching mechanism operated by movement of the cams acting acting through the followers and operating rods, when the followers are in their cooperating position with the cams, for causing the car actuating and stopping mechanism to bring the car to a stop level with the respective landings.



1,678,424. COUNTERTHRUST PRESSURE MOTOR. CLARENCE G. EDWARDS, Los Angeles, Calif. Filed May 24, 1926. Serial No. 111,297. 13 Claims. (Cl. 74—108.)

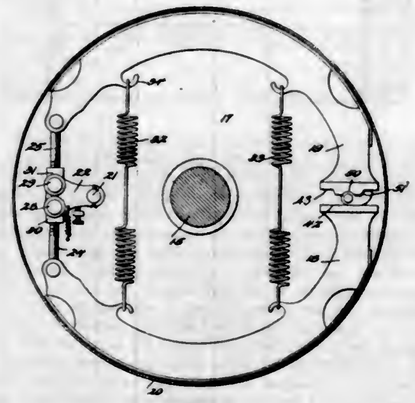
1. A trunk-piston motor having a cylinder part and a piston part, the former of which has a motive fluid canal disposed at a side of the piston and opening at one end



into the combustion chamber of the motor and means on the piston to form a closure across and working in the canal.

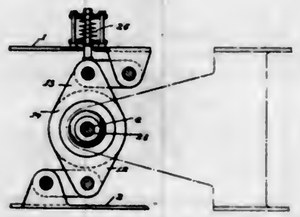
1,678,425. AGITATOR. WILSON R. ELLIS, Berkeley, Calif. Filed May 24, 1926. Serial No. 111,362. 4 Claims. (Cl. 259—126.)

1. A device of the character described comprising a shank, a gear mechanism connected thereto, a frame including side arms connected to said shank and a base, a shaft rotatably mounted in said shank, a perforated cup-shaped beater element offset with relation to said shaft and rotatable therewith, and a universal joint connection between the base of the frame and said beater element whereby upon actuation of said gear mechanism a beating movement will be imparted to said beater element.



1,678,426. CARTON KNOCK-OUT. HERBERT D. FIELD, Los Angeles, Calif., assignor of one-half to Robert C. McCrystal, Los Angeles, Calif. Filed Aug 8, 1925. Serial No. 49,064. 1 Claim. (Cl. 229—7.)

A dispensing carton having an area in one of its walls defined by discontinuous incisions forming a door, said area consisting of an upper relatively large nearly complete circular portion, and a lower relatively small semi-circular portion adjoining said upper portion, said portions being uncut on a line joining them, forming links, whereby inward pressure may be applied to the larger portion to cause the same to swing inwardly and the smaller portion outwardly on said links.

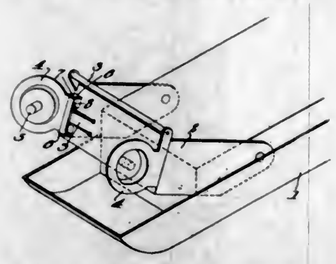


1,678,427. VEHICLE BRAKE. EDWIN B. FLANIGAN, Wilkes-Barre, Pa., assignor to E. B. Flanigan, Incorporated, Wilkes-Barre, Pa., a Corporation of Pennsylvania. Filed Sept. 20, 1924. Serial No. 738,818. Renewed June 8, 1928. 13 Claims. (Cl. 188—78.)

1. Brake mechanisms of the internal expanding type including in combination, a rotatable brake drum, a pair of brake shoes, a relatively stationary brake spider, a link pivoted to said spider to swing in the plane of said shoes,

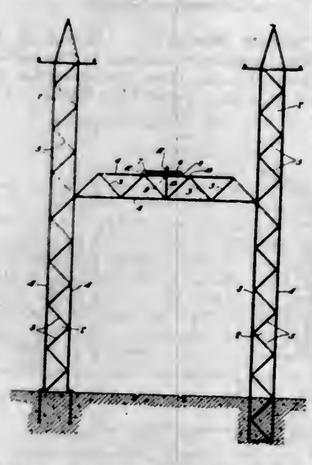
link means connecting one end of each shoe to said first mentioned link, and means to separate the opposite ends of said shoes.

1,678,428. ARTICULATED COUPLING FOR RIGID-FRAME UNITS. ATTILIO FRANCO, Milan, Italy. Filed Feb. 11, 1925, Serial No. 8,589, and in Italy Feb. 11, 1924. 3 Claims. (Cl. 213—3.)



1. A coupling for rigid frame units comprising, two coupling members adapted to be detachably connected together, means for attaching one of said coupling members to one rigid frame unit, and means for movably connecting the other coupling member to the other rigid frame unit, such movable connecting means comprising pivoted links connected to said coupling member and to the opposite sides of the rigid frame unit, the arrangement of said pivoted links being such that the force applied to the links on one side of said frame is equal in amount, identical in direction, and opposite in application to the force applied to the links on the opposite side of said frame.

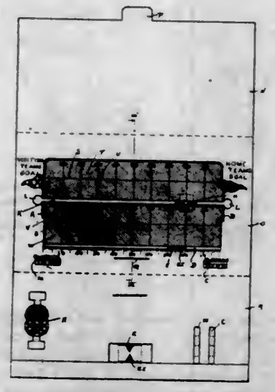
1,678,429. ORGANIC GOLD COMPOUNDS AND PROCESS OF MAKING SAME. ALPHONSE GAMS and PAUL SCHEIDEGGER, Basel, Switzerland, assignors to the Firm Society of Chemical Industry in Basle, Basel, Switzerland. Filed July 14, 1927, Serial No. 205,840, and in Switzerland Aug. 25, 1926. 12 Claims. (Cl. 260—11.)



1. A process for the production of stable complex gold compounds of nucleic acids by reacting with a gold compound upon a water soluble nucleate.

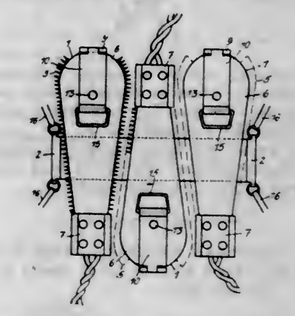
1,678,430. SPOOL HOLDER FOR FILM CAMERAS. LEO GOLDHAMMER, Munich, Germany, assignor to A. Hch. Rietzschel G. m. b. H., Munich, Germany. Filed Sept. 16, 1926, Serial No. 135,919, and in Germany Dec. 11, 1925. 6 Claims. (Cl. 242—71.)

3. In a film camera of the type in which a spool support is pivotally mounted on the case for movement into position outside of said case, a spool support comprising a bridge-shape member having end plates for pivotally supporting the opposite ends of a film spool, one of said plates being pivotally mounted on said support, and spring means operative only when said pivoted end plate is in approximately normal spool-holding position for yieldingly retaining said pivoted end plate in said normal position.



1,678,431. OVERHEAD SUPPORT. CHAUNCEY MARSH GOODRICH, Windsor, Ontario, Canada. Filed Jan. 5, 1926. Serial No. 79,362. 2 Claims. (Cl. 189—33.)

1. A support for the overhead system of electric railways comprising the combination with a pair of spaced vertical metal supports and a horizontal metal truss member extending between and secured to said supports, said truss member being of substantially triangular cross-section and having a single inverted V-shaped top chord of a plurality of connector brackets secured to and projecting above said top chord, and an elongated impregnated wooden insulator block secured to said brackets and extending in a plane parallel with and entirely above said top chord.

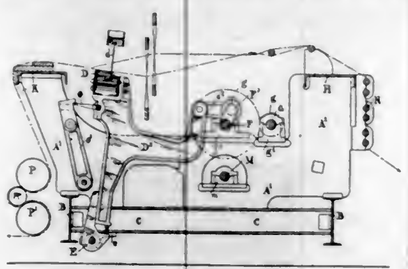


1,678,432. GAME DEVICE. ALFRED B. HASLACHER, Farmington, Calif. Filed Sept. 3, 1927. Serial No. 217,435. 4 Claims. (Cl. 116—120.)

1. A game indicating device comprising a cardboard surface having a portion ruled to simulate a field on which a game is being played, a graduated longitudinal slot traversing said field, a second slot parallel with the first named slot and spaced therefrom, an indicator adapted to slide in said first named slot and a flag indicator adapted to slide in said second named slot, an

extended portion of said surface on two opposite sides of said ruled portion and adapted to fold over and protect said ruled portion or to fold backwards and be secured to form a backing for said slidable indicators.

1,678,433. HAIR-UNDULATING APPARATUS. LEONORE FREDERIKA CLARA CORNELIA WILHELMINA HEDBERG, née ILSE, Stockholm, Sweden. Filed July 19, 1926, Serial No. 123,350, and in Sweden June 10, 1925 (abandoned). 3 Claims. (Cl. 132—32.)



1. A hair undulating apparatus comprising a plurality of cup-shaped moulds and mandrels of corresponding configuration adapted to be inserted in said moulds, said moulds and mandrels being reduced at one end and arranged with the large and small ends alternately at opposite sides of said apparatus, and independent heating means on each mould.

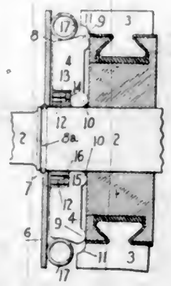
1,678,434. LOOM FOR WEAVING. JOHN HENRY HINDLE and THOMAS HINDLE, Haslingden, England. Filed Sept. 30, 1925, Serial No. 59,736, and in Great Britain Dec. 17, 1924. 2 Claims. (Cl. 139—190.)

1. In a loom constructed with a slay and end swords attached thereto, breast and back beams and a plurality of intermediate slay swords attached to the slay the combination of a plurality of transverse intermediate frames mounted in pairs to support the parts of the loom spanning the front and back beams, one frame being adjacent to each side of each intermediate slay sword, a crank shaft positioned well up in the loom immediately

below the warp threads, a plurality of intermediate cranks on the crank shaft to push the slay swords from the back beam simultaneously so that the thrust in beating up is sustained by the back beam placing the inter-

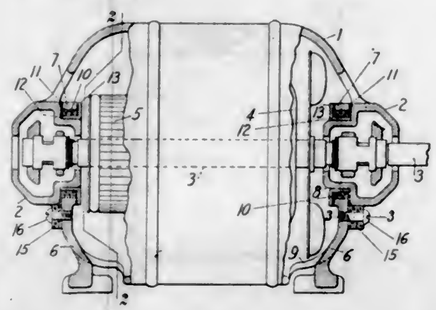
mediate frames in compression and a plurality of bearings in pairs supported by the transverse frames one bearing being on each side of each crank to support the crank shaft, gears to drive the crank shaft and a knocking off dagger and lever for each intermediate slay sword.

1,678,435. SELF-CONTAINED LATTICEWORK. EMIL MORITZ HÜNNEBECK, Hosel, Germany. Filed Aug. 17, 1925, Serial No. 50,785, and in Germany Aug. 19, 1924. 3 Claims. (Cl. 20—15.)



1. Self-supporting lattice in space, comprising strips having considerable width as compared with their thickness, and in the direction of their width extending in planes substantially perpendicular to the plane of the lattice as a whole, said strips being so arranged at the points of intersection that the end of each strip is connected in two points with abutting strips.

1,678,436. ICE-CREAM HOLDER. PETER KINNEAR, Columbus, Ohio. Filed May 31, 1923. Serial No. 642,500. 1 Claim. (Cl. 99—16.)

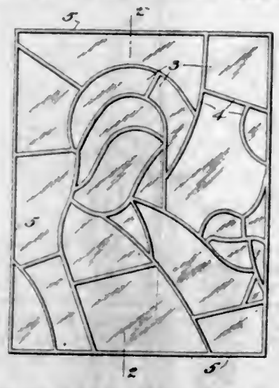


A device for holding a cake of ice cream comprising, in combination, a stick having a substantially uniform diameter and a closed guard thereon extending transversely therefrom and thereabout, said guard being of flexible material and frictionally engaged with the stick at a perforation in said guard, said perforation being primarily of smaller diameter than the diameter of the stick whereby said guard can be adjusted to stand by frictional engagement at any point on the stick.

1,678,437. SHORT-CIRCUITING DEVICE FOR MOTORS. GEORGE H. LELAND, Dayton, Ohio, assignor of one-half to The Leland Electric Company, Dayton, Ohio, a Corporation of Ohio. Filed Apr. 16, 1925. Serial No. 23,524. 14 Claims. (Cl. 172—279.)

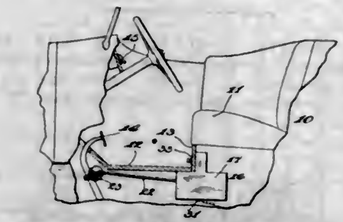
1. In a device of the character described, the combination with a shaft, and a commutator mounted on said shaft and comprising a series of bars, of an annular series of substantially radial contact members arranged circumferentially of said shaft and movable in substantially straight lines by centrifugal force into short circuiting contact with said commutator bars, means for connecting the inner ends of a part of said contact members one to the other to cause them to move in unison, and a yieldable device acting on said contact members to resist their outward movement.

1,678,438. MOTOR MOUNTING. GEORGE H. LELAND, Dayton, Ohio, assignor to one-half to The Leland Electric Company, Dayton, Ohio, a Corporation of Ohio. Filed June 16, 1926. Serial No. 116,342. 11 Claims. (Cl. 172—36.)



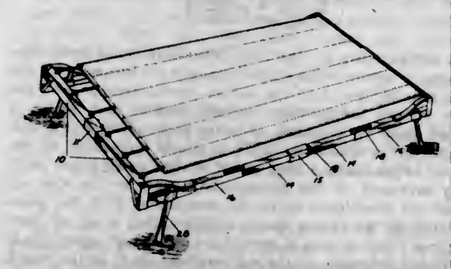
9. In a machine of the character described, a frame having a part forming a support, a supporting member extending about said part of said frame, and a resilient element interposed between said part of said frame and said supporting member and adapted to permit torsional vibration by said frame with respect to said supporting member and at the same time to resiliently limit the continued rotation of said frame with respect to said supporting member.

1,678,439. LEADED GLASSWORK. GEORGES LE ROY, Marly le Roi, France. Filed Jan. 29, 1926, Serial No. 84,751, and in France Feb. 7, 1925. 2 Claims. (Cl. 41—23.)



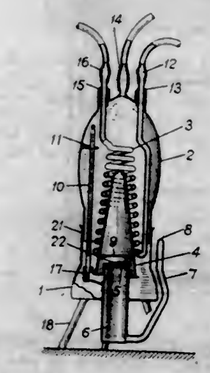
1. A glass panel, comprising a multiplicity of structurally-separate, transparent quarries, each consisting of coloured, transparent front and rear sections of the same

shape and dimensions and a transparent pellicle interposed between the sections of each quarry and conforming thereto in shape and dimensions, each such portion



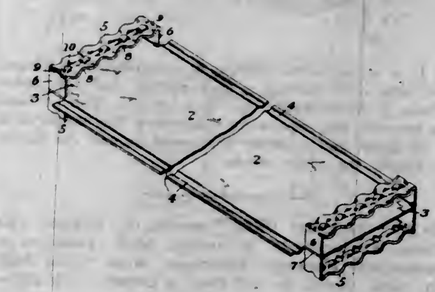
of pellicle having a photographic image formed on it; and a supporting structure of lead joining the different quarries together along their abutting marginal edges.

1,678,440. ANTITHEFT DEVICE. CHARLES LEWANDO, Brooklyn, N. Y. Filed June 1, 1927. Serial No. 195,833. 3 Claims. (Cl. 70—127.)



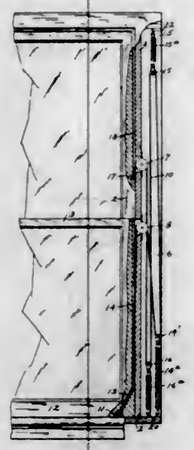
1. In an anti-theft device, the combination with the clutch pedal of a motor vehicle, a rod extending therefrom, a bearing for the free end of said rod, an obstructing member having an opening therein for registration with said bearing for the free passage of said rod therethrough, spring means acting against said obstructing member to move the same to an obstructing position, and key controlled mechanism for rendering said obstructing member responsive and unresponsive to the action of said spring means upon depression of said clutch pedal to a position to cause the free end of said rod to clear said opening.

1,678,441. FOLDING CAMP BED. EARL E. MCGREW, Lincoln, Nebr., assignor to McGrew Machine Company, Lincoln, Nebr., a Corporation of Nebraska. Filed Sept. 2, 1924. Serial No. 735,513. 5 Claims. (Cl. 5—112.)



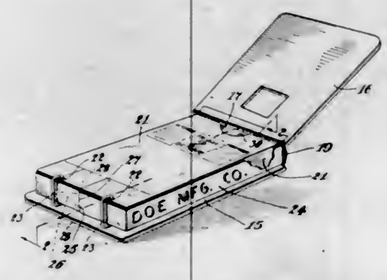
2. In a folding bed, a side rail having a pair of telescoping sections, a leg pivotally secured to one of said sections and foldable therein, the other of said sections being adapted to slide over the pivot of said leg to prevent pivotal movement thereof when the bed is folded.

1,678,442. SUBLIMATOR. FRANK A. PEARL, New York, N. Y. Filed Dec. 1, 1927. Serial No. 237,005. 13 Claims. (Cl. 23—253.)



1. An apparatus of the class described comprising a heating chamber, means for supporting a substance for sublimation, a separable vessel for receiving the deposit of material sublimed from said substance when heated, separable means for cooling said vessel, and a sectional enclosing unit for said heating chamber, supporting means, vessel and cooling means.

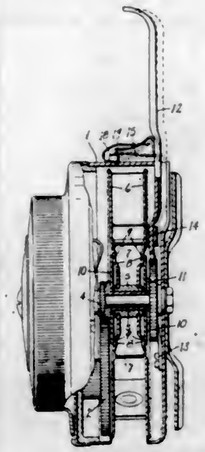
1,678,443. PALLET. ROBERT V. PROCTOR and HARRY M. SCHAAB, Youngstown, Ohio, assignors to The Commercial Shearing and Stamping Company, Youngstown, Ohio, a Corporation of Ohio. Filed Dec. 29, 1924. Serial No. 758,538. 9 Claims. (Cl. 34—17.)



1. As an article of manufacture, a pallet comprising a body portion having end portions of reduced width, and at least one supporting leg for each end portion, substantially as described.

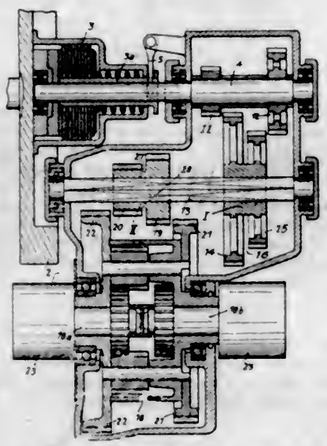
1,678,444. WINDOW-SASH COUNTERBALANCE. GEORGE C. ROEDL, West Allis, Wis. Filed Feb. 21, 1927. Serial No. 169,689. 3 Claims. (Cl. 16—197.)

1. The combination with a frame providing guideways, of a plurality of sash reciprocable in said guideways, a single cord interconnected between said sash, and a plurality of counter-balancing springs providing tension upon said cord.



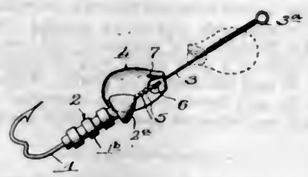
1,678,445. MEMORANDUM PAD. FRED ROEGER, Hasbrouck Heights, N. J., assignor of one-half to Howard S. Neiman, New York, N. Y. Filed Nov. 12, 1925. Serial No. 68,584. 10 Claims. (Cl. 281—19.)

1. In a memorandum device, in combination, a hinged cover, said cover having a back portion and two cover portions, a recess within the back portion open at both ends thereof, ring means for connecting the sheets of a pad of paper, and a binder positioned around the sheets and within the cover recess.



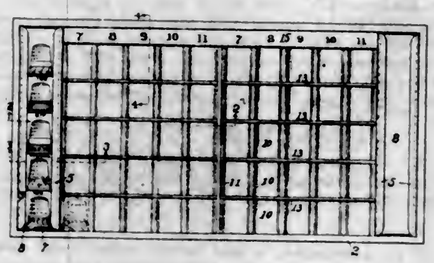
1,678,446. FISHING REEL. SAMUEL G. RUSSELL and PETER WORKMAN, Jr., Kalamazoo, Mich., assignors to Shakespeare Company, Kalamazoo, Mich. Filed Sept. 25, 1926. Serial No. 137,790. 6 Claims. (Cl. 242—84.5.)

5. In a structure of the class described, the combination of a driving spindle, a spool comprising a hub rotatable on said spindle, flanges having stepped inwardly offset central portions fixed to said hub, said stepped offsets providing annular friction surfaces substantially spaced from the hub, resilient friction driving discs arranged on said spindle at the end of said hub with portions adjacent their peripheries coacting with said annular friction surfaces providing a driving friction connection for the spindle to the spool, and a barrel mounted



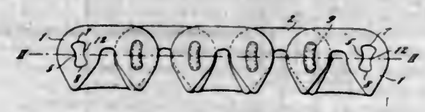
between said flanges concentrically of said hub and adjacent said friction surfaces, said barrel constituting a thrust supporting member for said flanges.

1,678,447. DRIVING DEVICE FOR THE FRONT WHEELS OF MOTOR CARS. ROBERT SCHWENKE, Berlin-Charlottenburg, Germany. Filed Apr. 27, 1927, Serial No. 187,107, and in Germany Jan. 23, 1925. 1 Claim. (Cl. 74—57.)



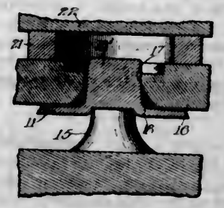
A driving gear for the front wheels of motor cars, comprising a motor crank-shaft arranged transversely to the direction of travel of the car, a clutch arranged at one side of the longitudinal vertical median car plane, a clutch shaft, a plurality of gears secured to said clutch shaft, an intermediate shaft arranged parallelly to the motor crank-shaft, a first set of change speed gears shiftably arranged on the intermediate shaft at the side opposite to the clutch to be interconnected with the gears secured on the clutch shaft, a differential, a set of gears secured thereon, and a second set of change speed gears shiftably arranged on the intermediate shaft at the clutch side to be interconnected with the gears secured on the differential.

1,678,448. FISHING LURE. JESSE P. SHANNON, Lake Geneva, Wis. Filed Mar. 25, 1927. Serial No. 178,185. 6 Claims. (Cl. 43—45.)



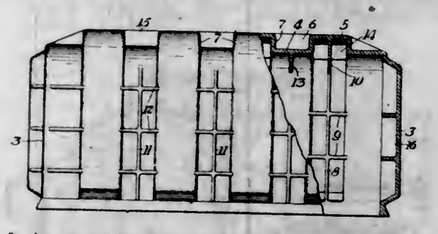
1. A fishing lure comprising a shank, a spoon having an attaching portion at one end engaging said shank at points spaced apart longitudinally thereof, said spoon and attaching portion having a predetermined arrangement of slots embracing said shank to permit said spoon to swing bodily toward and from the ends thereof in an arc of definite direction and magnitude.

1,678,449. DISPLAY TRAY. FREDERICK M. SIMONS, Bowling Green, Pa., assignor to Simons Bros. Company, a Corporation of Pennsylvania. Filed May 27, 1925. Serial No. 33,082. 3 Claims. (Cl. 206—72.)



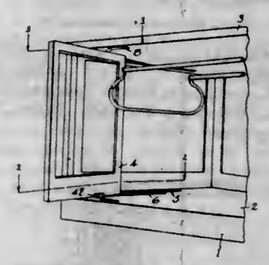
3. A display tray having arranged within the boundaries of its sides a plurality of grooved transverse rows of pockets in parallel relation and the adjacent strips separated by division strips, characterized by the transverse rows of pockets being formed of separate strips of wood each having its bottom and two upright sides along its length arranged at right angles to each other and its upper surface formed by a plurality of inclined parallel grooves each extending entirely across the strip and of substantially the same cross section throughout its length, the open ends of said grooves of the strip being closed by the division strips.

1,678,450. CHAIN AND PART THEREFOR. HAROLD E. STURTEVANT, Hartford, Conn., assignor to The Whitney Mfg. Co., Hartford, Conn., a Corporation of Connecticut. Filed Oct. 25, 1923. Serial No. 670,636. 6 Claims. (Cl. 74—32.)



1. A chain of the silent link type having joints comprising links with registering openings and two pin members in said openings, said members having parallel sides and the side walls of said openings being curved and having rocking contact with said pin members.

1,678,451. APPARATUS FOR MAKING NOZZLES. JAMES HALL TAYLOR, Oak Park, Ill. Filed Mar. 15, 1924. Serial No. 699,510. 5 Claims. (Cl. 78—60.)

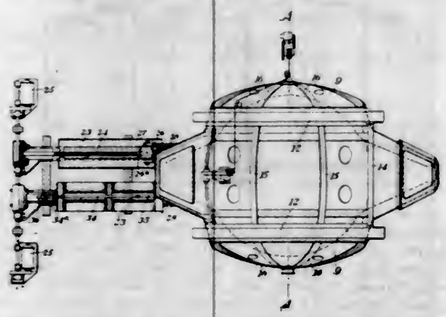


1. In die mechanism for forming nozzles, the combination of a male die, a female die, a die plate adapted to produce relative motion between said dies, and a spacer normally provided between said die plate and one of said dies, said spacer being removable to permit said die plate to impress its full pressure on the blank.

1,678,452. ANNEALING BOX. WILLIAM E. TROUTMAN, Pittsburgh, Pa., assignor to Duquesne Steel Foundry Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Aug. 13, 1926. Serial No. 129,001. 5 Claims. (Cl. 263—49.)

1. An annealing box structure having top, side and end walls, the side walls being formed of a plurality of channel portions having substantially flat bottoms and substantially perpendicular sides, some of the channels being turned inwardly and some of the channels being turned outwardly, said inwardly turned channels having bracing webs therein, and said outwardly turned channels having bracing webs therein.

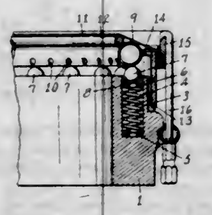
1,678,453. DOOR STRUCTURE FOR DISPLAY CABINETS. LYMAN W. WELCH, Grand Rapids, Mich., assignor to Welch Manufacturing Company, Grand Rapids, Mich. Filed Sept. 8, 1925. Serial No. 55,071. 1 Claim. (Cl. 312—138.)



1. The combination with a display case with a supporting base and having top and end walls and a swinging sliding door structure, of a door, diametrically opposed upper and lower grooved track at the end of the base and top walls, an auxiliary curved grooved track on said base at the bottom, an offset double-roller bearing ball carried on the inner side of said door and spaced from its rear edge, said bearing ball traveling in said auxiliary

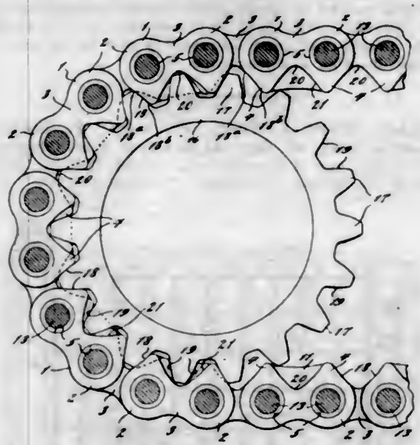
curved portion to carry the main weight of said door, an upper opposed curved branch track portion, parallel to the auxiliary track, at the top of the door and coalescing by a Y with said upper end tracks, a projecting guiding ball pin member on top of said door opposite said carrying ball for engaging said track and branch, and projecting guide ball pins at the rear upper and lower edges of said door to travel in the end tracks at top and bottom, coacting as specified.

1,678,454. PROCESS FOR OBTAINING CERTAIN REMEDIAL PRINCIPLES OF OILS. THEODORE F. ZUCKER, New York, N. Y., assignor, by mesne assignments, to University Patents, Inc., New York, N. Y., a Corporation of New York. Filed Dec. 7, 1922. Serial No. 605,513. 19 Claims. (Cl. 167—7.)



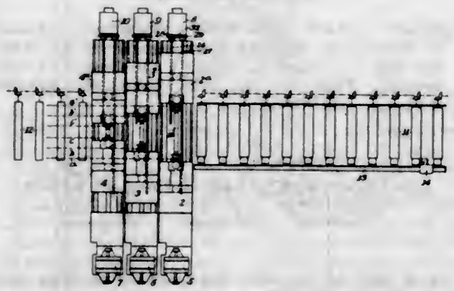
3. In a process for the extraction of the antirachitic principles of cod liver oil, the steps which comprise treating cod liver oil with alcohol, saponifying the fatty acids in the alcoholic extract, precipitating the calcium salts of soaps thus formed and extracting the antirachitic principles from the precipitated soaps.

1,678,455. HOT-METAL MIXER. LEE E. ALLEN and JOHN K. FURST, New Castle, Pa., assignors to Pennsylvania Engineering Works, New Castle, Pa., a Corporation of Pennsylvania. Filed July 6, 1926. Serial No. 120,857. 10 Claims. (Cl. 266—33.)



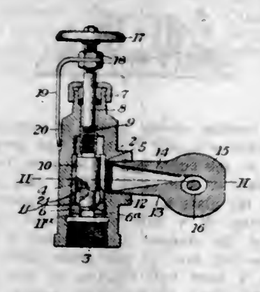
1. A hot metal mixer comprising a body which is outwardly bowed between its ends relative to its longitudinal axis, ends on the body which are rounded outwardly both transversely and vertically, said ends being closed below the longitudinal axis of the body, the top of said body being transversely curved to a less extent than the remaining portion of the body, spouts located on opposite sides of the body intermediate its ends, and means for tiltably supporting the body.

1,678,456. RESONANCE RING FOR STRINGED MUSICAL INSTRUMENTS. GEORGE ALTERMATT, Kalamazoo, Mich., assignor to Gibson, Incorporated, Kalamazoo, Mich. Filed Sept. 28, 1925. Serial No. 59,072. 15 Claims. (Cl. 84—269.)



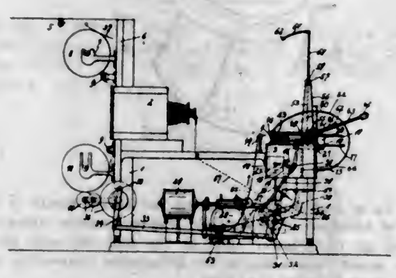
1. In a banjo, the combination with a rim having a plurality of sockets in its upper edge and provided with an upwardly projecting extension member, coiled springs arranged in said sockets, ball thrust plates having central ball positioning seats therein disposed upon said springs in said sockets, balls supported on said seats out of contact with the walls of the sockets, a resonance ring disposed on said balls and having a plurality of sound holes in the inner side thereof, an annular thrust member disposed between said resonance ring and said rim extension member, a head thrust ring of a diameter less than that of said resonance ring resting thereon, a head supported by said thrust ring and embracing the upper edge of said rim extension member, and a head clamping means.

1,678,457. CHAIN-DRIVE GEARING. WARREN J. BELCHER, Hartford, Conn., assignor to The Whitney Mfg. Co., Hartford, Conn., a Corporation of Connecticut. Filed Mar. 29, 1922. Serial No. 547,628. 20 Claims. (Cl. 74—32.)



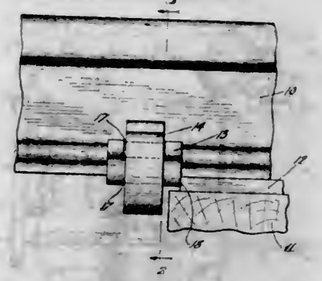
2. In combination, a gear having radial teeth, and a transmission chain composed of a plurality of overlapped toothed links cooperable with said gear, and transverse bearing members having a diameter not less than one-half the pitch length of the chain connecting the overlapped portions of said links, said bearing members being located outside the gaps between the gear teeth.

1,678,458. MULTIPLE SHEARS. FLORENCE C. HIGGERT, Jr., Pittsburgh, Pa., assignor to United Engineering & Foundry Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed May 6, 1925. Serial No. 28,467. 4 Claims. (Cl. 164—60.)



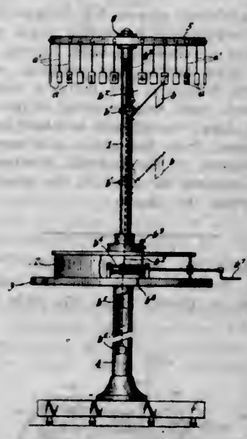
4. In a multiple shear, a plurality of pairs of stationary shears positioned side by side so as to simultaneously engage material, and means for feeding sheet material successively to the several pairs of shears, the shears in the several pairs being arranged successively closer together in the order in which they engage the fed material.

1,678,459. VALVE FOR FLUID-FUEL BURNERS. ANDREAS BOWLAND, Wilkinsburg, Pa. Filed Feb. 21, 1927. Serial No. 169,814. 4 Claims. (Cl. 251—77.)



2. A valve including a body having an inlet connection and an outlet connection and having a valve chamber, a sleeve fitted into the valve chamber having a slot therein opening toward the outlet connection, a disk in the body at the end of the sleeve for retaining the sleeve in the body, said disk having a central orifice therein, a valve stem in the body, a plug on the stem fitted into the sleeve, and an extension on the plug adapted to seat against said disk for closing the orifice therein when the plug covers the said slot in the sleeve.

1,678,460. PHOTOGRAPHIC APPARATUS. MAX BRESLAUER, Leipzig, Germany. Filed July 23, 1923. Serial No. 653,348, and in Germany July 17, 1922. 11 Claims. (Cl. 88—24.)

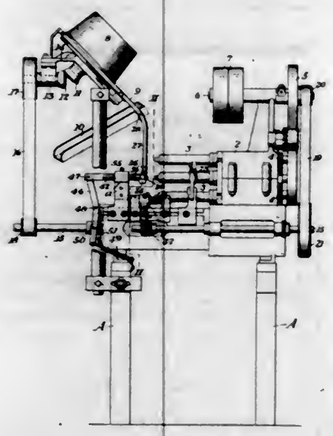


1. An apparatus for the continuous photographing of pages, drawings, and the like, forming parts of a book, comprising, in combination, a photographic camera, a shutter forming part thereof, means for actuating the shutter, a table adapted to receive the book, a suction pipe and suction heads thereat and being adapted to lift the sheets etc. to be photographed, means to produce a sucking current in said suction pipe, a blast nozzle located at a side of the book and being adapted to blow air against the upper leaf edges, means to produce the air current for said nozzle, a bell-crank lever to which the said pipe is adjustably attached, a cam disk so arranged as to be adapted to actuate said lever, means to operate said disk, and a suction chamber having a perforated front wall against which the sheet etc. is lifted by the said lever and the said suction pipe, as set forth.

1,678,461. RAIL ANCHOR. BYRON M. CHENEY, Chicago, Ill. Filed Apr. 27, 1927. Serial No. 186,867. 12 Claims. (Cl. 238—321.)

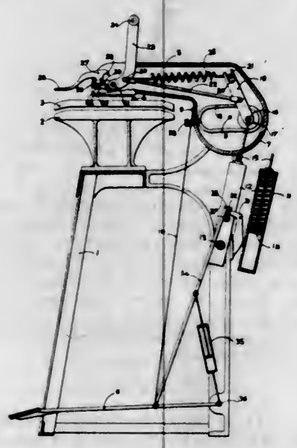
11. A rail anchor comprising a spring clip for engaging a rail flange, and spring clamping jaws embracing said clip to hold the same in position on said flange, said clip and jaws being formed to be positioned and held on only one flange of the rail.

1,678,462. GAME APPARATUS. FRANCESCO CUCINOTTO, New York, N. Y. Filed Jan. 11, 1928. Serial No. 246,060. 4 Claims. (Cl. 273—142.)



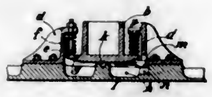
1. A game apparatus characterized by a rotor having a series of dangling members adapted to be carried around in a circular path by said rotor, and characterized further by an indicator device adapted to be moved into the path of said dangling members to arrest their circular movement gradually, means tending to move said indicator device automatically into said arresting position, manually operated means to move said indicator device at times out of said arresting position, and a controlling device to control said movements, said controlling device being adapted for operation manually to release said means for moving said indicator device into said arresting position.

1,678,463. CAP-APPLYING MEANS FOR TUBE-WORKING MACHINES. WALTER T. DAVIS, Wheeling, W. Va., assignor to Wheeling Stamping Company, Wheeling, W. Va., a Corporation of West Virginia. Filed Apr. 20, 1923. Serial No. 633,444. 15 Claims. (Cl. 29—38.)



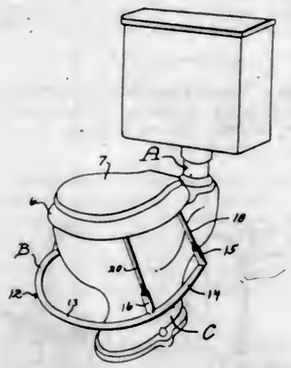
1. In a collapsible tube-working machine, cap-delivery means and means for receiving a cap by gravity direct-

ly from said delivery means and frictionally holding the same by engagement with its periphery only and applying the same to the threaded neck of a tube, substantially as described.



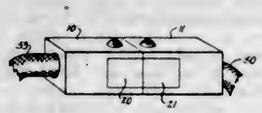
15. A cap applying means for collapsible tubes including a tube supporting member, a chuck member, said chuck comprising a supporting block having sliding jaws thereon, said jaws having cap gripping surfaces and cap feed control fingers, a cap delivery chute terminating at the chuck, said fingers being reciprocable across the end of the chute, one of said members being movable toward and away from the other, and means operable upon the movement of the movable member away from the other for opening the jaws of the chuck, and other means for closing the chuck.

1,678,464. IRONING STEAM PRESS. PIERRE DIEBOLD, Nancy, France. Filed June 18, 1927, Serial No. 199,851, and in France Sept. 27, 1926. 11 Claims. (Cl. 68—9.)



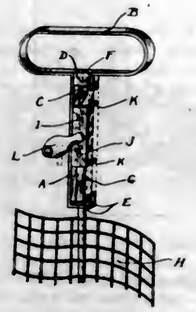
1. In an ironing press, a hollow arm supporting the upper pressing plate, a drum integral with the arm and pivoted to the machine frame, a pedal for lowering the arm, a connection between the pedal and the arm consisting of a flexible steel band attached to the pedal and partly wound around the drum, and means for balancing the arm and assisting it in its downward and upward motions.

1,678,465. IRONING STEAM PRESS. PIERRE DIEBOLD, Nancy, France. Filed June 18, 1927, Serial No. 199,852, and in France Oct. 14, 1926. 3 Claims. (Cl. 68—9.)



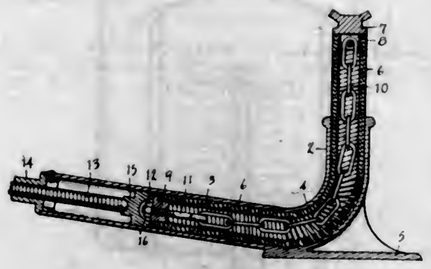
1. In an ironing steam press, a movable arm pivotally connected with the frame of the press, a flanged plate holder at the outer end of the arm for supporting the upper plate of the press, and a ball joint connection between the plate holder and the upper plate of the press consisting of a ball seat at the center of the lower face of the flanged plate holder, a boss at the center of the top face of the press plate, a ball seat in the boss, a steel ball bearing on the seats in the boss and the plate holder, and means for movably attaching the plate of the press to the flanged plate holder.

1,678,466. FOOT-REST ATTACHMENT FOR CLOSETS. ZENAS W. GUNCKEL, Guthrie, Okla. Filed Mar. 15, 1928. Serial No. 261,841. 7 Claims. (Cl. 4—254.)



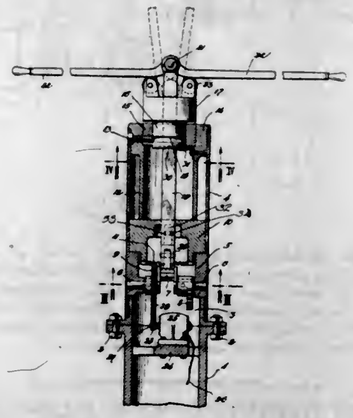
1. In a foot rest attachment for closet bowls, a foot bar of U-shape in formation, and suspension arms connected at their lower ends to the foot bar and having their upper ends adapted for detachable connection with the upper edge of the bowl.

1,678,467. CONNECTING DEVICE. AMMON W. HEAB, New York, N. Y. Filed June 16, 1925. Serial No. 37,444. 7 Claims. (Cl. 173—332.)



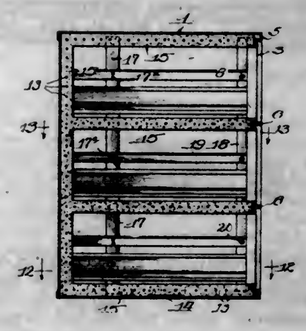
1. An electric connecting device for electrical conductors, comprising two opposed elements of like construction, each having a rectangular cross section and having a channel cut in the contiguous faces thereof, and having an aperture extending through each of said elements into communication with the channel, and a pair of terminal blocks of like construction fitted into the channels of said opposed elements respectively and each having electric contacts positioned thereon, the conductors extending through said apertures and fastened to said contactors.

1,678,468. OPERATING MECHANISM FOR WHIPPERS. GEORGE A. HERRON, Ottawa, Ontario, Canada, assignor of fifty-one per cent to T. Bert Cole, Ottawa, Canada. Filed Mar. 29, 1927. Serial No. 179,268. 6 Claims. (Cl. 259—128.)



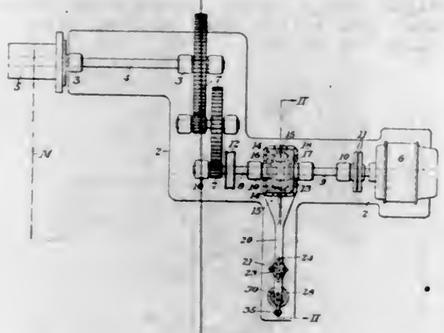
1. A whipper comprising a frame bent double on itself to provide a pair of spaced side members the lower ends of which are bent toward each other and adapted to overlap, a bearing block supported near the top by said side members, a shaft mounted between said side members continuing at the bottom through said overlapped ends and journalled at its upper end in said bearing block and an actuator reciprocably mounted on said shaft and held against rotation by said frame.

1,678,469. LIFTING JACK. ARTHUR C. HOPKINS, Niles, Mich., assignor to National-Standard Company, Niles, Mich. Filed May 18, 1927. Serial No. 192,266. 12 Claims. (Cl. 254—98.)



1. In a lifting jack, the combination of a tubular elbowed standard of uniform bore from end to end, the elbow being uniformly curved, said standard having an integral base below its elbow, a lifting member comprising a coiled spring slidably fitting within said standard and having coils of a concavo-convex cross section in nesting engagement, a head for said lifting member mounted on the outer end of said spring, a thrust member engaging the inner end of said spring, a flexible tension member secured to said head and adjustably secured to said thrust member, and an actuating screw having threaded engagement with said standard and coacting with said thrust member.

1,678,470. SIGNAL DEVICE. GEORGE HULME, Detroit, Mich. Filed Mar. 22, 1926. Serial No. 96,446. 6 Claims. (Cl. 116—63.)

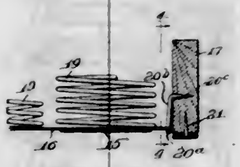


1. In a signal device, a pedestal, a rotary head carried thereby, oscillatory members carried by said head adapted to rotate therewith and adapted to be oscillated during rotation of said head, a pitman slidable in said head and connected to said oscillatory members, and means in said pedestal adapted to cause rotation of said head and intermittently reciprocate said pitman to cause oscillation of said members.

1,678,471. HEAT-RESISTING FILING DEVICE. DAVID E. HUNTER, Muskegon, Mich., assignor to Shaw-Walker Company, Muskegon, Mich., a Corporation of Michigan. Filed Oct. 16, 1926. Serial No. 141,921. 17 Claims. (Cl. 109—2.)

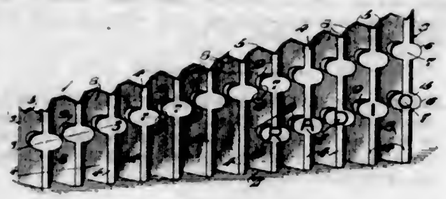
1. A heat resisting filing cabinet comprising an outer sheet metal casing having a front opening surrounded by a U-shaped flange, a sheet metal frame fitting into said opening in engagement with metal clips secured to said flange and having locking heads adapted to be bent over said frame to lock the same against displacement.

1,678,472. REEL. LANE JOHNSON, Pittsburgh, Pa., assignor to United Engineering and Foundry Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Dec. 7, 1923. Serial No. 679,134. 6 Claims. (Cl. 242—75.)



1. The combination with a driving motor, of an element driven thereby, a differential gear mechanism through which the motor and driven element are connected, and a motor control associated with the differential, said control being arranged to slow down the driving motor when the driven element is slowed down.

1,678,473. THUMB TACK. HOWARD C. KARST, Philadelphia, Pa. Filed Jan. 16, 1928. Serial No. 247,247. 6 Claims. (Cl. 85—16.)

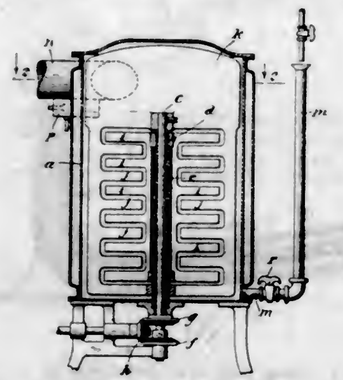


6. In a device of the character stated, a head piece formed of spring metal and having a central, offset spring portion, one end of said head piece being adapted to be secured to a support and the other end thereof being adapted to be snapped towards and into a clamping position against said support to secure an object thereto, and to be snapped away from said support to release said object, by the exertion of pressure on said central, offset portion, and means for spacing said head piece from said support.

1,678,474. UPHOLSTERY CONSTRUCTION. MAX KRAUSE, Chicago, Ill. Filed May 31, 1924. Serial No. 716,852. 3 Claims. (Cl. 155—179.)

1. In upholstery construction of the character described, the combination of a frame part, a flexible fabric web secured to the normally under surface of the frame, and auxiliary supporting means for the web comprising a member secured to the frame and passing across the web on its normally under surface adjacent to the frame and holding the web in normally raised position at the lower edge of the frame where the web extends inward therefrom and converting downward strains applied upon the web at places inward of the frame into upward strains upon the web where it extends between the lower surface of the frame and said supporting means.

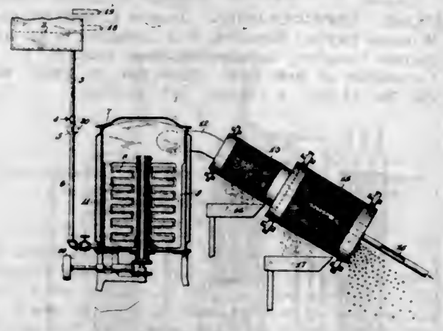
1,678,475. ADVERTISING AND DISPLAY DEVICE. CHARLES A. LONG, Jr., Philadelphia, Pa. Filed May 5, 1928. Serial No. 275,345. 3 Claims. (Cl. 40—137.)



1. A device for advertising and display purposes comprising a one-piece member of thin material having a horizontal bottom edge, a plurality of spaced ribs arranged at right angles to said bottom edge and extending vertically throughout the height of said device, laterally disposed aligning tabs on said ribs to form advertising receiving spaces, and hinge portions arranged between adjacent ribs, said hinge portions being cut away to accommodate said tabs when the device is in folded position.

1,678,476. PRODUCING AGGLOMERATED CREAM. CHARLES E. NORTH, Montclair, N. J., assignor to The Milk Oil Corporation, Wilmington, Del., a Corporation of Delaware. Filed Feb. 20, 1924, Serial No. 694,015. Renewed June 8, 1928. 4 Claims. (Cl. 99—11.)

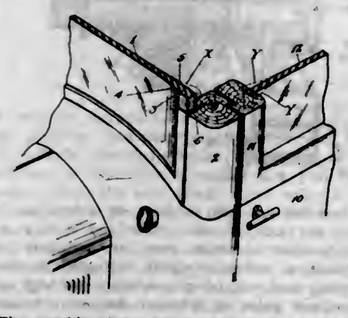
1. The process herein set forth of producing an agglomerated cream which consists in washing natural cream to remove therefrom substantially all solids not fat and whipping the washed cream without substantially increasing the volume of the washed cream.



2. The new milk product herein described, agitated and agglomerated cream in a stiff pasty mass substantially free from all solids not fat and containing substantially no added air.

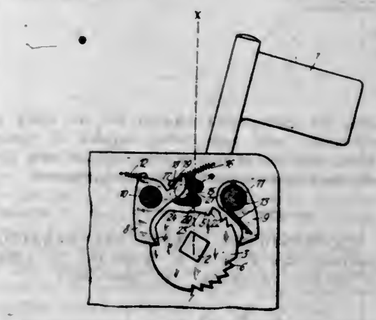
1,678,477. PROCESS FOR WHIPPING OR AGITATING CREAM. CHARLES E. NORTH, Montclair, N. J., assignor to The Milk Oil Corporation, Wilmington, Del., a Corporation of Delaware. Filed Dec. 4, 1924. Serial No. 753,806. 7 Claims. (Cl. 259—6.)

1. The process of whipping cream, which comprises continuously feeding cream to one part of a column of cream and displacing cream in said column, applying to said cream in its movement of displacement rotative impulses in opposite directions, thereby whipping the cream, so correlating the strength and frequency of said impulses to the rate of feed as to thoroughly whip the cream without breaking into butter, displacing whipped cream out of said whipping zone, and after the whipped cream has emerged from the whipping zone displacing it from the column of cream.



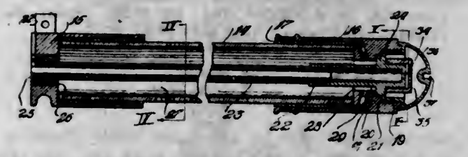
1,678,478. PROCESS OF CHURNING CREAM INTO BUTTER FAT AND APPARATUS THEREFOR. CHARLES E. NORTH, Montclair, N. J., assignor to The Milk Oil Corporation, Wilmington, Del., a Corporation of Delaware. Filed Jan. 27, 1925, Serial No. 5,172. Renewed Jan. 4, 1928. 8 Claims. (Cl. 99—13.)

1. The process of obtaining butter fats, which comprises continuously feeding cream to one part of a column of cream and displacing cream in said column; applying to said cream in its movement of displacement rotative impulses in opposite directions, thereby agitating the cream; so proportioning the strength of said impulses to the rate of feed as to effect thoroughly the agglomeration of the fats contained in the cream; displacing the treated material in the form of agglomerated fats and butter-milk out of the agitating zone; and removing such treated material continuously and automatically.



7. A churn for the continuous separation of butter fats from cream, which comprises a churning chamber having an outlet in its upper portion for the substantially continuous discharge of butter fats and a residue; agitating elements extending into the lower part of said chamber, there being a zone for agglomerated fats and residue above the agitating elements and below the level of said outlet; and means for feeding cream to the churning chamber at a rate to ensure the thorough breaking into butter of the fat globules contained in the cream and displacement of the butter fats and the residue upward from the agitating zone.

1,678,479. WINDOW. ERNEST L. O. PATTEN, Lakewood, Ohio, and RAYMOND E. PATTEN, Detroit, Mich. Filed Feb. 6, 1924. Serial No. 690,912. 8 Claims. (Cl. 88—1.)

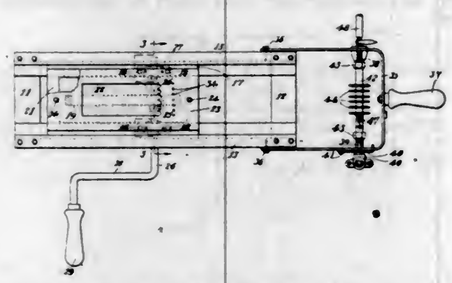


8. The combination with a vehicle having a substantially opaque body member and a seat member, said members being so relatively positioned as to obstruct partially the field of vision of a person normally occupying said seat, of a refracting prism, and means for supporting said prism and so positioning the same relative to said opaque member that a person normally occupying said seat may see the image of an object in said obstructed field.

1,678,480. FARE INDICATOR. PAUL RIEGGER, Villingen, Baden, Germany, assignor to Kienzle Uhrenfabriken Aktiengesellschaft, Schwenningen-on-the-Neckar, Germany, a Corporation of Germany. Filed Nov. 11, 1924. Serial No. 749,204. 4 Claims. (Cl. 235—30.)

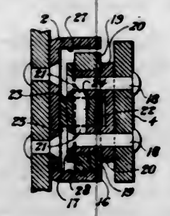
1. In a fare indicator, the combination with a setting member for setting the indicator mechanism into and out of service position, of an operating member connected with said setting member and provided with a plurality of peripheral projections, a locking member, co-operating with one of the projections to lock said operating member against movement into service position, and a controlling member co-operating with said locking member to adjust the latter to an inoperative position and to fix it therein, said controlling member being provided with a stop-notch co-operating with another of said peripheral projections to operate said controlling member.

1,678,481. ELECTRIC FUSE. JOSEPH D. ROBERTS, Springfield, Ill. Filed Dec. 20, 1926. Serial No. 155,792. 2 Claims. (Cl. 200—127.)



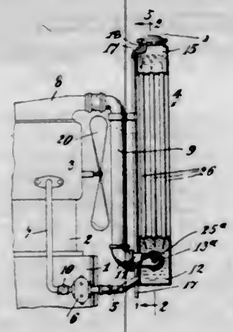
1. An electric fuse, comprising a relatively non-fusible glass tube, apertured metallic ferrules secured to the ends thereof, an open ended tube of non-carbonizing insulating material supported from said ferrules within said glass tube, one end of said insulating tube registering with one of said ferrule apertures, and a fuse element adapted to extend through said one aperture and insulating tube with its ends establishing electrical contact with said ferrules, whereby a rupture of said fuse element will result in the unfused portion of said element being blown out through said one aperture with sufficient force to extinguish the electric arc formed upon the rupture of the element.

1,678,482. MACHINE FOR MAKING ARTIFICIAL FLOWERS. MORRIS ROBINSON, New York, N. Y. Filed Nov. 7, 1927. Serial No. 231,500. 4 Claims. (Cl. 41—2.)



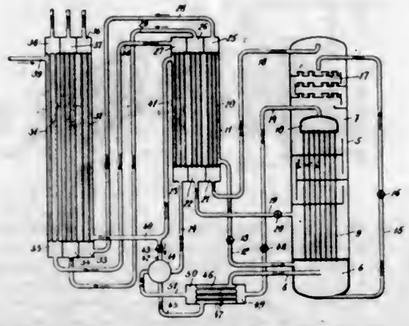
1. A machine of the character described, comprising a block of yielding material, a support for the same, a plate

provided with an opening to receive the material to be acted upon and secured upon the top of said block, a pivoted yoke, a shaft supported thereby, a plurality of spaced rollers mounted upon said shaft, means for heating said



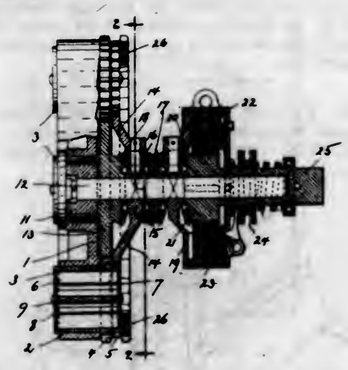
rollers, means for giving said support for the block a forward movement, said yoke being capable of being swung to bring said heated rollers into contact with the said plate during said movement of the block support.

1,678,483. CAN-HANDLING DEVICE AND BEARING. JOHN RUGGIERO, New York, N. Y. Filed Oct. 21, 1926. Serial No. 143,252. 2 Claims. (Cl. 308—203.)



1. A bearing having the combination with a frame, of a stud secured thereto, a roller mounted to revolve around said stud, and a roller mounted on said stud to revolve within said other roller and right angularly thereto.

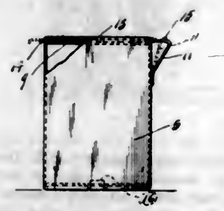
1,678,484. COOLING SYSTEM. SAMUEL W. RUSHMORE, Plainfield, N. J. Filed Aug. 10, 1926. Serial No. 128,344. 10 Claims. (Cl. 123—174.)



1. An internal combustion engine having a water and steam cooling circuit of inadequate radiating capacity, serially including a force feed pump supplying water to the jacket of the engine, an outlet discharging hot water and steam from the jacket into the lower chamber of an air cooled radiator of the upright type having a multiplicity of small diameter cooling passages of great radiating capacity connecting a lower chamber of small radiating capacity with an upper chamber which has a high level overflow outlet, and in combination with said parts, means for maintaining a circulating body of water submerging and upflowing through some of said cooling passages and downward through others, said means including a discharge means arranged to discharge warm water and then hot water and the steam from the engine lengthwise along a region of said body of water that is below and in proximity to the lower ends of most of said passages and to draw water from a region below other passages.

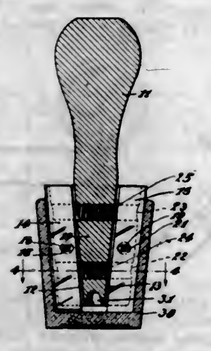
1,678,485. REFRIGERATION. JOSEPH L. SCHLITT and WALCOTT DENNIS, Elizabeth, N. J., assignors to Air Reduction Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Apr. 20, 1925. Serial No. 24,350. 4 Claims. (Cl. 62—123.)

1. The method of improving the production of refrigeration in the liquefaction of gases, which comprises cooling a gaseous mixture to separate a liquid from a residual unliquefied gas, expanding the residual unliquefied gas and the entering gaseous mixture in heat exchange relation in a rotary expander and applying the torque produced by the separate expansions to a single shaft.



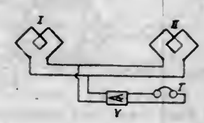
1,678,486. TRANSMISSION. REINHOLD SCHOELL, Kelsey City, Fla. Filed July 5, 1927. Serial No. 203,534. 5 Claims. (Cl. 74—34.)

1. The combination with a shaft, of a fly-wheel rotatable about the axis of said shaft and having a plurality of circular openings near its periphery, closed hollow cylindrical bodies rotatably journalled in said circular openings and containing a substance of high specific gravity, toothed gears of different diameters formed on the outwardly projecting ends of said cylindrical bodies, two toothed gears rotatably mounted on said shaft and in mesh with said other toothed gears, one of said two



toothed gears having a toothed bevel gear formed thereon, a double toothed bevel gear, pinion members in engagement with said double toothed bevel gear and said toothed bevel gear, and a means actuated by said double toothed bevel gear for transmitting the rotation of said fly-wheel to said shaft at variable speeds, the said two toothed gears and double toothed bevel gear constituting a differential gear.

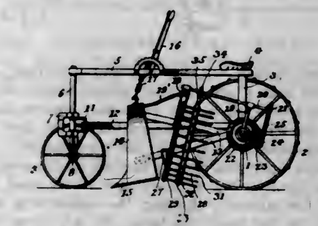
1,678,487. COMBINATION SALT AND PEPPER SHAKER. AUSTIN J. SCOTT, Gladwin, Mich. Filed Apr. 4, 1927. Serial No. 180,682. 1 Claim. (Cl. 65—45.)



A combination salt and pepper shaker, comprising a receptacle formed with individual compartments, a raised bead on the top of said receptacle, perforations in said top, a pair of resilient strips mounted on said top and covering said perforations, and slidably mounted in openings in the raised bead, one end of each strip being turned to form a stop, the opposite end projecting beyond the top and extending downwardly at an angle, to engage the side of the receptacle, stops formed on said strips and spaced from the bead, perforations on the strips and adapted to register with the perforations in the top when the strips are forced inwardly and the stops engage the bead on the top, and means for securing said strips in position.

1,678,488. SCRAPER. JOHN J. STILLWAGGON, Jersey City, N. J. Filed Apr. 30, 1926. Serial No. 105,638. 2 Claims. (Cl. 15—236.)

1. A scraper comprising a head having diametrically opposite grooves extending longitudinally in the face thereof, a blade mounted in each groove and each blade provided with a transverse elongated slot, pins extending transversely into the said head, there being a pin for each blade, which pin extends through the slot of the blade and is of a diameter substantially equal to the width of the slot whereby each blade is prevented from moving longitudinally of the head but is permitted to shift its position transversely of the head and also to swing on its pin, the said head being provided with transverse bores on opposite sides of the said pins, and yielding devices mounted in the said bores and bearing against the inner edges of the said blades to normally maintain the blades in positions in which the faces defining the inner ends of the slots in the blades engage with the said pins and the outer edges of the blades extend beyond the peripheral portions of the head.

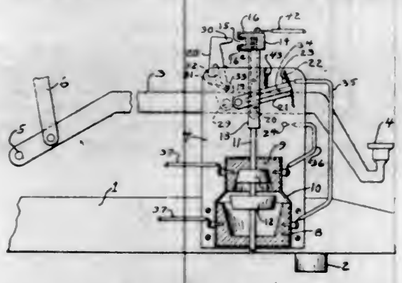


1,678,489. METHOD AND DEVICE FOR DETECTING AND LOCATING ORES IN AN ELECTRO-MAGNETIC WAY. KARL SUNDBERG, Rasunda, Sweden, assignor to Aktiebolaget Elektrisk Malmletning, Stockholm, Sweden, a Joint Stock Company. Filed Feb. 5, 1925, Serial No. 7,113, and in Sweden Oct. 18, 1923. 15 Claims. (Cl. 175—182.)

1. A device for determining the ratio of two simultaneously observed strengths of a resultant field produced in the territory of a generated terrestrial alternating electromagnetic field by ore bodies located within the influence of the generated field, comprising two rotatable loops connected to each other and adapted to be placed at two different points of said field, an amplifier connected in the common circuit of said loops, and current detecting means connected to said amplifier.

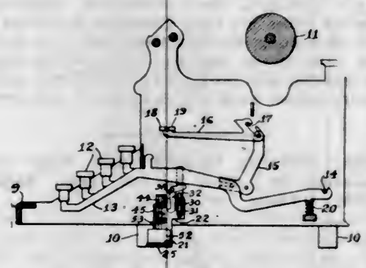
5. In a method of electromagnetically detecting and locating ore bodies, the steps comprising generating a terrestrial alternating electromagnetic field, and determining the ratio of two simultaneously observed strengths of the resultant field produced at two different points by ore bodies located within the influence of said generated field.

1,678,490. POTATO DIGGER. LOU VERD THAYER, Adamsville, Pa. Filed Nov. 27, 1926. Serial No. 151,073. 1 Claim. (Cl. 55—57.)



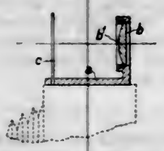
A potato digger comprising a frame mounted upon front and rear wheel supported axles, arms pivoted to the rear axle, lower guide rollers carried by certain of the arms, a scoop connected with the arms, means mounted upon the frame for raising and lowering the scoop, a shaft supported transversely above the rear axle and disposed longitudinally of the frame, means for rotating the shaft from the rear axle, an arcuate guide member supported upon the arms and having a bearing receiving said shaft, upper guide rollers carried by the guide member, a rotating shaker mounted between the lower and upper guide rollers and means for operating the shaker from the shaft.

1,678,491. KEY-CONTROLLED OPERATING MECHANISM. JOHN W. LAMBERT, Birmingham, Ala. Filed Sept. 21, 1925. Serial No. 57,582. 10 Claims. (Cl. 197—14.)



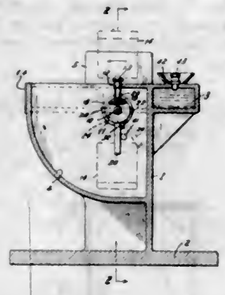
1. In a key controlled mechanism of the character described, an electric circuit, an electro-magnetically controlled reciprocable actuator forming a part of the cir-

cuit, a plurality of independent arms pivotally connected with the respective keys and adapted to be selectively engaged with and automatically disengaged from said



actuator to close the circuit and transmit movement to the keys upon engagement with the actuator, and means associated with the keys for controlling the selective engagement of said arms with said actuator.

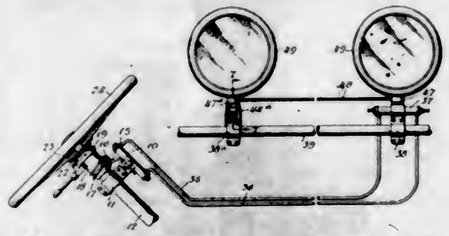
1,678,492. ELECTROMAGNETIC ATTACHMENT FOR KEY-CONTROLLED MECHANISMS. JOHN W. LAMBERT, Birmingham, Ala. Filed Dec. 2, 1926. Serial No. 152,270. 5 Claims. (Cl. 197—19.)



1. The combination with a typewriter having a supporting frame and a plurality of spaced apart manually operable key levers, of a self contained electro-magnetic mechanism for aiding in the operation of the key levers, a supporting member for the electro-magnetic mechanism, key lever operating means carried by the supporting member and interleaving with the key levers, and adjustable means for laterally shifting the supporting member with respect to the frame to bring the key lever operating means into and out of operative relation with the key levers.

1,678,493. FINDER FOR PHOTOGRAPHIC CAMERAS. LIEUWE EVERT WILLEM VAN ALBADA, Amsterdam, Netherlands, assignor to the Firm Carl Zeiss, Jena, Germany. Filed Aug. 24, 1923, Serial No. 659,170, and in Germany Sept. 6, 1922. 4 Claims. (Cl. 88—1.5.)

2. In a finder for photographic cameras a lens consisting of concentric collective zones and concentric zones having the refractive power zero interposed between the same, and a plurality of marks lying in the focal plane of the said lens.

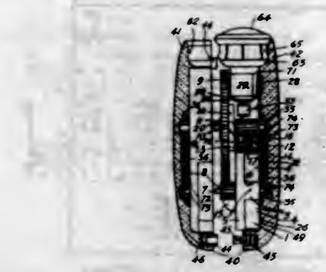


1,678,494. FILLER FOR CIGAR LIGHTERS. ALEXANDER LEE WALLAU, Cedarhurst, N. Y. Filed Feb. 21, 1927. Serial No. 169,899. 15 Claims. (Cl. 226—28.)

10. A filler for cigar lighters and the like, including a reservoir, connections adapted to connect said reservoir to a lighter, including means for effecting relative vertical motion between said lighter and the liquid level in said reservoir, whereby said lighter may be both above and below said liquid level, means for controlling the flow of liquid from said reservoir, and means for opening said controlling means when said lighter is below the liquid level and for closing said control means when the lighter is above the liquid level.

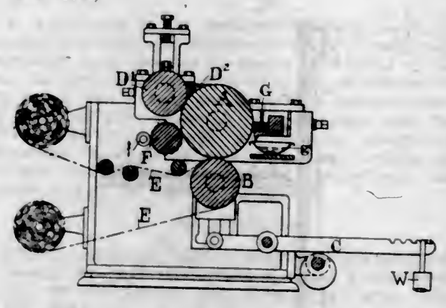
15. A filler for cigar lighters and the like containing an absorbent material including, in combination, a reservoir for liquid, flexible connection between said reservoir and said lighter including means adapted to project the lighter below and to raise it above the liquid level in the reservoir and valve control mechanism adapted to permit free passage of liquid to the lighter from the reservoir while the lighter is below the liquid level and to permit surplus liquid to drain back into the reservoir after the lighter is raised above the liquid level and means for closing the connection after said draining.

1,678,495. DIRIGIBLE HEADLIGHT. BERNARD BERGMAN, New York, N. Y. Filed Sept. 17, 1927. Serial No. 220,085. 12 Claims. (Cl. 240—62.)



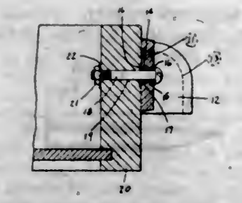
3. In a travelling vehicle provided with steering means, the combination of a pair of pivotally mounted headlights, coupling means whereby said headlights are connected to move in unison, hydraulic means independent of said coupling means for pivotally swinging said two headlights in unison, and means connecting said hydraulic means with said steering means whereby said headlights are pivotally operated coincidentally and in accordance with the steering means.

1,678,496. ELECTROMECHANICAL LAMP. CHARLES BERNARDONI and RENÉ-MARIE BERTHIER, Chambery, Savoy, France. Filed July 28, 1927. Serial No. 208,925, and in Switzerland Aug. 10, 1926. 11 Claims. (Cl. 240—10.5.)



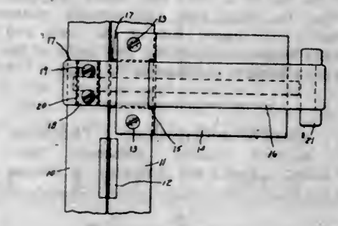
1. In an electro-mechanical lamp the combination, with a magneto-electric machine, a mechanism serving

to put into movement the movable portion of the machine, an incandescent lamp, of a casing enveloping the whole and divided into several shells made of moulded material, the fixed part of the machine, the fixed mem-



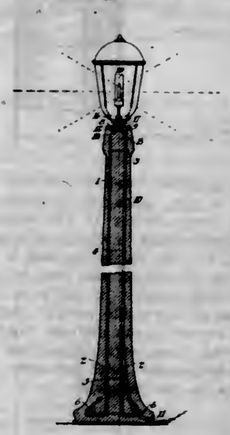
bers of the mechanism, the bearings of the shafts of the machine and of the mechanism, the members connecting the machine to the incandescent lamp being maintained in position solely by their confinement in the material forming the casing during moulding.

1,678,497. PRINTING PROCESS AND APPARATUS THEREFOR. JEHANGIR MANECKJI COOPER, Bombay, India. Filed Oct. 25, 1923, Serial No. 670,632, and in Great Britain Oct. 28, 1922. 8 Claims. (Cl. 101—176.)



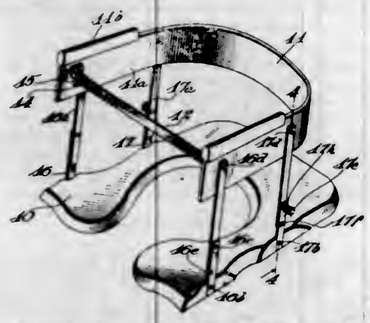
1. The process of printing designs or the like upon paper, cloth, or other material, which comprises, maintaining a body of colouring liquid at a fixed point in contact with the surface of a revolving printing roller, allowing a thin film of said liquid to be carried along with the roller, modifying said film to form a desired design to be printed, and transferring the modified film to the material to be printed.

1,678,498. VITREOUS DRAWER PULL. ALVIE C. CRIMMEL, Hartford City, Ind. Filed Mar. 28, 1927. Serial No. 178,881. 1 Claim. (Cl. 16—124.)



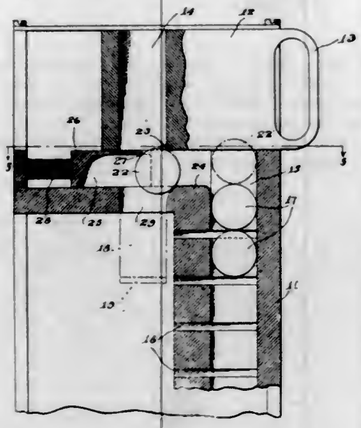
In a compensating drawer pull mounting a substantially integral rigid body consisting solely of a fragile vitreous material and provided with a plurality of substantially spaced openings extending therethrough at considerable distance apart for multiple anchorage upon a support, a relatively rigid one-piece slightly compressible ferrule receivable by each opening and projecting at its ends beyond the adjacent surface of the body, an outwardly directed flange on each end of the ferrule lying wholly beyond the adjacent surface of the body, one flange being engageable by an anchorage member and the other flange being engageable by the support for anchoring the body upon the support, and simultaneously for preventing cracking of the vitreous body immediately adjacent the openings or therebetween in the act of mounting the body upon the support or after the body is mounted and while on said support.

1,678,499. DOORCHECK. FLOYD K. EASTMAN, Kokomo, Ind., assignor to Concealed Door Check Co., Kokomo, Ind., a Corporation. Filed July 2, 1926. Serial No. 120,009. 6 Claims. (Cl. 16—82.)



1. A check strap of the character described, comprising a rubberized fabric body portion, a metal strip mounted therein, and a cross head pin secured at one end thereto and adapted to embrace one end of said metal strip while permitting said strip to have longitudinal movement with respect thereto.

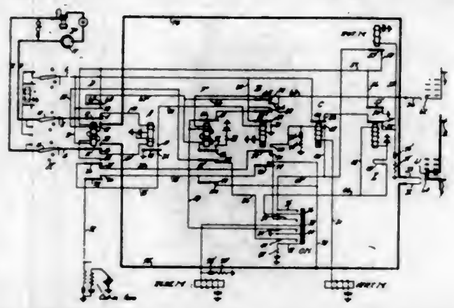
1,678,500. CONCRETE LAMP STAND. RUSSELL SCOTT ELLIS, Philadelphia, Pa. Filed Oct. 16, 1926. Serial No. 141,926. 5 Claims. (Cl. 72—85.)



1. A lamp stand formed of concrete having a liquid catch basin at the top thereof, and an axial projection extending upwardly from the bottom of said basin, adapted to receive and support a lamp casing; and means arranged to drain said basin independently of the exterior surface of said column.

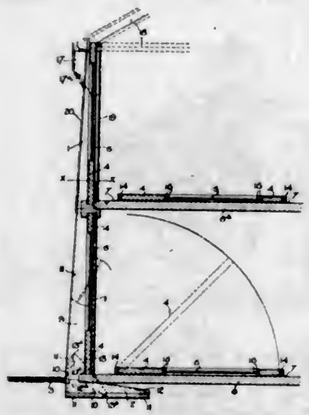
1,678,501. NURSERY SEAT. ABRAHAM G. FELDMAN, Chicago, Ill. Filed Apr. 14, 1927. Serial No. 183,812. 13 Claims. (Cl. 4—289.)

1. A nursery seat comprising a base, posts rigidly carried by the latter, a body rest above the base, links dropped from the body rest and pivoted intermediate of their ends to the upper ends of the posts and interlocking means respectively on the free ends of the links and in the intermediate portions of the posts.



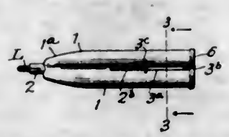
1,678,502. CHECK-CONTROLLED VENDING MACHINE. ARTHUR FORNEY, Baltimore, Md. Filed May 26, 1927. Serial No. 194,325. 4 Claims. (Cl. 194—79.)

1. A coin controlled vending machine comprising a frame having a coin magazine intersected by a plurality of slots perpendicular to the magazine chamber, a manually movable part having a coin slot registering at times with the coin magazine, and a detent adjustable to move in an elected slot and to support a predetermined elected number of coins in the magazine, means including said movable part to employ the upper-post coin for actuating the delivery mechanism and to move the detent from coin supporting position, and means to discharge the employed coin together with the other coins in the magazine.



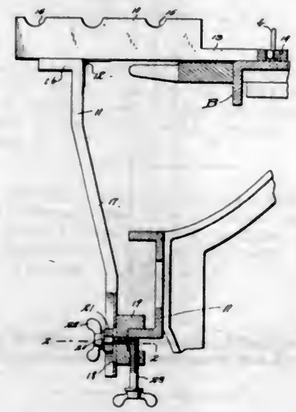
1,678,503. AUTOMATIC TELEPHONE SYSTEM. HERBERT M. FRIENDLY, Chicago, Ill. Filed Oct. 27, 1920, Serial No. 420,017. Renewed June 10, 1925. 78 Claims. (Cl. 179—18.)

1. In an automatic telephone system, a switch terminating a link consisting of telephonic conductors and a private conductor for inclusion in a temporary connection including a successive link between a calling and a called line, means for controlling the switch, and automatically applied means for incapacitating the switch



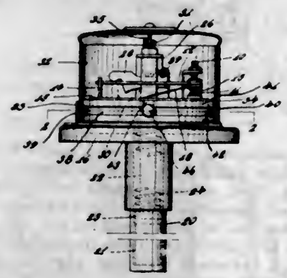
against the control means if the link engaged by the switch has an open private path without restoring the switch from the engaged line.

1,678,504. BUILDING CONSTRUCTION. CHARLES WILLIAM GLOVER, Pinner, England. Filed Mar. 3, 1926, Serial No. 92,036, and in Great Britain Dec. 10, 1925. 4 Claims. (Cl. 72—1.)



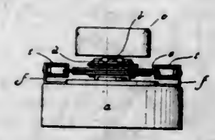
1. A method of erecting buildings which comprises the steps of erecting a plurality of columns having grooves to receive wall sections, moulding a plurality of wall sections on the ground adjacent the columns, allowing the wall sections to set, turning up each section into upright position between two columns, shifting a column to engage each wall section and fixing each column in position when shifted.

1,678,505. FINGER-TIP PENCIL. EUGENE GREGORY, Ann Arbor, Mich. Filed Mar. 5, 1926. Serial No. 92,577. 6 Claims. (Cl. 120—19.)



2. A pencil comprising a plurality of outer tubes arranged parallel, an inner tube, and an ejector operating in the inner tube and having an operating member extending through a slot in the inner tube and lying between adjacent outer tubes; said outer tubes being tapered and closed at one end, and such tapered ends converging toward the inner tube.

1,678,506. ROLL RACK. ALBERT M. GUILLET, Charlotte, N. C. Filed May 17, 1927. Serial No. 192,008. 2 Claims. (Cl. 248—20.)



1. A roll rack of the character described comprising a member provided upon its upper face with a transversely extending recess adapted to receive a roll and at its rear end with an opening whereby it may be attached to the upper face of the roller beam of a spinning frame by the usual lever screw, and a leg mounted upon the forward end of said member and extending downwardly therefrom, the leg at its lower end having vertically adjustable means whereby it may be clamped upon the spindle rail of the spinning machine.

1,678,507. AUTOMATICALLY CONTROLLED SWITCH. GEORGE HEGEMAN HART, West Hartford, Conn. Filed Nov. 20, 1924. Serial No. 751,049. 10 Claims. (Cl. 200—168.)

1. In a device of the character described, a body having a cylindrical portion provided with a circumferential groove and a notch entering thereinto, a rotary cover having a skirt portion encircling said cylindrical portion and provided with a lug adapted to enter said notch and engage in said groove, and resilient means in said groove and against which said lug is adapted to engage for preventing accidental removal of the cover from said body, said lug being movable in said groove to permit angular adjustment of said cover, and said resilient means engaging said cover and acting as a drag thereon to hold the cover in any desired position of adjustment.

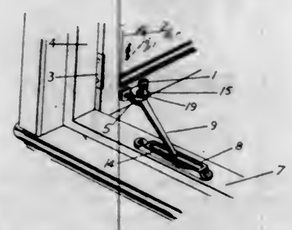
1,678,508. ELECTRIC SWITCH. GERALD W. HART, West Hartford, Conn., assignor to The Hart Manufacturing Company, Hartford, Conn., a Corporation of New Jersey. Filed Jan. 10, 1923. Serial No. 611,789. 2 Claims. (Cl. 200—166.)

1. A terminal for electric switches comprising a pair of contact arms adapted to receive and grasp between them a switch blade, each arm comprising a plurality of superimposed, slightly spaced apart spring strips, the free ends of the strips of the two arms being bent towards each other to engage the interposed switch blade, and the edges of said bent over ends being interrupted so that each strip has a plurality of contact points adapted to engage said switch blade.

1,678,509. CARLINE REENFORCEMENT AND LOAD-LIFTING ARRANGEMENT. CHARLES HARTER, St. Louis, Mo. Original application filed Feb. 7, 1925, Serial No. 7,560. Divided and this application filed Jan. 25, 1926. Serial No. 83,562. 8 Claims. (Cl. 105—355.)

1. In a railway car, the combination of roof sheets, carlines positioned above said roof sheets, and a beam extending normal to said carlines and supported thereby and separated from said roof sheets.

1,678,510. CARLINE REENFORCEMENT AND LOAD-LIFTING ARRANGEMENT. CHARLES HARTER, St. Louis, Mo. Filed Feb. 7, 1925. Serial No. 7,560. 13 Claims. (Cl. 105—355.)



2. In a railway car, the combination of a roof, a plurality of carlines, each comprising a tension and a compression portion, and a member spaced below said roof extending normal to said carlines and secured to each of said tension and compression portions.

1,678,511. STAY FOR CASEMENT WINDOWS AND THE LIKE. EDWARD HEFFERNAN, Gladesville, near Sydney, New South Wales, Australia, assignor to David O. Young Narme, Sydney, Australia. Filed May 4, 1927, Serial No. 188,672, and in Australia May 26, 1926. 1 Claim. (Cl. 292—272.)

Stay means for casement windows and the like comprising a guide with slot therein adapted to be secured on the window or like frame, an arcuately movable arm with a projection fitting and slidable in said guide slot, an integral holed plate on said arm, frictional material embedded in the holes of said plate, a bracket attachable to the window or the like with a groove therein, a plate extension on said bracket with internally screw-threaded boss on said plate extension, a holed pressure plate with a lug adapted to fit the groove in the bracket, and an adjustable pressure regulating screw passable through the holes in the plate on the arm and the pressure plate and

engageable with said boss on the plate extension of the bracket when said plates are assembled so that the plate on the arm will be positioned between the plate extension

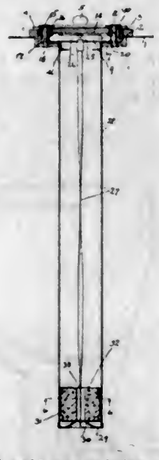
of the bracket and the pressure plate, both the plate on the arm and the pressure plate fitting about the boss on the plate extension of the bracket.

1,678,512. HINGE MEANS FOR CASEMENT WINDOWS. JOHN L. C. HEINZ, Chicago, Ill. Filed Aug. 18, 1926. Serial No. 129,891. 7 Claims. (Cl. 16—160.)

1. Hinge means for a casement window, said hinge means comprising means fastened to the window near its upper part for tilting the upper part of the window inwardly from the frame and means apart from said first means to enable moving the lower part of the window upwardly from behind the window stool while the upper part is being tilted, and a lever with means for positively opening and closing the window and for holding it in its opened position and also in its closed position.

1,678,513. LIQUID GAUGE. JOHN B. HOWER and JOSEPH V. ZELLER, Akron, Ohio, assignors to The Akron-Selle Company, Akron, Ohio, a Corporation of Ohio. Filed Mar. 5, 1923. Serial No. 622,736. 2 Claims. (Cl. 73—82.)

1. In a liquid level gauge, the combination of a tubular head provided with an inwardly directed flange, said head being adapted to be mounted in an opening in the wall of a liquid reservoir, a dial plate loosely mounted on said flange, a tubular spacing ring on said dial plate, said ring being spaced from the inner wall of said head, an annular member mounted on said ring, said member having an inwardly directed flange, a transparent disc mounted on said flange, and means engaging said dial



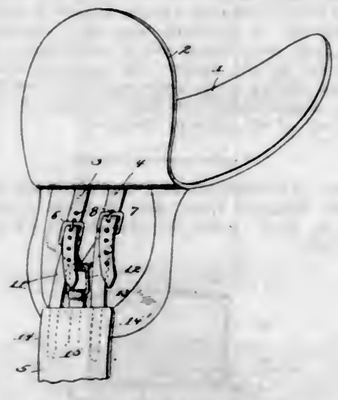


plate and said head, said means being adapted to lock said dial plate, spacing ring, annular member, and disc in tight relation.

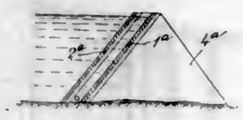
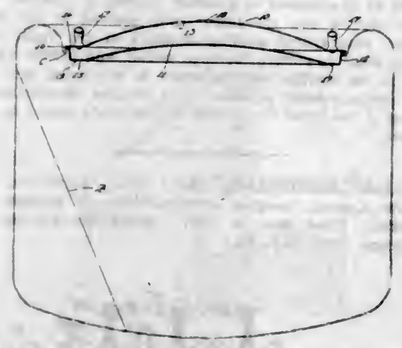


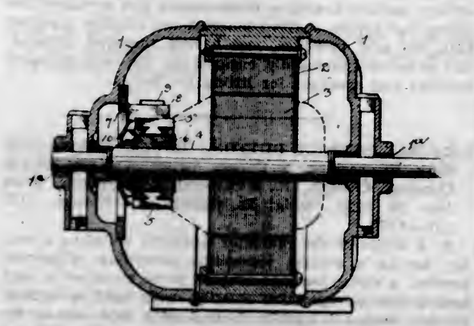
1,678,514. SADDLE GIRTH. WILLIAM P. HULBERT, Middleburg, Va. Filed Nov. 9, 1927. Serial No. 232,066. 8 Claims. (Cl. 54—23.)

1. The combination with a riding saddle having a plurality of billets, and a grith having a plurality of buckets, one to each billet, of an equalizing means connected directly to and connecting all of the buckles to the girth, whereby when the respective buckles and billets are connected and any pair of the respective buckles and billets are tightened, the strain therefrom will be equalized upon all of the buckles and billets.



1,678,515. PERMANENT DAM AND WEIR. SIGURD HOYER, Oslo, Norway. Filed Mar. 10, 1925, Serial No. 14,382, and in Norway Mar. 12, 1924. 3 Claims. (Cl. 61—30.)

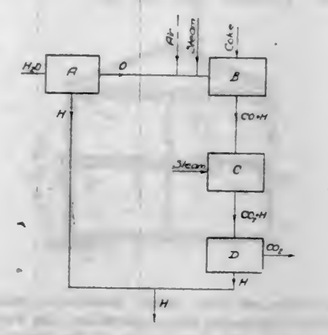
1. A substantially permanent dam, comprising in combination, a closure section coextensive with the width of a stream, and having another cooperating closure section upstream therefrom at a distance not greater than the height of said first closure section, said closure section having a height not less than the height of said second closure section, the space thereby formed between said closure sections being connected to the stream upstream of the dam, whereby said space is normally filled with a body of water exerting a back pressure on said



second closure section sufficient to relieve said section of all unbalanced water pressures, said water space being emptiable by the breakdown of said first closure section whereby said second closure section receives the entire stream-pressure.

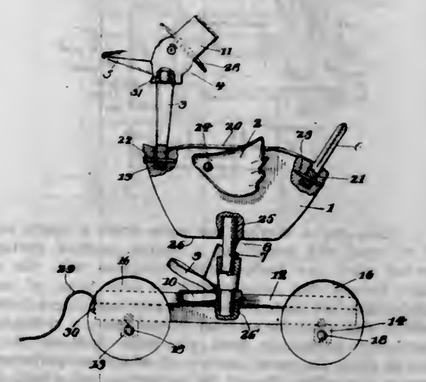
1,678,516. COVER FOR WASHING-MACHINE TUBS. FRED W. JUENGST, New Britain, Conn., assignor to Landers, Frary & Clark, New Britain, Conn., a Corporation of Connecticut. Filed Dec. 30, 1926. Serial No. 157,958. 3 Claims. (Cl. 220—40.)

1. A cover for washing machine tubs having a chamber provided with a convex lower wall and a concave upper wall, said lower wall having adjacent its edge a plurality of air holes and said upper wall having venting means at the highest point of the chamber.



1,678,517. SHORT-CIRCUITING DEVICE FOR MOTOR COMMUTATORS. EVERETT P. LARSH, Dayton, Ohio. Filed Mar. 5, 1920. Serial No. 363,402. 26 Claims. (Cl. 172—279.)

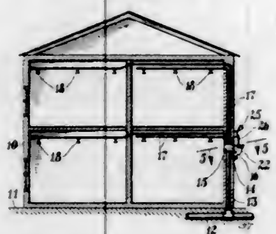
11. In a short circuiting device for commutators, a series of commutator bars to be interengaged, an annular series of contact slugs in juxtaposition thereto and ra-



dially movable by centrifugal influence, elongated outer margins upon the slugs inclined to the axis of rotation of the commutator, and a yielding spring tensioned member engaging the inclined faces in the outward movement of the slugs against the tension of which said slugs are radially movable into engagement with the commutator bars.

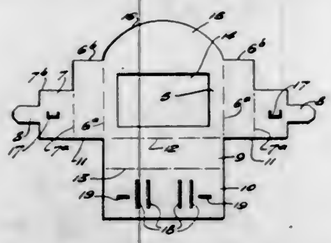
1,678,518. PROCESS OF MAKING A MIXTURE OF NITROGEN AND HYDROGEN. FRANS GEORG LILJENROTH, Stocksund, Sweden. Filed Oct. 17, 1922, Serial No. 595,171, and in Sweden Dec. 3, 1921. 2 Claims. (Cl. 23—7.)

1. Method of producing a gas mixture containing substantially hydrogen and nitrogen in certain proportions, which comprises electrolytically decomposing water into oxygen and hydrogen, using the oxygen obtained together with steam and atmospheric air for continuously operating a water gas generator, converting the carbon monoxide of the water gas generated by means of steam into carbon dioxide while setting hydrogen free, removing the carbon dioxide and mixing the remaining gas with the hydrogen obtained in the electrolysis, the supply of electrolytic oxygen, atmospheric air and steam to the water gas generator or being so regulated that the nitrogen of the generator gas will be about one third by volume of the total quantity of hydrogen produced.



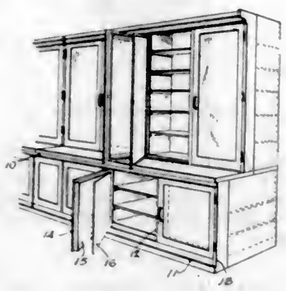
1,678,519. FIGURE WHEELED TOY. GEORGE BUFORD LYNCH, Tucson, Ariz. Filed Oct. 29, 1927. Serial No. 229,716. 6 Claims. (Cl. 46—45.)

1. A wheeled toy comprising a wheeled platform having certain of its wheels eccentrically mounted and the remainder of its wheels concentrically mounted, a figure



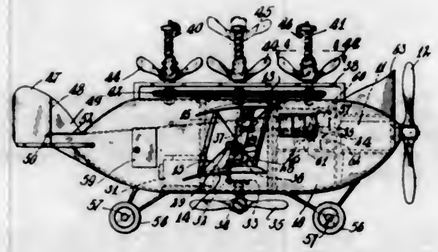
simulating the appearance of a duck supported from and above said platform and including a body portion shiftable on a vertical pivot and provided with a pair of spaced sockets, a tail piece shiftable on a horizontal pivot and extending above said body, a neck shiftable on a horizontal pivot and extending above said body, said tail piece and neck extending into said sockets, and a shiftable head movable on a vertical pivot and carried by the neck piece.

1,678,520. FIRE SAFETY DEVICE FOR DWELLINGS AND FACTORIES. ALEXANDER MERCER, Wainfleet, Ontario, Canada. Filed May 19, 1927. Serial No. 192,605. 3 Claims. (Cl. 169—19.)



1. A device of the class described, comprising a water supply, a casing with a chamber, the water supply being connected with the bottom of the casing, sprinkler connections to different parts of a building, and connected to the top of the chamber, valves operated by stems in these connections, and adjacent the top of the chamber, levers pivoted to the chamber and connected to the stems, a cartridge holder with cartridges secured to the outside of the building, the free end of the levers projecting over the cartridges, fuse wires to different parts of the building, and means for exploding a cartridge individually as certain of the fuse wires burn, the shot from the cartridge moving the adjacent lever and causing certain sprinklers to operate.

1,678,521. DISPLAY BOX. WILLIAM J. MITCHELL, Waco, Tex. Filed Aug. 4, 1926. Serial No. 127,066. 1 Claim. (Cl. 206—44.)



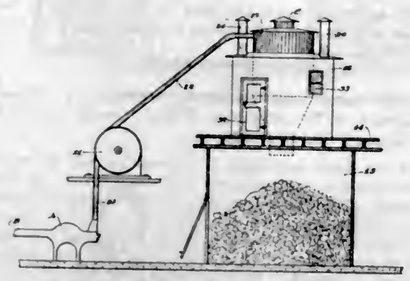
A blank for a display box made from a single sheet of material and comprising a central portion having a curved edge, two double flaps contiguous with the side edges thereof, the outer section of each being of lesser height than the inner section and each carrying a reduced locking flap upon its extreme central edge, a rectangular double-flap extending from the edge opposite to the curved edge, the outer section of which is apertured to receive the locking flap of the respective first double flap, and cooperative locking means carried by the said outer sections and all of the double flaps for holding the flaps interengaged and the locking flaps against sliding and unlocking.

1,678,522. STORE SHELVING FRONT UNIT. JAMES B. MURDOCH, Milwaukee, Wis. Filed Apr. 29, 1927. Serial No. 187,458. 3 Claims. (Cl. 211—148.)

3. A separate store-shelving front-unit constituted of a base front section and an upper front shelf section, with a ledge interposed between the said sections and designed to be attached to a fixture already in position, the upper section and the ledge being secured to the said fixture, with spaced guiding members at the under side of the ledge to receive the base section and permit variation in its position with relation to the ledge, and the said sections being provided with shallow compartments glazed at the front for display of the goods stored in the fixture.

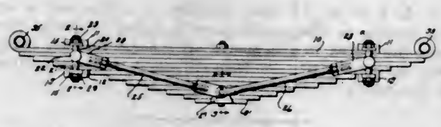
1,678,523. AEROPLANE. LOUIS NAGY, Hamilton, Ontario, Canada, assignor of three-tenths to Michael Daradice. Filed Sept. 3, 1927. Serial No. 217,346. 3 Claims. (Cl. 244—15.)

1. In a device of the class described, a propeller operatively connected with a prime mover and arranged for lifting the device, shafts connected for rotation together with the said propeller, and having threaded portions, and propellers threadedly engaged on the said threaded portions and arranged for lifting the device.



1,678,524. CONTROL BUTTON. EMIL J. NIELSEN, Oak Park, Ill., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill., a Corporation of Illinois. Filed Nov. 29, 1922. Serial No. 603,927. 27 Claims. (Cl. 116—129.)

8. A device of the character described including a button having a central rearwardly extending cylindrical portion, a spring member adapted to be mounted in said button and in operative relation with said cylindrical portion, means integrally formed with said button for retaining said spring member in its mounted position, a member for engaging the opening in said cylindrical portion and to be engaged by said spring member so that when said button is moved in a rotary direction the said second member will rotate with said button, said spring member adapted to permit the button to be removed from said second member by pulling the said button away from

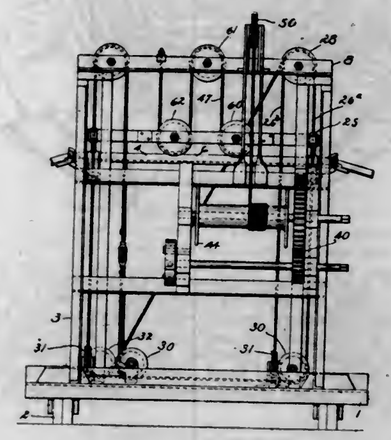


said second member, and a member integrally formed with said spring member for indicating the extent to which said second member has been rotated.

1,678,525. METHOD AND APPARATUS FOR CLEANING AND SEPARATING HAIR. EINAR J. OLSEN, Minneapolis, Minn., assignor of one-half to Sealy Mattress Company of Minnesota, St. Paul, Minn., a Corporation of Delaware. Filed July 3, 1926. Serial No. 120,489. 14 Claims. (Cl. 19—65.)

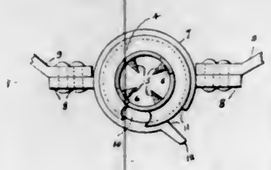
1. The method of cleaning hair consisting in passing the hair through a picker, a separator, drawing and forcing the hair up and into a cyclone and agitating the hair in the cyclone in a manner so as to cause the short hair to be thoroughly separated from the longer hair, the separation being accomplished by shaking the hair as it passes through the cyclone and providing vertical passageways for the short hair to fall through so as to accomplish a thorough separation of the short hair and dirt from the long hair.

1,678,526. VEHICLE SPRING. JAMES PARKHILL, Flint, Mich. Filed Jan. 20, 1926. Serial No. 82,411. 3 Claims. (Cl. 267—48.)



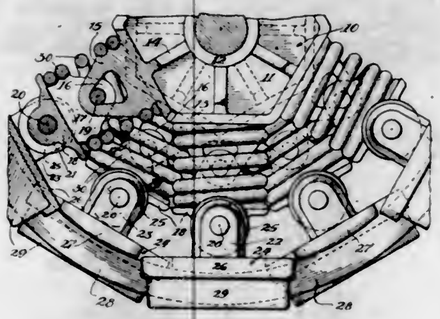
1. A leaf spring provided with means embracing some of its leaves at a fixed distance from the center of the spring, said means including a toggle joint normally in alinement, and a distance rod connected to the center of said joint and to a fixed point vertically displaced from the center of deflection of the spring.

1,678,527. DEVICE FOR PROJECTING MARBLES AND THE LIKE. NORA D. PAYNE, New York, N. Y. Filed Dec. 8, 1927. Serial No. 238,560. 4 Claims. (Cl. 273—129.)



1. A projecting device of the class described having a head, a staff and operating means, said head providing a pocket adapted to receive and locate the object to be projected; said operating means comprising an actuating rod, and a lever pivotally mounted within said head operatively associated with said actuating rod.

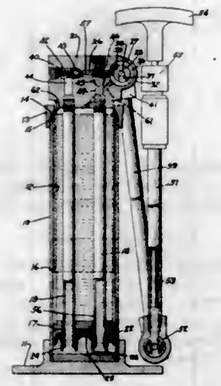
1,678,528. LOADING ELEVATOR. DONALD W. PERIN, Brookline, Mass., assignor, by mesne assignments, to American Freight Service, Inc., New York, N. Y., a Corporation of Delaware. Filed Feb. 12, 1926. Serial No. 87,867. 16 Claims. (Cl. 187—11.)



10. In an elevating mechanism, a movable member with portions at the corners thereof running in uprights constituting a fixed framework, lifting mechanism having a drum and a flexible member windable upon said drum and connected with one side of the movable body, said flexible member running over a pulley secured to a connecting member between two uprights and running under a pulley upon the movable member with its end fixed to the said cross-member between the two uprights.

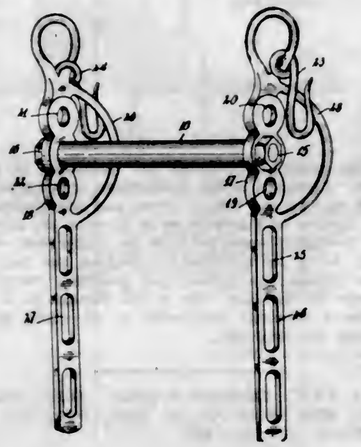
1,678,529. STEADYING DEVICE FOR ROTATABLE FLAG STANDARDS OR POLES. ROBERT B. PETERS, Brooklyn, N. Y. Filed Oct. 5, 1927. Serial No. 224,183. 1 Claim. (Cl. 116—174.)

A steadying device for flag poles, comprising an annular flange member forming a guide channel, rigidly attached to the flag pole, said channel being fitted with ball or roller bearings, a ring member rotatably mounted in said guide channel, cooperating cut out portions in the flanged member and in the ring member, to permit ingress and egress of the halyards when the said cut out portions register, a guide lip on the lower end of ring member; arms are provided diametrically opposite each other on the outer surface of ring member to which are fastened braces the opposite ends of which may be secured to a suitable stationary structure, holding the ring member set but permitting the flange member to revolve with the standard or pole therein, without the braces interfering with the halyards.



1,678,530. WHEEL. DARIUS T. PHILLIPS, Chicago, Ill. Filed May 28, 1926. Serial No. 112,192. 12 Claims. (Cl. 152—31.)

1. In a wheel, the combination of a hub portion, a series of tread members circumferentially arranged around the hub, mountings for pivotally connecting said tread members with said hub portion, and a continuous tire carried by said tread mountings and lying in laterally adjacent relation to said tread members and supplementing the ground contact afforded thereby, substantially as described.

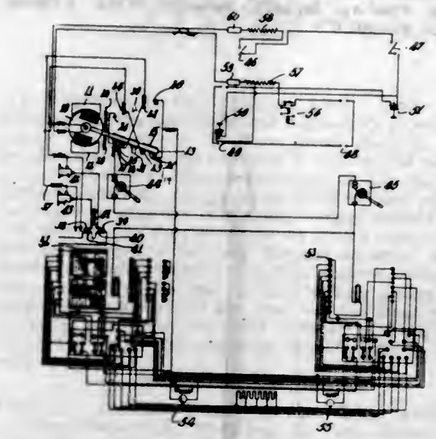


1,678,531. LIFTING JACK. TIMOTHY C. POMEROY, Minneapolis, Minn. Filed Oct. 1, 1925. Serial No. 59,909. 6 Claims. (Cl. 138—9.)

1. A lifting jack comprising in combination, a cylinder adapted to contain an inelastic fluid, a hollow plunger movable in said cylinder, a lifting head on said plunger having fluid passages connecting it with said cylinder and with the interior of said plunger, valves in said passages for controlling fluid flow therethrough when the plunger is raised, a pump having a pivot in said head, a by-pass in said pivot and said head for permitting the return of the fluid from the cylinder to the interior of said plunger, and means operable by rotation of said pivot to open one

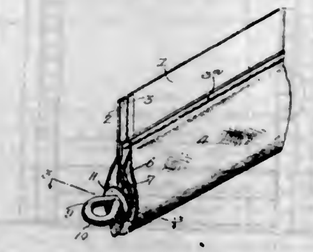
of said valves to allow the fluid in the cylinder to flow through said by-pass and return to said plunger to lower the jack.

1,678,532. BIT FOR HORSES. TERENCE Q. PREECE, Westbury, N. Y. Filed Nov. 6, 1925. Serial No. 67,247. 2 Claims. (Cl. 128—223.)



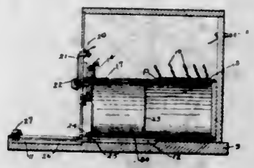
1. In a bit of the class described, a mouthpiece, a copper coating on said mouth piece, adapted to slowly react with the saliva in the mouth of a horse forming copper salts for stimulating the salivary gland to prevent drying of the mouth of the horse.

1,678,533. ELECTRIC-CAR-CONTROL APPARATUS. PHILIP A. RENTA, New York, N. Y. Filed Aug. 17, 1925. Serial No. 50,566. 8 Claims. (Cl. 191—8.)



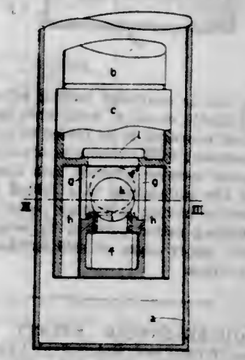
1. In a device of the class described, the combination of car motors, power leads therefor, a polarized relay having a projecting contact arm, a pair of contacts on each side of the contact arm, stationary contacts straddling the contact arm and arranged four on each side, so

that with the contact arm in one position, the pair of contacts on one side of the contact arm engage with the four stationary contacts on the same side, and with the contact arm in another position the pair of contacts on the other side of the contact arm engage with the other four stationary contacts, every one contact on the contact arm being engageable with two adjacent contacts of the said stationary contacts, a connection from the first contacts of the said two rows of four contacts, counting from the end of the contact arm, to the current



return of the car motors, a connection from the fourth contacts of the said two rows of four contacts to the current supply of the car motors, a connection from the second contact of one row to the third contact of the other row and to one of the power leads, and another connection from the third contact to the second contact and to the other of the power leads, so that upon a change in polarity of the power leads, the contact arm moves from one position to another to not alter the polarity of the current supply to the same car motors.

1,678,534. MEANS FOR SECURING DRAW STICKS IN WINDOW SHADES. EDWARD REUKAUF, Jr., Philadelphia, Pa., assignor to Carey-McFall Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Jan. 19, 1928. Serial No. 247,862. 6 Claims. (Cl. 156—26.)

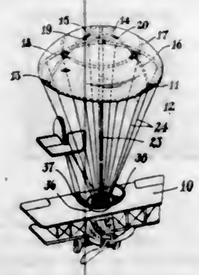


1. In combination with a window shade having a hem formed therein and a drawstick located in said hem, means for securing the draw-stick in said hem comprising a flap formed by folding the shade material over the end of the draw-stick; a retaining element adapted to be passed through said flap and to be secured in said draw-stick for securing the flap in place.

1,678,535. TUNING DEVICE. DEWEY EUGENE ROCKENFELDER, Montpelier, Ohio. Filed Mar. 23, 1925. Serial No. 17,714. 4 Claims. (Cl. 171—119.)

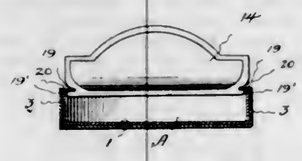
1. A tuning device for radio circuits, comprising a primary winding and a secondary winding arranged in inductive relation, a pair of metallic elements disposed one in operative relation to each winding, each of said metallic elements being equipped at one end with an annulus, the latter having an aperture therein, levers for moving the metallic elements, one end of each of which is bent at right angles and engaged in the aperture of one of the annuli, said levers being independently operable to selectively move said metallic elements, and means for varying the inductance of each winding.

1,678,536. CIRCULATION OF LIQUIDS IN PREHEATERS AND STEAM GENERATORS. ADOLF SCHNEIDER, Kelheim, Germany, assignor to Niederbayerische Cellulosewerke, Kelheim-on-the-Danube, Germany, a Corporation of Germany. Filed Sept. 28, 1925, Serial No. 59,119, and in Germany July 22, 1925. 2 Claims. (Cl. 122—318.)



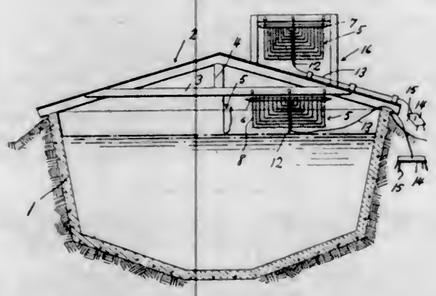
1. In a steam generator, a Field tube comprising an outer steam and water tube and an inner down flow tube, a chamber at the lower end of said down flow tube, the said chamber comprising compartments through which the liquid flows downwardly, an inner compartment in communication with said first-mentioned compartments and in which the direction of flow of the liquid is reversed, a non-return valve in said inner compartment, and further compartments in said chamber and through which the liquid descends into the outer steam and water tube.

1,678,537. PARACHUTE. MAX SCHONBRUN, New York, N. Y. Filed July 20, 1927. Serial No. 207,054. 4 Claims. (Cl. 244—21.)



1. A parachute of the class described comprising an aluminum tubular ring member, radially extending tubular arms communicatively connected with said ring member, radially extending tubes communicatively connected with said arms, a lower ring comprising flexible sections of tubular material communicatively connected with said

radially extending tubes, a conduit connected with said aluminum ring adapted to supply compressed air thereto and to said lower ring and radially extending arms for

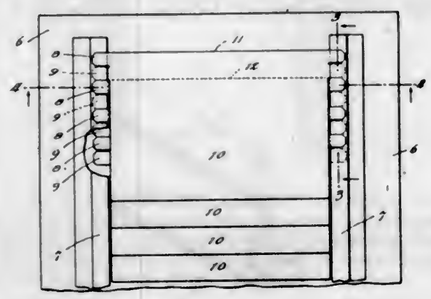


expanding said parachute from closed to open position, and ropes attached at one end to said lower ring and at the other end to a wing of an aeroplane.

1,678,538. DISPENSING AND DISPLAY CONTAINER OR BOX. ARNOLD J. TANNER, North Haven, Conn. Filed July 19, 1926. Serial No. 123,371. 3 Claims. (Cl. 206—44.)

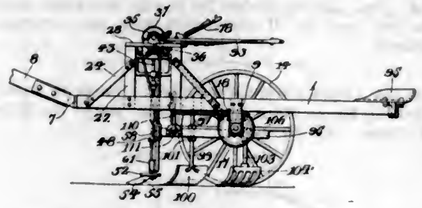
3. A folding box or container having an outer member and an inner foldable member; said inner member having lateral extensions arranged to be folded to form side walls of the inner member; said extensions bearing on the side walls of said outer member whereby both members through pressure alone are maintained in a folded condition and said inner member having a display portion arranged to be held in a folding raised position by means comprising inwardly turned upper edges of said extensions engaging said display portion.

1,678,539. OIL-RESERVOIR SAFETY APPLIANCE. GEORGE LEON TICEHURST, Bakersfield, Calif. Filed Aug. 17, 1926. Serial No. 129,766. 1 Claim. (Cl. 173—31.)



In means for the purpose described, an overhead support, an electricity gathering device suspended from the support and having a horizontal bar with pointed ends, a vertical spindle bar pendent from the first named bar and pointed at its lower end, and U-shaped wires in vertically nested relation connected at their ends to the first named bar and at intermediate points of their length to the pendent bar and having at intervals in their length closely arranged cross pieces with pointed ends, and a conductor connected to the pendent bar of said device for grounding electric current therefrom.

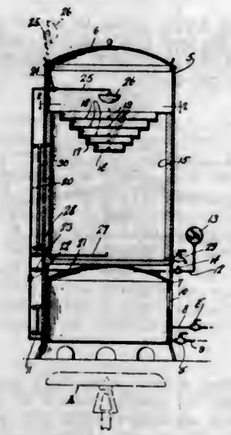
1,678,540. PIPETTE. SIMEON TRENNER, Philadelphia, Pa. Filed Apr. 28, 1925. Serial No. 26,472. 4 Claims. (Cl. 23—292.)



1. A pipette comprising a chamber, and a capillary passage terminating abruptly in said chamber so that the area of the passage at the point where it enters the chamber is substantially the same as that of the rest of the passage.

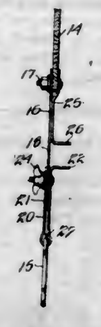
1,678,541. VISIBLE CARD INDEX. ALWIN VON AUW, Brooklyn, N. Y., assignor to Boorum & Pease Company, Brooklyn, N. Y., a Corporation of New York. Filed July 29, 1926. Serial No. 125,694. 10 Claims. (Cl. 129—16.)

1. A visible index member comprising a body in combination with a duplex ear projecting laterally from each side of the body and integral therewith, the two lobes of each ear being at different heights and the upper edge of each ear merging into the upper edge of the body and each ear being of its maximum vertical dimension at its juncture with the body.



1,678,542. COTTON-CHOPPING MACHINE. WALTER WALLACE WATKINS, Moulton, Ala. Filed Feb. 15, 1928. Serial No. 254,452. 5 Claims. (Cl. 97—17.)

1. A machine for the purpose set forth a mobile supporting structure, a vertically and horizontally adjustable carrier bar supported therefrom, plant chopping and ground working elements connected to said bar and bodily shiftable therewith, means independent of said bar for vertically adjusting said chopping element, and means for angularly adjusting said ground working element.

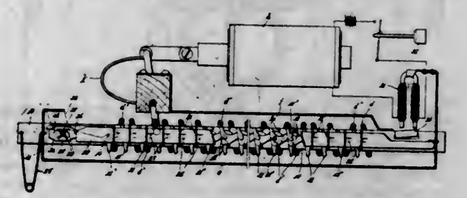


2. In a machine for the purpose set forth a mobile supporting structure, a vertically disposed actuating shaft driven from said structure, a radially disposed cutter at the lower end of the shaft, ground working devices arranged one in advance of the other and positioned rearwardly of said cutter, means for vertically adjusting the cutter and means for angularly adjusting the ground working devices.

1,678,543. COFFEE PERCOLATOR. REID WATSON, Lawrenceville, N. J. Filed Sept. 24, 1927. Serial No. 221,837. 1 Claim. (Cl. 53—3.)

In a percolating device of the character described, a water chamber, a coffee chamber, said water chamber adapted to be disposed over a suitable heating unit, a steam conducting pipe extending from the water chamber, said pipe having a discharge end within the upper portion of the coffee chamber, a branch pipe connecting the steam pipe with the bottom portion of the coffee chamber, whereby coffee from the bottom of the coffee chamber will be conducted through the steam pipe and into the upper portion of the coffee chamber, a coffee container arranged within the upper portion of the coffee chamber and under the discharge end of the steam pipe, said container being provided with a stepped wall converging toward the central opening in its bottom, and foraminous plates arranged within the coffee container and upon the steps formed in the wall of said container, said plate being adapted to support a quantity of coffee.

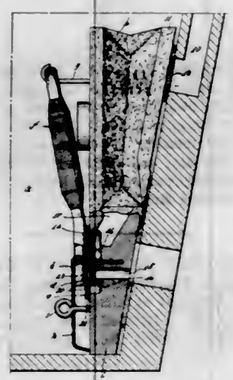
1,678,544. HARNESS STRAP. WILLIAM T. WHITAKER, Greenville, S. C. Filed Sept. 29, 1927. Serial No. 222,837. 6 Claims. (Cl. 139—88.)



1. A harness strap for looms comprising a fabric end piece, a hook, and means for adjustably connecting the fabric end piece and hook comprising a slotted serrated bar, a member for engagement therewith, means for binding the bar and member together, and finger pieces carried by said bar and said member whereby they may be engaged by the finger and thumb and the strap shortened, substantially as set forth.

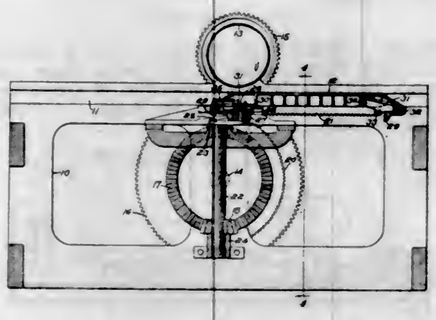
1,678,545. PROCESS OF MAKING RUBBER BRUSHES. ROBERT MORSE WITHYCOMBE, Sydney, New South Wales, Australia. Original application filed Mar. 31, 1925, Serial No. 19,708. Divided and this application filed Feb. 2, 1926. Serial No. 85,572. 3 Claims. (Cl. 300—21.)

1. The method of making brushes of that type which include a spirally wound rubber strip formed with filaments along one of its longitudinal sides, comprising winding the strip upon itself, while at the same time tensioning the nonfilamentous side with a progressively varying tension.



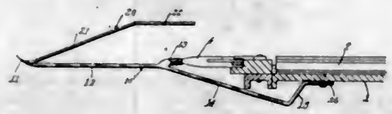
1,678,546. ORGAN STOP ACTION. JOHN T. AUSTIN, Hartford, Conn., assignor to The Austin Organ Company, Hartford, Conn., a Corporation of Connecticut. Filed Jan. 12, 1926. Serial No. 80,807. 16 Claims. (Cl. 84—345.)

10. In combination, a plurality of elements each constituting a part of a respective stop action and each having an "on" position and an "off" position, a longitudinally



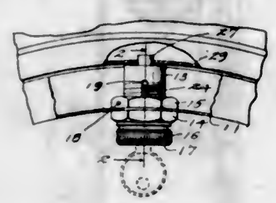
movable trace having a plurality of loosely mounted actuators thereon adapted to be simultaneously set by engaging the same with the set elements upon one movement of the trace in a given direction, and means for simultaneously and automatically locking said actuators in set position when said trace is so moved, said locking means holding said actuators in locked position upon the next movement of said trace in the same direction and then releasing said actuators.

1,678,547. ELECTROPNEUMATIC VALVE MECHANISM. BASIL G. AUSTIN, Hartford, Conn., assignor to The Austin Organ Company, Hartford, Conn., a Corporation of Connecticut. Filed May 24, 1926. Serial No. 111,171. 2 Claims. (Cl. 84—338.)



1. In an electro-pneumatic valve mechanism, a chamber, a plurality of ports leading from said chamber, a perforated cover over said chamber, a magnet over said cover, a fixed centrally located guide and positioning pin passing through said chamber, and an armature in said chamber between said ports and cover and having a centrally disposed opening receiving said pin whereby said armature is solely guided in its movements by said pin, said cover having a centrally disposed aperture receiving said pin whereby said cover is held in position.

1,678,548. MECHANICAL MOVEMENT. FRANK R. BELLUCHE, Mansfield, Mass. Filed Aug. 31, 1923. Serial No. 660,332. 13 Claims. (Cl. 101—282.)

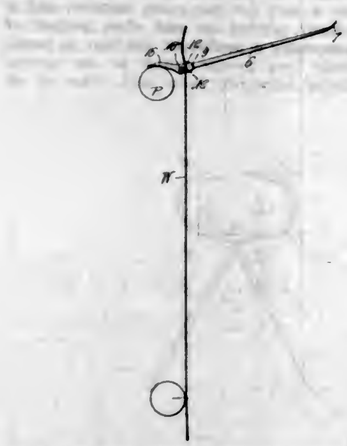


1. In a press, the combination of a cylinder; a bed; mechanism for reciprocating said bed, including two racks carried by said bed and segments meshing with said racks, respectively, and rotated in opposite directions, respectively; gearing connecting said cylinder and said segments and affording a ratio of two revolutions of said cylinder to one revolution of each gear segment per cycle of the press, and mechanism for moving said racks lengthwise into and out of engagement with their respective segments.

1,678,549. PICK-UP GRAIN GUARD. PETER H. BERGEN, Goessel, Kans. Filed Apr. 10, 1925. Serial No. 22,147. 1 Claim. (Cl. 56—313.)

In combination with a grain binder, the binder platform and the cutter bar thereof, a pick-up guard embodying a substantially wide bar having its forward extremity tapered and extended upwardly, a rod secured to the forward end of the bar and extending upwardly and laterally, the free end of the rod overlying the cutter bar, a socket member connected with the substantially wide bar and extended rearwardly to fit over the guard of the cutter bar, said substantially wide bar extending downwardly from the socket member to a point beyond the point of connection between the platform and cutter bar, where the substantially wide bar extends upwardly and laterally engaging the under surface of the platform, and means for securing the laterally extended portion to the platform.

1,678,550. RIM LOCK. CARL G. BLOOM, Detroit, Mich., assignor of one-half to Cosimo M. Minardo, Detroit, Mich. Filed Nov. 29, 1927. Serial No. 236,513. 1 Claim. (Cl. 70—90.)

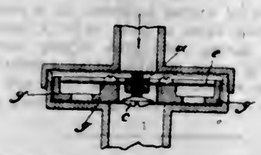


In combination with a wheel felly having a channel in its periphery, an opening formed in the base of the channel, a sleeve extended through said opening and having its exterior screw-threaded at its inner end, nuts upon the sleeve engaging the felly at the base of the channel and at the inner end of the felly to retain the sleeve in position, a lock barrel longitudinally shiftably mounted in the sleeve and held against rotation with relation thereto, a locking part associated with the barrel and adapted to engage in an opening in the sleeve in one position of the barrel and an axial projection upon the outer end of the barrel extending beyond the outer end of the sleeve when the barrel is in the last named position.

1,678,551. WIRE CUTTER. CHARLES BONOS, Easton, Pa. Filed Sept. 19, 1927. Serial No. 220,511. 2 Claims. (Cl. 140—123.6.)

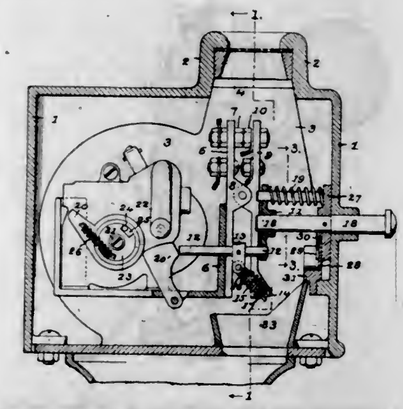
1. A wire cutter comprising a relatively long handle lever having a laterally projecting wire-cutting tooth near its front end, the incisal edge of said tooth being

disposed forwardly, and a relatively short post-engaging pressing lever fulcrumed to said front end of said handle lever, said pressing lever having a rear end for



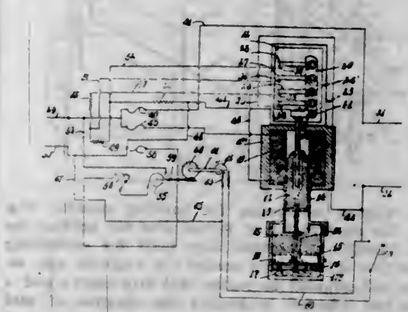
forcing the wire against said wire-cutting tooth when said pressing lever is swung about its fulcrum by engagement with a post.

1,678,552. METHOD OF LAYING TRAMWAY LINES. ALEXANDRE BOUILLON, Liege, Belgium. Filed Sept. 21, 1925, Serial No. 57,694, and in Belgium Sept. 26, 1924. 2 Claims. (Cl. 238—9.)



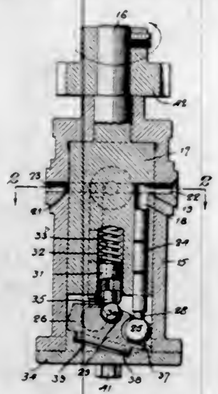
2. A tramway road-bed comprising a concrete foundation member having an oblong recess having its top open for substantially its full area and being defined by an unbroken, in a horizontal plane, wall of concrete, in combination with a wooden block of less length than said recess snugly fitting therein, and wedging means bearing against an end of said block and the opposed end wall of said recess to hold said block against substantial movement in said recess, said block and wedge being introduced into said recess through the open top thereof and in assembled relation therein lying between vertical planes defining the vertical profile of the said recess.

1,678,553. SOUND-PRODUCING INSTRUMENT. WILLY BRANDEGGER, Stuttgart, Germany. Filed Aug. 18, 1926. Serial No. 129,991, and in Germany Aug. 27, 1925. 4 Claims. (Cl. 116—142.)



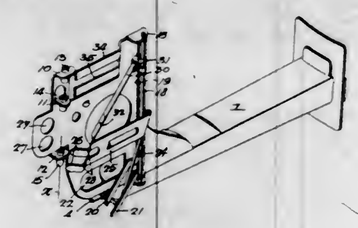
1. Sound producing instrument comprising an air tube, a plate-shaped body facing an end of said tube, a ring surrounding said body, resilient arms connecting said body with said ring and resilient arms extending inwardly from said ring, the inner ends of said inwardly extending arms being fixed to hold said body in position.

1,678,554. COIN-CONTROLLED ELECTRIC SWITCH. GEORGE A. BURGESS, Waukegan, Ill., assignor to Chicago Hardware Foundry Company, North Chicago, Ill., a Corporation of Illinois. Filed May 2, 1927. Serial No. 188,189. 3 Claims. (Cl. 194—78.)



1. In a time limit electric switch mechanism, the combination of a make and break switch of an electric supply circuit, a manually actuated push rod adapted to move said switch to its circuit make position, a power operated push rod connected to said switch and adapted to move the same to its circuit break position independent of the manually actuated push rod, a coin or token holder and support arranged in a path between said push rods to provide an operative connection between said rods and so that the manually actuated rod may function to move the switch mechanism to its circuit make position, and a chute for conducting a coin or token to said holder and support, said chute having an opening in its rear wall for the passage and escape of an excess coin or token.

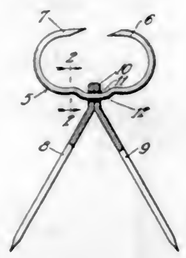
1,678,555. CIRCUIT CLOSER FOR ELECTRIC ALARMS. MANUEL T. CABRAL, Honolulu, Territory of Hawaii. Filed June 16, 1926. Serial No. 116,346. 2 Claims. (Cl. 200—97.)



1. A device of the class described, comprising a panel board, an L-lever pivotally mounted thereon, means for normally maintaining the L-lever in an upright position, a plurality of horizontal contact levers attached to the long arm of the L-lever, by means of pintle pins, stops secured to the L-lever serving as a repose against the contact levers, springs for tensioning the contact levers, the contact arms being engageable with contacts, and the short arm of the L-lever being movable to disconnect the contact arms from said contacts.

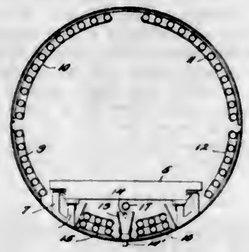
1,678,556. PUMP. ERNEST D. COPSON, Linwood, Pa., assignor to The Viscose Company, Marcus Hook, Pa., a Corporation of Pennsylvania. Filed June 15, 1927. Serial No. 199,056. 1 Claim. (Cl. 103—162.)

In a pump of the type described, a hollow casing, a cam plate forming a closure for one end of the casing, a driven rotary block seated against one end of the casing, a piston drive rotor seated against the cam plate at the opposite end of the casing, pistons mounted in the rotor and working in the block and means for thrusting said block and rotor against their respective seats, said means comprising a bearing ball seated in one face of the rotor and a spring pressed plunger accommodated in the adjacent face of the block, said plunger having a hard metal inset engaging the bearing ball.



1,678,557. TRIP MECHANISM FOR KNITTING-MACHINE STOP MOTIONS. ALFRED CRAWFORD, New Brunswick, N. J., assignor to Crawford Manufacturing Company, New Brunswick, N. J., a Corporation of New Jersey. Filed Apr. 13, 1926. Serial No. 101,739. 9 Claims. (Cl. 66—159.)

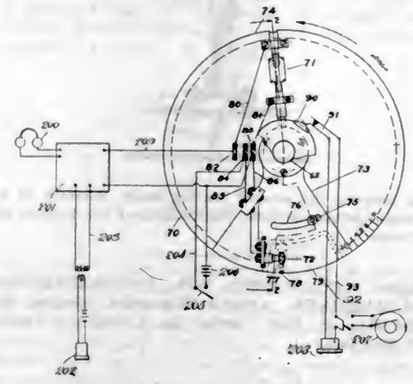
1. In tripping mechanism for knitting machine stop motions, the combination of thread eyes for guiding the knitting thread; a rotatable trip shaft for controlling the operation of said stop motion; a weighted arm secured to and adapted to rotate said trip shaft; and a resilient arm adapted to control the rotation of said trip shaft and to absorb the vibrations on said thread between said thread eyes.



1,678,558. HOG RING AND THE LIKE. WALTER V. CURTIS, Davenport, Iowa, and JAMES B. CURTIS, Chicago, Ill. Filed Aug. 6, 1927. Serial No. 211,201. 4 Claims. (Cl. 119—135.)

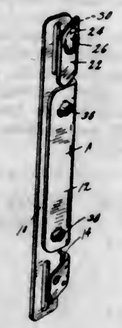
1. In a device of the class described, the combination of a ring adapted for engagement with the snout of a hog, said ring comprising a curved member having its ends inturned towards each other and pointed, and having its central portion provided with an offset which extends outwardly from the general curvature of the ring and acts as a seat for the prong member, and a prong member freely pivoted on said offset portion of the ring, and comprising a section of rod bent to establish two relatively long prongs united at the central portion, and flaring outwardly from each other at an

angle of substantially fifty degrees, the central portion of said prong member comprising a straight section of double thickness extending in a direction to substantially bisect the angle between the prongs, the ends of the prongs being sharpened, and the straight section aforesaid being perforated with a hole of sufficient size to freely accommodate the offset portion of the ring, and to allow the prong member to swing freely thereon, substantially as described.



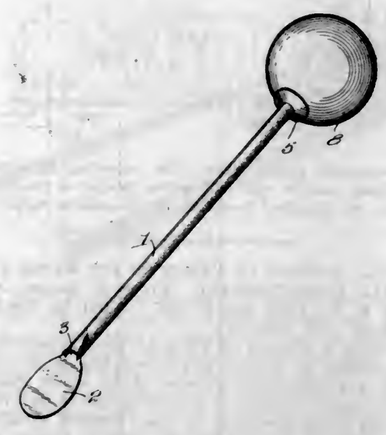
1,678,559. DRYING MATERIALS. JOSEPH P. DEVINE, Buffalo, N. Y. Continuation of application Serial No. 124,317, filed July 23, 1926. This application filed May 28, 1927. Serial No. 195,088. 10 Claims. (Cl. 34—30.)

1. The method of drying materials in a closed receptacle by subjecting them to heat under a sustained reduced pressure during the entire drying operation in the presence of a vapor maintained at a relatively high humidity for an extended period of time and removing vapor from the receptacle during the drying operation.



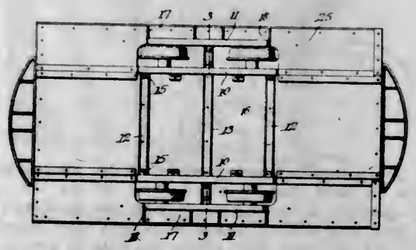
1,678,560. APPARATUS FOR MEASURING DISTANCE. HERBERT GROVE DORSEY, Gloucester, and ROBERT LONGFELLOW WILLIAMS, Newton, Mass., assignors to Submarine Signal Corporation, Boston, Mass., a Corporation of Delaware. Filed Nov. 12, 1925. Serial No. 68,694. 4 Claims. (Cl. 177—386.)

4. A system for measuring depths of water including a rotating member, means for driving the same at a constant and known speed, a sound producer, a sound receiver, means whereby rotation of the rotating member causes periodic operation of the sound producer, circular scales, two visual indicators carried by said rotating member and moving in cooperation with the scales, one of said indicators for deep sounding, the other



of said indicators capable of producing a line of light on the scale in response to the operation of the sound receiver for shallow sounding, an audible indicating means operative in response to operation of the sound receiver to cooperate with the deep sounding indicator, said deep sounding indicator adapted to be continuously illuminated, and means for selecting which indicator is to be used.

1,678,561. AWNING BRACKET. WILLIAM G. DUNN, Clarinda, Iowa. Filed Dec. 10, 1927. Serial No. 239,087. 2 Claims. (Cl. 156—44.)

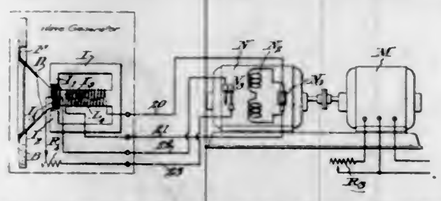


1. An awning bracket, comprising an elongated body member, and laterally extending bendable roller-supporting and awning frame-supporting ears adjacent to the opposite ends thereof, respectively, the body member having a portion folded inwardly upon itself between said ears to form a yielding channel-shaped portion between said ears.

1,678,562. MEDICINAL INSTRUMENT. LOUIS M. EDENS, Cabool, Mo. Filed Aug. 10, 1927. Serial No. 212,064. 2 Claims. (Cl. 128—266.)

1. A device of the class described comprising a tubular stem, a tongue depressor formed at one end of the stem, a tubular holder removably fitting in the other end of the stem, said holder having a cup-shaped flange at its outer end and its inner end being cut away to receive powder or the like.

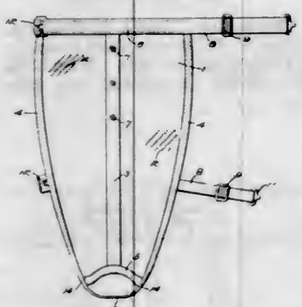
1,678,563. MINE CAR. GLENN E. EDMUNDS, Columbus, Ohio, assignor to The Bonney-Floyd Company, Columbus, Ohio, a Corporation of Ohio. Filed July 29, 1927. Serial No. 209,358. 3 Claims. (Cl. 105—364.)



1. In a mine car, a truck comprising inner and outer longitudinally extending sill bars, the outer sill bars having substantially horizontal top web portions extending laterally and outwardly at substantial distance beyond the vertical plane of the sill bars and body side walls supported upon said outwardly extending webs.

1,678,564. METHOD FOR AIDING AUDITION. BYRON E. ELDRED, Kensington, N. Y. Filed Dec. 10, 1924. Serial No. 755,077. 2 Claims. (Cl. 128—38.)

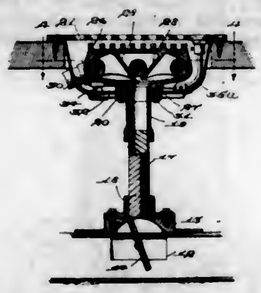
1. A method of improving the acoustics or audibility qualities of a predetermined space for persons of difficult



hearing therein, which method consists in maintaining in the atmosphere of said space a continuous succession of rhythmical air waves of such amplitude as to cause pressure variations greater than those occurring in normal unamplified sounds, the said waves having a frequency adjacent the marginal frequency of the audible range.

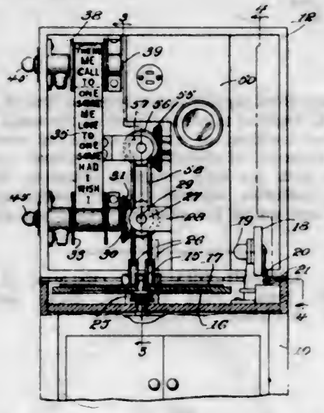
1,678,565. METHOD OF UTILIZING AIR WAVES FOR AURAL KINESITHERAPY. BYRON E. ELDRED, New York, N. Y. Filed July 7, 1927. Serial No. 204,148. 1 Claim. (Cl. 128—38.)

A method of utilizing air waves for aural kinesitherapy which consists in emitting into surrounding space a continuous and sustained succession of air waves characterized by their harmonious wave form and of such force producing characteristics as to cause pressure variations greater than those occurring in ordinary sounds, said waves having a frequency adjacent the marginal frequency of the audible range.



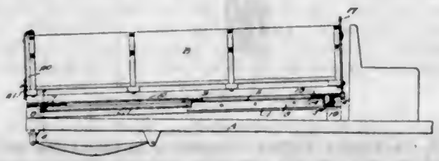
1,678,566. STOCKING PROTECTOR. ROBERT M. GALLANT, Boston, Mass., assignor of one-half to Walter S. Berry, Boston, Mass. Filed May 17, 1926. Serial No. 109,555. 4 Claims. (Cl. 36—2.)

1. A woman's stocking protective device comprising a shield or cover element fashioned to fit the calf and ankle portions of the leg, and terminating rearwardly of the shin, said element formed of flexible sheet material and being in major part elastic, at least in the direction transversely thereof, securing means extending from one side edge of said shield or cover element near its top and having a fastener, cooperating fastener-engaging means at the opposite side edge of said element, similar securing and fastening means therefor at a lower portion of said side edges, and a cross-member at the bottom portion of said element adapted to be engaged beneath the wearer's shoe.



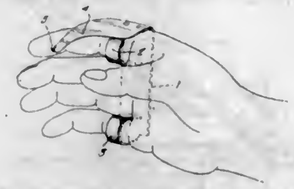
1,678,567. AUTOMOBILE HEATER. HENRY L. HUBBARD, Cleveland, Ohio. Filed Feb. 8, 1926. Serial No. 86,886. 1 Claim. (Cl. 257—136.)

An automobile heater including an upper grate, heating elements below the grate including a series of tubes, a header with which the tubes communicate at one end, having a lower intake opening, a pipe for supplying heated gases having connection with the lower opening of the header, and a series of baffle members depending in the header and converging toward its intake opening from



points between the several heating tubes, whereby to insure substantially uniform distribution of the heat to the said tubes.

1,678,568. ATTACHMENT FOR SOUND-REPRODUCING MACHINES. ANDREW HUMPHREY, Glenlyon, Pa. Filed May 28, 1926. Serial No. 112,355. 2 Claims. (Cl. 88—16.2.)

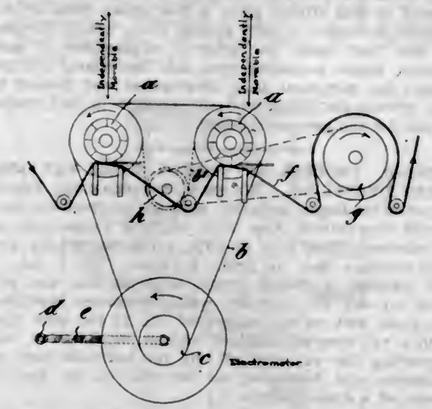


1. In a device of the class described, record driving means for a sound reproducing machine, a traveling word carrying element, means for driving said element from the driving means first named, driving means for a moving picture machine, and devices for imparting motion to the driving means last named from the driving means of the traveling element.

1,678,569. DUMP TRUCK. WILLIAM JANSSEN, Lagrange, Tex. Filed Oct. 26, 1927. Serial No. 228,887. 3 Claims. (Cl. 298—12.)

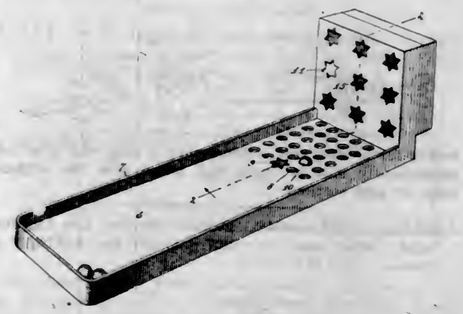
1. A truck having a rearwardly and downwardly sloping track thereon, a shaft at the rear end of the track having rollers thereon, a body, track forming members at the rear of the body with which the rollers on the shaft engage, some of said members having upwardly extending parts forming stops for the rollers, a shaft at the front end of the body having rollers thereon engaging portions of the track of the truck, vertically arranged rollers carried by the body for engaging portions of the track on the truck and vertically arranged rollers on the track forming part of the truck for engaging portions on the body.

1,678,570. FRUIT-GATHER'S KNIFE. WILLIAM H. LONGCOR, Dinuba, Calif., assignor of one-half to Ola Nialson, Dinuba, Calif. Filed Aug. 1, 1927. Serial No. 210,006. 1 Claim. (Cl. 30—24.)



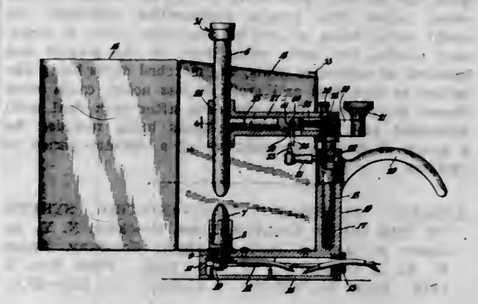
In a device for the purpose set forth, a plate having inwardly extending loops at the ends thereof, a cutting blade secured to one end of the plate arranged over one of the loops and extending from the plate in the same direction as the loop, said blade having its cutting edge concaved and the outer end thereof rounded upwardly and inwardly.

1,678,571. PROCESS OF PURIFYING SUGAR SOLUTIONS. FRIEDRICH WILHELM MEYER, Wismar, Germany. Filed May 10, 1927, Serial No. 190,378, and in Germany July 7, 1926. 6 Claims. (Cl. 127—50.)



1. In a process of purifying and decolorizing sugar solutions the steps which consist in heating a sugar solution to a temperature of approximately 90° C., adding a prolific quantity of lime, so that the solution is decolorized by such addition, neutralizing the solution by means of a suitable acid, filtering the solution thus neutralized and increasing the surface tension of the solution by an addition of a small quantity of a high grade decolorizing carbon.

1,678,572. FABRIC-SHEARING MACHINE. JOSEPH MONFORTS, Munich-Gladbach, Germany. Filed Apr. 13, 1925, Serial No. 22,897, and in Germany May 13, 1924. 2 Claims. (Cl. 26—15.)

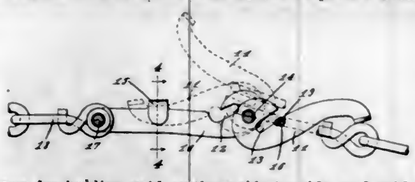


1. Driving means for fabric shearing machines having a plurality of independently movable knife cylinders, comprising pulleys on said cylinders, a single belt engaging all said pulleys, and a swingably mounted electromotor having a pulley hanging in said belt.

1,678,573. AMUSEMENT DEVICE. YOZO NAKASHIMA, Brooklyn, N. Y. Filed Sept. 24, 1927. Serial No. 221,828. 2 Claims. (Cl. 273—123.)

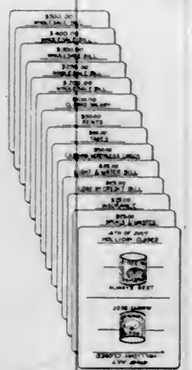
1. In an amusement apparatus a playing table, recesses in the table comprising a target for a played ball, certain of the recesses visibly distinguishable from the remainder being designated as prize-winning recesses, each prize-winning recess being provided with a contact which is adapted to be closed when a ball is positioned in th recess, a plurality of signals operable to display a visible positive signal, there being as many signals as there are prize-winning recesses, a plurality of circuits, each circuit comprising one contact and one visible signal, a relay operable when a plurality of visible signals are positively displayed but non-operable when a single visible signal is positively displayed, a circuit common to the relay and all of the visible signals, and an audible signal operable under control of the relay.

1,678,574. PHOTOGRAPHIC ELECTRIC LAMP. HENRY NIEMEYER, New York, N. Y. Filed May 12, 1927. Serial No. 190,686. 5 Claims. (Cl. 176—103.)



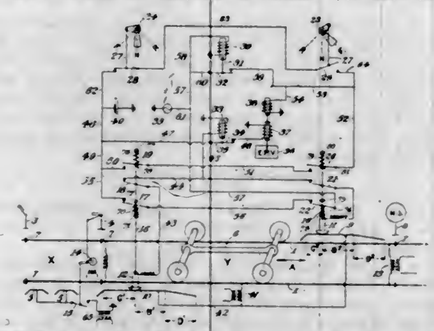
1. In an electric arc lamp having upper and lower carbon electrodes, a sleeve surrounding the upper electrode and having an integral hollow portion, a spring pressed plunger in the hollow portion for frictionally gripping the electrode, a cam member carried by the plunger, and means engaged by the cam member to withdraw the plunger from contact with the electrode when the sleeve is moved downward.

1,678,575. CHAIN FASTENER. JAMES L. PAYTON, Jefferson City, Mo. Filed Sept. 3, 1927. Serial No. 217,390. 3 Claims. (Cl. 24—69.)



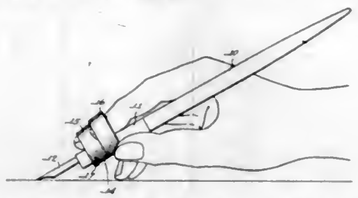
1. A chain fastener of the character described comprising a pair of hook-like sections pivotally connected together, each of said sections having a slot, one of said sections having a notch communicating with its slot and adapted to initially receive a link of the chain and hold the latter free of the other section, while the first mentioned section is being moved about its pivot to a posi-

tion at one side of the other section, and subsequently guiding the link into the slots of the respective sections,



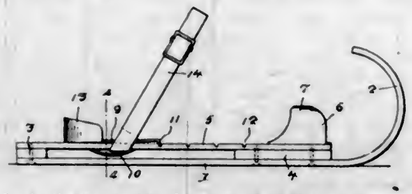
means for holding said sections side by side, and said link subsequently moving from said notch into the aligned slots of said section.

1,678,576. CARD GAME. ERNEST PHILIPP, Los Angeles, Calif. Filed Aug. 10, 1927. Serial No. 212,036. 2 Claims. (Cl. 273—152.)



1. A game of cards representative of store keeping, comprising a series of groups representative of sales as credit for a number of business periods as days of the week, the several cards being of varying denominational value, other card groups representing expenses, the credit series being of greater aggregate value to represent profits, the cards being dealt to the players and balanced at successive deals, the matched cards being discarded at each deal and profit or loss noted, cards being drawn successively from the deck after each deal until exhausted and the several balances being recorded for a group of deals representative of a definite period of business.

1,678,577. AUTOMATIC TRAIN-CONTROL SYSTEM OR THE LIKE. OSCAR A. ROSS, Brooklyn, N. Y., assignor to General Railway Signal Company, Gates, N. Y., a Corporation of New York. Filed Nov. 6, 1916. Serial No. 129,812. 2 Claims. (Cl. 246—49.)

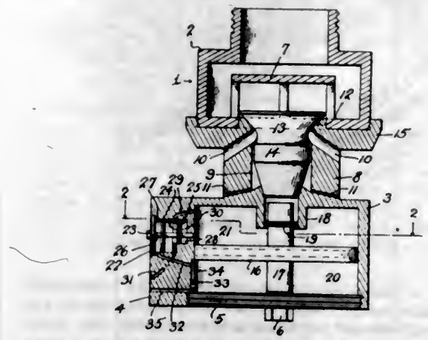


1. In an automatic train control system for trains of the multiple car type in which a plurality of cars of each train are equipped at each end thereof with manually operable car control means which manually operable means may assume a forward, a reverse and a neutral position; the combination with automatic train control mechanism for each car so equipped; and means for automatically rendering the automatic train control mechanism of a car inactive when the manually operable car control means at both ends of such car assume the neutral position.

1,678,578. ATTACHMENT FOR WRITING IMPLEMENTS. JOSÉ MANUEL UTRILLA, Guanabacoa, Habana, Cuba. Filed Dec. 1, 1926. Serial No. 151,990. 3 Claims. (Cl. 120—103.)

1. An attachment for writing implements including a body portion having a bore adapted to encircle the implement, finger receiving portions integrally connected with the body and comprising ring members disposed in offset longitudinal and transverse planes relatively to each other, the ring portions being internally tapered and of approximately oval cross sectional shape.

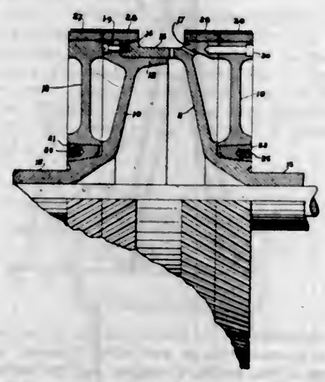
1,678,579. SKATE. PERLO VINCENT, Gloversville, N. Y. Filed July 28, 1927. Serial No. 209,088. 2 Claims. (Cl. 208—184.)



1. A skate of the character described comprising an elongated relatively broad flat runner having a curved forward portion, blocks fixed to said runner and being arranged in spaced relation with respect to each other, a stirrup plate secured to said blocks and being provided with transverse grooves, a toe piece secured to the forward portion of said stirrup plate, a heel clamp mounted for slidable movement on said stirrup plate, means included in said heel clamp for selective engagement in said grooves, means depending from said heel clamp and arranged for movement in a longitudinal slot formed in said stirrup plate, and a strap arranged in said means as and for the purpose specified.

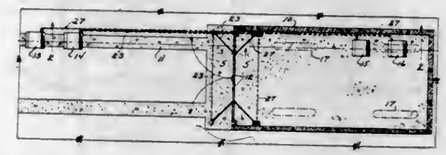
1,678,580. PROCESS OF DYEING WITH VAT AND AZO DYESTUFFS. WILHELM WINTERHALDER, Frankfort-on-the-Main, Germany, assignor to Grasselli Dyestuff Corporation, New York, N. Y., a Corporation of Delaware. Filed May 15, 1926, Serial No. 109,351, and in Germany May 20, 1925. 8 Claims. (Cl. 8—5.)

1. Process of dyeing cotton, artificial silk, and silk with vat and azo dyestuffs, which comprises grounding the goods with an azo component and at the same time with a vat dyestuff dissolved without esterification, and converting the vat dyestuff into the insoluble form by oxidation, and developing the ice color on the fiber by means of a diazo solution.



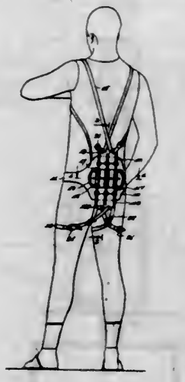
1,678,581. LOCOMOTIVE CYLINDER COCK. SAMUEL D. WORK, Minerva, Ohio. Filed Nov. 18, 1926. Serial No. 149,259. 1 Claim. (Cl. 121—134.)

In a locomotive cylinder cock device, a body member formed at one end with a steam inlet and provided at its other end with a chamber, the intermediate portion of the body having a bore therein terminating in a valve seat communicating with the steam inlet portion, the intermediate portion further having steam outlet ports, a longitudinally movable valve within said bore cooperating with said seat, a piston within said chamber having a stem engageable with said valve for unseating the same when the piston moves in one direction, a stop projectable into said chamber to hold said piston against reverse movement, and air pressure operated means for moving said stop, comprising differential pistons slidably mounted at one side of said chamber portion of the body, and mounted upon a piston rod constituting said stop, and air pressure means cooperating



with said differential pistons for moving the same and the stop on which they are mounted, said last means comprising a passage communicating with the space defined between the differential pistons and with said chamber at one side of the piston therein, a compressed air inlet through the chamber at the other side of the piston, a compressed air inlet into the space between the differential pistons, a slide valve carried by one differential piston for controlling the flow of air through said first named passage, a passage communicating with the space at the outer end of the chamber within which the differential pistons operate and communicating with the first named chamber, and a slide valve carried by said first named piston for controlling communication through said last named passage.

1,678,582. GEAR STRUCTURE. ROBERT C. ALLEN, Essington, Pa., assignor to Westinghouse Gear and Dynamometer Company, a Corporation of Pennsylvania. Filed May 10, 1921. Serial No. 468,295. 7 Claims. (Cl. 74—7.)

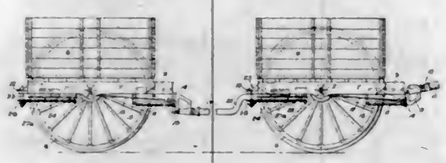


1. A gear comprising interfitting rotor portions, separate gear rims carried by the rotor portions, a gear rim disposed adjacent to each of the first-named rims whereby continuous teeth may be provided on pairs of rims, and means carried by the rotor portions for supporting and holding the last-named gear rims in position.

1,678,583. GARAGE-DOOR MECHANISM. EMMETT BEAMS, Louisville, Ky. Filed Dec. 10, 1926. Serial No. 153,945. 1 Claim. (Cl. 268—35.)

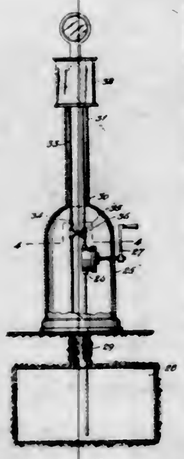
In combination with the swingably mounted doors at the entrance to a building, door operating means comprising a plurality of treadle members, one pair of said members located in the approach to the building and another pair located within the building, said treadle members being normally upwardly spring pressed, flexible means connecting one of the treadle members of each pair with the doors to swing the doors in one direction, flexible means connecting the other treadle member of each pair with the doors to swing said doors in an opposite direction, spring pressed latch means normally holding the doors closed, and means connecting the flexible means and latch means.

1,678,584. BODY BRACE. EARL BRANSON, Bannack, Mont. Filed Aug. 18, 1926. Serial No. 130,013. 1 Claim. (Cl. 2—44.)



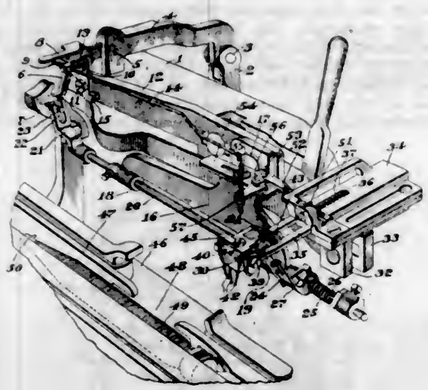
A body brace of the character described, including a back pad, a plurality of vertically disposed casings, means mounting said casings on said back pad, springs housed in said casings, members on said springs at both the top and bottom thereof, series of snap hooks above and below the springs and detachably engaging said members on the springs, elements to which the respective series of snap hooks are secured, leg straps connected with the lower one of said elements, and shoulder straps connected with the upper one of said elements.

1,678,585. CART. THOMAS A. CONLON, Silver Spring, Md. Filed Dec. 22, 1925. Serial No. 77,079. 9 Claims. (Cl. 280—33.2.) (Granted under the provisions of the act of Mar. 3, 1883, 22 Stat. L. 625.)



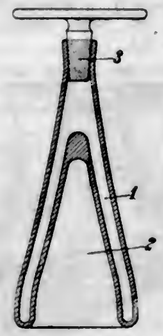
1. A cart embodying an axle, side frames secured to the axle, a central draft rail on the axle, a socket member on the front end of the draft rail, an apertured bracket on the rear end thereof, an adapter having an

offset head swiveled in the socket, a removable pin passing diametrically through the socket and adapter, a drawbar pivoted to the head of the adapter, removable means for rigidly connecting the drawbar to the adapter, said drawbar offset intermediate its ends, the forward portion formed with an aperture and terminating in a lunette,



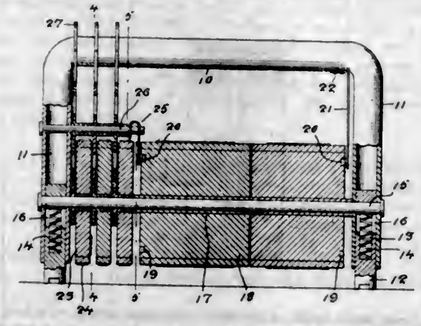
an arcuate guide consisting of spaced rails secured at the rear of the cart to the side frames and draft rail and substantially in the plane of the socket member, radial arms secured to the extremities of the guide, and a keeper plate carried by said arms and disposed beneath the bracket on the draft rail.

1,678,586. GASOLINE-DISPENSING DEVICE. JAMES B. CRAVEY and PAUL R. PIERSON, Montgomery, Ala. Original application filed Apr. 16, 1927, Serial No. 184,389. Divided and this application filed Nov. 7, 1927. Serial No. 231,761. 2 Claims. (Cl. 221—99.)



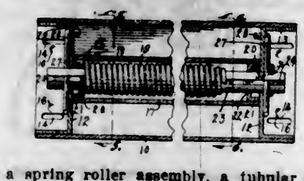
1. In a dispensing device, a base casing, a pump mounted therein, a tank below said pump, a pipe connected to the suction side of said pump and leading to said tank, a delivery pipe leading from said pump, a branch leading from the delivery pipe back to the tank, and a three way valve at the junction of the delivery pipe and branch, said three way valve being housed entirely within the casing and spaced from the walls thereof and including an operating stem also entirely within and spaced from the walls of the casing, said base casing having an opening therein alined with said stem whereby to permit the insertion of a valve operating tool to engage the stem, and a guide pipe leading from said opening to said valve stem to guide the tool inserted through the opening.

1,678,587. FEELER MECHANISM FOR LOOMS. EDWARD A. CUNNIFF, Waltham, Mass., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed June 24, 1927. Serial No. 201,070. 10 Claims. (Cl. 139—269.)



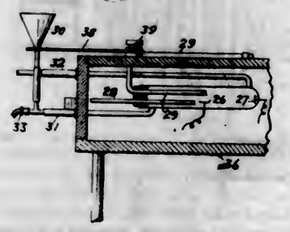
1. In a feeler mechanism for looms, the combination of a feeler carrier mounted for movement towards and from the front of the loom, a shuttle having the upper portion of one of its side walls cut away to form a feeler receiving passage, a tilting weft fork feeler mounted on the feeler carrier to extend downwardly transversely of the shuttle and adapted to enter said feeler receiving passage to engage the mass of filling in the shuttle and to be tilted thereby on detecting beats until the filling is substantially exhausted, and means for moving the weft fork feeler and feeler carrier frontwardly when the weft fork feeler fails to be tilted on a detecting beat.

1,678,588. BOTTLE UTILIZABLE AS A VASE BY TURNING IT OVER. FRANCIS DE GERSON, born RAEDSFELD JEANNE BERTHIER, Paris France. Filed July 20, 1926, Serial No. 123,772, and in France Oct. 24, 1925. 2 Claims. (Cl. 215—1.)



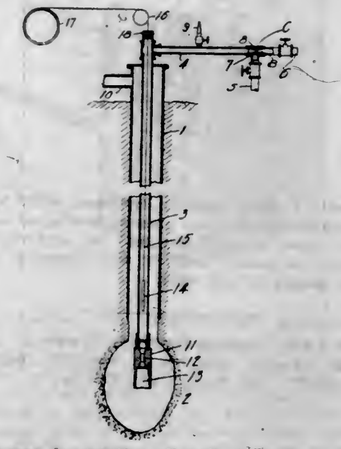
1. In combination, a bottle having, a reduced neck portion, a concave bottom and sides disposed closely to the bottom of the bottle, a stopper for the bottle mouth, and an enlarged head carried by the stopper of a diameter approximating the largest portion of the bottle whereby to support the latter in an inverted position.

1,678,589. ROTARY BOX STAMP. GEORGE DIFFEE, Hamilton, Mont. Filed Nov. 25, 1927. Serial No. 235,734. 3 Claims. (Cl. 101—110.)



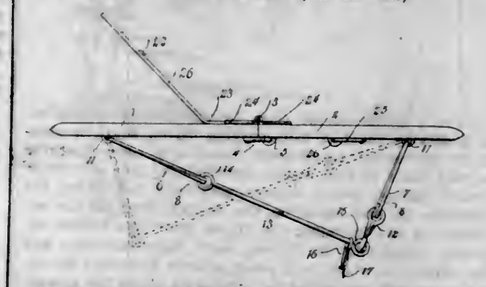
1. In a device for the purpose set forth, a frame, spring influenced legs telescopically received in the ends of the frame, a shaft journaled longitudinally on the frame, and providing a stop for the spring influenced legs, indicia bearing rollers revoluble on the shaft, spring means holding the rollers from free turning on the said shaft, other indicia bearing rollers on the shaft, and lever operated means for turning said rollers.

1,678,590. SPRING-ROLLER ASSEMBLY. HARRY DIXSON, Des Moines, Iowa. Filed July 10, 1926. Serial No. 121,704. 5 Claims. (Cl. 156—39.)



1. In a spring roller assembly, a tubular casing angular in cross section, having ends adapted to be mounted therein at different distances apart, a tubular roller, a shaft journaled in the ends of the roller projected through the ends of the casing, having an end slotted, a coil spring in the roller having an end attached thereto and an end received in said slot in said shaft, removable means for preventing sliding movement of the shaft through the casing end to release the last-named spring end, and means for preventing rotation of the shaft comprising a rod received in said slotted end and projected into an angular corner of the casing.

1,678,591. QUANTITATIVE DETERMINATION OF NAPHTHALENE IN ILLUMINATING GAS. WALTER H. FULWEILER, Wallingford, Pa., assignor to The U. G. I. Contracting Company, Philadelphia, Pa., a Corporation of Delaware. Original application filed Jan. 12, 1922, Serial No. 528,861. Divided and this application filed June 29, 1922. Serial No. 571,717. 2 Claims. (Cl. 175—183.)

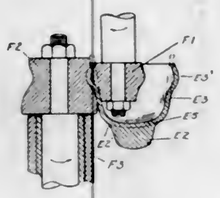


2. In apparatus of the class described the combination of a pair of conductivity cells provided with fixed electrodes and means accessible from the exterior of the cells and adapted to vary the capacity of the cells, whereby the constants of the cells can be adjusted to equality.

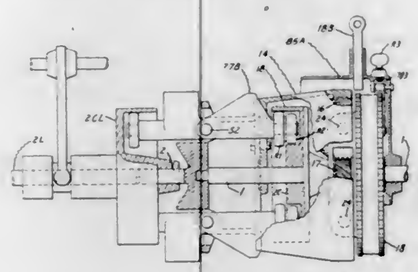
1,678,592. ART OF TREATING OIL WELLS. JAMES B. GARNER and GEORGE B. LEYDEN, Pittsburgh, Pa., assignors to Standard Oil Development Company, a Corporation of Delaware. Filed Feb. 3, 1923. Serial No. 616,780. 3 Claims. (Cl. 166—17.)

3. In means for treating oil wells to increase production, the combination of a tubing, a burner carried thereby and having a narrow passage merging into a flaring orifice, and ignition means adapted to be lowered through the tubing and the burner.

1,678,593. FISHING AND RETRIEVING OTTER. JOHN HANSEN, Milltown, Mont. Filed June 30, 1927. Serial No. 202,678. 13 Claims. (Cl. 43—49.)



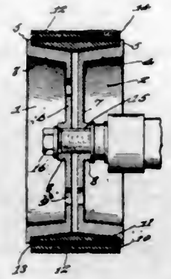
1. An otter comprising an elongated buoyant body relatively thin and having its lower portion weighted to cause the body to float in a substantially vertical plane, brackets pivotally connected with said body adjacent its ends and adapted to be swung towards and away from one side of said body, and a rod extending between said brackets and having one end pivotally connected with one of said brackets and its other end releasably and pivotally connected with the other bracket, said rod constituting a member to which an attaching element carried by a line may be engaged and having movement longitudinally thereon.



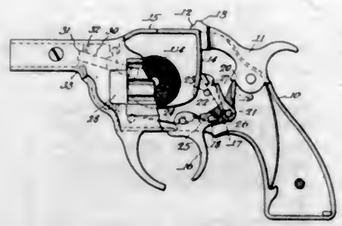
1,678,594. METHOD OF FORGING INSULATOR CAPS. GEORGE H. HIGGINS, Cortland, N. Y., assignor to The Brewer-Titchener Corporation, Cortland, N. Y., a Corporation of New York. Filed Oct. 27, 1927. Serial No. 229,177. 8 Claims. (Cl. 78—81.)

1. The method of making from bar or plate stock, a one-piece supportable insulator cap of the undercut socket

type or the like, and which method consists in swaging up said stock into a cup-like shape comprising a tubular skirt portion having an open lip end with the other end thereof closed by a crown wall provided with an exteriorly extruded supporting lug means, and then introducing therein a groove forming implement which by virtue of a radially exerted swage pressure is adapted to expand the lip region of said skirt into an outwardly bulged groove that is radially undercut with respect to the final lip end opening of said skirt.



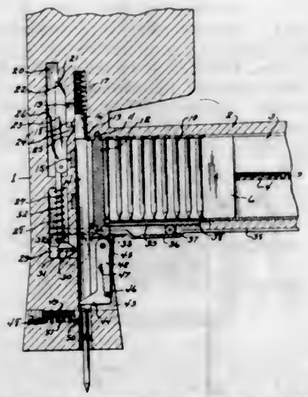
1,678,595. POWER-CONTROL DEVICE. GAIL H. HINES, Lansing, Mich. Filed Nov. 29, 1927. Serial No. 236,571. 28 Claims. (Cl. 74—34.)



1. In a device of the class described, the combination of a driving shaft, a load-carrying driven shaft, a planetary differential gear-assembly positively connecting the driving shaft to said driven shaft, planet-gear revolution control means, clutch means operatively connecting the ensemble on and including the driving shaft to the ensemble on and including the driven shaft, the former ensemble comprising the driving shaft, the planet-gear and the carrier in which said planet-gear is journaled for rotation as well as carried for revolution about the driving shaft, and the gear in driving connection with the driving shaft and the planet-gear, the latter ensemble comprising the load-carrying driven shaft and the gear secured thereon, said clutch means including a centrifugally operating weight free to be moved against centrifugal resistance and in positive connection with one of said ensembles and means in positive connection with the other ensemble to move said weight against centrifugal resistance whereby to vary gradually the ratio of speed transmission.

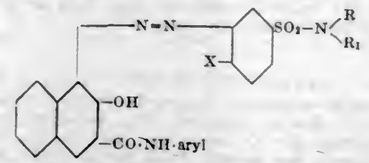
1,678,596. ABRASIVE WHEEL. JOSEPH L. HOWLAND, Cleveland, Ohio. Filed Feb. 4, 1927. Serial No. 165,945. 2 Claims. (Cl. 51—190.)

1. An abrading wheel of the character described comprising circumferentially divided sections adapted to be associated to form the wheel, one of said sections being provided with openings, a resilient band adapted to surround said sections when associated, a flange formed with each section and adapted to cooperate for retaining the resilient band on said sections, a flexible band between the sections and resilient band, a fabric drilling for reinforcing said resilient band, an abrasive band surrounding said resilient band, and said openings being adapted to receive a tool for separating said sections as and for the purpose specified.

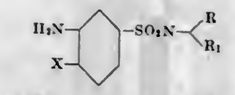


1,678,597. TOY PISTOL. JOSEPH D. KILGORE, Columbus, Ohio, assignor to Kilgore Foundry Co., Columbus, Ohio, a Corporation of Ohio. Filed June 29, 1927. Serial No. 202,290. 2 Claims. (Cl. 42—58.)

2. In a toy pistol a gate swingable at one side of said pistol, a spring within the pistol having a portion bearing against the gate to hold it in either the open or closed position, said spring having a U-shaped bent end, and ribs on the opposite sides of the pistol between which the said U-shaped end of the spring is held.



1,678,598. TOOL. EDGAR B. KING, Berenice, Idaho. Filed July 16, 1927. Serial No. 206,254. 5 Claims. (Cl. 1—45.)

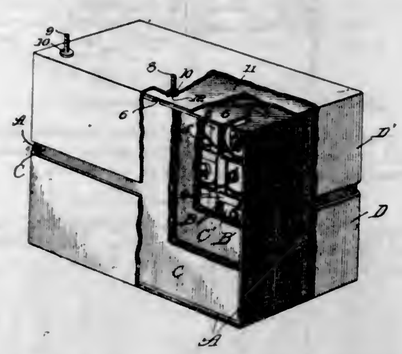


1. A nail driving instrument including a head, which has a nail passage therethrough and a handle which receives nails therein, means urging the nails from the handle into the passage, means for singly delivering nails into the passage, means temporarily holding the nails in the passage, means to engage with the nails for forcing the pointed ends thereof out of the passage, stop means to engage with the head of the nail when moved by the last mentioned means, and a member movable over the head of the nail for contact therewith to prevent the nail from moving up the passage when the instrument is swung in nail driving direction and the nail comes in contact with the work.

1,678,599. AZO-DYESTUFFS FROM 2-3-HYDROXY-NAPHTHOIC ACID ARYLIDES AND PROCESS OF MAKING THE SAME. LEOPOLD LASKA and ARTHUR ZITSCHER, Offenbach-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y., a Corporation of Delaware. Filed May 24, 1926. Serial No. 111,371, and in Germany May 28, 1925. 3 Claims. (Cl. 260—95.)

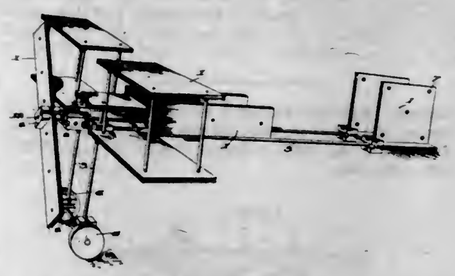
2. As new products azo dystuffs having most probably the general formula:

wherein R and R_1 represent an alkyl- or an aryl group and X an alkyl- or an alkoxyl group, which dyestuffs are in the dry state reddish to dark colored powders, soluble in concentrated sulfuric acid with from blue to dark violet colors and which by reduction yield an amine of the type:



wherein R and R_1 represent an alkyl- or an aryl group and X an alkyl- or an alkoxy group, and a 1-amino-2-hydroxynaphthalene-3-carboxylic acid arylide, and which when produced on vegetable fibers produce reddish shades of an excellent fastness to kier boiling.

1,678,600. TIP FOR HYDROMETER SYRINGES. MELVIN S. LOWER, Barberton, Ohio, assignor to Sun Rubber Company, a Corporation of Ohio. Filed Nov. 8, 1926. Serial No. 147,175. 1 Claim. (Cl. 215—47.)

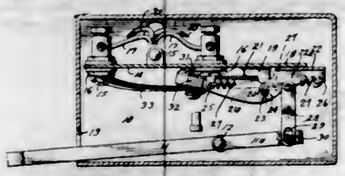


A rubber tip adapted to be attached to the end of a tubular member, comprising an element having at one end a tapered plug to be forced into said member and an enlargement inwardly of said plug to abut against the end of said member when the plug is inserted in the same, and there being between the plug and said enlargement a short section of smaller diameter than the interior of said tube.

1,678,601. DRY BATTERY AND METHOD OF MANUFACTURE. EDWIN E. MEISEKOTHEN, Madison, Wis., assignor to French Battery Company, Madison, Wis., a Corporation of Wisconsin. Filed Jan. 25, 1926. Serial No. 83,578. 10 Claims. (Cl. 136—109.)

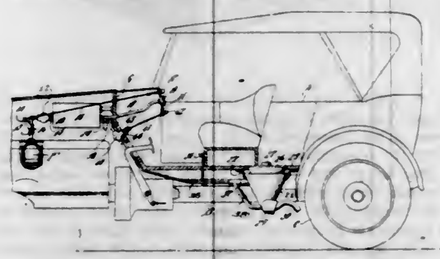
1. A dry-battery comprising an inner pasteboard box open at one side, dry-cells assembled therein with their carbon poles presented at the open side, a filler-board within the open side of said box, an outer casing having an open upper end through which the inner assemblage is introduced in such manner that the cells will be disposed horizontally, a closure for the outer container, and terminals projecting laterally from cells in the upper row through perforations with which said closure is provided.

1,678,602. TOY CONSTRUCTION OUTFIT. GUY G. OLDFIELD, Pullman, Wash. Filed Aug. 5, 1925. Serial No. 48,288. 2 Claims. (Cl. 46—35.)



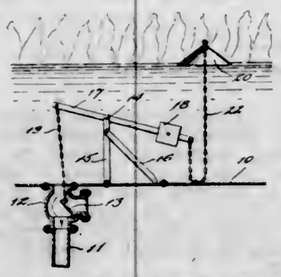
2. In a toy construction outfit, plates made of somewhat resilient material having marginal slots in their edges extending longitudinally thereof for the full length of the plates, forming thereby a channel with compressible or expandible walls adapted to act either as tongues or grooves to like edges on like plates, said plates being provided with transverse openings adapted to receive elongated structural members for said construction outfit.

1,678,603. AUTOMATIC ELECTRIC SWITCH. RALPH PENN, Des Moines, Iowa, assignor to Penn Electric Switch Company, a Copartnership composed of Ralph Penn, Mary S. Penn, Albert Penn, and Blanche G. Penn. Filed Apr. 24, 1925. Serial No. 25,519. 4 Claims. (Cl. 200—67.)



1. In a device of the class described, a support, a bracket mounted thereon having spaced ears formed with opposite inwardly projecting tongues, a pair of channel-shaped members having slots pivotally engaging

the opposite sides of the tongues, a spring connected with said channel-shaped members on opposite sides of the tongues, said tongues being so arranged that the

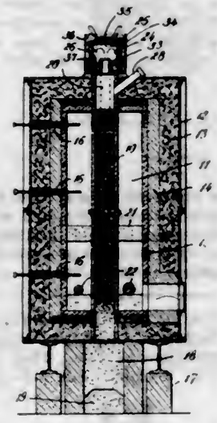


pivot points formed thereby are never simultaneously on dead center with relation to the spring, and means for actuating one of said members on the pivots.

1,678,604. VEHICLE SANDING MECHANISM. ARTHUR W. REED, Boston, Mass. Filed Jan. 6, 1926. Serial No. 79,624. 1 Claim. (Cl. 291—3.)

In a sanding device for a motor vehicle, a storage tank, a check valve connection between a cylinder of the engine of the vehicle and the storage tank, a control valve interposed between the cylinder and the check valve, sand containers having outlets, a connection between the storage tank and the sand containers, a materially controlled valve in said last named connection and means whereby the second and last mentioned valves can be controlled from the instrument board of the vehicle.

1,678,605. SAFETY DEVICE FOR TANKS. HENRY T. SCOTT and LUCIEN EARL RONE, Wichita Falls, Tex. Filed Oct. 31, 1925. Serial No. 66,112. 1 Claim. (Cl. 220—89.)



A safety device for tanks comprising a valve body and discharge pipe therefor, a supporting arm and brace bar carried within the bottom of the tank, a lever eccentrically fulcrumed upon the supporting bar and having one end disposed directly above the discharge pipe, a weight carried upon the opposed end of the lever, a flap valve carried within the valve body and having connection with the lever, a fusible element carried within the top of the tank, a conical shaped bell suspended from the fusible element, and a chain establishing connection between the bell and the weighted end of the lever.

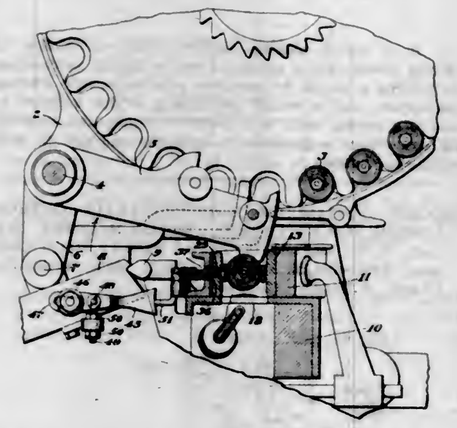
1,678,606. ELECTRIC LAMP. GROVER CLEARANCE SINGER, Oakland, Ind. Filed Apr. 1, 1925. Serial No. 19,927. 1 Claim. (Cl. 176—34.)

The combination with an incandescent lamp bulb, of a small deep concave reflector within the bulb, but separate therefrom, the outer wall of the bulb having a coating of silver extending beyond the edge of the inner reflector for cooperating with the inner reflector to reflect the rays of the light from the lamp in the manner of a spot light, whereby the rays of light will illuminate a space of relatively slight area at a considerable distance from the lamp.

1,678,607. METALLURGY OF ZINC. JAMES A. SINOMASTER, Bronxville, N. Y., and FRANK G. BREYER and EARL H. BUNCE, Palmerton, Pa., assignors to The New Jersey Zinc Company, New York, N. Y., a Corporation of New Jersey. Filed May 5, 1925. Serial No. 28,058. 12 Claims. (Cl. 75—28.)

1. The method of reducing zinciferous materials which comprises confining an agglomerated charge of mixed zinciferous material and carbonaceous reducing agent in an upright retort, and subjecting the agglomerated charge in the retort to a sufficiently high temperature to reduce compounds of zinc and volatilize the resulting metallic zinc.

1,678,608. FOOT-ARCH SUPPORT. HANS SOCHOR, Zurich-Hongg, Switzerland. Filed Jan. 15, 1927, Serial No. 161,370, and in Switzerland Feb. 16, 1926. 2 Claims. (Cl. 36—71.)

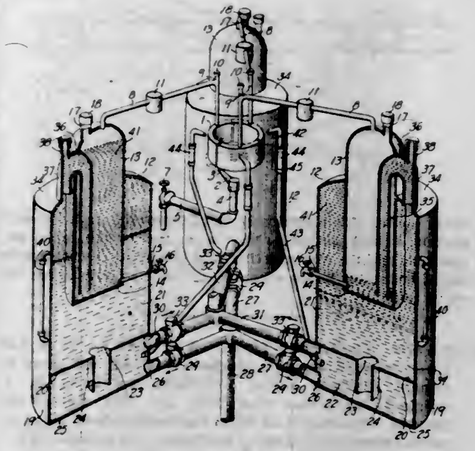


1. A foot arch support comprising a relatively stiff resilient plate, a flexible band having one end attached to said plate at a point substantially midway between the ends of the latter and near one side edge thereof and said plate having an opening near the opposite side to permit the drawing of said band therethrough when said band has been passed around the instep of the wearer and a pad on said plate.

1,678,609. TOOTHPICK. FRITZ SPANIER, Karlsruhe, Germany. Filed Apr. 30, 1926, Serial No. 105,846, and in Germany Oct. 31, 1925. 4 Claims. (Cl. 132—90.)

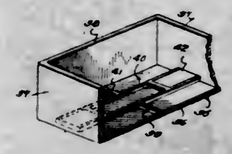
1. A toothpick comprising a holder consisting of two sections relatively rotatable around a pin connecting said sections, a fine metal blade, having the thickness of a sheet of paper and roughened edges, removably secured to one of said sections, a case having a cross section fitting to that of the two sections of the holder when in register, said case carrying the holder with the blade and forming a handle when using the toothpick.

1,678,610. SHUTTLE-THREAD TENSION FOR REPLENISHING LOOMS. WILLIAM A. TEBO, Anthony, R. I., assignor to Draper Corporation, Hopedale, Mass., a Corporation of Maine. Filed Nov. 18, 1927. Serial No. 234,252. 11 Claims. (Cl. 139—256.)



1. An automatically threading loom shuttle having a bobbin chamber, a side delivery eye, and a longitudinally extending thread passage, tensioning members mounted in the thread passage of the shuttle to place tension on the thread as it is drawn between the tensioning member, means normally acting to move the tensioning members relatively in a direction to place tension on the thread, replenishing mechanism, and means actuated by or through the replenishing mechanism to separate the tensioning members and free the thread on replenishment of filling.

1,678,611. PROCESS OF DYEING MIXED TEXTILE GOODS. HERMANN WAGNER, Soden-on-the-Taunus, and HEINZ EICHWEDE and ERICH FISCHER, Hochst-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y., a Corporation of Delaware. Filed Jan. 28, 1926, Serial No. 84,501, and in Germany Feb. 7, 1925. 2 Claims. (Cl. 8—5.)

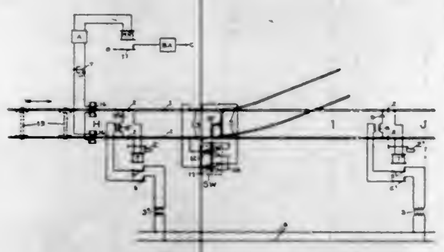


1. Process which comprises dyeing mixed textile goods made of wool and silk fibers with a pyrazolone-azo dyestuff containing at least one carboxylic acid ester group in the dyestuff molecule, said pyrazolone-azo dyestuff containing no free carboxylic acid group linked to the carbon in the 3-position of the pyrazolone ring.

1,678,612. PUMPING DEVICE. THOMAS H. WALKER, Kansas City, Mo., assignor to Earl G. Spangler. Filed Feb. 28, 1927. Serial No. 171,464. 5 Claims. (Cl. 103—255.)

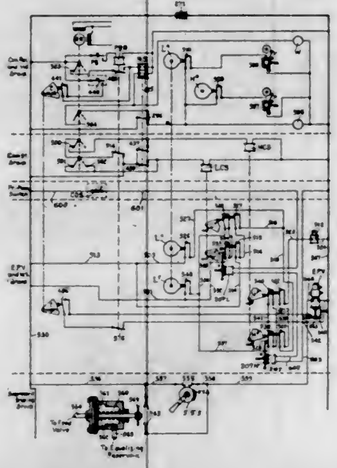
1. In combination with a power generating device comprising a tank, a volatilizable element in said tank, means for releasing said element to exert pressure, and a cylinder for receiving the element, a liquid in said cylinder having no affinity for said gas, a well member adapted to receive water, a tube for conducting said liquid into the upper portion of the well, an outlet for the water impelled by the liquid under pressure of the gas, and means for restoring the liquid to pre-actuated position.

1,678,613. METHOD AND APPARATUS FOR MAKING BUILDING BLOCKS. ALBERT WEISS, Jacksonville, Fla. Filed July 22, 1926. Serial No. 124,233. 2 Claims. (Cl. 25—121.)



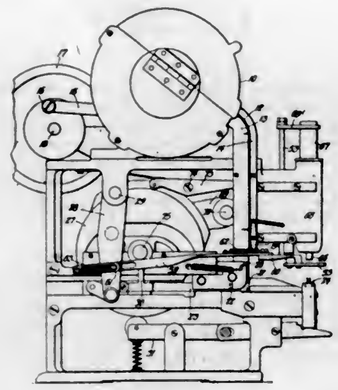
1. The method of forming building blocks which consists in placing a plurality of ribs in the bottom of a mold with blocks approximately equal in depth to the depth of said ribs arranged between portions of certain of the ribs, pouring a colored facing material in the mold to a depth not exceeding the depth of the ribs and blocks, and filling the mold with a body of cementitious material whereby such material will bond with the facing elements.

1,678,614. TRAIN CONTROL. WINTHROP K. HOWE, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y. Filed Sept. 6, 1924. Serial No. 736,366. 6 Claims. (Cl. 246—63.)



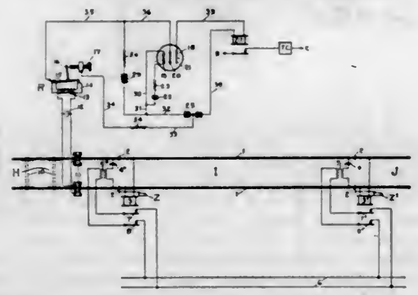
1. A trackway circuit for an automatic train control system comprising a section of track rails containing a

track switch and divided into two portions by insulating joints at said track switch, a source of electrical energy connected across the track rails of one of said portions, a track relay connected across the rails of the other of said portions, and means controlled by the position of said



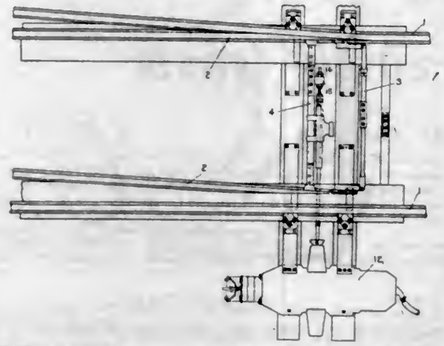
track switch for electrically connecting the rails of said portion having a track relay when the switch is in one position, and for transmitting said electrical energy across said insulating joints when said track switch is in the other position.

1,678,615. TRAIN CONTROL. WINTHROP K. HOWE and CHARLES S. BUSHNELL, Rochester, N. Y., assignors to General Railway Signal Company, Rochester, N. Y. Original application filed July 26, 1923, Serial No. 653,898. Divided and this application filed May 25, 1925. Serial No. 32,865. 25 Claims. (Cl. 246—63.)



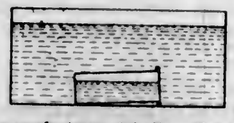
1. Car-carried apparatus for automatic train control systems comprising, a speed responsive device which at all times assumes a condition dependent upon the actual speed of the train, a permissive speed cam adapted to be driven by the wheels of the train for setting up decreasing speed limits in accordance with the progress of the train suitable for passenger train service, a similar permissive speed cam also adapted to be driven by the wheels of the train for setting up decreasing speed limits in accordance with the progress of the train suitable for freight train service, a circuit which if closed prevents the permissive speed cam for freight train service from being effective, manually operable means for closing said circuit, and means for protecting said manually operable means against being operated by unauthorized persons, whereby failure of said circuit creates a condition on the side of safety and sets up speed limits suitable for freight train service.

1,678,616. BUTTON-AFFIXING MACHINE. FRANK F. LANGLEY, Detroit, Mich., assignor to Universal Button Fastening & Button Co., Detroit, Mich., a Corporation of Michigan. Filed Mar. 22, 1922, Serial No. 545,782. Renewed Nov. 16, 1927. 13 Claims. (Cl. 218—6.)



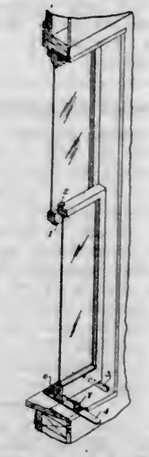
1. In a button affixing machine, the combination of affixing mechanism, a source of button supply, mechanism for placing a button in operative relation to said affixing mechanism, and a rotary positioning device adapted to receive a button from said source of supply and transfer the same into a position in operative relation to said placing mechanism.

1,678,617. CONTINUOUS INDUCTIVE TRAIN-CONTROL SYSTEM FOR RAILROADS. EDWARD H. LOFTIN, New York, N. Y., assignor to General Railway Signal Company, Rochester, N. Y. Filed Dec. 5, 1925. Serial No. 73,408. 8 Claims. (Cl. 246—63.)



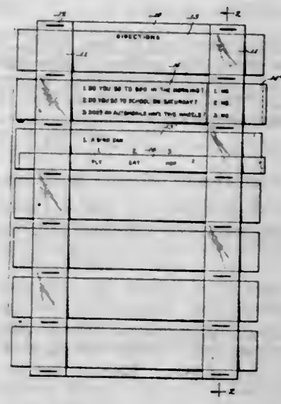
1. In an automatic train control system, a trackway means for carrying an alternating current of a predetermined frequency, a vehicle carried receiving circuit adapted to be excited by the field of said trackway alternating current, a relay in said receiving circuit having two vibratory elements, each of said elements having a mechanical periodicity equal to said predetermined frequency and one of said elements deriving its energy for vibration from the other, and train control means controlled by said vibratory elements.

1,678,618. ADJUSTABLE TRAILING SWITCH CONNECTION FOR RAILROADS. NEIL D. PRESTON, Rochester, N. Y., assignor to General Railway Signal Company, Rochester, N. Y. Filed Jan. 13, 1927. Serial No. 160,905. 10 Claims. (Cl. 246—318.)



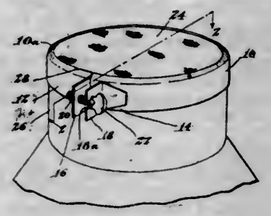
3. In a switch connection, a switch, a switch machine, a detent member operated by the machine, and relatively adjustable notched rods connecting the detent member with the switch.

1,678,619. MANUFACTURE OF INDIGO. CHARLES J. STROSACKER and CHESTER C. KENNEDY, Midland, Mich., assignors to The Dow Chemical Company, Midland, Mich., a Corporation of Michigan. Filed Feb. 20, 1924. Serial No. 694,118. 5 Claims. (Cl. 260—47.)



1. In the manufacture of indigo, the steps which consist in subjecting a phenyl compound with an alkali in a container to the heat of a bath of molten material of about the same melting point as the alkali, and finally removing the container from such heated zone and without material access of air submerging it in water.

1,678,620. SASH-MEASURING GAUGE OR THE LIKE. FRANK J. BAKER, Dayton, Ohio. Filed Mar. 23, 1927. Serial No. 177,522. 6 Claims. (Cl. 33—42.)

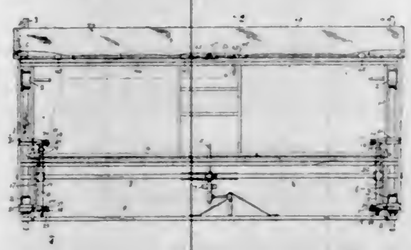


1. A sash measuring gauge for double-hung windows comprising a stop adapted to be applied to one of the sash, means for supporting the lower sash for effecting predetermined vertical spacing between the sash as determined by said stop, a sash marker supported at a height equal to the vertical spacing of the sash and operable over the sill from one side to the other of the window opening for inscribing a mark along the lower edge of the lower sash.

1,678,621. SELF-TEACHING DEVICE. WILLIAM H. HOLMES, Mount Vernon, N. Y. Filed Dec. 31, 1926. Serial No. 158,321. 3 Claims. (Cl. 35—9.)

1. An indicia-bearing member for use in connection with a device of the class described, comprising an accordion folded strip having written indicia displayed on one face and graphic indicia displayed on its other face, the printed and graphic indicia corresponding in the corresponding spaces on opposite sides of the strip.

1,678,622. CLAMPING BAND. JOHN F. HORNE, Portland, Me.; Florence P. Davis, Portland, Me., executrix of said John F. Horne, deceased. Filed May 3, 1926. Serial No. 106,300. 9 Claims. (Cl. 24—256.)

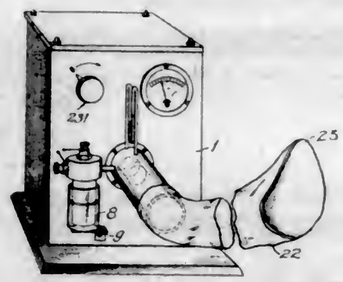


1. A clamping band adapted to fit straining nozzles of different sizes comprising, in combination, a split band formed in a circle with overlapping ends; fastening means for holding said overlapping ends together and capable of adjustment to fit the band to a selected size of nozzle; means on each band end adapted to register with one another for indicating prior to placing the band on the nozzle when the proper adjustment of the fastening means has been effected to fit the band to said selected size of nozzle.

1,678,623. METHOD FOR PREPARING PENTAERYTHRITE. HENRY A. AARONSON, New York, N. Y. Filed Nov. 8, 1923. Serial No. 673,441. 4 Claims. Cl. 260—141.) (Granted under the provisions of the act of Mar. 3, 1883, 22 Stat. L., 625, as amended Apr. 30, 1928.)

1. The method of preparing pentaerythrite which includes mixing about 44 grams of acetaldehyde with about 150 grams of formaldehyde, and not to exceed 1.000

grams of water, gradually adding lime while stirring until the temperature of 60° C. has been attained, continuing the gradual addition of lime to maintain such temperature until about 33 grams is added, continuing the stirring for a period of two hours while maintaining a temperature of approximately 60° C. and below 65° C., cooling the mixture, precipitating the lime with sulphuric acid, filtering off the calcium sulphate, removing the remaining lime with oxalic acid, evaporating the remaining solution under vacuum, washing and drying the residue, and then pulverizing the same.



1,678,624. CONCRETE-ROAD MACHINE. EDWARD G. CARR, Milwaukee, Wis., assignor to The Lakewood Engineering Company, Lakewood, Ohio, a Corporation of Ohio. Filed May 9, 1919. Serial No. 295,948. 12 Claims. (Cl. 94—45.)

11. In a device of the class described, a portable frame, and means for propelling the same; and a belt supported at its ends by said frame so as to have engagement with the surface of a piece of plastic cement work over which said frame travels.

1,678,625. APPARATUS FOR THE THERAPEUTIC APPLICATION OF CHLORINE. CHARLES F. WALLACE, Westfield, and JOHN C. BAKER, Nutley, N. J., assignors to Wallace & Tiernan Products, Inc., Belleville, N. J., a Corporation of New Jersey. Filed June 18, 1924. Serial No. 720,730. 4 Claims. (Cl. 128—185.)

1. In an apparatus for the therapeutical application of chlorine, the combination of means for producing a flow of air, a passage for such air having a constriction such as a Venturi throat, means associated therewith for measuring and indicating the rate of flow of the air, a source of chlorine, means for accurately fixing the rate

of flow of the same, means for mixing the chlorine with the air flow and means for conducting the mixture to the point of application.

1,678,626. PROCESS OF REVIVING CATALYSTS. ALPHONS O. JAEGER, Hamburg, N. Y., assignor to The Selden Company, Pittsburgh, Pa., a Corporation of Delaware. Filed Aug. 3, 1925. Serial No. 48,001. 6 Claims. (Cl. 23—238.)

1. A process of regenerating the catalytic activity of deteriorated contact masses which contact masses are not injured by treatment with oxidizing agents, which comprises subjecting the contact masses to treatment with an inorganic peroxide belonging to the group consisting of hydrogen peroxide and ozone.

1,678,627. METHOD OF REGENERATING CATALYSTS. ALPHONS O. JAEGER, Hamburg, N. Y., assignor to The Selden Company, Pittsburgh, Pa., a Corporation of Delaware. Filed Aug. 3, 1925. Serial No. 48,002. 23 Claims. (Cl. 23—238.)

1. A process of regenerating contact masses which comprises treating contact masses, which have become deteriorated by use in the catalytic oxidation of organic compounds, with an acidogen which is volatile below red heat and which does not leave a residue non-volatile upon treatment with oxygen containing gases at elevated temperatures.

Patents Nos. 1,678,628 to 1,679,340.

THE
OFFICIAL GAZETTE
OF THE
United States Patent Office.

Vol. 372—No. 5. TUESDAY, JULY 31, 1928. Price—$10 per year.

The OFFICIAL GAZETTE is mailed under the direction of the Superintendent of Documents, Government Printing Office, to whom all subscriptions should be made payable and all communications respecting the Gazette should be addressed. Issued weekly. Subscription, $10.00 per annum; including annual indexes, $11.50; single numbers, 25 cents each.
PRINTED COPIES OF PATENTS are furnished by the Patent Office at 10 cents each. For the latter, address the Commissioner of Patents, Washington, D. C.
CIRCULARS OF GENERAL INFORMATION concerning PATENTS or concerning TRADE-MARKS, PRINTS, and LABELS will be sent without cost on request to the Commissioner of Patents, Washington, D. C.

International Convention—Ratification.

This Office has been notified by the Secretary of State of the receipt of a notice from the Government of the Netherlands that the following countries have ratified the Convention of the Union for the Protection of Industrial Property as revised at The Hague on November 6, 1925: Italy, Germany, Great Britain and North Ireland, Austria, Canada, Spain, and the Netherlands.

THOMAS E. ROBERTSON,
Commissioner of Patents.

Adjudicated Patents.

(C. C. A. Ind.) Herschel patent, No. 1,545,829, for revoluble mounting of wheel on stationary axle, *Held* invalid. *R. Herschel Mfg. Co.* v. *Great States Corporation*, 26 F. (2d) 362.

(C. C. A. N. Y.) Hofmann and Gottlob patent, No. 1,149,580, for vulcanizing process, claims 1 and 4 *Held* invalid, because specifications are insufficient and claims are too broad. *Grasselli Chemical Co.* v. *National Aniline & Chemical Co.*, 26 F. (2d) 305.

(C. C. A. N. Y.) Gibbs patent, No. 1,333,017, for animal trap, claim 10 *Held* valid and infringed. *Gibbs* v. *Triumph Trap Co.*, 26 F. (2d) 312.

(C. C. A. N. Y.) Gibbs patent, No. 1,458,286, for animal trap having simultaneous locking of jaws, claim 4 *Held* valid and infringed. *Id.*

(C. C. A. Minn.) Klima design patent, No. 50,624, for barn ventilator, *Held* invalid. *King Ventilating Co.* v. *St. James Ventilating Co.*, 26 F. (2d) 357.

Adverse Decisions in Interference.

In interferences involving the indicated claims of the following patents final decisions have been rendered that the respective patentees were not the first inventors with respect to the claims listed:

Pat. 1,600,556, W. H. Matthews, Straightforward trunking system, decided June 20, 1928, claim 5.

Pat. 1,613,631, G. Weiss, Actuating mechanism for molding machinery, decided July 12, 1928, claims 1 and 7.

Pat. 1,637,283, K. Schmidt, decided June 9, 1928, claims 1 and 2.

Changes in Classification.

Order No. 3,056, July 12, 1928, directs:

In *class 206, Special Receptacles and Packages* (Division 40), establish the following subclasses and definitions. the patents contained in subclass 41.5 having been taken from class 131, Tobacco, subclass 59, Tobacco-users' appliances, and those contained in subclass 41.6 having been taken from class 131, Tobacco, subclass 30, Moistening:

Receptacles
Pocket and personal use
Cigars and tobacco
41.5. With cutter.
41.6. With humidor.

41.5. RECEPTACLES, POCKET AND PERSONAL USE, CIGARS AND TOBACCO, WITH CUTTER. Patents coming under subclass 41 and having therewith cutting devices. They are generally for cutting plug tobacco.

Note.—See this class, subclasses 35 and 41.

Note.—See Class 131, TOBACCO, subclass 59, Tobacco-users' appliances.

41.6. RECEPTACLES, POCKET AND PERSONAL USE, CIGARS AND TOBACCO, WITH HUMIDOR. Receptacles coming under the definition of subclass 41 which have as part thereof a humidor.

In *class 206, Special Receptacles and Packages* (Division 40), establish the following subclass and definition, the patents contained in this subclass having been taken for the most part from various subclasses in class 206, and from class 131, Tobacco, subclass 51, Cigar supports and stands; class 220, Metallic Receptacles, subclasses 18, Wall or ground supported, and 63, Linings; and class 224, Package and Article Carriers, subclasses 29, Vehicle, and 30, Vehicle, Bicycle:

[illegible] Receptacles
19.5 Vehicle attached.

19.5 RECEPTACLES, VEHICLE ATTACHED. Includes special receptacles for holding matches, cigarettes, cigars, toilet appliances, etc., with means to attach them to vehicle parts, as the instrument board or steering column of an automobile.

Note.—See this class, subclass 30.

Note.—See class 224, PACKAGE AND ARTICLE CARRIERS, subclass 29, Vehicle, and the subclasses indented thereunder.

Note.—See class 312, SUPPORTS, CABINET STRUCTURES, subclass 112, Wall or window mounted type, and the subclass indented thereunder.

Condition of Applications Under Examination at Close of Business July 20, 1928.

(Total number of applications awaiting action, excluding Trade-Mark Division, 109,174; Trade-Mark Division, 1,889. Oldest new case, Sept. 22, 1927; oldest amended, Oct. 3, 1927. The dates given are 1927 except where † indicates 1928.)

DECISIONS IN PATENT AND TRADE-MARK CASES.

Court of Appeals of the District of Columbia.

DOWNS *v.* ANDREWS.

No. 1,996. Decided March 5, 1928.

1. INTERFERENCE—PRIORITY—CONCEPTION.

"Conception is an act of the mind and it has no value as evidence until its existence has been manifested and proved by exterior acts or declarations."

2. SAME—SAME—SAME—PROOF OF.

"The conception of an idea is a mental function and its existence may be proved by deeds as well as by words."

3. SAME—SAME—WORK OF ANOTHER.

Where the evidence established that a sketch of a converter embodying the invention in issue was made by one R. without the knowledge of the appellee, *Held* not to justify the conclusion that R. either invented or procured the invention from someone else other than the appellee, where appellee had testified that he disclosed the invention to R.

4. SAME—SAME—REDUCTION TO PRACTICE.

Where it appears that a converter embodying the invention was built and tested, but subsequently dismantled, *Held* that such dismantling does not establish that the operation of the converter was a mere abandoned experiment, since it affirmatively appeared that the converter was dismantled for the purpose of inspection and not because it was a failure.

5. SAME—SAME—SAME.

While reduction to practice requires that the efficacy and utility of the invention be demonstrated by tests, it is not necessary that the practical embodiment be mechanically perfect. If the operative means accomplished the desired end, reduction to practice is established, though it appears on inspection that elements of the device should have been made stronger or given a better shape, arrangement, or adjustment.

Mr. W. B. Morton, Mr. M. W. Sage, Mr. E. H. Merchant, and *Mr. G. J. Hesselman* for Downs.

Mr. B. G. Foster for Andrews.

APPEAL from the Commissioner of Patents. Affirmed.

Before MARTIN, Chief Justice, VAN ORSDEL, Justice, and SMITH, Judge U. S. Court of Customs Appeals.

SMITH, *J.:*

This is an appeal from a decision of the Commissioner of Patents awarding in an interference proceeding priority of invention to the junior party, Chester E. Andrews, thereby affirming the decision of the Examiners in Chief, affirming the decision of the Examiner of Interferences.

The subject matter of the interference is defined in four counts which are as follows:

1. A catalytic body comprising a base of aluminum and a metal oxide catalyst on said aluminum and in direct contact therewith.

2. In a converter the combination with a catalyst, comprising vanadium oxide, of a support or carrier for the same comprising aluminum and having the vanadium oxide in direct contact therewith.

3. A catalytic body comprising a base of aluminum and vanadium oxide on said aluminum and in direct contact therewith.

4. A catalytic body comprising a base of aluminum and an oxide of a metal of the fifth or sixth groups of the periodic system on said aluminum and in direct contact therewith.

It seems to be conceded by the parties that the production of certain chemical compounds from hydrocarbons requires that the hydrocarbon used shall be partially, not completely, oxidized in order to secure the chemical action desired. Even if there be partial oxidation of the hydrocarbon and even if all the chemical elements necessary to constitute the particular compound be present, their chemical combination into the compound cannot be effectuated without the aid of a catalyst. Just what a catalyst does and how it acts nobody seems to know. All that appears to be known is that there are chemical combinations which cannot be accomplished without a catalyst and that the catalyst itself suffers no permanent chemical change. Apparently a catalyst bridges the abyss between the chemical elements and permits them to get together. So far as chemical change is concerned nothing happens without it and nothing happens to it. By partial oxidation and the use of a catalyzer, maleic acid may be produced from benzene, anthraquinone from anthracene and phthalic acid from naphthalene. The catalyst used for the production of phthalic acid from partially-oxidized naphthalene in the vapor state is vanadium oxide. Vanadium oxide is a powder and to be effectively used must be supported or carried by a good conductor of heat having mechanical strength, durability, and a melting point not lower than that of the catalyst. Before the discovery that aluminum had special qualities which peculiarly fitted it for use as a catalyst carrier, various substances such as pumice, glass, asbestos, sand, glass wool, kieselguhr, coke, nickel, iron, cobalt and some of the heavier metals were used as catalyst carriers. Some of those carriers were poor conductors of heat, some of them interfered with the chemical reaction contemplated, and all of them were more or less unsatisfactory inasmuch as they detrimentally affected the production of the chemical compounds desired. The fact that the catalyst carriers known to the art were not all that could be wished for was a challenge to the inventive faculties of Downs and Andrews and both of them undertook the task of finding a *carrier* which would save the catalyzer from deterioration and give to it longer efficiency. In considering the claims of both men it should not be forgotten that the objective sought by both was not the production of new chemical compounds or of a new catalyst to induce chemical reaction but the development of a support or carrier which would hold the catalyst and prolong its active life.

It appears from Down's preliminary statement that about the 28th of July, 1918, he conceived and disclosed the idea that aluminum possessed the properties which would successfully meet the requirements of a catalyst carrier. However, as Downs filed his application for a patent on November 13, 1919, that date must be regarded as his date of conception and reduction to practice in the absence of evidence establishing an earlier date.

Andrews filed his application for a patent on October 22, 1920, subsequent to the filing by Downs.

Andrews was, therefore, the junior party and upon him was imposed the burden of proving his priority of invention.

Andrews's case.

Andrews in his own behalf testified that early in November, 1918, he conceived as a catalytic body the combination of the metal aluminum with vanadium oxide in contact therewith and in that month explained and disclosed his invention to J. M. Selden, sr., J. E. Randall and others; that he first experimented with his invention in January, 1919, and that the first written description of his invention was made on January 27, 1919, by K. B. John in John's notebook; that John was employed by the Walker Chemical Company of Pittsburgh but in making the experiment described in said notebook was working under the witness's direction; that in July, 1919, a sketch was made by J. E. Randall of a converter of which metallic aluminum as a carrier of vanadium oxide formed a part; that on August 24, 1919, the converter so sketched was constructed and put into operation; that the witness did not know how Mr. Randall came to make the sketch but that he had discussed with Mr. Randall the utilizing of vanadium oxide as a catalyst on aluminum as a carrier; that after this sketch was made, it was determined to install the construction indicated thereby in one of the converters of the plant; that requisitions for the installation were made out before the end of July, 1919, and one of the converter units was made ready to receive the installation; that the converter equipped with aluminum and vanadium oxide thereon was a full-size plant converter for commercial purposes and that it was used continuously between August 23, 1919, and October 31, 1919, for the vapor phase oxidation of naphthalene and the production of phthalic anhydride; that the phthalic acid produced by the converter became a part of the plant production and was purified and sold; that the operation of the first converter installed and provided with the aluminum carrier for vanadium oxide compared favorably with the ordinary run of converters not equipped with the aluminum carriers; that the converter, as appears from the witness's notebook was dismantled on October 31, 1919, not because it would not successfully produce phthalic anhydride but for the purpose of inspecting the internal construction; that as the result of such inspection it was found that to a slight extent melting had occurred in unit No. 3; that because of the melting it was decided to build another converter using thicker metallic aluminum as a carrier for the vanadium oxide catalyst and thereby avoid trouble from melting; that it was decided to completely line this converter with sheet aluminum, make it gas tight, and use trays and spreading strips of a much thicker cast of aluminum; that the witness made a complete drawing of this aluminum lining on January 27, 1920; (the drawing produced by the witness was introduced in evidence); that the new converter unit was made ready and provided with a thicker aluminum lining and thicker aluminum trays supported by pieces of inch and a quarter aluminum pipe; that the new converter was operated from February 25, 1920, to September 12, 1920, with the exception of the period from May 3 to June 15, during which the production of phthalic anhydride ceased because of the difficulty in obtaining a sufficient quantity of naphthalene; that during that time (that is, February 25 to September 12) the converter produced phthalic anhydride which was purified and sold; that the converter was shut down from September 12 to September 15 in order that its condition might be inspected; that the inspection disclosed that some of the aluminum trays were slightly warped but that the whole structure was intact and in position. In corroboration of this witness's testimony as to the installation of the converter, the date on which it commenced operations and the production in pounds of phthalic acid of each of the converter units, Andrews produced written notes made by him.

Kenneth B. John testified on behalf of Andrews that he was an engineer and that he was employed by the Walker Chemical Company at Pittsburgh on the 23rd of December, 1918; that Andrews in January, 1919, was engaged in trying to make a catalyst that would be self-supporting by causing it to adhere to various metals; that in that month the witness, *under the direction of Andrews*, tried to coat aluminum wire with molten vanadium oxide and kept notes of a specific experiment made by him on the 27th of January, 1919; that according to the notes made by the witness:

A few experiments were run by heating the catalyst and dipping aluminum into it. The rod used was about No. 3 aluminum wire. The catalyst seemed to stick to this very well, but great care had to be exercised in the dipping due to the fact that aluminum melts at practically the same temperature as the catalyst. One at 657, the other at 658. In one case aluminum melted into the molten catalyst. The mixture was poured into a mold before the aluminum had time to become entirely molten. In this the aluminum and catalyst seemed to stay together very well without cracking or breaking.

John also testified that the catalyst used was vanadium pentoxide and that the experiment referred to in his notes was made under the direction of Andrews; that two units were erected by the Walker Chemical Company, both of which units used the catalyst in direct contact with the aluminum; that the first unit was built in August, 1919, and was operated for about two months and produced phthalic anhydride; that after two months of operation the unit was opened up and examined; that on such examination it was found that in places the aluminum spreaders and trays had sagged slightly because of the heat and in some places the aluminum had melted but that notwithstanding the sagging and the melting disclosed by the inspection, the converter was capable of producing phthalic anhydride; that the second unit was built in the latter part of February or in March, 1920, and was lined with aluminum plates, welded together; that the catalyst carriers were made of square plates of cast aluminum and were separated by rectangular aluminum castings placed in a crisscross manner; that all of the aluminum surfaces were coated with a catalyst; that the tube through which the pyrometers and air were introduced were also of aluminum; that the second unit was operated for some time and produced phthalic anhydride and was then opened up and examined to determine its contents; that its condition was quite good although some of the plates were warped.

Carl E. Ruth, a chemist, testified on behalf of Andrews, that he was employed by the Selden Company on January 28, 1919; that a few days after his employment he saw Andrews and John experimenting at the plant with different catalyst carriers; that one of the carriers used was aluminum and the catalyst was vanadium pentoxide; that two units using aluminum as a carrier for vanadium pentoxide were put in operation and produced phthalic anhydride; that the first unit was built in the fall of 1919 and the second in the spring of 1920; that both units were built primarily under Mr. Andrews's instruction but that it was left to the witness to carry out the actual work; that the unit constructed in the fall of 1919 was operated for about *six or eight weeks* and successfully produced phthalic anhydride; that operation of the unit constructed in the fall of 1919 was suspended in order that it *might be opened up and inspected;* that on such inspection the witness noted that a small quantity of the catalyst had disappeared but that the condition of the unit at that time did not materially differ from its condition at the time it was put in operation; that the second unit was continued in operation until the late fall of 1920 when its further operation was suspended for the purpose of inspecting it; that the inspection of the second unit disclosed that it was in good shape although some of the plates had become slightly warped.

Harry Pafford testified for Andrews that on November 27, 1919, he was employed by the Walker Chemical Company as an operator of converters for the production of phthalic anhydride acid; that in March, 1920, there was in building "E" of the Company's plant a converter lined with aluminum and equipped with aluminum plates covered with a catalyst; that he operated the converter so equipped the same as other units of the plant; that that converter was operated as well as he could remember for *about six months* and that it was torn down and the trays removed in September or October, 1920; that he found some of the trays slightly warped but otherwise in good condition; that said aluminum-equipped unit operated successfully and produced phthalic anhydride for a period of six months; that the phthalic anhydride so produced was stored with phthalic anhydride produced by other units and purified for sale.

Clifford Hutchins testified for Andrews that he was employed by the Walker Chemical Company on the 13th of October, 1919; that after the first two weeks of his employment he was an operator of units for the production of phthalic anhydride; that No. 5 unit was built with aluminum trays with catalyst sprinkled on them; that No. 5 unit was operated for a period of *six months;* that it developed no trouble and operated as well as could be expected.

Edward C. Orth testified on behalf of Andrews that he was employed by the Walker Chemical Company from September 17, 1919, until about June, 1920; that he was an operator of units for the production of phthalic anhydride; that unit No. 5 was equipped with aluminum slabs which were put in place in his presence.

John J. Scanlon testified for Andrews that he was employed by the Walker Chemical Company from 1918 until 1920 as shift foreman in charge of men operating the units for making phthalic acid; that unit No. 3 was equipped in August, 1919, with aluminum trays; that it was his duty to pay especial attention to this particular unit, inasmuch as aluminum trays were used for the first time in that unit; that unit No. 3, containing thin aluminum trays, operated successfully for about two and one-half months; that unit No. 5 was, he thought, equipped with thick aluminum trays about the last part of November.

Downs's case.

Robert R. Sawhill testified for Downs that he was employed by the Walker Chemical Company from the first part of the year 1919 until the latter part of September, 1919; that aluminum plates carrying vanadium oxide were installed in converter 3 in the latter part of August, 1919, and that those plates were, *to the best of his knowledge,* in use for approximately *two weeks;* that he saw some of the plates before leaving the service of the Walker Chemical Company and that they were warped and partially melted.

Harry G. Baer testified for Downs that he was employed by the Walker Chemical Company from January 17, 1918, until June 30, 1919; that he did not know of any aluminum trays being installed in any of the converters of the Walker Chemical Company.

Malcolm K. Spieth testified for Downs that he was employed by the Walker Chemical Company from June, 1918, to August, 1919; that he knew Kenneth B. John and was employed in the same room with him; that he never saw John experimenting with aluminum rods; *that he never heard of any converter used by the Walker Chemical Company that had aluminum plates or trays in them and that the only converters of which he was aware had tile trays;* that he might have been absent from his employment on January 27, 1919, because of a cold.

Frank A. Reese testified that he was employed by the Walker Chemical Company from September, 1918, to December, 1920; that he knew Kenneth B.

John and that the witness never saw John working with aluminum rods; *that one of the converters operated by the witness was equipped with aluminum trays which were put in about August, 1919;* that *to the best of his knowledge* the trays were removed *early in September, about two weeks after they were put in;* that *he believed* that the trays were discarded; that it *seemed possible* to him that the plates were removed because of being unsuccessful; that after the removal of the aluminum trays fire-clay trays were put in; that he did not know of any other converter which was operated with aluminum trays but that it *was possible* that some other converter was so equipped; that he was out of the service of the Walker Chemical Company for a short time but did not remember how long; that to the best of his knowledge the converter equipped with aluminum trays produced phthalic anhydride, and that that product was placed in barrels which were taken to the stock room.

Leslie J. Wolfe testified for Downs that he was employed by the Walker Chemical Company from the latter part of October, 1917, until December 31, 1920; that he was doing mechanical work in the building of converters and helped to operate them at intervals; that the converters were used for the conversion of naphthalene into phthalic acid; that in August, 1919, a converter was, for the first time, equipped with aluminum trays; that that converter was known as No. 3 and that it was operated for a short time, approximately 10 days; that the aluminum trays were then taken out and replaced by a tile tray; that thereafter converter No. 3 continued to operate with tile trays; that the aluminum trays taken out of No. 3 were left lying on the floor of the plant and that some of them were badly warped; that the corner of one of the trays was fused off; that none of the trays taken out of No. 3 were ever used again; that early in the year 1920 converter No. 5 was equipped with aluminum lining and aluminum trays; that No. 5 was operated to produce phthalic acid and continued in operation for a period of not over two weeks; that the trays were then removed and were found badly warped and several of them fused and melted; that after the aluminum trays were removed from converter No. 5, tile trays were substituted therefor; that No. 5 with the tile trays resumed the production of phthalic acid; that Mr. Habeshian placed the aluminum trays in converter No. 3 and that Mr. Andrews was present when that installation was made. On cross-examination Wolfe stated that he took care of the furnaces, motors, blowers, converters and the equipment necessary for the operation of the plant and did the actual work thereon; that No. 3 was operated for the first time with aluminum trays in the presence of Mr. Andrews and Mr. Ruth; that No. 3 produced phthalic acid but that the production was lower than that of other units. At this point, under instruction of counsel, the witness refused to say whether or not the production records submitted in evidence by Andrews were the records with which the witness was acquainted. Wolfe also testified on cross-examination that Andrews operated converter No. 5 on several occasions; that the witness looked into the condenser of converter No. 5 and found that its production was somewhat smaller by comparison with that of other converters; that he based his statement that unit No. 5 was operated for two weeks on his recollection.

This review of the evidence is made because of the conclusions of fact and of law earnestly argued by counsel for the appellant and for a proper understanding of the reasons which induced the court to reach its final conclusion.

The opinion.

On the evidence hereinbefore recited, the appellant contends first, that the testimony of Andrews that he conceived his invention and disclosed it to Randall and Selden and others in November, 1918, is wholly uncorroborated and is, therefore, worthless to establish Andrews's priority of invention; second, that the record and notes made by Kenneth John on the 27th of January, 1919, of the specific experiment with aluminum wire and vanadium oxide cannot be regarded as proving that Andrews on that date had conceived of the use of aluminum wire as a catalyst carrier; third, that the experiment conducted by John with aluminum wire and vanadium oxide was John's work and not Andrews's work and that even if it could be accepted as Andrews's work the experiment was obviously a failure inasmuch as nothing was done with the rods and that Andrews's conception was, therefore, not fully and completely disclosed as a tangible working thing; fourth, that converter No. 3 was designed by Randall and built by the Walker Chemical Company and there was, consequently, no evidence of Andrews's conception of the invention or of its reduction to practice.

The testimony of Andrews that he conceived, in November, 1918, the combination by contact of aluminum and vanadium oxide into a catalytic body and on that day explained and disclosed his conception to Selden and Randall stands wholly uncorroborated. From that it follows that November, 1918, can not be accorded to Andrews as the date on which he conceived and disclosed his invention. That Andrews, however, did have in mind in January, 1919, the coating of aluminum with vanadium oxide and the use of aluminum so coated as a catalytic body finds corroboration in the things done and the notes made by John under Andrews's direction and seems to be fairly established. True enough, John and not Andrews coated aluminum wire with the catalyst vanadium oxide by dipping the wire into the molten catalyst and made a record of what was done. Nevertheless, John and Andrews both testified positively that the experiment and the record thereof was made under the direction of Andrews. There is no claim by John and no pretense on his part that he did the things recorded on his own initiative or that the experiment was his experiment and not one directed by Andrews. From the fact that John did what he did under the direction of Andrews, it must be concluded that Andrews told John what to do and that Andrews had a conception of what was to be done. Of course the coating of aluminum rods with vanadium oxide was not a reduction to practice of the catalyst carrier which Andrews conceived and disclosed to John but it was a conception and disclosure that the metal aluminum could be utilized as a carrier for vanadium oxide.

[1] The testimony of John and the notes made by him are corroborative of the claim of Andrews that he had as early as January, 1919, conceived the use of aluminum as a catalyst carrier and disclosed his conception to John. John's sworn statement that under the direction of Andrews he coated aluminum wire with vanadium oxide and his written record of what he did must be weighed and their value determined by the ordinary rules applicable to such evidence and not by the rule which precludes the acceptance of a claimant's uncorroborated statements that at a certain time he conceived an invention. Conception is an act of the mind and it has no value as evidence until its existence has been manifested and proved by exterior acts or declarations. As was well said by the Examiners in Chief, the law required corroboration of Andrews, not John.

[2] But whether January, 1919, be accepted or rejected as the date of Andrews's conception and disclosure the evidence in the case establishes beyond a reasonable doubt that his mental conception of the invention was made manifest and disclosed by investing it with a material and visible form not later than August 24, 1919. The conception of an idea is a mental function and its existence may be proved by deeds as well as by words. On the last-named date a converter for the production of phthalic anhydride was installed under the instructions of Andrews and equipped with aluminum trays which were coated with vanadium oxide. As appears from the testimony of practically all of the witnesses in the case, that converter actually produced phthalic anhydride and the preponderance of evidence establishes that from the date of the installation of the converter until October 31, 1919, it produced phthalic anhydride which was purified and prepared for sale as was the phthalic anhydride produced by other converters not equipped with the aluminum catalyst carrier.

[3] It is argued by counsel for the appellant that the sketch for this converter was made by Randall and without the knowledge of Andrews. That is true but that hardly justifies the conclusion that Randall was either the inventor or that he procured the invention from some one other than Andrews. Especially is the conclusion unwarranted in view of the fact that Andrews testified that he disclosed his invention to Randall and Selden. That testimony was not corroborated and avails Andrews nothing so far as conception and disclosure are concerned but it does show that the conclusion drawn by counsel for the appellant from Randall's making of the sketch was not warranted inasmuch as the idea embodied in the sketch *might* have been procured from Andrews and that the "some one else" *might* well have been Andrews.

It is contended by the appellant that the operation of converter No. 3 was an abandoned experiment and not a reduction to practice for the reason that it was dismantled on October 31, 1919, and ceased to function as a producer of phthalic anhydride. We cannot sustain that contention because it affirmatively appears from the evidence that the converter was dismantled for the purpose of inspection and not because it was a failure. That inspection did disclose that the converter might be improved by substituting thicker aluminum in order that the slight melting of the aluminum which the inspection developed might be avoided. That converter 3 was not an abandoned experiment is further proven by the fact that converter No. 5 was constructed in March, 1920, and equipped with thicker cast aluminum plates to remedy the mechanical defects developed by the commercial use of converter No. 3. Converter No. 5 operated from March, 1920, until September, 1920, when its operation was suspended for the purpose of inspecting it. The inspection disclosed that the converter was in good shape although some of the plates had become slightly warped.

[4] While reduction to practice requires that the invention be so tested that its efficacy and utility are demonstrated, it is not necessary that the practical embodiment of the idea of the invention should be mechanically perfect. If the operative means accomplishes the desired end, reduction to practice is established although it appears on inspection that the elements of the device should have been made stronger or given a better shape, arrangment or adjustment. *Gallagher* v. *Hien*, 25 App. D. C. 77, 82; 115 O. G. 1330. The fact that improvements, obvious to those skilled in the art, may be made to perfect the operation of the means or to increase its practical efficiency does not justify the conclusion that the invention was without practical utility or that its reduction to practice was a failure. *American Hide & Leather Splitting & Dressing Mach. Co.* v. *American Tool & Mach. Co.*, 1 Fed. Cas. 647, 652; *Funk* v. *Whitely*, 117 O. G. 280, 25 App. D. C. 313, 315; *Lowrie* v. *Taylor*, 123 O. G. 1901, 27 App. D. C. 522, 526; *Burson* v. *Vogel*, 131 O. G. 942, 29 App. D. C. 388, 394. Converter No. 3 contained all the essential elements of a practical operative aluminum catalyst carrier and the commercial use of the converter for the production of phthalic anhydride was a reduction to practice of Andrews's conception. *Coffee* v. *Guerrant*, 68 O. G. 279, 3 App. D. C. 497, 499, 500.

The decision of the Commissioner of Patents awarding priority of invention to Andrews is affirmed.

Affirmed.

Patent Suits.

[Notices under sec. 4921, R. S., as amended Feb. 18, 1922.]

989,939, W. E. Allington, Dust collector, filed Apr. 7, 1928, D. C. N. J., Doc. E 3181, *W. E. Allington et al. v. Skinner Bros. Mfg. Co., Inc.*

Claims use since 1896.

CLASS 25.

Locks and Safes.

Ser. No. 266,644. E. J. BROOKS AND COMPANY, New York, N. Y. Filed May 19, 1928.

For Base-Metal Truck-Car and Shipping-Case Seals, Seals for Containers and Packages, and Seals for Tags.

Claims use since 1885.

CLASS 26.

Measuring and Scientific Appliances.

Ser. No. 263,793. THERMATROL MANUFACTURING CO., Springfield, Mass. Filed Mar. 26, 1928.

THERMATROL

For Thermostatically-Controlled Heat Regulators.

Claims use since Jan. 16, 1928.

CLASS 27.

Horological Instruments.

Ser. No. 267,542. Hayman Epstein, doing business as Bulwark Watch Company, New York, N. Y. Filed June 6, 1928.

BULWARK

For Watches, Watchcases, Watch Movements, and Parts Thereof.

Claims use since Apr. 15, 1928.

Ser. No. 268,005. TIFFANY & COMPANY, New York, N. Y. Filed June 13, 1928.

T&Co

For Watches and Clocks.

Claims use since Aug. 13, 1875.

CLASS 28.

Jewelry and Precious-Metal Ware.

Ser. No. 267,008. ONEIDA COMMUNITY LIMITED, Oneida, N. Y. Filed May 25, 1928.

ENCHANTMENT

For Silver-Plated Flatware, Hollow Ware, and Cutlery.

Claims use since Mar. 3, 1928.

Ser. No. 267,436. THE MELMS MANUFACTURING CO., INC., Detroit, Mich. Filed June 4, 1928.

LOVBAND

For Finger Rings.

Claims use since Feb. 1, 1928.

Ser. No. 267,489. ARTHUR W. FORMAN, doing business as Cooper & Forman, New York, N. Y. Filed June 5, 1928.

For Platinum Rings, Brooches, Bar Pins, Lavalliers, Bracelets, and Signet Rings.

Claims use since 1898.

CLASS 32.

Furniture and Upholstery.

Ser. No. 268,198. YAWMAN AND ERBE MFG. CO., Rochester, N. Y. Filed June 16, 1928.

RED BAND

The drawing is lined for red.

For Ledger Card Trays of Sheet Metal.

Claims use since Oct. 31, 1927.

CLASS 34.

Heating, Lighting, and Ventilating Apparatus, Not Including Electrical Apparatus.

Ser. No. 265,833. FREDERICK EHRSAM, doing business as The Victor Screen Ventilator Co., Reading, Pa. Filed May 3, 1928.

VICTOR

For Deflector and Adjustable Lower-Window Ventilators and Parts Thereof.

Claims use since March, 1927.

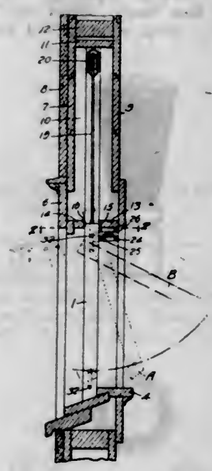
Serial No. 51,531. Original No. 1,487,146, dated Mar. 18, 1924, Serial No. 626,902, filed Mar. 22, 1923. 5 Claims. (Cl. 110—87.)

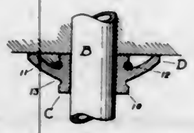


1. A side brick for locomotive arches, curved throughout its upper surface and curved substantially throughout its lower surface, the brick being provided with a depending flange on one side, which flange is at right angles to the body of the brick, the outer surface of this flange being flat to form a relatively wide contracting area, and this flange being provided with a depression to receive a supporting means, and the opposite side of the brick being undercut to form a supporting ledge.

17,053. OIL STOVE. WILLIAM KENT KISE, Kansas City, Mo., assignor to The Everbrite Stove Company, Kansas City, Mo., a Corporation of Missouri. Filed Oct. 30, 1926. Serial No. 145,333. Original No. 1,514,773, dated Nov. 11, 1924. Serial No. 523,303, filed Dec. 19, 1921. 3 Claims. (Cl. 126—93.)

1. An oil stove comprising a casing having an opening across the front thereof, a burner across the casing at the lower edge of the opening and having fuel openings in its upper face, and a guard hinged to the front of the casing at the lower edge of the opening and having an inwardly projecting fender-supporting shelf forming a part thereof.

17,054. WINDOW. CLAUDE A. LEWIS, Houston, Tex., assignor to American Window Company, a Corporation of Delaware. Filed Dec. 24, 1927. Serial No. 242,465. Original No. 1,641,390, dated Sept. 6, 1927, Serial No. 120,600, filed July 6, 1926. 10 Claims. (Cl. 20—49.)



1. A window including a casing and a sash, slideways in the sides of said casing, riders in said slideways, said riders having upper and lower grooves therein, upper and lower pins on said sash fitting within said grooves, said pins being removable from said grooves at both ends thereof whereby said sash may be removed from the riders.

17,055. [WITHDRAWN.]

17,056. FLOOR AND CEILING PLATE. EDWARD L. RIDLER, St. Paul, Minn. Filed Dec. 30, 1926. Serial No. 158,122. Original No. 1,533,141, dated Apr. 14, 1925, Serial No. 543,809, filed Mar. 14, 1922. 4 Claims. (Cl. 126—317.)

1. A plate divided segmentally and including a sleeve and a dished flange thereon, said sleeve being grooved

circumferentially and cupped at one end thereof by said flange, the segments of the plate being designed to be assembled around a pipe, and a flexible retaining mem-

ber adapted to be coupled at its ends around the sleeve and within said groove for yieldingly, slidably gripping the plate segments in assembled relation upon said pipe.

17,057. VALVE CONSTRUCTION FOR INFLATABLE ARTICLES. WILLIAM J. VOIT, Los Angeles, Calif., assignor to W. J. Voit Rubber Co., Los Angeles, Calif., a Corporation of California. Filed Apr. 5, 1928. Serial No. 267,766. Original No. 1,644,096, dated Oct. 4, 1927, Serial No. 186,023, filed Apr. 23, 1927. 10 Claims. (Cl. 152—12.)

1. An inflatable article having a slit therein, a member secured to an inner wall of the article beneath said slit, and a tube secured in said member and adapted to be folded in the space between said inner wall and member.

DESIGNS

JULY 31, 1928.

75,892. LATHER BRUSH OR SIMILAR ARTICLE. ANDREW ALBRIGHT, Jr., Miami, Fla., assignor to Rubber and Celluloid Products Company, Newark, N. J., a Corporation of New Jersey. Filed Oct. 16, 1926. Serial No. 19,387. Term of patent 14 years.

The ornamental design for a lather brush or similar article, as shown.

75,893. UPRIGHT FOR AN ANDIRON. OSCAR B. BACH, New York, N. Y. Filed Dec. 11, 1926. Serial No. 20,021. Term of patent 3½ years.

The ornamental design for an upright for an andiron as shown.

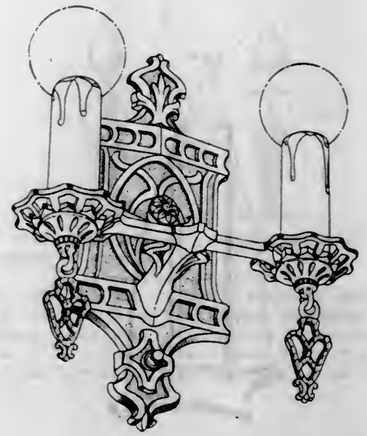
75,894. FRONT PLATE FOR AN ELECTRIC WALL BRACKET OR SIMILAR ARTICLE. JOHN A. BOEHRINGER, Springfield, N. N. Y., assignor to Star Chandelier Co., Inc., New York, N. Y., a Corporation of New York. Filed May 22, 1928. Serial No. 26,798. Term of patent 3½ years.

The ornamental design for a front plate for an electric wall bracket or similar article, as shown.

75,895. ELECTRIC WALL BRACKET OR SIMILAR ARTICLE. JOHN A. BOEHRINGER, Springfield, N. Y., assignor to Star Chandelier Co., Inc., New York, N. Y., a Corporation of New York. Filed May 22, 1928. Serial No. 26,799. Term of patent 3½ years.

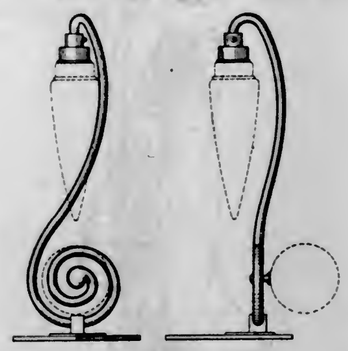
The ornamental design for an electric wall bracket or similar article, as shown.

75,896. CHANDELIER OR SIMILAR ARTICLE. JOHN A. BOEHRINGER, Springfield, N. Y., assignor to Star Chandelier Co., Inc., New York, N. Y., a Corporation of New York. Filed May 22, 1928. Serial No. 26,800. Term of patent 3½ years.



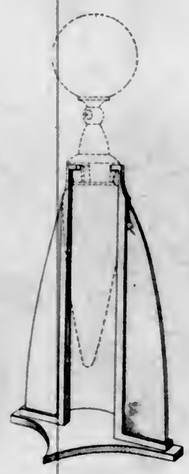
The ornamental design for a chandelier or similar article, as shown.

75,897. COMBINED STRAP AND ARM FOR LIGHTING FIXTURES OR SIMILAR ARTICLES. JOHN A. BOEHRINGER, Springfield, N. Y., assignor to Star Chandelier Co., Inc., New York, N. Y., a Corporation of New York. Filed May 23, 1928. Serial No. 26,819. Term of patent 3½ years.



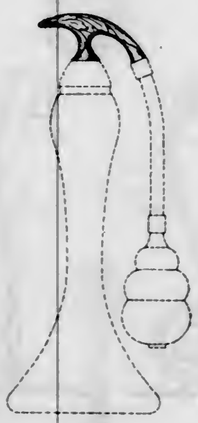
The ornamental design for a combined strap and arm for lighting fixtures or similar articles, as shown.

75,898. ELECTRIC WALL BRACKET OR SIMILAR ARTICLE. JOHN A. BOEHRINGER, Springfield, N. Y., assignor to Star Chandelier Co., Inc., New York, N. Y., a Corporation of New York. Filed May 23, 1928. Serial No. 26,820. Term of patent 3½ years.



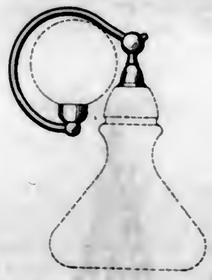
The ornamental design for an electric wall bracket or similar article, as shown.

75,899. ATOMIZER. THOMAS A. DE VILBISS, Toledo, Ohio, assignor to The De Vilbiss Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 7, 1928. Serial No. 26,181. Term of patent 7 years.



The ornamental design for an atomiser, substantially as shown.

75,900. ATOMIZER SUPPORT. THOMAS A. DE VILBISS, Toledo, Ohio, assignor to The De Vilbiss Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 7, 1928. Serial No. 26,184. Term of patent 7 years.

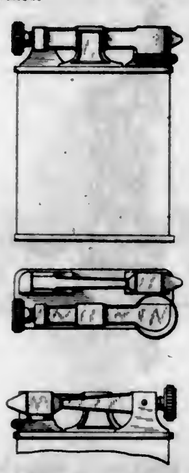


The ornamental design for an atomizer support, substantially as shown.

75,901. ATOMIZER TOP. THOMAS A. DE VILBISS, Toledo, Ohio, assignor to The De Vilbiss Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 7, 1928. Serial No. 26,187. Term of patent 7 years.

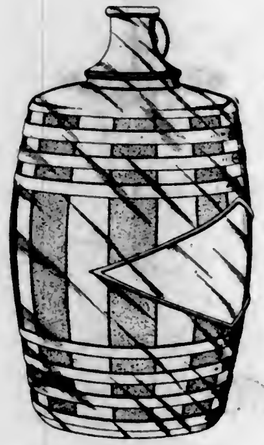
The ornamental design for an atomizer top, substantially as shown.

75,902. ATOMIZER TOP. THOMAS A. DE VILBISS, Toledo, Ohio, assignor to The De Vilbiss Company, Toledo, Ohio, a Corporation of Ohio. Filed Apr. 7, 1928. Serial No. 26,188. Term of patent 7 years.



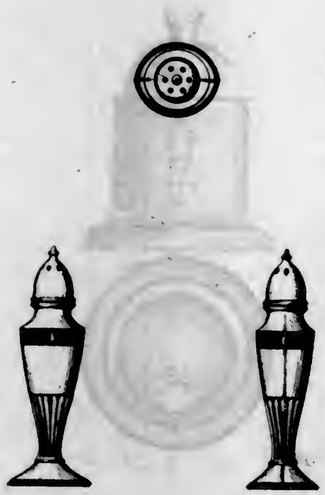
The ornamental design for an atomizer top, substantially as shown.

75,903. BOTTLE. HENRY A. DUPIRCH, St. Louis, Mo. Filed May 11, 1928. Serial No. 26,627. Term of patent 7 years.



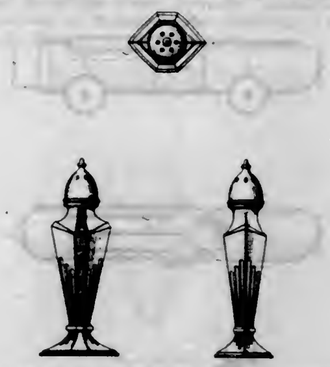
The ornamental design for a bottle, as shown.

75,904. CIGAR LIGHTER. HARRY ESTEROW, New York, N. Y. Filed May 11, 1928. Serial No. 26,637. Term of patent 14 years.



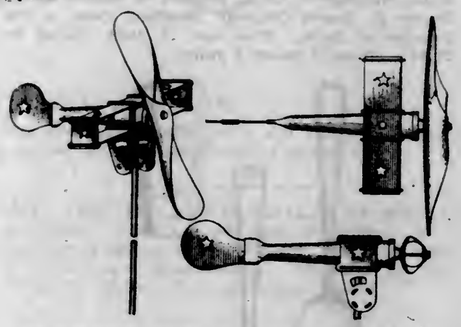
The ornamental design for a cigar lighter, as shown.

75,905. JUG. ANTHONY R. FIORITA, Moberly, Mo., assignor to The Wine-Dip Company, Moberly, Mo., a Corporation of Missouri. Filed Mar. 31, 1928. Serial No. 26,083. Term of patent 14 years.



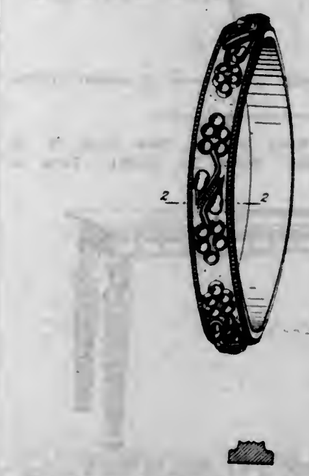
The ornamental design for a jug as shown.

75,906. SALT AND PEPPER SHAKER. ALFRED J. FLAUDER, Bridgeport, Conn. Filed May 26, 1928. Serial No. 26,868. Term of patent 7 years.



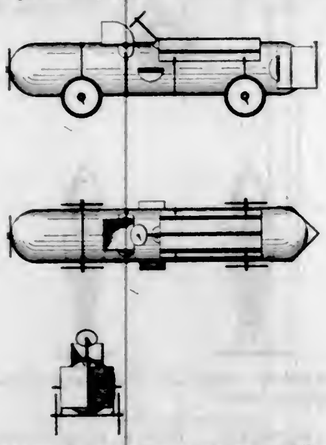
The ornamental design for a salt and pepper shaker substantially as shown.

75,907. SALT AND PEPPER SHAKER. ALFRED J. FLAUDER, Bridgeport, Conn. Filed May 28, 1928. Serial No. 26,891. Term of patent 7 years.



The ornamental design for a salt and pepper shaker substantially as shown.

75,908. PIN WHEEL. JOHN S. FRIDOLPH, New York, N. Y., and JEAN B. A. DUCHESNEAU, Leominster, Mass., assignors to De-Lite-Us Spring Clasp Corporation, New York, N. Y., a Corporation of New York. Filed Mar. 15, 1928. Serial No. 25,876. Term of patent 3½ years.

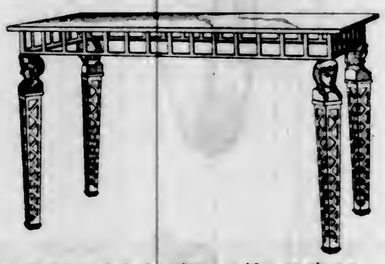


The ornamental design for a pin wheel, as shown.

75,909. WEDDING RING. ALBERT J. FRIEDMAN, Chicago, Ill. Filed Mar. 17, 1927. Serial No. 21,174. Term of patent 14 years.

The ornamental design for a pin wheel, as shown.

75,910. TOY AUTOMOBILE. SAMUEL GORDON, Brooklyn, N. Y. Filed Feb. 18, 1927. Serial No. 20,804. Term of patent 7 years.



The ornamental design for a toy automobile, substantially as shown.

75,911. SPOON OR SIMILAR ARTICLE. EDWIN W. HALL, Wallingford, Conn., assignor to Simeon L. and George H. Rogers Company, Hartford, Conn., a Corporation of Maine. Filed Apr. 24, 1928. Serial No. 26,441. Term of patent 7 years.

The ornamental design for a spoon or similar article, as shown.

75,912. TABLE. EMIL HAUSER, New York, N. Y. Filed Feb. 27, 1928. Serial No. 25,601. Term of patent 3½ years.

The ornamental design for a table, as shown.

75,913. CANDLESTICK. ARTHUR E. HOBSON, Meriden, Conn. Filed May 14, 1928. Serial No. 26,673. Term of patent 14 years.

The ornamental design for a candlestick as shown.

75,914. COMBINED PENHOLDER AND CALENDAR. CARL HORIX, Chicago, Ill. Filed Feb. 19, 1927. Serial No. 20,815. Term of patent 7 years.

The ornamental design for a combined penholder and calendar, as shown.

75,915. SALT AND PEPPER SHAKER OR SIMILAR ARTICLE. JAMES W. JENNINGS, Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass., a Corporation of Massachusetts. Filed Apr. 9, 1928. Serial No. 26,205. Term of patent 7 years.

The ornamental design for a salt and pepper shaker or similar article substantially as shown.

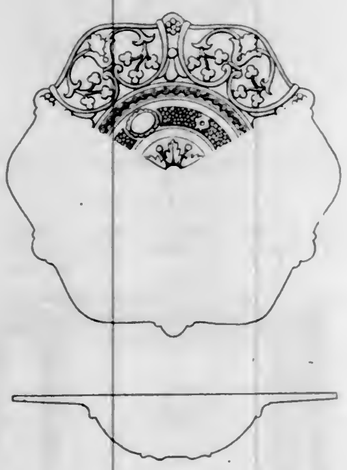
75,916. SALT AND PEPPER SHAKER OR SIMILAR ARTICLE. JAMES W. JENNINGS, Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass., a Corporation of Massachusetts. Filed Mar. 19, 1928. Serial No. 25,907. Term of patent 7 years.

The ornamental design for a salt and pepper shaker or similar article substantially as shown.

75,917. SALT AND PEPPER SHAKER OR SIMILAR ARTICLE. JAMES W. JENNINGS, Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass., a Corporation of Massachusetts. Filed Mar. 19, 1928. Serial No. 25,908. Term of patent 7 years.

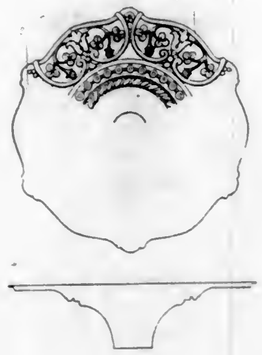
The ornamental design for a salt and pepper shaker or similar article substantially as shown.

75,918. SALT AND PEPPER SHAKER OR SIMILAR ARTICLE. JAMES W. JENNINGS, Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass., a Corporation of Massachusetts. Filed Mar. 19, 1928. Serial No. 25,909. Term of patent 7 years.



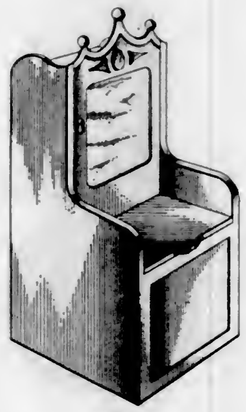
The ornamental design for a salt and pepper shaker or similar article substantially as shown.

75,919. SALT AND PEPPER SHAKER OR SIMILAR ARTICLE. JAMES W. JENNINGS, Providence, R. I., assignor to Quaker Silver Company, Attleboro, Mass., a Corporation of Massachusetts. Filed Mar. 19, 1928. Serial No. 25,910. Term of patent 7 years.



The ornamental design for a salt and pepper shaker or similar article substantially as shown.

75,920. ELECTRIC CEILING FIXTURE. ALFRED E. LARSEN, Chicago, Ill., assignor to Unique Lamp & Casting Company, a Copartnership consisting of Alfred E. Larsen and Lawrence Larsen, Chicago, Ill. Filed May 10, 1928. Serial No. 26,618. Term of patent 3½ years.



The ornamental design for an electric ceiling fixture as shown.

75,921. ELECTRIC CEILING FIXTURE. ALFRED E. LARSEN, Chicago, Ill., assignor to Unique Lamp & Casting Company, Chicago, Ill., a Copartnership consisting of Alfred E. Larsen and Lawrence Larsen. Filed May 10, 1928. Serial No. 26,619. Term of patent 3½ years.

The ornamental design for an electric ceiling fixture as shown.

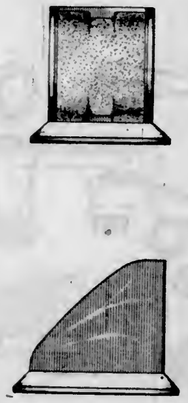
75,922. COVER FOR TOILETS. ALICE LITTLE, Santa Cruz, Calif. Filed Apr. 11, 1928. Serial No. 26,273. Term of patent 7 years.

The ornamental design for a cover for toilets substantially as shown.

75,923. BRACKET FOR DRAPERY POLE OR ROD. GUNNAR MADVIG, Oakland, Calif. Filed Mar. 13, 1928. Serial No. 25,829. Term of patent 3½ years.

The ornamental design for a bracket for drapery pole or rod substantially as shown.

75,924. BRACKET FOR DRAPERY POLE OR ROD. GUNNAR MADVIG, Oakland, Calif. Filed Mar. 13, 1928. Serial No. 25,830. Term of patent 3½ years.

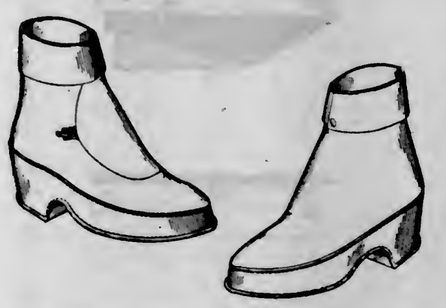


The ornamental design for a bracket for drapery pole or rod substantially as shown.

75,925. BRACKET FOR DRAPERY POLE OR ROD. GUNNAR MADVIG, Oakland, Calif. Filed Mar. 13, 1928. Serial No. 25,831. Term of patent 3½ years.

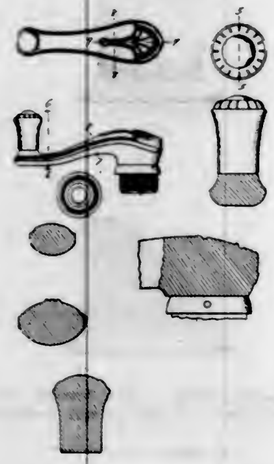
The ornamental design for a bracket for drapery pole or rod substantially as shown.

75,926. JEWELRY BOX OR SIMILAR ARTICLE. JAMES S. MCKEEBY, Framingham, Mass., assignor to Dennison Manufacturing Company, Framingham, Mass., a Corporation of Massachusetts. Filed Feb. 23, 1928. Serial No. 25,547. Term of patent 7 years.



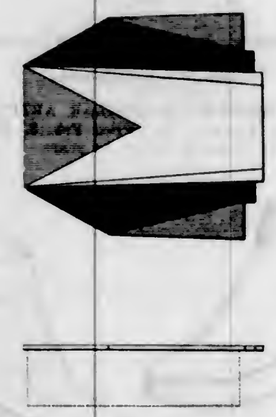
The ornamental design for a jewelry box or similar article, substantially as shown and described.

75,927. CHAIR. BARNET W. MCLEAN, Philadelphia, Pa. Filed July 29, 1927. Serial No. 22,944. Term of patent 3½ years.



The ornamental design for a chair substantially as shown.

75,928. OVERSHOE OR SIMILAR ARTICLE. LEAH G. MILKES, Chicago, Ill. Filed Feb. 3, 1928. Serial No. 25,155. Term of patent 14 years.



The ornamental design for an overshoe or similar article, substantially as shown.

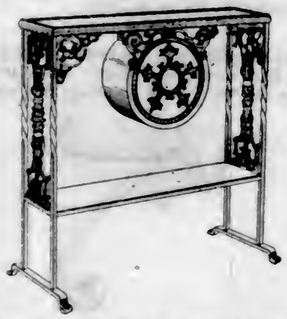
75,929. DOOR-WINDOW-REGULATOR HANDLE. JOHN J. PUNKE, Detroit, Mich., assignor to Hupp Motor Car Corporation, Detroit, Mich., a Corporation of Michigan. Filed May 21, 1828. Serial No. 26,795. Term of patent 7 years.

The ornamental design for a door window regulator handle, substantially as shown.

75,930. BOX OR SIMILAR ARTICLE. LOUIS W. RICE, New York, N. Y., assignor to Bernard Rice's Sons, Inc., New York, N. Y., a Corporation of New York. Filed May 18, 1928. Serial No. 26,753. Term of patent 7 years.

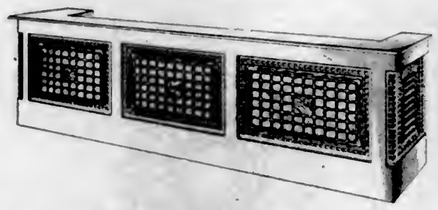
The ornamental design for a box or similar article, substantially as shown and described.

75,931. WATCHCASE. VICTOR RITSCHARD, Riverton, N. J., assignor to Keystone Watch Case Corporation, Philadelphia, Pa., a Corporation of Pennsylvania. Filed May 5, 1928. Serial No. 26,584. Term of patent 7 years.



The ornamental design for a watchcase, as shown.

75,932. SIGNAL LAMP FOR VEHICLES. WASHINGTON I. SCHRYVER, Prophetstown, Ill. Filed Oct. 10, 1927. Serial No. 23,697. Term of patent 14 years.

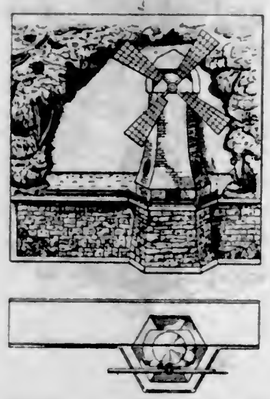


The ornamental design for a signal lamp for vehicles, as shown.

75,933. COMBINED RADIOTABLE AND LOUD-SPEAKER CASING. FREDERICK SCHWARTZ, Brooklyn, N. Y., assignor to Robert Findlay Manufacturing Company, Inc., Brooklyn, N. Y., a Corporation of New York. Filed Mar. 5, 1928. Serial No. 25,711. Term of patent 7 years.

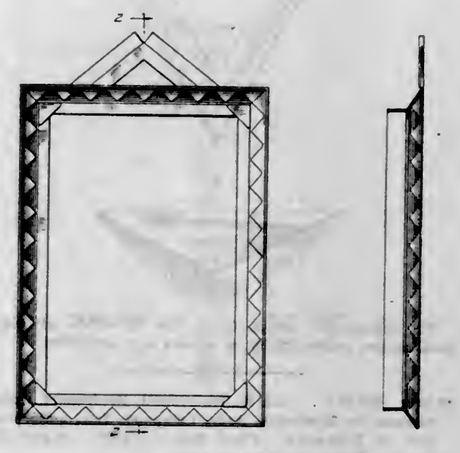
The ornamental design for a combined radio table and loud speaker casing, as shown.

75,934. SODA FOUNTAIN. FRANK SOHN, Chicago, LOUIS G. MARMION, Villa Park, and ERIC H. GIBIAN, Chicago, Ill., assignors to the Vitrolite Company, a Corporation of West Virginia. Filed Oct. 13, 1927. Serial No. 23,747. Term of patent 7 years.



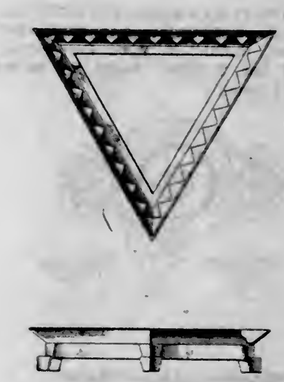
The ornamental design for a soda fountain, as shown.

75,935. RADIATOR CAP. KYLE E. STANT, Connersville, Ind. Filed May 19, 1928. Serial No. 26,768. Term of patent 3½ years.



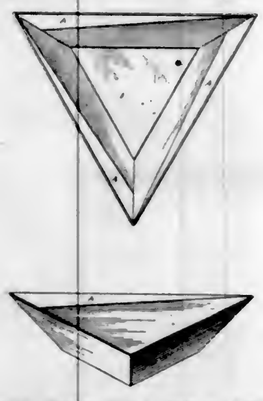
The ornamental design for a radiator cap, as shown.

75,936. SCENIC SETTING FOR STORE DISPLAY. BARNET L. STEIN, Glencoe, and FRANK KAPLIN, Evanston, Ill. Filed July 30, 1927. Serial No. 22,965. Term of patent 14 years.



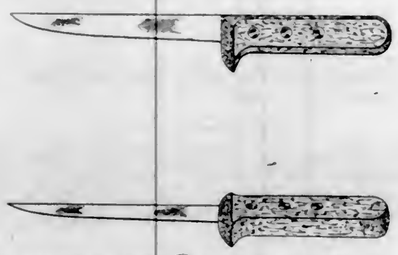
The ornamental design for a scenic setting for store display, as shown.

75,937. FRAME FOR TRAYS OR THE LIKE. ELSA TENNHARDT, New York, N. Y., assignor to E. & J. Bass, Inc., a Corporation of New York. Filed May 23, 1928. Serial No. 26,828. Term of patent 3½ years.



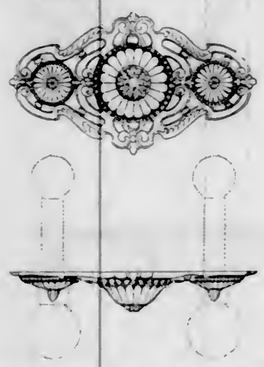
The ornamental design for a frame for trays or the like substantially as shown.

75,938. FRAME FOR TRAYS OR THE LIKE. ELSA TENNHARDT, New York, N. Y., assignor to E. & J. Bass, Inc., a Corporation of New York. Filed May 23, 1928. Serial No. 26,829. Term of patent 3½ years.



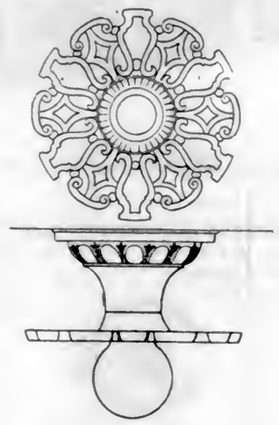
The ornamental design for a frame for trays or the like substantially as shown.

75,939. DISH OR ARTICLE OF ANALOGOUS NATURE. ELSA TENNHARDT, New York, N. Y., assignor to E. & J. Bass, Inc., a Corporation of New York. Filed May 23, 1928. Serial No. 26,830. Term of patent 3½ years.



The ornamental design for a disk or article of analogous nature substantially as shown and described.

75,940. KNIFE. CARL W. TILLMANNS, Bridgeport, Conn., assignor to Remington Arms Company, Inc., a Corporation of Delaware. Filed May 3, 1927. Serial No. 21,847. Term of patent 14 years.

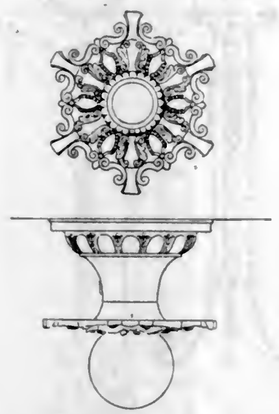


The ornamental design for a knife, as shown.

75,941. CEILING-PLATE ELECTRIC FIXTURE. FRANK YOKEL, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y., a Corporation of New York. Filed Apr. 2, 1928. Serial No. 26,104. Term of patent 3½ years.

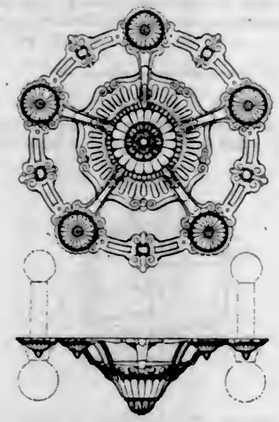
The ornamental design for a ceiling plate electric fixture, as shown.

75,942. FIXTURE FOR CEILING LIGHTS. FRANK YOKEL, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y., a Corporation of New York. Filed Apr. 2, 1928. Serial No. 26,105. Term of patent 3½ years.



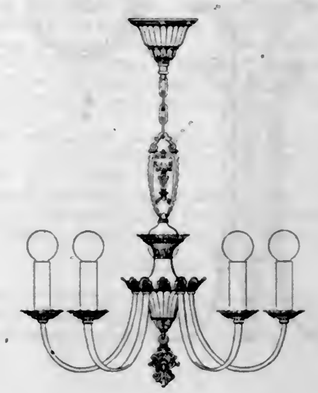
The ornamental design for a fixture for ceiling lights, as shown.

75,943. CHANDELIER. FRANK YOKEL, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y., a Corporation of New York. Filed Apr. 2, 1928. Serial No. 26,106. Term of patent 3½ years.



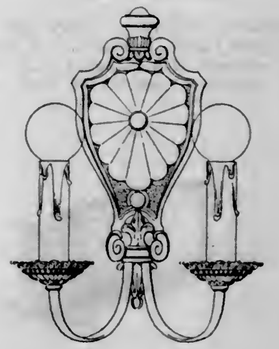
The ornamental design for a chandelier, as shown.

75,944. FIXTURE FOR CEILING LIGHTS. FRANK YOKEL, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y., a Corporation of New York. Filed Apr. 2, 1928. Serial No. 26,107. Term of patent 3½ years.



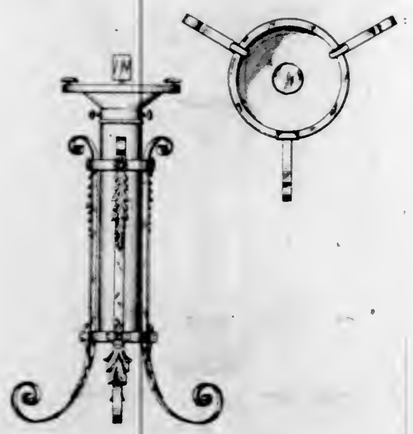
The ornamental design for a fixture for ceiling lights, as shown.

75,945. CHANDELIER PLATE. FRANK YOKEL, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y., a Corporation of New York. Filed Apr. 2, 1928. Serial No. 26,108. Term of patent 3½ years.



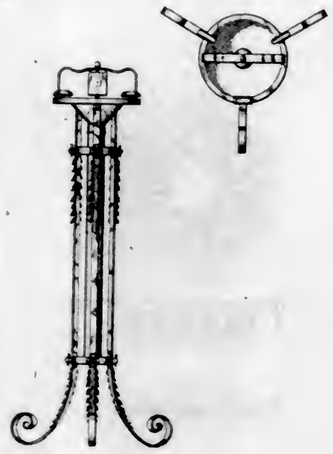
The ornamental design for a chandelier plate, as shown.

75,946. CHANDELIER. FRANK YOKEL, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y., a Corporation of New York. Filed Apr. 2, 1928. Serial No. 26,109. Term of patent 3½ years.



The ornamental design for a chandelier, as shown.

75,947. WALL-BRACKET ELECTRIC FIXTURE. FRANK YOKEL, Cleveland, Ohio, assignor to Markel Electric Products, Inc., Buffalo, N. Y., a Corporation of New York. Filed Apr. 2, 1928. Serial No. 26,110. Term of patent 3½ years.

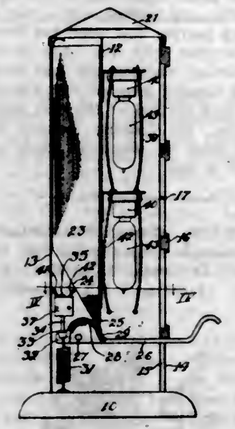


The ornamental design for a wall bracket electric fixture, as shown.

75,948. SMOKING STAND. SAMUEL YOUNG, San Francisco, Calif. Filed Apr. 18, 1928. Serial No. 26,370. Term of patent 7 years

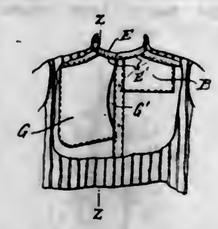
The ornamental design for a smoking stand substantially as shown.

75,949. SMOKING STAND. SAMUEL YOUNG, San Francisco, Calif. Filed Apr. 18, 1928. Serial No. 26,371. Term of patent 7 years.



The ornamental design for a smoking stand substantially as shown.

PATENTS



GRANTED JULY 31, 1928.

1,678,628. DISPENSING APPARATUS. CARL I. ANDERSON, Chicago, Ill. Filed Jan. 26, 1927. Serial No. 163,589. 2 Claims. (Cl. 312—84.)

1. An article vending machine comprising a pivoted lever having a cam-like curved surface merging into a tangential surface with a groove near the merging point, said groove being adapted to receive one article at a time, an article receptacle having an inwardly tapered back, the bottom edge of which rides on the cam-like surface of the lever, and a flat spring stop forming a movable closure for the front of said article receptacle, the bottom edge of said spring stop also riding on the lever surface in such a position that the groove in said lever passes back and forth under the stop during the lever movement, said cam like surface causing movement of both the receptacle and the stop to facilitate the rearrangement and feeding of the articles therein.

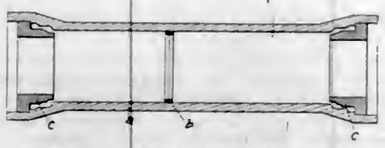
1,678,629. SHIRT FOR MEN'S WEAR. ALICE RUBY BENZ and FRANK M. ASHLEY, Brooklyn, N. Y. Filed Sept. 25, 1924. Serial No. 739,829. 1 Claim. (Cl. 2—122.)

A shirt having a bosom of soft material open at its front and having a front pleat, a neckband seam and a shoulder seam, a pocket of flexible material stitched along its top to the shirt by the shoulder seam and the neckband seam, said pocket being a substantially rectangular, elongated body open at its inner side and stitched at its upper and lower portions to the front pleat.

1,678,630. METHOD OF CONVERTING HYDROGEN SULPHIDE INTO SULPHUR DIOXIDE. HANS BÄHR, Chicago, Ill., assignor to I. G. Farbenindustria Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed May 4, 1925, Serial No. 28,018, and in Germany May 6, 1924. 7 Claims. (Cl. 23—177.)

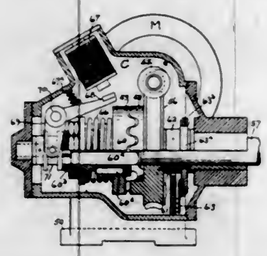
1. The method of converting hydrogen sulphide of gases into sulphur dioxide for the purpose of purifying the gases by the employment of contact elements necessary for the oxidation, one of said elements embodying a mixture of metals having the property of binding sulphur, and an element embodying metals transmitting oxygen.

1,678,631. VEHICLE TIRE. JOHN BARKER, London, England. Filed July 15, 1927, Serial No. 205,905, and in Great Britain July 12, 1926. 1 Claim. (Cl. 152—1.)



A solid tire for vehicles, provided with two series of transversely extending openings, the openings of one series being disposed alternately with those of the other series in a line passing through the tire concentrically with its axis of rotation, each opening of one series being of polygonal configuration and having oppositely disposed inwardly extending ribs and each opening of the other series having bays in opposite side walls thereof extending toward the ribs of the other series.

1,678,632. SCRAPPLE PACKAGE. FREDERICK BRIGGS, Washington, D. C., assignor to Briggs Packing Co., Washington, D. C., a Corporation of Delaware. Filed Oct. 11, 1926. Serial No. 140,932. 3 Claims. (Cl. 99—8.)



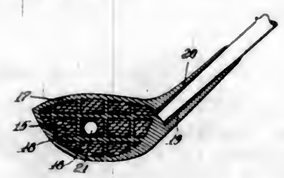
2. A new process for producing scrapple packages, consisting in stuffing the scrapple, while hot, in porous textile bags, the steam or vapor being permitted to escape, thus quickly cooling the scrapple, and then subsequently applying to the exterior surface of the bag a coating of air-impervious material.

1,678,633. CASTING PIPE. HEINRICH BURCHARTZ, Gelsenkirchen, Germany, assignor, by mesne assignments, to Centrifugal Pipe Corporation, a Corporation of Delaware. Filed Dec. 10, 1924, Serial No. 755,106, and in Germany Dec. 17, 1923. 3 Claims. (Cl. 22—65.)

1. A mold for centrifugally casting two bell-ended pipes in the same casting operation comprising a body, a bell cavity and core at each end of the body and a partition ring within the body intermediate its ends for dividing the two castings.

1,678,634. REMOTE-CONTROL SYSTEM. EDWARD F. CHANDLER, Brooklyn, N. Y. Filed June 21, 1923. Serial No. 646,749. 21 Claims. (Cl. 172—240.)

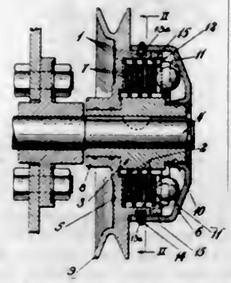
1. In a reversible device for operating valves and other apparatus, an operating shaft, a motor for driving said shaft, means connecting the shaft and motor and adapted to permit rotation of the motor when the said shaft has been driven to its limit of travel in either direction so as to avoid an undue strain on the motor and its associated parts, means for setting the device into operation in opposite directions and control means operable upon the starting of the motor for positively connecting the motor and shaft regardless of the direction of operation, to initiate rotation of the shaft positively.



1,678,635. PLASTIC COMPOSITION AND METHOD OF PRODUCTION THEREOF. OSCAR A. CHERRY and CLETUS F. CHOSA, Milwaukee, Wis., assignors to The Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed July 8, 1922. Serial No. 573,732. 6 Claims. (Cl. 106—22.)

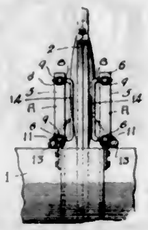
1. The method of treating a molding composition comprising a relatively inert filler material impregnated with a binder, which comprises incorporation in said composition of small quantities of a halogen derivative of sulphur and a phenolic body adapted under the imposed conditions to react therewith for formation of additional binder material in situ.

1,678,636. METHOD OF TESTING NICOTINE SOLUTIONS. EDWIN COX, Richmond, Va., assignor to Tobacco By-Products and Chemical Corporation, Louisville, Ky., a Corporation of Delaware. Filed Jan. 30, 1925. Serial No. 5,901. 6 Claims. (Cl. 23—230.)



1. The process of determining the nicotine content of a solution containing nicotine and organic impurities such as occur in dipping baths which consists in acidifying the solution, adding tungsten trioxide in amount not less than sufficent to combine with all the said organic impurities and then directly titrating the said solution with silico-tungstic acid.

1,678,637. GOLF CLUB. CARL B. DREVITSON, Somerville, Mass. Filed June 30, 1927. Serial No. 202,607. 8 Claims. (Cl. 273—77.)



1. A golf-club head comprising a forming member having matrices within its surface, and a cast metal member including a body portion cast upon the forming member, ramifications integral with the body portion and cast within the matrices, whereby the cast member is interlocked with the forming member, and a shaft socket integral with the body portion of the cast member and projecting therefrom, the forming member being provided with a hooked tenon on which the inner end portion of the shaft socket is cast.

1,678,638. CLUTCH. GEORGE W. DUNHAM, Utica, N. Y., assignor to Savage Arms Corporation, Utica, N. Y., a Corporation of Delaware. Filed Nov. 14, 1924. Serial No. 749,869. 14 Claims. (Cl. 192—105.)

1. A clutch comprising sets of inter-registering driving and driven clutch discs, centrifugal clutch operating means, a pulley member and a cover, a hub member on which said pulley member, discs, clutch operating means and cover are adapted to be assembled manually to form therewith a self contained unit, the pulley member and cover housing the discs and clutch operating means.

1,678,639. SCRAPER FOR ROTARY FILTERS. ALBERT L. GENTER, Salt Lake City, Utah, assignor to United Filters Corporation, New York, N. Y., a Corporation of Delaware. Filed Jan. 9, 1920. Serial No. 350,486. 3 Claims. (Cl. 210—201.)

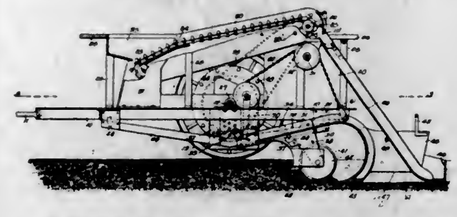
1. In a rotary continuous filter, the combination of a filter element, of scraping means therefor comprising a support, a plurality of diagonally arranged scraping wires

attached to said support and conforming to the surface of the filter element, said wires being spaced apart and arranged in parallel relation and positioned to engage and remove the cake from the filter element.

1,678,640. FITTING FOR AIRCRAFT AND THE LIKE. CHARLES WARD HALL, Larchmont, N. Y. Filed July 2, 1924. Serial No. 723,672. 4 Claims. (Cl. 287—109.)

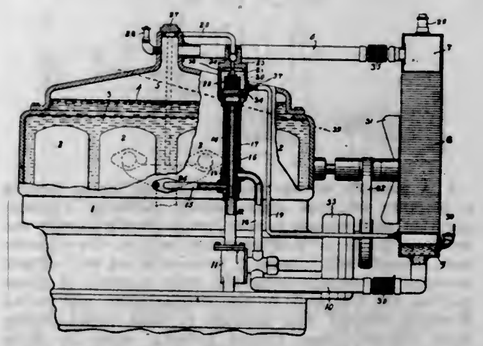
3. A structural joint of the character described comprising a thin-walled tube, an inner member fitted within the tube which has formed in its outer surface a circumferential depression with filleted edges providing thereat a bearing surface substantially polygonal in cross section, and an outer annulus which, after being slipped upon the tube and centered over the depression, has been compressed to deform both the annulus and the tube wall to the shape of the polygonal bearing surface of the inner member and thereby to hold the tube securely seated thereon.

1,678,641. PROCESS OF AND APPARATUS FOR CENTRIFUGAL CASTING. JOHANN HOLTHAUS, Gelsenkirchen, Germany, assignor, by mesne assignments, to Centrifugal Pipe Corporation, a Corporation of Delaware. Filed Aug. 25, 1925, Serial No. 52,385, and in Germany Oct. 22, 1924. 9 Claims. (Cl. 22—65.)



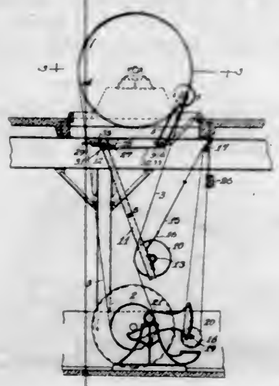
7. Apparatus for centrifugally casting hollow metal bodies, comprising a movable mold, a pouring spout extending into the mold, and a runway for the mold, the runway being shaped so as to reduce the angle of inclination of the mold as the latter is moved longitudinally from the spout.

1,678,642. CONTAINER FOR LEADS. CHARLES J. JOHNSON, Chicago, Ill., assignor to Swanberg Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed Mar. 20, 1925. Serial No. 16,883. 1 Claim. (Cl. 206—44.)



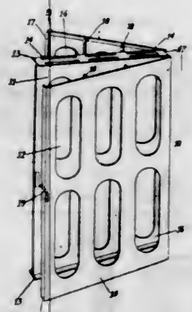
A container for leads consisting of a transparent holder open at one end thereof to receive and discharge leads, a casing around said holder having a slot through which the leads within the holder may be viewed without removing the holder from the casing, the said holder and casing being of cylindrical form permitting rotation of the holder within the casing, and a removable closure associated with the open end of the holder, said closure projecting substantially beyond the respective end of the casing and forming a handle for rotating a holder within the casing.

1,678,643. SUGAR-CANE PLANTER. WILLIAM KASSEBEER, Lihue, Territory of Hawaii. Filed Dec. 20, 1923. Serial No. 681,817. 1 Claim. (Cl. 111—5.)



In a machine for planting sugar cane, furrow opening means, a conveyor upon which lengths of sugar cane stalks are adapted to be received in transverse relation thereto, a tiltable chute having a curved bottom at its lower end and straight walls into which said conveyor discharges said lengths of cane stalks, said chute having a rearwardly turned horizontal lower end adapted to be dragged in the base of the furrow, and resilient means contacting with said conveyor located at the point of discharge of said conveyor and adapted to engage the cane stalks whereby said cane stalks are caused to assume a position in longitudinal relation to the chute in which position the cane stalks are deposited in the open furrow.

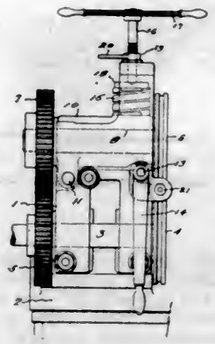
1,678,644. COOLING SYSTEM FOR INTERNAL-COMBUSTION ENGINES. HARRY C. MALLORY, Long Island City, N. Y.; Sue R. Mallory administratrix of said Harry C. Mallory, deceased. Filed Apr. 15, 1919. Serial No. 290,257. 19 Claims. (Cl. 123—174.)



1. A circulating system for cooling an internal combustion engine, comprising a liquid containing cooling receptacle having a free vapor space above the liquid therein, a condensing space receiving vapor from said vapor space, a reservoir space into which liquid of condensation passes by gravity from said condensing space, a pump passing liquid from said reservoir space to said receptacle and a by-pass overflow connection about said pump for returning to the inlet side of the pump liquid passing through the latter in excess of that required to maintain a predetermined height of liquid level in said receptacle.

1,678,645. BELT TIGHTENER. HORACE C. MCEWEN, Iroquois Falls, Ontario, Canada. Filed Jan. 14, 1926. Serial No. 81,213. 7 Claims. (Cl. 64—5.)

1. The combination with a pulley and a belt for driving the pulley, of a belt tightener adapted to tension the belt, and a pivotal support for the tightener movable parallel with the axis of the pulley and also movable transversely with respect both to the axis of the pulley and the belt surface engaged by the tightener.

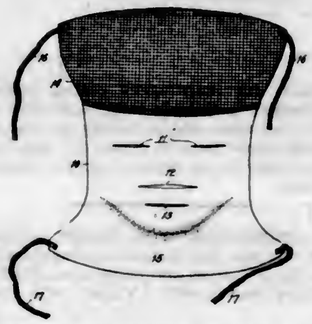


1,678,646. PORTABLE SAVINGS BANK. GORDON MILLER, New York, N. Y., assignor to Philip Florin, Woodmere, N. Y. Filed Jan. 8, 1927. Serial No. 159,777. 2 Claims. (Cl. 232—4.)

1. A portable savings bank comprising means forming a plurality of coin compartments including a single partition wall common to said compartments, unitary end members joined to said partition wall at the opposite ends thereof, each forming a transverse end wall of said plurality of compartments, side doors forming, in closed position, the side walls of said compartments and having inwardly directed wall portions at right angles thereto along opposite edges thereof forming, when the doors are in closed position, longitudinal end walls of said compartments, and means hingedly connecting said side doors to said partition wall.

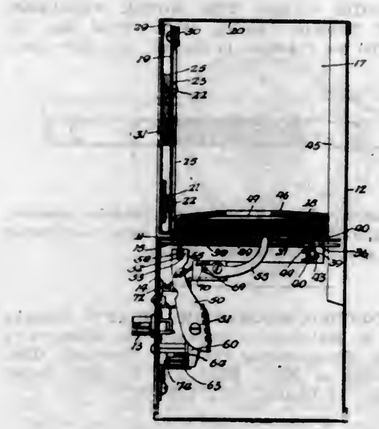
1,678,647. ROLL FEED FOR METAL-HEADING MACHINES. JOHN E. PRACNY, Waterbury, Conn., assignor to The E. J. Manville Machine Company, Waterbury, Conn., a Corporation of Connecticut. Filed Apr. 6, 1927. Serial No. 181,341. 1 Claim. (Cl. 78—97.)

A roll feed mechanism comprising a bracket, a shaft having an attached feed roll and rotating gear mounted in the bracket, a pillow block pivotally attached to the bracket and carrying a shaft having an attached feed roll and rotating gear, a spring thrusting against the upper face of the pillow block adjacent to the feed roll carried thereby, a screw arranged to tension the spring



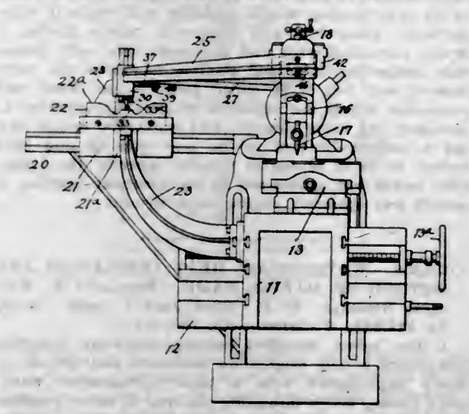
against the pillow block, a cam adapted to engage the under face of the pillow block adjacent to said feed roll, and a manually operated lever for turning the cam into and out of engagement with the pillow block.

1,678,648. EDIBLE-DYE COMPOSITION. HARRY H. REPLOGLE, Upper Montclair, N. J., assignor of one-half to John Young, Caldwell, N. J. Filed Jan. 8, 1923. Serial No. 611,514. 3 Claims. (Cl. 8—6.)



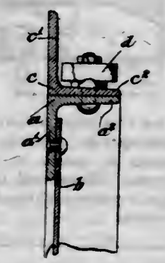
3. A method for coloring a food product which comprises admixing said food product with a coloring composition consisting of an edible organic coloring material dissolved in ethylene glycol.

1,678,649. FACE MASK. ANITA M. RENAULT, Chicago, Ill. Filed June 22, 1925. Serial No. 38,899. 1 Claim. (Cl. 128—163.)



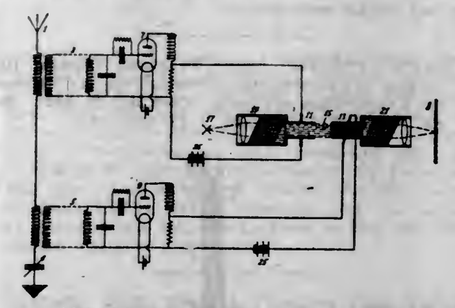
A face mask of the character described comprising a head portion of fabric wider at its top edge than at its bottom edge, a base member of water proof material wider at its lower edge than at its top edge, the top edge of said base member being attached to the lower edge of the head portion so that in use the head portion will extend over the forepart of the top of the head, said base member having slits therein positioned to register with the eyes, nose and mouth of the wearer and also having a bulging portion shaped to conform to the contour of the chin and neck of the wearer, downwardly extended ties secured to the upper corners of the head portion, and rearwardly extending ties secured to the lower corners of the base member, so that when the device is tied to the head of the wearer an equally distributed and regulated pressure is applied to the face, neck, throat and forehead of said wearer.

1,678,650. VENDING MACHINE. MYRON H. RICHARDSON and ALFRED D. ANTOINE, Chicago, Ill., assignors to Advance Machine Company, Chicago, Ill., a Corporation of Illinois. Filed Apr. 19, 1926. Serial No. 102,882. 16 Claims. (Cl. 312—51.)



1. In a vending machine, a magazine for articles to be vended, said machine having a delivery opening, a plurality of loosely mounted members spaced from each other in directions lengthwise of and projecting across said opening and freely and separately movable transversely thereof, a support for the said members, means for adjusting the support, and means for ejecting an article through the said delivery opening and beneath the said members.

1,678,651. PROFILING ATTACHMENT FOR MACHINE TOOLS. JOHN M. RIORDAN, East Cleveland, Ohio, assignor to The Cleveland Hardware Company, Cleveland, Ohio, a Corporation of Ohio. Filed Mar. 22, 1922. Serial No. 545,637. 17 Claims. (Cl. 90—38.)

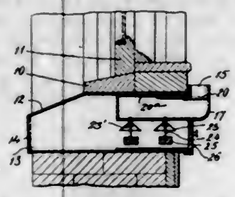


1. In combination with a machine tool having relatively movable work and tool holders and means for imparting travel to one holder in a definite path with respect to the other, a profiling attachment comprising a templet and a tracer cooperating therewith, means for constraining the templet and tracer, one to movements in a single plane and the other to movements in the same plane, means for imparting to the holders two relative feed movements in directions angular to each other and to said path of travel and for moving the templet and tracer, and means for maintaining said feed movements proportional, one to the movements of the templet, and the other to the movements of the tracer.

1,678,652. FIREPROOF ELEVATOR DOOR. PAUL R. SAURER, New York, N. Y., assignor to The Peelle Company, Brooklyn, N. Y., a Corporation of New York. Filed June 30, 1926. Serial No. 119,637. 4 Claims. (Cl. 189—46.)

1. A fireproof elevator door, embodying therein a door section having a metal panel in an angle metal frame, and means for preventing the top of the door from moving away from adjacent the lintel of a door opening in the event of a sudden lowering of the temperature of the door following its subjection to a high temperature, including therein an angle metal reinforcing bar, one flange of which is connected with the horizontal flange of the angle metal of the top bar of the frame to form a unitary top bar structure, and another flange of which extends at right angles to the said flange of the angle of the top bar of the frame

1,678,653. SYSTEM FOR REDUCING STATIC DISTURBANCES. FRITZ SCHRÖTER, Berlin, Germany, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany, a Corporation of Germany. Filed May 13, 1926, Serial No. 108,910, and in Germany May 23, 1925. 6 Claims. (Cl. 250—20.)



1. A high frequency receiving system comprising an input having two detector circuits coupled thereto, a source of light, a light responsive means, a pair of light affecting devices comprising a polarizer and an analyzer between said light source and said light responsive means and a pair of Kerr cells serially arranged between said light affecting devices each of said Kerr cells being connected to one of said detector circuits.

1,678,654. VENTILATING DEVICE. GEORGE R. SIEFKEN, New York, N. Y. Filed June 3, 1926. Serial No. 113,436. 2 Claims. (Cl. 98—95.)

1. A ventilator for admitting air into a room comprising a chamber having an opening for admitting air from outside the room, a diffusion chamber having sub-

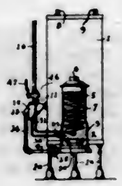
stantially horizontal and vertical connecting passageways, the vertical passageway opening into the room, the lower wall of the horizontal passageway having an opening through which air from the first named chamber may be admitted to said diffusion chamber, automatic means for controlling the flow of air through said opening, said

opening being located at a point beneath the upper wall of the horizontal passageway whereby the air passing through said opening is caused to impinge upon said upper wall and become diffused and have its direction of travel changed before passing through the vertical passageway into the room.

1,678,655. PRODUCTION OF IRON CASTINGS. KARL SIPP, Mannheim, Germany, assignor, by mesne assignments, to Heinrich Lanz Aktiengesellschaft, Mannheim, Baden, Germany, a Corporation of Germany. Filed Nov. 3, 1925, Serial No. 66,462, and in Germany Nov. 30, 1924. 2 Claims. (Cl. 22—200.)

1. The method of producing gray iron castings in shapes of widely varying sections having a substantially uniform structure and hardness throughout, which consists in casting with a mixture adjusted to produce under normal cooling conditions a workable gray iron in one of its thick sections and in retarding the cooling of the metal in the thinner sections and hastening its cooling in any thicker sections.

1,678,656. PENCIL. JULIUS SWANBERG, Chicago, Ill., assignor to Swanberg Manufacturing Company, Chicago, Ill., a Corporation of Illinois. Filed May 23, 1921. Serial No. 471,537. 1 Claim. (Cl. 120—18.)



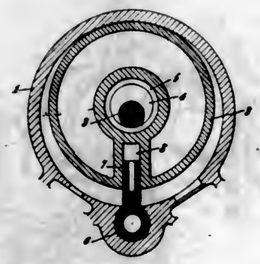
A pencil, comprising an outer casing having a conical tip and a slotted internally beaded top, a lead guiding tube extending the length of said casing and swivelly held against relative axial movement in the conical tip thereof and a closure member resiliently held for relative rotation by said internally beaded top and in frictional non-rotative engagement with the end of said lead guiding tube.

1,678,657. SIDE GUARD FOR MOTOR VEHICLES. HORACE T. THOMAS, Lansing, Mich. Filed May 19, 1924. Serial No. 714,507. 11 Claims. (Cl. 280—164.)

1. In a motor vehicle, a resiliently yieldable member, including a plurality of resilient curved bars, constituting a combined running board and bumper.

1,678,658. CONTROL MECHANISM. MILEY W. THOMAS and PAUL H. HAMILTON, Cleveland, Ohio, assignors to The Sands Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed Apr. 6, 1925. Serial No. 21,164. 14 Claims. (Cl. 236—21.)

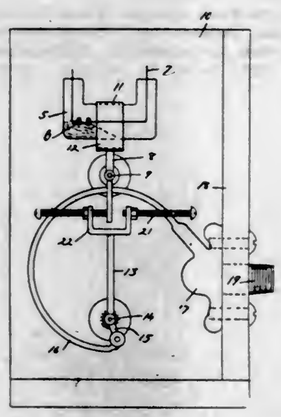
1. In apparatus of the class described, the combination with a heating means having a supply pipe for its combustion medium, of a cut off valve in said supply pipe, a pilot burner for igniting said heating means, a thermostat mechanism operatively connected with the valve element of said valve and having an element affected by said heating means, whereby said valve is automatically controlled, and expansible means having a device associated with and arranged when said expansible means are in normal position to engage the valve element and lock it in closed position, but when said expansible means are expanded to abnormal position to disengage the valve element, said expansible means having a portion disposed in the heat zone of said pilot burner so as to be heated thereby, whereby the expansible means are maintained in an abnormal position to permit free operation of the valve element.



1,678,659. WATERPROOF HEAT INSULATION AND METHOD OF MAKING SAME. BENJAMIN F. WALLACE, Brooklyn, N. Y. Filed June 7, 1924. Serial No. 718,553. 7 Claims. (Cl. 106—18.)

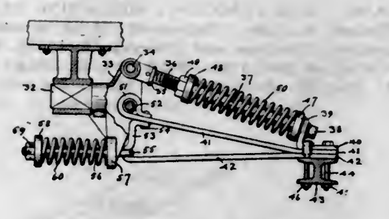
1. The herein described heating insulating materials comprising porous magnesium carbonate and fibrous asbestos impregnated with a highly penetrative waterproof grease, which insulating material is water repellent and will readily float on water.

1,678,660. ROTARY COMPRESSOR. HERMANN WEBER, Spiez, Switzerland. Filed Apr. 6, 1927, Serial No. 181,389, and in Switzerland Nov. 23, 1926. 1 Claim. (Cl. 230—147.)



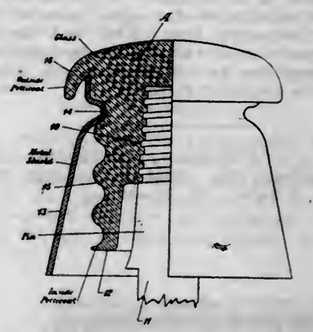
A rotary compressor comprising in combination a cylindrical housing, a cylindrical piston having a radial recess rotatably mounted eccentrically therein, whereby

a working chamber is provided between the housing and piston, a cylindrical boss journaled parallel with the longitudinal axis of the housing, in the wall of the latter, which boss has in its periphery a dovetailed groove extending in the direction of its length, and



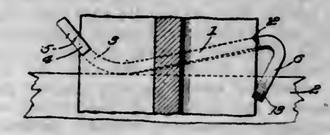
a sliding abutment that extends fluid-tight at one end into said recess and has at its other end a tongue that fits fluid-tight in said groove, which abutment divides said working chamber into a compression space and a suction space, which spaces are provided each with a port in the wall of the housing.

1,678,661. ELECTRICAL MERCURY CONTROL FOR REFRIGERATION PUMPS. THOMAS C. WHITEHEAD, Detroit, Mich. Filed Oct. 22, 1923. Serial No. 670,217. 2 Claims. (Cl. 200—81.)



1. In a device of the character described, the combination of a support, a lever pivotally mounted on said support, one end of the said lever being bifurcated, a flexible tube secured to the other end of the said lever, the said tube constituting a pressure responsive device for actuating the said lever, a second lever, pivoted to said support, one end of the said second lever extending between the furcations of the said first mentioned lever, a resilient clip on the other end of the said second lever, a container carried by said clip, electric terminals within the said container, and a liquid within the said container adapted to electrically connect or disconnect the said terminals upon a predetermined movement of said pressure responsive tube.

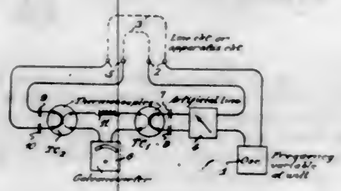
1,678,662. VEHICLE SPRING. EDGARTON B. WILSON, Peterboro, Ontario, Canada, and SUMNER S. SHEARS, Brooklyn, N. Y.; said Wilson assignor to said Shears. Filed June 1, 1922. Serial No. 565,100. 12 Claims. (Cl. 267—20.)



1. Vehicle spring arrangements of the class described comprising bell-crank levers pivotally fulcrumed on the vehicle frame, flexibly secured rods, brackets depending from the frame and coil springs adjustably applied on said rods in such manner as to provide a substantial leverage ratio against the coils.

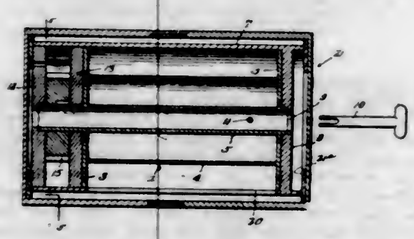
1,678,663. INSULATOR. LEON T. WILSON, East Orange, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed July 1, 1925. Serial No. 40,917. 2 Claims. (Cl. 173—28.)

1. An insulator comprising a body of dielectric material having an inner opening into which a supporting pin may be inserted, a petticoat extending downwardly from said body and surrounding the supporting pin, the outer surfaces of said dielectric body and petticoat being screw-threaded, an outer conductive shell constricted at its upper portion so that it may be screwed into place over said screw threads, said shell having its lower part extending outwardly from the surface of said dielectric body and petticoat so that said outer surface will form a dry path.



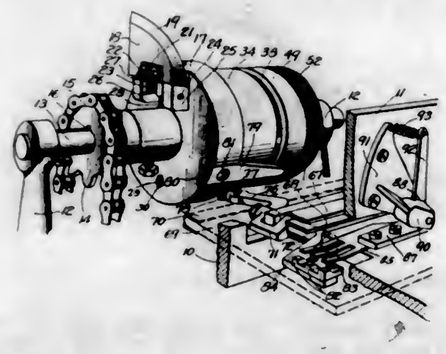
1,678,664. RAIL ANCHOR. CHARLES FIELD YARDLEY, Larchmont, N. Y. Filed Apr. 20, 1927. Serial No. 185,084. 15 Claims. (Cl. 238—330.)

14. A rail anchor comprising a bar and jaws thereon adapted to engage the flanges at the opposite sides of a rail and adapted for gripping the rail flange under



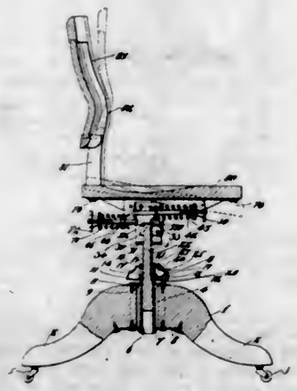
resilient torsional deflection of the bar, said bar having a portion thereof deformed to limit the resilient deflection to a reduced length of the bar body, substantially as described.

1,678,665. HIGH-FREQUENCY MEASURING SYSTEM. HERMAN A. AFFEL, Maplewood, N. J., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Nov. 21, 1924. Serial No. 751,405. 3 Claims. (Cl. 179—175.)



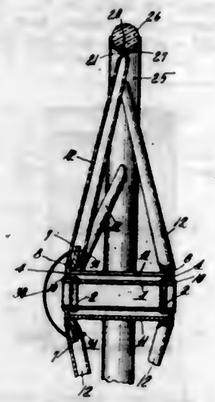
1. In a gain measuring system, the combination with an amplifier of a source of high frequency current, means to control the magnitude of the current supplied to the said amplifier, thermo-couples connected with the input and the output sides of the said amplifier, the direct current sides of the said couples being connected in polar opposition in a circuit having a current indicating device connected therewith.

1,678,666. AUTOMOBILE ABSTRACT. CLIFFTON BIAD, Hardesty, Okla. Filed Dec. 14, 1926. Serial No. 154,747. 1 Claim. (Cl. 40—19.)



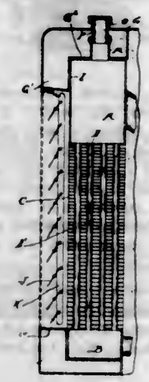
As a new article of manufacture, an automobile abstract of the class described, comprising a hollow cylindrical casing open at one end, the opposite end of the casing being provided with a central bearing opening, a drum mounted for rotation in said casing and including a pair of disk like heads, connected together by a hollow central shaft having its ends extending beyond the heads, one extending end being journaled for rotation in the aforesaid bearing openings, a pawl and ratchet mechanism fitted into the open end of the casing and embodying spaced parallel circular plates connected together and provided at their centers with bearings receiving the remaining extended portions of said shaft, the ratchet wheel carried by said last- extended end portion of the shaft being located between said plates, a spring pressed pawl associated with said plates, and engageable with said ratchet wheel, and a sectional housing enclosing said casing and ratchet mechanism.

1,678,667. CUT-OFF MECHANISM FOR STRIPPING MACHINES. EDWARD M. BRACKETT and FRED M. BRACKETT, Topeka, Kans. Filed May 20, 1926. Serial No. 110,578. 13 Claims. (Cl. 164—60.)



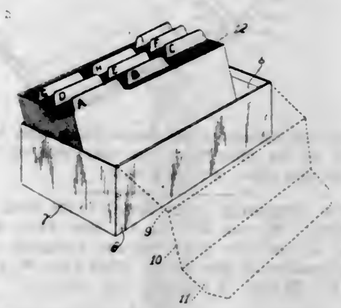
7. In a machine of the character described, bearing members, a shaft mounted thereon, a cutter member rotatably mounted thereon and means for adjusting said cutter member relatively to the work comprising a member secured in fixed position on said shaft and connected with said cutter member and adjustable means on one of said bearings engaging said last mentioned member to move said shaft axially in its bearings.

1,678,668. TILTING CHAIR. DAVID R. COLLIER, Gardner, Mass., assignor to Collier-Keyworth Company, Gardner, Mass., a Corporation of Massachusetts. Filed June 2, 1923. Serial No. 642,900. 13 Claims. (Cl. 155—77.)



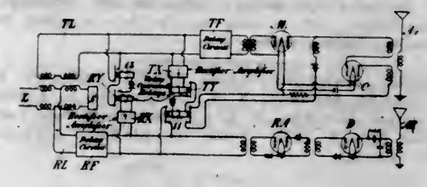
1. A chair having a seat, a spindle for supporting said seat, and pivoted about a pair of axes thereto, means permitting said seat to be tilted forwardly from a central portion about one of said pivots only, and means for permitting said seat to be tilted rearwardly about the other of said pivots only.

1,678,669. WHEEL. DAVID R. COLLIER, Gardner, Mass., assignor to Collier-Keyworth Company, Gardner, Mass., a Corporation of Massachusetts. Filed Dec. 14, 1923. Serial No. 680,626. 7 Claims. (Cl. 301—5.)



1. A wheel comprising a hub plate consisting of a disk having a series of radially extending ears thereon, and spokes comprising tubular members having their inner ends engageable over said ears.

1,678,670. RADIATOR ATTACHMENT. HOWARD H. CRAWFORD, Detroit, Mich., assignor to Detroit Motor Appliance Company, Detroit, Mich., a Corporation of Michigan. Filed July 3, 1916, Serial No. 107,421. Renewed Apr. 11, 1928. 2 Claims. (Cl. 257—125.)

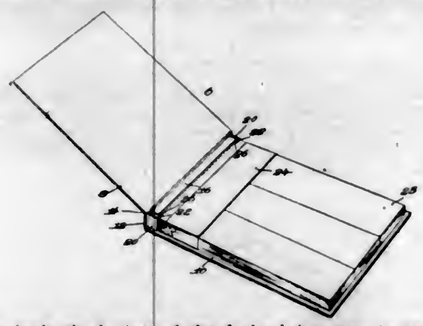


2. In heat radiating means for the water cooling system of an automobile engine the combination of an inlet header and inlet pipe connection therefor communicating with said header at a substantial distance below the top thereof, a discharge header spaced from said inlet header, heat radiating water passages of relatively small cross section directly connecting said inlet and discharge headers, an upper chamber above and in communication with said inlet and discharge headers, the said upper chamber communicating with said discharge header entirely independently of said radiating water passages, a discharge connection communicating with said discharge header at a point adjacent the bottom of said heat radiating means, and a filler tube extending upwardly from said upper chamber.

1,678,671. COMBINATION CARD CONTAINER AND TRAY. DAVID W. DUFFIELD, Rochester, N. Y., assignor to Yawman & Erbe Manufacturing Co., Rochester, N. Y., a Corporation of New York. Filed May 29, 1926. Serial No. 112,440. 4 Claims. (Cl. 129—16.)

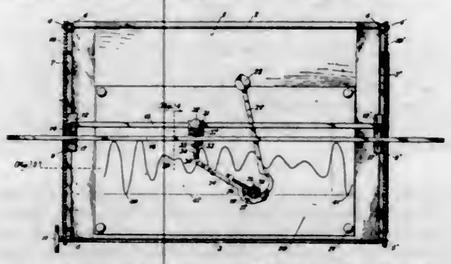
4. In combination a structure adapted to be used as a card container or a tray, cards adapted to be carried by said container or held in said tray, and means including hinged sections for alternately serving as a cover for the box or as bottom and end supports for the card tray.

1,678,672. TWO-WAY RADIO TELEPHONE SYSTEM. LLOYD ESPENSCHIED, Hollis, HERMAN A. AFFEL, Brooklyn, and CLIFFORD N. ANDERSON, New York, N. Y., assignors to American Telephone and Telegraph Company, a Corporation of New York. Filed Apr. 19, 1924, Serial No. 707,720. Renewed Sept. 2, 1926. 20 Claims. (Cl. 250—9.)



1. In a radio system, a radio transmitting channel and a radio receiving channel, radio transmitting apparatus in said transmitting channel and radio receiving apparatus in said receiving channel, said receiving channel being normally operatively conditioned to function for receiving purposes, a transmitting antenna normally conditioned to have signal modulated energy applied thereto by said transmitting channel, a voice responsive relay associated with said transmitting channel and responsive to voice currents to disable said receiving channel, and a delay circuit interposed between said voice responsive relay and said radio transmitting apparatus to enable said relay to perform its function before the voice currents are impressed upon said transmitting apparatus.

1,678,673. BOOK. JOHN A. DYKEMAN, Boston, Mass. Filed May 13, 1926. Serial No. 108,804. 4 Claims. (Cl. 281—19.)

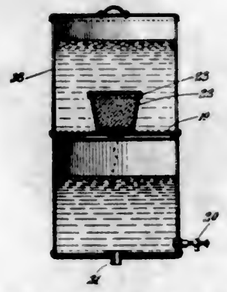


4. A cover for replaceable fillers having a back, and front and rear cover portions hinged thereto, a filler-retaining device secured to the back of the cover, said de-

vice comprising means engaging the edges and top of the filler to prevent removal of the same from the front of

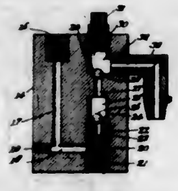
the book, the bottom of the device being open to permit removal of the filler from the rear side of the book when the rear cover is turned back.

1,678,674. METHOD AND APPARATUS FOR COMPUTATION. WALTER KOENIG, Jr., New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Dec. 30, 1925. Serial No. 78,470. 3 Claims. (Cl. 235—61.)



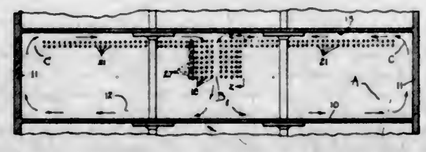
1. A harmonic analyzer comprising a board adapted to receive an impression of the curve to be analyzed, a planimeter on the board, a bar across the board parallel with the curve axis, means to move the bar transversely of its length, and a slider on the bar engaging the planimeter tracing stylus.

1,678,675. MARKING-TICKET STRIP. FREDERICK W. LAENCHER, Elmhurst, N. Y., assignor to A. Kimball Company, New York, N. Y., a Corporation of New York. Filed Sept. 8, 1927. Serial No. 218,330. 4 Claims. (Cl. 40—2.)



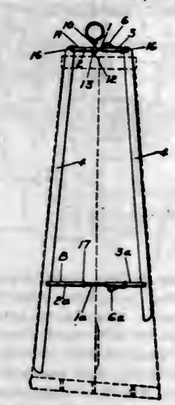
1. An integral marking ticket strip comprising a plurality of similar ticket sections progressively and uniformly offset laterally with the connected transverse edge portions of the successive sections materially shorter than the transverse edges of the said sections.

1,678,676. PURIFICATION OF LIQUIDS. GEORGE CHARLES LEWIS, New Dorp, N. Y., assignor to Darco Sales Corporation, New York, N. Y., a Corporation of Delaware. Original application filed May 5, 1925, Serial No. 28,047. Divided and this application filed May 13, 1926. Serial No. 108,770. 2 Claims. (Cl. 210—205.)



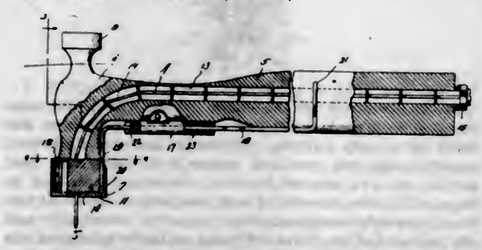
1. A process of making a filtering medium which consists in forming a container of ceramic material, filling the same with an organic char, and burning the container with said char therein to render the wall porous and simultaneously increase the activity of the char.

1,678,677. ATTACHMENT FOR HYDRAULIC BRAKE SYSTEMS. MARK H. MASSUERE, Hollywood, Calif. Filed Mar. 5, 1927. Serial No. 173,188. 5 Claims. (Cl. 303—48.)



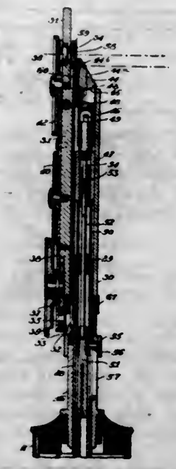
1. A fluid braking system replenishing attachment to be interposed between the source of fluid supply and the brake system including a body having a continuous passage for the conduct of the replenishing fluid, such passage being formed of substantially U-shape, companion check valves disposed in the rising leg of the U-shaped passage, one above another and opening freely upward and automatically closing downward, a large valve chamber above the upper check valve, and an air drain means for said valve chamber.

1,678,678. REFRIGERATING AND AIR-CIRCULATING SYSTEM. CHARLES A. MOORE, Edina, Minn. Filed May 1, 1926. Serial No. 106,143. 4 Claims. (Cl. 62—99.)



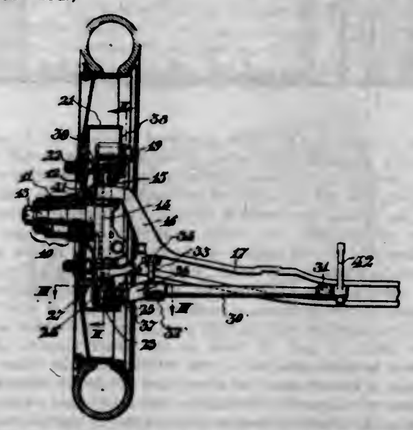
1. The combination with a chamber, of main stringers hung from the ceiling and traversing said chamber, an assembly of hangers depending from said main stringer in arrangement medially and longitudinally of the chamber, a relatively deep assembly of banked reaches of pipe, the upper reaches of said banks being supported on said main stringer, the lower reaches thereof being supported by said hangers, sub-stringers hung from the main stringer at either side of said pipe assembly, a relatively shallow assembly of banked reaches of pipe at either side of the deep assembly, each shallow assembly including upper reaches of pipe supported by said main stringer and lower reaches of pipe supported by said sub-stringers, each shallow assembly of pipes falling short at its outer extremity of the adjacent side wall of the chamber, and means for conducting a refrigerant to and from said pipe assemblies.

1,678,679. TROUSERS HANGER. CARL G. NELSON, Pittsburgh, Pa.; Hulda C. Nelson executrix of said Carl G. Nelson, deceased. Filed July 15, 1925. Serial No. 43,800. 1 Claim. (Cl. 223—19.)



In a trousers hanger, a pair of vertically extending side members, upper and lower cross members, each cross member comprising end sections and an intermediate section adjustably telescoped at opposite ends in the end sections, means pivotally connecting the end sections to the side members, a locking member carried by an end section of each cross member to adjustably secure the intermediate sections therein, and connecting members for the remaining end members and intermediate members, the connecting member of the uppermost cross member constituting a suspending means.

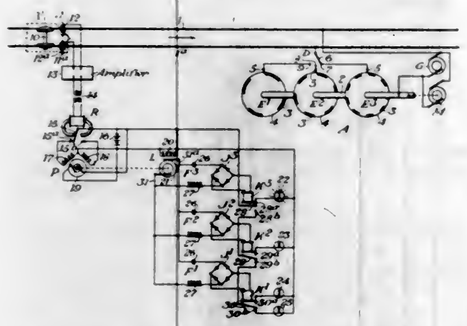
1,678,680. MAGAZINE HAMMER. GEORGE PATTON, Bicknell, Ind. Filed Aug. 8, 1927. Serial No. 211,508. 3 Claims. (Cl. 1—45.)



2. In a magazine hammer of the character described, a handle, a head arranged upon one end of the handle, a short slot in one end of the head, a block slidable within said slot, said handle and head being provided with communicating bores, the said bore terminating at the top of said slot and said handle bore extending throughout the length of the handle and through which the nails or tacks are to be fed, said block having an opening extending vertically thru the same and adapted to register with the head bore when the same is slid to one position within the slot, means for detachably securing one nail or tack to the head directly beneath the block when the same is in opposite position so that said nail or tack may be driven into the work, said securing means being of such a construction, as to shake loose from the tacks under the impact of the hammer against the work.

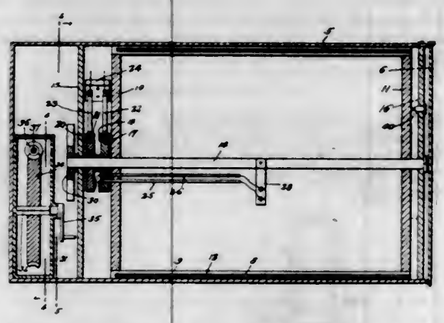
1,678,681. OPHTHALMOSCOPE. MAX POSER, Rochester, N. Y., assignor to Bausch & Lomb Optical Co., Rochester, N. Y., a Corporation of New York. Filed June 20, 1923. Serial No. 646,578. 3 Claims. (Cl. 88—20.)

3. In an ophthalmoscope, a holder, a plate upon the holder having a viewing aperture therein, a source of white light upon the holder, means for condensing and projecting the light upon the retina of the eye, and a light filter for absorbing red light rays mounted upon the holder to occupy a position between the aperture and the eye under observation whereby the latter may be illuminated with a white light and at the same time viewed through a red absorbing light filter.



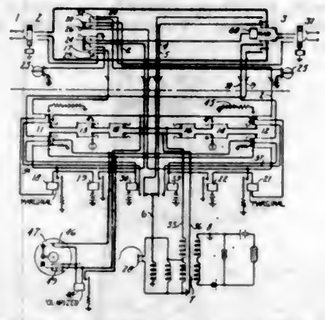
1,678,682. BRAKE MECHANISM. JOHN W. SMITH, Philadelphia, Pa., assignor to Budd Wheel Company, Philadelphia, Pa., a Corporation of Pennsylvania. Filed Sept. 26, 1922. Serial No. 590,565. 16 Claims. (Cl. 188—194.)

1. In combination, a steering knuckle, axle and brake mechanism, a pair of relatively rotatable members movable in unison relative to the axis of oscillation of the steering



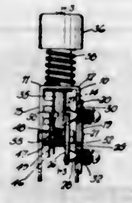
knuckle, means operating upon one member to effect floating movement thereof, and means operable by the other member to apply the brake mechanism.

1,678,683. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. CLARENCE S. SNAVELY, Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Apr. 8, 1927. Serial No. 181,987. 15 Claims. Cl. 246—63.)



1. In combination, a source of current, means for periodically interrupting such current, means responsive to such interruptions for crating an alternating current the frequency of which is different from, but proportional to, the frequency of such interruptions, and means selectively responsive to the frequency of such alternating current.

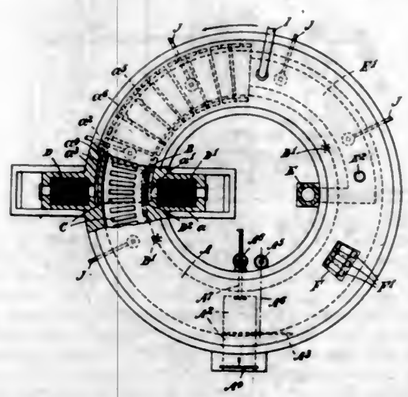
1,678,684. CHANGEABLE SIGN. MARION R. THROWER, Tuckerman, Ark., assignor to D. R. Parrott, Tuckerman, Ark. Filed Apr. 18, 1927. Serial No. 184,650. 1 Claim. (Cl. 40—77.)



A device of the class described comprising a casing having a closed end and an open end, and provided with an opening in the side wall thereof, a closure removably engaged on the open end of the casing, partitions disposed in the casing transversely thereof, one relatively close to the closure and the other relatively remote from the closed end of the casing, a shaft journaled in the partitions, a drum on the shaft, said drum having a plurality of openings, a plurality of signs bearing transparent panels in the openings, a bracket on the shaft in the drum, an incandescent electric bulb carried by the bracket within the drum, a pair of discs on the shaft outside of the drum between one end of the drum and said other partition, a continuous conductor band on one of the discs, a plurality of spaced contacts on the other disc electrically connected together, means for electrically connecting the conductors on the discs with the incandescent bulb, brushes engageable with the conductors, a star wheel on the shaft between said closed end of the casing and said other partition, a housing within the casing at said closed end thereof, a rotatable shaft journaled in the housing, and a crank on the last mentioned shaft engageable with the star wheel for imparting an intermittent rotation to the first shaft and the drum thereon when the second shaft is in operation.

1,678,685. TELEPHONE SIGNAL SYSTEM. JOHN F. TOOMEY, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Apr. 13, 1925. Serial No. 22,821. 6 Claims. (Cl. 179—27.)

1. In a telephone system, lines, a plurality of cord circuits each including a talking key, an operator's telephone set and means common to said cord circuits for testing for the idle or busy condition of any one of said lines from either plug of any one of said cord circuits, means for appropriating said common testing means for the use of a cord circuit on the operation of the corresponding talking key, and means for connecting the operator's telephone set to said cord when the common testing means has been appropriated by said cord responsive to the connection of the cord with an idle line.



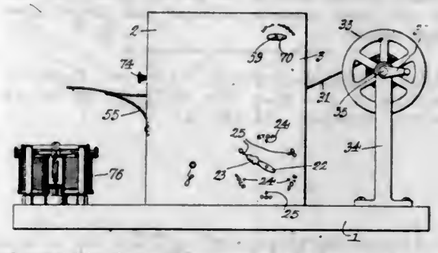
1,678,686. LIGHT-DIMMING SWITCH. ROBERT K. WINNING, Wauwatosa, Wis., assignor to Clum Manufacturing Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed May 19, 1927. Serial No. 192,519. 13 Claims. (Cl. 200—160.)

12. In a device of the character described, the combination with a contactor movable between successive stations in a step by step movement and provided with spaced projecting contacts mutually in electrical connection, of two sets of terminal contacts adapted to be engaged by the contacts of said contactor, one set of terminal contacts being mutually connected electrically and the contacts of the other set being mutually insulated and so positioned that one or the other thereof is alternatively in circuit with the terminal contacts of said first mentioned set at each stationary position of said contactor.

1,678,687. APPARATUS FOR CARBONIZATION. CHARLES BURTON WINZER, Balham, London, England. Filed Dec. 21, 1925, Serial No. 76,757, and in Great Britain Jan. 14, 1925. 3 Claims. (Cl. 202—9.)

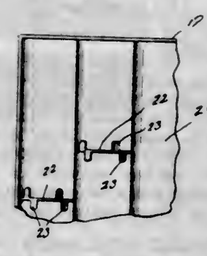
1. In a carbonizing apparatus, a closed, horizontally elongated chamber having a pathway therethrough for material to be carbonized; said chamber being provided with a flue system comprising a plurality of U-shaped flues, each of which has its middle portion formed in the bottom wall of the chamber and its limbs formed vertically in the opposite side walls of said chamber respectively, said flues being connected in series; and a furnace for supplying hot gases of combustion to said flue system at one end thereof so as to travel in series therethrough.

2. Carbonizing apparatus, comprising a closed annular chamber having a vertical axis, the floor of said chamber having an aperture therethrough extending across the same; means for heating said chamber; an annular horizontal platform rotatably disposed within said chamber and spaced above the floor thereof; and a succession of vertically-elongated carriers mounted in said platform to contain material to be carbonized, said carries projecting below the platform and having hinged closures at their lower ends provided with supporting rollers which are adapted to travel along the floor of the chamber and thereby hold said closures in closed position and which allow each closure to open automatically when the same is above said aperture so as to discharge the carbonized contents of the respective carriers.



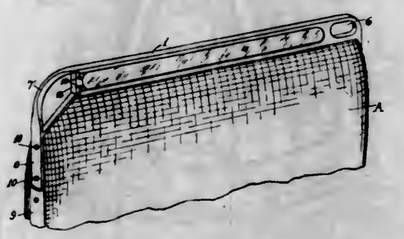
1,678,688. WINDSHIELD WIPER. LOUIS ZAIGER, Lynn, Mass. Filed Mar. 12, 1928. Serial No. 261,017. 3 Claims. (Cl. 15—255.)

1. A windshield wiper comprising a U-shaped backing member, flexible wiping strips mounted in said member and projecting beyond the edges thereof, a flexible spacer interposed between said wiping strips and spacing them from each other, said spacer projecting beyond the edges of said backing member and terminating short of the edges of said wiping strips, said spacer being of a sufficient thickness to maintain independence between said wiping strips whereby an advancing wiping strip will perform the main wiping operation while the following wiping strip will bear lightly against the windshield to perform a final wiping operation.



1,678,689. INSTRUCTING DEVICE. MARCELLO CENTORRINO, New York, N. Y. Filed May 2, 1927. Serial No. 188,190. 6 Claims. (Cl. 178—115.)

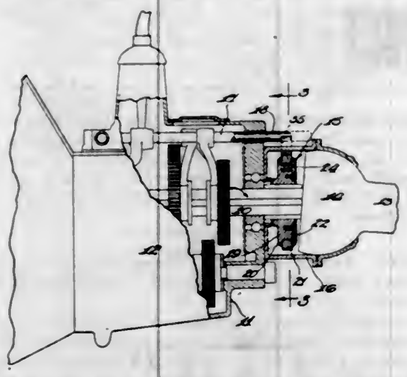
1. In a device of the class described, a record having telegraphic code signals thereon; a feeding mechanism for the record; a driving mechanism operatively connected with the said feeding mechanism; a governor for controlling the speed of the driving mechanism, said governor comprising a pivoted frame, a shaft journaled therein, a pinion mounted on the shaft so as to be rotated by the driving mechanism and a fan secured to the said shaft



and rotatable therewith to control the speed thereof; a pivoted stop lever engaged at one end by a pin on the pivoted governor frame and by an abutment on the driving mechanism at its other end when the said pivoted frame is rotated and means for reproducing telegraphic code signals.

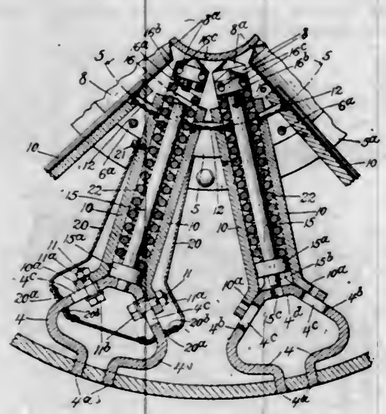
1,678,690. BAKING DEVICE. JAMES FRANCIS CONNELL, Lincoln, Nebr. Filed June 24, 1927. Serial No. 201,165. 1 Claim. (Cl. 53—10.)

In a structure of the class described, a base, a baking device hingedly mounted on said base, said baking device being composed of duplicate hingedly connected superimposed sections, said sections being formed with removable baking units, said baking units being grooved to provide individual compartments, together with individual partition elements receivable in said grooves for making objects of different sizes.



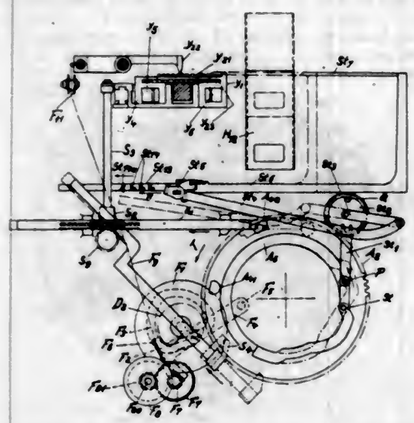
1,678,691. ADVERTISEMENT HOLDER. FRANCISCO DE LA CUESTA, MANUEL MARIA DE LA CUESTA, JUSTO PARAPAR, and SANTIAGO FALS, Habana, Cuba. Filed Feb. 26, 1927, Serial No. 171,256, and in Cuba Feb. 12, 1927. 1 Claim. (Cl. 40—125.)

A device of the character described comprising an advertising attachment for seat backs, a frame including upper and lower parallel spaced elongated members, the upper member having its end portions turned downwardly and laterally thereto, the lower member being shaped to conform to the top edge of the seat back, and having one end portion thereof turned downwardly for a distance



and spaced from the downwardly turned portion of the upper member, but having its extremity connected thereto, the frame members having inwardly directed flanges on their parallel portions forming channels for embracing the sides and ends of an advertising card, and a block detachably secured between the parallel portions of said upper and lower members adjacent said turned down portions thereof.

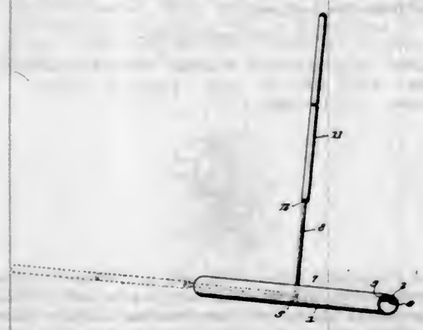
1,678,692. BRAKE DEVICE. ANTHONY DOMENICO, Brooklyn, N. Y. Filed July 18, 1927. Serial No. 206,754. 3 Claims. (Cl. 192—4.)



2. In combination with a rotatable part, a rotor keyed thereto, a ring freely encircling said rotor, a shoe engageable with said ring, manually operated means for holding said shoe in engagement with said ring, locking means carried by said shoe and engaging said ring for locking the latter against rotation in one direction, and automatic locking means between said rotor and said ring for locking the former against rotation in the same direction.

1,678,693. SPRING WHEEL. JOHN R. EAID, Chicago, Ill., assignor to The Peoples Trust and Savings Bank of Chicago, trustee. Filed June 11, 1923. Serial No. 644,578. 10 Claims. (Cl. 152—48.)

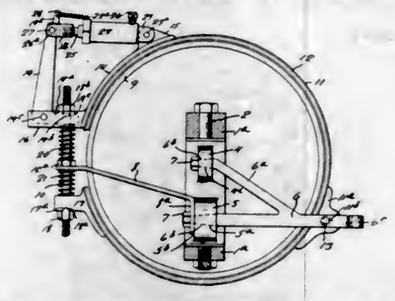
1. A wheel comprising a hub and a rim, a series of spoke members intermediate said rim and hub, a spring surrounding each said spoke member and adapted to be compressed by the movement of the hub toward the portion of the rim adjacent said spoke members, and a flexible guide about said spring connecting at one end with said hub.



1,678,694. METHOD AND APPARATUS FOR THE ALIGNING OF TYPE CARRIERS. ARNOLD AUGUST EGLI, Hamburg, Germany, assignor to Chocolat Tobler Holding Co. Aktiengesellschaft, Schaffhausen, Switzerland. Filed Mar. 25, 1926, Serial No. 97,302, and in Germany Apr. 2, 1925. 17 Claims. (Cl. 101—93.)

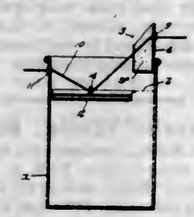
1. The art of aligning type carriers, which comprises restricting the movability, aligning the type carriers while so restricted and then locking the carriers after they have been aligned.

3. In a type setting machine, type carriers forming a line of type, means compressing the carriers to restrict their movability, means for aligning the carriers and means for locking the carriers after they have been aligned.



1,678,695. SAND-GREEN SCRAPER. JOSEPH W. FERGUSON, Pawhuska, Okla. Filed Aug. 4, 1927. Serial No. 210,690. 5 Claims. (Cl. 55—10.)

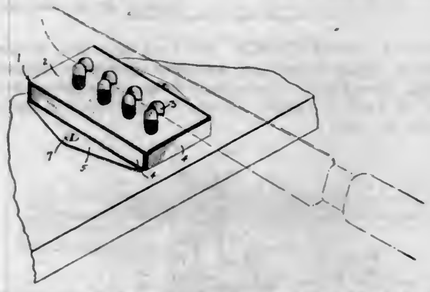
1. A sand green scraper comprising a hollow tubular member provided with an opening extending from end to end along one side thereof, and a handle attached to the scraper and adapted to fold through the opening in the scraper and lie in the same plane therewith.



5. A sand green scraper comprising a hollow tubular member split from end to end at one side thereof and having sand retaining flanges thereon at the edges adjacent the opening, a stud secured to the scraping member and extending toward and in alignment with the said opening, a handle extending through said opening and pivotally engaging said stud, whereby the handle may be swung to folded position, and a sleeve slidable on the handle and adapted to slide into the tube and over the pivotal joint between the stud and the handle to maintain the handle in its operative position.

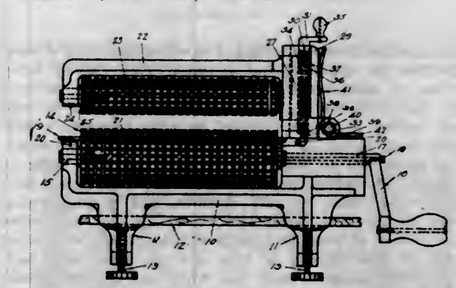
1,678,696. BRAKE SUPPORTING AND OPERATING MECHANISM. ALVIN S. FISHEL, Cleveland, Ohio. Filed Dec. 5, 1923. Serial No. 678,664. 16 Claims. (Cl. 188—152.)

1. The combination, with a brake drum and a brake band arranged to cooperate therewith, the said band having brackets at opposed ends thereof, of an angular brake band lever pivoted to one of said brackets, a bolt connected with said lever and extending through the said brackets, an anchored arm having a portion intermediate said brackets through which said bolt extends, a spring interposed between the said arm and the said lever, a fluid pressure cylinder pivotally mounted on said brake band, a piston rod extending from said cylinder, and an operative connection between the brake band lever and the said piston rod.



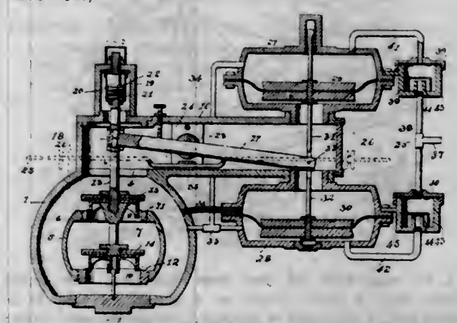
1,678,697. THREAD MOISTENER. CHARLES H. GIEBELER, Plainfield, N. J. Filed May 11, 1927. Serial No. 190,571. 3 Claims. (Cl. 91—46.)

1. A thread moistener comprising a receptacle designed to contain a moistening liquid, a felt support arranged on the receptacle and having an upright plate with an aperture therein and also having shelves reaching from said plate and spaced apart at a point in the same plane as said aperture and provided with upstanding flanges spaced from the plate, sections of felt arranged on said shelves with their confronting ends coincident with the said aperture, a float arranged in the receptacle and having a channel and also having a thimble in said channel; the receptacle being provided in its wall remote from the felt support with an aperture in the same vertical plane as the aperture in the thimble of the float and the aperture in the upright plate of the felt support, said apertures being for the passage of a thread through the aperture of the receptacle, the aperture in the thimble of the float and the aperture in the upright plate of the felt support, in the order named.



1,678,698. KNIFE SHARPENER. GEORGE A. GRAVES, Newton Center, Mass. Filed May 24, 1926. Serial No. 111,276. 4 Claims. (Cl. 76—86.)

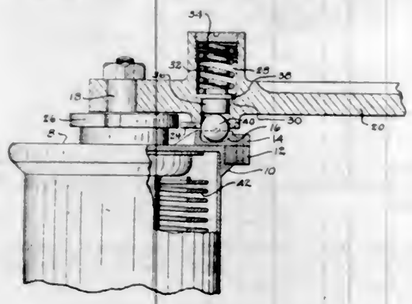
1. A knife sharpener adapted for domestic use comprising overlapping rows of fixed projecting sharpening members arranged substantially parallel with each other and each having a single cutting edge adapted to present between said rows a series of aligned sharpening apertures to the opposite sides of a knife drawn between the aligned working edges of each of said rows, each of said edges being formed by the intersection of planes



oblique to the line of the sharpening apertures, and a base member adapted to hold said members in fixed relation.

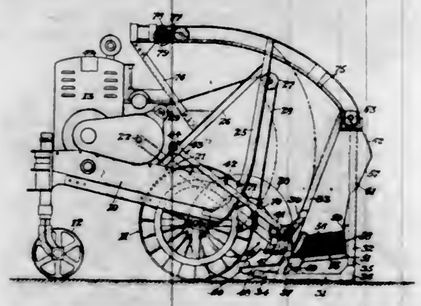
1,678,699. MEAT TENDERER. HERMAN S. JOHNS, Ada, Okla. Filed May 12, 1926. Serial No. 108,544. 9 Claims. (Cl. 17—25.)

1. In a machine of the character described, a pair of spaced parallel rollers, means supporting said rollers for rotation, means for rotating one of said rollers, means for adjusting the other roller toward and away from the first mentioned roller to vary the distance between said rollers, said supporting structure for the last mentioned roller being mounted for pivotal movement, and resilient means exerting a downward pressure on said structure and its roller, and permitting pivotal yielding movements at one end thereof for the purpose described.



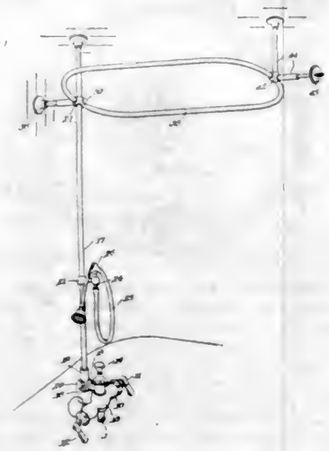
1,678,700. COMBINED VACUUM AND PRESSURE RELIEF VALVE FOR RECEIVING AND STORAGE TANKS. ANDREW J. MCEWAN, Tulsa, Okla. Filed Sept. 30, 1926. Serial No. 138,783. 14 Claims. (Cl. 137—53.)

5. In a pressure and vacuum relief valve, a valve member, counter-balanced diaphragms for respectively opening the valve member for pressure and vacuum



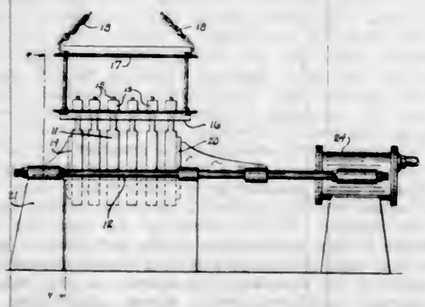
relief actions, and means for influencing the diaphragms respectively upon increase of pressure or reduction of pressure on one or the other of said diaphragms.

1,678,701. DOOR CLOSER. WALLACE F. MOORE, Meriden, Conn., assignor to The American Hardware Corporation, New Britain, Conn., a Corporation of Connecticut. Filed June 17, 1927. Serial No. 199,514. 3 Claims. (Cl. 16—49.)



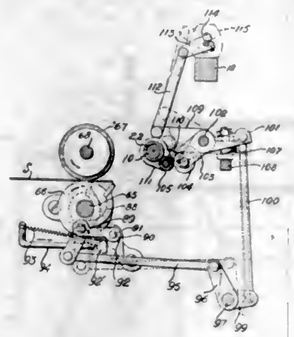
1. In a door closer having a member carrying a stop fixed thereto and a spring actuated door closing lever carried by said member and movable relatively to said stop, the improvement which consists in a recess in said lever having a mouth opposed to said member, a ball within said mouth of smaller diameter than said mouth so as to be free to pass therethrough, said ball being at all times in rolling contact with said member and held within said recess by said member, and a compression spring within said recess compressed by said ball when passing said stop so that pressure due to the expanding action of said spring is then exerted upon said ball, but uncompressed by said ball when out of engagement with said stop so that said ball is then free from such pressure, the ball and the end of the recess constituting abutments for said spring when the ball is passing said stop, one of said abutments being spaced away from said spring when the ball is not in engagement with said stop.

1,678,702. SAND CUTTING, SCREENING, AND PILING MACHINE. VERNE E. MINICH, Scarsdale, N. Y., assignor to The American Foundry Equipment Company, New York, N. Y., a Corporation of Ohio. Filed Oct. 15, 1926. Serial No. 141,711. 29 Claims. (Cl. 259—144.)



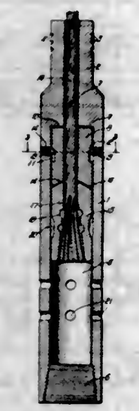
1. In apparatus of the class described, the combination with a sand cutter of a screen adapted to be raised out of the path of the sand ejected by said cutter, a support for said screen, a trackway above said machine, and means on the support engaging said trackway to guide the screen into non-operative position.

1,678,703. BATH AND SHOWER COMBINATION. PHILIP MUELLER, Decatur, Ill., assignor to Adolph Mueller, trustee, Decatur, Ill. Filed Oct. 19, 1925. Serial No. 63,022. 13 Claims. (Cl. 4—148.)



1. A faucet and shower combination comprising the combination with hot and cold water valves and connections therefor, of a mixing chamber structure between said valves, a supply spout leading from said chamber, a rigid shower column leading upwardly from said chamber, a switch valve in said chamber for controlling the discharge through said spout and shower column, and means connecting said column to said chamber structure permitting adjustment of said column about a horizontal axis relative to said chamber.

1,678,704. FILTERING DEVICE. WILLIAM M. MORRISON, Tacoma, Wash., assignor to American Smelting and Refining Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 17, 1927. Serial No. 168,872. 5 Claims. (Cl. 210—188.)

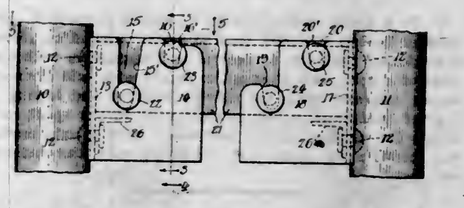


1. A filter comprising a container having a solution to be filtered therein, a plurality of filter-plates, each of said plates comprising a pair of filter surfaces separated to form a closure, means for applying a vacuum to said closure while said plates are immersed in said solution, whereby a cake may be formed in the spaces between adjacent plates, means for raising said plates from said solution, and means for applying mechanical pressure to said assembly in raised position while maintaining said vacuum, whereby a substantially dry, solid cake may be obtained.

1,678,705. PRINTING MECHANISM. WILLIAM F. MULLER, Brooklyn, N. Y., assignor to The International Postal Supply Company of New York, Brooklyn, N. Y., a Corporation of New York. Filed July 28, 1922. Serial No. 578,272. 1 Claim. (Cl. 101—236.)

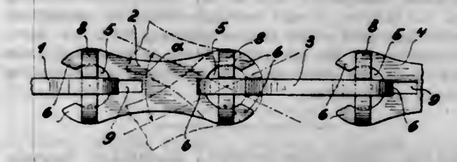
In a printing mechanism, a pair of feed rolls for receiving and advancing paper strips, a printing couple disposed beyond the feed rolls for receiving said strips and having a die roll disposed at one side of the path of the strip, a shaft connected to the die roll of the printing couple, means for frictionally driving the shaft, said shaft having an arm thereon, a pivoted stop normally engaging the arm to hold the shaft from turning, a strip engaging lever having an end extending into the path of the strip adjacent to one of the feed rolls and at the opposite side of the path of the strip from that of the die roll, a yieldable pivoted support for said strip engaging lever, a link extending substantially in the direction of the path of the strip from the other end of said strip engaging lever, a second link extending transversely of the plane of the path of the strip from the pivoted stop, and a shaft and rocker arm structure connected between the links for transmitting movements between the strip engaging lever and the pivoted stop.

1,678,706. SWIVEL ROPE SOCKET. ALBERT H. NEILSON, Tulsa, Okla. Filed June 27, 1927. Serial No. 201,856. 7 Claims. (Cl. 24—123.)



1. A device of the character described including a body having a socket opening through one end thereof and having a rope channel leading from the base of the socket, a rope anchor block in the socket and a bushing interposed between the anchor block and the base of the socket with its upper bearing face terminating flush with the base of the socket.

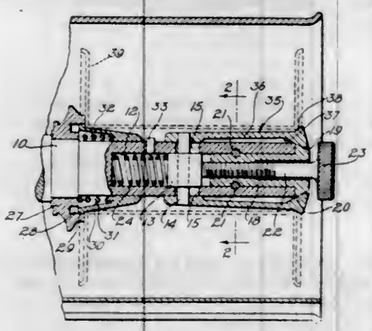
1,678,707. CLASP FOR BRACELETS. ALMYR L. NEWMAN, Warwick, R. I. Filed Mar. 2, 1928. Serial No. 258,605. 6 Claims. (Cl. 24—230.)



1. In a clasping-device for bracelets or the like, the combination of a link having a cross-member at its end, a second link having a hook at its end adapted to hook around one side of the cross-member, and a pivoted clasp on one link provided with a latch adapted to slide across and engage with the cross-member on the opposite side from the hook.

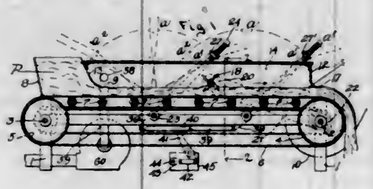
1,678,708. CORNER LOCK FOR BEDSTEADS. HENRY RICHARDSON, Chicago, Ill. Filed Nov. 27, 1925. Serial No. 71,562. 2 Claims. (Cl. 5—294.)

1. In a bedstead structure, the combination of a cooperating pair of brackets adapted to be secured to oppositely facing corner posts of a bed, each of said brackets having a post plate and a side wall formed with upper and lower rail locking elements comprising two horizontally spaced notches, the notches constituting the upper rail locking elements being the inner notch in the side wall of one of said brackets and the outer notch in the side wall of the other bracket, and a side rail having its end portions each provided with upper and lower rail locking members adapted to engage with the said spaced notches and removably lock said side rail to said bracket.



1,678,709. SECTIONAL OR LINK SHAFT. WALTER SCHÜRMANN, Dusseldorf, Germany. Filed July 27, 1926, Serial No. 125,227, and in Germany Oct. 1, 1925. 4 Claims. (Cl. 64—30.)

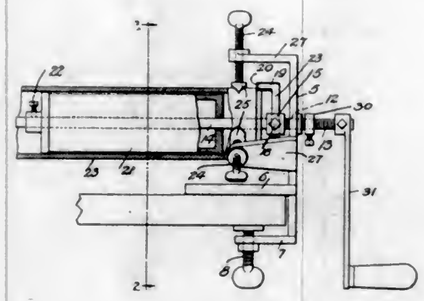
1. A flexible shaft or coupling comprising at least two flat link plates having forked end portions and a nearly circular opening between the arms of the forks, and a flat disk within the openings of the forked ends of the



link plates and having transverse notches in its periphery arranged in working pairs; one pair of notches receiving the fork arms of one link plate and the other pair of notches receiving the fork arms of the other link plate.

1,678,710. MATERIAL-SPOOLING MECHANISM. JOHN NILSEN SELVIG, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corportation of New York. Original application filed July 12, 1924, Serial No. 725,660. Divided and this application filed Jan. 2, 1926. Serial No. 78,841. 9 Claims. (Cl. 242—68.)

1. In a spool locking device, a driving element, a cam member having an offset tapered surface extending across a portion of the outer surface of and engageable with one head of a spool and arranged to rotate with said element, means rotatable with the driving element and having a tapered surface engaging another head of the spool, and means for causing relative movement between said means and member to clamp the heads between the tapered surfaces.

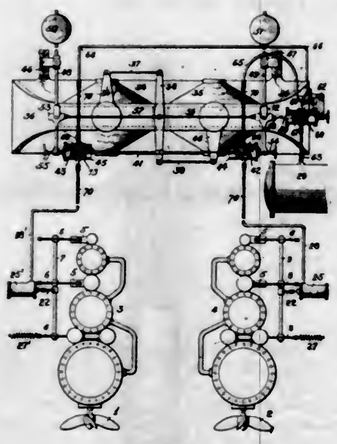


1,678,711. SOLAR-HEAT DRIER. LEWIS H. SHIPMAN, Boston, Mass. Filed May 6, 1925. Serial No. 28,400. 4 Claims. (Cl. 34—12.)

1. A solar heat drier for peat and the like having, in combination, an endless traveling conveyer belt on to which the peat or the like is delivered; a housing through which the peat or the like is transported by said conveyer, said housing inclosing the peat on all sides and having a transparent top; an air outlet communicating with the interior of said housing; means for exhausting air through said outlet and substituting fresh air therefor, and means for directing a beam of condensed solar rays on to the peat upon the conveyer while moving through said housing.

1,678,712. PIPE-SEAT-CUTTING MACHINE. LEANDER DOW SMITH, Los Angeles, Calif. Filed Nov. 3, 1926. Serial No. 145,961. 3 Claims. (Cl. 82—4.)

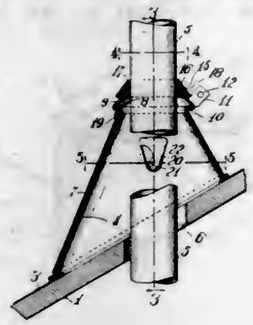
1. A pipe seat cutting machine comprising a vertically disposed frame adapted to be clamped to a support, an operating shaft mounted in said frame for rotation and reciprocation, a mandrel detachably mounted on said shaft, a plurality of clamps mounted on said frame and adapted to engage the exterior surface of the pipe to clamp the same in rigid relation to the mandrel, an adjustable cutting tool mounted transversely on said



shaft for forming interior or exterior seats on the end of the pipe, a collar threadingly mounted on the outer end of the said shaft for regulating the depth of the seat cuts, and means to rotate and reciprocate the operating shaft.

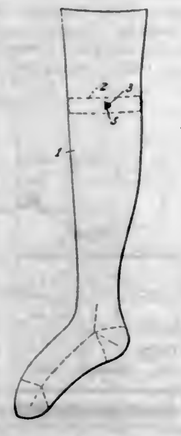
1,678,713. MOLDING COMPOUND. HARRY STIRLING SNELL, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Nov. 8, 1924. Serial No. 748,525. 15 Claims. (Cl. 260—9.)

1. As a new article of manufacture, a compound formed by the condensation of an insoluble proteinate and furfural.



1,678,714. MEANS FOR PREVENTING RACING OF SHIPS' ENGINES. ELMER A. SPERRY, Brooklyn, N. Y. Filed Jan. 8, 1921. Serial No. 435,837. 16 Claims. (Cl. 115—43.)

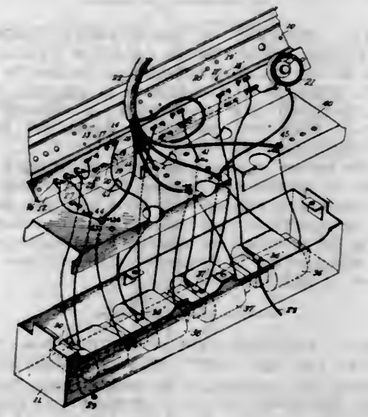
1. In combination with a ship's propellers located on opposite sides of the longitudinal axis of the ship, separate sources of power for driving said propellers, means



responsive to pitching of the ship in a given direction for braking said sources of power, and means responsive to rolling of the ship for preventing the braking of one of said sources.

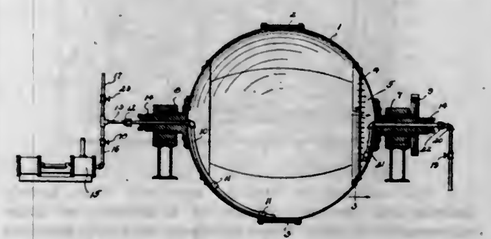
1,678,715. ROOF FLASHING. ROBERT J. STEPHENSON, Chicago, Ill. Filed Nov. 5, 1926. Serial No. 146,411. 6 Claims. (Cl. 283—31.)

3. A roof flashing comprising a tapered sleeve the smaller end of which is adapted to loosely surround a pipe, and is formed with an outturned flange, and a split collar adapted to engage about this flange, the collar comprising means for adjustably drawing the split ends together, and a soft metal ring on the collar adapted to snugly engage the pipe.



1,678,716. HOSIERY. WILLIAM L. THORNE, New York, N. Y. Filed June 29, 1926. Serial No. 119,288. 4 Claims. (Cl. 2—240.)

1. In combination, a hose and a garter for said hose, said garter comprising a leg-encircling band separate from said hose and inside the leg opening of said hose, said band looped back and forth in the body of the hose.



1,678,717. ELECTRICAL APPARATUS. MILTON ALDEN, Springfield, Mass., assignor to Alden Manufacturing Company, Brockton, Mass., a Corporation of Massachusetts. Filed Jan. 17, 1927. Serial No. 161,619. 6 Claims. (Cl. 179—171.)

1. An amplifier set comprising a casing, a coupling device mounted therein, a cover member secured thereto and including a socket having contacts for a vacuum tube, an insulating conductor positioning plate between said coupling device and said socket, a cable having

conductors riveted to said plate, some of said contacts being connected to the rivets and other wires connecting other contacts with the coupling device.

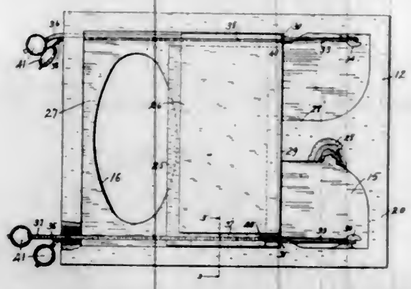
1,678,718. METHOD OF WASHING COOKED STRAW. DE WITT C. AMERINE, Vincennes, Ind. Filed June 9, 1926. Serial No. 114,700. 5 Claims. (Cl. 92—9.)

1. The method of treating straw for straw boards or papers by first rotating same in a closed vessel with a lime sulphur in the presence of steam under pressure and thereafter continuing the rotation of said rotary with a restricted outlet in said vessel, and applying water against the pressure of the steam held in said vessel, whereby the water will flow through said vessel, reducing the pressure of the steam and removing from the vessel a portion of the said solution.

1,678,719. METHOD OF MAKING ESTERS. GEORGE BARSKY, New York, N. Y., assignor to American Cyanamid Company, New York, N. Y., a Corporation of Maine. Filed Apr. 13, 1927. Serial No. 183,612. 9 Claims. (Cl. 260—106.)

1. A method of making esters which comprises heating a mixture of an organic acid, the nitrile corresponding to said acid, and an alcohol, in the presence of a mineral acid.

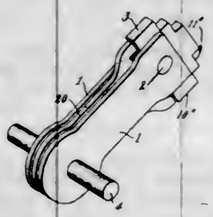
1,678,720. SIZING FIBERS. HUBERT L. BECHER, Trenton, N. J., assignor to The Agasote Millboard Company, Ewing Township, N. J., a Corporation of New Jersey. Filed Apr. 22, 1926. Serial No. 103,986. 1 Claim. (Cl. 92—21.)



The process of treating fibers as a preliminary step to shaping the same which comprises adding water.

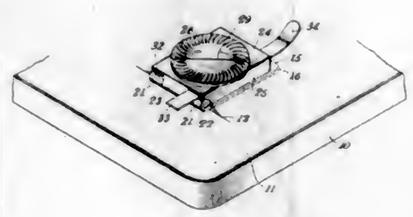
tannic acid and a soluble metallic soap to the fiber, beating the fiber and then precipitating the soap onto the fiber by means of a metallic salt.

1,678,721. PROCESS OF RECOVERING COMBINED NITROGEN FROM CRUDE CALCIUM CYANAMIDE. GUY H. BUCHANAN, Westfield, and PALMER W. GRIFFITH, Elizabeth, N. J., assignors to American Cyanamid Company, New York, N. Y., a Corporation of Maine. Filed Feb. 29, 1924. Serial No. 696,070. 10 Claims. (Cl. 23—190.)



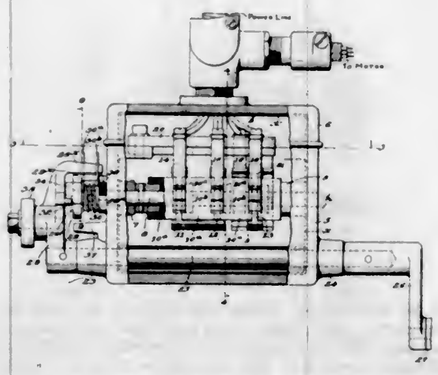
1. The process of recovering combined nitrogen which consists in providing a mixture of lime nitrogen and water containing between 100 parts and 400 parts of water by weight to each 100 parts of lime nitrogen; filtering the solution thus obtained; and subjecting the solids separated out to the action of an autoclave in the presence of additional water.

1,678,722. PICTURE-DISPLAY DEVICE FOR CANDY BOXES OR THE LIKE. WALTER C. CARLSON, Milwaukee, Wis., assignor to Milwaukee Paper Box Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Nov. 4, 1926. Serial No. 146,189. 13 Claims. (Cl. 40—65.)



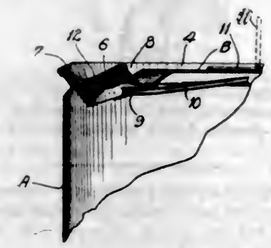
1. The combination with an apertured frame having interior side bearing surfaces, of a plurality of slides reciprocable in said frame between retracted positions and advanced positions in registry with said aperture, said slides being of less length than the interior width of said frame and being positioned therein in staggered relation with their respective ends abutting bearing surfaces on opposite sides of the frame, and actuating means for each slide connected thereto at the end thereof which abuts a frame bearing surface.

1,678,723. ROTARY-HAMMER GRINDING MILL. WALTER J. CLEMENT, Utica, N. Y., assignor to The Bossert Corporation, Utica, N. Y., a Corporation of New York. Filed Oct. 20, 1925. Serial No. 63,608. 5 Claims. (Cl. 83—73.)



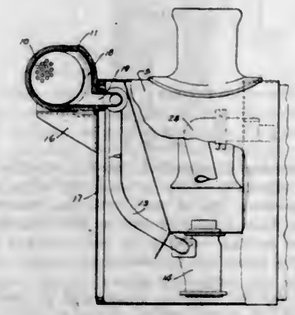
1. A hammer of the class described, comprising a pair of spaced members, a hammer head having a plurality of striking faces pivoted between said members, and an element positioned between said members for holding said head against turning on its pivot with any selected face in operative position.

1,678,724. PRINTING-PRESS GAUGE. GENNARO DE PAMPHILIS, New York, N. Y. Filed Nov. 14, 1927. Serial No. 233,186. 4 Claims. (Cl. 101—415.)



1. A gauge for use in combination with a tympan sheet comprising a base plate to pass through a slit in said sheet, said plate having an apertured recess, a frame hinged to said plate to rest over said sheet, means in said frame to adjustably carry one or more guide strips, a manually operable head rotatably mounted in said frame, and cam means actuated by said head to engage in the base recess and clamp said frame to the base.

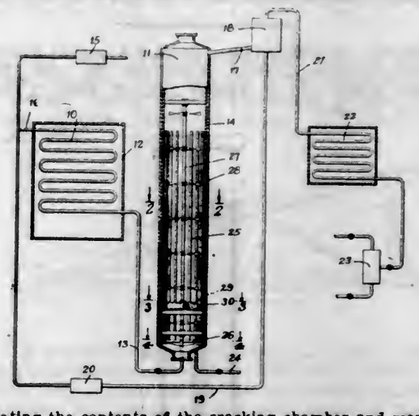
1,678,725. SNAP SWITCH FOR MOTOR CONTROL. ROBERT M. GALLOWAY, Richmond, Ind., and PAUL C. BURTON, Clarendon Hills, Ill., assignors to The National Automatic Tool Company, Richmond, Ind., a Corporation of Indiana. Original application filed Sept. 23, 1923, Serial No. 661,447. Divided and this application filed Apr. 7, 1925. Serial No. 21,375. 5 Claims. (Cl. 200—70.)



1. An electric switch comprising a housing; a plurality of fixed contacts in said housing; a first oscillatory shaft journaled in said housing; a contact member carried by said shaft and adapted upon oscillation of the shaft selectively to connect said contacts; a second oscillatory shaft journaled in said housing parallel with said first shaft; manual means to oscillate said second shaft including an actuating crank secured to one end of said shaft; a lever secured upon the opposite end of said shaft; a rocker secured to said first shaft adjacent said lever; an operative connection between said lever and said rocker to transmit oscillatory movement from the second shaft to said first shaft; and a roller carried by said lever and adapted to be acted upon by power means to shift said lever thereby to oscillate said first shaft and the contact member carried thereby.

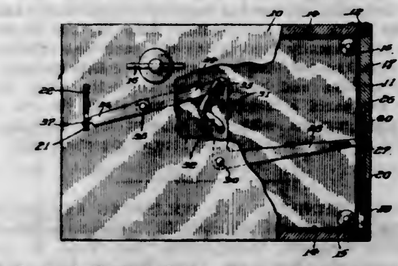
1,678,726. CONTAINER. WALTER S. GRANT, St. Louis, Mo. Filed May 19, 1927. Serial No. 192,544. 5 Claims. (Cl. 221—28.)

1. A container comprising a body having a projecting chime at its top; a pouring lip formed in said chime; a pouring nozzle mounted in the head of the container in proximity to said pouring lip; and an annular oil-receiving channel formed adjacent to said chime.



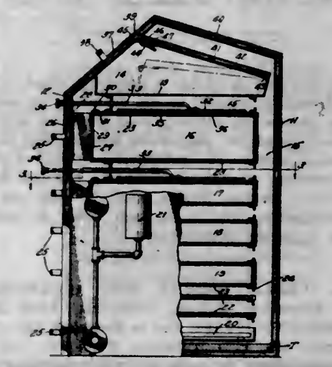
1,678,727. LOCOMOTIVE SMOKE-BOX ARRANGEMENT. JOSEPH F. GRIFFIN, Teaneck, N. J., assignor to The Superheater Company, New York, N. Y. Filed June 20, 1925. Serial No. 38,506. 3 Claims. (Cl. 122—441.)

1. In apparatus of the class described, a locomotive smokebox having a front end sheet and the usual engine exhaust pipe therein, a feed water heater located forward of said end sheet and having a flanged steam inlet adapted to be secured to said end sheet around an opening therein, and a steam pipe leading upwardly through said smokebox near the periphery thereof and connecting said exhoust pipe with said inlet.



1,678,728. TREATING HYDROCARBON OILS. WILLIAM S. HADAWAY, Jr., New Rochelle, N. Y., assignor, by mesne assignments, to The Texas Company, New York, N. Y., a Corporation of Delaware. Filed Sept. 15, 1923. Serial No. 662,821. 3 Claims. (Cl. 196—48.)

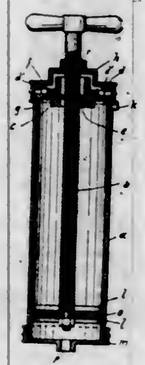
1. Apparatus for converting higher boiling hydrocarbons into lower boiling ones comprising a vertical cracking chamber, a multi-tubular exchanger disposed longitudinally within the cracking chamber and formed with outlets at the upper end thereof, means for introducing oil into the bottom of the exchanger, mechanical means for



agitating the contents of the cracking chamber and means for drawing off liquid from the bottom of the cracking chamber.

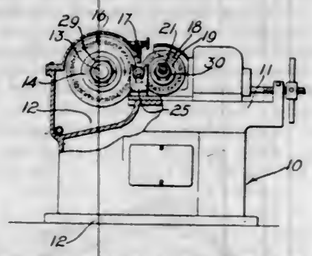
1,678,729. EXPOSURE-INDICATING DEVICE FOR CAMERAS. JOHN HAYS HAMMOND, Jr., Gloucester, Mass. Filed June 1, 1921, Serial No. 474,146. Renewed Dec. 2, 1927. 10 Claims. (Cl. 95—31.)

1. In an indicating device, the combination of a camera having an opening through which film digits may be observed, means for indicating in said opening when an exposure has been made by said camera, and means in continual frictional engagement with the film surface and actuated by movement of the film for restoring said indicating means immediately upon movement of the film.



1,678,730. FOOD-PRESERVING CABINET. JOHN H. JOHNSON, Santa Barbara, Calif. Filed Sept. 25, 1924. Serial No. 739,957. 6 Claims. (Cl. 126—37.)

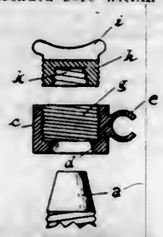
1. A food preserving cabinet comprising insulating walls, a lower section with drawers spaced from the sides



to form air-circulation flues, a slidable cover for each drawer, a transverse partition forming a display section above the drawer section, and a heater within the cabniet.

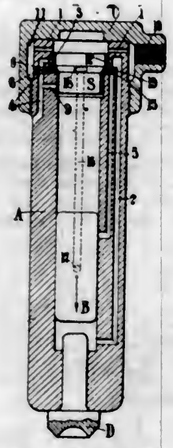
1,678,731. LUBRICATOR. NIKOLAI KASTBERG KLAUSET, Christiansand, Norway. Filed Feb. 26, 1925, Serial No. 11,856, and in Norway Aug. 25, 1924. 1 Claim. (Cl. 74—40.)

A device of the character described including a support, a threaded rod arranged through the support, a split nut mounted on the support for association with the threaded rod and including two parts, pin and slot connections between the nut parts and the support for positively guiding the nut parts and for holding them on the support, means for normally holding the nut parts out of engagement with the rod, and consisting of coiled springs arranged between and having their respective ends fitted in the nut parts, a member arranged about the rod and adjustably engaged with the support and including a ring for forcing the nut parts into engagement with the rod.



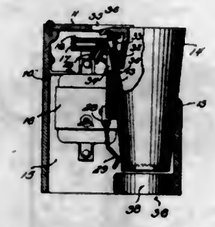
1,678,732. GRINDING AND POLISHING APPARATUS. PETER JOHN KNAUS, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Mar. 13, 1925. Serial No. 15,228. 2 Claims. (Cl. 51—88.)

2. In a grinding machine, a grinding wheel, a feeding wheel peripherally opposed to the periphery of said grinding wheel, means for rotating said grinding and feeding wheels, and means for supporting and guiding an article to be ground between the peripheries of said wheels, the forward portions of said wheels being profiled to abrade said article at graded depths, and the rear portions of said wheels being parallel to each other to polish said article as it passes therebetween.



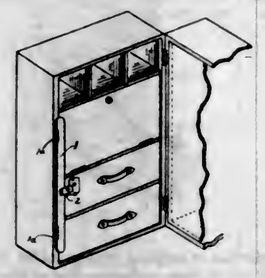
1,678,733. CABLE SOCKET FOR ACCUMULATORS. EINAR KROMANN, Odense, Denmark. Filed May 26, 1927, Serial No. 194,492, and in Denmark Jan. 31, 1927. 3 Claims. (Cl. 173—259.1.)

1. A cable socket for accumulators comprising in combination a box member having an upper screwed bore and a lower bore suitable for fitting over the pole pin of the accumulator, an externally threaded plug to engage the upper screwed bore of the box, means for revolving the plug and a screw-threaded bore within the plug which is



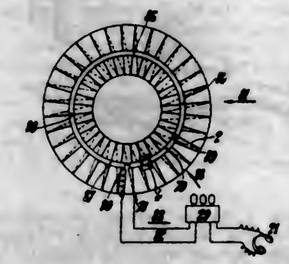
adapted to simultaneously cut a thread on the pole pin when same is screwed into the upper end of the screwed box member, thereby firmly holding the box against the pole pin.

1,678,734. FLUID-OPERATED TOOL. WILHELM KÜHN, Frankfort-on-the-Main, Germany. Filed Mar. 10, 1927, Serial No. 174,346, and in Germany Feb. 25, 1925. 6 Claims. (Cl. 121—26.)



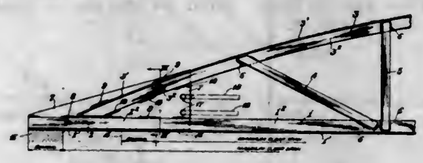
1. In a pressure-air operated tool the combination of: a cylinder, a piston working in said cylinder, means for supplying pressure air to said cylinder, means for discharging air from said cylinder, a distributing valve in said cylinder having both of its ends stepped and being adapted at the upper end to control the supply of air from said pressure air supplying means to the upper end of the cylinder for the working stroke and at the lower end to control the discharge of air through said discharging means from the upper end of the cylinder, a conduit associated with the valve which is open to the pressure air supply and to the cylinder during a part of the working stroke of the piston and is adapted to be closed by the piston before the end of the working stroke for the purpose of increasing the pressure in said conduit and thereby starting the reverse movement of the valve, a second conduit adapted to be rendered operative by the valve shortly after the reverse movement of the valve has started, for completing the reverse movement of the valve, said second conduit communicating at one end with the pressure air supply and at the other end with the front end of the cylinder, and a third conduit likewise adapted to be rendered operative by the valve shortly after the reverse movement of the valve has started, for the purpose of allowing of the passage of additional pressure air past the lower end of the valve into the cylinder, said third conduit communicating at one end with the lower end of the valve and at the other end with the front end of the cylinder, substantially as described.

1,678,735. MIXING MACHINE. VICTOR P. LARSON, Racine, Wis. Filed Aug. 7, 1926. Serial No. 127,757. 13 Claims. (Cl. 259—131.)



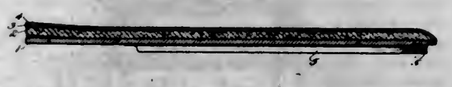
1. In a mixing machine the combination of a body portion having means for removably receiving a plurality of mixing cups, a plurality of cups, a stirring mechanism carried by each cup, a motor supported by said body portion, means actuated by said motor for driving said stirring mechanisms, and means responsive to the application of a cup to any of said receiving means for rendering said motor and driving means active.

1,678,736. TRUNK LOCK. CHARLES LEDIN, Stamford, Conn., assignor to The Yale & Towne Manufacturing Company, Stamford, Conn. Filed Sept. 29, 1927. Serial No. 222,887. 6 Claims. (Cl. 45—94.)



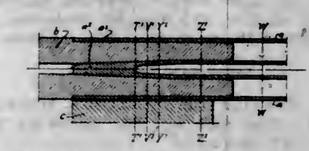
1. A trunk comprising a series of drawers, a locking bar provided to prevent opening of said drawers, a latch bolt mounted on one of said drawers, a bolt mounted on the locking bar and spring pressed relatively thereto and having means adapted to cooperate with the latch bolt, said spring pressed bolt being adapted to be pushed against the pressure of the spring into cooperation with the latch bolt to lock the locking bar in position.

1,678,737. SYSTEM OF RADIOGONIOMETRY. WILLIAM ARTHUR LOTH, Paris, France, assignor to Société Industrielle des Procedes W. A. Loth, Paris, France. Filed Apr. 14, 1924, Serial No. 706,592, and in France Apr. 23, 1923. 5 Claims. (Cl. 250—11.)



1. In an electromagnetic direction finding device, a plurality of serially connected turns, means for short circuiting some of said turns, a current indicating device, means for connecting said current indicating device to the non-short circuited turns, said short circuiting means being included in the circuit of the indicating device.

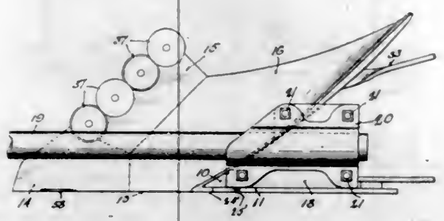
1,678,738. STRUCTURAL ELEMENT. STANLEY MACOMBER, Massillon, Ohio, assignor to The Macomber Steel Company, Canton, Ohio, a Corporation of Ohio. Filed Jan. 6, 1926. Serial No. 79,531. 5 Claims. (Cl. 108—23.)



1. A structural element comprising an angle bar forming a base chord, a curved second angle bar forming a top chord, web members secured to the vertical flanges of said bars, the ends of the horizontal flanges of the top chord being disposed adjacent the edges of the vertical flanges of the base chord and a substantial distance from the respective ends of the latter, vertical longitudinal tie plates secured to the vertical flanges of said chords and extending inwardly substantially beyond the ends of the top chord, and complementary flanged bars welded to the bottom of the opposite faces of said tie plates to complete a plain balanced base for the element, whereby the element may be adjusted to varying distances between supports within the maximum limit of the length of the base chord and the minimum limit of somewhat more than the distance between the inner edges of the tie plates.

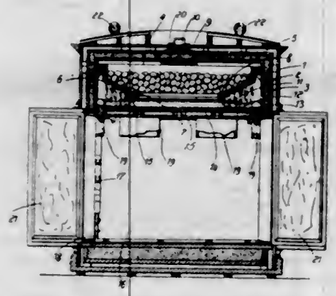
1,678,739. BOOT AND SHOE. LAURIE S. MACDONALD and JOSEPH E. SMALL, Brockton, Mass. Filed Dec. 22, 1925. Serial No. 76,986. 2 Claims. (Cl. 36—44.)

1. An inner sole comprising a leather sole-shaped body member; a sole shaped top member of soft flexible sheet material; a sole-shaped felt cushion member between the top and body members; a sole-shaped waterproof member of flexible sheet material between the top and cushion members, and marginal stitches fastening all of said members together throughout their shank and fore-part portions only, all of said members being of the same size and shape and said stitches being cast around the edges thereof and holding the edges of the top member, waterproof member and body member together so as to enclose the felt member.



1,678,740. METHOD FOR JOINING PIPES. AUGUSTE ADELIN GUSTAVE MAGIS, Paris, France, assignor to The Super-Heater Company, New York, N. Y., a Corporation of Delaware. Filed Jan. 23, 1924, Serial No. 688,001, and in France Mar. 21, 1923. 4 Claims. (Cl. 29—157.6.)

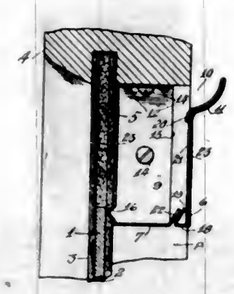
1. The method of making a structure of the kind referred to comprising the steps of holding a plurality of pipes in parallel relation in the relative position they are



to occupy in the finished structure, heating the portions of the pipes to be joined to a suitable temperature, pressing portions of the wall of each pipe against the adjacent portions of two neighboring pipes thereby welding the walls together, and thereafter splitting the welded walls so that the interior of each pipe opens into the interior of the adjacent pipes.

1,678,741. PLOW. MATTHEW MARES, Racine, Wis. Filed Apr. 20, 1923. Serial No. 633,430. 7 Claims. (Cl. 97—129.)

1. A plow having a plow share provided with a plurality of disks constituting the cutting edge thereof, said disks lying in the plane of the share.

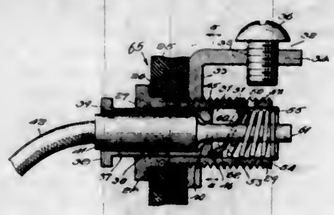


1,678,742. CONSTRUCTION OF REFRIGERATOR CHAMBERS. JEAN GEORGES MEYNIEU, Bordeaux, France. Filed July 23, 1924, Serial No. 727,815, and in France July 27, 1923. 1 Claim. (Cl. 62—54.)

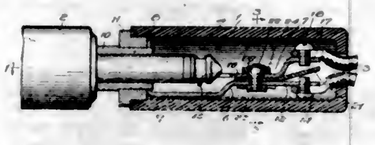
A refrigerator including a body composed of side, top, and bottom walls, a partition arranged in the interior of the body dividing the latter into upper and lower chambers, said partition being hollow to provide an internal space for the passage of air and having openings in the lower portion thereof permitting the passage of warm air from the upper part of the lower chamber into said hollow space, flues for conducting air from said space to the top of the upper chamber extending adjacent to the top of said chamber, and flues for conducting air from the lower part of the upper chamber to the lower chamber.

1,678,743. VENTILATOR. WILLIAM S. MILLER, Rochester, N. Y. Filed Sept. 29, 1925. Serial No. 59,317. 9 Claims. (Cl. 98—2.)

1. The combination with a frame and a window slidable therein, of a ventilator extending across the top of the opening in the frame and including a perforated outer plate member secured to the frame within said opening, an inner plate member also secured to the frame and being independent of the outer plate, a bottom wall carried by one of said plate members, and a deflected portion formed on said inner plate for deflecting the air currents upwardly from under the top face of the frame opening.

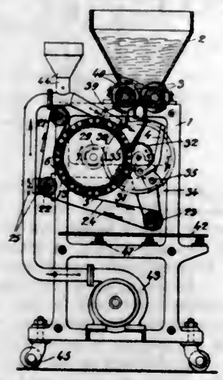


1,678,744. METHOD OF MAKING PIPE ELBOWS. JULIUS C. OLSEN, Racine, Wis., assignor to Western Metal Special Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed May 21, 1927. Serial No. 193,315. 2 Claims. (Cl. 29—157.)



1. The method of making elbows which consists of shaping a pair of curved complementary sheet-metal blanks into semicircular form in cross-section, uniting said shaped members with their adjacent edges overlapped and welded to form a unitary curved tubular member, securing threaded cast ring members within both end portions of the tubular member, and securing a cast flanged ring member externally to one end portion of the tubular member.

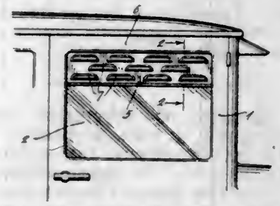
1,678,745. TERMINAL. NEWTON C. SCHELLENGER, Elkhart, Ind., assignor to Chicago Telephone Supply Co., Elkhart, Ind., a Corporation of Delaware. Filed Aug. 5, 1925. Serial No. 48,265. 7 Claims. (Cl. 173—259.)



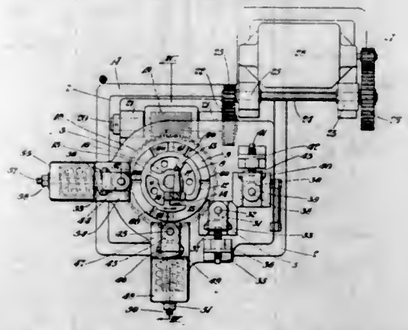
1. In a jack, a tubular member for receiving a conductor, and binding means including a relatively thin ring-like element through which the conductor is adapted to extend, arranged to tightly grip a portion of said conductor to prevent the removal of the conductor from the jack.

1,678,746. JACK. NEWTON C. SCHELLENGER, Elkhart, Ind., assignor to Chicago Telephone Supply Co., Elkhart, Ind., a Corporation of Delaware. Filed Sept. 5, 1925. Serial No. 54,594. 8 Claims. (Cl. 173—328.)

1. In combination, a sleeve, a plug in one end thereof, and a resilient frame mounted on said plug and within said sleeve.



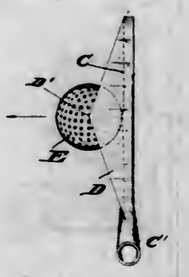
1,678,747. DOUGH-KNEADING MACHINE FOR THE PRODUCTION OF DOUGH PORTIONS READY FOR BAKING. RICHARD SCHOLZ, Berlin, Germany, assignor to the Firm: W. Marx & Co., Halle-on-the-Saale, Germany. Filed Jan. 25, 1927. Serial No. 163,444, and in Germany Mar. 16, 1925. 6 Claims. (Cl. 107—9.)



6. A dough cutting, kneading and shaping machine, comprising in combination a horizontal hollow cylinder having apertures in its circumference which are displaced the one with regard to the other, a cylinder in said hollow cylinder designed to cover said apertures from the inner side, fingers on said inner cylinder engaging each into one of the apertures of said hollow cylinder, means for slowly rotating said hollow cylinder, and means for communicating to said inner cylinder which rotates with said hollow cylinder a rapid reciprocating movement so that said fingers circulate in said apertures and knead and shape the dough portions held in said apertures, an endless band enclosing said hollow cylinder, guide pulleys for guiding said endless band so that it covers that portion of the circumference of said hollow cylinder which begins to descend at the rotation of said cylinder so that the dough portions are securely held in the apertures of said hollow cylinder, and a stretching device on that guide pulley which stands opposite the portion of said conveying band which is in contact with said cylinder so that an elastic contact is ensured.

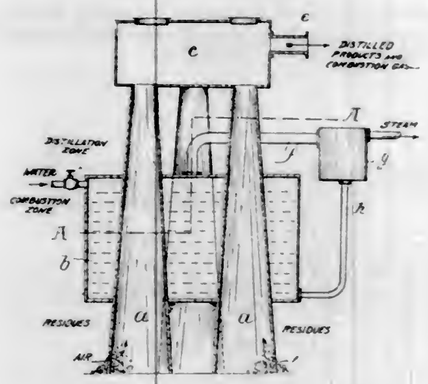
1,678,748. VENTILATOR FOR CLOSED CARS. LEON RANSOM SMITH, Englewood, Colo. Filed Oct. 17, 1927. Serial No. 226,805. 4 Claims. (Cl. 98—2.)

1. In a member having a window opening provided with grooves along the sides and top, a felt lining strip for each side of the groove and a glass slidable in the grooves, a ventilator consisting of two sheet metal plates having each a plurality of openings, one of said sheets being located on each side of the groove between the side of the groove and the adjacent felt strip whereby the two metal strips are spaced apart so as to permit the glass to be inserted into the space between them.



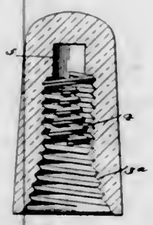
1,678,749. COILING MACHINE. THOMAS W. SMITH, Irvington, N. J. Filed Apr. 13, 1927. Serial No. 183,556. 2 Claims. (Cl. 242—82.)

1. A universal coiling machine for coiling square, round, and flat metal pieces, comprising a base, a spindle rotatably mounted on said base, a plurality of spring pressed holding rollers slidably mounted on said base and movable toward and away from said spindle, said rollers being spaced around said spindle, a pair of guide rollers slidably mounted on said base, said rollers being arranged right and left-hand so as to engage the opposite sides of the work-piece being coiled, individual screw means for adjusting each of said rollers to vary the distance between their faces, said spindle having a work-piece engaging slot, means movable into said slot for locking the end of the work-piece in said slot and power means for rotating said spindle.



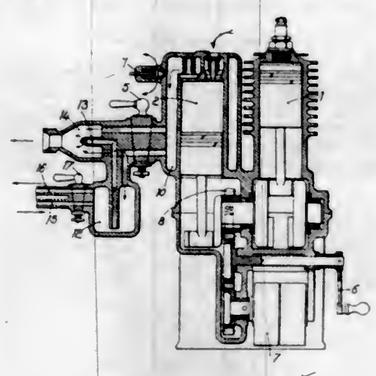
1,678,750. GOLF CLUB. DONALD SWAN, Grosse Ile, Mich. Filed Mar. 14, 1928. Serial No. 261,427. 1 Claim. (Cl. 273—77.)

In a golf club, a flat metal blade, an integral flange of substantially triangular shape formed on the upper edge of said blade and overhanging the striking face of



the latter, said triangular overhanging flange being in a plane substantially at right angles to the plane of said blade and having its apex in a vertical plane substantially midway between the ends of said blade, said apex being at such distance from the striking face of said blade as to register substantially with a spot in the median plane of a ball to be struck.

1,678,751. METHOD OF DISTILLING OIL SHALE AND PROVIDING A RAW MATERIAL SUITABLE FOR THE MANUFACTURE OF HYDRAULIC CEMENT. OSKAR TETENS, Oerlinghausen-Lippe, Germany, assignor to the Firm Record Cement-Industrie G. m. b. H., Frankfort-on-the-Main, Germany. Filed Sept. 19, 1924, Serial No. 738,729, and in Germany July 14, 1924. 4 Claims. (Cl. 202—16.)

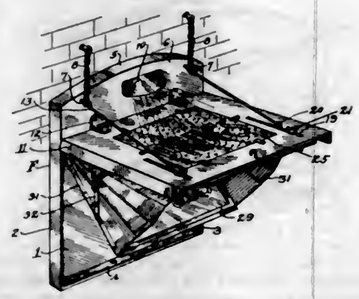


1. The method of distilling oil shale and producing a raw material suitable for the manufacture of hydraulic cement, which comprises burning the shale mixed with the non-combustible calcareous material, cooling the combustion zone by a confined body of water surrounding the same and simultaneously producing steam therefrom, and maintaining a column of said mixture above and in contact with said zone, and obtaining oil from such column by the hot gases ascending from the zone, and discharging from the zone a raw material suitable for the manufacture of hydraulic cement.

1,678,752. INSULATING CAP FOR THE JOINTS OF ELECTRICAL CONDUCTORS. FREDERIK MARINUS VAN GELDEREN, Enschede, Netherlands. Filed Oct. 18, 1927. Serial No. 226,974. 5 Claims. (Cl. 173—263.)

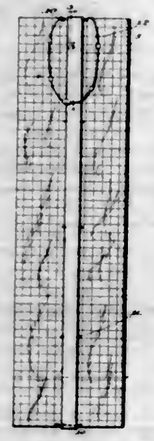
1. An insulating cap of the type including a body of insulating material having a cavity therein, and a metallic insert in said cavity, said insert having an internally threaded tapered passage therethrough for receving and binding the bare ends of electrical conductors when the cap is applied thereto and rotated, characterized by the fact that said body of insulating material is provided with a well below said cavity for receiving the ends of conductors which protrude beyond said cavity and the metallic insert therein.

1,678,753. AUTOMATIC STARTING DEVICE FOR INTERNAL-COMBUSTION ENGINES. PAUL VIET, Billancourt, France. Filed Mar. 23, 1926, Serial No. 96,795, and in France Apr. 4, 1925. 3 Claims. (Cl. 123—179.)



1. An automatic starting device for internal combustion engines comprising, a fuel feeding device connecting with the engine, an air supply, an air compressor in connection with the air supply, a conduit establishing communication between said compressor and the fuel feeding device, a fuel supply, a fuel sprayer connected with said fuel supply interposed in the conduit and responsive to the air of the compressor, an auxiliary motor for driving said compressor, a magneto associated with said compressor, and starting means associated with said magneto and the crank shaft of said auxiliary motor adapted upon movement in one direction to actuate both the magneto and the auxiliary motor and upon movement in the other direction to actuate only the magneto.

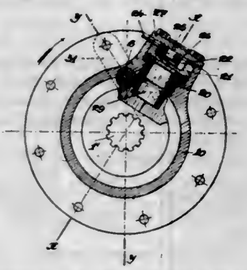
1,678,754. COMBINATION CIGARETTE HOLDER AND PIPE. WILLIAM WALKER, Sawtelle, Calif. Filed Mar. 3, 1927. Serial No. 172,342. 3 Claims. (Cl. 131—12.)



1. In a smoker's appliance of the class described, a smoke conducting and treating member adapted for disposition between a mouth-piece and a source of smoke production, said member embodying a pair of centrally bored couplings fitted into the ends of a hollow connecting member and forming a smoke-conducting and treating chamber, separate tubes carried by said couplings and having their inner ends projecting into said chamber, purifying sponges located in said chamber, and means for detachably connecting said sponges with the inner ends of said tubes.

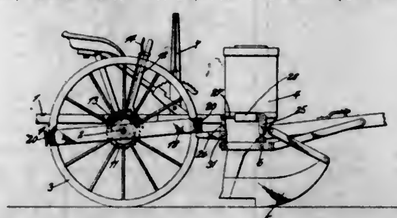
1,678,755. ILLUMINATED SIGN. JOHN W. WHISENANT, Los Gatos, Calif. Filed Dec. 29, 1927. Serial No. 243,334. 5 Claims. (Cl. 40—130.)

1. A sign comprising a support having a frame hinged thereto, a transparent plate in said frame, a stencil on one face of said plate, a mirror adjustable angularly relative to said frame, and means for holding said frame in its angularly adjusted position.



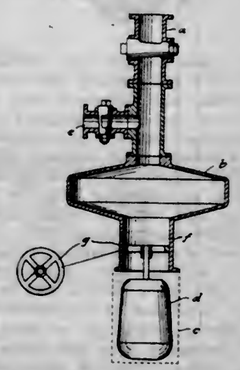
1,678,756. CLOTH PATTERN. WILLIAM J. ZIMMERMAN, Knoxville, Tenn. Filed June 9, 1927. Serial No. 197,755. 10 Claims. (Cl. 35—17.)

1. As a new article of manufacture, a cloth pattern comprising a folded piece of material, and a removable panel extending longitudinally of the pattern and disposed thereon.



1,678,757. POWER-TRANSMISSION MECHANISM FOR THE DRIVING WHEELS OF MOTOR VEHICLES. ALEXANDER ABRAMSON, Prague, Czechoslovakia. Filed Apr. 18, 1927, Serial No. 184,799, and in Czechoslovakia Sept. 18, 1926. 8 Claims. (Cl. 74—7.)

1. A transmission and differential mechanism comprising a casing rotatably mounted and having a driving gear mounted thereon to rotate therewith; half axles associated with said casing; a driving member on the end of each axle and arranged adjacent each other in said casing, each driving member having an angular recess therein; a spring-controlled pin rotatably mounted in said casing and having a semi-circular lower end which projects into the recess in the driving members; and a

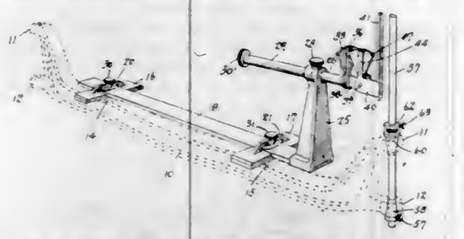


driving pin mounted in said casing against which the driving members are adapted to abut to drive the casing and gear by means of the axles.

1,678,758. ATTACHMENT FOR CHECKROW PLANTERS. WILLIAM J. BARCLAY, Springfield, Mo., assignor of one-half to W. A. King, Springfield, Mo. Filed Feb. 24, 1925. Serial No. 11,267. 1 Claim. (Cl. 111—16.)

In a planter having a rotary axle, a ground wheel selectively connected to said axle and a seed valve rock shaft; an attachment for turning the seed valve rock shaft in one direction comprising a lever attached to said shaft; a bell crank lever; an elastic connection for operating said first lever by said bell crank lever; comprising a tube pivoted to the lever, a rod connected to the bell crank lever and projecting into the tube, and a spring retarding the withdrawal of the rod from the tube and a marker rigid on said axle and arranged to operate said bell crank lever when said axle is rotated by said ground wheel.

1,678,759. MANUFACTURE OF HOLLOW BODIES FROM FIBROUS MATERIAL PULP. FRIEDRICH WILHELM BAUMGÄRTNER, Berlin-Schoneberg, Germany, assignor to F. A. Baumgartner, Dr. Katz & Co. G. m. b. H., Eiswerder-Spandau, Germany. Filed Apr. 21, 1923, Serial No. 633,660, and in Germany Nov. 16, 1922. 2 Claims. (Cl. 92—54.)



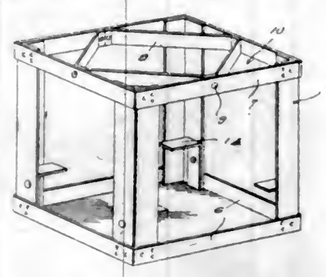
1. Apparatus for molding hollow pulp bodies having smooth interior surfaces comprising a lower, permeable

mold, an upper container, a body disposed in the mold to diminish the space within the mold, and means for introducing gas under pressure into the container.

1,678,760. PROCESS FOR THE PREPARATION OF ARSENIC COMPOUNDS. ARTHUR BINZ, Berlin, and CURT RÄTH, Rangsdorf, Germany. Filed July 13, 1926, Serial No. 122,266, and in Germany July 22, 1925. 4 Claims. (Cl. 260—15.)

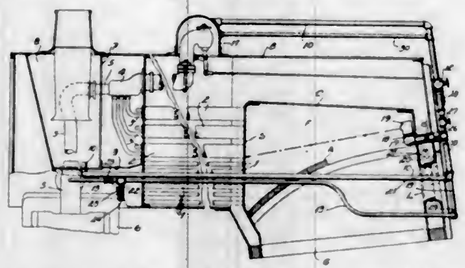
1. Process for the preparation of arsenic compounds containing the group —As=As— which comprises reducing an organic arsonic acid in the presence of an organic arsine containing the group $-AsH_2$ by means of a reducing agent.

1,678,761. AXLE GAUGE. ROY P. BERNHARDT and VICTOR D. BLACK, Jr., Livermore, Calif. Filed Dec. 8, 1926. Serial No. 153,412. 3 Claims. (Cl. 33—193.)



1. In a gauge of the character described, a supported member having a sector mounted transversely at one end thereof, a second member mounted co-axially with and revolvable relative to the first member and having a pointer movable over said sector and a second sector co-planar with the second member and a third member pivoted to the second member having a pointer movable over the second sector and having a gauge element associated therewith.

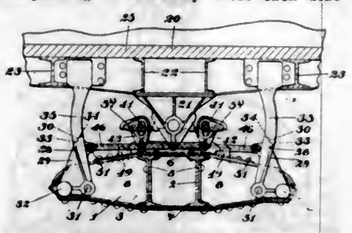
1,678,762. GOLF REGISTER. BERNHARD M. BESKOW, New Haven, Conn. Filed June 13, 1923. Serial No. 645,093. 6 Claims. (Cl. 235—122.)



1. In a golf stroke register, the combination with a suitable casing, of a dial pivotally mounted within said casing and provided with numerals, said casing comprising a face plate having an opening through which said numerals may successively become visible as said dial is rotated, a ratchet wheel rotatable with said dial, a returning spring connected with said dial, a lever within said casing, an operating pawl for said ratchet wheel carried by said lever, a detent pawl normally preventing backward movement of said ratchet wheel under the influence of said returning spring, means for yieldingly holding said pawls in engagement with said ratchet wheel, a slide-bar connected with said lever and with both of said pawls and by the movements of which slide bar said ratchet wheel may be operated and the detent pawl be disengaged from said ratchet wheel, and a double-acting, normally-balanced spring engaging said slide bar.

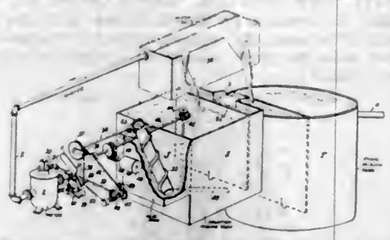
1,678,763. CHEMICAL CAN RACK FOR ICE-CREAM CABINETS. THOMAS P. BOLGER, Gloucester, Mass. Filed Aug. 17, 1927. Serial No. 213,569. 1 Claim. (Cl. 220—1.)

A can supporting rack for ice cream cabinets comprising a substantially square shaped frame composed of a plurality of vertically disposed angle iron corner posts, a pair of strips of strap iron arranged in spaced relation about the outer edges of said corner posts, whereby to form continuously extending upper and lower horizontal frame members, an inner horizontal, substantially square shaped frame member formed of a strip of strap iron having its corners attached to the inner side of said upper horizontal frame member approximately midway of the corner posts, whereby to form substantially triangular shaped compartments between said inner and outer upper frame members and adapted to receive a triangular shaped container within each of said compartments, the area defined by the inner upper frame member being adapted to vertically support an ice cream can, and a supporting bracket carried by each of said corner posts above the lower end thereof, and extending inwardly of said compartment.



1,678,764. SMOKE CONSUMER AND SOOT BLOWER. WILLIAM D. BOYCE, New York, N. Y. Filed Mar. 6, 1926. Serial No. 92,883. 4 Claims. (Cl. 110—80.)

1. In combination with a locomotive boiler and firebox, the latter being bounded on the top by a crown-sheet, on the rear by a water-leg and on the front by a flue-sheet, suitable openings in the water-leg for admitting atmospheric air to the fire-box, a jet nozzle disposed in said fire-box above the arch and in close proximity to the crown-sheet, said nozzle being arranged to direct a jet of steam toward the flue-sheet, means for adjusting said nozzles to any position in three planes to vary the line of steam projection, and suitable connections between said nozzle and locomotive steam pipe for supplying steam to the nozzle.

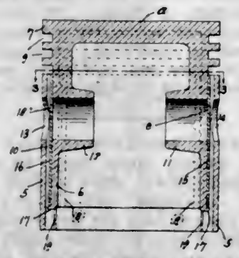


1,678,765. DUMP CAR. WILLIAM L. BURNER, Koppel, Pa., and OSCAR E. KANTENWEIN, Oak Park, Ill., assignors to Koppel Industrial Car and Equipment Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Aug. 21, 1925. Serial No. 51,582. 22 Claims. (Cl. 105—271.)

1. In a dump car, an underframe, a body mounted on said underframe and tiltable toward one side or the other thereof, pressure operated means on each side of the longitudinal center line of the car for operating said body, each of said means comprising a pressure cylinder, a member depending downwardly from each side of said

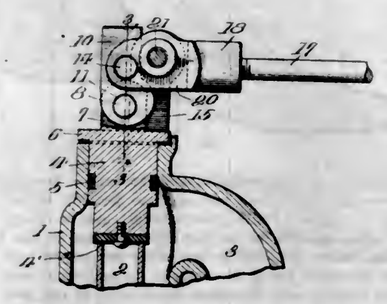
body, one of said members being adapted to be engaged by one of said means for tilting said body toward one side, and the other of said members being adapted to enter the cylinder of the other of said means when the body is being tilted.

1,678,766. PROCESS OF AND APPARATUS FOR TREATING WATER. GEORGE CAWLEY, Montclair, N. J., assignor to The Permutit Company, New York, N. Y., a Corporation of Delaware. Filed Dec. 7, 1926. Serial No. 153,147. 9 Claims. (Cl. 210—29.)



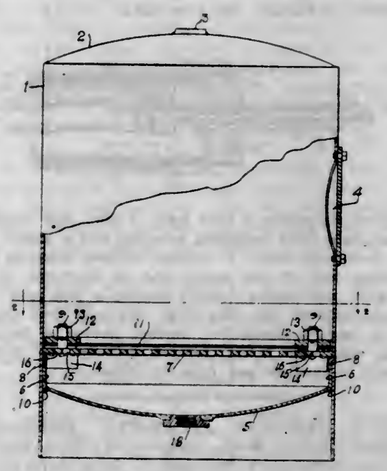
1. The process of adding accurately proportioned amounts of acid to water which comprises measuring a continuously flowing body of water, dividing the flow into a major portion and a minor portion, adding to and mixing with the minor portion a regulated amount of acid proportionate to the flow of water, and then uniting the acid-treated minor portion with the major portion of the water.

1,678,767. PROCESS OF MAKING ALKALI-METAL HYDROXIDES. LEO P. CURTIN, Freehold, N. J. Filed Apr. 24, 1926, Serial No. 104,481. Renewed Jan. 17, 1928. 2 Claims. (Cl. 23—185.)



1. Process of making alkali-metal hydroxides comprising agitating an aqueous suspension of lead monoxid while adding an alkali-metal sulfid, and regulating the rate of supply of sulfid to avoid substantial accumulation of sulfid ions in solution.

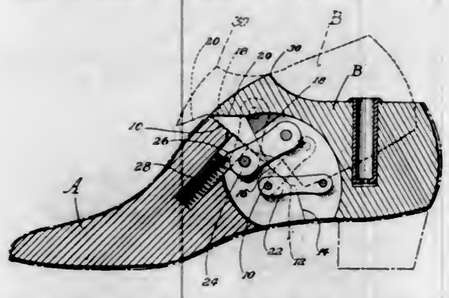
1,678,768. PISTON. LEWIS R. DAVIS, San Francisco, Calif. Filed May 3, 1926. Serial No. 106,503. 5 Claims. (Cl. 74—108.)



1. A piston comprising a head having an integral reduced lower end portion constituting an inner skirt, an outer skirt conforming in cross-sectional area to the head and surrounding the inner skirt and disposed in spaced relation thereto, a rib disposed in the space between the outer and inner skirts and rigidly secured thereto for supporting the outer skirt and operating to conduct heat from the inner to the outer skirt, the said inner skirt being interiorly provided with oppositely disposed open-ended wrist pin bearings and the outer skirt having wrist pin openings alining with said bearings, and plates disposed in the space between said outer and inner skirts and arranged over the outer ends of said bearings.

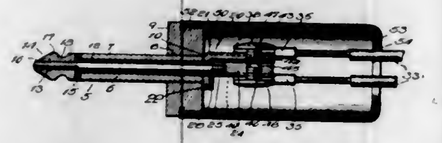
1,678,769. FLOAT VALVE. EDWARD L. DELANY, Brooklyn, N. Y. Filed Apr. 11, 1927. Serial No. 182,918. 12 Claims. (Cl. 137—104.)

4. A float valve comprising a casing, a cast valve therein having an upwardly extending reduced portion provided with cast trunnions, a cast compensating link adapted to receive said trunnions, and having trunnions cast therewith, a cast float lever pivotally connected to the casing, and adapted to receive the trunnions carried by the compensating link.



1,678,770. TANK. CHARLES P. EISENHAUER, Dayton, Ohio, assignor to The Duro Company, Dayton, Ohio, a Corporation of Ohio. Filed Oct. 12, 1925. Serial No. 61,994. 4 Claims. (Cl. 210—149.)

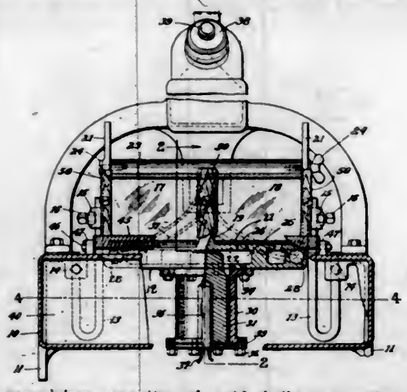
1. In a method of manufacturing tanks, attaching a grating to the inside flange of the end of a tank, inserting the grating and end within one end of the tank, attaching the end to the tank, galvanizing the tank and end,



inserting a screen through a hand hole in the side of a tank, placing the screen upon said grating so as to cover substantially the entire area thereof and removably fastening the screen to said grating.

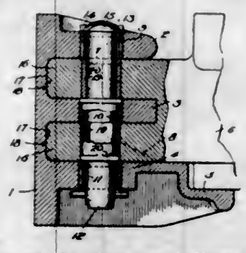
1,678,771. LAST. GUY B. FITZ, Auburn, Me., assignor to Fitz-Empire Double Pivot Last Company, Auburn, Me., a Corporation of Maine. Filed May 14, 1925. Serial No. 30,209. 1 Claim. (Cl. 12—136.)

A hinge last comprising a heel part and a forepart relatively constructed and arranged to provide a full cone having a substantially continuous surface along the front upper portion of the last from the ball to the tip of the cone when the last is extended, the upper rear face of the forepart being in a plane intersecting said continuous surface and the upper front face of the heel part being in two intersecting planes forming a recess in said face, and bonding mechanism comprising two links, one above the other, each pivoted in both last parts, and constructed and arranged to effect relative movement of the heel part and the forepart, so arranged as to bring the upper rear face of the forepart substantially into the lower of the planes forming the recess while the upper rear edge of the forepart is substantially grazed by the portion of the front surface of the heel part in the upper of the two planes forming the recess.



1,678,772. TELEPHONE PLUG. HERBERT H. FROST, Chicago, Ill., assignor, by mesne assignments, to Chicago Telephone Supply Company, Elkhart, Ind., a Corporation of Delaware. Filed Dec. 1, 1924. Serial No. 753,031. 1 Claim. (Cl. 173—361.)

A plug comprising a plub body, a plug post extending through said body including a needle and a sleeve insulated from each other, a terminal bracket threaded upon the inner end of the needle and in electrical contact therewith, an angular bracket having a base and a leg clamped between the plug body and said first bracket, and an angular insulating bracket having a base and a leg, said base being clamped between the terminal brackets to insulate one from the other.



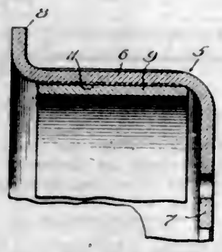
1,678,773. TREATING APPARATUS. FREDERICK M. FURBER, Revere, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Sept. 8, 1923. Serial No. 661,683. 19 Claims. (Cl. 12—1).

1. A treating apparatus comprising a flash-boiler and a water reservoir both open to the atmosphere and in communication with each other and arranged to hold the water in equilibrium when the boiler is not functioning,

the vaporizing capacity of said boiler exceeding the maximum rate of flow of water from the reservoir to the boiler.

1,678,774. CAR COUPLER. ENOCH GEORGE, Jr., Pittsburgh, Pa., assignor to The McConway & Torley Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed June 29, 1926. Serial No. 119,393. 3 Claims. (Cl. 213—6.)

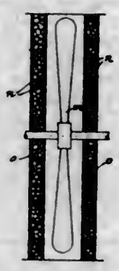
1. In a device of the character indicated, the combination with a coupler pocket having a plurality of pivot lugs disposed with relation to each other so as to provide a plurality of intervening spaces for receiving corresponding portions of the shank of a car coupler, of a car coupler having spaced pivot lugs meshing with said lugs of the coupler pocket, bushings respectively associated with said pivot lugs, said bushings and lugs having shouldered engagement, and a pin extending through said lugs and bushings for pivotally connecting the coupler pocket and car coupler, said spaces between the lugs of the coupler pocket being of greater height than the vertical thickness of the pivot lug intervening between said spaces.



1,678,775. STORAGE AND TRANSPORTATION OF ACID MIXTURES IN STEEL DRUMS. JAMES H. GRAVELL, Elkins Park, Pa. Filed Dec. 11, 1925. Serial No. 74,898. 8 Claims. (Cl. 23—5.)

5. A composition of matter for preventing the action of acid solutions on steel drums comprising an admixture of a metal below iron and above mercury in the electromotive series and an acid regulator.

1,678,776. METAL PICKLING. JAMES H. GRAVELL and ALFRED DOUTY, Elkins Park, Pa.; said Douty assignor to said Gravell. Filed Nov. 12, 1926. Serial No. 148,093. 14 Claims. (Cl. 148—8.)

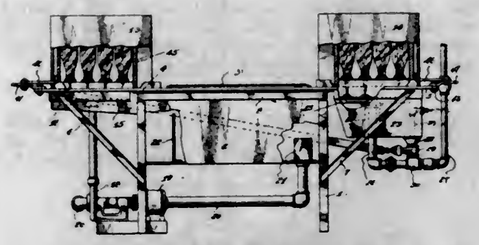


1. An acid pickling bath for metal containing stannous tin in limited quantity substantially as described sufficient to selectively control the bath and insufficient to cause the bath to dissolve scale.

1,678,777. BRAKE DRUM AND LINER. FREDERICK D. HANSEN and HERBERT W. TINKER, Milwaukee, Wis., assignors to Federal Pressed Steel Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Sept. 15, 1927. Serial No. 219,635. 13 Claims. (Cl. 188—218.)

1. A brake drum provided with a flange having a high coefficient of expansion and a liner having a relatively low coefficient of expansion and partially insulated from said flange so that the liner and flange expand and contact together substantially the same extents.

1,678,778. APPARATUS FOR CARRYING OUT CHEMICAL REACTIONS BETWEEN GASES OR VAPORS, OR GASES AND VAPORS. HANS HARTER, Wurzburg, Germany. Filed July 27, 1926, Serial No. 125,306, and in Germany Mar. 5, 1925. 2 Claims. (Cl. 23—288.)

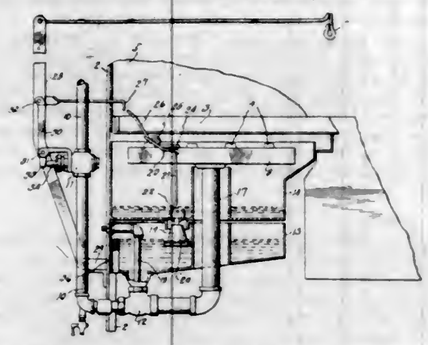


1. Apparatus for carrying out reactions between gases or vapors or gases and vapors comprising a propeller carrying a catalytic material and adapted to aspirate, subdivide and mix the said gases and vapors, means for supplying gases or vapors to the said propeller, and means for conducting away the reaction products.

1,678,779. DENTIAL BRIDGE. CLIFFORD S. KILE, Hutchinson, Kans. Filed Dec. 31, 1925. Serial No. 78,599. 10 Claims. (Cl. 32—9.)

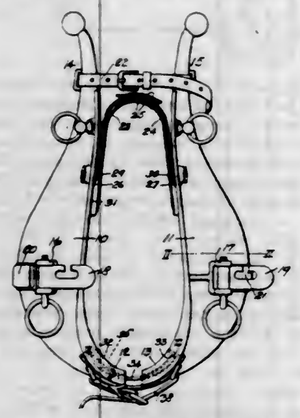
1. A dental bridge having an artificial-tooth retaining-shell open only at its outer side and its gum side, said shell having an inner wall portion, a pair of opposed side walls divering outwardly from said inner wall portion, and an inclined wall portion extending outwardly from and at an obtuse angle to said inner wall portion, said side walls having ribs on their inner faces spaced from and substantially parallel with said inclined wall portion, said ribs increasing in height from their outer to their inner ends; and an artificial tooth whose body portion is fitted snugly into said shell and is provided with tapered grooves receiving said ribs, said tooth projecting beyond the shell for engagement with the gum, the portion of the tooth thus projecting being of substantially the same cross-sectional size as the corresponding portion of the natural tooth which it replaces, said shell having an occlusal portion covering and protecting the occlusal or biting end of the artificial tooth, the latter having vertical edge portions extending across the outer edges of said side walls.

1,678,780. BOTTLE WASHING, RINSING, AND STERILIZING APPARATUS. JOHN W. LADD and CARL C. JORDAN, Detroit, Mich., assignors to John W. Ladd Company, Detroit, Mich., a Corporation of Michigan. Filed Mar. 18, 1927. Serial No. 176,316. 12 Claims. (Cl. 141—7.)



1. In apparatus of the character described, a header having a plurality of nozzles, a support for a bottle case thereabove, an open ended hood into which a case of bottles may be introduced, a steam line connected with the said header, a valve in the steam line, a tank enclosing the header, said tank being provided with an overflow whereby it may contain only a limited volume of water, a discharge conduit in the bottom of the tank, a valve therein, an ejector in the steam line with which the discharge conduit discharges, a cold water inlet discharging into the said tank outlet, means whereby the positioning of a bottle case over the header automatically opens the steam valve whereby when the outlet valve is open the ejector continuously discharges the water of the tank and steam into and about the said bottles and on closing of the valve of the discharge conduit causes the water to cease to flow and steam only is discharged into and about the bottles, and means for ejecting the case from position over the sterilizing header and simultaneously closing the steam valve.

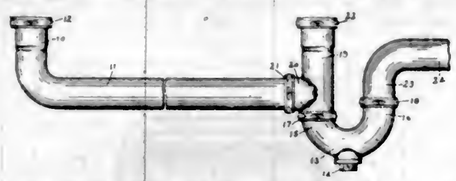
1,678,781. BOTTLE-WASHING MACHINE. JOHN W. LADD, HENRY B. WILLIAMS, and CARL C. JORDAN, Detroit, Mich., assignors to John W. Ladd Company, Detroit, Mich., a Corporation of Michigan. Filed Mar. 18, 1927. Serial No. 176,350. 11 Claims. (Cl. 141—7.)



1. In a bottle washing machine, an upper reservoir, a lower reservoir adapted to contain a definite amount of water, a track over the upper reservoir by means of which a case containing bottles in inverted position may be moved over the upper reservoir, a spray-head having a multiplicity of jets corresponding to the number of bottles in the case and adapted to discharge into the bottles, a steam operated ejector adapted to withdraw the water from the lower reservoir and discharge it through the jets of the spray head, a valve for controlling flow of steam to the ejector, a control member for the said valve adapted to be actuated by the case to open the valve as the case is moved into position over the spray head, the upper reservoir providing a recepta-

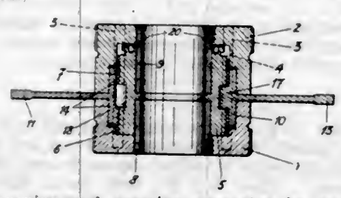
cle for the water falling from the bottles and having an outlet discharging into the lower reservoir, a valve controlling the said outlet and an actuating member for the said valve adapted to be engaged by the bottle case,

the arrangement being such that as the case is moved to position over the spray head the steam valve is opened and the outlet valve is closed and upon withdrawal of the case the outlet valve is opened.



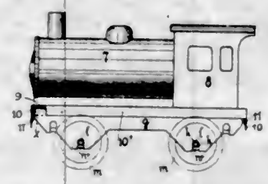
1,678,782. COMBINATION COLLAR AND HAME. JOHN D. MCMURRY, Memphis, Tenn. Filed July 25, 1927. Serial No. 208,202. 6 Claims. (Cl. 54—18.)

1. In a combination collar and hame, two oppositely disposed halves of rigid material, each having the lower portion shaped to conform to an animal's neck and shoulder, top and bottom draft fastenings for the said halves, and a support comprising oppositely disposed flexible bands of substantial width, means joining said bands at the top, a metal plate attached to each of the said bands and a pivot extending through each of the said plates to attach the same to one of said halves.



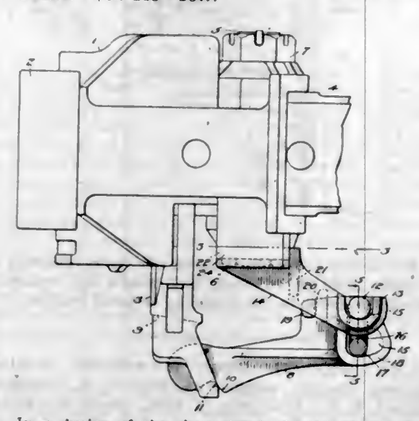
1,678,783. WASTE CONNECTION. ERASTUS G. OAKLEY, Southport, Conn., assignor to Bridgeport Brass Company, Bridgeport, Conn. Filed Mar. 22, 1927. Serial No. 177,330. 1 Claim. (Cl. 182—18.)

A combined sink and tray waste comprising a T member having a vertically disposed inlet for connection with the outlet of a sink or tray and a horizontally disposed inlet for connection to the outlet of the other of said members, a U shaped trap member, a swivel connecting one end of the U shaped member to the outlet of the T member, said swivel being carried closely adjacent the horizontally disposed inlet, an L shaped outlet member, a second swivel connecting the other end of the U member to said L shaped outlet, said second named swivel being carried above the first named swivel, whereby when standard types of L fittings are secured



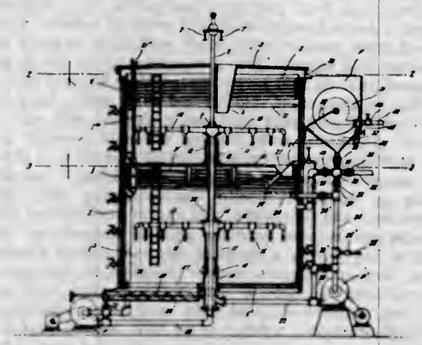
to said second named swivel the outlet portion of the L member will be above the horizontal inlet of the T member, whereby the latter may be sealed by the water in the trap.

1,678,784. TONGUING AND GROOVING APPARATUS. WILHELM OHNO, Seebach-Zurich, Switzerland. Filed July 9, 1927. Serial No. 204,609. 5 Claims. (Cl 144—233.)



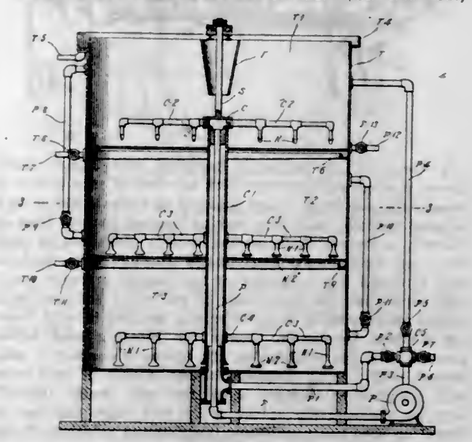
1. A tonguing and grooving apparatus by means of which grooves and tongues of different widths can be produced accurately and cleanly, comprising in combination a threaded cylinder having left-handed and right-handed threads and a circular groove between said threads, a casing in which said cylinder is rotatably mounted, a milling blade composed of three parts, one of said parts engaging with the left-handed thread, another of said parts engaging with the right-handed thread, a projection on the inner surface of the parts and guided in said circular groove of said threaded cylinder so that by rotating said cylinder said parts of the milling blade are moved towards and away the one from the other in the axial direction according to whether narrower or wider tongues and grooves have to be cut.

1,678,785. TOY VEHICLE. HANS PFAFFENBERGER, Nuremberg, Germany. Filed Mar. 31, 1927, Serial No. 179,976, and in Germany Apr. 10, 1926. 3 Claims. (Cl. 46—48.)



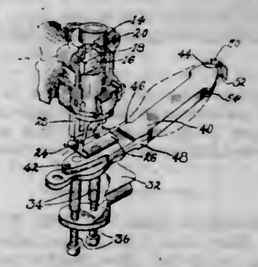
1. An under-frame for toy vehicles running on roads and for toy vehicles running on rails, a downwardly directed flange on each long side of said under-frame said flange having two pairs of slots upwardly extending from the lower edge of said flange and forming at the upper end one half of an axle bearing the slots of the one pair being spaced at other distance and being of other height than the slots of the other pair, a slidable plate on said under-frame, a downwardly directed flange on each long side of said plate said flanges having each two pairs of angular slots open at the lower end each slot composed of a vertical arm and of an upper horizontal arm forming together a locking nose the vertical arms of said slots being spaced at the same distance and being of the same height as the vertical arm of the corresponding slots in said flanges of said under-frame, said under-frame and slidable plate adapted to combine selectively with either one of a plurality of sets of wheels to represent the wheel sets for vehicles running on roads or on rails said sets of wheels being locked in position by the noses of the corresponding slots, and with either one of a plurality of carriage bodies to represent any kind of vehicles running on roads or on rails, and means for securely holding a carriage body on said under-frame.

1,678,786. COUPLER RELEASE RIGGING. WILLIAM J. REGAN, Wilkinsburg, Pa., assignor to The McConway & Torley Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed July 24, 1925. Serial No. 45,909. 7 Claims. (Cl. 213—167.)



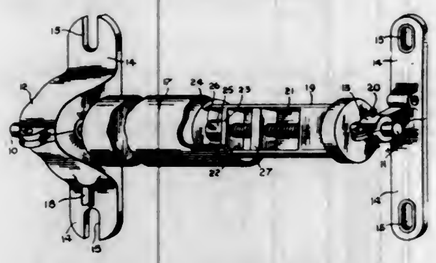
1. In a device of the character indicated, the combination with a car coupler involving a head, a knuckle and means for locking said knuckle in closed position, of mechanism for moving said knuckle locking means to unlocked position, said mechanism including a pivoted member which engages and is adapted to actuate said means, and means forming a stop for cooperating with said pivoted member to prevent said knuckle locking means for accidentally assuming unlocked position, said knuckle locking means being movable with respect to said stop means and the latter being adapted to cooperatingly engage said pivoted member at a point intervening between the pivot of said member and its point of engagement with said knuckle locking means.

1,678,787. LEACHING APPARATUS. WALTER L. REMICK, Philadelphia, Pa. Filed Sept. 17, 1925. Serial No. 56,916. 3 Claims. (Cl. 23—268.)



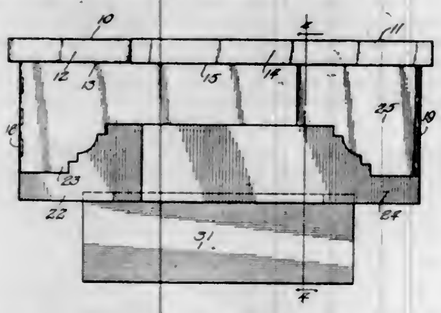
1. In an apparatus for the removal of soluble constituents of solids, the combination of means for passing the solids through a solution in two successive stages; means for filtering the solution; means for re-introducing the filtered solids into the unfiltered solution at a point at which the solids are passing through said solution in the secondary stage; and means for re-introducing the filtered solution into the unfiltered solution at a point at which the solids are passing through said solution in the primary stage.

1,678,788. PROCESS OF AND APPARATUS FOR THE TREATMENT OF SOLID-BEARING LIQUIDS. WALTER L. REMICK, New York, N. Y. Filed May 10, 1926. Serial No. 108,042. 4 Claims. (Cl. 210—55.)



1. A process for the treatment of solid bearing liquids which consists in circulating the liquid in a receptacle by withdrawing a portion of the liquid from the upper part of the receptacle and discharging it into the lower part of the receptacle; allowing the solids in the liquid to settle upon the bottom of the receptacle; withdrawing a portion of the liquid from the receptacle and discharging it into the lower part of a second receptacle; allowing the solids in the liquid in the second receptacle to settle upon the bottom of the second receptacle; withdrawing the settled solids from the bottom of the second receptacle; commingling the solids withdrawn from the second receptacle with the settled solids in the first receptacle; and withdrawing the commingled solids from the first receptacle.

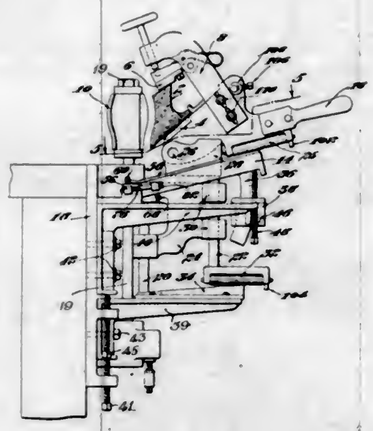
1,678,789. WORK LOCATING AND PUNCHING APPARATUS. ERNEST E. SABIN, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Dec. 22, 1922. Serial No. 608,573. 8 Claims. (Cl. 164—90.)



1. In apparatus of the character described, a punch, a sole positioning member arranged in predetermined relation to the punch and having an outside contour coinciding at one or more places with the inside contour of the rib of an insole, and means for reciprocating the punch to form a locating hole in an insole positioned by said member.

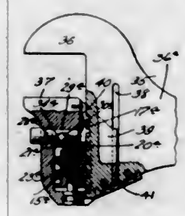
1,678,790. AWNING-ROLLER AUTOMATIC STOP. JOSEPH T. SALESSE, Ottawa, Ontario, Canada. Filed Feb. 2, 1926. Serial No. 85,461. 1 Claim. (Cl. 156—44.)

A device of the character described including a roller sleeve, a shaft section rigid with one end of said sleeve, a removable core fitted in the opposite end of said sleeve and secured thereto, said core having spaced pockets formed therein, a second shaft section loosely journaled in said core and extending longitudinally through said pockets and threaded for a portion of its length, brackets bearings supporting the outer ends of said shaft sections, said second shaft section being normally secured in said bearing against movement, means for rotating said roller sleeve and a nut working on the threaded portion of said second shaft, being disposed in one pocket of said core and adapted to contact with the side walls thereof, whereby the rotation of the roller will cause the nut to travel on said shaft, said nut limiting the rotation of the roller upon contact with the end walls of said pocket, said second shaft being releasable from its bracket bearing to permit adjustment of said nut on said shaft.



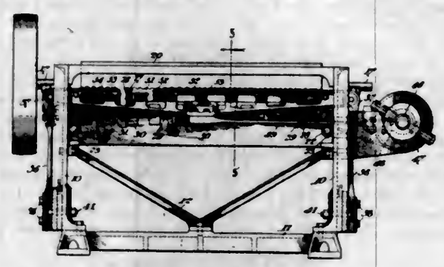
1,678,791. COLLAPSIBLE RADIATOR COVER. LESTER J. SCHRAM, Chicago, Ill. Filed Aug. 4, 1927. Serial No. 210,614. 3 Claims. (Cl. 237—79.)

1. In a radiator cover, the combination of a telescoping top member, telescoping front and back members, end members hinged to the front and back members, and means for detachably securing the end members to the top members.



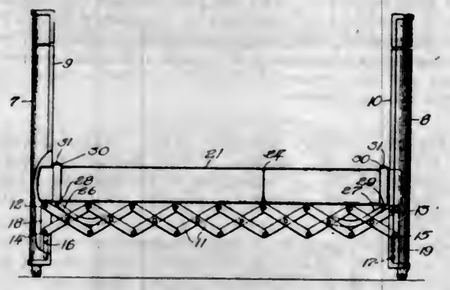
1,678,792. MACHINE FOR TURNING WOOD HEELS. WESLEY J. SHAW, Haverhill, Mass., assignor, by mesne assignments, to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Mar. 28, 1923. Serial No. 628,200. 14 Claims. (Cl. 12—87.)

1. A machine of the class described having, in combination, a frame, a cutter, a jack adapted to swing vertically and horizontally about the cutter to present different portions of an article clamped thereby to the cutter, a cam track for controlling the vertical swinging movement of the jack, along which cam track the jack is adapted to swing, removably mounted upon the frame,



means whereby the inclination of the track relatively to the frame may be adjusted, and means for releasably securing the track to the frame in adjusted position.

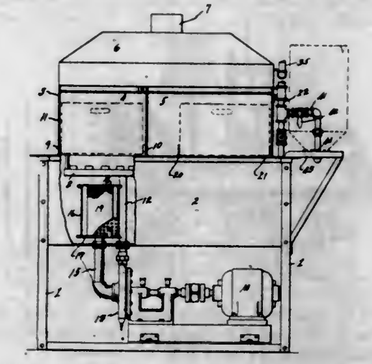
1,678,793. WRENCH. HENRY W. SWITZER, Hamilton, Ontario, Canada, assignor to William H. Heimbach, Snyder, N. Y. Filed Mar. 4, 1926. Serial No. 92,142. 3 Claims. (Cl. 81—165.)



1. In a wrench having a member provided with a fixed jaw, and a movable member having a jaw shiftable toward and from said fixed jaw, the combination of a threaded operating screw journelled on said movable member, teeth on said other member with which said screw engages for actuating said movable jaw, a tapered seat on the latter, a tapered part on said screw engageable with said seat, a flat face on the end of said tapered part, means for yieldingly holding said part frictionally against said seat to prevent said screw from turning and said movable jaw from shifting when pressure is applied thereto in a direction away from said fixed jaw, said movable member having an aperture therein communicating with said tapered seat and into which said end of said tapered part projects, an endwise movable plunger disposed in said aperture and having a recess in one side thereof forming a cam face, a rotatable member disposed in said recess and engaging the side of said tapered screw part and said cam respectively, and said cam being adapted to move said cotatable member along said tapered part and upon said end face thereof to move said part away from said tapered seat upon endwise movement of said plunger, whereby said movable jaw may be moved away from said fixed jaw.

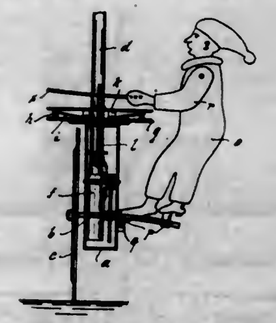
1,678,794. COTTON GIN. GUS ELLIS TALLEY, Phoenix, Ariz., assignor of one-half to William Alanzo Bennett, Phoenix, Ariz. Filed Dec. 7, 1926. Serial No. 153,163. 9 Claims. (Cl. 19—51.)

1. In a cotton gin of the character set forth, the conbination with a rotatable gin roller and means for rotating it in a predetermined direction, of a stationary upstanding knife member having its upper edge located along the downwardly moving face of the roller, an upstanding longitudinally movable stripper blade located alongside the knife member, means for reciprocating the stripper blade, a feed table for delivering seed cottom to the downwardly moving face of the roller over the upper edges of the knife and stripper blade, said table being movable with the stripper blade, said downwardly moving face of the roller acting to draw the fiber downwardly over the upper edges of the knife member and stripper blade, and means for mounting the table and knife in spaced relation to permit the seed to pass between them.



1,678,795. BED. MINIFRED DAWES THOMAS, Chicago, Ill. Filed June 9, 1927. Serial No. 197,631. 7 Claims. (Cl. 5—182.)

1. The combination with the head and foot of a bed, of side members comprising lazy tongs, means for connecting the lazy tongs with the head and foot to permit the head and foot to be moved toward and away from each other, a series of transverse slats carried by said side members, a hinged mattress adapted to be supported in horizontal position by said slats and means operatively connected to the side members for raising the ends of the mattress when the head and foot are moved toward each other.

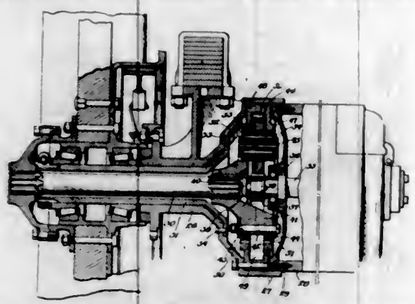


1,678,796. BOTTLE-WASHING MACHINE. HENRY B. WILLIAMS, Detroit, Mich., assignor to John W. Ladd Co., Detroit, Mich., a Corporation of Michigan. Filed July 26, 1926. Serial No. 124,844. 10 Claims. (Cl. 141—7.)

1. A milk bottle washing machine consisting of a tank for cleansing solution, a hood mounted thereabove at about the upper surface thereof and at the rear side providing space in front of the hood for access to the tank, the said hood being provided with a partition dividing it in two chambers each open at the bottom and at the front side, guideways therein for bottle cases, spray heads beneath each guideway, the spray head under the first guideway being for a cleansing solution, means for circulating fluid from the tank and discharging it through the head from which it may fall again into the tank and a sterilizing head beneath the other section, a steam line

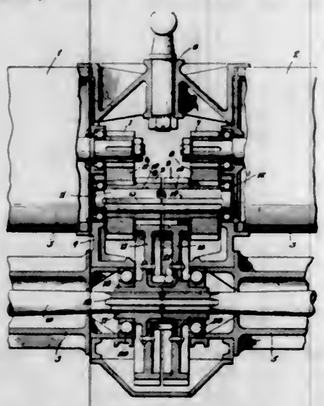
connected therewith, and means operable by contact with a bottom case positioned under the hood for opening the steam line.

1,678,797. SPARK-PRODUCING FIGURE WHEELED TOY. CARL ARNOLD, Nuremberg, Germany. Filed Sept. 29, 1927. Serial No. 222,907. 2 Claims. (Cl. 46—45.)



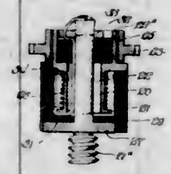
1. A toy consisting of a trundle hoop, comprising in combination with the hoop, a casing, a horizontal shaft journaled in said casing projecting at both ends from said casing carrying said hoop on one end and bent at the other projecting end, a driving mechanism in said casing comprising a vertical driven shaft projecting from the top end of said casing, a spark-producing mechanism above said driving mechanism consisting of a disk fixed on the top end of said casing, of a disk fixed on the projecting end of said vertical shaft, oscillatable levers attached to the lower side of said rotatable disk, a cerium stone at the outer end of each lever resting upon said emery disk, coloured transparent panes in said rotatable disk, a toy-figure on the bent projecting portion of said horizontal shaft, and a driving rod adapted to trundle said hoop and to operate said driving mechanism and said spark-producing mechanism and to impart to said toy-figure on said bent portion of the driving shaft up and down and backward and forward movements.

1,678,798. ART OF AND MEANS FOR EFFECTING POWER TRANSMISSION. AXEL HJ. ASPROOTH, Baltimore, Md., and ALFONSO M. LEONI, Philadelphia, Pa., assignors to Electro-Motive Devices, Inc., Philadelphia, Pa., a Corporation of New Jersey. Filed Feb. 27, 1923. Serial No. 621,581. 2 Claims. (Cl. 74—7.)



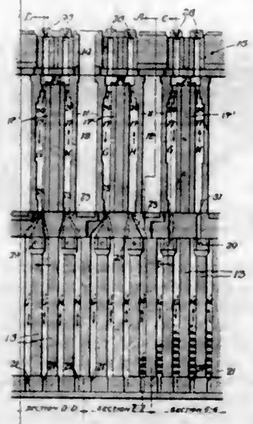
1. A vehicle drive embodying a centered driving shaft, a centered driven shaft, a standard hub, a motor casing, an intermediate housing having a shoulder opposite the motor casing, a bell shaped stiffening core or spindle for the

housing, an internal gear rigidly secured between said shoulder and the motor casing, a driving spider splined to the driven shaft, compound planets journaled in the



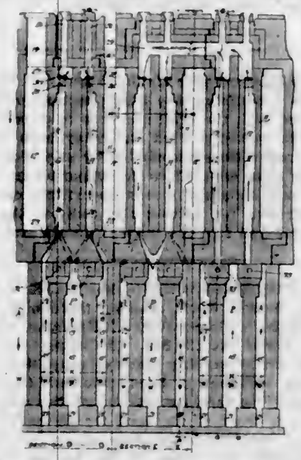
spider in operative relation with the internal gear, a driving pinion, and a bushing for centering the pinion to maintain uniformity of pitch line contact.

1,678,799. TWO-MOTOR DRIVE FOR VEHICLES. AXEL HJ. ASPROOTH, Baltimore, Md., and ALFONSO M. LEONI, Philadelphia, Pa., assignors to Electro-Motive Devices, Inc., Philadelphia, Pa., a Corporation of New Jersey. Filed Apr. 12, 1923. Serial No. 631,566. 6 Claims. (Cl. 74—7.)



1. In a two-motor drive for vehicles, motor pinions, an axle, final drive gears cooperating with the axle, and intermediate gearing including a rotatable countershaft, independent gear sets, and means for coupling one of the gear sets relatively to the countershaft.

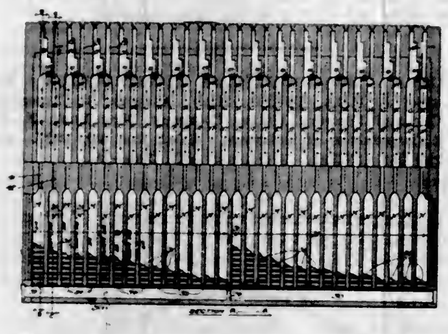
1,678,800. HEAT COIL. JOHN S. BAKER, Chicago, Ill., assignor to The Cook Electric Company, Chicago, Ill., a Corporation of Illinois. Filed Sept. 27, 1922. Serial No. 590,788. 16 Claims. (Cl. 200—124.)



1. A heat coil comprising a main supporting member, a second member surrounding said main member and thermally insulated therefrom, heat producing means upon said second member, an actuator, a fusible material securing said actuator to said second member whereby, when the fusible material is softened, the said actuator may move relatively to said second member.

1,678,801. COKING RETORT OVEN. JOSEPH BECKER, Pittsburgh, Pa., assignor to The Koppers Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Jan. 28, 1921. Serial No. 440,645. 19 Claims. (Cl. 202—9.)

1. In a coking retort oven, in combination: a plurality of parallel coking chambers; heating walls between and contiguous to such coking chambers and respectively constituted of two parallel series of vertical combustion flues, the individual combustion flues of one series being individually connected with the individual combustion flues of the other series of the same heating wall; individually regulable and reversible regenerators parallel with the coking chambers and the heating walls, such regenerators being communicably connected in pairs with each series of such combustion flues, the pairs of such regenerators being individual to the series of combustion flues with which they are connected; and means for separately controlling the individual flow through individual regenerators and their connected series of combustion flues; substantially as specified.

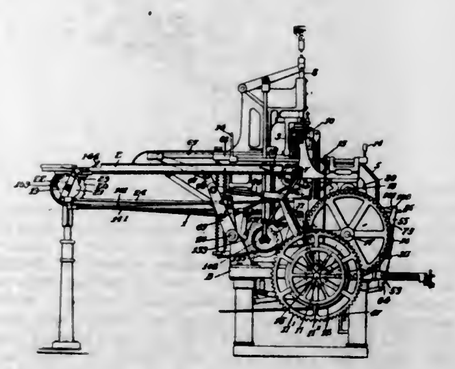


1,678,802. COKING RETORT OVEN. JOSEPH BECKER, Pittsburgh, Pa., assignor to The Koppers Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Mar. 14, 1921. Serial No. 452,238. 28 Claims. (Cl. 202—9.)

1. In a coking retort oven, in combination: a plurality of coking chambers; heating walls contiguous to such coking chambers and respectively constituted of two

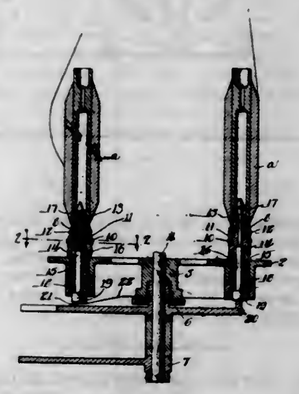
parallel series of vertical combustion flues; tapered horizontal flues in each heating wall and respectively connecting a plurality of the combustion flues of each series of their respective heating walls; the horizontal flues of both series of each heating wall being also communicably connected with the corresponding horizontal flues of an adjacent heating wall; individually regulable and individually reversible and crosswise-extending regenerators parallel lengthwise with the coking chamber and the heating walls, such regenerators being divided into groups of three regenerators each, two regenerators of each group being respectively communicably connected one with the flues of one series and the other with the flues of the other series of an adjacent heating wall, and the other regenerator of each group being connected with both flue-series of the adjacent heating wall; substantially as specified.

1,678,803. COKING RETORT OVEN. JOSEPH VAN ACKEREN, Pittsburgh, Pa., assignor to The Koppers Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed May 16, 1921. Serial No. 469,994. 16 Claims. (Cl. 202—9.)



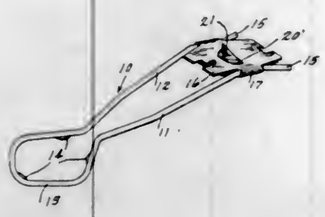
1. In a coking retort oven, in combination: a plurality of coking chambers; heating walls contiguous to such coking chambers and respectively constituted of vertical combustion flues disposed into two groups, the flues of one group alternating with the flues of the other and one group of such flues operating for inflow while the other group operates for outflow; and a regenerative system embodying two series of regenerators, one series of such regenerators being communicably connected with groups of such flues and the other series of regenerators being individual to and communicably connected with individual flues, the two series of regenerators being jointly operable for conveying air to the flues or separately operable for conveying to the said flues air and an extraneously derived gas; substantially as specified.

1,678,804. SHINGLE HOLDER. CORTLANDT F. AMES, Jr., Mount Vernon, N. Y., assignor to The Barrett Company, a Corporation of New Jersey. Filed Jan. 31, 1924. Serial No. 689,703. 12 Claims. (Cl. 108—7.5.)



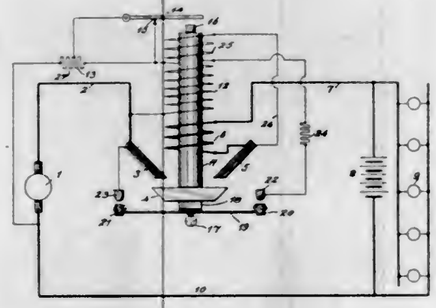
1. In a device for holding shingles, a metallic element having an intermediate portion adapted to lie on the top side of a shingle and aligned portions to lie on the bottom side of said shingle and having strap-like projections extending therefrom.

1,678,805. PACKAGE-LABELING MACHINE. JAMES A. BUTLER, Needham, Mass., assignor to Pneumatic Scale Corporation, Ltd., Norfolk Downs, Mass., a Corporation of Massachusetts. Filed Apr. 27, 1923. Serial No. 635,169. 69 Claims. (Cl. 216—54.)



1. In a labeling machine, the combination with a glue drum, a label feeder, a label presser, and mechanism for operating said elements in timed relation to each other, of means for automatically preventing operation of the label presser upon a failure of label placement on the glue drum.

1,678,806. BOBBIN SKEWER. HOWARD D. COLMAN, Rockford, Ill., assignor to Barber-Colman Company, Rockford, Ill., a Corporation of Illinois. Original application filed Jan. 4, 1917, Serial No. 140,561. Divided and this application filed Nov. 19, 1926. Serial No. 149,346. 3 Claims. (Cl. 242—130.)

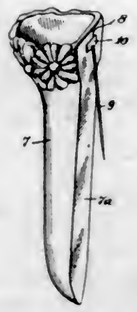


1. A skewer for supporting a yarn carrier and adapted to enter only the lower end of the carrier, said skewer having, in combination, a plurality of longitudinal segments, a contractile ring encircling the segments, and means for separating the segments to expand the skewer into clamping engagement with the carrier at two longitudinally separated points.

1,678,807. COMBINATION TOOL. ROY D. COOPER, Oakland, Calif. Filed Aug. 3, 1927. Serial No. 210,268. 7 Claims. (Cl. 7—1.)

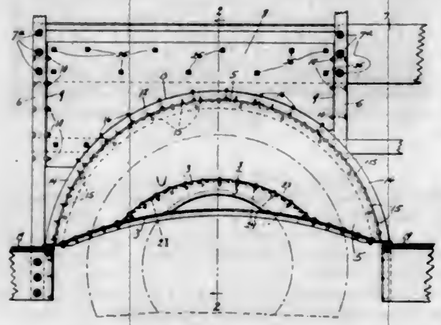
1. A combination tool comprising a resilient member having substantially parallel arms, a holding plate attached to said arms, said holding plate having a central aperture therein, a punch extending through said aperture, and a sharpening plate overlying said holding plate and punch for maintaining said punch in place, said sharpening plate being frictionally held on said holding plate.

1,678,808. ELECTRIC SYSTEM. JOHN L. CREVELING, near Tucson, Ariz., assignor, by mesne assignments, to Simplex Equipment Company, Inc., New York, N. Y., a Corporation of Delaware. Filed Dec. 7, 1925, Serial No. 73,538. Renewed May 9, 1928. 5 Claims. (Cl. 171—313.)



1. The combination with a generator, a storage battery charged thereby, means for connecting and disconnecting the generator and battery and operating means for said connecting means, of means for determining the point of operation of said connecting means functionally adjusted by said operating means.

1,678,809. METHOD OF PREPARING SMOKED JOINT MEATS. ARTHUR W. CUSHMAN, Winnetka, Ill., assignor to Allied Packers, Inc., Chicago, Ill., a Corporation of Delaware. Filed June 30, 1926. Serial No. 119,754. 5 Claims. (Cl. 99—11.)

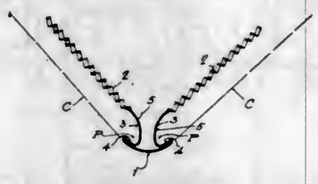


1. A method of preparing smoked meats, which consists in smoking the meat while uncovered, then encasing the meat while still hot and plastic as a result of the smoking operation in a jacket of flexible material, and then suspending the meat in the jacket and permitting it to cool and harden under the shaping pressure exerted thereagainst by the jacket.

1,678,810. RECEPTACLE. WILLIAM H. FULPER, Flemington, N. J. Filed Oct. 22, 1926. Serial No. 143,456. 8 Claims. (Cl. 24—6.)

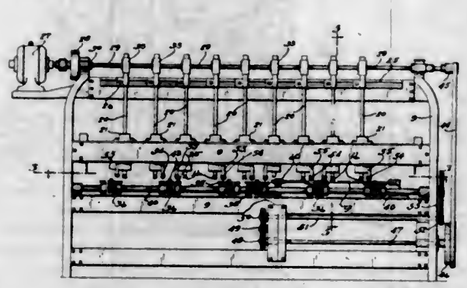
1. The combination of a receptacle having a recess, a prong element having a depending piercing length and an upper end portion shaped to fit loosely in said recess, and an anchoring means wedged in the recess and about the upper end portion of the prong element.

1,678,811. BUS-BODY-FRAME CONSTRUCTION. ELBERT J. HALL, Detroit, Mich., assignor to American Car and Foundry Motors Company, New York, N. Y., a Corporation of Delaware. Filed Apr. 29, 1927. Serial No. 187,591. 5 Claims. (Cl. 296—28.)



1. In combination, a wheel housing, a pair of vertical body posts adjacent the housing, a semi-circular rail attached to the upper face of the housing, a plate extending to and attached to the posts and having a flange resting upon and attached to the rail.

1,678,812. MOLD FOR COMPOSITE ARTICLES. FRED R. HORNIG, Milwaukee, Wis. Filed Mar. 7, 1927. Serial No. 173,311. 5 Claims. (Cl. 18—36.)

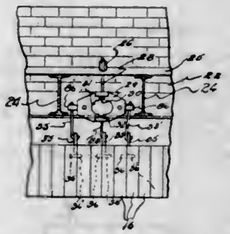


1. In a mold for plastic material, the combination with a hollow fixture provided with corrugated walls and adapted to be permanently embedded in the plastic material, of a jack for releasably positioning said fixture and provided with a resilient protuberance for registry with the corrugations in the wall of the fixture.

1,678,813. CORNER BEAD. EDMUND H. JONES, Milwaukee, Wis., assignor to Milwaukee Corrugating Company, Milwaukee, Wis., a Corporation of Wisconsin. Filed Apr. 28, 1927. Serial No. 187,139. 1 Claim. (Cl. 72,121.)

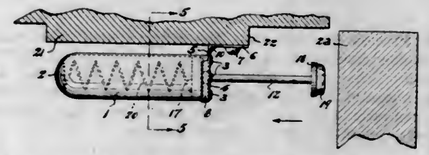
A device of the character described comprising a broad rounded body plate of substantially arcuate form in cross section and constituted of imperforate metal, diverging wings of expanded metal, and connecting portions of unexpanded metal integral with the wings and with the body plate, each connecting portion including an inturned section extending from one margin of the body plate beneath the body plate and positioned close up against the under-face of the body plate although just slightly spaced therefrom, each connecting portion also including a reversely bent and curved section between the inturned section and the associated wing, the connecting portions being spaced from each other whereby clearance is afforded to permit the connecting portions to flex and take up shocks and strains, said connecting portions defining pockets adapted to interlock with the plaster, said pockets terminating at the exposed edges of the body plate.

1,678,814. ROUTING MACHINE. JOHN E. KALGREN, Minneapolis, Minn., assignor to The J. R. Clark Company Minneapolis, Minn., a Corporation of Minnesota. Filed Sept. 17, 1927. Serial No. 220,274. 10 Claims. (Cl. 144—133.)



1. A routing machine comprising a router, a feeding device for moving a piece of work having a gauge surface to the router, and a device arranged to be engaged by said surface to cause the work to move transversely of the movement imparted thereto by the feeding device.

1,678,815. LIQUID CLEANING COMPOUND. YOSHITARO KATAYAMA, San Bernardino, Calif. Filed July 7, 1927. Serial No. 204,147. 1 Claim. (Cl. 87—5.)



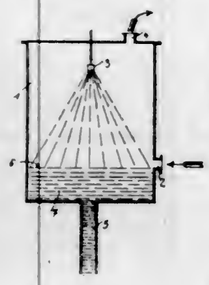
A composition of matter consisting of wild rhubarb root solution, 95%; cedar oil, 1%; and alum solution 4%.

1,678,816. REFLECTOR ARCH FOR FURNACES. JAMES B. KINAHAN, Detroit, Mich. Filed June 6, 1925. Serial No. 35,269. 3 Claims. (Cl. 110—99.)

1. In a furnace arch of the class described, a hanger comprising a main body having a central opening formed therein and provided with diametrically opposite outwardly extending passages, each leading to an opening; and an outwardly projecting hanger arm secured in each of said openings.

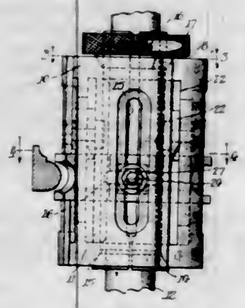
1,678,817. DOORCHECK. RUSSELL B. KINGMAN, Orange, N. J., assignor to Useful Products Company, West Orange, N. J., a Corporation of New Jersey. Filed Sept. 7, 1927. Serial No. 217,896. 2 Claims. (Cl. 16—84.)

1. A pneumatic door-check comprising a sheet metal cylinder having an integral closed rear end, a combined sheet metal cylinder-head and supporting bracket, the open end of said cylinder having clinching lugs projecting through and engaged on the external side of said cylinder-head, a piston-member slidable within said cylinder, a piston stem projecting exteriorly through said cylinder-head with its outer extremity adapted to extend beyond a door stop of a door-frame and in the path of movement of a door toward said stop, and a compression spring intermediate the closed rearward end of said cylinder and said piston-member, said combined cylinder-head and supporting bracket being provided in connection with the latter portion with an integral base of predetermined forward extension to act as a gauge in locating the device on a door frame and in proper relation to the door stop thereof.



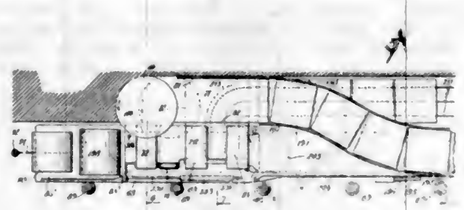
1,678,818. CORSET. JOSEPH J. KISPERT, Branford, Conn., assignor to I. Newman & Sons, Inc., New Haven, Conn. Filed Aug. 9, 1923. Serial No. 656,533. 11 Claims. (Cl. 2—27.)

2. A corset of the character described comprising a body portion having the usual opening, a two-part supplemental vest section, each part of said vest section being



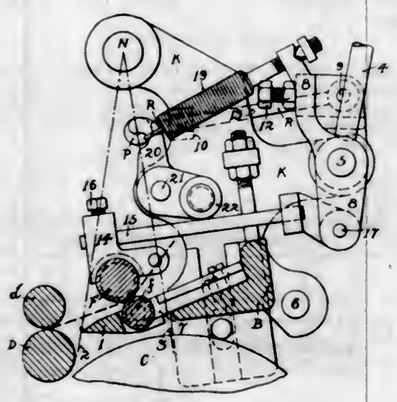
provided with laterally extending tapes secured thereto at both ends, and eyelets arranged interiorly of the body portion of the corset to receive said tapes between said secured ends to slidably connect the vest sections thereto.

1,678,819. PROCESS FOR REMOVING HYDROCHLORIC ACID FROM SUGAR SOLUTIONS. FRITZ KOCH, Geneva, Switzerland, assignor to The International Sugar and Alcohol Company, Limited, London, England. Filed May 9, 1925, Serial No. 29,262, and in Germany May 15, 1924. 7 Claims. (Cl. 127—46.)



1. Process for removing hydrochloric acid from sugar solutions consisting in heating a fluid heating carrier, spraying the sugar solution, containing the acid, into said nonsolid heating carrier drawing off the volatilized hydrochloric acid and carrying away the fluid heating carrier together with the sugar solution.

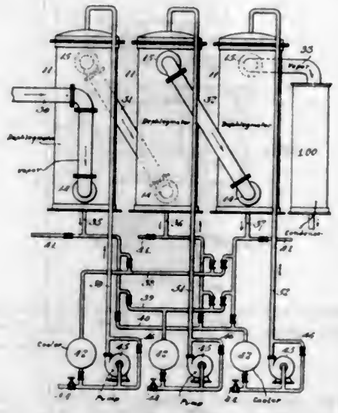
1,678,820. CUTTER HEAD. LOUIS T. MEDHOLDT, Rockford, Ill., assignor to Mattison Machine Works, Rockford, Ill., a Corporation of Illinois. Filed Mar. 20, 1925. Serial No. 16,902. 7 Claims. (Cl. 144—230.)



1. A high speed cutter head comprising, in combination, a hollow body having rigid end and side walls and adapted to be mounted upon a supporting spindle, the interior dimensions of said body being substantially greater than the diameter of the spindle, cutting blades having their inner ends lying within the body and their outer ends projecting therefrom, there being openings in the body to permit said blades to pass therethrough, and radial clamping bolts entered perpendicularly through said blades and the side walls of the body for clamping the blades rigidly upon the inner faces of said side walls, the heads of said bolts being disposed between the spindle and the blades upon the inner faces of the body so that the spindle limits inward movement of the bolt.

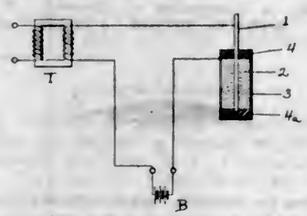
1,678,821. METHOD AND APPARATUS FOR MINING COAL. EDMUND C. MORGAN, New York, N. Y.; Olive Eugenie Morgan executrix of said Edmund C. Morgan, deceased. Filed Feb. 17, 1923. Serial No. 619,588. 45 Claims. (Cl. 262—9.)

1. In a mining and loading machine, the combination with mining mechanism, of loading apparatus comprising an extensible belt conveyer connected to said mining mechanism to be extended by the feeding movements thereof, a deflector for directing dislodged material from the mining mechanism to said extensible belt conveyer, and means for operating said mining mechanism while moving said deflector along a mine wall and extending said belt conveyer.



1,678,822. COMBING MACHINE. JOHN WILLIAM NASMITH, Heaton Mersey, Manchester, England. Filed Aug. 9, 1927, Serial No. 211,828, and in Great Britain Mar. 1, 1927. 8 Claims. (Cl. 19—120.)

1. In a combing machine, a swinging nipper plate and a pair of feed rollers adapted to swing with the said plate, the nip of the roller pair being substantially flush with the upper surface of the said plate, and means for imparting rotary motion to the said rollers.

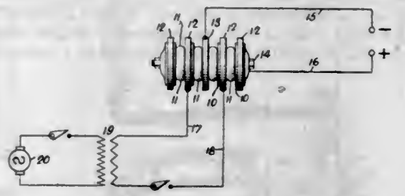


1,678,823. CIRCULATING DEPHLEGMATOR. DANIEL PYZEL, Oakland, Calif., assignor to Simplex Refining Company, San Francisco, Calif., a Corporation of California. Filed Nov. 6, 1919. Serial No. 336,158. 2 Claims. (Cl. 196—140.)

1. In an oil refining system, the combination of: a series of dephlegmators; means for passing oil vapors successively through said dephlegmators; means in said dephlegmators for bringing said vapors into intimate contact with a flowing stream of condensate; means

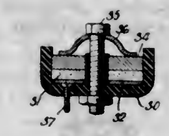
for withdrawing said condensate from one of said dephlegmators; and means for introducing said condensate into the top of another dephlegmator.

1,678,824. ELECTRIC-CURRENT RECTIFIER. SAMUEL RUBEN, New York, N. Y., assignor to Ruben Rectifier Corporation of Delaware. Filed Apr. 16, 1925. Serial No. 23,582. 7 Claims. (Cl. 175—318.)



1. In dry surface contact rectifying devices and the like, an asymmetric couple comprising an electro-positive electrode element formed of a metallic body of the fifth periodic group having a relatively high atomic weight, and an electro-negative electrode element formed of a metallic oxide arranged to coperate in the production of an inverse current blocking film and adapted to be disposed in intimate contact with said electro-positive electrode element.

3. In dry surface contact rectifying devices and the like, an asymmetric couple comprising an electro-positive electrode element formed of metallic tantalum and an electro-negative electrode element formed of lead peroxide, said electro-negative electrode being in pulverulent form arranged to cooperate in the production of an inverse current blocking film and disposed in intimate contact with said electro-positive electrode element.

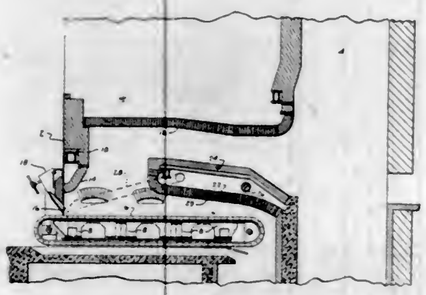


1,678,825. ELECTRIC-CURRENT RECTIFIER. SAMUEL RUBEN, New York, N. Y., assignor to Ruben Rectifier Corporation, Englewood, N. J., a Corporation of Delaware. Filed Mar. 30, 1927. Serial No. 179,479. 7 Claims. (Cl. 175—318.)

2. In electric current rectifiers and the like, of the dry surface-contact variety, an asymmetric couple having relatively electro-positive and electronegative electrode elements adapted for the electrochemical formation and maintenance at their contacting surfaces of an inverse

current-blocking film, said electronegative electrode element comprising a metallic sulphide and a compound of chromium, alloyed therewith.

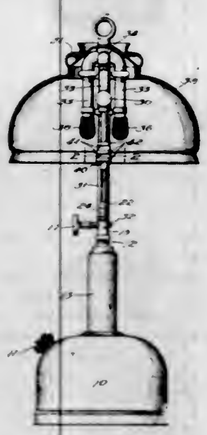
1,678,826. ELECTRIC-CURRENT RECTIFIER. SAMUEL RUBEN, New York, N. Y., assignor to Ruben Rectifier Corporation, Englewood, N. J., a Corporation of Delaware. Filed Apr. 26, 1927. Serial No. 186,606. 8 Claims. (Cl. 175—318.)



1. In dry surface-contact rectifying devices and the like, an asymmetric couple having an electronegative electrode element comprising a metallic compound of the sixth periodic group, having substantially maximum crystal density, an electropositive electrode element comprising highly electropositive metallic material in powder form, and means for retaining said electrode elements in contact under pressure sufficient to prevent the disruption of the inverse current-blocking film which forms at the contacting surfaces of said electrodes.

8. In dry surface contact rectifying devices and the like, an asymmetric couple comprising a pair of electrode elements, one in powdered form, the other in solid form, a cup adapted to contain said electrode elements disposed in operative contact, insulating means associated with said cup and adapted to maintain the edges of said elements in proper insulated relation, means consisting of a freely-moving member for closing said cup, and clamping means adapted to bear on said closing means arranged to maintain said electrode elements in contact under pressure sufficient to prevent a disruption of the inverse current-blocking film which forms at the contacting surfaces of said electrodes.

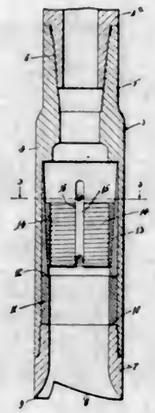
1,678,827. BOILER FURNACE. CHRISTIAN SCHILLINGER, Scranton, Pa. Filed July 14, 1926. Serial No. 122,298. 1 Claim. (Cl. 110—40.)



A furnace of the class described having, in combination, a traveling grate, a boiler chamber at the rear of said grate, a front wall, a top wall arranged substantially horizontally and extending substantially over the length of the grate, and a rear arch extending over substantially one-half of the length of the grate and arranged in proximity thereto, the forward end of said arch being spaced a distance from said front wall to provide an expansion space, and the top side of said rear arch together with the opposed portion of said top wall providing a restricted passage leading from said expansion space to the boiler chamber, said arch being made up of two walls arranged

one above the other and spaced a distance apart with the spaces between their ends closed, means for admitting air under pressure to said space between said walls of

the arch, and means for discharging the air after passing through said space beneath the upper run of the grate to support combustion.



1,678,828. VAPOR BURNER. EDWARD SCHULTZ, Chicago, Ill., assignor to The Nagel-Chase Mfg. Co., Chicago, Ill., a Corporation of Illinois. Filed Aug. 4, 1926. Serial No. 126,983. 2 Claims. (Cl. 67—50.)

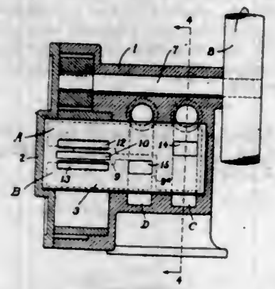
1. In a vapor burner, the combination with a source of fuel supply having a valved outlet therefrom, of a generating tube detachably connected with said outlet and including in its structure an outwardly turned flange at the lower tube end, a cup shaped disk associated with the tube, the disk edges lying adjacent the tube flange and the cup portion being upturned to lie within the tube end, there being an aperture of small size through the disk such as to restrict the fuel flow therethrough, and a packing material within said generating tube and retained by said disk.

1,678,829. PACKER SLIP SOCKET. GLENN A. SCOTT and JAMES M. COCHRAN, Ventura, Calif. Filed June 29, 1927. Serial No. 202,242. 2 Claims. (Cl. 294—102.)

1. In a device of the class described, the combination of a tubular body having a circumferential shoulder at its upper end forming an abutment, a bell collar secured to the lower end thereof and providing a circumferential shoulder at its upper end, a packing sleeve mounted within the body and resting on the shoulder, a sleeve slidably

mounted within the body in position to engage the upper edge of the packing sleeve and the shoulder at the upper end of the tubular body, and slips mounted in the slidably mounted sleeve.

1,678,830. CASING FOR FOOTBALLS, BASKET BALLS, AND THE LIKE. MASON SCUDDER, St. Louis, Mo., assignor to Rawlings Manufacturing Company, St. Louis, Mo., a Corporation of Missouri. Filed Mar. 21, 1927. Serial No. 177,046. 5 Claims. (Cl. 273—35.)



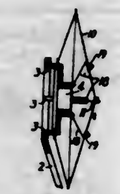
4. A casing for footballs, basket balls and the like provided with a slit, a concealed lacing comprising numerous portions disposed crosswise of said slit, and reinforcing devices on the inner side of the casing attached to the portions of the casing at the opposite sides of said slit and provided with channels for receiving said lacing, said reinforcing devices being of greater thickness than said lacing.

1,678,831. PUMP AND MOTOR. MARTIN AUGUST SEAHOLM, Chicago, Ill. Filed Dec. 9, 1925. Serial No. 74,204. Renewed Dec. 27, 1927. 15 Claims. (Cl. 121—57.)

11. In a fluid pressure engine, a stationary closed casing internally chambered to provide a cylindrical ring seat having extended parallel side faces, a cylindrical ring seated in said chamber, a cylindrical rotor of lesser diameter than the inner diameter of said ring and contacting its inner face, the ends of the rotor extending beyond the planes of the side faces of the ring and being journaled in rotor seats extending oppositely from said extended side faces of the ring chamber, a slide of the same width as the ring and pivoted thereto slidingly mounted in a slot in the rotor extending longitudinally thereof, said slide being arranged to slidingly contact the side extended faces of the ring seat and divide the chamber enclosed by the ring and rotor and extended side faces of the ring seat into inlet and outlet

spaces, and said casing being provided with inlet and outlet passages communicating respectively with said inlet and outlet spaces of said chamber, and a power

shaft journaled in said casing and on the inside thereof operatively connected with one of the interconnected rotatable members.

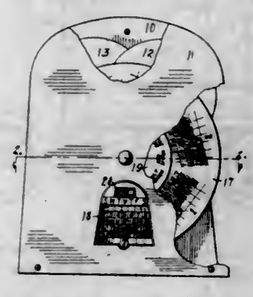


1,678,832. PHOTOGRAPHIC LIGHT-SENSITIVE MATERIAL AND PROCESS OF MAKING THE SAME. SAMUEL E. SHEPPARD, Rochester, N. Y., assignor to Eastman Kodak Company, Rochester, N. Y., a Corporation of New York. Filed June 6, 1927. Serial No. 196,992. 9 Claims. (Cl. 95—7.)

1. A photographic emulsion comprising a colloid, particles of photographic silver salts suspended therein, and an added compound therein upon which at least part of the light-sensitiveness of the emulsion depends, said compound being a disulfide of the type

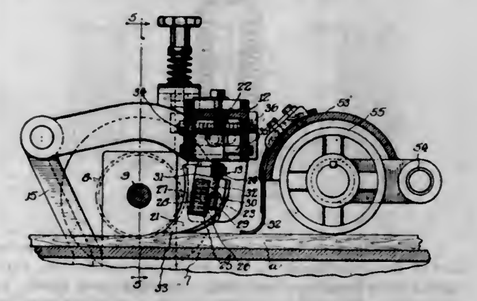
$$R-C-S-S-C-R$$
$$\quad\;\; X \qquad\quad Y$$

in which R is any organic radical and X and Y are selected from the group of oxygen, imid-nitrogen, sulfur, double bonded carbon.



1,678,833. ACOUSTIC DEVICE. EDWIN H. SMYTHE, Evanston, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y., a Corporation of New York. Filed Feb. 24, 1926. Serial No. 90,297. 13 Claims. (Cl. 181—31.)

1. An acoustic device comprising a large, direct acting diaphragm, a support means for attaching said diaphragm to said support at a plurality of points removed from the outer edge of said diaphragm so as to leave the outer edge of said diaphragm free and permit the diaphragm to execute torsional vibrations about said points of support.

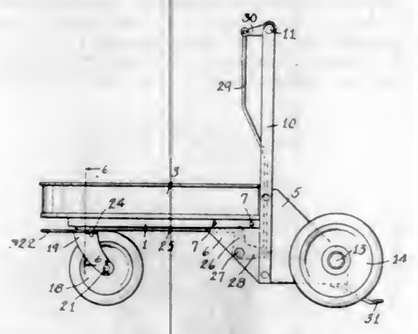


1,678,834. PERPETUAL CALENDAR. GALEN TILDEN, Ames, Iowa. Filed June 5, 1926. Serial No. 114,017. 5 Claims. (Cl. 40—113.)

1. In a calendar of the character described, a support, a member movably mounted relative to said support and bearing ninety-nine characters successively arranged to indicate ninety-nine years of a century and arranged in rows and columns, each of said columns also including index characters applicable to various units of a quarcentenary group, a second member movably mounted relative to the support and bearing columns of characters indicating monthly calendars, each of the last named columns also including one of the index characters of the first movable member characters on said support indicating a quarcentenary group with which the index characters of

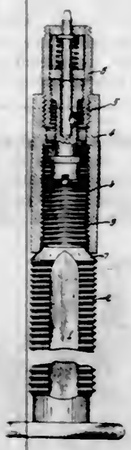
the columns of the first movable member may be brought selectively into juxtaposition, a column of characters on said support representing the months of the year with which the columns of the second named movable member may be brought selectively into juxtaposition to designate the appropriate monthly calendar to be used as indicated by the associated index character, and a group of monthly calendars carried by said support and each bearing an index character corresponding to one of the characters carried by the second movable member.

1,678,835. CHIP BREAKER FOR MOLDING MACHINES AND THE LIKE. WILLIAM O. VIVARTTAS, Rockford, Ill., assignor to Mattison Machine Works, Rockford, Ill., a Corporation of Illinois. Filed Mar. 24, 1924. Serial No. 701,278. 14 Claims. (Cl. 144—244.)



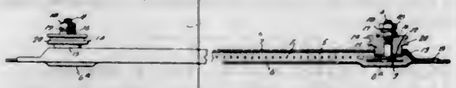
1. In a molding machine or the like, the combination with a cutter, of a chip breaker comprising a cross head located at one side of the axis of the cutter and mounted to swing on an axis located on the other side of the cutter axis, yieldable means for holding the head in operative position, and a plurality of two-part chip breaker units carried by the head for individual adjustment toward and from the axis of the cutter, the lower parts of said units being adapted to yield independently of each other in accordance with the varying thicknesses of the work transversely thereof.

1,678,836. CHILD'S WAGON. ERIC S. WESSBORG, Saginaw, Mich. Filed July 25, 1924. Serial No. 728,211. 2 Claims. (Cl. 280—87.5.)



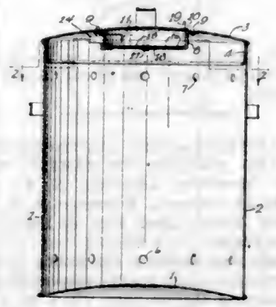
1. In a structure of the class described, the combination of a frame including a platform at the rear, uprights disposed at the front ends of said platform, a rod connecting

the upper ends of said uprights, a hand piece rotatably mounted on said rod, rear wheels disposed at the sides of said platform, a brake shoe projecting downwardly and



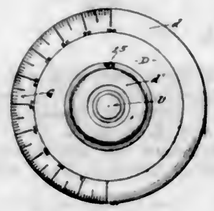
rearwardly from said platform, a steering wheel, and operating connections from said hand piece to said steering wheel.

1,678,837. VALVE CAP. ARDEN D. WHIPPLE, Oakland, Calif. Filed May 16, 1927. Serial No. 191,736. 4 Claims. (Cl. 152—12.)



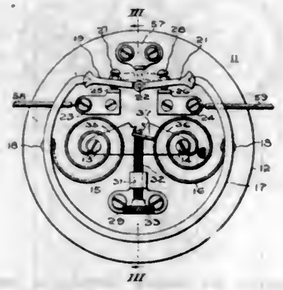
1. A pneumatic valve cap comprising a sleeve having means for attachment to the usual pneumatic tire valve stem, valve housing threadedly engaging said sleeve, an auxiliary valve within said housing, a valve controlling member connected to said housing and adapted to be advanced therewith by the threading of said housing into the sleeve so as to unseat the usual pneumatic tire valve.

1,678,838. HEAVY-DUTY ELECTRIC HEATER. EDWIN L. WIEGAND, Dormont Borough, Pa. Filed July 31, 1925. Serial No. 47,223. 10 Claims. (Cl. 201—64.)



1. In an electric heater, the combination of a resistor, a terminal comprising a body portion to which the resistor is connected, a body of refractory, electrical insulating, heat conducting material enveloping said resistor and the body portion of the terminal, and a thin metal sheath encasing said body of material and having opposed walls one of which is provided with a relatively large opening through which a part of the terminal is exposed, while the other wall has a depressed portion to accommodate the refractory material underlying the body portion of the terminal, said body of material having a recess surrounding the terminal and registering with the aforesaid opening.

1,678,839. SANITARY GARBAGE CAN. WILLIAM WILKINS, Oakland, Calif. Filed Aug. 17, 1926. Serial No. 129,728. 2 Claims. (Cl. 220—87.)



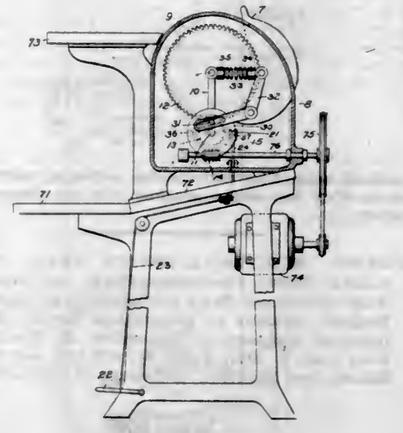
1. The combination with a garbage can of a removable top, said top having a cup-shaped container depending from the bottom face thereof, a slot in the side of said container for allowing the fumes of the contents of said container to penetrate the interior of the said can, a slide disposed in said slot, and means on said slide for selectively causing the same to cover or uncover said slot, and a rotary cutout member pivoted to the bottom of said container having apertures therethru adapted to register with apertures on the bottom of said container, and having a handle attached thereto extending thru said cover, as and for the purpose specified.

1,678,840. VARIABLE CONDENSER. ROBERT T. WILLIAMS, Los Angeles, Calif. Filed Aug. 11, 1926. Serial No. 128,572. 5 Claims. (Cl. 175—41.5.)

1. A variable condenser including a series of stationary plates, a supporting panel therefor, spaced supporting plates, a shaft fixedly mounted on and insulated from said supporting plates, a hollow shaft rotatably and reciprocably mounted on said fixed shaft and extended from said panel, a plurality of movable plates fixed to said hollow shaft and alternating with said stationary plates, a dial externally of said panel attached to the end of said hollow shaft for rotatably adjusting said movable plates with respect to said stationary plates, and means connected with said fixed shaft centrally of said dial for maintaining a desired longitudinal adjustment of said movable plates.

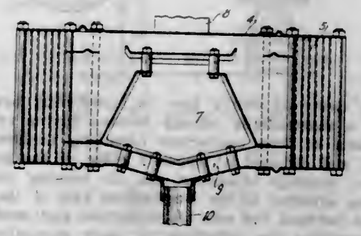
1,678,841. THERMAL RELAY. CHRISTIAN AALBORG, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 23, 1925. Serial No. 38,963. 3 Claims. (Cl. 200—138.)

1. In a thermal relay, the combination with a bimetallic member, of a spring member of substantially U-shape supported and actuated thereby, and means extending between the ends of said spring member and actuated thereby with a snap action only.



1,678,842. MICROPHONE. JOSEPH E. AIKEN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 17, 1924. Serial No. 720,477. 5 Claims. (Cl. 179—188.)

1. In combination, a microphone and sound-shielding means therefor comprising a sound-reflecting cylinder having a side aperture, a sound-absorbing lining therefor, and sound-absorbent closures for the ends of said cylinder, said microphone being adjustably supported within said cylinder.

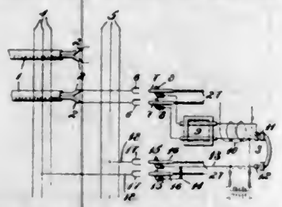


1,678,843. IRONING MACHINE. EDWIN E. ARNOLD, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 23, 1921. Serial No. 524,532. 3 Claims. (Cl. 68—9.)

2. In an ironing machine, the combination with a shoe and a roll to be moved to or from the shoe, of a shaft for the roll, a second shaft extending parallel to the roll, a support for each end of the roll shaft pivotally mounted on the second shaft, and means operated by the

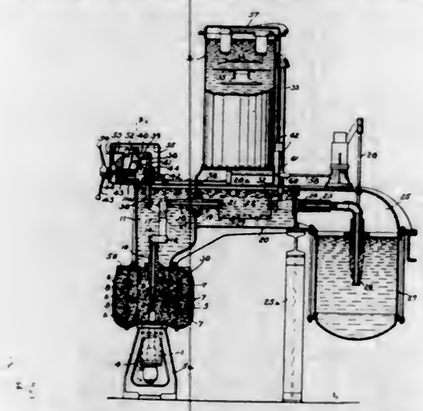
second shaft for impressing a displacing force upon the roll shaft to move the roll about the pivot points of the roll shaft supports.

1,678,844. FLUID SEPARATOR. GRANT D. BRADSHAW, Pittsburgh, Pa., assignor, by mesne assignments, to Blaw-Knox Company, Blawnox, Pa., a Corporation of New Jersey. Filed May 31, 1924. Serial No. 716,915. 13 Claims. (Cl. 183—75.)



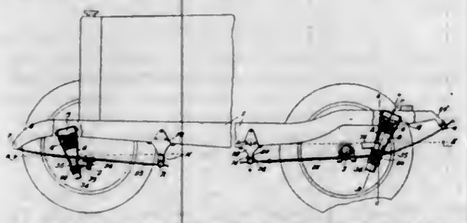
1. In a gas purifying apparatus a plurality of baffles the transverse sections of which are U-shaped, the baffles being spaced apart and arranged in rows, the baffles of one row being staggered with reference to those of the adjacent rows, and the outer edge of one side of each baffle substantially abutting against a baffle in the preceding row.

1,678,845. ELECTRICAL SWITCH GEAR. WILLIAM ANSELM COATES, Chorlton-cum-Hardy, and DAVID REGINALD DAVIES, Stretford, Manchester, England, assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 18, 1921, Serial No. 478,575, and in Great Britain June 22, 1920. 10 Claims. (Cl. 175—298.)



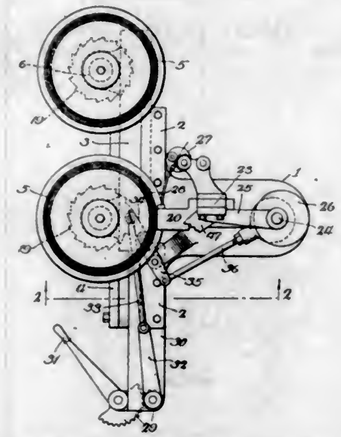
7. Electrical switch gear comprising a housing for feed conductors, a disconnecting switch, a housing for the disconnecting switch disposed substantially normal to the housing for the feed conductors and communicating therewith, a tank suspended beneath the housing for the

disconnecting switch for containing oil and electrical apparatus and terminals projecting from the housing for the disconnecting switch into the said tank, the said



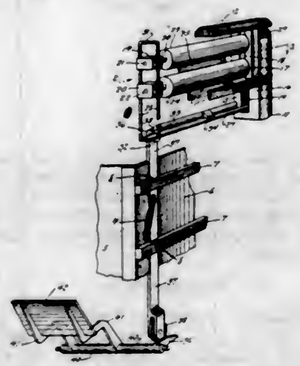
housings being filled with molded insulating material for surrounding the said conductors and the disconnecting switch.

1,678,846. ELECTRICAL SWITCH GEAR. WILLIAM ANSELM COATES, Chorlton-cum-Hardy, and GEORGE EDWARD GITTINS and DAVID REGINALD DAVIES, Manchester, England, assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 1, 1921, Serial No. 478,594, and in Great Britain June 22, 1920. 4 Claims. (Cl. 175—298.)



3. In electrical switch gear, a distributing box comprising a substantially tubular housing having two separate sets of feed conductors extending longitudinally thereof and disposed at opposite sides of the housing, terminal bushings extending into the housing and terminating adjacent to the longitudinal axis of the housing and between the sets of conductors and conductors for connecting the terminals to their respective feed conductors.

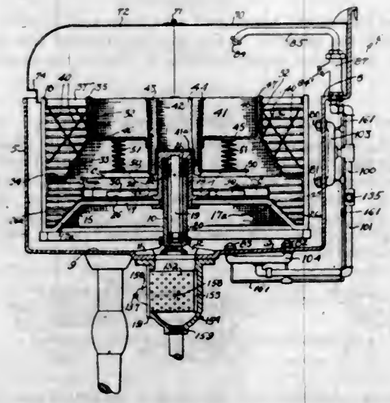
1,678,847. VEHICLE SUSPENSION. STEPHEN L. C. COLEMAN, Fredericton, New Brunswick, Canada, assignor to Coleman Auto Spring Suspension Company, Limited. Filed June 21, 1923. Serial No. 646,977. 28 Claims. (Cl. 267—54.)



1. In a vehicle suspension, the combination with a frame and running gear, of front and rear transverse springs, means for yieldably connecting said springs to the frame and running gear, and means for preventing lateral movements and excessive rolling of said frame on the running gear.

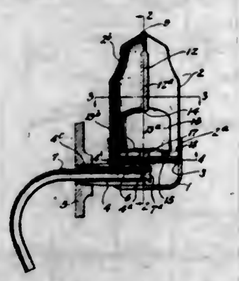
1,678,848. MACHINE FOR MAKING BASKETS. EDWARD CRAIG, St. Joseph, Mich., assignor to Saranac Automatic Machine Corporation, Benton Harbor, Mich., a Corporation of Delaware. Filed Mar. 26, 1924. Serial No. 701,912. 17 Claims. (Cl. 1—13.6.)

1. In a machine for making receptacles, the combination of a plurality of forms upon which the receptacles are made, fastener driving mechanism to insert fasteners into each receptacle, instrumentalities having rotary actuating means for operating said mechanism and for causing step by step rotation of said forms, and devices for causing straight line relative movement between said forms and said fastener driving mechanism, whereby said mechanism and each form may be brought into operative relation to each other, with said mechanism disposed between said line and said instrumentalities, and whereby one form may be loaded while another form is cooperating with said mechanism, said mechanism being disposed between said straight line and the axis of said rotary actuating means.



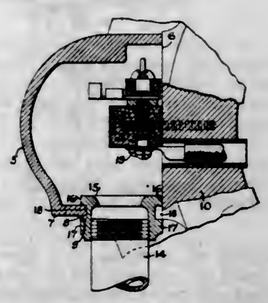
1,678,849. PRESSURE-CONTROLLING MEANS FOR WRINGER ROLLS. THOMAS C. DAVIS, Greeley, Colo. Filed Mar. 31, 1927. Serial No. 179,982. 6 Claims. (Cl. 68—32.)

1. In a wringer embodying an upper roll having supporting means for vertical play relatively to the lower roll, the combination of hanger elements depending from



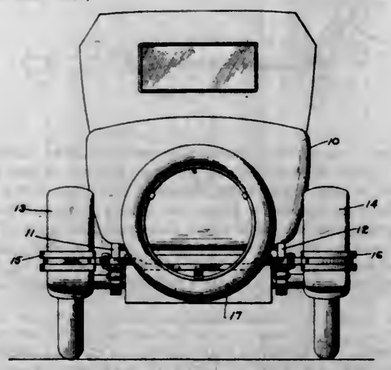
said supporting means, a bar spring freely mounted at its ends for limited sliding motions upon the lower ends of said hanger elements, and with said spring extending longitudinally below said lower roll, a lever, and means interposed between said lever and bar spring to respectively cause the downward bowing of said spring, for placing said spring under tension, and to relieve the downward bow thereof, upon the respective actuating and retractive movements of said lever.

1,678,850. ROTARY CLEANSER. WILLIAM L. DEMING, Salem, Ohio. Filed July 27, 1925. Serial No. 46,240. 4 Claims. (Cl. 141—9.)



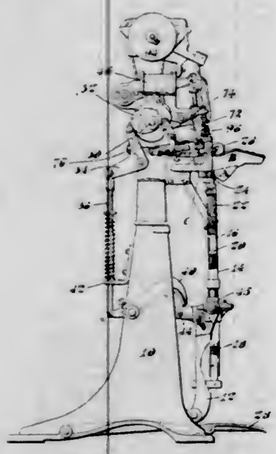
1. In a cleansing machine in combination, a casing having an inwardly sloping bottom portion, an upwardly extending member rigidly and centrally supported by the casing, a rotary container adapted to support articles to be cleansed, a shaft rigid with the container, upper and lower bearings for the container shaft supported by the upwardly extending member, the base of said member comprising webs joined with the bottom of the container and the said bottom having an opening below the webs whereby central drainage from the casing may be had.

1,678,851. AIR-VENT VALVE FOR RADIATORS. LEWIS W. EGGLESTON, Buffalo, N. Y., assignor to American Radiator Company, New York, N. Y., a Corporation of New Jersey. Filed Oct. 25, 1921. Serial No. 510,239. 9 Claims. (Cl. 236—63.)



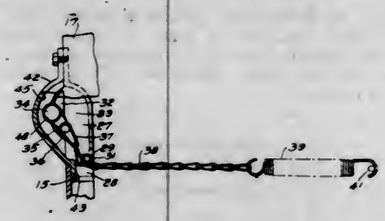
1. An air relief valve for radiators comprising a casing having a substantially cylindrical body portion, and a port connection adapted to communicate with a radiator and said casing having a conical upper end wall provided with a vent opening at its apex, a closed thermostatic float member arranged in the lower portion of said cylindrical body portion and containing a volatile liquid, said float member having a flexible lower wall, a valve stem connected to said thermostatic float member and extending through said cylindrical portion and provided at its upper end with a valve part to cooperate with said vent opening to open and close the same, the side wall of said thermostatic float member being spaced from the wall of said casing a distance sufficient to preclude holding of water by capillary attraction between said float member and casing wall, and the interior of the cylindrical and conical portions of the casing above said float member being of sufficient height and volume to constitute a separating chamber, and a guide member for said float arranged beneath the float and having spaced guide members extending upwardly between the side wall of the float and the casing.

1,678,852. TERMINAL COVER. RALPH EHRENFELD, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 2, 1922. Serial No. 604,572. 3 Claims. (Cl. 247—1.)



1. The combination with a terminal cover having an open side and having means whereby the open side may be secured to a support for enclosing a terminal thereon and having a slot in a side wall thereof extending inwardly from the open side of the cover, of a conduit bushing having flanges thereon for engaging the edge portions of the slot when the cover is in operative position for preventing longitudinal displacement of the bushing with respect to the cover.

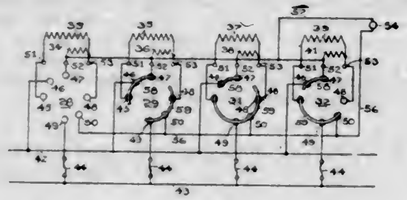
1,678,853. BUMPER TIP. ROLLIE B. FAGEOL, Los Angeles, Calif., assignor to American Chain Company, Inc., Bridgeport, Conn., a Corporation of New York. Filed June 10, 1925. Serial No. 36,099. 5 Claims. (Cl. 293—55.)



3. A bumper tip for automobiles comprising an impact member disposed transversely of an automobile frame and overhanging the sides thereof to protect the fender, mounting means carried by the vehicle frame, separate and looped resilient means supporting said impact member upon the mounting means and in substantially the same horizontal plane therewith.

1,678,854. MACHINE FOR USE IN THE MANUFACTURE OF SHOES. JOSEPH FAUSSE, Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed June 14, 1926 Serial No. 115,915. 41 Claims. (Cl. 12—19.2.)

1. In a machine for operating on a shoe having its upper lasted round its heel seat and having a sole unattached at its heel end, means for gripping the heel end of the sole and pulling it rearwardly to position it upon the lasted heel seat of the shoe, and means for securing the heel end of the sole to the heel seat of the shoe while thus positioned.

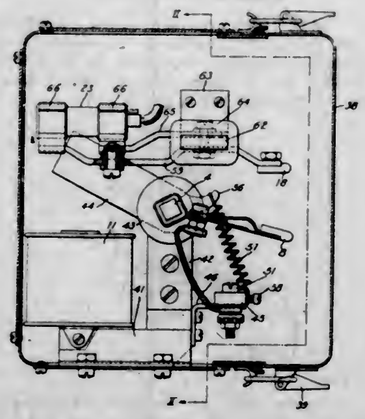


1,678,855. COUNTERBALANCE FOR OVEN DOORS. FRANK F. FORSHEE, Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 31, 1927. Serial No. 195,182. 3 Claims. (Cl. 126—191.)

1. In a range, the combination with an oven casing, a front frame therefor having a recess therein in the front thereof, a base band at the bottom of the oven, and a door for the oven having a hinge pin fitting into said recess, of a hinge cap having a lower end extending back of said base band to hold the lower end of the cap, and a single screw extending through the upper end of the cap and into the oven frame to hold the hinge pin in said recess.

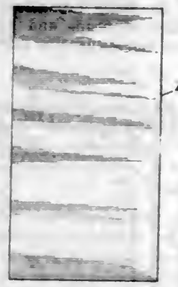
1,678,856. CURRENT-INDICATING AND ILLUMINATING MEANS FOR ELECTRIC RANGES. FRANK F. FORSHEE, Flint, Mich., assignor, by mesne assignments, to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Mar. 10, 1922. Serial No. 542,617. 8 Claims. (Cl. 177—311.)

1. In combination, supply mains, a plurality of sets of translating devices connected in multiple across said mains, a corresponding plurality of multiposition switches each connecting the translating devices of its respective set in different relations, a pilot lamp, and connections



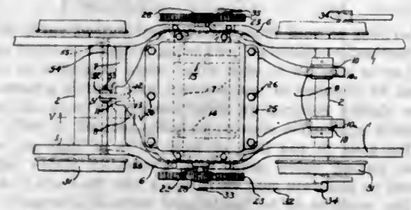
between one of the mains and said lamp and between the lamp and the switches in multiple for lighting said lamp in any one of the closed positions of any of the switches.

1,678,857. CONTROL APPARATUS. ARTHUR JOHN HALL, Gloucestershire, England, and PAUL L. MARDIS, Swissvale, Pa., assignors to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Original application filed July 15, 1919, Serial No. 311,025. Divided and this application filed July 1, 1924. Serial No. 723,599. 4 Claims. (Cl. 74—83.)



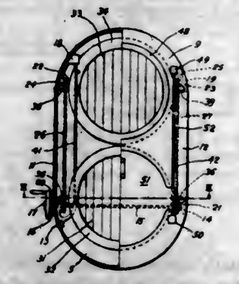
1. In a controller, the combination with a handle member having a transverse slot, of a stationary member normally adapted to freely slide in said slot, and means for barring access to said slot at will.

1,678,858. SWITCH MECHANISM. CHARLES H. HODGKINS, Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 11, 1922. Serial No. 551,608. 4 Claims. (Cl. 200—88.)



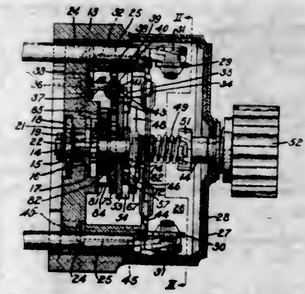
1. Switch mechanism comprising a movable switch member, a support, a pair of superimposed conductors mounted upon the support and insulated from one another, receptacles mounted on and supported by adjacent ends of the conductors for receiving a circuit-interrupting device and a contact member for engaging the switch member mounted on and supported by one of the conductors.

1,678,859. PRINTING-PLATE BLANK AND METHOD OF MAKING. ROBERT C. ISAKSEN, Flushing, N. Y., assignor, by mesne assignments, to Addressograph Company, Chicago, Ill., a Corporation of Delaware. Filed Aug. 2, 1926. Serial No. 126,443. 6 Claims. (Cl. 101—369.)



2. A printing plate blank having a plurality of dovetailed projections at opposite edges thereof and spaced apart between its ends.

1,678,860. FLEXIBLE CRADLE MOUNTING. HERBERT G. JUNGK, Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 16, 1922. Serial No. 588,521. 10 Claims. (Cl. 105—121.)

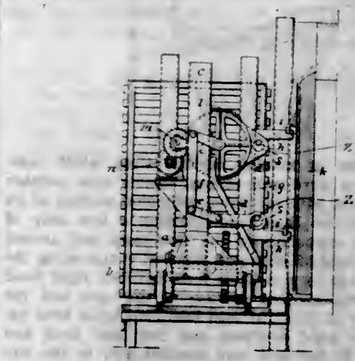


1. An electric-locomotive drive mechanism comprising a motor cradle disposed between the side frames of the cab support and pivotally supported on one of the driving axles thereof and having its free end yieldingly supported, a jack-shaft rotatably mounted in said cradle and having a drive gear secured at both ends thereof, and a motor mounted in said cradle having pinions secured to the ends of its armature shaft in co-operative relation to said drive gears.

1,678,861. SEARCHLIGHT. FRIEDRICH KALKNER, Mogeldorf, near Nuremburg, Germany, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Feb. 5, 1927, Serial No. 166,129, and in Germany Feb. 6, 1926. 5 Claims. (Cl. 240—41.)

1. The combination with a projector having a light aperture therein, of means for alternately locating a plurality of lenses in front of said light aperture, the lens-locating means being adapted to move the lenses in parallel planes in opposite directions at the same time.

1,678,862. SWITCH MECHANISM. JULIAN H. KENDIG, Edgewood, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Dec. 7, 1921. Serial No. 520,563. 32 Claims. (Cl. 200—124.)

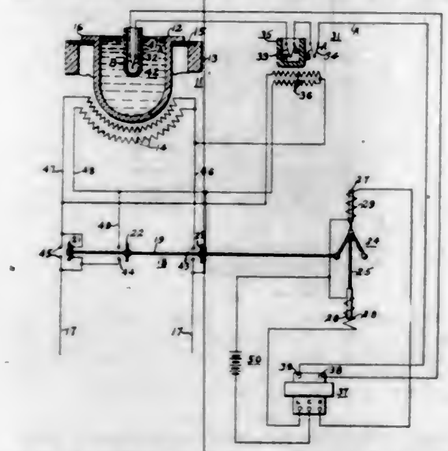


6. The combination with a contact member, a progressively movable switch member and means for arresting movement of the switch member in predetermined positions with respect to the contact member, of a fusible element for controlling the said arresting means.

1,678,863. METHOD FOR THE PREBURNING PREPARATION OF FUELS. JOSEPH MOSES WARD KITCHEN, East Orange, N. J. Filed Oct. 5, 1926. Serial No. 139,760. 14 Claims. (Cl. 44—1.)

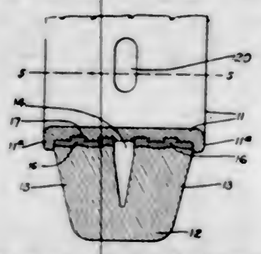
1. The method which consists in mixing coke of relatively large sized particles, high-volatile bituminous coal particles of relatively smaller size, and anthracite dust, subjecting the mixture to a bituminous-coal-melting temperature, and cooling the product of the process.

1,678,864. COKE-OVEN-DOOR-OPERATING APPARATUS. HEINRICH KOPPERS, Essen-Ruhr, Germany, assignor to The Koppers Development Corporation, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed Aug. 31, 1921, Serial No. 497,370, and in Germany Nov. 19, 1920. Renewed Oct. 29, 1927. 9 Claims. (Cl. 254—84.)



1. A device for operating the doors of coke ovens having in combination: a supporting member; spaced arms thereon for engaging said doors; means for swinging said supporting member; spaced members associated with said support for rotatably bearing in said swinging means.

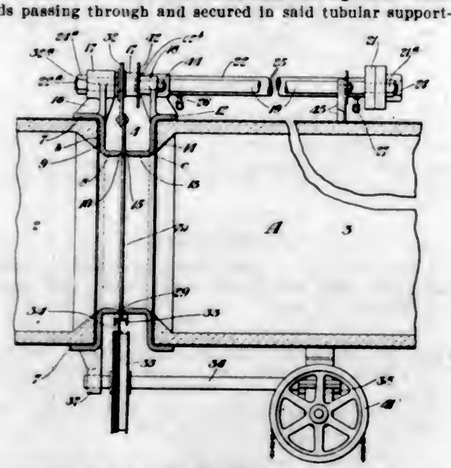
1,678,865. TEMPERATURE-CONTROL SYSTEM. ROLLO B. LINCOLN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 21, 1927. Serial No. 176,886. 9 Claims. (Cl. 219—20.)



9. In a temperature-control system for a body to be heated provided with heating means, in combination, temperature-responsive means for controlling the energization of the heating means comprising a thermo-couple re-

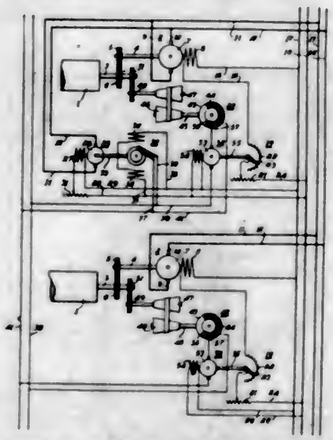
sponsive to the temperature of said body, an auxiliary body, means for heating said auxiliary body, a thermocouple responsive to the temperature of a region adjacent to said auxiliary-body-heating means, a thermo-

couple responsive to the temperature of the auxiliary body, and means for so connecting the thermo-couples that the last-named thermo-couple opposes the electromotive force of the first named thermo-couples.



1,678,866. PROCESS FOR MAKING VEHICLE TIRES. CHARLES M. MANLY, Richmond Hill, N. Y., assignor to Overman Cushion Tire Company, Inc., a Corporation of New York. Filed Feb. 28, 1923, Serial No. 621,784. Renewed July 23, 1925. 10 Claims. (Cl. 18—55.)

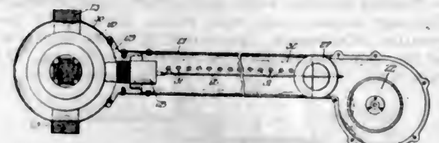
1. The process of making cushion tires which comprises molding a hard and strong, fusible core member into fused contact with the outer peripheral surface of an endless metallic tire base band, building a tire body of uncured rubber compound on the base band and around the exposed surface of said core member, compressing the uncured tire body to a definite form between rigid mold members and the exposed surface of the core and the outer periphery of the tire base band, applying heat externally to the mold members and the base band and through them to the said core member and to the tire body, while the latter is thus compressed, to vulcanize and permanently unite it to the base band and to melt the said core during the vulcanization of the tire body.



1,678,867. VALVE. FRANK R. MCGEE, Steubenville, Ohio. Filed Apr. 22, 1927. Serial No. 185,717. 3 Claims. (Cl. 251—51.)

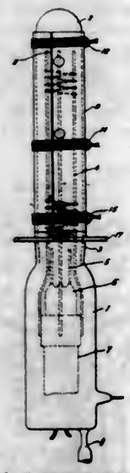
1. The combination with a pipe line comprising at least two sections which are spaced apart to form a valve-way, a valve seat rigidly secured to one of said sections, a second valve seat rigidly secured to the other of said sections, said first named valve seat being provided at three spaced points with integral outwardly extending lugs having horizontally extending tubular supporting portions, said second named valve seat being provided at three spaced points with pairs of circumferentially spaced outwardly extending lugs, a plate valve pivotally mounted on the tubular supporting portion of one of said lugs on said first named valve seat and movable in said valve-way, a plurality of pairs of pull rods secured at one end to said pairs of lugs on said second named valve seat, cross-heads secured to the other ends of each of said pairs of pull rods, thermally expansible rods having one end secured to said cross-heads and having their other ends passing through and secured in said tubular support-

ing portions of said lugs on said first named valve seat, said thermally expansible rods being adapted to move said valve seats relative to each other when expanded or contracted by changes in temperature, and flexible alinement plates rigidly secured at their centers to each of said thermally expansible rods and rigidly secured at their respective ends to the lugs of said pairs of lugs on said second named valve seat, said alinement plates being adapted to maintain said valve seats and the ends of said pipe line sections in horizontal and vertical alinement.



1,678,868. REGULATOR SYSTEM. WILLIAM E. MENZIES, Irwin, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed June 14, 1923. Serial No. 645,278. 14 Claims. (Cl. 172—293.)

1. In a regulator system, a motor to be regulated, pilot motor means for varying the excitation of said motor, and means for energizing said pilot motor means comprising an alternating-current generator and rotary contactor means actuated in accordance with the speed of said motor, said generator and said rotary contactor means cooperating to energize said pilot motor means upon a

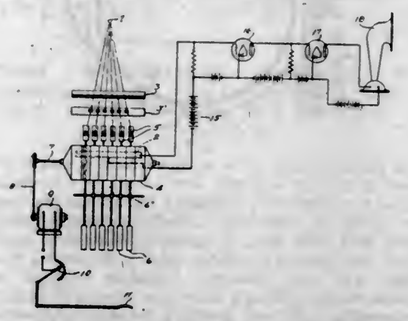


variation in the speed of said motor from normal, and to control the direction of rotation of said pilot motor means in accordance with the direction of said variation from normal.

1,678,869. STATIC DISSIPATOR. MONTFORD MORRISON, Chicago, Ill. Filed Dec. 1, 1922. Serial No. 604,140. 3 Claims. (Cl. 175—264.)

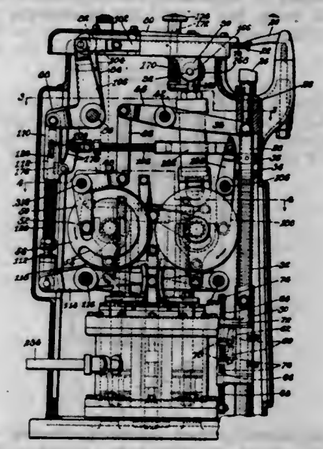
1. Apparatus for the dissipation of static electricity comprising a conductor, a source of high-tension electricity connected to said conductor and to a second conductor enclosing the first conductor, an air gap between said conductors, openings in said second conductor whereby air passing through said air gap may pass from said gap into contact with the material to be treated, and a non-conducting lining in said second conductor, said lining having openings of less area than the openings in the conductor and aligned therewith.

1,678,870. VACUUM-TUBE DEVICE. ILIA EMMANUEL MOUROMTSEFF, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Apr. 28, 1925. Serial No. 26,338. 5 Claims. (Cl. 250—27.5.)



1. A space-current device, comprising a plurality of electrodes, and a container therefor, comprising a metal portion and a glass portion, and means for preventing the collapse of said metal portion thereof during evacuation comprising a metal reinforcing jacket therearound.

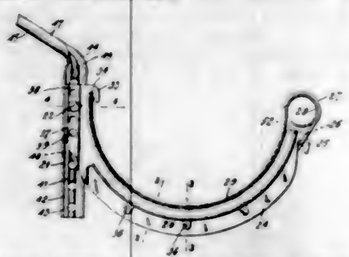
1,678,871. CENTER BEARING. JOHN F. O'CONNOR, Chicago, Ill., assignor, by mesne assignments, to W. H. Miner, Inc., a Corporation of Delaware. Filed June 25, 1923. Serial No. 647,436. 2 Claims. (Cl. 308—223.)



1. In car construction, the combination with a truck bolster; of a center bearing plate rigidly secured to the truck bolster, said plate being provided with an upstanding flange; a body bolster; a center bearing plate rigidly secured to the body bolster, said plate being provided with a downwardly projecting portion adapted to bear on said truck bolster plate and having a horizontally disposed annular flange; a plurality of vertically removable blocks interlocked with said upstanding flange and overlying said annular flange for detachably connecting said plates; and means for maintaining said blocks in interlocking engagement.

1,678,872. METHOD AND APPARATUS FOR PRODUCING MUSICAL SOUNDS. RALPH K. POTTER, New York, N. Y., assignor to American Telephone and Telegraph Company, a Corporation of New York. Filed Jan. 2, 1926. Serial No. 78,733. 26 Claims. (Cl 84—1.)

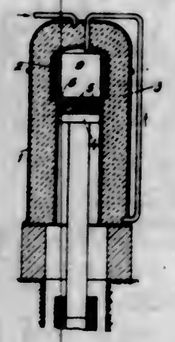
9. In a musical instrument in which the sound producing mechanism comprises a light sensitive cell, a source of light therefor, a screen interposed between the cell and the light source such that when said screen is moved across the light beam from said source, the light of said beam will be intercepted in regular sequence so as to produce a current in said cell corresponding to a note having fundamental pitch, means for translating said current into sound, means for varying the sound of said note comprising means for varying the intensity of said light source.



1,678,873. UPPER-SHAPING MACHINE. ARTHUR F. PYM, Marblehead, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Jan. 26, 1925. Serial No. 4,810. 56 Claims. (Cl. 12—14.)

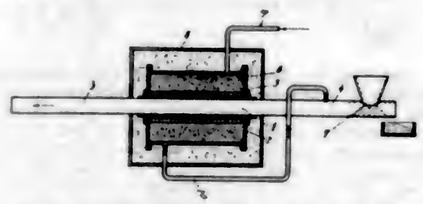
1. A machine for shaping upper materials over a form having, in combination, upper shaping mechanism,

power-driven means for effecting relative movement of said upper shaping mechanism and the form to shape the upper materials, and controlling means for bringing the machine to a stop at any point in the relative movement of said upper shaping mechanism and the form comprising a manually operated member adapted to determine variably by the extent of its movement the stopping position of the machine.



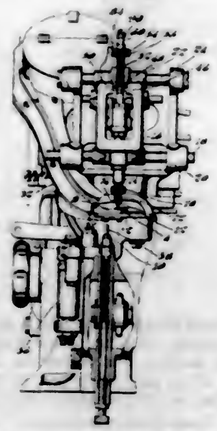
1,678,874. GUTTER HANGER. MAX RACHLIN, New York, N. Y. Filed July 9, 1927. Serial No. 204,513. 2 Claims. (Cl. 108—29.)

1. A gutter hanger circle stamped from a single strip of sheet metal bent edgewise into an arc of a circle and including a vertical web extending throughout the length of the circle, an outwardly extending horizontal portion merging with said web, an upwardly extending portion merging with said horizontal portion, a horizontal flange merging into said upwardly extending portion, said horizontal flange forming a gutter seat, and a plurality of ribs formed on said web extending substantially radially in relation to said horizontal flange.



2. A gutter hanger shank stamped from a single strip of sheet metal to channel-shape and comprising a vertically extending stem apertured substantially throughout its length, a roof attaching portion extending at an angle to said stem and twisted in relation to the latter, and a rib formed at the juncture of said stem and roof attaching portion, the sides of the channel structure being drawn throughout the length of said strengthening rib so that, after the twisting operation, the free edges of the drawn portions are flush with the free edges of the undrawn portions of said sides.

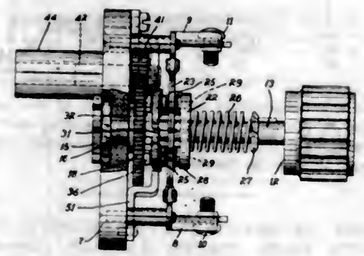
1,678,875. ELECTRIC BRIGHT ANNEALING FURNACE. WILHELM ROHN, Hanau-on-the-Main, Germany, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany, a Corporation of Germany. Filed Oct. 23, 1925, Serial No. 64,349, and in Germany Dec. 15, 1924. 4 Claims. (Cl. 266—1.5.)



1. In an electric bright annealing furnace, in combination, an elongated airtight furnace shell closed at the top and open at the bottom and filled with a protective gas during the annealing operation, a refractory lining within said shell, electric heating means in the upper portion only of said shell, and means for introducing the goods to be annealed into said shell from the bottom.

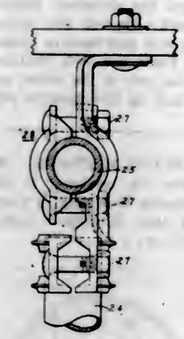
1,678,876. ELECTRIC BRIGHT-ANNEALING FURNACE FOR CONTINUOUSLY BRIGHT ANNEALING. WILHELM ROHN, Hanau-on-the-Main, Germany, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, near Berlin, Germany, a Corporation of Germany. Filed Oct. 23, 1925, Serial No. 64,351, and in Germany Nov. 1, 1924. 8 Claims. (Cl. 266—1.5.)

1. In an electric bright annealing furnace, the combination of a metal container forming the annealing chamber proper, an airtight shell surrounding said chamber, electric resistor members located in the space between said container and said shell and means for supplying a protective gas to the space between said container and said shell and to the interior of said container, a plurality of such systems being located side by side and the goods traversing adjacent systems in opposite direction, for the purpose of effecting a heat recovery during the annealing and cooling process.



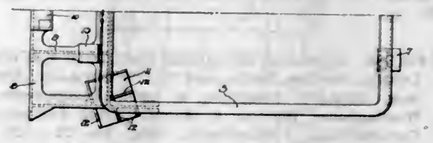
1,678,877. FASTENER-INSERTING MACHINE. FRED A. RUMNEY, Boston, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed July 20, 1926. Serial No. 123,787. 27 Claims. (Cl. 218—14.1)

1. A fastener-inserting machine having a punch, and a plunger housed within the punch having its end portion shaped to constitute with the cutting portion of the punch a fastener-clenching surface.



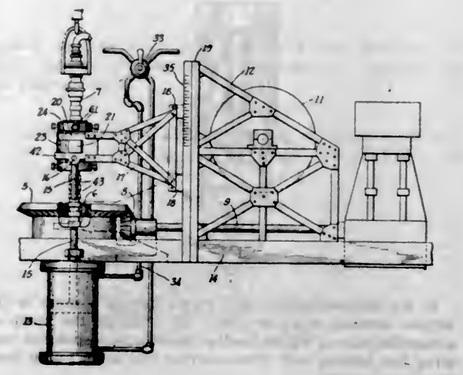
1,678,878. SWITCH MECHANISM. MAURITS J. SANDIN, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Aug. 22, 1922. Serial No. 583,607. 13 Claims. (Cl. 200—124.)

4. The combination with a rotatable switch member and a tension member therefor, means for storing energy in said tension member, a carrier for said member, a stop member supported on the carrier, a gear wheel provided with stop members in position to be engaged by the first named stop member at predetermined positions of the said switch member, a second gear wheel



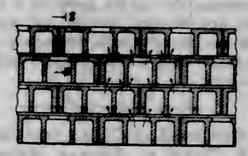
meshing with the first named gear wheel, a fusible member for normally maintaining the second gear wheel against movement, and a heating element in series with the switch for softening the fusible element to permit movement of the gear wheels.

1,678,879. FITTING FOR TUBULAR SWITCHBOARDS. HOWARD A. SELAH, Homewood, Pa., assignor to Westinghouse Electric and Manufacturing Company, a Corporation of Pennsylvania. Filed Oct. 23, 1925. Serial No. 64,479. 2 Claims. (Cl. 24—135.)



1. A frame-work fitting comprising a pair of clamping members having arcuate-clamping surfaces for substantially encircling a cylindrical member, each clamping member being provided with perforate bolt-receiving flanges constituting a part of the clamping surface and having compression lugs extending beyond the adjacent faces of the flanges and disposed in spaced relation on each flange for engaging the surface of the cylindrical member at a point between the flanges.

1,678,880. LOCOMOTIVE MUD RING. WILLIAM M. SHEEHAN, St. Louis, Mo., assignor to Commonwealth Steel Company, Granite City, Ill., a Corporation of New Jersey. Filed Dec. 16, 1926. Serial No. 155,323. 14 Claims. (Cl. 105—46.)



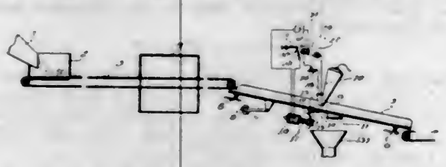
1. As a new article of manufacture, a locomotive mud ring having a deck plate formed therewith.

1,678,881. WELL-DRILLING APPARATUS. WALDO SHELDON, Greenwich, Conn. Filed Oct. 11, 1923. Serial No. 667,946. 10 Claims. (Cl. 255—22.)

1. In well drilling apparatus, a rotary table supported for rotation in a fixed plane and having a passage for the drill stem, a chuck having a body to be secured to and rotate with the drill stem and a non-rotating thrust transmitting member with projecting arms and power mechanism detachably connected with said arms for raising the chuck or for lowering the same into supported position upon the table.

1,678,882. BUILDING BLOCKS. DAVID F. SHOPE, Portland, Oreg., assignor of one-half to Glen Shope Pickens, Fort Sheridan, Ill., and one-half to Birdie Shope Snyder, Duluth, Minn. Filed Nov. 27, 1925. Serial No. 71,638. 1 Claim. (Cl. 72—41.)

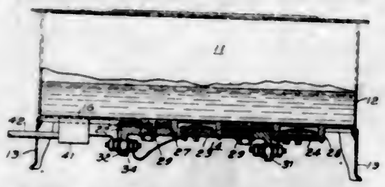
A wall of building blocks, each of the blocks having hollows therein, and each having openings near its longitudinal central portion extending entirely through the



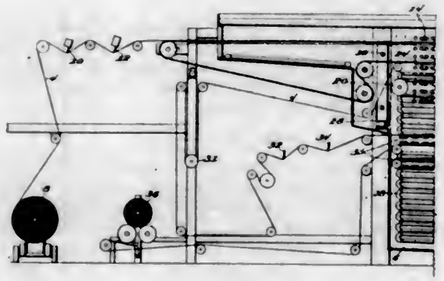
block from one side to the other, said blocks in one row being laid staggered with reference to and spaced from the blocks in the adjacent rows, and with the hollow sides downward, and cementitious material positioned between the exterior wall edges of each block and the adjacent underlying blocks, whereby air can circulate through the blocks, and between the adjacent interior side portions of the blocks, from the bottom of the wall to the top.

1,678,883. TOTALLY-INCLOSED ELECTRIC MACHINE. LUDWIG STEINER, Berlin, and VICTOR GUTMANN, Nuremberg, Germany, assignors, by mesne assignments, to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Jan. 22, 1926, Serial No. 83,144, and in Germany Apr. 27, 1925. 9 Claims. (Cl. 172—36.)

3. An inclosed submersible motor having a sump in the bottom thereof, a sump pump for draining the sump of accumulations of liquid, and a liquid-level-responsive coupling for driving and disconnecting the sump pump from the motor shaft.



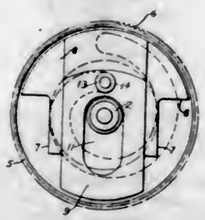
1,678,884. METALLURGICAL SEPARATOR. ANDREW T. SWEET, Houghton, Mich., assignor of one-fourth to William G. Rice and one-fourth to Herman Gundlach, Houghton, Mich., and one-tenth to Philip B. Woodworth, Chicago, Ill. Filed Oct. 21, 1926. Serial No. 143,132. 6 Claims. (Cl. 209—111.)



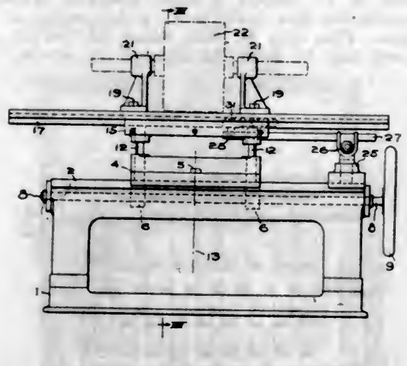
1. A process for separating minerals from ore which consists in causing the ore to move in a stream across a beam of light and dividing out of said stream fractional masses of the ore according to variation of light reflecting values between said divided masses and the remainder of the ore stream.

1,678,885. THERMOSTATICALLY-CONTROLLED HEATING UNIT. IRVIN G. THOMAS, Mansfield, Ohio, assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 10, 1927. Serial No. 174,147. 6 Claims. (Cl. 219—43.)

2. The combination with a container, a heating unit therefor, and a thermostatic device responsive to the temperature of material heated in said container for intermittently decreasing and increasing the energization of said heating unit, of a second thermostatic device responsive to the temperature of that portion of the container disposed in thermal contact with the heating unit for de-energizing said heating unit when a relatively high temperature obtains in the heating unit.

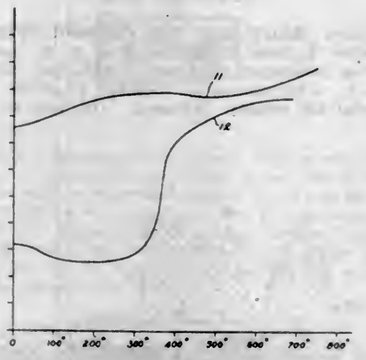


1,678,886. APPARATUS FOR THE RECOVERY OF SOLVENTS FROM COATED FABRICS. HERBERT S. THOMPSON, Peekskill, N. Y. Filed Feb. 17, 1927. Serial No. 169,119. 11 Claims. (Cl. 34—48.)



1. Apparatus for recovering solvents from coated fabrics, comprising a closed chamber, means for leading a coated web through the chamber, means for heating the web, and condensers adjacent the walls of the chamber at the sides of the web arranged to create a circulation of the vapor driven from the web coating across the web from one side of the web to the other and down one side, across the bottom and up the opposite side of the chamber.

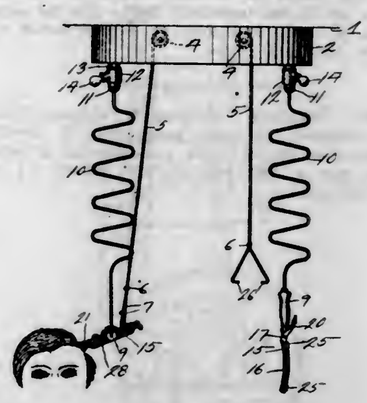
1,678,887. BALANCING MACHINE. WILLIAM E. TRUMPLER, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Mar. 2, 1926. Serial No. 91,769. 9 Claims. (Cl. 73—51.)



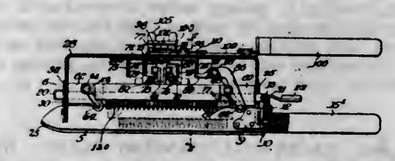
1. In a balancing machine, a counterbalance device comprising a movable weight, a plate having radial guide means for said weight, and a disk rotatable with respect to said plate and having spiral guide means for adjusting said weight along said radial guide means.

1,678,888. BALANCING MACHINE. WILLIAM E. TRUMBLER, Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed May 27, 1926. Serial No. 11,924. 9 Claims. (Cl. 73—51.)

1. In a balancing machine, the combination with a supporting base, of a plurality of leaf springs mounted perpendicular to said base in planes that intersect at a common axis, and a vibrating bed mounted on the leaf springs.



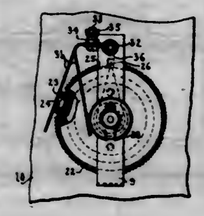
1,678,889. THERMOSTATIC MATERIAL. VICTOR G. VAUGHAN, East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvania. Filed Sept. 12, 1925. Serial No. 55,890. 10 Claims. (Cl. 297—15.)



1. A heat responsive device comprising metallic elements, one of said elements being an alloy comprising cobalt and iron, and the other element being nickel steel.

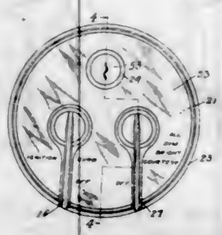
1,678,890. MARCELLING AND PERMANENT-WAVE IRONS. KATHERINE WALL, Omaha, Nebr. Filed Sept. 13, 1927. Serial No. 219,827. 4 Claims. (Cl. 132—36.)

1. A marcelling iron comprising a handle member, a fork carried by said handle member and having a plurality of arms, means for heating said fork, a corrugated plate pivotally mounted on the fork and positioned whereby the plurality of arms will be received between the corrugations thereof, a protecting plate for the under side of said iron, said protecting plate being provided with means whereby when it is positioned said plate will be held against displacement by members overlying the corrugated plate.



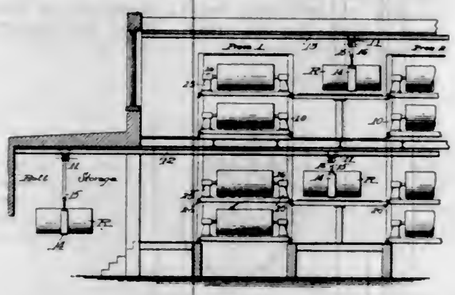
1,678,891. HAIR WAVER. ARTHUR E. WALSH, Chicago, Ill. Filed May 10, 1924. Serial No. 712,192. 19 Claims. (Cl. 132—32.)

1. In a device of the class described, the combination with a waving unit of a plurality of independent heating and waving units movable separately and successively into cooperation therewith.



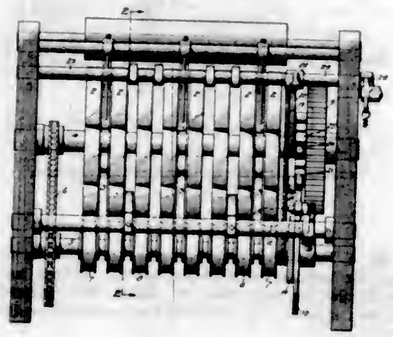
1,678,892. RESISTANCE-CONTROL DEVICE. HENRY J. WIEGAND, Milwaukee, Wis., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed May 15, 1922. Serial No. 561,136. 16 Claims. (Cl. 201—55.)

1. In resistance control apparatus, the combination with a rigid metallic frame, of a plurality of independently operable sets of resistance varying elements carried



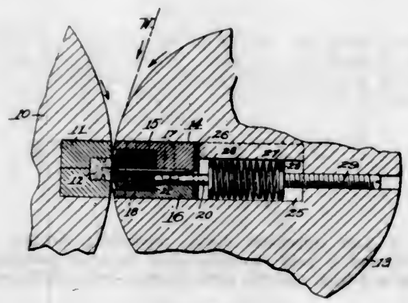
by said frame, such elements of each set comprising a resistor and a directly engaging contactor and operating means for said individual sets of elements comprising independently rotatable concentric shafts carried by said frame and means for securing certain of the elements of each set to the individual shafts and for adjusting said shafts axially and angularly with reference to said elements and said frame.

1,678,893. SWITCH. CHARLES E. WILSON, Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Filed May 6, 1922. Serial No. 558,852. 1 Claim. (Cl. 200—44.)



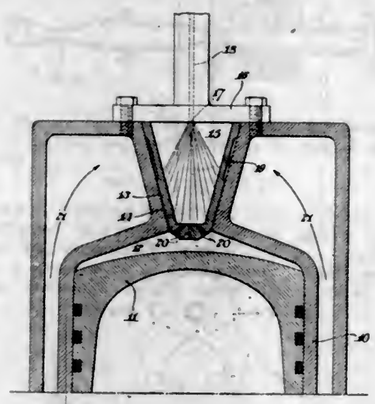
In an automobile, in combination, an electric switch having a battery circuit terminal, an ignition circuit terminal and a parking light circuit terminal, and a lock controlled switch member movable when in unlocked condition to connect battery terminal with either the ignition terminal or parking light terminal or to off position, and movable when in locked condition to connect the battery terminal only with the parking light terminal or to off position.

1,678,894. PAPER-ROLL-CHANGING PLANT. HENRY A. WISE WOOD, New York, N. Y., assignor to Wood Newspaper Machinery Corporation, New York, N. Y., a Corporation of Virginia. Original application filed Sept. 9, 1918, Serial No. 253,314, Patent No. 1,464,463, dated Aug. 7, 1923. Divided and this application filed Mar. 2, 1923, Serial No. 622,368. Renewed Jan. 5, 1928. 5 Claims. (Cl. 101—1.)



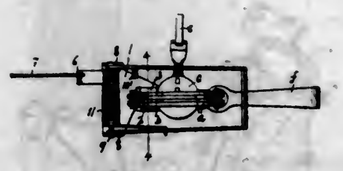
1. The combination with a series of printing presses, of a support for a plurality of web rolls spaced from the end thereof to permit new web rolls to be moved along transversely between the support and printing presses while the latter are running, said support also having a space beyond it for a similar purpose.

1,678,895. THROW-OUT MECHANISM FOR PRINTING-PRESS DELIVERY. HENRY A. WISE WOOD, New York, N. Y., assignor to Wood Newspaper Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed May 18, 1923, Serial No. 639,858. Renewed Jan. 10, 1928. 23 Claims. (Cl. 93—93.)



1. A delivery mechanism for printed products adapted to deliver a bundle of products and throw out one for inspection and provided with means for rectifying the count, so that each bundle will contain the full number of products desired in one bundle.

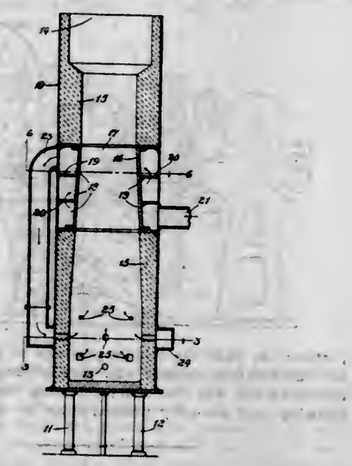
1,678,896. KNIFE BOX FOR CUTTING CYLINDERS. HENRY A. WISE WOOD, New York, N. Y., assignor to Wood Newspaper Machinery Corporation, New York, N. Y., a Corporation of Virginia. Filed Oct. 3, 1923. Serial No. 666,364. 6 Claims. (Cl. 164—67.)



3. The combination with a cutting cylinder for a web folding machine, of a saw toothed cutting blade smooth on one side and having teeth perpendicular on one edge to the length of the blade and slanting on the other edge so as to come to a sharp perforating point and beveled on the slanting edge.

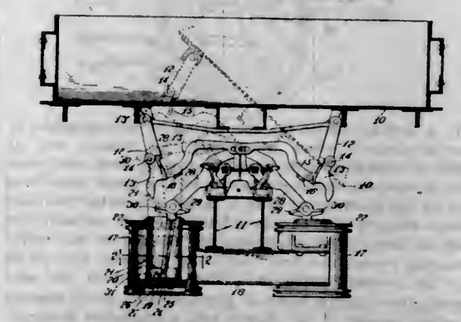
1,678,897. INTERNAL-COMBUSTION ENGINE. EDWARD T. ADAMS, Phoenix, Ariz., assignor to Fairbanks, Morse & Co., Chicago, Ill., a Corporation of Illinois. Filed Mar. 15, 1923. Serial No. 625,185. 9 Claims. (Cl. 123—33.)

1. In an internal combustion engine, a frusto-conical pre-combustion chamber comprising a liner and having walls of substantially uniform thickness, adapted to be closely surrounded by a cooling fluid, and a closure means for said chamber.



1,678,898. STRIKER ATTACHMENT FOR ANIMAL TRAPS. ARTHUR N. ARMSTRONG, Norwich, N. Y., assignor of one-half to Herman J. Sommers, Norwich, N. Y. Filed Dec. 10, 1926. Serial No. 153,894. 4 Claims. (Cl. 43—90.)

1. A striker attachment for animal traps of the twin jaw type, comprising a plate having at one end a loop open at one side for receiving a portion of the trap frame, movable means on the loop for locking it immovably to said frame, a spring-actuated striker pivoted to the plate, and means on the plate adapted to be controlled by one of the trap jaws for holding the striker against the action of its spring.

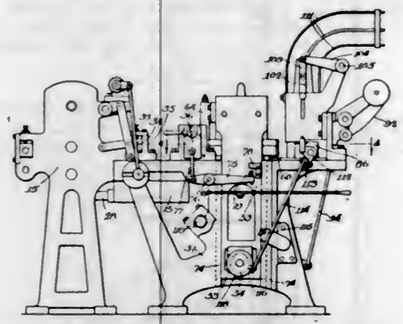


1,678,899. CUPOLA. ALPHONSE EDWARD BAILLOT, Hull, Quebec, Canada, assignor of fifty-one one-hundredths to Archibald Harold Coplan, Ottawa, Ontario, Canada, and forty-nine one-hundredths to Archibald Hymen Coplan, Hull, Quebec, Canada. Filed Mar. 5, 1926. Serial No. 92,619. 2 Claims. (Cl. 266—14.)

1. In a cupola furnace of the character described a built-in tubular metal member replacing sections of the refractory lining of the furnace and in spaced relationship to the wall of the furnace to form a heating chamber encircling the interior of the furnace, a plurality of superimposed spaced partitions in said chamber forming annular air passageways, said passageways communicating with one another through suitable non-aligning openings arranged to cause the air to travel the full extent of each passageway before entering the adjoining passageway and to reverse the direction of the air flow as it passes from one air passageway to another, an air blast intake at one end of the chamber and a preheated air discharge outlet at the other end of the chamber, a plurality of spaced substantially cone-shaped

tuyères in the furnace wall, an adjustable air belt communicating with the tuyères, and a conduit without the furnace connecting the air belt with the preheated air discharge outlet.

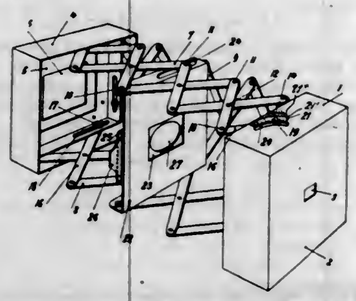
1,678,900. FLUID-PRESSURE-OPERATED MECHANISM FOR DUMP CARS. JAMES D. BENBOW, Aurora, Ill., assignor to Western Wheeled Scraper Company, Aurora, Ill., a Corporation of Illinois. Original application filed Feb. 7, 1924, Serial No. 691,188. Divided and this application filed Jan. 28, 1926. Serial No. 84,295. 9 Claims. (Cl. 74—108.)



1. The combination with a cylinder and piston, of a plunger bar having a bearing surface at its lower end seated on the piston, and oppositely disposed hooks carried by the piston adapted to engage opposite side portions of the bar to hold said bar in operative relation to the piston

---

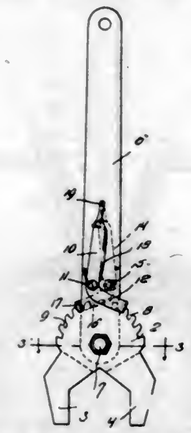
1,678,901. MACHINERY FOR CONVERTING SHEET MATERIAL INTO RECEPTACLES. EDWARD CRAIG, St. Joseph, Mich., assignor to Saranac Automatic Machine Corporation, Benton Harbor, Mich., a Corporation of Delaware. Filed Aug. 18, 1924. Serial No. 732,682. 33 Claims. (Cl. 93—42.)



1. The method of making a receptacle from sheet material, comprising the blanking of the sheet material in the desired manner, preparatory to the folding thereof, thereafter folding the sheet material along predetermined lines formed on the blank, thereby forming overlapping

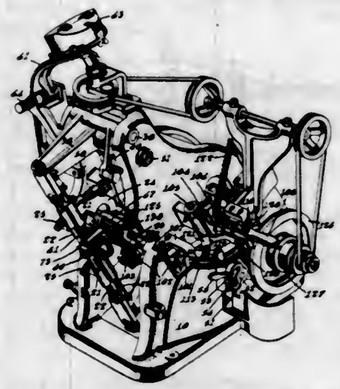
portions at opposite sides of the receptacle, so that a substantially rectangular receptacle will be formed with four outwardly inclined sides, temporarily pressing inwardly the two opposite sides having said overlapping

portions, so that the middle portions of these two sides are substantially upright and parallel during the fastening operation, and thereafter releasing the receptacle and allowing said inwardly pressed sides to spring outward.



1,678,902. CAMERA VIEW FINDER. ANDRÉ LÉON VICTOR CLEMENT DEBRIE, Paris, France. Filed Sept. 20, 1926, Serial No. 136,667, and in France Dec. 7, 1925. 3 Claims. (Cl. 33—64.)

1. A finding device for the taking of photographic or cinematographic views, comprising two frames one of which is provided with a sight aperture and the other with an opening the size of which is in a given ratio with that of the plate to be used, a series of parallel motions, means whereby the two last links of each extremity of each of these parallel motions are secured to the corresponding frame, the first link being pivotally secured to and the second sliding in a slot provided in the said frame, there being a scale graduated in focal lengths provided on one of the frames and a projection borne by one end link of one parallel motion giving on said scale the focal length of the objective to be used for obtaining the field seen through the two frames, which focal length is proportional to the distance between the two frames.

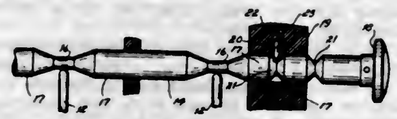


1,678,903. RATCHET WRENCH. LOUIS M. GIBSON, Niangua, Mo. Filed Mar. 29, 1927. Serial No. 179,377. 1 Claim. (Cl. 81—59.)

In a ratchet wrench of the class described, a handle, a head, the inner end portion thereof being slotted to receive the inner end of the handle, a pivot extending through the slotted head and said handle, a pair of co-acting jaws on the outer edge portion of the head, ratchet teeth formed on the inner edges of the slotted head; certain of the ratchet teeth on each edge being disposed in one direction, the remaining teeth in each edge being disposed in the opposite direction, a pair of ratchet levers pivoted on the opposite sides of the handle, the pivoted ends of the levers being disposed laterally and thence inwardly in opposite directions to provide a pair of opposed pawls ex-

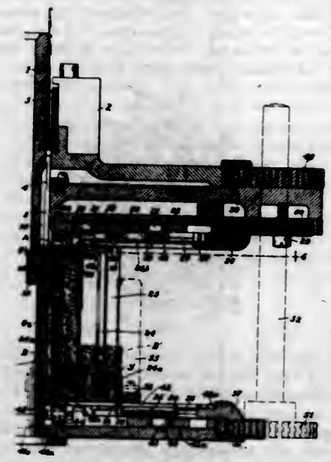
tending across the respective side edges of the handle, said pawls adapted for engagement with the respective series of teeth, and said resilient means for holding the pawls in engagement with the ratchet teeth.

1,678,904. FASTENER-INSERTING MACHINE. PERLEY R. GLASS, Wayland, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J., a Corporation of New Jersey. Filed Mar. 7, 1924. Serial No. 697,553. 33 Claims. (Cl. 218—15.2.)



1. A fastener-inserting machine comprising punching mechanism including a laterally movable punching couple, fastener-inserting mechanism including a laterally movable fastener-inserting and clenching couple separate from said punching couple, and mechanism for feeding the work relatively to said couples, said couples being movable alternately to a common working position from positions at opposite sides of said working position.

1,678,905. PRESSURE-RELIEF MEANS. MORRIS J. GOLDBERG, Beloit, Wis., assignor to Fairbanks, Morse & Co., Chicago, Ill., a Corporation of Illinois. Filed Apr. 1, 1927. Serial No. 180,292. 3 Claims. (Cl. 230—24.)

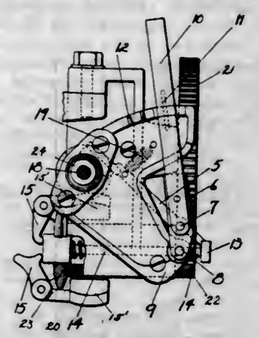


1. In an unloading device for an air compressor having a cylinder and a valve in the cylinder, a shaft having a plurality of portions of reduced diameter and arranged to

be moved transversely to the path of travel of said valve; a portion of the valve normally operating adjacent one of the reduced portions of the shaft, and a shaft positioning

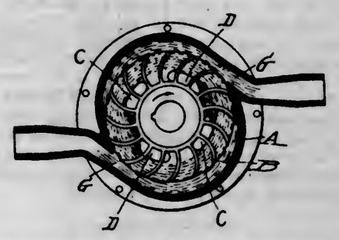
means adapted to coact with other of said reduced portions to position the shaft definitely in each of several positions.

1,678,906. NEEDLE-SELECTOR MECHANISM FOR KNITTING MACHINES. KENNETH HOWIE, Norristown, Pa., assignor to Wildman Mfg. Co., Norristown, Pa., a Corporation of Pennsylvania. Filed May 19, 1926. Serial No. 110,184. 43 Claims. (Cl. 66—50.)



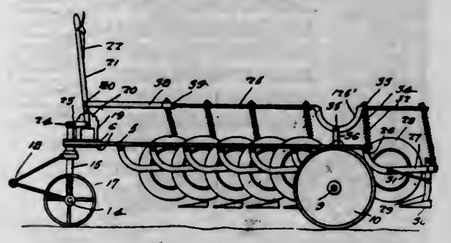
1. Needle selector mechanism for knitting machines for producing designs in the fabric comprising a series of needle selector plates stacked one upon another having edge teeth to control the needles, means for advancing said plates to select the needles and for withdrawing them after selecting the needles, and means for operating the needles, each of said toothed plates extending along a section of the needle bed to control a group of needles, substantially as described.

1,678,907. TRICK WHEEL FOR KNITTING MACHINES. KENNETH HOWIE, Norristown, Pa., assignor to Wildman Mfg. Co., Norristown, Pa., a Corporation of Pennsylvania. Filed May 21, 1927. Serial No. 193,280. 5 Claims. (Cl. 66—50.)



1. A trick wheel for knitting machines having insert pieces mounted therein and spaced apart from each other, some of said insert pieces having flanges extending across the spaces between the said pieces to provide shoulders for engaging the needle butts, others of said insert pieces having no flanges to leave adjoining spaces free to receive the needle butts, substantially as described.

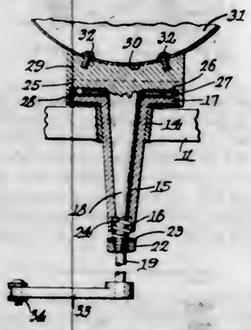
1,678,908. GOVERNOR CONTROL FOR INTERNAL-COMBUSTION ENGINES. CHARLES B. JAHNKE, Beloit, Wis., assignor to Fairbanks, Morse & Co., Chicago, Ill., a Corporation of Illinois. Filed Oct. 9, 1924. Serial No. 742,631. 9 Claims. (Cl. 123—113.)



1. In an internal combustion engine, in combination with a valve, a push-rod therefor, a pivoted lever adapted to control said valve, an adjustable fulcrum for said lever, means for imparting an arcuate movement to said fulcrum, and a governor controlling said member, a portion of said pivoted member being adapted for operative connection directly with the said governor, and another portion thereof being adapted as an abutment for said push-rod.

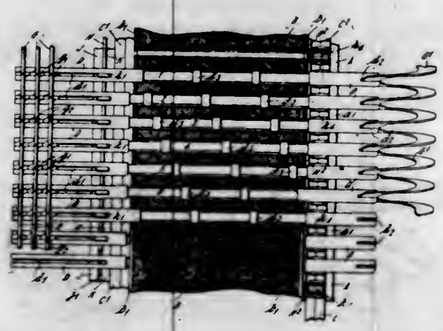
1,678,909. PUMPING APPARATUS FOR HANDLING GASES AND LIQUIDS. IRVING C. JENNINGS, South Norwalk, Conn. Filed Sept. 6, 1927. Serial No. 217,669. 6 Claims. (Cl. 230—79.)

1. In a pump, employing liquid as the pumping medium a rotor having displacement chambers, a casing arranged eccentrically to the rotor, a gas inlet and outlet, and a liquid outlet or port arranged at a point in the casing where the operating liquid tends to exert a compression effect.



1,678,910. AGRICULTURAL IMPLEMENT. LEE L. KELLER, Wellington, Colo. Filed Apr. 13, 1927. Serial No. 183,484. 1 Claim. (Cl. 97—287.)

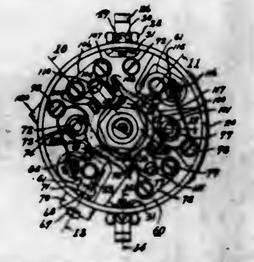
An apparatus of the class described, including a main V-shaped frame, a rear axle on the frame, wheels on the rear axle, a front axle, wheels on the front axle, a



standard rising from the front axle through an opening in the apex of the main frame, a bracket, a lever mounted on the bracket, an arm extending from the lever, a pin and slot connection between the arm and the standard whereby the forward end of the main frame may be raised and lowered by swinging the lever, arms pivoted to the main frame, implements on the last mentioned arms, links connected to the last mentioned arms, an auxiliary V-shaped frame, arms swingably mounted on the rear axle and pivotally connected to the intermediate portions of the auxiliary V-shaped frame, and springs on the links between the frame and the second mentioned arm.

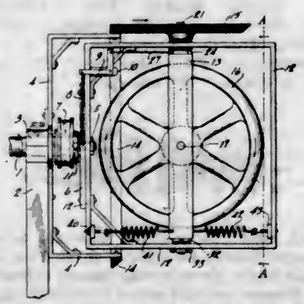
1,678,911. DIRIGIBLE HEADLIGHT. MARION S. KELLEY, South Bend, Wash. Filed Oct. 25, 1926. Serial No. 144,114. 1 Claim. (Cl. 240—62.)

In a device of the class described, a substantially horizontal support having a conical hub, a conical bearing seated in the hub and provided at its upper end with a disk-like head extended beyond the hub, a conical shaft journaled in the bearing and provided with a top piece in the form of a solid block having a recess in its bottom, the head of the bearing being received in the recess, anti-friction elements housed in the recess and located between the top piece and the head, a lamp, securing elements connecting the lamp to the top piece, spring means for moving the shaft endwise to hold the top piece engaged with the anti-friction elements, and means for rotating the shaft from the steering mechanism of a vehicle.



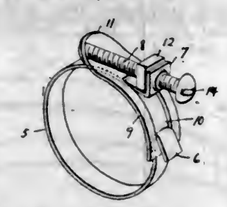
1,678,912. ELECTRIC MOTOR. ROBERT STAFFORD MCLEOD, Manchester, GEORGE ERIC MASON, Hale, and WILLIAM STANSFIELD, Chorlton-cum-Hardy, England. Filed Mar. 5, 1925. Serial No. 13,310, and in Great Britain Mar. 5, 1924. 8 Claims. (Cl. 172—120.)

1. The improvement in electric motors of the squirrel cage rotor type which consists in providing a number of separate bearing surfaces between the rotor bars and the holes or channels in the core discs in which they are located, the peripheries of the bars between the said bearing surfaces being clear of the walls of the channels, the said bearing surfaces in adjacent bars being located at differing distances axially from the end of the rotor; substantially as described.



2. In a squirrel cage rotor for an electric motor in combination:—a magnetic core; a series of rotor bars for the said core having radial slots in the ends thereof; conductors connecting the ends of the bars consisting of a metallic strip wound on edge so as to form a cylindrical spiral, said spiral being then bent so that its axis forms a circle, the adjacent ends of the strip being connected together and the convolutions of the spiral being secured in position in slots in the ends of the bars; end connections for the bars having comparatively low ohmic resistance and ferruginous material located in contact with the last mentioned end connections and adapted to increase the inductance of the said connections; substantially as described.

1,678,913. IGNITION TIMER DISTRIBUTOR. LESLIE O. PARKER, Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Apr. 6, 1925. Serial No. 20,949. 4 Claims. (Cl. 200—21.)



2. An ignition device comprising in combination, a housing; a cam located centrally of said housing; a stationary bracket mounted in said housing; a plate adjustably secured to said bracket and in electrical engagement therewith; a bridging conductor extending across the bracket and insulatingly secured at both its ends to said bracket; an interrupter arm movably supported on, but insulated from said bracket; means for connecting the said arm to the bridging conductor; a second movable contact arm secured to, but insulated from, the plate; means connecting the second contact arm to the bridging conductor; and stationary contacts carried on the bracket and plate adapted to be engaged by the first and second mentioned conductor arms respectively.

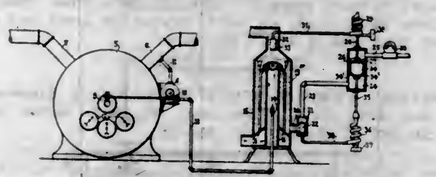
1,678,914. SPEED GOVERNOR. RODNEY G. RICHARDSON, Chicago, Ill. Filed Apr. 9, 1923. Serial No. 630,705. 18 Claims. (Cl. 264—1.)

1. In a shaft governor, a frame rigidly attached to the engine shaft, a second frame pivotally supported on said first frame, a flywheel rotatably supported on said second frame, a shaft for driving said flywheel disposed perpendicular to its axis of rotation and extending through one of the supporting pivots for said second frame, means for rotating said last mentioned shaft when the frames are rotated by the engine shaft, means for communicating movement of the second frame about its pivots to the engine control equipment, and an adjustable spring opposing such movement.

1,678,915. HOSE CLAMP. GEORGE W. RIDDLE, Chillicothe, Mo. Filed Sept. 8, 1927. Serial No. 218,240. 1 Claim. (Cl. 24—19.)

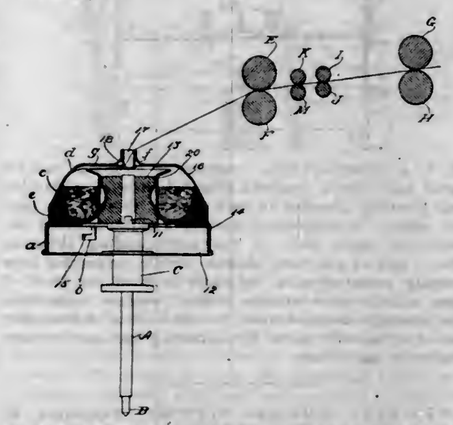
In a hose coupling of the character described, a metallic band, the ends of which are normally separated, a curved plate for engagement at the ends of the band, a detachable connection between one end of the plate and one end of the band, a sliding connection between the opposite end of the band and the plate adjacent its opposite end, a sliding connection between the opposite end of the band and the plate adjacent its opposite end and means between said ends of the band and plate whereby the ends may be forcibly separated to cause the compression of said band, said means consisting of a tangentially extending pin threaded to the band and a pocket at the adjacent end of said plate within which the end of said pin engages.

1,678,916. BUMPER. FREDERICK C. ROBIE, Cleveland, Ohio, assignor to The Eaton Axle & Spring Company, Cleveland, Ohio, a Corporation of Ohio. Filed Feb. 8, 1926. Serial No. 86,730. 2 Claims. (Cl. 293—55.)



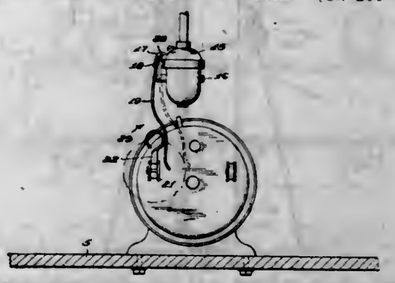
1. In an automobile bumper, the combination of two parallel impact receiving bars spaced apart vertically and joined at the ends of the bumper and having extensions from said joints meeting at the middle of the bumper between the impact bars and substantially in the same plane therewith, a clamp comprising a plate bridging the forward sides of said impact bars and a plate bridging the rear sides of the impact bars, and a bolt joining said plates and adapted to clamp them tightly upon said impact bars, said meeting ends being attached to one of said clamping plates and spaced slightly from the other plate.

1,678,917. FOLDING MACHINE. CLARENCE P. ROUSH, Spokane, Wash. Filed May 25, 1927. Serial No. 194,106. 3 Claims. (Cl. 270—61.)



1. In a folding machine the combination with a table having a spaced folding plate and an adjustable stop bar between the table and plate, of a pivoted folding bar adjacent the free edge of the plate, and said bar having a bearing face for co-action with the free edge of the plate in folding a sheet.

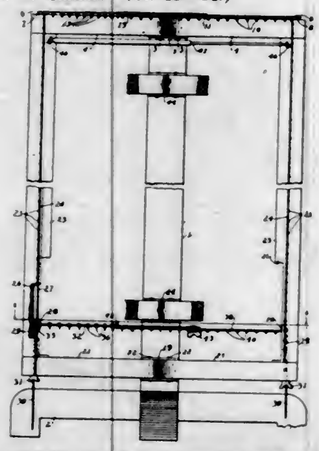
1,678,918. APPARATUS FOR DETERMINING AND ALSO INDICATING THE TOTAL HEATING VALUE OF FLOWING COMBUSTIBLE FLUID. EDWIN X. SCHMIDT, Milwaukee, Wis., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis., a Corporation of Wisconsin. Filed Apr. 30, 1926. Serial No. 105,666. 6 Claims. (Cl. 73—184.)



1. Apparatus for determining the total number of heat units in a flow of combustible fluid, which comprises a pair of positive displacement pumps or respectively proportioning the main flow of said fluid and the flow of a continuous sample thereof, and calorimetric means for determining the total number of heat units in said sample, said means being calibrated to indicate directly the total number of heat units in said main flow of fluid.

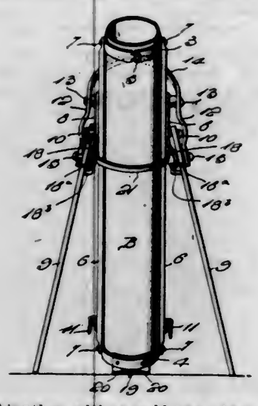
1,678,919. METHOD OF AND APPARATUS FOR SPINNING YARN. DAVID S. SEAMAN, Providence, R. I. Filed Feb. 8, 1927. Serial No. 166,770. 10 Claims. (Cl. 118—49.)

1. The method of spinning yarn which consists in rolling it by centrifugal force on a concave surface while it is being twisted.



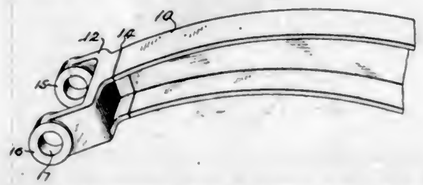
1,678,920. BEDROOM LAMP STAND AND CIRCUIT-CONTROLLING MECHANISM THEREFOR. SAMUEL B. SHIFFLETT, Del Ray, Alexandria, Va. Filed Dec. 3, 1927. Serial No. 237,502. 2 Claims. (Cl. 200—35.)

1. In a device of the character described, the combination with an alarm clock, a switch disposed rearwardly of the alarm clock, a keeper fixed upon the exterior of



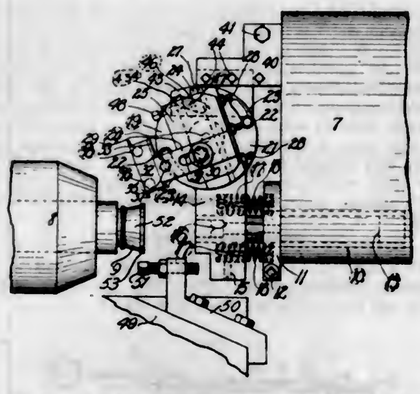
said switch, a lever biasedly mounted beneath said keeper, said keeper projecting downwardly over said lever far enough to limit the movement of the lever away from the switch, a laterally movable push button constituting a part of said switch, said push button acting upon the lever when said button is moved to "off" position to thrust said lever outwardly against said keeper, and a tappet of crank formation upon the alarm wind element of the alarm clock, shaped to engage the lower end of said lever with a wiping movement.

1,678,921. CURTAIN STRETCHER. JOHN J. SIMMONS, San Jose, Calif. Filed Nov. 8, 1927. Serial No. 231,883. 7 Claims. (Cl. 45—24.)



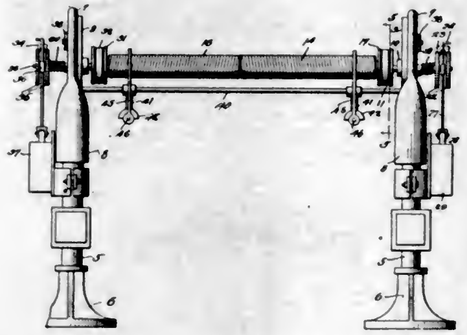
3. In a curtain stretcher, supporting means, a pair of spaced and aligned brackets mounted thereon, a pair of arms pivotally mounted in each bracket to swing in parallel planes, a connecting member rigidly inserted between the outer ends of the corresponding swinging arms, a pair of relatively slidable curtain supporting bars pivotally mounted upon the outer ends of one pair of arms, a pair of relatively slidable curtain supporting bars pivotally mounted upon the outer ends of the other pair of arms and means for adjusting one pair of bars relative to the other.

1,678,922. GOLF-BAG SUPPORT. FREDERICK M. SINGER, Racine, Wis. Filed Sept. 12, 1927. Serial No. 218,965. 13 Claims. (Cl. 150—1.5.)



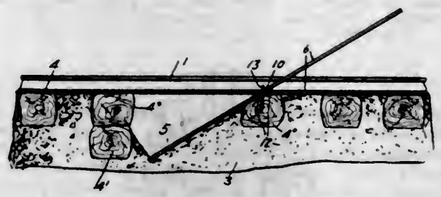
1. In combination with a golf bag; two legs normally lying in retracted positions at opposite sides of said bag, means pivotally mounting said legs, two substantially vertical levers fulcrumed at said opposite sides of the bag for movement substantially in the same directions as said legs, said levers being provided with a handle by means of which they may be swung, and means connecting said levers with said legs at points spaced substantially vertically from the pivots of the latter, whereby swinging of the levers will swing the legs away from the bag to operative positions.

1,678,923. PRODUCTION OF INTEGRAL SIDE BARS AND SPRING HANGERS BY ELECTRIC WELDING. CHARLES S. SMITH, Milwaukee, Wis., assignor to A. O. Smith Corporation, Milwaukee, Wis., a Corporation of New York. Filed Feb. 8, 1924. Serial No. 691,337. 3 Claims. (Cl. 267—54.)



1. In an automobile frame, a channel side bar having an open end, and a spring hanger having forwardly extending spaced parallel ears for receiving between them the eye-end of a vehicle spring, the said spring hanger being provided back of said ears with a transverse partition which serves to brace the ears in spaced relation, and being formed at its end in the rear of said partition with a channel coinciding with the adjacent end of the side bar, rear wall extensions of the hanger aligned with and butt-welded to the ends of the walls of the channel side bar, the said partition serving to close the space defined by the rear wall extensions of the hanger and the walls of the channel side bar in alignment therewith, except one side which is left open.

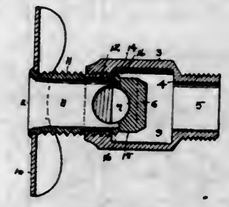
1,678,924. UNDERCUTTING ATTACHMENT FOR SCREW MACHINES. RICHARD STRINDBERG, Canton, Ohio, assignor to The Timken Roller Bearing Company, Canton, Ohio, a Corporation of Ohio. Filed Apr. 27, 1925. Serial No. 25,999. 5 Claims. (Cl. 29—57.)



1. In a metal working machine comprising a rotating work spindle and a reciprocating tool turret movable longitudinally thereof, the combination with an undercutting tool comprising a spring-pressed bracket slidably mounted on said turret for movement longitudinally thereof, a member swiveled to said bracket, a slide block mounted on the swivel member for sliding movement in a plane disposed at an oblique angle with relation to the spindle axis, a tool holder adjustably secured to said slide block, a cutting tool adjustably secured to said tool holder, and means carried by the tool turret and operatively engaging said slide block for moving the cutting tool into and out of engagement with the work.

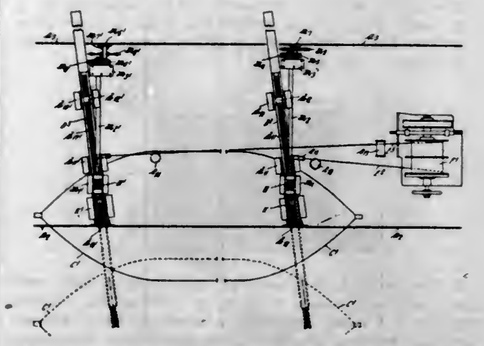
1,678,925. GUIDER. ROBERT DANIEL TACKABERRY, Lewiston, Me. Filed Feb. 18, 1925. Serial No. 10,064. 2 Claims. (Cl. 271—2.6.)

1. A cloth guiding machine including a support, shafts mounted on the support, rolls mounted on the shafts and having spirally formed grooves with which cloth contacts to rotate the rolls when the cloth passes through the machine, braking means at the ends of the rolls for stopping the rolls, pivoted upstanding fingers supported at opposite edges of the cloth passing through the machine and adapted to be engaged by cloth moving laterally over the rolls, contact members carried by the fingers and adapted to complete a circuit for operating the braking mechanism, when the fingers are moved laterally by the action of the cloth, and means for normally returning the arms to their normal positions.



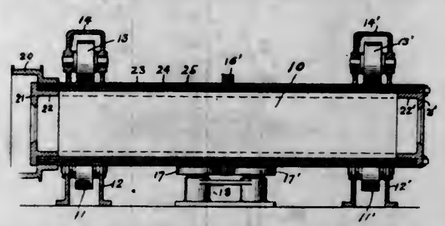
1,678,926. CATTLE GUARD. FREDERICK STANLEY WALTON and JOHN MCKENZIE, Smithers, British Columbia, Canada. Filed Apr. 30, 1926. Serial No. 105,841. 2 Claims. (Cl. 256—15.)

1. In a cattle guard, the combination with the rails of a trackway and the ties extending thereunder with an excavation formed between two of such ties, of a plurality of parallel slats each having a pair of orifices in the centre portion thereof, and a staple bridging that portion of the slat between the orifices thereof, and a vertical portion of the staple extending part way through each orifice into the underlying tie.



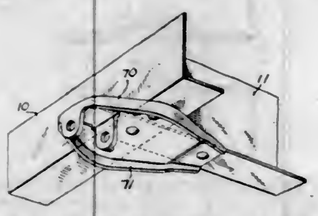
1,678,927. DRAIN COCK OR VALVE. ALBERT J. WEATHERHEAD, Jr., Cleveland, Ohio. Filed Apr. 13, 1927. Serial No. 183,370. 6 Claims. (Cl. 251—8.)

4. A drain cock or valve, comprising a body having an intake passage at one end and a screw-threaded opening at its opposite end, a valve member adapted to close said passage having a screw-thread portion adapted to operate within said screw-threaded opening, said member having an opening in its side at its inner end and a longitudinal passage extending therefrom to its outer end, the inner end of said member being of slightly reduced diameter as



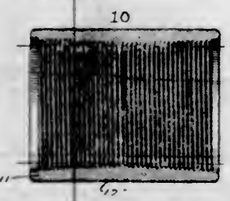
compared with its threaded portion and formed with an annular rib externally thereof adapted to prevent ready removal of said member from said body.

1,678,928. APPARATUS FOR LAUNCHING, LOWERING, AND RAISING BOATS. ARTHUR ROBERT THOMAS WOODS, London, England. Filed Mar. 4, 1927, Serial No. 172,793, and in Great Britain Mar. 6, 1926. 6 Claims. (Cl. 9—22.)



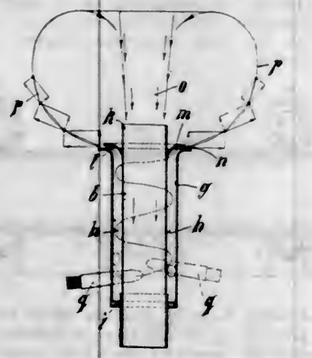
1. In apparatus of the type referred to for launching, lowering and raising ships' boats, in combination; launching beams for the boats, a rack on each launching beam; a worm engaging with each rack; athwart-ship shafts carrying said worms; operating gear connected to the athwart-ship shafts to move the launching beams in an inbord or outboard direction; substantially as described.

1,678,929. LOW-CONDUCTIVITY MOLD FOR CENTRIFUGAL CASTING MACHINES. LUCIEN I. YEOMANS, Chicago, Ill., assignor to A. O. Smith Corporation, Milwaukee, Wis., a Corporation of New York. Filed July 17, 1924. Serial No. 726,446. 4 Claims. (Cl. 22—65.)



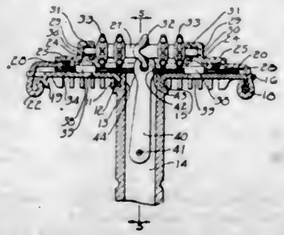
1. A rotatable, balanced mold for metal casting comprising a plurality of circular tubes of different diameters and concentrically assembled one within another to form a unitary structure, and held together by the frictional engagement of the outer surface of one tube with the inner surface of the next larger tube.

1,678,930. SPRING HANGER AND GUSSET FOR AUTOMOBILE FRAMES. BIRGER TORVALD ANDREN, Milwaukee, Wis., assignor to A. O. Smith Corporation, Milwaukee, Wis., a Corporation of New York. Filed June 28, 1926. Serial No. 119,014. 7 Claims. (Cl. 267—54.)



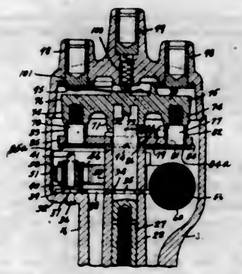
1. A spring hanger formed integrally with a laterally widened gusset plate, the said spring hanger being composed of two portions of the gusset plate extending perpendicularly to the plane of the plate and parallel to each other.

1,678,931. PRODUCTION OF PIPE COUPLINGS BY CENTRIFUGAL CASTING. HARRY BLUMBERG and MARTIN A. MIKESH, Milwaukee, Wis., assignors to A. O. Smith Corporation, Milwaukee, Wis., a Corporation of New York. Filed May 3, 1924. Serial No. 710,728. 5 Claims. (Cl. 22—202.)



1. The method of producing centrifugally cast steel pipe couplings, which consists in coating the interior surfaces of a metal mold with a substance which will retard the freezing of the molten metal first introduced into the mold and form an alloy with such metal, rotating the mold, and introducing the molten metal thereinto, whereby there is created in the pipe coupling an exterior surface having a structure which differs from that of the body of the pipe coupling and is free from surface cracks.

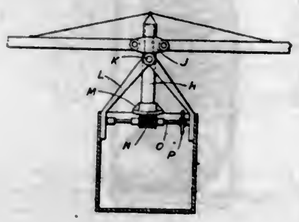
1,678,932. SUCTION APPARATUS. GEORG BÜHLER, Steinenkirch, near Geislingen-on-the-Steige, Germany. Filed Apr. 20, 1926. Serial No. 103,315. and in Germany Feb. 19, 1925. 5 Claims. (Cl. 183—37.)



5. Suction and purifying apparatus for air, comprising a suction tube provided with a mouth-piece; a pressure tube concentrically surrounding the suction tube and spaced from the same to form an intermediate passage, said pressure tube having its rear end closed and its front end widened and turned laterally outward; a ring adjacent the front end of the suction tube and coacting with the out-turned end of the pressure tube to form a funnel-shaped outlet nozzle; a blower; and a filter intermediate the suction tube and the suction side of the blower and connected thereto, the pressure side of said blower being connected to the air passage to supply air under pressure to said passage to escape from the nozzle in the form of an annular mantle which concentrically surrounds the suction zone extending from said mouthpiece.

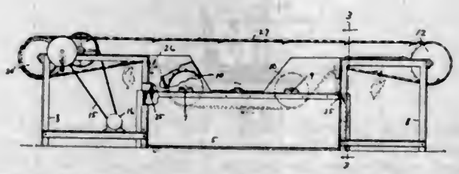
1,678,933. SAFETY RAZOR. EARL C. BUNNELL, Stratford, Conn., assignor to John J. King, New York, N. Y. Filed Mar. 15, 1927. Serial No. 175,479. 5 Claims. (Cl. 30—12.)

1. In a safety razor, a razor blade supporting plate, a retaining plate for the razor blade, a hollow handle upon said supporting plate, means upon said supporting plate adapted to enter longitudinal slots in said blade to guide the same, and mechanism associated with said retaining plate and said handle and directly associated with said blade for imparting reciprocatory longitudinal movements to said blade, said mechanism including a cam upon said retaining plate, and a lever pivoted in said handle and adapted to pass through an opening in said blade and be operatively associated with said cam.



1,678,934. IGNITION APPARATUS. WILLIAM A. CHRYST, Dayton, Ohio, assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Filed May 23, 1922. Serial No. 563,145. 7 Claims. (Cl. 200—22.)

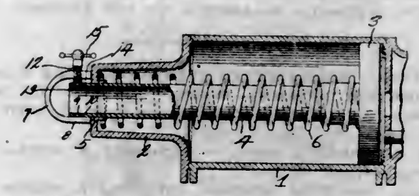
1. Ignition apparatus comprising a housing providing a bearing, a shaft journalled in the bearing and extending beyond the bearing into the housing, a cam located between the shaft end and the bearing and journalled loosely on the shaft extension, a circuit interrupter operated by the cam, a sub-assembly structure for drivingly connecting the shaft with the cam and for varying the angular relation of the cam to the shaft in response to variations in shaft speed, said structure being removable as a unit from the shaft without disturbing the cam or interrupter, and said structure comprising



a support mounted upon said shaft end and driven thereby, weights movably connected with the support and located between the support and cam, and springs for restraining the weights, said weights and cam having cooperating provisions by which these members are connected by movement of the sub-assembly toward the cam axially of the shaft.

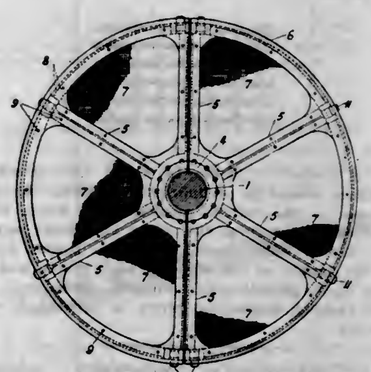
1,678,935. AIRCRAFT WITH ROTATIVE WINGS. JUAN DE LA CIERVA, Madrid, Spain. Filed Nov. 10, 1926, Serial No. 147,570, and in Great Britain Nov. 24, 1925. 6 Claims. (Cl. 244—19.)

1. In aircraft, a plurality of freely rotative wings adapted to be driven by the air flow across them in flight, a central hub member to which said wings are hinge-jointed, a shaft carrying said hub member and tiltably mounted in the body of the air craft so as to be capable of variable lateral inclination.



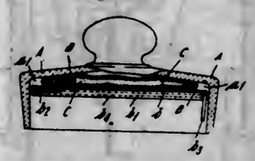
1,678,936. POULTRY-SCALDING MEANS. ALFRED G. EGBERT, Pleasanton, Kans. Filed Nov. 15, 1927. Serial 233,476. 3 Claims. (Cl. 17—11.)

1. In a poultry scalding machine of the character described, a scalding tank, an endless member associated with the tank and having one run thereof engageable through said tank, means for operating said endless member, means whereby poultry may be readily secured to and removed from said endless member, said means consisting of blocks secured to the member, a pin longitudinally slidable through each block, a hook at one end of the pin between which and the adjacent end of the block the legs of the fowl are to be arranged, means for securing the pin at a position within the block whereby the hooked end of the pin is arranged adjacent the block, and cooperative construction between each clamp and the machine and the far end of the tank whereby the said pins are automatically released after the same have passed from said scalding tank.



1,678,937. AIR-BRAKE-PISTON CLAMP. LOUIS H. DOUSE, Toledo, Ohio. Filed May 17, 1926. Serial No. 109,809. 3 Claims. (Cl. 29—87.1.)

1. An air brake piston clamp comprising a U-shaped body member adapted to arch the end of a piston rod with its arms on opposite sides of the rod, said arms at spaced points from the ends thereof having members extending towards each other and adapted to be received in recesses in a piston rod, whereby upon pivotal



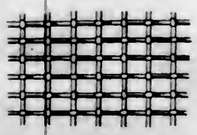
movement of the U-shaped member, the arms will engage a cylinder head and hold the piston rod against inward movement.

1,678,938. HYDRO-EXTRACTOR OR CENTRIFUGAL MACHINE. ALEXANDER FRASER DUNSMORE, Glasgow, Scotland. Filed Feb. 16, 1927, Serial No. 168,760, and in Great Britain Dec. 30, 1926. 4 Claims. (Cl. 210—63.)

1. In a hydro-extractor, in combination with a rotary spindle, a basket rotatable with said spindle, a socket held to said spindle, and a panelled frame to form a cover for said basket, said frame having a bush engageable with the socket, the panels of said frame being removable and composed of filtering medium.

1,678,939. MOISTURE-ABSORBING DEVICE FOR STOPPERED CONTAINING VESSELS. ERIC L. FURBER, Liverpool, England. Filed Dec. 27, 1923, Serial No. 683,008, and in Great Britain Dec. 27, 1922. 4 Claims. (Cl. 215—48.)

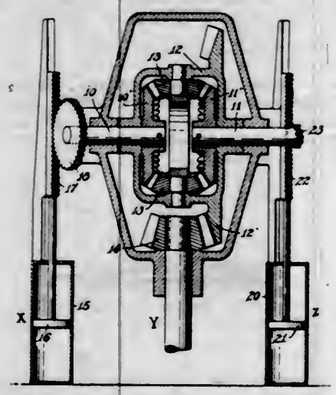
1. In a moisture absorbing device for containing vessels, in combination;—a stopper having in its under side a recess with cylindrical walls; a perforated retaining plate; spring gripping means consisting of an open ended spring hoop of radius greater than that of the cylindrical wall of the recess, attached at a point intermediate its ends to the retaining plate and adapted when



the retaining plate is inserted in the recess to follow the contour of and frictionally grip the wall of the recess; a container having a porous wall and adapted to be supported by the retaining plate in the recess; and a hygroscopic substance in the said container.

1,678,940. ROOT-FILLING SUBSTANCE. ERIK GUSTAV HEDSTRÖM, Stockholm, Sweden. Filed Nov. 13, 1926, Serial No. 148,316, and in Sweden Sept. 27, 1926. 8 Claims. (Cl. 106—6.)

1. A root-filling substance comprising a solution of natural asphalt.

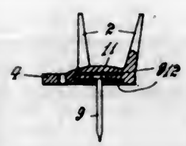


8. A root-filling substance comprising a solution of Syrian asphalt in benzole and a substance which is practically impervious to Röntgen rays.

1,678,941. METHOD OF MAKING WOVEN-WIRE SCREENS. AUGUST E. HELMAN, Cleveland, Ohio, assignor to The W. S. Tyler Company, Cleveland, Ohio, a Corporation of Ohio. Original application filed June 9, 1927, Serial No. 197,643. Divided and this application filed June 20, 1928. Serial No. 286,999. 3 Claims. (Cl. 140—1.)

3. In a method of making a woven wire screen, the steps which consist in preliminarily crimping the transverse wires to the contour required in a woven screen, simultaneously flattening the upper and lower surfaces at the crest of each of such crimps to harden and increase the rigidity of the wires at such points, and then weaving said preliminarily crimped transverse wires through parallel longtudinal wires to produce a woven wire screen.

1,678,942. MECHANICAL MOVEMENT. MINOT K. HOLMES, Muncie, Ind., assignor to Hemingray Glass Company, Muncie, Ind., a Corporation of Kentucky. Original application filed Dec. 1, 1924, Serial No. 753,220. Divided and this application filed May 26, 1926. Serial No. 111,689. 1 Claim. (Cl. 74—34.)

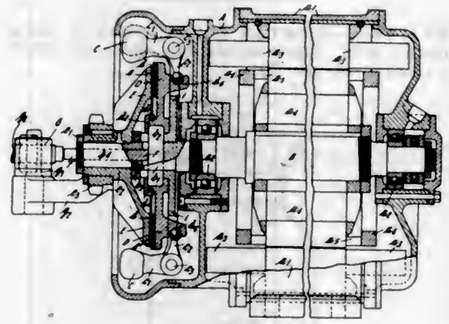


A mechanical movement comprising a differential gearing, a power delivery shaft geared to the middle of said differential, and two power applying units having a rack and gear connection respectively with the ends of said differential at effectively different power values.

1,678,943. BOTTLE BRUSH. BENJAMIN B. JACKSON, Delphi, Ind. Filed Sept. 3, 1927. Serial No. 217,385. 3 Claims. (Cl. 15—164.)

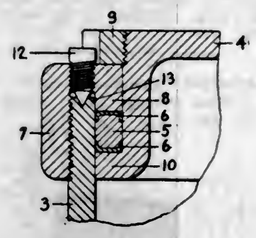
1. A cleaning brush comprising a plurality of deformable cleaning members carried by a supporting member adapted to be inserted longitudinally in the neck of a bottle and conically spiralled to bring certain of said cleaning members into simultaneous engagement with the wall, bottom and bottom corner of the bottle.

1,678,944. GOLF TEE. NORMAN REGINALD JACOBSEN, Wellington, New Zealand. Filed Jan. 13, 1928, Serial No. 246,547, and in New Zealand Feb. 11, 1927. 5 Claims. (Cl. 273—33.)



1. A golf tee consisting of a disc of rubber or similar flexible material, flexible projections extending upwards from the disc at or near the circumference thereof, upon which projections the golf ball is placed, and a shank projecting from the underside of the disc for insertion into the ground, discs of material embedded in said rubber disc to which the head of said shank is connected in such a manner that the joint between the shank and the discs of material is flexible, substantially as described.

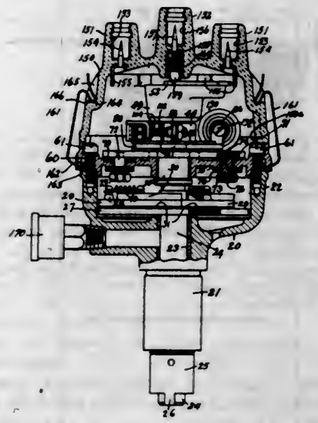
1,678,945. FRICTIONAL DRIVING MECHANISM FOR MACHINES HAVING STOP MOTIONS. CHARLES EDWARD JONES, Bradford, England. Filed Feb. 6, 1925, Serial No. 7,313, and in Great Britain Feb. 9, 1924. 16 Claims. (Cl. 192—02.)



2. In driving, starting and stopping means for machines, in combination;—a motor; a friction clutch, one element of which is driven by the motor and the other element of which is adapted to drive the machine; rotating weights driven by the motor and, when free, adapted to be moved outwardly by centrifugal force and to cause frictional engagement between the two clutch elements; and controlling means connected to the rotating weights and a part of the machine to which movement is given when the machine has to be stopped and started, move-

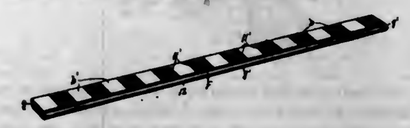
ment of the said controlling means being adapted to determine the extent to which the weights are permitted to move outwardly under centrifugal force, and so de-

termine the magnitude of engaging pressure between the frictional surfaces of the clutch caused by the said outward movement of the weights; substantially as described.



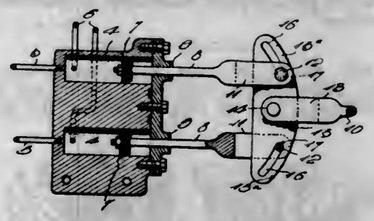
1,678,946. CYLINDER HEAD AND PACKING. BRYAN P. JOYCE, Davenport, Iowa. Filed July 18, 1927. Serial No. 206,567. 8 Claims. (Cl. 74—108.)

1. In a cylinder head packing assembly, a cylinder, separable means to reinforce the cylinder at the packing and to seat the packing, a packing ring cooperating therewith, a cylinder head associated with the end of the cylinder, and means to secure the head in position, said head having a projecting part engaging the packing ring and adapted to transmit pressure over a portion of its area to the packing.



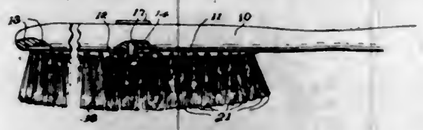
1,678,947. IGNITION TIMER. FREDERICK C. KROEGER, Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Nov. 6, 1922, Serial No. 599,238. Renewed Feb. 3, 1927. 13 Claims. (Cl. 200—21.)

3. In an ignition distributor, the combination with timer contacts; of a cam for separating the contacts; a stop pin; provisions for attaching the pin to the cam in two positions relative to the cam; a drive shaft; means for connecting the shaft with cam and for angularly adjusting the cam from a normal position with respect to the shaft in response to increase in speed; spring means for returning the cam to normal position; and a member connected to the drive shaft and provided with spaced apertures each for receiving the stop pin in one of its positions of attachment to the cam, said apertures being larger than the pin and so disposed that when the pin is in one of its positions of attachment to the cam and extends into one aperture said pin cooperates with the apertured member to provide a stop limiting the movement of the cam in one direction from normal, and when the pin is in the other position of attachment to the cam and extends into the other aperture said pin co-



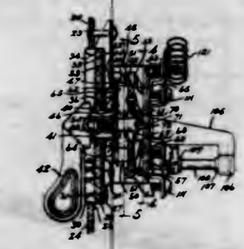
operates with the apertured member to provide a stop limiting the movement of the cam in the opposite direction from normal with respect to the drive shaft.

1,678,948. RUBBER-COMPOSITION FLOORING. JOHN B. LOSEY and WALTER R. STONE, Syracuse, N. Y. Filed Feb. 21, 1927, Serial No. 169,892, and in Great Britain Aug. 19, 1926. 2 Claims. (Cl. 154—49.)



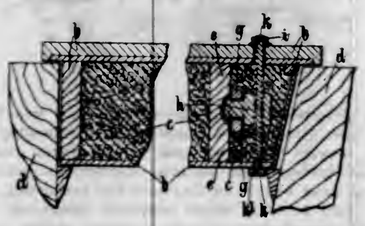
1. A flooring or siding comprising a base section of relatively soft rubber composition and a plurality of surface sections of relatively harder rubber composition vulcanized to one surface of the base section and provided with a tongue and a groove along its opposite edge, both in the plane of the vulcanized surfaces, the meeting edges of the surface sections being in abutting relation but not united.

1,678,949. HYDRAULIC BRAKE-OPERATING MEANS. ARTHUR MOSER, Northampton, Pa. Filed Nov. 3, 1927. Serial No. 230,773. 6 Claims. (Cl. 188—204.)



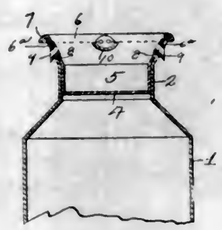
1. In a hydraulic brake operating means, two parallel piston rods, a transverse equalizing lever extending transversely between the outer ends of said piston rods, two combined pivotal and slidable connections connecting said equalizing lever with said rods and permitting swinging of said lever in either direction about the pivots of said connections and also allowing sliding of said lever transversely of the rods incident to such swinging, and an operating member having a pivotal connection with the central portion of said lever.

1,678,950. BRUSH CONSTRUCTION. FREEMAN NILSSON, Troy, N. Y. Filed Apr. 26, 1927. Serial No. 186,708. 3 Claims. (Cl. 15—176.)



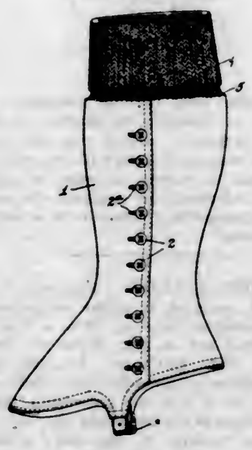
1. In a brush of the character described, a case recessed to receive a head, a head insertable in the recess, a head-retaining member reciprocably mounted in the body of the case comprising a pin having a head exposed on the back of the case and a part projected into the said recess of the case, a spring confined by the head of the pin operative to yieldingly hold the pin retracted and inter-engaging elements on the brush head and pin inoperative when the pin is depressed.

1,678,951. ELECTRIC SWITCH. HARRY E. NORVIEL, Anderson, Ind., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio, a Corporation of Delaware. Filed Apr. 14, 1925. Serial No. 22,977. 11 Claims. (Cl. 200—6.)



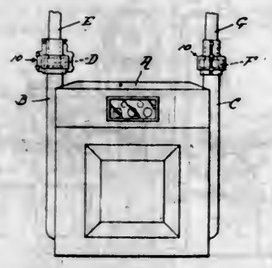
6. An electric switch comprising, in combination, a case having parallel end walls, one of which carries stationary contacts, and the other has a central aperture, an operating shaft extending through said aperture, a metal plate connected with the shaft and rotatable within the case adjacent the apertured wall and having tangs extending from the outer edge of the plate toward the other end wall, a non-conducting plate connected through said tangs with the first plate and held by said tangs in spaced relation to said first plate, a movable contact attached to the nonconducting plate, an indexing plate located between the first and second plates and driven through said tangs which are received by notches in the indexing plate, and a spring for urging the indexing plate toward the apertured end wall of the case, said apertured end wall and the index plate having co-operating locating provisions which are yieldingly maintained in engagement by said springs.

1,678,952. DOOR. WILLIAM PATTINSON, Derby, England. Filed Aug. 28, 1926. Serial No. 132,185, and in Great Britain Sept. 28, 1925. 3 Claims. (Cl. 20—38.)



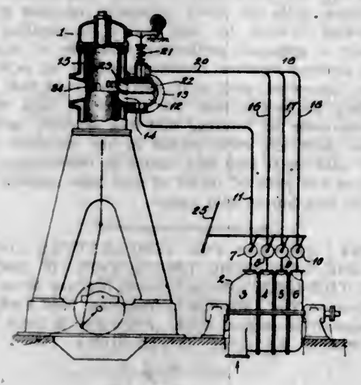
1. In means for adjusting or trueing the plane of doors of the kind referred to, a bar having a revolvably mounted part at substantially each end through each of which passes a bolt having a head at one end and a nut securely fixed thereon at the other, said bar being secured to a member of the door framing at substantially its longitudinal centre, substantially as described.

1,678,953. MILK-CAN COVER. PETER F. RAUEN, Omaha, Nebr. Filed June 29, 1926. Serial No. 119,351. 1 Claim. (Cl. 220—24.)



The combination with a milk can cover disposed within the neck of a can and having a chamber therein, an upwardly and outwardly flared annular flange carried by said cover, of downwardly and outwardly extending discharge pipes carried by said flange and extending through apertures in the neck and terminating beyond sides of the neck and forming means whereby water above a predetermined level within the chamber of the cover will be discharged beyond the side of the neck, said cover being axially movable from the neck of the can.

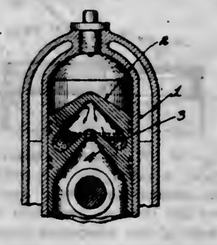
1,678,954. LEGGING. HERBERT SAMUEL RAUH, New York, N. Y. Filed Dec. 30, 1926. Serial No. 157,933. 1 Claim. (Cl. 36—2.)



A close fitting knee-length legging comprising a body portion having an opening at one side extending upwardly from the bottom edge and terminating adjacent the upper edge of the body, said opening being defined by edge portions, fastening means for detachably uniting said edge portions, and an endless elastic cuff attached to the upper edge of the body adapted to fit about the leg of the wearer above the calf and adjust itself to the contour thereof.

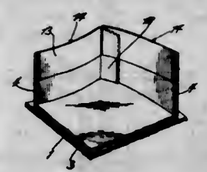
1,678,955. TAMPERING-INDICATING DEVICE FOR GAS METERS. OTTO ROCKENBAUER, Westville, N. J. Filed Nov. 23, 1926. Serial No. 150,257. 4 Claims. (Cl. 70—122.)

1. A pipe union protector comprising a pair of members of similar form adapted for disposition about a union and the pipes adjacent thereto to form an enclosure therefor, and frangible means for holding said members together comprising lugs on each adapted to be clinchingly engaged with the other.



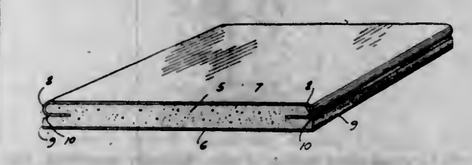
1,678,956. INTERNAL-COMBUSTION ENGINE. CHARLES SCHAER, Langenthal, Switzerland, assignor to Busch-Sulzer Bros.-Diesel Engine Company, St. Louis, Mo., a Corporation of Missouri. Filed Sept. 9, 1925, Serial No. 55,232, and in Germany Sept. 23, 1924. 3 Claims. (Cl. 123—65.)

1. The combination with a two-cycle injection engine having means for admitting scavenging and auxiliary air thereto, of a multi-stage rotary compressor for supplying such air, the lower stage of such compressor serving to supply the scavenging air and the higher stages thereof serving to supply super-charging air at variably selected pressures.



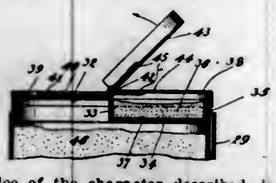
1,678,957. PISTON COOLING. OTTO PHILIPP, Winterthur, Switzerland, assignor to Busch-Sulzer Bros.-Diesel Engine Company, St. Louis, Mo., a Corporation of Missouri. Filed Jan. 22, 1926. Serial No. 82,947, and in Germany Jan. 29, 1925. 1 Claim. (Cl. 123—176.)

An engine piston formed with a heat-transfer chamber adjacent its head wall, said chamber being of greater diameter than axial length and containing a mobile heat-carrying medium adapted to be thrown back and forth therein, the interior wall of said chamber presenting an



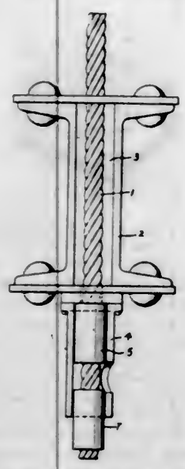
imperforate surface and the major portion thereof being inclined to the direction of piston movement to control the movement of the medium as described.

1,678,958. BOX. FRANK J. SCHLEICHER, St. Louis, Mo. Filed July 15, 1927. Serial No. 205,909. 2 Claims. (Cl. 229—45.)



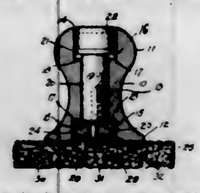
1. A box comprising an inside bottom forming sheet having an inwardly curving recess in one edge, and its remaining edge curving continuously from intersection with the ends of said recess and being of greater diameter in any direction than the width of said recess, and forming sharp corners at the intersection with said recess; and a side for said box comprising an elongated strip having notches in one edge, and tongues extending from said notches bent inwardly against the outer side of said bottom sheet, one end of said strip being at one of said corners and the body of said strip being bent around the curved edge of said sheet and against the edge of said sheet in said recess, and having its other end overlapping the inner side of said first end and secured thereto for a distance above the curved edge of said sheet, an infolded portion along the upper edge and throughout the extent of said wall and overlapping the overlapping portion of said wall, and an outside bottom forming sheet of the same shape as the inside bottom forming sheet secured to said tongues and having its edges extending beyond said wall.

1,678,959. EDGE-PROTECTED BOARD. JOHN SCHUMACHER, Los Angeles, Calif. Filed June 9, 1926. Serial No. 114,614. 2 Claims. (Cl. 154—45.9.)



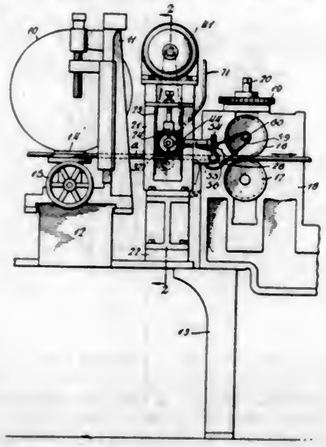
1. A plaster board comprising a cementitious core, a cover sheet therefor having a margin extended over the edge in bead form so as to partially cover the edge, an inset being formed at the juncture of the marginal edge and core.

1,678,960. CONTAINER. FREDERICK A. SCHWANNECKE, New Rochelle, N. Y. Filed Apr. 28, 1927. Serial No. 187,130. 5 Claims. (Cl. 132—83.)



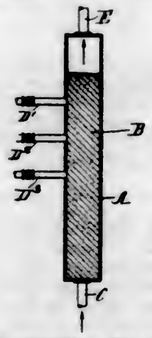
2. In a device of the character described, in combination, a receptacle, a cover for the receptacle having an opening therein, means for closing said opening, a plurality of hinged lids closable over said cover, an exterior recess in one side of the receptacle capable of holding a powder-puff and a hinged door carried by the receptacle capable of closure over said recess.

1,678,961. ATTACHMENT FOR WIRE ROPE. RUMSEY W. SCOTT, Montclair, N. J., assignor to American Cable Company, Inc., a Corporation of Delaware. Filed Apr. 9, 1927. Serial No. 182,289. 2 Claims. (Cl. 24—123.)



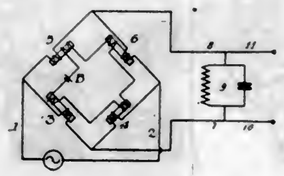
1. In combination, a stranded wire structure provided with a metal attaching sleeve retained thereon by compression, and a connector for said sleeve comprising a container provided with a seat and with a bore of a diameter which is a measure of the sufficiency of the reduction of the diameter of the sleeve to produce a predetermined compression.

1,678,962. SCOURING DEVICE. NATHAN I. STARK and JOSEPH SAUER, Philadelphia, Pa. Filed May 24, 1927. Serial No. 193,790. 45 Claims. (Cl. 15—209.)



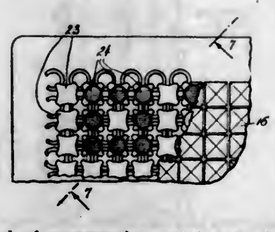
1. In a scouring device of the character described, the combination of a holder having a cavity at one end to retain a soluble cleansing medium, a refill wool pad removably carried by the holder over the end having the cavity, and means in the holder to project the wool pad from the holder to give access to the cavity.

1,678,963. MECHANISM FOR REMOVING BURRS FROM TUBES. MAXWELL H. SUSSMAN, Kew Gardens, N. Y., assignor to The Elyria Iron and Steel Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 12, 1927. Serial No. 212,541. 4 Claims. (Cl. 90—14.)



1. In a machine for removing burrs from tubes, the combination of means for supporting a travelling tube having an external burr extending lengthwise thereof, bearings located in spaced axial alignment with each other, a sprocket-wheel rotatably mounted on one of said bearings and fixed thereon against movement in axial directions, said sprocket-wheel being connected with a source of power, a cutter-shaft journalled in said bearings and axially slidable therein relatively to said sprocket-wheel, means whereby said sprocket-wheel and cutter-shaft are connected to move in unison without interference with the axial slidability of said shaft, a cutter-wheel carried by said shaft for cutting away said burr, a guide-pin projecting from one of said bearings, a grooved member slidably mounted on said guide-pin and connected with said shaft, a crank-disk having a bushing projecting into the groove of said member, and mechanism for rotating said disk whereby said member and shaft are reciprocated in the direction of the axis of said shaft and said cutter is reciprocated transversely of the path of travel of said tube simultaneously with the rotation of said cutter.

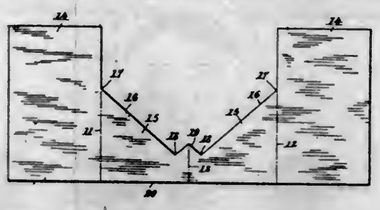
1,678,964. PROCESS FOR TEMPERATURE CONTROL IN THE SYNTHETIC PRODUCTION OF AMMONIA AND THE LIKE. HANS SVANOE, Niagara Falls, N. Y., assignor to The Ammonia Corporation, New York, N. Y., a Corporation of New York. Filed Apr. 3, 1926. Serial No. 99,488. 6 Claims. (Cl. 23—198.)



5. The method of controlling the temperature and reaction of an ammonia gas synthesis which comprises initially introducing to reaction in the presence of a catalyst a gas mixture which comprises an excess of hydrogen whereby high heat conductivity and a controlled reaction is secured and in subsequently introducing to reaction in the presence of a catalyst other gas containing supplemental nitrogen to modify the nitrogen content of the gas mixture whereby a relatively lower heat conductivity and further and more active reaction is secured.

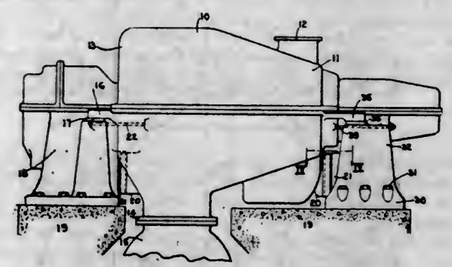
1,678,965. FREQUENCY MULTIPLIER. OTTO VON BRONK, Berlin, Germany, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany, a Corporation of Germany. Filed Sept. 3, 1921, Serial No. 498,422, and in Germany Aug. 26, 1913. 4 Claims. (Cl. 172—281.)

1. A circuit arrangement for increasing the frequency of alternating currents comprising a circuit arrangement in the form of a Wheatstone bridge, a winding in each branch of said bridge, a magnetic core in each winding, means for substantially saturating said cores with direct current flux, the windings and cores being so related that the direct current flux aids the flux due to the windings in two of the branches and opposes the flux due to the windings in the other two branches, whereby a plurality of harmonics are produced, a source of alternating current connected to opposite points of said bridge, output terminals connected to the other diagonally opposite points of said bridge and means connected across said output terminals for short-circuiting all of the harmonics except the one at the desired frequency.



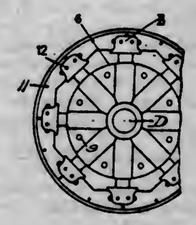
1,678,966. METHOD OF PRODUCING ORNAMENTAL MESH FABRIC. CHARLES A. WHITING, Franklin, Mass., assignor to Whiting & Davis Company, a Corporation of Massachusetts. Filed Aug. 13, 1927. Serial No. 212,823. 16 Claims. (Cl. 101—129.)

2. A method of ornamenting metal mesh fabric which comprises supporting the fabric and anchoring a plurality of links throughout the fabric against relative movement, including links in portions of the fabric which are to receive ornamentation, masking all but selected portions of the fabric thus anchored, and subjecting the unmasked portions to a coloring treatment.



1,678,967. DISPLAY DEVICE. THOMAS H. WILKINSON, Cranford, N. J., assignor to Gustav H. Frommann, Concord, N. Y. Filed Mar. 2, 1926. Serial No. 91,656. 3 Claims. (Cl. 211—157.)

1. A device of the character described comprising a blank having a straight lower edge foldable along three defined vertical lines to provide outer portions and intermediate portions; said intermediate portions being of reduced height relative to said outer portions and, when said blank is adjusted to operative position, converging forwardly from said outer portions to form a V-shaped support having upper edges extending forwardly and

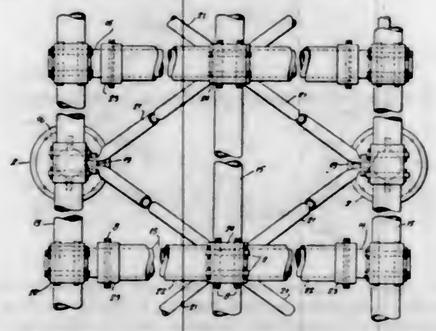


downwardly from intermediate points on said outer portions and providing recesses adapted to receive an article to be displayed; said outer portions projecting laterally at the rear of said intermediate portions transversely of said upper edges to form angles with said intermediate portions, substantially as specified.

1,678,968. TURBINE-CYLINDER SUPPORT. ROBERT C. ALLEN, Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company, a Corporation of Pennsylvinia. Filed Mar. 1, 1927. Serial No. 171,904. 8 Claims. (Cl. 253—39.)

1. Means for supporting a sliding end of an elastic fluid machine comprising a rigid support, a machine casing, a bearing pedestal slidingly mounted on the rigid support, means for slidingly supporting said sliding end of the machine casing upon the rigid support independently of the bearing pedestal, and means for tying the bearing pedestal to the machine casing to slide therewith.

1,678,969. RESILIENT VEHICLE WHEEL. PEDRO ALTUNA, San Sebastian, Spain. Filed Sept. 15, 1925, Serial No. 56,464. Renewed June 5, 1928. 2 Claims. (Cl. 152—48.)

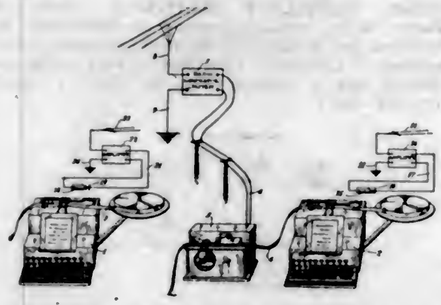


1. A vehicle wheel embodying a rim, a flange upon the interior of the rim having angularly related edge portions and provided with a slot parallel with each edge portion, and resilient spokes equal in number to said angularly related edge portions of the flange, said spokes having forked ends straddling the flange and slidably engaging the slots and angularly related edge portions.

1,678,970. FACIAL BANDAGE. OLGA LOUISE ARLEN, New York, N. Y. Filed Nov. 5, 1926. Serial No. 146,381. 7 Claims. (Cl. 128—164.)

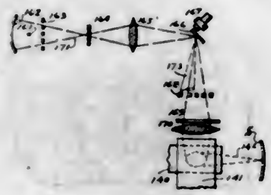
1. A facial bandage comprising means to support the bandage on the head, two flaps adapted to engage the opposite cheeks of the wearer, said flaps overlapping each other over the mouth, and means to secure said flaps in their overlapping position.

1,678,971. PORTABLE METAL STRUCTURE. JOHN BERGESEN, Sr., Brooklyn, N. Y. Filed Apr. 4, 1927. Serial No. 180,774. 7 Claims. (Cl. 189—1.)



1. In a portable metal structure, a plurality of adjustable columns, each of which embodies telescoping sections longitudinally perforated to permit of the passage of locking bolts through alined perforations in the respective sections for the purpose of positively locking the sections in the desired adjustment, a coping fixture detachably secured to the top of each column and provided with an opening through which a spacer may be passed, tubular spacers passed through the coping fixtures of the respective columns and having longitudinally spaced perforations through which locking pins may be passed to lock the spacers against longitudinal movement, fixtures embracing at least some of the spacers and also perforated to receive locking pins adapted to be passed through the fixtures and the spacers, and braces adapted to extend between fixtures and embodying relatively adjustable parts whereby the length of the braces may be regulated.

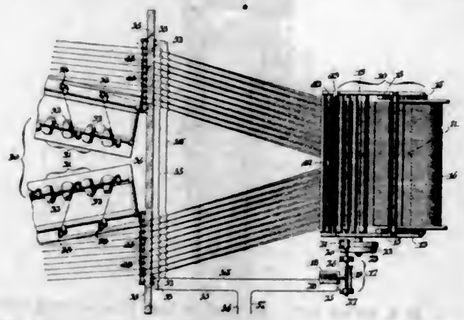
1,678,972. AIR CUSHION. FRANK BRONBERGER, Northport, N. Y. Filed May 28, 1927. Serial No. 194,890. 1 Claim. (Cl. 208—26.)



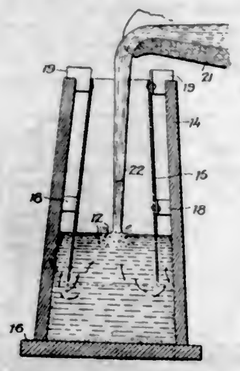
An air cushion for vehicle foot supports comprising a rigid plate, a rubber pad fixed on said plate, a cushion on said pad, said cushion having a single air chamber and a corrugated upper surface, and a valve fixed in said chamber to control the flow of air thereto, said valve passing through said pad and said plate.

1,678,973. SIGNAL-MONITORING SYSTEM. VINCENT H. BROWN, Ozone Park, N. Y., assignor to Radio Corporation of America, a Corporation of Delaware. Filed Jan. 25, 1926. Serial No. 83,436. 2 Claims. (Cl. 250—8.)

1. A radio transmitting system comprising a code sending machine, a transmitting antenna system located at a point geographically remote therefrom, a land line connecting said code sending machine and said antenna system, a second antenna system located at a point adjacent said code sending machine, said second named antenna system being tuned to the frequency of said first named antenna system and adapted to receive signal energy therefrom, and means associated with said second named antenna system for giving a visual signal indication of the signal energy transmitted from said code sending machine by said first named antenna system, said visual indicating means being located adjacent said code sending machine and within the immediate field of vision of the operator, whereby an exact reproduction of the transmitted code is at all times visible to the said operator.



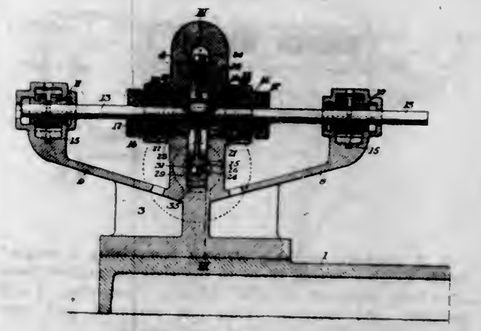
1,678,974. ELECTRICAL PHOTO-TELESCOPIC APPARATUS. PAUL L. CLARK, Brooklyn, N. Y. Filed May 23, 1924. Serial No. 715,350. 13 Claims. (Cl. 178—6.)



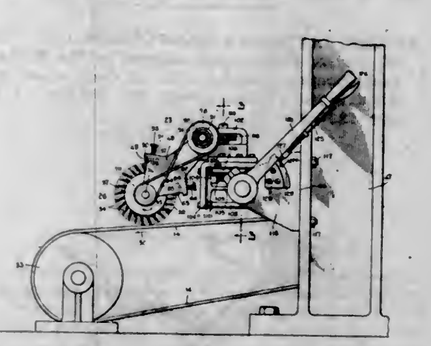
1. An apparatus for receiving photo-electric impulses and projecting the light values of said impulses to juxtaposed areas of a projection screen, comprising a light source, means for intercepting rays from said source proportional to the strength of said impulses and directing means for directing the said rays after interception to traverse a plurality of juxtaposed bands of substantially equal length on a curved screen of radius equal to the distance between the screen and the said directing means.

1,678,975. YARN-WINDING APPARATUS. GEORGE B. COCKER, Gastonia, N. C. Filed Nov. 23, 1926. Serial No. 150,185. 10 Claims. (Cl. 28—32.)

1. The combination in yarn winding apparatus embodying a beam warper with electrically-controlled automatic stop mechanism, and a creel to support a multiplicity of individual yarn supply packages in vertically-spaced horizontal rows; of a board of insulate-material interposed transversely of the apparatus in a spatial interval between the warper and the creel, said board being equipped with horizontal lines of yarn guide eyes at levels corresponding to the elevations of the horizontal rows of yarn packages in the creel, and, in association with each line of guide eyes, a set of serially-grouped yarn-engaging stop control instrumentalities pivotally engaging a common axis on a fulcrum bracket plate for capacity, when released through yarn breakage, to electrically bridge the bracket plate and a contiguous cooperating contact plate, the two groups of plates being respectively connected in parallel in the circuit through the stop mechanism aforesaid.



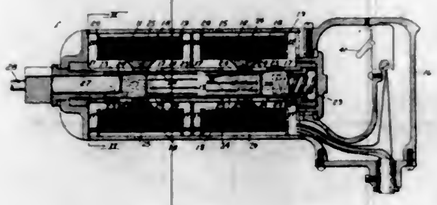
1,678,976. METHOD OF AND APPARATUS FOR CASTING INGOTS. JOSEPH A. DURFEE, Steubenville, Ohio. Filed Nov. 20, 1926. Serial No. 149,692. 15 Claims. (Cl. 22—139.)



1. The process of casting ingots in a mold which consists in placing a partition within the mold for dividing the mold into an inner and outer compartment, and in pouring molten metal into the inner compartment whereby it is caused to flow under a submerged portion of the partition to the outer compartment.

1,678,977. PUMP. MATTHEW J. FINN, Pittsburgh, Pa. Filed Jan. 25, 1922. Serial No. 531,619. 2 Claims. (Cl. 103—96.)

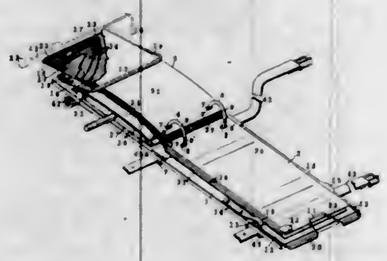
1. A pump, comprising an impeller having vanes on the periphery thereof, means extending laterally from each side of said impeller near the base of said vanes for throwing the fluid outwardly, a shaft for the impeller, a casing having a chamber in which said impeller rotates and being divided horizontally along a plane passing through the shaft, said casing being provided with an inlet to and an outlet from said chamber, said inlet and outlet being in line with each other, means separating said inlet from said outlet and free from contact with the impeller and having a channel through which said vanes move and said casing being in close proximity to the edges of said laterally extending means to form a substantially closed channel enclosing said vanes, and means whereby said separating means may be adjusted radially towards and from said impeller.



1,678,978. APPARATUS FOR RECONDITIONING FELTS OF PAPER-MAKING MACHINES. MORTIMER F. FLYNN, West New Brighton, N. Y., assignor to New Nap Systems, Inc., New York, N. Y., a Corporation of New York. Filed Aug. 11, 1925. Serial No. 49,676. 12 Claims. (Cl. 92—50.)

1. The combination with a paper making machine having a conveyer of felt, rollers for supporting, guiding and driving said felt conveyer and a frame for rotatively supporting said rollers, of a track secured fixedly relative to said frame, a napping cylinder having a width less than the width of said felt conveyer, means for supporting said napping cylinder from said track to locate the ends of the bristles of said napping cylinder within the woven structure of said felt conveyer, and gearing means for moving said napping cylinder along said track transversely of said felt conveyer upon the longitudinal movement of said felt conveyer and the engagement of the bristles of said napping cylinder with said felt conveyer.

1,678,979. ELECTRIC PERCUSSIVE TOOL. HAROLD E. FOX, Pittsburgh, Pa., assignor to Syntron Company, a Corporation of Delaware. Filed Nov. 21, 1923. Serial No. 676,043. 6 Claims. (Cl. 172—126.)



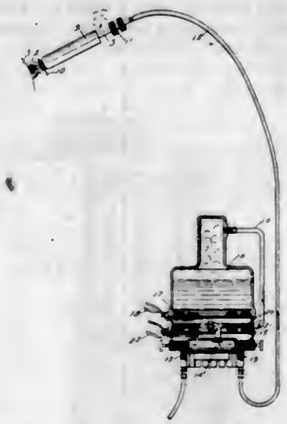
6. A magnetic striking element comprising a magnetizable member having fused to the striking surface thereof a thin layer of material different from that of said member, said material being less magnetic and more impact-resisting than that of said member.

1,678,980. PROTECTIVE COATING FOR METAL AND THE LIKE. JOHN B. W. GARDINER, New York, N. Y. Filed Oct. 12, 1926. Serial No. 141,241. 4 Claims. (Cl. 91—68.)

2. The method of coating materials which comprises the steps of applying to the surface of a material a layer of bituminous emulsion formed without the use of soap and covering such bituminous emulsion with a layer of dry cement while the emulsion is still wet, whereby water is drawn from the emulsion and the cement is hydrated to form a protective coating for the bituminous material and the surface of the bituminous material and the cement are caused to intimately unite and cohere.

4. A product as specified in claim 3, in which said base is metal.

1,678,981. AVIATOR'S MANIFOLDING LOG. CHARLES W. GILLER, Shelby, Ohio, assignor to The Shelby Salesbook Company, Shelby, Ohio, a Corporation of Ohio. Filed Sept. 7, 1922. Serial No. 586,588. 7 Claims. (Cl. 282—8.)

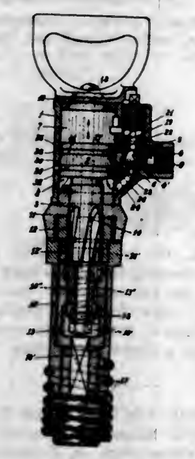


1. A recording device including, in combination, a plurality of sets of superposed record leaves and material for transferring inscription on an upper leaf of a set to the underlying leaves thereof, each of said sets including a sheet folded to provide superposed leaves, and means adapted to secure the free ends of said leaves to each other.

1,678,982. SPRING BOLT. JAMES C. GRIFFIN, Erie, Pa., assignor to Griffin Manufacturing Company, Erie, Pa., a Corporation of Pennsylvania. Filed Dec. 13, 1926. Serial No. 154,454. 3 Claims. (Cl. 292—171.)

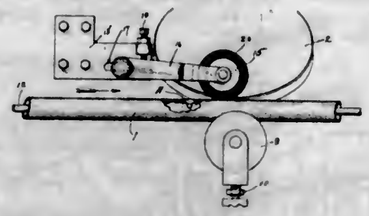
1. In a spring bolt, the combination of a backing plate having an upturned end perforated to receive the bolt and a return bend on the upturned end; a bolt in the perforation in the upturned end, said bolt being reversible, having a beveled end slidable on the return bend with the bolt in one reversed position; and a spring operating the bolt.

1,678,983. METHOD OF AND APPARATUS FOR FORMING PERMANENT WAVES. EDWARD NELSON HALL, Meadville, Pa. Filed July 13, 1927. Serial No. 205,490. 11 Claims. (Cl. 132—33.)



1. The method of forming permanent waves in attached hair which consists in confining and enclosing the hair in a wave-producing formation; generating the vapor at a point remote from the hair; superheating the vapor and conveying the superheated vapor into the enclosed hair.

1,678,984. PROCESS FOR REFINING PETROLEUM OILS WITH DOCTOR SOLUTION. ROBERT L. HALLETT, Brooklyn, N. Y., assignor to National Lead Company, New York, N. Y., a Corporation of New Jersey. Filed Feb. 17, 1926. Serial No. 88,927. 2 Claims. (Cl. 196—33.)

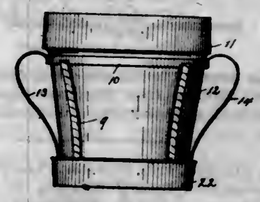


1. The improvement in the purification of petroleum products which consists in dissolving lead chloride in a caustic soda solution and treating said products with the resulting solution to remove the sulphur therefrom.

1,678,985. ROCK DRILL. JOSEF KÖHLEN, Herne, Germany. Filed Jan. 20, 1923, Serial No. 613,889, and in France Nov. 17, 1922. 2 Claims. (Cl. 121—18.)

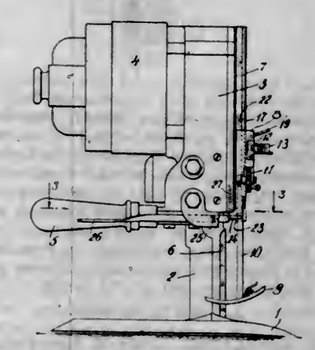
1. A pneumatic tool comprising a cylinder, a piston slidably mounted therein, means for admitting motive fluid to opposite end spaces of said cylinder so as to be alternately effective upon opposite faces of said piston to reciprocate the same in said cylinder, said piston being provided with two annular, peripheral channels, each located in spaced proximity to the contiguous end of said piston, said cylinder being provided with a pair of exhaust ports in spaced relation to each other and further having by-pass channels each having its two ends terminating at the inner surface of said cylinder for establishing connection between said opposite end spaces of the cylinder, an annular channel of the piston and an exhaust port, the distance between the two ends of each by-pass channel being no greater than the distance between an end face of the piston and the contiguous annular channel thereof.

1,678,986. ELECTRIC WELDING. JOHN F. LAWSON, Brooklyn, N. Y. Filed June 10, 1924, Serial No. 719,028. Renewed Apr. 6, 1926. 13 Claims. (Cl. 219—6.)



9. The method of progressively electric welding a long seam which consists in passing current into and from the work through comparatively short lengths of the work at opposite sides of the seam, exerting welding pressure locally on the seam adjacent the zone of said current, passing the seam lengthwise through the zones of said current and said pressure to weld the same progressively, and working on the seam edges to cause the seam edges to be brought together at an added distance in advance of the point where the welding is done.

1,678,987. HYPOCHLORITE COMPOSITION. JAMES DOUGLAS MACMAHON, Niagara Falls, N. Y., assignor to The Mathieson Alkali Works, New York, N. Y., a Corporation of Virginia. Filed May 20, 1927. Serial No. 193,065. 3 Claims. (Cl. 23—248.)

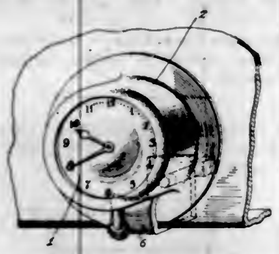


1. A composition comprising a substantially dry mixture containing anhydrous sodium sulphate and calcium hypochlorite.

1,678,988. FLOWERPOT HOLDER. CHARLES MAIER, New York, N. Y. Filed Jan. 21, 1927. Serial No. 162,449. 4 Claims. (Cl. 47—34.)

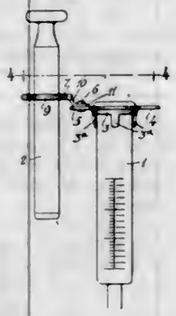
1. A flower pot holder of the class described comprising an open frame shaped to conform to the contour of a flower pot and provided with a top and bottom rim and an open bottom, said top rim supporting the flower pot, handles connected to the top and bottom rim and a removable water receptacle detachably connected to the said open bottom.

1,678,989. CLOTH-CUTTING MACHINE. HYMAN MAIMIN, New York, N. Y., assignor to H. Maimin Company Incorporated, New York, N. Y., a Corporation of New York. Filed July 23, 1925. Serial No. 45,447. 7 Claims. (Cl. 164—75.)



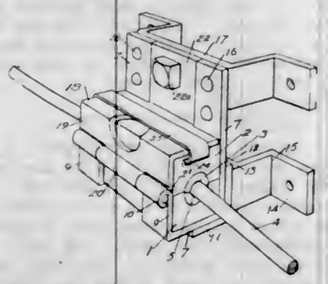
1. A cloth-cutting machine comprising the combination of a supporting frame, a vertically adjustable presser foot, a rack on the frame, a pawl movable with the presser foot designed to engage the rack and hold the presser foot in adjusted position, and means for moving the rack transversely to disengage the pawl and permit the presser foot to fall by gravity.

1,678,990. MOTOR CLOCK MOUNTING. JAMES F. MANSFIELD, Floral Park, N. Y. Filed Mar. 18, 1927. Serial No. 176,384. 1 Claim. (Cl. 244—29.)



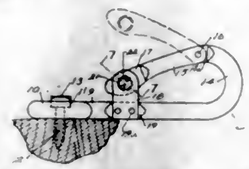
An instrument provided with a frame adapted to bear against the face of an instrument board, a substantially U-shaped substantially rigid bracket, one leg of which is secured to the lower portion of the frame and which bracket is adapted to extend beneath the lower edge of the instrument board with the other leg of the bracket extending upwardly behind the instrument board and at a substantial distance therefrom, and a screw threaded

through the latter leg of the bracket in such a manner as to occupy a downwardly inclined position when screwed into engagement with the instrument board and



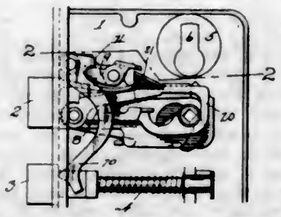
at the same time have its engaging end positioned at a substantial distance from the lower edge of the instrument board, said screw having a biting end.

1,678,991. PLUNGER CLIP FOR SYRINGES. ALEXANDER MARSCHALEK, East Rutherford, N. J., assignor to Becton, Dickinson & Co., Rutherford, N. J., a Corporation of New Jersey. Filed Nov. 2, 1927. Serial No. 230,405. 10 Claims. (Cl. 128—218.)



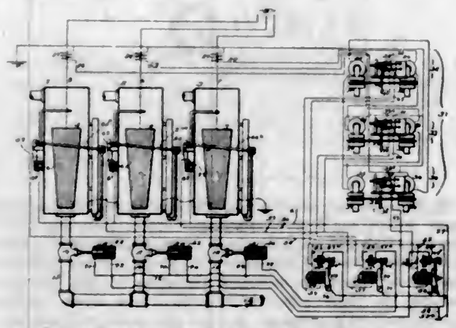
1. The combination with a syringe provided with a plunger and barrel, of means for holding the plunger against accidental movement while in the barrel or holding the plunger out of the barrel but adjacent thereto, said means including a pair of gripping arms, and means for pivotally mounting said arms on said barrel so that it may swing at a right angle to the barrel whereby the arms may be swung to grip the plunger while in the barrel and swung to a different position to grip the plunger when out of the barrel.

1,678,992. INSULATOR. JOHN R. MARSHALL, McKean, Pa. Filed Sept. 10, 1927. Serial No. 218,675. 3 Claims. (Cl. 173—314.)



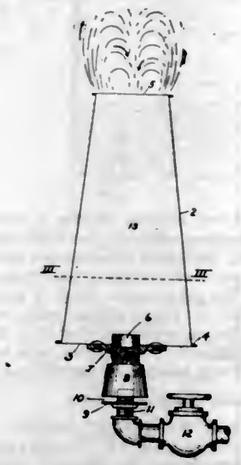
1. In an insulator, the combination of an insulator block formed of top and bottom halves, said halves having opposing faces forming a wire-receiving perforation with the blocks assembled; a support for the bottom half comprising hook plates in which the half is mounted; a top plate hinged to the hook plates and carrying the top half; and means locking the top plate to the hook plates.

1,678,993. HOOK. JOHN R. MARSHALL, McKean, Pa. Filed Jan. 18, 1928. Serial No. 247,689. 8 Claims. (Cl. 24—241.)



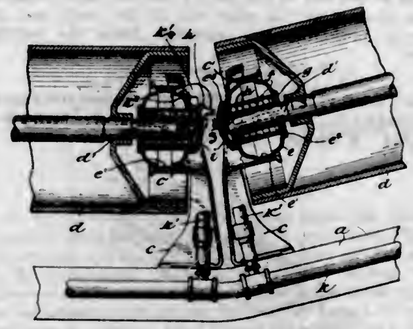
1. In a hook, the combination of a shank having a screw-threaded opening therein; a hook end on the shank; a bar pivoted on the hook end closing the hook, said bar having a screw-threaded opening adapted to be brought into register with the screw-threaded opening in the shank; and a screw connection between the shank and the bar.

1,678,994. DOOR LOCK. GEORGE N. MASON, Reading, Pa., assignor to Reading Hardware Corporation, Reading, Pa., a Corporation of Pennsylvania. Filed May 12, 1927. Serial No. 190,698. 1 Claim. (Cl. 70—29.)



In a door lock having a dead bolt, a spring-backed latch bolt, and levers carried by the dead bolt through which the latch bolt may be actuated; a spring backed lever, pivoted on and carried by the dead bolt, a bolt actuating cam, said spring backed lever having a heel on its inner or free end which heel forms one of the walls of the cam engaging throat of the dead bolt and which heel is capable of being depressed whereby the cam may enter said throat at all points of projection of said bolt.

1,678,995. MECHANISM FOR THE CONTROL OF ELECTRIC STEAM GENERATORS. WILLIAM D. MAXIM and EVERETT A. MAHANNAH, New York, N. Y., assignors to International Paper Company, a Corporation of New York. Filed Dec. 14, 1926. Serial No. 154,840. 10 Claims. (Cl. 219—20.)

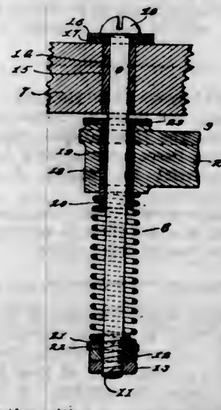


1. In combination with a plurality of electric steam generating tanks, means for supplying the same with electric current to heat the water therein, a feed water supply for each tank, an electrically operated means for each feed water supply, said several electrically operated means being supplied with current from a common source, and an electrically operated controlling device for each of said electrically operated means supplied with current from said common source, and being adapted, by an excess of current in one tank over that in another tank, to shut off the supply of feed water to the tank in which the excess of current occurs.

1,678,996. BURNER. HENRY MCKINNIE, Pittsburgh, Pa. Filed Jan. 23, 1926. Serial No. 83,269. 1 Claim. (Cl. 158—99.)

In a fuel mixing burner, the combination of an upwardly tapering frusto-conical sheet metal casing having its maximum diameter bottom portion provided with a flat transverse closed bottom wall, a gas and air mixture pipe secured to and extending upwardly through the central portion of the bottom wall and slightly above its inner surface, a gas supply pipe leading thereto with an intervening adjustable air supply mixer, and a circular flat perforate outlet top cover extending across the minimum diameter delivery end of the burner.

1,678,997. IDLER FOR BELT CONVEYERS. GEORGE E. MELLIN, New York, N. Y. Filed Aug. 24, 1922. Serial No. 584,013. 2 Claims. (Cl. 308—20.)

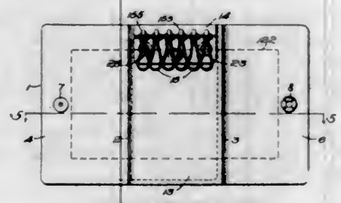


1. A pressed metal bearing box for an idler roll having an open end to receive the bearing, a shoulder at the opposite end on which the bearing seats, a bearing plate resting in the box at the last named end and engaged with the bearing and a closing plate pressed in the open end of the box to close the same, said box being provided with an opening at its opposite end back of the said bearing plate for the introduction of a knock-out punch.

1,678,998. PROCESS OF TANNING HIDES. KURT H. MEYER and HERMANN SCHÜTTE, Mannheim, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Filed Oct. 27, 1924. Serial No. 746,248, and in Germany Nov. 14, 1923. 7 Claims. (Cl. 149—5.)

1. The process of tanning which consists in treating hides with a slightly acid solution containing a sulfonation product of an aliphatic tar.

1,678,999. MOTOR MOUNTING. HENRY H. MURRAY, Riverton, N. J., assignor to Victor Talking Machine Company, a Corporation of New Jersey. Filed Nov. 15, 1923. Serial No. 674,907. 1 Claim. (Cl. 248—16.)



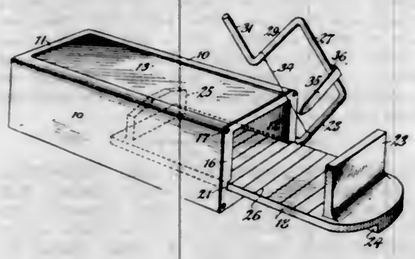
The combination with a motor-support and a motor comprising a rigid motor-frame, of a plurality of rigid rods mounted on said support and projecting therefrom, metallic compression springs supported at their lower ends by said rods and surrounding but spaced from said rods and upon the upper ends of which said motor-frame rests and by which the weight of said motor is balanced, said frame being provided with a plurality of openings through which said rods respectively pass, yielding, sound-insulating material between said rods and said support to prevent any actual contact of said rods with said support and to permit said rods to yield slightly with respect to said support, and bushings of yielding, sound-insulating material fitted into said openings in said motor, frame, each bushing having a bore therethrough of a diameter substantially larger than the diameter of the rod passing therethrough and projecting beyond said motor-frame into the space between a spring and a rod whereby said motor frame is free to slightly move and vibrate in any direction with respect to said rods and with respect to said support unrestrained except by the resiliency of said springs and gravity.

1,679,000. RUBBER SOFTENING AND COMPOUNDING INGREDIENT. CLAYTON OLIN NORTH, Tallmadge Township, Summit County, Ohio, assignor to The Rubber Service Laboratories Co., Akron, Ohio, a Corporation of Ohio. Filed Oct. 2, 1924. Serial No. 741,278. 3 Claims. (Cl. 106—23.)

3. A composition of matter for use as a softening and filling ingredient in the manufacture of a vulcanized rubber product, said composition comprising a mixture of 1000 gallons of a mineral lubricating oil having a viscosity of not over 120 seconds Saybolt at 100° F., and not more than 450 pounds of cotton seed oil.

1,679,001. KEY CASE. PATRICK W. PENTA, Medford, Mass., assignor to Wilson Manufacturing Company, Boston, Mass., a Corporation of Massachusetts. Filed Jan. 12, 1927. Serial No. 160,624. 4 Claims. (Cl. 150—40.)

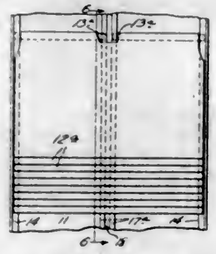
1. A key case comprising a back member with a plurality of sections, one of which carries a pocket forming member with a window therein for carrying and displaying papers, a key carrying panel with a key plate hinged to the pocket forming member to provide a swinging attachment of the key carrying member to the back member.



1,679,002. WELDING ELECTRODES. NORMAN B. PILLING, Elizabeth, and JOHN G. SCHOENER, Bayonne, N. J., assignors to The International Nickel Company, New York, N. Y., a Corporation of New Jersey. Filed Oct. 19, 1925. Serial No. 63,555. 5 Claims. Cl. 219—8.)

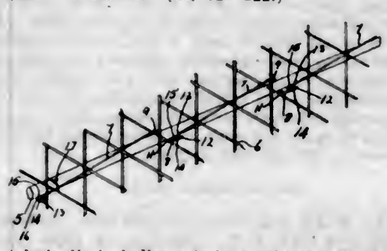
2. An arc welding electrode comprising a normal nickel alloy, and a coating in which there is approximately 19% titanium, and approximately 6% calcium.

1,679,003. WELDING ROD. NORMAN B. PILLING, Elizabeth, and JOHN GEO. SCHOENER, Bayonne, N. J., assignors to The International Nickel Company, Inc., New York, N. Y., a Corporation of New Jersey. Filed Dec. 5, 1927. Serial No. 237,979. 5 Claims. (Cl. 219—8.)



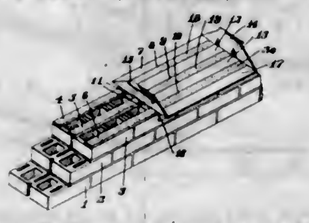
1. A welding electrode comprising a metallic nickelous matrix malleableized by an alkaline-earth metal, and an associated coating including a titanium alloy and a calcium alloy, titanium aggregating from 0.1 to 10%, and calcium from 0.1 to 8% of the weight of the electrode, respectively.

1,679,004. APPARATUS FOR STORING AND CUTTING BLOCK MATERIAL. ALBERT F. PINKEL and MATTHEW J. BRUNNER, Buffalo, N. Y.; said Brunner assignor of his entire right to Gotthold P. Berner, Buffalo, N. Y. Filed Feb. 13, 1923. Serial No. 618,842. Renewed Nov. 10, 1927. 2 Claims. (Cl. 107—20.)



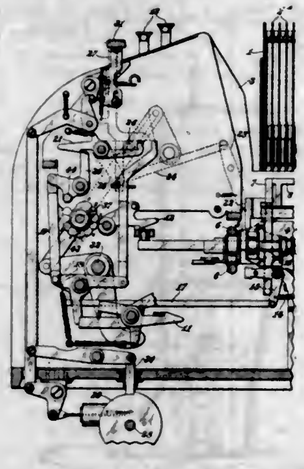
1. An apparatus of the character described comprising a casing having an opening at its front end and upper and lower longitudinal grooves on the upper and lower parts of the inner surface of its sides, a transparent plate engaging its longitudinal edges with said upper grooves and forming the top of said casing, a frame secured to the front end of said casing around said opening, and a shelf slidable with its longitudinal edges in said lower grooves and provided on its front part with a shutter for closing said opening.

1,679,005. INDEX DEVICE. JAMES H. RAND, Jr., Tonawanda, N. Y., assignor, by mesne assignments, to Remington Rand, Inc., New York, N. Y., a Corporation of Delaware. Filed July 31, 1924. Serial No. 729,276. 8 Claims. (Cl. 129—16.)



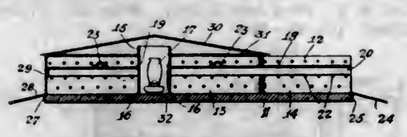
1. A record-displaying member having a plurality of coplanar retaining tongues adjacent one edge thereof, one of said tongues being positioned adjacent one side edge of said displaying member, and another of said tongues being positioned adjacent the opposite side edge of said displaying member, a pair of said tongues being oppositely directed and positioned intermediately of said side edges, and a support having parts for engaging said tongues to maintain said displaying member on said support.

1,679,006. CLIP FOR FASTENING METAL LATHS. JOHN S. RAYNOR, Philadelphia, Pa. Original application filed Mar. 17, 1925, Serial No. 16,098. Divided and this application filed Sept. 23, 1926. Serial No. 137,231. 4 Claims. (Cl. 72—122.)



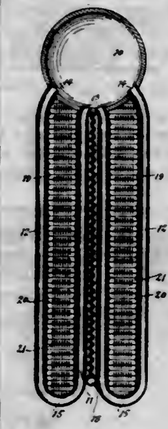
4. A lath clip including a body, a substantially L-shaped stay leg at one end of the body, a substantially U-shaped locking element at the other end of the body, and an outwardly projecting toe extending from the locking element.

1,679,007. MORTAR DISTRIBUTOR. GEORGE D. REAGAN, Oklahoma City, Okla. Filed June 21, 1927. Serial No. 200,464. 3 Claims. (Cl. 72—128.)



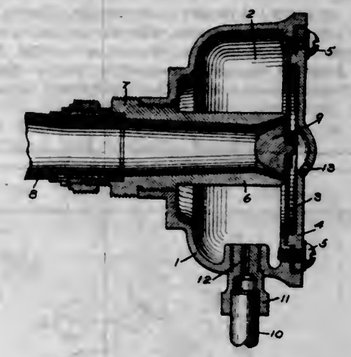
1. A mortar distributor of the kind described, having a plurality of channels of predetermined width therein, said channels being open at their ends to permit sliding of said distributor along a wall without disturbing the mortar course laid thereby, flanges of predetermined height depending from said distributor at the sides of said channels and adapted to rest on a wall, a guiding flange on the under surface of said distributor and adapted to engage one face of a wall, hand holds at opposite ends of said distributor, and webs between said channels to block the voids in hollow wall structure, said first named flanges, said hand holds and said webs being formed of a single piece of material.

1,679,008. ACCOUNT-FINDING MACHINE. EDWIN L. KELLER and VICTOR R. A. STROH, St. Louis, Mo., assignors, by mesne assignments, to Remington Rand Inc., New York, N. Y., a Corporation of Delaware. Filed Nov. 8, 1920. Serial No. 422,659. 18 Claims. (Cl. 129—16.1.)



1. In an account finding machine, selecting means, a series of controlling elements therefor, actuating means for concurrently setting a plurality of said elements for cooperation with said selecting means, and means adapted to restore the set elements in succession.

1,679,009. BROODER FOR CHICKENS. VINCENT R. ROSTEK, Philadelphia, Pa. Filed July 22, 1927. Serial No. 207,710. 2 Claims. (Cl. 119—32.)

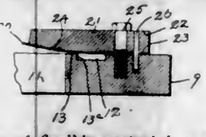


1. In a brooder, a base; a casing supported upon said base; a lamp housing projecting upward from the base within said casing, said housing having an opening covered with transparent material; a runway leading to the interior of the brooder in line with said covered opening; an adjustable cover having an opening therein for passing over the housing; a hood spaced from the upper edge of the casing causing the heated air issuing from the housing to heat the cover; and gangways for facilitating ingress to and egress from the interior of the brooder and also for shutting off access thereto.

1,679,010. COOLING UNIT FOR REFRIGERATORS. FRANKLIN G. SLAGEL, Buffalo, N. Y., assignor to Fedders Manufacturing Company Inc., Buffalo, N. Y., a Corporation of New York. Filed Apr. 23, 1927. Serial No. 186,027. 3 Claims. (Cl. 62—95.)

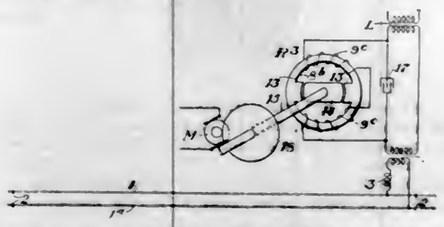
2. A cooling unit for refrigerators comprising a vaporizing chamber, a plurality of longitudinal rows of transverse refrigerant loops connected at their upper ends with said chamber, and a row of longitudinal loops arranged lengthwise between said rows of transverse loops and connected at their upper ends with said chamber.

1,679,011. SIGNAL DEVICE. ROBERT G. WIDMYER, Irwin, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed June 5, 1926. Serial No. 113,884. 5 Claims. (Cl. 116—142.)



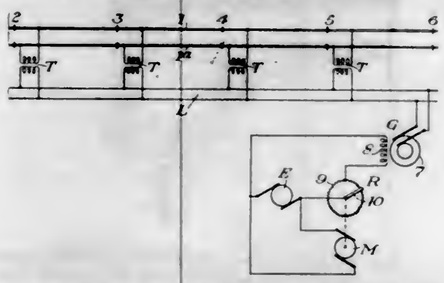
3. A sound producing device comprising a casing having a chamber adapted to be supplied with fluid under pressure, a tube open to the atmosphere and extending into said chamber, a flexible diaphragm normally seating without pressure against the end of said tube and controlling communication from said chamber to said tube, and a weight attached to said diaphragm for regulating the vibratory action of the diaphragm.

1,679,012. VALVE. EDWARD WILSON, St. Louis, Mo., assignor to National Pump and Compressor Company, St. Louis, Mo., a Corporation of Delaware. Filed Dec. 26, 1925. Serial No. 77,689. 4 Claims. (Cl. 251—119.)



1. A valve comprising a block, a seat formed on one face of said block, an elongated port formed through said block and seat, a laterally extending channel formed

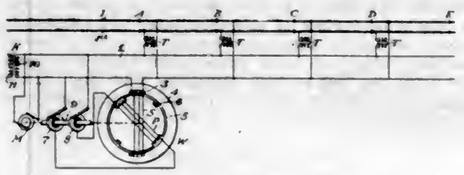
through said seat adjacent the one end of said port, a strip of flexible material resting on said seat and extending over said channel and port, means having a portion thereof upwardly curved for limiting the upward move-



ment of said strip of flexible material, means for securing said strip of flexible material and limiting means to said block and adjacent said channel and means for restraining said strip and limiting means against lateral shifting.

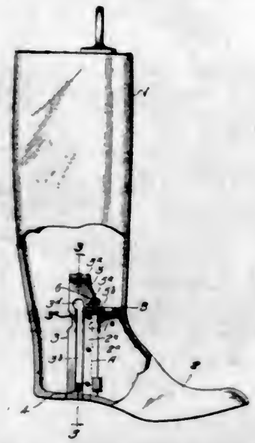
1,679,013. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. CONRAD H. ZIERDT, Penn Township, Allegheny County, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Oct. 23, 1926. Serial No. 143,618. 11 Claims. (Cl. 246—34.)

11. In combination with the rails of a railway track and a source of alternating current connected therewith, a reactor interposed in said connection, and movable means for periodically varying the impedance of said reactor.



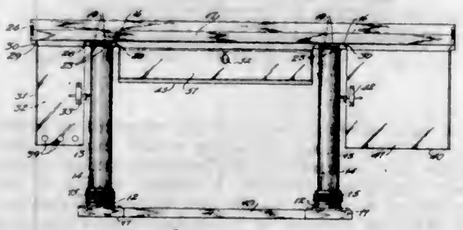
1,679,014. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. ROBERT M. GILSON, Pittsburgh, and ANDREW A. SKENE, Wilkinsburg, Pa., assignors to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Dec. 11, 1926. Serial No. 154,103. 5 Claims. (Cl. 246—34.)

4. In combination, a railway track, a generator for supplying alternating current to said track, a rheostat in the field circuit for said generator, and means for constantly operating said rheostat to continuously vary the voltage applied to said track by said generator.



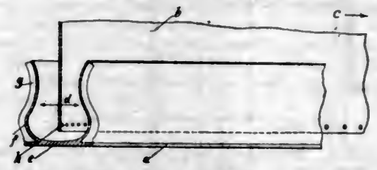
1,679,015. RAILWAY-TRAFFIC-CONTROLLING APPARATUS. CHARLES R. BEALL, Edgewood Borough, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa., a Corporation of Pennsylvania. Filed Jan. 4, 1927. Serial No. 158,842. 6 Claims. (Cl. 246—34.)

4. In combination, a pair of conductors, a source of alternating current connected to said conductors, a first winding connected in series with one of said conductors, a second winding connected in multiple with said source



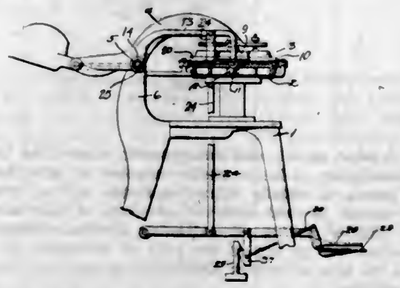
and inductively related to said first winding, and means for continuously rotating one of said windings.

1,679,016. BOOT-TREE OR LAST. WILLIAM S. ASHTON, Watertown, Mass., assignor to Hood Rubber Company, Watertown, Mass., a Corporation of Massachusetts. Filed Feb. 17, 1927. Serial No. 168,984. 6 Claims. (Cl. 18—46.)



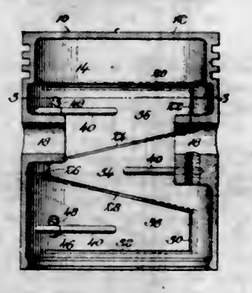
1. A boot tree or last comprising a leg section and a toe section having faces abutting along intersecting planes, interengaging means effecting a limited sliding connection between said parts along one of said intersecting planes, including means for permitting the toe section to have a swinging movement about an axis parallel to said intersecting planes at the extremity of its sliding movement in one direction.

1,679,017. SERVICE TABLE. JOHN M. ATHANS, New York, N. Y. Filed June 9, 1927. Serial No. 197,694. 7 Claims. (Cl. 45—17.)



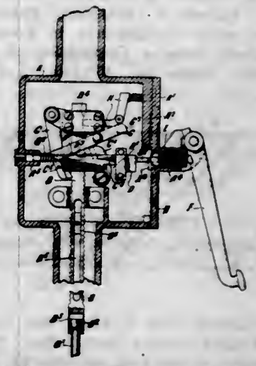
2. In a service table, a base, a top, means to support the top for movement toward and from the base, and a series of telescopic article carriers having sliding connection with the underside of said top.

1,679,018. GAS-TIGHT SEAL FOR RELATIVELY-MOVING PARTS OF OVENS. FRIEDRICH BARTLING, Munich, Germany. Filed May 16, 1927, Serial No. 191,913, and in Germany Jan. 15, 1927. 4 Claims. (Cl. 263—28.)



1. A gas tight closure or seal for interposition between relatively movable members of ovens and the like, comprising a sand channel mounted on one of said members, the walls of said channel converging toward each other at the top so the channel has a substantially pear-shaped cross-section, sand in said channel, and a web connected to the other member and dipping into the sand, so that during relative movements of said web and channel at a right angle to the direction of the relative movement of the members, the converging walls of the channel prevent the web from forcing sand from the channel.

1,679,019. PRESSING MACHINE. PHILIP N. BRAUN, Syracuse, N. Y., assignor to The Prosperity Company Inc., Syracuse, N. Y., a Corporation of New York. Filed Oct. 13, 1925. Serial No. 62,258. 13 Claims. (Cl. 68—9.)



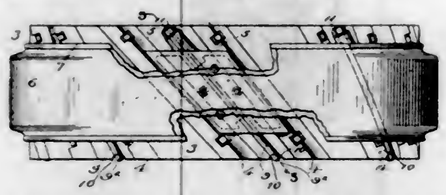
1. In a pressing machine, the combination of a buck, a head mounted to move toward and from the buck, an intermediate member mounted to coact with the buck to hold a garment thereon, the intermediate member being movably relatively to the buck and the head and means for detachably coupling said intermediate member to the head.

1,679,020. PISTON. GEORGE F. BRENT, Eugene, Oreg. Filed Aug. 6, 1926. Serial No. 127,604. 3 Claims. (Cl. 74—108.)

1. A piston including a skirt slotted to produce a flexible tongue, a split rib formed on the inner face of said skirt partly on said rib and partly on the body portion proper of the skirt, and screw means between adjacent edges of said rib formed by said split operable to spread the two portions of said rib with respect to one another thereby to adjust said tongue outwardly with respect to the axis of the skirt.

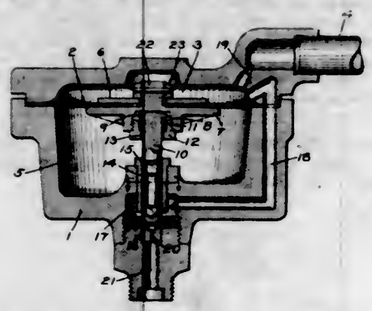
1,679,021. PETROL AND OTHER MEASURED-QUANTITY DELIVERY PUMP. WILLIAM EDWARD BRYAN, Kegworth, Derby, England, assignor to Slack & Parr Limited, Kegworth, Derby, England. Filed Mar. 25, 1927, Serial No. 178,379, and in Great Britain Nov. 3, 1926. 7 Claims. (Cl. 194—60.)

1. Apparatus for controlling the operation of petrol and other measuring quantity delivery pumps, comprising a casing attached to the pump frame, bearings in the casing suitable for carrying a slide, a slide carried on such bearings, coin freed means for traversing such slide, two oppositely directed pawls fulcrumed in the casing, abutments on the slide located so as to engage the said pawls, a rack having oppositely directed teeth located between the pawls, lost motion means connecting the rack to the pump permitting the said pump to operate only after the lost motion is taken up, means on the slide for rocking both pawls to engage one pawl or the other pawl with the rack when the slide is traversed, means to return the slide to its initial position when released, means on the slide to hold it at the end of its traverse, means on the rack to release the slide when the said rack has arrived at the end of its stroke, thereby reversing the pawls and permitting the rack to return to its initial position and the pumps to be ready to commence a new measuring operation.



1,679,022. CUTTER. OTTO H. CALDWELL, Houston, Tex. Filed Oct. 3, 1927. Serial No. 223,613. 6 Claims. (Cl. 30—17.)

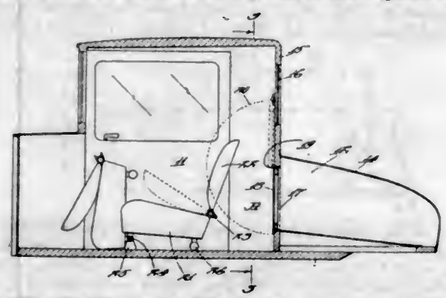
1. An implement of the character described including confronting blades connected together and having pivoted



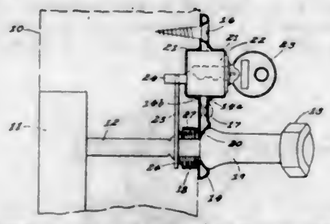
movement relative to each other, said blades having confronting cutting edges, at one end and whose other ends are extended, forming shanks, a jaw having an extended arm to which one of said shanks is pivoted, an interiorly threaded sleeve pivoted to said arm, a shaft threaded through said sleeve and connected to the other shank, and handles, one connected to said shaft, and the other connected to said jaw.

1,679,023. TIRE MOUNTING FOR TRACTION WHEELS. ERNEST E. EINFELDT, Davenport, Iowa, assignor, by mesne assignments, to French & Hecht, Inc., Davenport, Iowa, a Corporation of Iowa. Filed Jan. 4, 1927. Serial No. 158,740. 5 Claims. (Cl. 301—39.)

5. In combination with a wheel rim, traction cleats thereon converging toward each other to form side wedging surfaces, a tire ring surrounding said rim and covering the traction cleats, wedging members on the tire ring formed with converging sides to cooperate with the side wedging surfaces of the traction cleats in wedging the tire ring on the rim, fastening bolts carried by the wedging members and engaged at one end with the edge of the rim at that side, and nuts on the opposite ends of the bolts engaging the wedging members at that side.



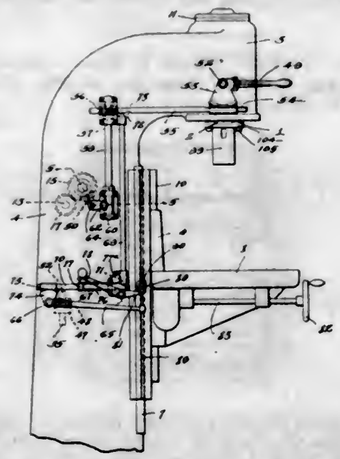
1,679,024. SIGNAL-VALVE DEVICE. CLYDE C. FARMER, Pittsburgh, Pa., assignor to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Dec. 21, 1926. Serial No. 156,139. 7 Claims. (Cl. 116—55.)



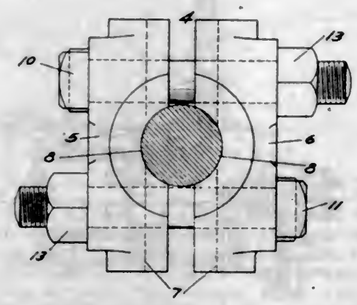
2. A signal valve device comprising a casing, a flexible diaphragm in said casing, a diaphragm plate carried by said diaphragm and having a chamber, a valve, a valve stem for said valve provided with a head mounted in said chamber, means for holding said head in said chamber and adapted to permit movement of the head and stem relative to the diaphragm, and means in said casing for guiding said valve stem for axial movement.

1,679,025. BODY FOR AUTOMOBILES. STEPHEN I. FEKETE and MILLARD H. TONCRAY, Detroit, Mich., assignors to Hudson Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Jan. 2, 1925. Serial No. 97. 2 Claims. (Cl. 296—24.)

1. A coupé body for automobiles having a driver's compartment and a rear deck compartment constituting the entire rear portion of the body and permanently closed to the outside, a door controlling communication between the driver's compartment and rear deck compartment, and a seat in said driver's compartment spaced forwardly of said door and having a portion movable out of the path of movement of said door in opening and closing.

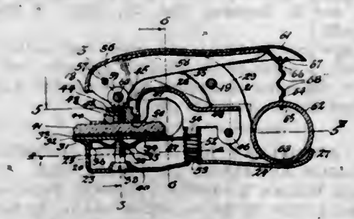


1,679,026. LATCH SPINDLE AND LOCK ASSEMBLY. STEPHEN I. FEKETE, Detroit, Mich., assignor to Hudson Motor Car Company, Detroit, Mich., a Corporation of Michigan. Filed Jan. 26, 1926. Serial No. 83,963. 2 Claims. (Cl. 70—29.)



1. A latch spindle and lock assembly comprising an escutcheon plate, a latch spindle mounted to turn therein and having a radially extending finger, and a cylinder lock carried by said plate at one side of said spindle, said cylinder having an extending portion adapted to be moved into or out of the path of movement of said finger to lock or unlock said latch spindle by turning the cylinder.

1,679,027. DRILLING MACHINE. CARL GABRIELSON and ALEXANDER MELDRUM, Syracuse, N. Y. Filed June 16, 1925. Serial No. 37,500. 6 Claims. (Cl. 77—5.)

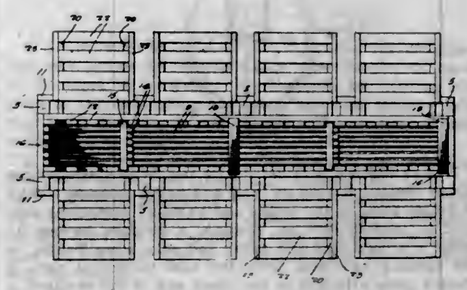


1. In a machine tool, the combination of a rotatable tool spindle, a work carriage movable toward and from the spindle, mechanism for actuating the spindle and the carriage, comprising a shiftable member for controlling the actuation of the spindle and a second shiftable member for controlling the actuation of the carriage, means for operating said members, and an interlocking connection between the operating means for said members to prevent the shifting of the second member into operative position when the first member is out of its operative position, substantially as and for the purpose described.

1,679,028. POLISHED ROD CLAMP. CHARLES E. GALLMAN, Tulsa, Okla., assignor to Oil Well Supply Company, Pittsburgh, Pa., a Corporation of Pennsylvania. Filed May 11, 1926. Serial No. 108,281. 2 Claims. (Cl. 24—243.)

1. A polished rod clamp including two similar separable clamp members and having two polished rod receiving openings extending centrally therethrough, one opening being disposed at right angles with and bisecting the other, and means for securing the clamp members together including two pairs of horizontally extending bolts passed through openings in the clamp members, each bolt having an adjusting nut thereon with the nuts of each pair located on opposite sides of the clamp.

1,679,029. SEAL PRESS. CALDER C. GIBSON, Buffalo, N. Y. Filed Sept. 4, 1925. Serial No. 54,424. 12 Claims. (Cl. 101—3.)

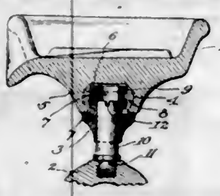


1. A seal press having a frame provided with a base and an arm projecting from the rear part of said base upwardly and forwardly, said base having a horizontal bottom and a wall rising from the edge of the base and said arm having two sections rising from the rear parts of the wall of said base, the front part of said base being wide and of circular form and the rear part of the same being comparatively narrow, and the front part of said wall being of cylindrical form and the rear parts thereof substantially parallel, and each of said arm sections having an outwardly offset front web which is arranged in the same plane as the rear wall part on the corresponding side of the base and an inwardly offset rear web which is arranged inwardly from the companion front web and a cheek arranged at the front ends of said webs and offset outwardly from both of said webs.

1,679,030. SPRING-PAD CONSTRUCTION. LOUIS S. HALLOWELL, Syracuse, N. Y., assignor to The Presperity Company Inc., Syracuse, N. Y., a Corporation of New York. Filed Feb. 20, 1926. Serial No. 89,785. 6 Claims. (Cl. 68—9.)

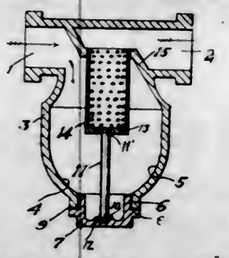
1. A spring pad comprising upper and lower plates, a base member resting on the lower plate and formed with holes therein which holes constitute sockets and coiled springs seated in the sockets and resting at their lower ends on the base plate, the springs projecting above the base member, the top plate resting on the upper ends of the springs.

1,679,031. VEGETABLE AND FRUIT DISPLAY APPARATUS. JAMES THOS. HENLEY, Inverness, Miss. Filed Jan. 12, 1927. Serial No. 160,657. 4 Claims. (Cl. 211—126.)



4. A device of the class described including a plurality of legs arranged in pairs, the lengths of the legs of the pairs gradually increasing from the front end of the device to the rear end thereof, inclined side rails fixed to the legs and extending longitudinally of the device, two side rails on each side of the device being disposed in parallel spaced relation to each other, brace rails on the outer sides of the legs, said brace rails being disposed substantially alongside the lower side rails and below the upper side rails, a plurality of trays each comprising supporting bars having notches in which the respective brace rail is disposed, the extremities of the supporting bars being disposed between the side rails, the supporting bars having their upper edges cut away, rails disposed on the cut away portion, a plurality of pickets attached to the side rails to extend vertically, said pickets being disposed in spaced relation to one another, a plurality of partitions each including a plurality of pickets attached to a pair of cross pieces, the ends of which are disposed between the pickets of the side rails, and cross pieces between the legs of each pair, longitudinally extending rails supported on the cross pieces to form an inclined bottom on which the partitions rest.

1,679,032. SOAP-DISH SUPPORT. OTTO G. HITCHCOCK, Erie, Pa., assignor to Hays Manufacturing Company, Erie, Pa., a Corporation of Pennsylvania. Filed June 3, 1925. Serial No. 34,749. 1 Claim. (Cl. 45—28.)

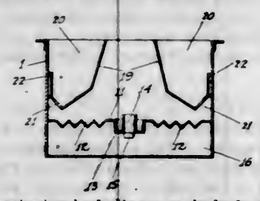


The combination with a soap dish and a socket member secured in a recess in the underside thereof, said socket member having a tapered opening therethrough, of an up-

standing plug fixed to a support and tapered to correspond with the taper of said socket member opening, whereby to enter and engage said socket member, the weight of the

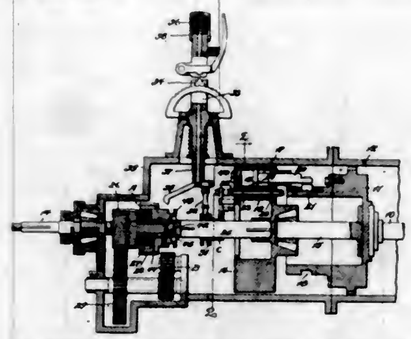
dish maintaining the socket member in light frictional engagement with the plug, ready for instantaneous removal of the dish.

1,679,033. STRAINER. FREDERICK M. HOLMES, Springfield, Mass., assignor to Tryco Products, Inc., Westfield, Mass., a Corporation of Massachusetts. Filed Nov. 5, 1923. Serial No. 672,803. 3 Claims. (Cl. 210—165.)



1. A cylindrical strainer device for fluids comprising a casing member having an inlet and outlet passage, a wall or bridge piece in the casing and having a horizontal part that is formed with an opening, a strainer having its upper end open and said upper end only being located in the opening and flush with the said horizontal part, a closure plate attached to the lower end of the strainer, a closure cap for the lower end of the casing, a rod secured to the cap and to the said plate on the lower end of the strainer at its upper end for removing the strainer when the cap is removed, the construction and arrangement being such that the incoming fluid passes from the outside through the openings in the side of the strainer to the inside of the strainer and to the open outer end of the strainer and outlet passage whereby the entire outer surface of the strainer is thereby utilized.

1,679,034. STENCIL SHEET. SHINJIRO HORII, Tokyo, Japan. Filed Dec. 17, 1927. Serial No. 240,940. 5 Claims. (Cl. 41—38.6.)

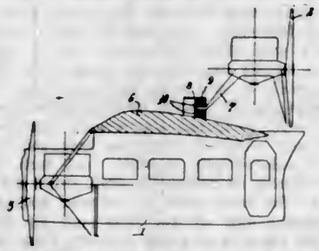


1. A stencil sheet adapted for stencilizing by pressure, consisting of a base of fibrous material including esters of polysaccharides and squalene.

1,679,035. CONCENTRATOR. WILLIAM A. HUELSDONK, Merced Falls, Calif. Filed Aug. 16, 1926. Serial No. 129,310. 5 Claims. (Cl. 209—441.)

1. A concentrator including a main body member, a floor in said member having longitudinally extending riffle grooves therein, a chamber at the rear end of the member and into which the grooves lead, means for discharging water and the material to be treated onto and from said floor in a manner to cause a flow of water and material to take place across the riffles whereby precious metal particles in said material will be caught and deposited in the riffles, means for shaking said member longitudinally to cause said particles to advance along the grooves toward and into the chamber, and means for maintaining a supply of water in the chamber at a level higher than that of the grooves whereby to set up a forward flow of water along the grooves from the chamber into the member ahead of said chamber.

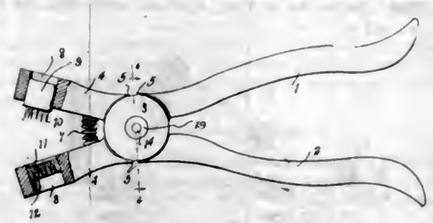
1,679,036. TRANSMISSION. SAMUEL C. IGOU, St. Louis, Mo. Filed Oct. 6, 1924. Serial No. 741,933. 2 Claims. (Cl. 192—59.)



1. A transmission comprising a driving shaft, a driven shaft, a block connected for rotating the driven shaft, a dash-pot carried by the block, a stress bar bearing a piston operating in the dash-pot, an element connected for rotation by the driving shaft, cams carried by said element for the movements of said stress bar, ports for said dash-pot, a tubular valve having ports of greater lengths than the ports of the dash-pot, and means for operating the tubular valve.

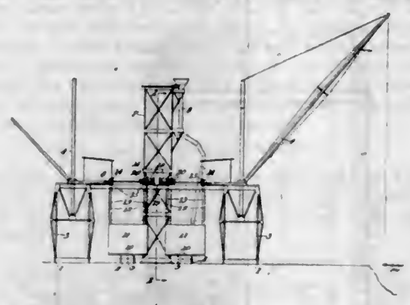
1,679,037. BOILER COMPOSITION AND METHOD OF MAKING SAME. HANS KARPLUS, Frankfort-on-the-Main, and WILHELM BACHMANN, Seelze, near Hanover, Germany, assignors to Firm E. de Haen A.-G., Seelze, near Hanover, Germany. Filed May 8, 1926, Serial No. 107,825, and in Germany Nov. 20, 1922. 3 Claims. (Cl. 87—27.)

1. As a new product for use as a boiler composition and disincrustant, a mixture of colloidal graphite and sulphite liquor, the colloidal graphite present in the mixture being aprpoximately one-sixth by weight.



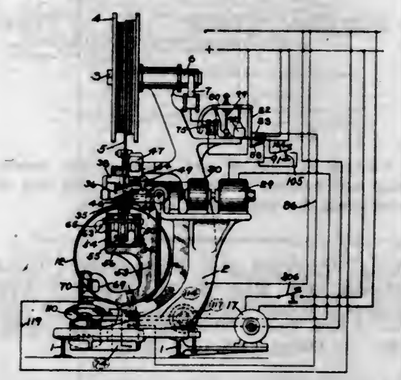
1,679,038. AEROPLANE WITH THREE CENTERS OF PROPULSION ARRANGED IN A TRIANGLE. SYTSE FREDERICK WILLEM KOOLHOVEN, Rijswijk, Netherlands. Filed Mar. 4, 1926, Serial No. 92,294, and in the Netherlands Sept. 5, 1924. 1 Claim. (Cl. 244—14.)

A monoplane comprising a body, a single wing positioned at the upper side of the body, and only three centers of propulsion arranged in a triangle, one of said



centers of propulsion only, interposed between the other two centers of propulsion, being located above the body of the aeroplane above and behind the wing, the other two centers of propulsion being located underneath, and in front of the wing one on each side of the body, the propeller corresponding to said first center of propulsion being made and arranged in such a way that in normal flying position the area, bounded by the circle of rotation of the said propeller is not more than 30% overlapped by the vertical projection of the body .

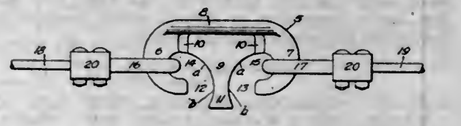
1,679,039. TOOL. GEORGE KUCERA, Grand Island, Nebr. Filed May 27, 1927. Serial No. 194,810. 1 Claim. (Cl. 164—120.)



A tool of the plier type comprising handle members, circular hinging elements formed integral with the handle members, jaws integral with and projecting from the hinging elements out of alinement with the handle members, dies carried by the free ends of the jaws, a pivot inserted centrally through the jaws, and a nut engaged with the pivot and retaining it in the hinging elements, one of said hinging elements being provided on its inner face with a circular outwardly tapered rib concentric with the pivot opening and the other hinging element being constructed with a central boss seating within said rib, and an annular groove receiving the rib, the retaining nut being tapered and seating in a tapered recess in the outer face of the first-mentioned hinging element.

1,679,040. CONCRETE-BUILDING CONSTRUCTION. SIMON LAKE, Milford, Conn. Filed Sept. 10, 1920. Serial No. 409,370. 4 Claims. (Cl. 25—131.)

1. In concrete building construction, a truck adapted to movably support a preformed concrete floor structure, forms adapted to be assembled upon said floor structure to form wall molds, a tower provided with means for receiving concrete mix, chutes running from said means to said forms for supplying the mix thereto, and hoisting means for raising said forms out of contact with said floor structure to permit of said truck with the floor structure and the walls formed thereon being moved from beneath said forms or said forms to be moved from over said poured structure.

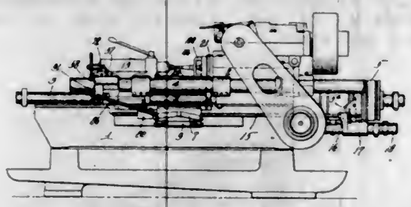


1,679,041. ELECTRIC WELDING MACHINE. JAMES A. LEEPER, Wilkinsburg, and ROBERT J. STRONG, Oakmont, Pa., assignors to The Westinghouse Air Brake Company, Wilmerding, Pa., a Corporation of Pennsylvania. Filed Nov. 23, 1925. Serial No. 70,745. 18 Claims. (Cl. 219—6.)

1. In an electric seam welding machine, the combination with means for feeding a metal electrode to the seam of the work to be welded, of feed rolls for feeding the work to the electrode, an electric motor for driving said feed rolls, and means for automatically energising said motor upon energisation of said electrode.

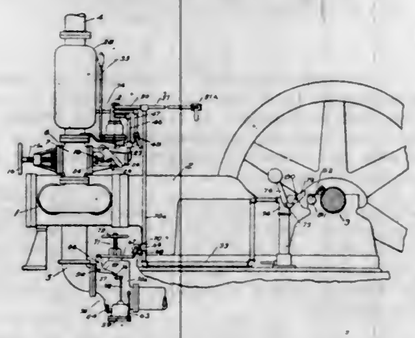
4. In an electric seam welding machine, the combination with means for electrically welding the seam of the work to be welded, of means for automatically feeding the work as the seam is welded, mechanism for shifting the work out of the line of feed, and means operated upon cessation of flow of welding current for operating said mechanism.

1,679,042. LINK. JOHN D. LEMEX, Tulsa, Okla. Filed Nov. 8, 1927. Serial No. 231,861. 5 Claims. (Cl. 230—5.)



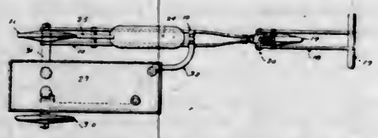
1. A link comprising a body provided with hook end portions and a member interposed between the said portions and forming therewith spaced apart openings, said member having a relatively wide portion adjacent the body and a relatively narrow portion projected beyond the free ends of the hook portions to form with said portions entering and exit slots disposed at an angle with the said openings and formed with curved engaging faces to facilitate the application and removal of looped members.

1,679,043. AUXILIARY GROOVING OR FACING ATTACHMENT FOR FAY LATHES. JOHN E. LOVELY, Springfield, Vt., assignor to Jones & Lamson Machine Company, Springfield, Vt., a Corporation of Vermont Filed Mar. 21, 1924. Serial No. 700,819. 10 Claims. (Cl. 82—2.)



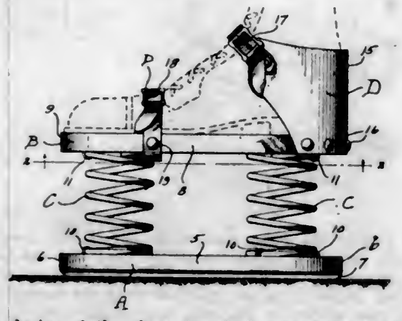
1. The combination with a lathe having a headstock and a tailstock, a rockable and axially movable tool bar, and a cam drum having cam means for controlling the

axial position of said tool bar, of an auxiliary tool bar journaled for rocking movement in one of said stocks, a cam carrier slidable on said first mentioned tool bar, a



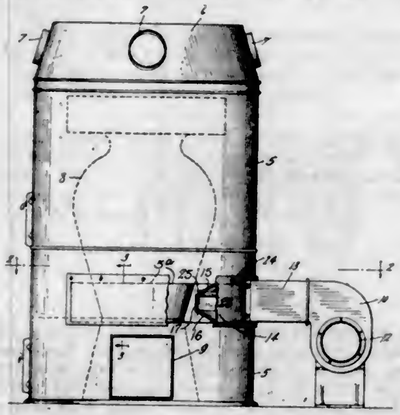
cam follower carried by said auxiliary bar, means for holding said follower against said cam, and cam means on said drum for sliding said cam carrier.

1,679,044. CONTROLLING MECHANISM. OSCAR H. LUDEMAN, Glen Ridge, N. J., assignor to Ludeman Brothers, Incorporated, New York, N. Y., a Corporation of New York. Filed Jan. 26, 1925. Serial No. 4,881. 13 Claims. (Cl. 137—139.)



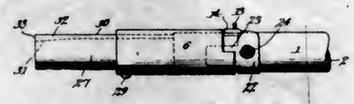
1. In a controlling mechanism, the combination of a steam engine; a steam supply passage leading to the engine; an inlet closure valve in the passage; closing mechanism for said valve; water and speed sensitive devices controlling said mechanism; and water level sensitive means responsive to exhaust water accumulations controlling said water sensitive device.

1,679,045. COMBINED SCOOTER, SIDE CAR, AND WAGON. ROY J. MANDERY, Lincoln, Nebr. Filed Aug. 18, 1925. Serial No. 50,987. 1 Claim. (Cl. 280—87.5.)



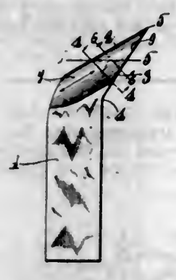
A scooter having a narrow elongated frame consisting of a pair of spaced apart beams, said beams being horizontally positioned and parallel throughout the major portion thereof and being converging and upwardly and forwardly inclined in their forward portions, a front wheel support pivotally secured to said beams at their forward extremities, said wheel support being forked and having a supporting wheel journalled therein, a handle member pivotally secured to said wheel support at the upper extremity thereof, means for releasably latching said handle member in substantially vertical position, a foot rest secured to said beams, a rear supporting wheel journalled to said beams at the rear extremities thereof, and a side car for said scooter, said side car including a box, an axle secured to said box and projecting beyond both sides thereof, said axle being adapted to be passed through the hub of said rear supporting wheel of said scooter, a supporting wheel journalled on said axle at the outer extremity thereof, and a reinforcing member on the under side of said box and extending forwardly from said axle and then inwardly and having a clip member adapted to straddle both of said beams forward of said foot rest to be releasably secured to said beams.

1,679,046. SPRING-SHOE AMUSEMENT DEVICE. ELMER MENEFEE, Zanesville, Ohio, assignor of one-half to Allen Henry Stanley, Zanesville, Ohio. Filed Mar. 2, 1926. Serial No. 91,794. 1 Claim. (Cl. 272—70.)



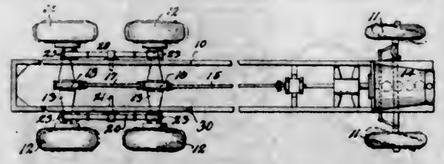
A device of the class described comprising a pair of superposed plates, the uppermost plate being provided with parallel side walls and arcuate end walls of equal radius, coil springs disposed between the plates and disposed equi-distant inwardly from each end of the plates, a flexible heel counter detachably connected at its lower portion with one arcuate end wall of the upper plate and interchangeable to the opposite arcuate end wall, an adjustable ankle strap carried by the heel counter, and a toe strap extending transversely beneath the upper plate and secured to the side walls thereof.

1,679,047. AIR CIRCULATOR FOR FURNACES. RUDOLPH W. MENK, Joliet, Ill. Filed Aug. 13, 1926. Serial No. 128,993. 11 Claims. (Cl. 126—99.)



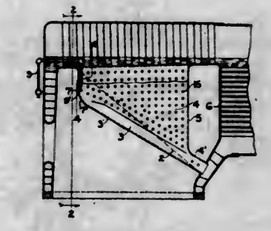
1. An air circulator for furnaces comprising a segmental shaped walled passageway formed with an outer wall, upper and lower walls extended inwardly from said outer wall, the upper wall being of less width than the lower wall, and an inner wall projecting from the inner edge of the lower wall the upper edge of which terminates adjacent and spaced from the inner edge of the upper wall whereby to provide a discharge outlet in the upper portion of the structure.

1,679,048. DETACHABLE CHOKE PIECE. RANSE WRIGHT MILLER, Dublin, Ga. Filed Feb. 4, 1927. Serial No. 165,967. 8 Claims. (Cl. 42—79.)



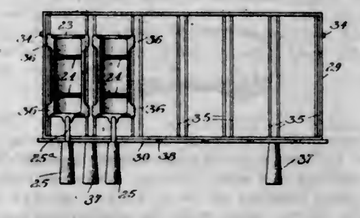
2. In combination, a shot-gun barrel, a sleeve slidable onto the end of the barrel, coacting means on the barrel and sleeve for preventing relative longitudinal movement of the sleeve and barrel, and means coacting with the first-named means to prevent rotative movement of the sleeve relative to the barrel.

1,679,049. CUTTING TOOL. SVEN T. NELSON, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Apr. 5, 1922. Serial No. 549,858. 8 Claims. (Cl. 262—33.)



1. As an article of manufacture, a coal mining machine cutter bit comprising a single homogeneous piece of material affording a shank terminating in a cutting portion having a cutting face, the material supporting said face presenting bounding surfaces whose traces on a plane parallel to the path of instantaneous travel of the bit but perpendicular to its plane of instantaneous movement recede from one or the other of two parallel lines lying in said first mentioned plane and passing adjacent the sides of the cutting face, and also having traces, at least a portion of which are the same, on any two planes having the same relation with respect to said surfaces, said surfaces being symmetrically disposed with respect to the longitudinal axis of said shank.

1,679,050. SPRING SUSPENSION FOR MOTOR VEHICLES. LEWIS NEWMAN, Cleveland, Ohio. Filed Feb. 16, 1927. Serial No. 168,593. 7 Claims. (Cl. 280—106.5.)



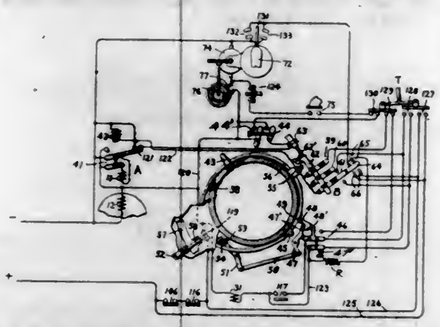
1. A spring suspension including a supporting frame, a spring member pivoted thereon for movement in a vertical plane, and dual axles pivotally connected at the free ends of said spring and both being free for transverse movement toward and from each other caused by expansion of said spring.

1,679,051. THERMIC SIPHON FOR LOCOMOTIVES. JOHN L. NICHOLSON, Chicago, Ill., assignor to Locomotive Firebox Company, Chicago, Ill., a Corporation of Delaware. Filed Feb. 21, 1922. Serial No. 538,411. 9 Claims. (Cl. 122—68.)

1. A thermic siphon having an angularly disposed bottom portion and a substantially upright front end, the rear end of said siphon being truncated to extend substantially parallel with said front end and merging into said angularly disposed bottom portion in a curve of a desired radius.

1,679,052. APPARATUS FOR BAKING FOOD PRODUCTS. GEORGE E. PAGE, Rochester, N. Y., assignor, by mesne assignments, to Paul S. Paulson, Rochester, N. Y. Filed Oct. 7, 1924. Serial No. 742,221. 6 Claims. (Cl. 107—56.)

6. In combination, a stove having a heating compartment, spaced supports mounted therein, a frame within the compartment comprising front and rear plates connected by side members slidably disposed upon the supports, a plurality of sets of rods extending between the front and rear plates and cooking utensils depending between the several sets of rods and having projecting portions resting upon the rods whereby the utensils are suspended within the frame.



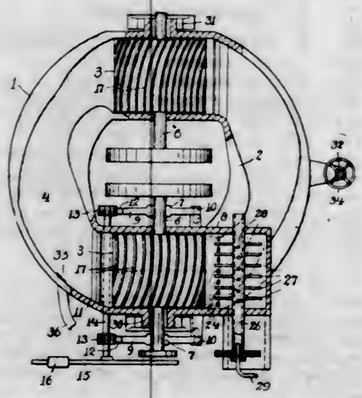
1,679,053. 1-ALKOXYMETHYL-3.7-DIMETHYLXANTHINES. KARL SCHRANZ, Elberfeld, and CLEMENS LUTTER, Barmen-Langenfeld, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Filed Feb. 19, 1926. Serial No. 89,413, and in Germany May 23, 1925. 4 Claims. (Cl. 260—34.)

1. The process of producing 1-alkoxymethyl-3.7-dimethylxanthines, which process consists in treating a theobromine salt with chloroalkylether having most probably the formula: $ClCH_2—OR$, R standing for an alkyl group containing two or more carbon atoms, substantially as described.

1,679,054. AUTOMATIC PHONOGRAPH. FRANK J. SEABOLT, Schenectady, N. Y., assignor, by direct and meane assignments, to The Phonograph Company, a Corporation of Delaware. Filed Nov. 12, 1921, Serial No. 514,448. Renewed Sept. 8, 1925. 4 Claims. (Cl. 274—15.)

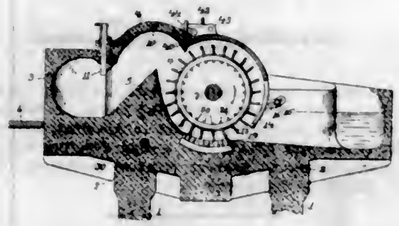
1. The combination with an electrically driven phonograph motor of means for reversing the same, a turntable and a tone arm provided with a needle, mechanism for

lifting the needle and returning the tone arm, and connections between the motor, the phonograph table and said mechanism whereby when the motor runs in one



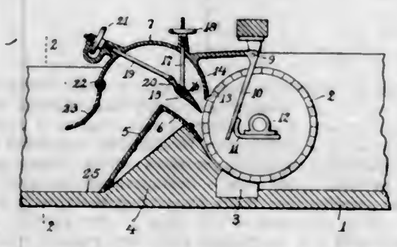
direction it drives the table but not the mechanism and when it is driven in the opposite direction it drives the mechanism but not the table.

1,679,055. CRYSTALLIZATION APPARATUS. WALTER SEIDEL, Leverkusen, Germany, assignor to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Filed May 16, 1927, Serial No. 191,860, and in Germany June 29, 1926. 4 Claims. (Cl. 23—273.)



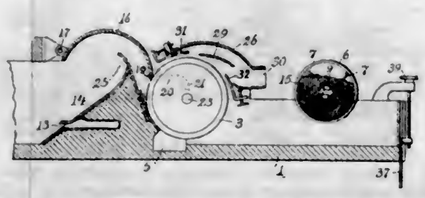
1. Crystallization apparatus, comprising a vessel adapted to have a rocking movement imparted thereto, means dividing said vessel into two lateral chambers, said means being disposed so as to permit drainage of substantially all the liquid from the higher chamber to the lower chamber in each extreme rocked position of the vessel and to prevent the movement of the bulk of the crystals from one chamber to the other.

1,679,056. BEATING ENGINE. LEO SHLICK, Montreal, Quebec, Canada. Filed Feb. 17, 1921. Serial No. 445,737. 25 Claims. (Cl. 92—24.)



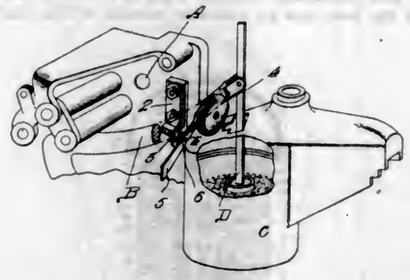
1. A beating engine comprising a tub, a midfeather, a bed-plate, a beater roll having a supporting shaft, levers each pivotally supported at one end of each and having a rack at its other end, a shaft having pinions meshing with said racks, and a weighted lever rigid with the last-named shaft, whereby the pressure of the said roll upon the bed-plate can be varied at will.

1,679,057. BEATING ENGINE. LEO SHLICK, Boston, Mass. Filed Jan. 19, 1927. Serial No. 162,191. 9 Claims. (Cl. 92—24.)



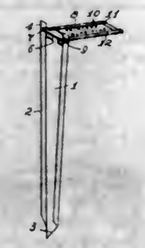
1. A beating engine comprising a tub having a midfeather, a beater roll, a bed-plate and a back-fall, the back-fall rising to a point above the level of the axis of the beater roll, a hood located above the back-fall, and a gate depending from said hood to a point below the level of the crest of the back-fall.

1,679,058. BEATING ENGINE. LEO SHLICK, Boston, Mass. Original application filed Feb. 17, 1921, Serial No. 445,736. Divided and this application filed Feb. 1, 1927. Serial No. 165,250. 13 Claims. (Cl. 92—24.)



1. A beating engine comprising a tub, a beater roll, a back-fall, a hood located above the back-fall, and a deflector located between the back-fall and hood for dividing the stock into upper and lower streams as it issues from the beater roll.

1,679,059. BEATING ENGINE. LEO SHLICK, Boston, Mass. Original application filed Feb. 17, 1921, Serial No. 445,736. Divided and this application filed Feb. 1, 1927. Serial No. 165,251. 22 Claims. (Cl. 92—24.)

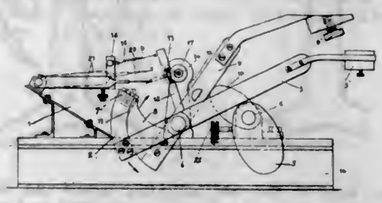


1. A beating engine comprising a beater, roll, bed-plate, back-fall, and means for separating part of the stock from that approaching the beater roll, and delivering it beyond the back-fall.

1,679,060. LOW-LEVEL SIGNAL. EDMUND B. SIBSON, Pasco, Wash. Filed Sept. 20, 1926. Serial No. 136,607. 4 Claims. (Cl. 22—70.)

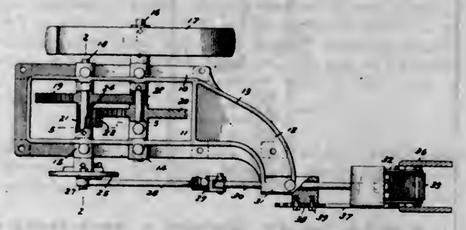
4. In combination with a metal pot and pump having a pump arm, a bell arm pivotally supported intermediate its ends and having a tapper on one end thereof, the opposite end being adapted to be brought into the path of said pump arm when the metal in the pot has been lowered to a predetermined level.

1,679,061. PLANT MARKER. TROY D. SMEDLEY, Waterloo, Iowa. Filed Aug. 12, 1927. Serial No. 212,474. 3 Claims. (Cl. 40—10.)



1. A device of the character described, comprising a stake diminished downwardly and having longitudinal edge flanges, and a flap hinged inclinedly to and between the upper parts of said flanges to swing vertically and wide enough to span and ride upon said flanges in an inclined position relative to the stake, said flap having card holding means on its under inclined face.

1,679,062. DISHWASHER. GEORGE SMITH, Mullen, Nebr., assignor to Alice B. Payne. Filed Mar. 23, 1927. Serial No. 177,738. 3 Claims. (Cl. 141—9.)

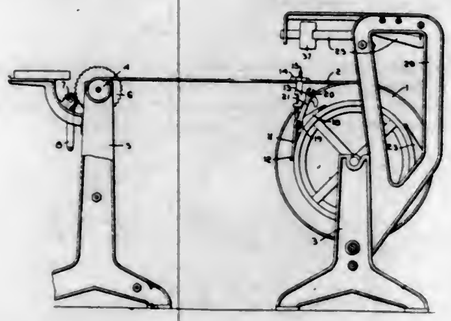


1. In a dish washer, the combination with a cabinet and a partition therein forming upper and lower compartments and depressed intermediate its longitudinal edges, of a supplemental partition secured to the before mentioned partition and having its medial portion raised to provide adjacent troughs, a slosh wheel for each of the troughs and means for imparting a reverse rotation to the slosh wheels.

1,679,063. MACHINE FOR SLOTTING THE HEADS OF SCREWS AND THE LIKE. EDWIN SPENGLER, Pontoise, France. Filed Sept. 8, 1925, Serial No. 55,091, and in France Sept. 12, 1924. 7 Claims. (Cl. 10—5.)

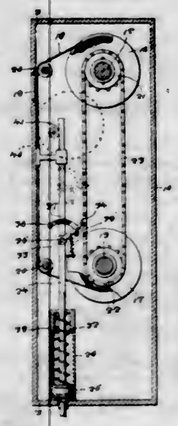
1. A machine for slotting the heads of screws comprising a charger, said charger containing in haphazard order a store of screws to be worked, a feeding arm reciprocable in a vertical plane, said arm being adapted to move in said charger among the mass of screws a conveying arm reciprocable in a vertical plane, said conveying arm being adapted to receive the screws in turn from said feeding arm, a movable member having a positioning orifice, a slot-cutting tool, said conveying arm being adapted to place the screws by their heads in said positioning orifice in order to bring them into contact with said tool.

1,679,064. SAMPLING APPARATUS. SAMUEL E. STEPHENSON, Atlanta, Ga. Filed Mar. 26, 1927. Serial No. 178,802. 4 Claims. (Cl. 73—21.)



1. In a machine of the character described, a bed having a lateral offset guide arm, a reciprocating plunger working in the arm, a bucket eccentrically pivoted with the outer end of the plunger for dumping action, means on the arm for controlling the period of dumping of said bucket, and means supported by the bed for intermittently moving the plunger.

1,679,065. FILLET DRUM AND STAND. HENRY J. STEVENSON, North Andover, Mass., assignor to Davis & Furber Machine Co., North Andover, Mass., a Corporation of Massachusetts. Filed Apr. 1, 1926. Serial No. 98,957. 4 Claims. (Cl. 265—24.)



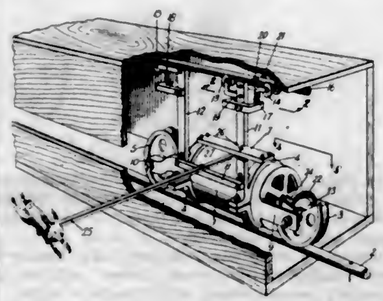
1. An apparatus for applying fillet material under tension to a roll comprising a support for the roll, means mounted upon the support adapted to rotate the roll, a fillet drum upon which is wound fillet material and from which it is unwound by the rotation of the roll, a friction drum rigid with the fillet drum, a friction band surrounding the friction drum, means for varying the

frictional pressure between the friction band and the friction drum, indicating means and a compression member adapted to transmit the force tending to rotate the

friction band to the said indicating means and thereby cause it to indicate the tension in the fillet material as it is wound on the roll.

1,679,066. STATION INDICATOR. FRANK STUMP and ARTHUR A. JOHNSTON, Morgantown, W. Va. Filed Apr. 2, 1926. Serial No. 99,360. 3 Claims. (Cl. 40—87.)

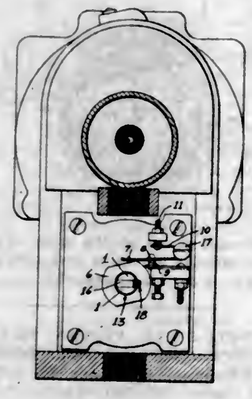
1. A station indicator comprising a casing having a sight opening therein, spaced rolls, an indicator strip having indicia thereon and adapted to be wound upon the rolls behind the sight opening, a chain and sprocket drive for the rolls, a longitudinally movable rod, normally disengaged pivotally mounted means carried by the rod and engageable with the sprocket chain when the rod is moved in one direction to drive said chain and rotate the rolls, means to actuate the rod, a stop located in the path of the chain engaging means to hold the latter disengaged from said chain when the rod is in normal position, a spring to move the chain engaging means into active position and means to limit pivotal movement of the chain engaging means when the latter is in active position.



1,679,067. ELECTRICAL CONNECTER. ALBENUS B. WISEMAN, Grand Rapids, Mich. Filed Sept. 12, 1925. Serial No. 56,011. 4 Claims. (Cl. 173—328.)

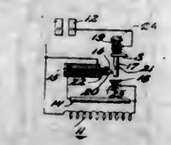
1. An electrical connecter comprising a socket, and a plug, the socket including a body of insulating material having a bore to receive the plug, said bore having open sided recesses in its wall, a plurality of contacts supported by the body and arranged within the recesses, a plurality of contacts upon the plug for engagement with the first mentioned contacts when the plug is inserted into the bore, and an insulator movable within the bore

and normally occupying a position for closing the open sides of the recesses for shielding the first mentioned contacts and displaceable by the plug upon its insertion into the bore, said plug and insulator having intimate sliding engagement with the wall of the bore.



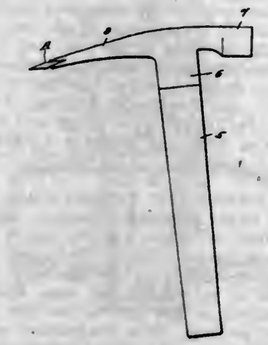
1,679,068. ELECTRIC CAR. JAMES B. ALLEN, Shidler, Okla., and ERNEST O. HAMILTON, Columbus, Ohio. Filed Jan. 15, 1927. Serial No. 161,450. 1 Claim. (Cl. 105—147.)

In animal racing apparatus, a lure conveyer constructed to travel on a single rail comprising a suitable frame and carrier wheels, a motor mounted on said frame and operatively connected to the carrier wheels by gearing, a rail for carrying the lure conveyer, a rigid electrically-energized overhead member, a spring-pressed means mounted on said conveyer that cooperates with said rigid overhead member to hold said lure conveyer on said track and provide a means for transmitting electric current from said overhead member to said motor, an outwardly extending arm carried by said conveyer and a lure mounted thereon.



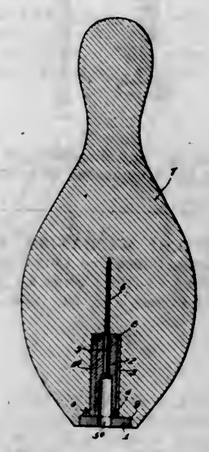
1,679,069. MAGNETO-ELECTRIC MACHINE. AVERY E. BROWN, Pittsfield, Mass., assignor to Berkshire Magneto Co., Pittsfield, Mass., a Corporation of Massachusetts. Filed Jan. 19, 1920. Serial No. 352,498. 7 Claims. (Cl. 200—30.)

1. In a machine of the class described a current interrupter-member, and an actuating member engageable with said current-interrupter member by metal-to-metal contact, one of said members being movable relatively to the other, to obtain current interrupting actuation of said current-interrupter member, one of said members being electrically insulated from other parts of the machine



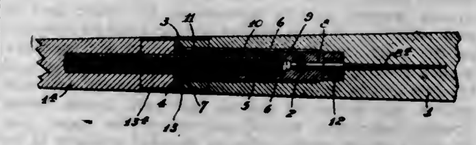
which are in electrical connection with the other of said members, and a connection between said other member and the ground.

1,679,070. THERMOSTATIC DEVICE. JOHN L. BROWN, Catonsville, Md. Filed July 14, 1925. Serial No. 43,587. 2 Claims. (Cl. 219—25.)



1. A device of the class described comprising an electric circuit including an element, solid in form which is substantially non-conductive at room temperatures and which is conductive at elevated temperatures, said element maintaining its solid form at all temperatures, a translating device and a source of electrical energy in said circuit, said translating device being constructed to respond to a flow of current corresponding to a predetermined elevated temperature of said element.

1,679,071. BRICK HAMMER. JAMES CAMPBELL, Montrose, Calif. Filed July 8, 1926. Serial No. 120,335. 1 Claim. (Cl. 306—42.)



In combination, a hammer provided with a blade, the end of the blade being provided with a V-shaped pocket, the V-shaped pocket bifurcating the end of the blade, the furcations being provided with V-shaped notches, and an auxiliary blade having a pair of wedge-shaped terminals and a wedge-shaped block extending laterally from one of the terminals, said one of the terminals being receivable in the pocket and the block being receivable in one of the notches the V-shaped formation of the pocket and the notches and the wedge shaped formation of the terminals and the block being the sole means for retaining the auxiliary blade in the end of the first mentioned blade.

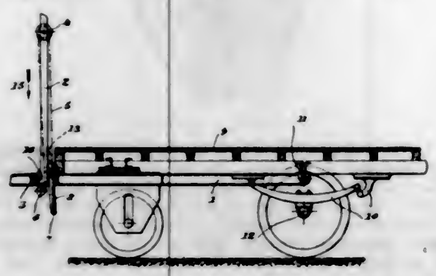
1,679,072. BOWLING PIN. JOHN R. CARMICHAEL, Dormont, Pa. Filed Aug. 16, 1927. Serial No. 213,251. 8 Claims. (Cl. 273—82.)

1. The combination with a bowling pin, of a shoe member disposed in the base thereof, comprising a circular shoe portion, a shank integral therewith, and provided with a central longitudinal bore adapted to receive a retaining screw, said member positively resisting relative rotary movement between itself and the pin, and adapted to prevent breakage and reduce wear of the base of said pin.

1,679,073. BILLIARD CUE. JOHN R. CARMICHAEL, Dormont, Pa. Fied Aug. 16, 1927. Serial No. 213,252. 4 Claims. (Cl. 273—68.)

1. A jointed billiard cue comprising two sections, a jointing screw permanently disposed in one section and a screw-receiving jointing member positioned in the other section, said member comprising a circular base, a shank integral therewith, and a threaded bore formed in said base and shank to engage the threads of said jointing screw, said member having a driven fit in said section to resist relative rotary movements therebetween.

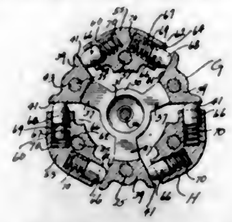
1,679,074. TEMPLATE FOR GUIDING ROUTERS. RAY L. CARTER, Phoenix, N. Y. Filed June 6, 1927. Serial No. 196,829. 8 Claims. (Cl. 145—129.)



1. A template for guiding a routing tool while cutting a recess in the edge of a door, comprising a frame having an opening for the play of the tool adapted to coincide.

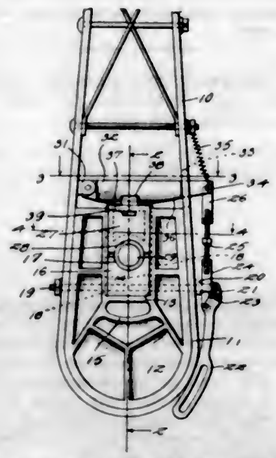
with the mouth of the lock mortise, means for clamping said frame to the door, adjustable means carried by said

frame for gauging the long dimension of the recess, and adjustable means for gauging the short dimension of the recess.



1,679,075. HOISTING MECHANISM FOR DUMPING TRUCKS. JOSEPH CODER and LOUIS CODER, St.-Marcelles-Marseille, France. Filed June 25, 1926, Serial No. 118,574, and in France Apr. 26, 1926. 1 Claim. (Cl. 298—19.)

In a hoisting mechanism for dumping trucks, the combination with an auxiliary chassis, of a main chassis hinged to said auxiliary chassis, means for swinging said main chassis on its hinges, said means comprising a winding drum pivotally mounted on said auxiliary chassis, upright members pivoted at the front end of the auxiliary chassis, grooved pulleys mounted at the upper part of said members, downwardly projecting brackets mounted on the main chassis in front of the upright members, flexible hoisting means connected to the lower part of said brackets and to said winding drum and passing over said pulleys, and means for guiding said main chassis during tipping, comprising rollers mounted on the upper part of said brackets, guiding flanges disposed laterally in regard to said rollers on the upright members, said rollers and flanges cooperating to guide the main chassis, until the rollers leave the upright members, whereupon the brackets come in contact with the grooved pulleys, to act as guides for the main chassis.



1,679,076. UNIVERSAL JOINT. EDWARD K. DEGENER, Huntington Park, Calif., assignor to Degener Cushion Universal Corporation, Los Angeles, Calif., a Corporation of California. Filed May 15, 1926. Serial No. 109,437. 5 Claims. (Cl. 64—96.)

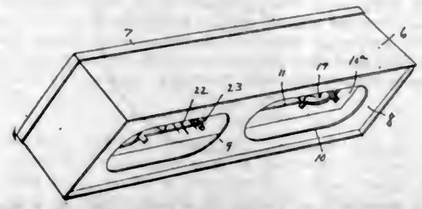
1. In a universal joint the combination of a pair of members, means pivotally connecting said members centrally with a ball and socket joint to permit but limited degree of movement with respect to each other, each of said members having spaced arms, with the arms of the members alternating with each other, the arms of one of said members having plane surfaces facing the arms of the

other member, and means on the arms of the last mentioned member slidably operating over said plane surfaces free of positive connection therewith.

1,679,077. WELL-DRILL PITMAN BEARING. WILLIAM H. FENNEMAN, Taft, Calif., assignor to Mary Katherine Fenneman. Filed Apr. 16, 1927. Serial No. 184,371. 1 Claim. (Cl. 287—93.)

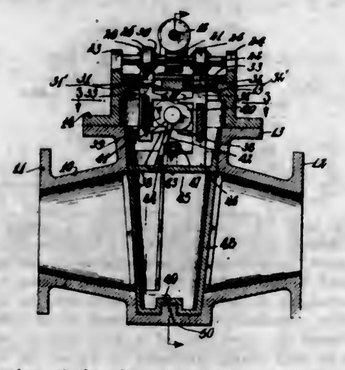
A pitman including a yoke, a block seated in the bight of the yoke and having an angular recess, a lower bearing block seated in the recess, a bolt disposed transversely through the yoke, the block and the bearing block, an upper bearing block disposed in the recess and having upwardly extending opposing L-shaped lugs on its upper end, the inner faces of the transverse portions of said lugs being inclined transversely of the lugs, a lever disposed through the arms of the yoke and having longitudinally extending tapered ribs engaged beneath the inclined portions of said L-shaped lugs, and means mounted on said bolts and operatively connected with the said lever for moving the latter to engage and disengage the movable bearing block with respect to a crank pin.

1,679,078. METHOD OF DRYING COAL AND LIKE FUELS. HANS FLEISSNER, Leoben, Austria. Filed Apr. 25, 1927, Serial No. 186,594, and in Austria May 14, 1926. 4 Claims. (Cl. 34—24.)



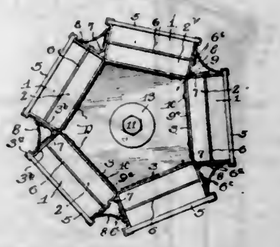
1. Method of drying coal and like fuels of a colloidal character so as to prevent the same from falling to pieces, consisting in first heating the fuel in saturated steam under pressure, to a temperature which is considerably higher than the drying temperature, and subsequently drying by reducing the partial pressure of the steam in order to prevent the fuel from falling to pieces and provide for a quick drying.

1,679,079. SIGN. FRANCIS P. GSTALDER, Cleveland, Ohio. Filed Mar. 8, 1927. Serial No. 172,452. 9 Claims. (Cl. 40—140.)



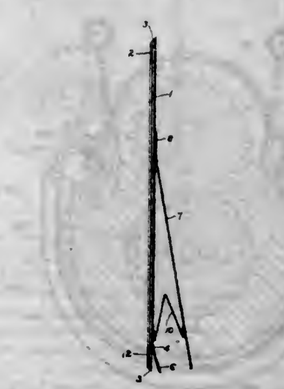
1. A holder for sign characters having a marginal flange at one edge thereof, comprising a rack provided at one edge with a base flange upon which the flange of the sign character rests, a locking bar pivotally connected at one end to one end of the rack for clamping of the sign character flange to the base flange of the rack, and means connecting the opposite end of the locking bar to the rack for preventing withdrawal of the sign character from the rack.

1,679,080. MILK-BOTTLE LOCK. DAYTON S. HALLOWAY, Albany, Oreg. Filed Aug. 23, 1927. Serial No. 214,868. 4 Claims. (Cl. 232—41.)



1. In a milk bottle lock and holder of the class described, a box having a bottom provided with elongated openings for passage of a milk bottle, a partition plate in said box disposed in spaced parallelism with said bottom and formed with key-hole shaped slots in vertical alinement with said openings to permit a milk bottle to be inserted through the openings and passed upwardly and into the enlarged end portions of the slots and then shifted longitudinally into the restricted portions of the slots whereby it is suspended, and a longitudinally shiftable retaining device on said partition plate cooperable with said slots, said device being provided with holes for passage of the bottle neck.

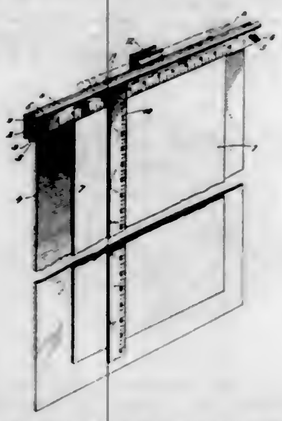
1,679,081. VALVE. HUGO HANEBERG, New York, N. Y. Filed May 4, 1927. Serial No. 188,637. 2 Claims. (Cl. 251—97.)



1. A valve of the class described comprising a valve body, a valve head rotatively and slidably mounted therein, a pair of key members slidably supported on the valve body, an extension projecting from one of the keys, the valve head being rotatably connected to the extension, upper and lower extended elements projecting from the said key members, cam elements engaging between the upper and lower extended elements, a stub shaft projecting from the cam elements, a finger projecting from the shaft, the valve head being formed with a face cam engageable by the finger, and means for sliding said key members so that the extension projecting from one of the key members raises or lowers the valve head and the upper and lower extended elements projecting from the key members move the engaged cams, the stub shaft, and the finger, so that the finger engages the face cam of the valve head and rotates the valve head in one direction or the other.

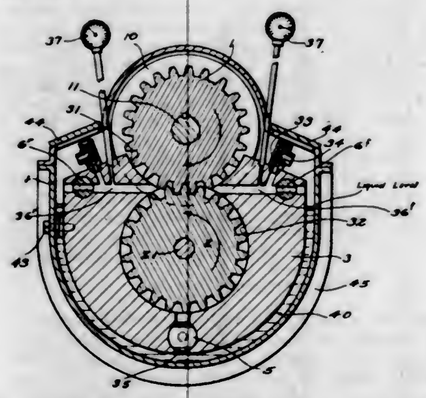
1,679,082. DISPLAY STAND. AUGIE L. HANSEN, Chicago, Ill., assignor to A. L. Hansen Manufacturing Company, Cook County, Ill., a Corporation of Illinois. Filed July 12, 1924. Serial No. 725,551. 4 Claims. (Cl. 312—42.)

1. A display stand comprising a plurality of upright package dispensing units arranged symmetrically about a vertical central axis in polygonal formation with their inner vertical edges in substantial abutting contact and forming outwardly opening V-shaped recesses therebetween, unit connecting members located in said V-shaped spaces and resilient panel strips adapted to be bowed transversely and inserted edgewise forward between the adjacent forward edges of said units.



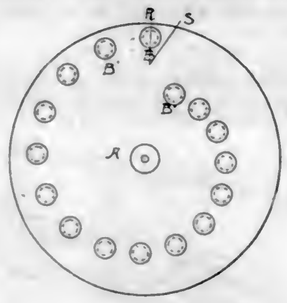
1,679,083. PICTURE HOLDER. WILLIAM J. HELMQUEST, San Francisco, Calif., assignor to California Card Manufacturing Company, San Francisco, Calif., a Corporation of California. Filed Apr. 6, 1925. Serial No. 20,889. 1 Claim. (Cl. 40—159.)

A picture holder comprising an open-faced front board or frame, a spacer strip secured on the rear face of the open-faced front board adjacent the edges thereof, a back



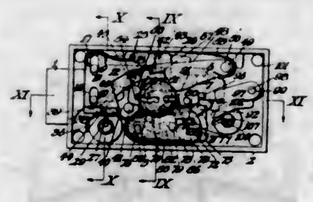
board secured around three marginal edges to said stripe, the configuration and dimensions of the back board being the same as the front board, the unsecured edge of the back board being creased in parallelism with the edge at a distance from the edge, said free edge being slitted inwardly short of the sides and the end portions secured to the stripe to form a closure flap at said free edge of the back board of a length slightly greater than the width of the opening in the front board whereby a picture may be inserted within the frame, the marginal edges of the assembled front board strip and back board being beveled.

1,679,084. PAD HOLDER AND RULER. REBECCA E. HOOPER, Half Moon Bay, Calif. Filed Oct. 3, 1927. Serial No. 223,586. 2 Claims. (Cl. 33—76.)



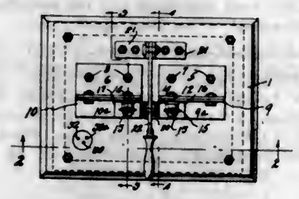
1. A device of the character described comprising an upper and a lower bar, clamping means cooperating therewith to retain and secure a pad between the bars, a slotted tubular shaped guide member on the upper bar and extending substantially from end to end thereof, and a T-square having a head member formed thereon which is slidable in the slotted guide to permit transverse movement of the T-square with relation to the pad.

1,679,085. HYDRAULIC RESISTANCE CONTROL APPARATUS. LUTHER J. HULL, Seattle, Wash. Filed Mar. 6, 1925. Serial No. 13,479. 10 Claims. (Cl. 188—92.)



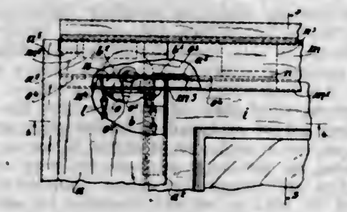
1. The combination with a fluid pump having an inlet and an outlet, and including gears continuously rotatable to build up pressure upon fluid passing through the pump, of valve means for controlling the fluid discharged from said pump to resist rotation of said gears, other valve means operable to admit fluid while said first valve means controls the discharge of fluid and to prevent admission of fluid while said first valve means is in open position, additional valve means for controlling the fluid discharged from said pump when operating in a reverse direction, thereby to resist rotation of said gears, and means connecting the three control valves for simultaneous actuation, said actuating means being movable in the same direction for control of the valves to effect braking in either forward or reverse directions.

1,679,086. SPIRAL-MOUNTED LENS DISK. CHARLES FRANCIS JENKINS, Washington, D. C. Filed Jan. 2, 1925. Serial No. 222. 2 Claims. (Cl. 178—6.)



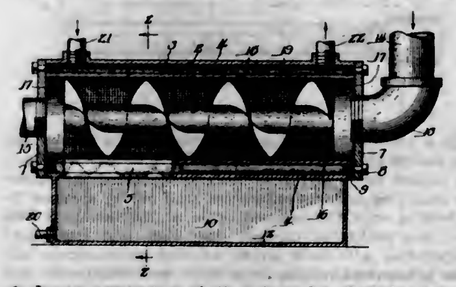
1. In combination, a stationary picture surface, a stationary light translating element, a rotatable disk interposed between said surface and said element, said disk being provided with a plurality of apertures of large dimensions as compared with an elementary area of the picture surface, and a spherical lens mounted in each aperture for imaging the picture surface and the light translating element each upon the other, said apertures and lenses being so arranged that upon rotation of the disk the lenses pass successively between said surface and said element, and successive images of the light translating element traverse the picture surface by adjacent parallel paths.

1,679,087. CHANGEABLE-COMBINATION KEY LOCK. FRANK W. JOHNSON, Philadelphia, Pa. Filed Nov. 8, 1926. Serial No. 146,948. 28 Claims. (Cl. 70—70.)



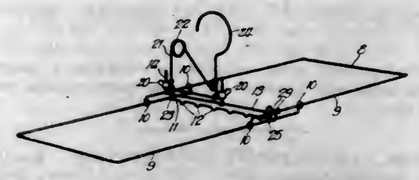
1. In a lock, the combination with a casing; of a movable locking bolt in said casing; a series of reciprocatory fences, in said casing, arranged to be set in different relative positions by key controlled means; setting means arranged to retain said fences set for a given combination, constructed and arranged to be immovable until released by operation of a key; and a series of tumblers in said casing arranged to be set in different relative positions by key controlled means; whereby said bolt is held against movement except when said tumblers are set to cooperate with said fences.

1,679,088. ELECTRIC BRAZING MACHINE. ALBERT T. KOEHLER, Pontiac, Mich. Filed June 10, 1927. Serial No. 197,801. 3 Claims. (Cl. 219—12.)



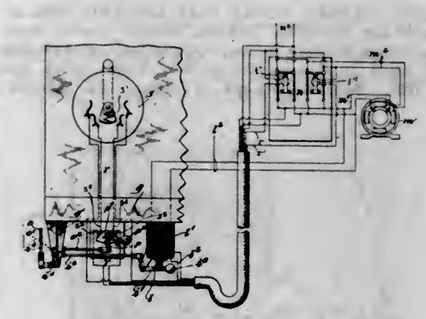
1. A device of the character described comprising a table having brackets thereon, said brackets being insulated from one another, a supporting flange on each of said brackets, said flanges being substantially in line with one another, clamping plates vertically movable over said flanges and supported by said brackets, a fixed block between the adjacent ends of said flanges having its upper surface substantially level with said flanges and insulated from them, a lever pivotally mounted on said table, and a pressure plate on said lever adapted to bear down on said fixed block, in combination with an electric circuit having a wire connected to each of said brackets so that said circuit is adapted to be closed by pieces of conducting material extending inwards from said supporting flanges and coming in contact with one another over said block.

1,679,089. METAL WINDOW. MICHAEL KOHUT, Elmhurst, N. Y., assignor to S. H. Pomeroy Company, Inc., New York, N. Y., a Corporation of New York. Filed Nov. 3, 1927. Serial No. 230,754. 9 Claims. (Cl. 189—75.)



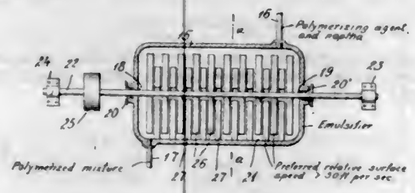
1. In a metal window the combination of a sheet metal jamb, a sheet metal frame head, means to secure together the jamb and the frame head, a horizontal heavy metal reinforcing plate fitted within the frame head at its end and extended across the jamb near its upper end and fitted into the same, and means to secure the jamb to said plate.

1,679,090. FLUID SEPARATOR AND HEATER. FERDINAND ERNST LAMMERT, Chicago, Ill. Filed Feb. 18, 1926. Serial No. 89,246. 3 Claims. (Cl. 157—233.)



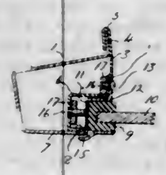
1. In an apparatus of the class described having a cylindrical horizontally arranged shell lined with a wire netting within which there is a spiral air deflector having a cylindrical core forming a spiral passageway for a fluid to be cooled, an aperture in the lower side of the said shell for the escape of a separated liquid, in combination with a jacket about the said cylinder in which there may be passed a medium adapted to absorb the heat.

1,679,091. GARMENT BAG AND HANGER. MICHAEL LUERY, Chicago, Ill. Filed Apr. 1, 1926. Serial No. 99,117. 4 Claims. (Cl. 312—6.)



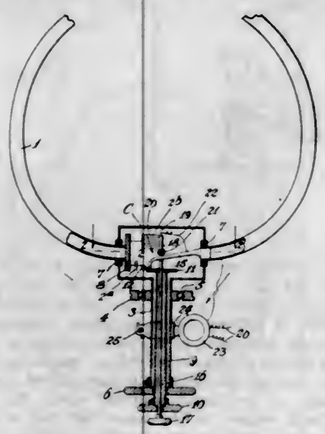
1. A suspension frame for flexible garment containers including a pair of slidably connected frame sections normally extended and capable of being telescoped to arrange them in superimposed relation, a transverse garment hanger hook engaging bar carried by one of the sections, a transverse notched bar for supporting a plurality of garment hangers connected to the other section, and a stop adapted to engage both of said transverse bars to prevent accidental longitudinal movement of the sections.

1,679,092. ELEVATOR. HAROLD V. MCCORMICK, Long Beach, N. Y., assignor, by mesne assignments, to Shur Loc Elevator Safety Corporation, Newark, N. J., a Corporation of New Jersey. Filed Jan. 29, 1927. Serial No. 164,415. 10 Claims. (Cl. 187—50.)



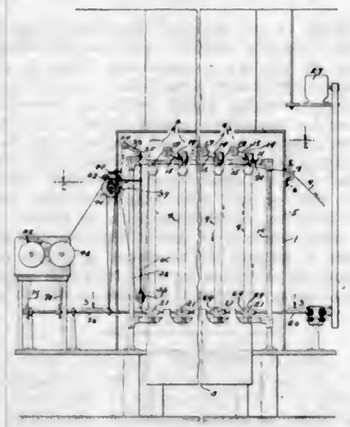
5. In an elevator having a shaft door, a car, a motor to operate the car, a car controller on the car and means to supply power to the motor under the control of the controller, a locking device normally preventing effective opening movement of the door, means to operate the locking device to release the door, means carried by the car for cooperation with said last named means to effect release of the locking device when the car is positioned with respect to the door, said last mentioned means being movable out of operative position, and devices interconnected with the motor controlling means to withdrawn said movable means from operative position when power is supplied to the motor.

1,679,093. POLYMERIZATION AND PURIFICATION OF HYDROCARBONS. STUART P. MILLER and JOSEPH BENNETT HILL, Philadelphia, Pa., assignors to The Barrett Company, a Corporation of New Jersey. Filed Aug. 5, 1926. Serial No. 127,226. 17 Claims. (Cl. 260—7.)



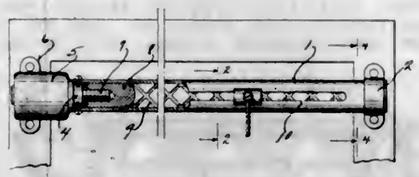
1. The process which comprises emulsifying a polymerizing agent and naphtha containing polymerizable constituents.

1,679,094. VEHICLE-BODY CONSTRUCTION. MARVIN W. MOESTA, Detroit, Mich., assignor to Murray Body Corporation, Detroit, Mich., a Corporation of Michigan. Filed Nov. 23, 1925. Serial No. 70,849. 6 Claims. (Cl. 296—28.)



1. In combination, a pillar having an outwardly opening, longitudinally extending channel-shaped portion with the base of the channel substantially parallel to the inner wall of the pillar, and a glass run holder upon the inner side of said pillar having a base substantially parallel to the base of said channel portion, and securing means for said holder including an element extending through said parallel bases.

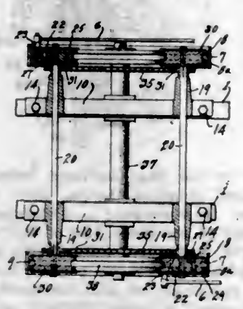
1,679,095. CLOSED TUNED COIL OR LOOP AERIAL. GREENLEAF WHITTIER PICKARD, Newton Center, Mass., assignor to Wireless Specialty Apparatus Company, Boston, Mass., a Corporation of New York. Filed June 30, 1921. Serial No. 481,498. 4 Claims. (Cl. 250—33.)



1. In a radio apparatus of the character described, a closed loop aerial having a condenser connectibly in series therewith, means for rotating said aerial, local operating apparatus, means extending along the axis of rotation of said aerial for adjusting said condenser, and a circuit inductively associated with the loop as a transformer secondary to the loop as a primary; the loop being insulated from the local apparatus and the secondary being electrically connected to the local apparatus.

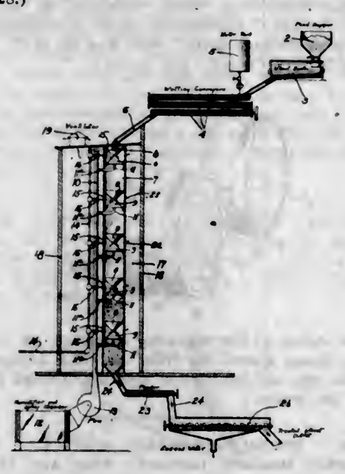
1,679,096. FILM-TREATING APPARATUS. GEORGES POURFILLET, Leonia, and EGISTO GIOVANNONI, Fort Lee, N. J., assignors to Universal Pictures Corporation, New York, N. Y., a Corporation of New York. Filed May 25, 1927. Serial No. 194,042. 15 Claims. (Cl. 34—48.)

1. Film treating apparatus including mechanism for imparting motion to the film, comprising a plurality of shafts arranged in pairs the shafts of each pair being disposed in superposed relation, idler rollers carried by one shaft of each pair, idler rollers and a driven roller carried by the other shaft of each pair, the film being trained over all of said rollers substantially helically from end to end of each pair of shafts, a take-up roller for receiving the film as it is discharged from the apparatus, and tension-controlling means intermediate said rollers and the wind-up reel and dependent for operation upon the length of film between the rollers adjacent the take-up roller and the take-up roller for controlling the operation of the take-up roller.



1,679,097. WINDSHIELD WIPER. CHARLES SCHULTZ, North Milwaukee, Wis. Filed July 14, 1927. Serial No. 205,623. 1 Claim. (Cl. 15—253.)

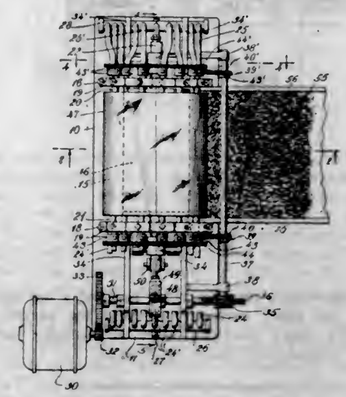
In a windshield wiper, the combination of a tubular casing having an elongated slot provided with bevelled edges, an endless screw fitting within and supported throughout its length by said casing, a cross head having portions interlocking with the bevelled edges of the casing at said slot and projecting through such slot, said cross head cooperating with said screw, whereby reciprocatory motion is imparted to said cross head upon rotation of said screw, said cross head being adapted to carry a cleaning element, an electric motor having a casing fitting within



and secured to one end of said first mentioned casing, said electric motor having a driving shaft directly operatively coupled to said screw, and a support for the other end of said first mentioned casing.

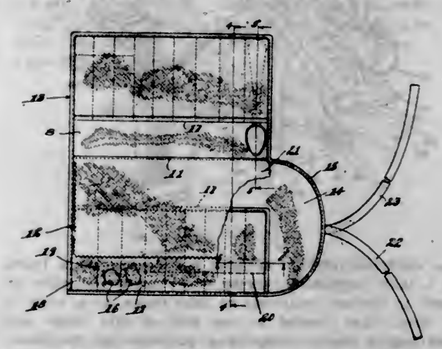
1,679,098. DIFFERENTIAL DRIVING ARRANGEMENT. AHMAD N. SHAHPAR, Highland Park, Mich. Filed July 1, 1927. Serial No. 202,785. 5 Claims. (Cl. 180—10.)

1. An arrangement of the character described comprising annular driving wheels having internal gears therein, cross shafts extending through both of said wheels, gears on each cross shaft meshing with said internal gears, a differential drive on each cross shaft so that the speed of rotation of the gears on the opposite ends of said shafts may vary, stub-shafts, an idler gear on each stub shaft meshing with one of said internal gears, means for imparting power to said idler gears so that both the gears and the idler gear cooperating with each internal gear all impart an equal amount of power thereto, an axle, carrying wheels on said axle, internal annular flanges in said driving wheels against which said carrying wheels are adapted to turn, and separate means for operating each differential drive.



1,679,099. METHOD OF AND APPARATUS FOR TREATING WHEAT. LOUIS E. SMITH, Minneapolis, Minn., assignor to International Milling Company, Minneapolis, Minn., a Corporation of Delaware. Filed May 28, 1925. Serial No. 33,475. 16 Claims. (Cl. 83—28.)

1. The method of treating wheat to increase the acidity and volume of soluble carbohydrates and decrease the starch and dry gluten content, which consists in subjecting the wheat berries while moving in a thin sheet and in a closed chamber to the action of independently regulated currents of moist air.



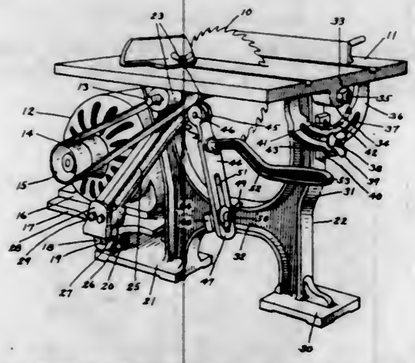
10. Apparatus for treating grain comprising an upright tank, a series of hopper cones, each having a discharge opening, and arranged at intervals in said tank and dividing the same into compartments, a perforated distributor arranged beneath each hopper cone and over which the grain passes in a thin sheet from said hopper, an air pipe arranged beneath each distributor, and means for forcing air through said pipe and through said distributor and into contact with the passing grain.

1,679,100. ROTARY FELTING MACHINE. FREDERICK C. STURGIS, Newark, N. J. Filed Sept. 15, 1927. Serial No. 219,653. 14 Claims. (Cl. 28—6.)

1. In a rotary felting machine, the combination of a cylinder, a plurality of pressure rolls engaging the surface of the cylinder, means for driving said rolls at the same speed, said cylinder being driven by friction by the rolls, and means for imparting a reciprocating axial movement to said cylinder.

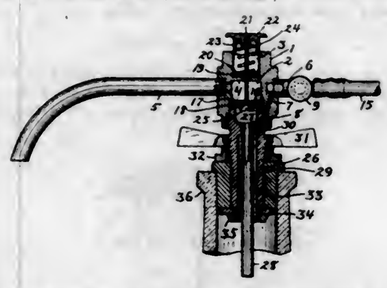
1,679,101. SILVERWARE CONTAINER. FELIX STERNTHAL, Chicago, Ill. Filed May 25, 1926. Serial No. 111,553. 1 Claim. (Cl. 150—52.)

A container for silverware comprising two pliable sheets consisting of a backing sheet and a wrapping sheet having the same outline and area and sewed together along their marginal edges and foldable along a folding line to provide right and left-hand sections; a holding sheet on each section having one marginal edge corresponding with and sewed to the marginal edge of the backing and wrapping sheets and extending over



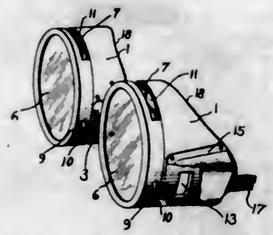
the wrapping sheet a given distance but terminating short of the folding line; intervally spaced lines of stitching connecting the wrapping sheet and holding sheets and defining a series of elongated spaces bounded by the walls of the wrapping sheet and holding sheets; a pliable covering attached to the wrapping sheet and placeable to provide a partition between the wrapping and holding sheets of the right and left-hand sections; extending portions extending from said backing and wrapping sheets at one end of one section and adapted to overlie the backing sheet when the sections are folded; and tie members extending from the extending portions for securing the sections in folded condition, substantially as described.

1,679,102. VENTILATED GARMENT. FULLER W. THOMPSON, Arcadia, Calif. Filed Sept. 7, 1926. Serial No. 133,776. 1 Claim. (Cl. 2—228.)



In knickerbocker trousers, a leg portion, a leg encircling band at the lower extremity of said leg portion; said leg portion being provided with an annular series of aertures immediately above said band.

1,679,103. ELECTRICALLY-DRIVEN CIRCULAR SAW. WILLIAM S. THOMSON, Plantsville, Conn., assignor to The Tobrin Tool Company, Plantsville, Conn., a Corporation. Filed Mar. 9, 1927. Serial No. 174,037. 1 Claim. (Cl. 143—35.)



An electrically-driven circular saw comprising a frame and a table supported thereby, a swinging structure arranged to operate relatively to said frame as a lever of the third class pivoted at one side of said frame and comprising a motor supporting platform at the lower pivoted end, a bearing for the saw shaft at the upper end to project the saw through the table at about the middle thereof, and a supporting adjusting arm pivoted to said lever intermediate said platform and shaft and adjustably engaging the frame, and a handle for manipulating said structure projecting from said arm to the other side of the table for manipulation from the operator's position.

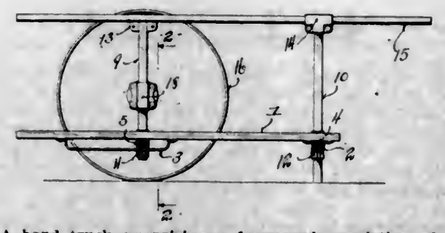
1,679,104. BEVERAGE PUMP. FRANK J. TRAUTMAN, Fort Wayne, Ind. Filed Aug. 19, 1927. Serial No. 214,029. 1 Claim. (Cl. 225—22.)

An appliance of the class described including a head having two alined chambers therein, there being a perforated partition therebetween; a perforated sustaining disc in said head at the lower end of the lowermost of said chambers; a perforated rubber valve seat beneath and bearing against said disc; a packing member in the bottom of the uppermost of said chambers including a rubber disc therefor; a valve disposed with its head bearing upwardly against said valve seat and with its stem extending upwardly through said seat, sustaining disc, partition, and packing member; a spring pressed push button secured on the top of the stem of said valve and having a sleeve extending into and closing said uppermost chamber; a discharge spout secured to said head and having communication with said lowermost chamber therein; a tubular post having a valve chamber in its top, the upper end of said post being secured in the lower end of said head and clamping said valve seat in place; a discharge pipe extending upwardly into said post with its upper end secured therein and having communication with the valve chamber therein, there being an annular space in said post surrounding said tube beneath the upper portion thereof; a valve controlled air supply means in connection with said head and having communication with said annular space in said post, there being a passage-way in said head and in said post affording communication therebetween; and a stopper fixture on said post for mounting the appliance upon a vessel.

1,679,105. GOGGLES. GEORGE L. TULLY and SOLOMON LACASSE, Southbridge, Mass., assignors to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed May 16, 1927. Serial No. 191,732. 6 Claims. (Cl. 2—14.)

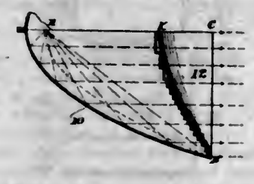
1. In a device of the character described, an eye cup, a pair of lenses spaced one from the other adjacent one end of the cup, and ventilation openings through the cup between the lenses.

1,679,106. SOUND-PRODUCING DEVICE. ALFRED WEINSTEIN, Hamburg, Germany. Filed Apr. 21, 1927. Serial No. 185,439. 5 Claims. (Cl. 84—379.)



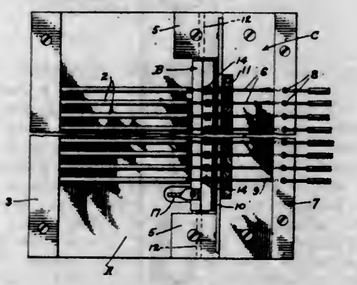
4. A card formed of a pair of sheets secured together along their edges, a sound producing device for producing a plurality of tones mounted between said sheets

along the edges thereof to receive air from the mouth of the user, one of said sheets having a plurality of spaced openings to permit the escape of air after passing



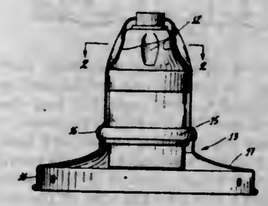
through the device, said openings having passageways communicating with different tone portions of the device whereby the tones may be controlled by obstruction of the openings.

1,679,107. HAND TRUCK. HENRY WOLDT, Brillion, Wis. Filed June 6, 1927. Serial No. 196,848. 1 Claim. (Cl. 280—53.)



A hand truck comprising a framework consisting of a bottom, a pair of upper bars, uprights adjustably joining said bottom and said upper bars, a pair of transverse bars positioned beneath said bottom and joining certain of said uprights, a pair of supporting wheels, axles for said wheels, said axles having brackets rigid therewith and slidably mounted upon certain of said uprights, means for adjustably clamping said brackets to their corresponding uprights, said bottom and said upper bars being adjustable forwardly or rearwardly with respect to the uprights which carry the said axles, whereby the relation of the load to the axis of the axles may be varied, as desired, said transverse bars being telescopic and each having a pair of sleeves and a rod carried by the sleeves, and means for adjustably locking said sleeves and said rods together.

1,679,108. CONDENSING REFLECTOR. WILLIAM G. WOOD, San Francisco, Calif., assignor to American Woodlite Corporation, San Francisco, Calif., a Corporation of California. Filed Nov. 3, 1925. Serial No. 66,450. 5 Claims. (Cl. 240—41.)

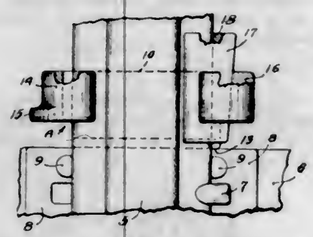


1. A secondary reflector for re-reflecting light rays, whose exterior surface is parabolic on all parallel horizontal planes, which surface intersected by a pencil of planes with axis coincident with the locus of the foci of said parallel horizontal parabolas form steps having corresponding points lying on a vertical parabolic arc.

1,679,109. SWITCHING DEVICE. WILLIAM D. WOOD, San Francisco, Calif. Filed May 31, 1927. Serial No. 195,257. 4 Claims. (Cl. 200—6.)

4. In a switch of the character described a base plate, a plurality of interspaced rods extending cross-wise of the base plate; means whereby opposite ends of the rods are secured; a secondary base plate disposed above the first named base plate; a plurality of interspaced flexible wire rods supported by said secondary base plate, said flexible wire rods being placed in alignment with the first named rods; means securing one end of the flexible wire rods with relation to the secondary base; means whereby the opposite ends of the flexible wire rods are guided; a rocker arm pivotally mounted between the first and last named wire rods and extending substantially from end to end of the base plate; means for imparting pivotal movement to said rocker arm, said rocker arm having a plurality of slots formed therein, one slot for each pair of aligned wire rods; a circuit closing bar reciprocally mounted in each slot and guided thereby, said circuit closing bars being in constant contact with the first named wire rods and being movable to and away from the flexible wire rods during pivotal movement of the rocker member; said circuit closing bars being rounded at their opposite ends so as to be guided with relation to the first and second named wire rods.

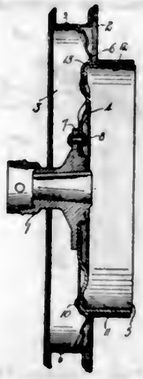
1,679,110. COMBINED ELECTRIC-LIGHT SOCKET AND COVER. GEORGE AINSWORTH, Great Neck, N. Y. Filed Mar. 6, 1925. Serial No. 13,435. 3 Claims. (Cl. 173—362.)



1. The combination with an electric light socket having a plurality of indentations at its upper end and a shoulder formed on said socket, of a cover therefor formed on said socket, said cover having indentations fitted to the indentations at the upper end of said socket, an annular corrugation adjacent the lower end of said cover which fits the shoulder on said socket, whereby said socket may snap into said corrugation when the socket is pushed up into the cover.

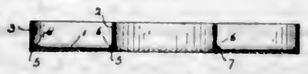
1,679,111. PNEUMATIC PUMP. CHARLES B. ALYEA, Downers Grove, Ill. Filed Nov. 26, 1924. Serial No. 752,414. 14 Claims. (Cl. 103—248.)

1. A pump comprising a casing having air inlet and outlet ports and water inlet and outlet openings, valves controlling the air inlet and outlet ports and water openings, a pair of pivotally mounted levers adapted to open and close the air valves, the said levers co-acting to form arches above and below the piotal mountings, connections between said levers and the air valves and means operated by the water whereby a pulling force is exerted on said levers when in arched position thereby opening and closing the air inlet and outlet ports.



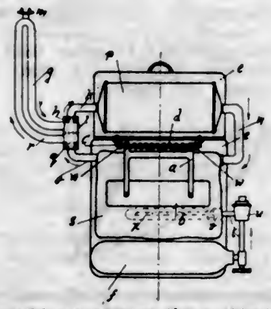
1,679,112. RAIL ANCHOR. CHARLES W. BALDRIDGE, Chicago, Ill. Filed Sept. 21, 1927. Serial No. 220,933. 2 Claims. (Cl. 238—324.)

2. A rail anchor comprising a member having a rail engaging portion, an arm at one end of said portion projecting first upwardly, then inwardly and then slightly downwardly, said arm being adapted to overlie the base of a rail and to bear against the top of said base, a second arm projecting first upwardly and then diagonally upwardly and inwardly, a wedge adapted to be inserted between said last mentioned arm and the side of the rail to clamp the rail against the downwardly projecting portion of said first mentioned arm under resilient tension and a tie bearing surface below said engaging portion and forwardly offset therefrom.



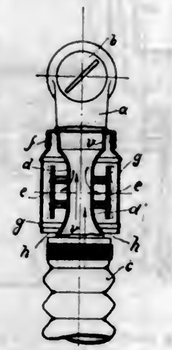
1,679,113. VEHICLE WHEEL. WILLIAM N. BOOTH, Detroit, Mich. Filed May 11, 1925. Serial No. 29,609. 4 Claims. (Cl. 301—63.)

2. In a disk wheel, the combination with a brake drum having a brake flange for engagement by a brake element and a web, of a web member mounted upon said brake drum and forming with the web thereof the wheel web,



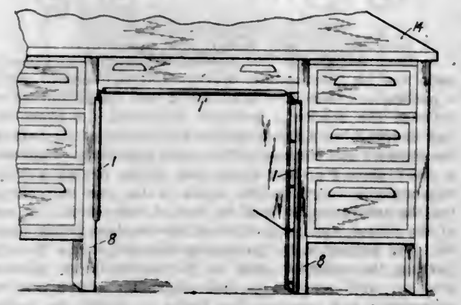
one of said wheel web members having an aperture therein for the passage of an instrument therethrough and between the brake flange and brake element.

1,679,114. VULCANIZING PAN. JACK CHURCHWARD, New Haven, Conn. Filed Sept. 22, 1925. Serial No. 57,845. 1 Claim. (Cl. 18—2.)



In construction for vulcanizing pans for rubber-covered wire or the like, in combination, a circular outer side wall of sheet metal, a circular inner side wall of sheet metal, an annular sheet metal bottom member extending between said side walls, the bottom edge portions of said side walls projecting below the level of said bottom member, the edges of said bottom member being secured to said side walls by welding on the bottom of the pan in the angle between the under surface of said bottom member and the inner sides of said downwardly projecting portions of the side walls and by welding also on the inner side of the pan in the angle between the upper surface of said bottom member and the inner surfaces of said side walls, said outer welding providing downwardly projecting ridges adapted to support the pan and hold said bottom member away from a surface upon which the pan rests, said inner welding providing smooth fillets on the interior of the pan bottom.

1,679,115. SPRING CLAMP FOR BREATHING BAGS. ALEXANDER BERNHARD DRÄGER, Lubeck, Germany; Elfriede Dräger, née Stange, executrix of said Alexander Bernhard Dräger, deceased. Filed Oct. 2, 1924, Serial No. 741,237, and in Germany Nov. 9, 1923. 2 Claims. (Cl. 128—191.)



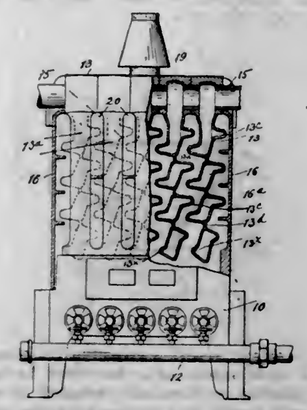
1. In a breathing apparatus, the combination of a supporting frame, a breathing bag mounted thereon, and a clamping device pivotally suspended from said frame independently of said bag and having free ends adapted to exert a resilient compression on opposite faces of said bag.

1,679,116. BREATHING TUBE FOR SELF-RESCUE APPARATUS. ALEXANDER BERNHARD DRÄGER, Lubeck, Germany; Elfriede Dräger, née Stange, executrix of said Alexander Bernhard Dräger, deceased. Filed Oct. 29, 1925, Serial No. 65,692, and in Germany Nov. 6, 1924. 3 Claims. (Cl. 128—140.)

1. In a breathing apparatus, a breathing valve comprising an open ended tubular casing contracted at its intermediate portion and provided with a valve opening in its wall at said contracted portion, one end of said casing being adapted for connection with a breathing tube, and a protective sleeve enclosing said valve and valve opening and having its one end in screwthreaded connection with said casing and its other end defining an annular outlet between itself and said casing, the inner diameter of said sleeve being greater than the outer diameter of said breathing tube whereby said sleeve may be disconnected from said casing and slidably shifted lengthwise of said tube to expose said valve and valve opening.

1,679,117. FURNITURE FENDER. CLAYTON D. DYE, Denver, Colo. Filed Feb. 26, 1927. Serial No. 171,218. 3 Claims. (Cl. 45—137.)

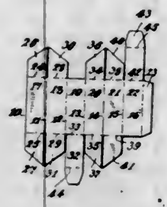
1. A furniture fender adapted to cover an edge formed by two faces on an article of furniture and composed of a strip of sheet material, the two longitudinal edges of which are adapted to contact with the two faces, the fender formed to have a second contact with one of said faces parallel to and spaced from its longitudinal edge and having a series of mounting screw holes therebetween, and formed to an arc extending from said second contact clearing the furniture edge and terminating in the other longitudinal edge of the fender.



1,679,118. MARL-DIGGING MACHINE. ALBERT J. ELKINS, Coral, Mich. Filed July 26, 1926. Serial No. 125,049. 7 Claims. (Cl. 37—117.)

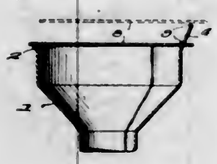
6. In combination, spaced apart posts one higher than the other, a trolley cable fastened at one end to the lower post, a pulley attached to the upper end of the higher post over which the trolley cable passes, an anchor post around which the end of the trolley cable is adjustably fastened, a digging device including a frame and a digging scoop pivotally mounted at one end on said frame, said digging device being mounted on said trolley cable, means for moving the digging device in opposite directions on said trolley cable, latching means on said digging device automatically connecting with the scoop to hold it parallel to the frame on movement of said digging device toward the shorter post, a trip block on the trolley cable near said higher post, means connected with the latching means adapted to engage said trip block and move the latching means from engagement with the scoop for dumping its contents when the digging device is moved towards said higher post, a depth gauge pivotally mounted on the same in front of the front end of the scoop, said depth gauge moving towards the front end of the scoop when the digging device is drawn towards the higher post, said depth gauge extending transversely across the front end of the scoop so as to ride on the upper surface of the material to be dug, and means for limiting the movement of said depth gauge towards the front end of the scoop.

1,679,119. [WITHDRAWN.]



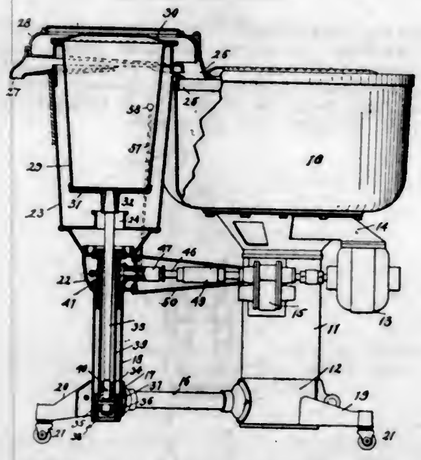
1,679,120. WATER HEATER. OTTO FOX, Lakewood, Ohio, assignor to The Bryant Heater and Manufacturing Company, Cleveland, Ohio, a Corporation of Ohio. Filed Mar. 28, 1925. Serial No. 18,967. 7 Claims. (Cl. 122—210.)

1. A boiler or water heater composed of a series of sections arranged side by side, each section having front and rear conduit portions and spaced transverse ducts



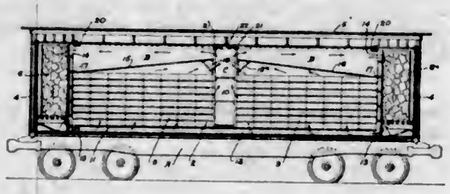
communicating at their ends with the conduit portions, the walls of the ducts between their ends being joined one to another and the ducts having on opposite sides of a vertical section lengitudinally disposed lateral extensions, those on one side being formed on the upper portions of the ducts and those on the other side being formed on the lower portions of the ducts, the ducts of the adjacent sections being spaced to provide passageways for heated gases.

1,679,121. BOX. WILLIAM M. FREEDMAN, Brooklyn, N. Y., assignor to Sell-Best Novelty Candy Co. Inc., Brooklyn, N. Y., a Corporation of New York. Filed Aug. 28, 1925. Serial No. 53,012. 2 Claims. (Cl. 229—38.)



1. A box for candy and the like, comprising oppositely disposed pairs of side walls, oppositely placed side walls intermediate of the said pairs of side walls, end flaps extending from the end of each pair of side walls, the said flaps being tapered from one side to the other forming a point at the extremity of the long side thereof with the long side of each of the said flaps substantially equal to the distance between oppositely disposed side members of the box so that when folded to place the points of the flaps first folded to position fit into corners between adjacent side members to shape the box and form an end wall for the box, an extension from one of the said intermediate walls adapted to overlie the said flaps to retain the same in place, and a flap at the extremity of the said extension adapted to be tucked within the oppositely disposed intermediate wall to secure the said extension in position.

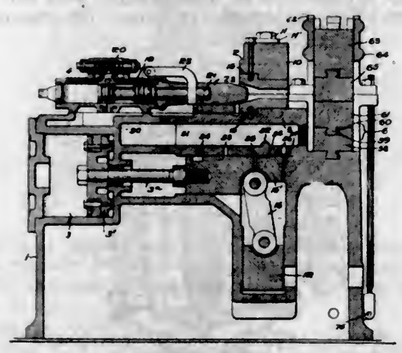
1,679,122. MILK STRAINER. HORACE S. FRIES, Madison, Wis. Filed May 14, 1926. Serial No. 109,151. 2 Claims. (Cl. 220—31.)



1. The combination with a utensil of the class described having an open mouth, of a flat cover having smooth straight unbroken surfaces only adapted to engage the edges of said mouth in a horizontal plane only, and a straight piece having plane surfaces only projecting from one of the walls of said utensil and engaging and extending through a straight edged opening in said cover to prevent lateral displacement thereof in any direction.

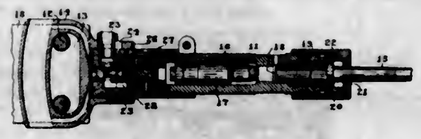
1,679,123. WASHING MACHINE. LEE B. GREEN, Lakewood, Ohio, assignor to The Borden Company, Warren, Ohio, a Corporation of Ohio. Filed Oct. 8, 1927. Serial No. 224,785. 5 Claims. (Cl. 210—71.)

1. In a washing machine, a centrifugal drier comprising a clothes basket, an upstanding wand upon the upper end of which said basket is supported, a sleeve surrounding and spaced from said wand and attached thereto at their lower ends, and means for rotating said sleeve.



1,679,124. AIR-CIRCULATING DEVICE FOR REFRIGERATOR CARS. FRED E. GREENE, Berkeley, Calif., assignor to A. B. Humphrey Company, Escalon, Calif., a Corporation of California. Filed Apr. 27, 1927. Serial No. 186,894. 2 Claims. (Cl. 62—19.)

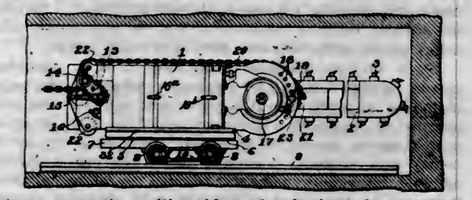
1. In a refrigerator car having ice bunkers at opposite ends and an intermediate storage compartment in which a perishable commodity is loaded in two stacks and braced between the stacks, a portable apparatus for promoting and maintaining a thermosiphon circulation of air through the bunkers and the commodity, said apparatus comprising a cover plate for each stack, said plates having a width substantially equal to the width of the car and having lengths substantially equal to that of each stack, the ends of the plates which are adjacent the bunkers being adapted to be supported by the commodity and means for supporting the opposite ends of the plates in an elevated position with relation to the commodity and means for supporting and securing the plates in under the ceiling of the car.



1,679,125. FORGING MACHINE. WADE H. WINEMAN, Chicago, Ill., assignor to Sullivan Machinery Company, Boston, Mass., a Corporation of Massachusetts. Filed Mar. 17, 1916. Serial No. 84,960. 133 Claims. (Cl. 76—5.)

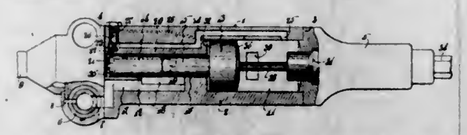
133. In a drill sharpening apparatus, the combination with relatively movable work clamping dies, of a motor for effecting relative movement therebetween, a fluid actuated dollying hammer for the work clamped by the dies, a valve chest common to the motor and hammer and provided with a motive fluid supply receiving port, an outlet supply port in communication with the dollying hammer and a second outlet supply port in communication with the motor, a rectilinearly reciprocatory valve device in the valve chest, said motive fluid supply port and one of said outlet supply ports lying to one side of the path of reciprocatory movement of the valve device and the other of said outlet supply ports lying to the

opposite side of the path of said valve device whereby said valve device is movable between certain of said ports, and said valve device being movable to a position in which it cuts off communication between the supply receiving port and the other two ports, and on movement in one direction from said position being operative to uncover successively to communication with the receiving port, the outlet supply port to the motor and the outlet supply port to the dollying hammer, and on movement in the opposite direction to interrupt the communication with said outlet supply ports in reverse order.



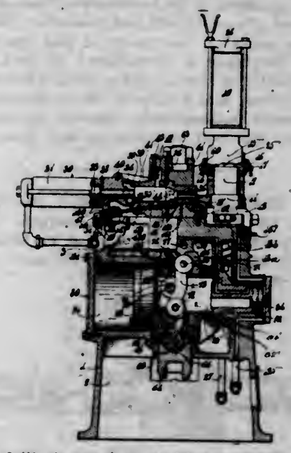
1,679,126. FORGING MACHINE. DANIEL J. O'ROURKE, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed July 9, 1917. Serial No. 179,535. 8 Claims. (Cl. 76—5.)

1. A bore opening mechanism for hollow drill steels comprising the combination of a support, an elongated bore opening pin mounted thereon, holding means permitting relative movement axially between said pin and support, a hammering device on said support comprising means for imparting a series of impacts directly on said pin, said holding means permitting said pin to remain lodged in the drill steel bore while permitting relative movement between said pin and support.



1,679,127. MINING MACHINE. CHARLES BRAND OFFICER, Winnetka, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Dec. 5, 1917. Serial No. 205,648. Renewed Oct. 10, 1925. 79 Claims. (Cl. 262—28.)

1. In a mining machine, a wheeled truck, cutting mechanism thereon including a cutter bar having cutting elements circulating in a vertical plane pivoted directly on a horizontal pivot at the front end of said truck, feeding mechanism operatively connected with said bar for swinging the same about its pivot, and truck driving mecha-

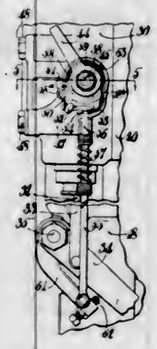


nism cooperating with said truck wheels and operatively connectable with said feeding mechanism for moving said truck in either direction.

1,679,128. FLUID-PRESSURE MOTOR. ELMER G. GARTIN, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Feb. 20, 1920. Serial No. 360,137. 26 Claims. (Cl. 121—18.)

1. A fluid pressure percussive motor comprising a cylinder, a piston reciprocable therein having a reduced shank, and fluid distribution means including ports and passages for supplying motive fluid to the ends of said cylinder to act on both sides of the piston for effecting reciprocation of said piston one of said passages having only a single mouth or supply port alternately opened and closed by said shank and operative to conduct motive fluid to one side of said piston to effect a rearward stroke of the latter, and means normally tending to open by pressure and held closed by the motive fluid at the other side of said piston to maintain said passage closed during a substantial portion of the forward piston stroke.

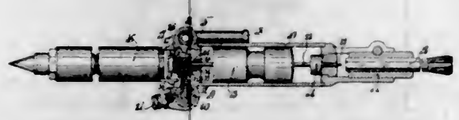
1,679,129. FORGING MACHINE. FRANK A. HALLECK, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed July 30, 1920. Serial No. 400,121. 47 Claims. (Cl. 76—5.)



1. In a drill sharpening machine, a stationary jaw, a movable jaw, said jaws constituting a vise, and cooperating gaging dies mounted on said jaws and operated upon relative movement therebetween.

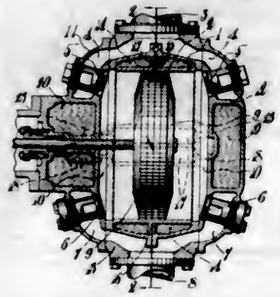
18. A forging machine having clamping means, relatively movable cooperating piston and cylinder elements

for producing movement of the same to clamping position and return movement to separated position, and means for limiting movement thereof including a further piston and cylinder adapted to act as a dashpot, said latter piston being movable with said other piston.



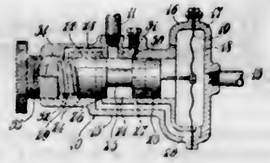
20. A forging machine comprising a base, clamping means carried thereby and means for actuating the same including relatively movable piston and cylinder elements adapted to remain in a predetermined fixed position when said clamping means is operative, and means for lubricating said elements including means having relatively movable oil supply passages adapted to allow oil flow from one to the other only while said elements occupy said predetermined position.

1,679,130. PERCUSSIVE TOOL. HENRY H. MERCER, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed June 13, 1921. Serial No. 477,040. 20 Claims. (Cl. 121—16.)



1. The combination with a percussive mechanism including relatively reciprocable cylinder and piston elements, a tool actuated thereby, and fluid distribution means for the normal operation of said elements, of means controlled by an element of said distribution means for automatically checking an abnormal movement of said piston when a decreasing resistance is encountered by said tool, said element of said distribution means being adapted to effect a striking action, said automatic checking means including an element automatically released by said striking element upon abnormal movement of said piston.

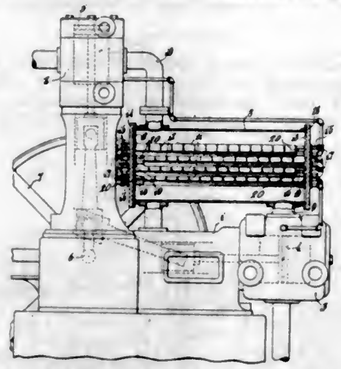
1,679,131. CLEANSING MEANS FOR ROCK DRILLS. JAMES G. GRAHAM, Butte, Mont., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed July 25, 1921. Serial No. 487,442. 13 Claims. (Cl. 121—8.)



1. In a drilling mechanism, the combination with means for detachably holding a hollow drill steel and means for operating upon said steel, of a longitudinally disposed tube normally adapted to be telescopically received freely into the bore of said steel for supplying cleansing fluid to the latter, a head block, and a gland carried by said head block and in which the rear end of said tube is supported for longitudinal movement in the event of endwise engagement of the tube by a steel.

1,679,132. VACUUM PUMP. FRED D. HOLDSWORTH, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Oct. 19, 1921. Serial No. 508,858. 13 Claims. (Cl. 230—188.)

1. In a pump, a cylinder, a piston therein, a plural chambered jacket surrounding said cylinder, coaxial chambers in the heads of said cylinder, and means for establishing a flow of cooling medium through said jacket and chambers including connections between one part of said jacket and said chambers and from said chambers to the other part of said jacket, and a branch passage leading from said chambers into one of the parts of said jacket.

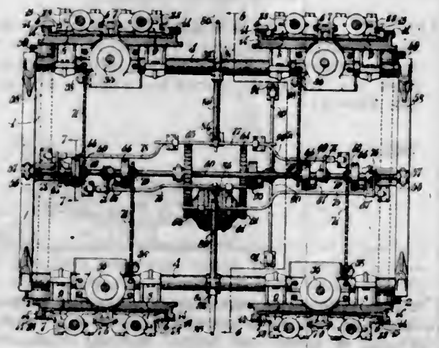


1,679,133. COMPRESSOR-CONTROLLING MECHANISM. LOUIS A. MAXSON, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Jan. 6, 1922. Serial No. 527,514. 28 Claims. (Cl. 137—153.)

1. In a compressor controlling mechanism, a member movable in opposite directions respectively to effect loading and unloading of a compressor, compressor discharge pressure controlled means for moving it in one direction, and means adapted to be supplied with pressure fluid for accelerating a portion of one of its movements, said supply being cut off during the whole of the other movement.

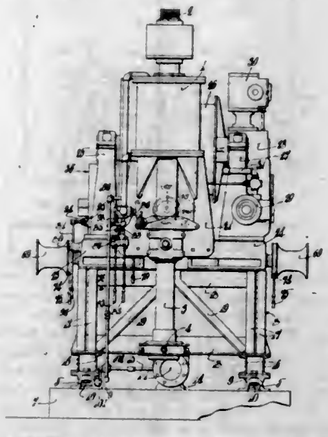
1,679,134. HEAT-EXCHANGE DEVICE. SVEN THEODOR NELSON, Oak Park, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed June 27, 1922. Serial No. 571,158. 9 Claims. (Cl. 257—240.)

1. An intercooler comprising a casing and a plurality of removable flat rectangular cooling fluid containing members arranged in parallel relation and connected in series, said members dividing the interior of said casing into a plurality of parallel spaces, successive spaces being con-



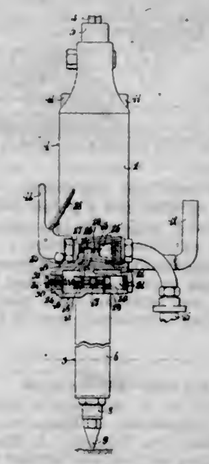
nected at opposite ends, and means including detachable end supports for said cooling members for permitting the removal of said members longitudinally from said casing.

1,679,135. CUTTER CHAIN. MORRIS P. HOLMES, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Dec. 15, 1922. Serial No. 607,257. 8 Claims. (Cl. 262—33.)



1. A cutter link having a bit receiving passage and bit securing means adapted to act upon a bit including a bit pivot engaging one edge of the bit, a cooperating bit abutment engaging the opposite edge thereof, and a bit holding means on the opposite side of said pivot from said abutment engaging the same edge engaging said abutment and spaced from said pivot by a greater distance than the distance between said pivot and abutment, said pivot comprising a rounded surface, said abutment a flat surface, and said holding means a set screw.

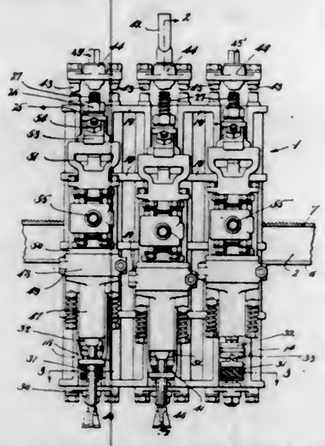
1,679,136. CHANNELER MECHANISM. HENRY H. MERCER, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Feb. 7, 1923. Serial No. 617,582. 12 Claims. (Cl. 262—18.)



1. In a channeling mechanism, a truck, a plurality of channeling mechanisms thereon, a arranged one at each corner of said truck, a single motor disposed substantially centrally of said truck, and connections with said motor for feeding said truck and for causing feed of any of said channeling mechanisms toward the work while said channeling mechanisms are operative.

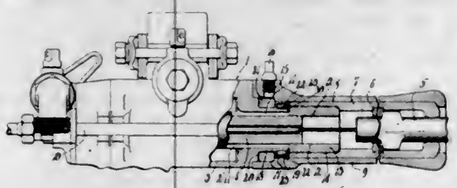
1,679,137. DRILLING APPARATUS. FRANK A. HALLECK, Chicago, Ill., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Feb. 19, 1923. Serial No. 619,835. 76 Claims. (Cl. 255—22.)

1. In a drilling apparatus, a supporting base having a substantially horizontal guideway, a frame slidably guided on said base, hole drilling mechanism carried on said frame and including drill rod rotating mechanism and power operated feeding mechanism for axially feeding the drill rod, and means actuated from the same power source as said feeding mechanism for adjusting said frame and drilling mechanism bodily laterally relative to the guideway on said base and transversely relative to the drill hole.



1,679,138. FEEDING MECHANISM. CHARLES F. OSGOOD, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed May 24, 1923. Serial No. 641,094. 14 Claims. (Cl. 121—9.)

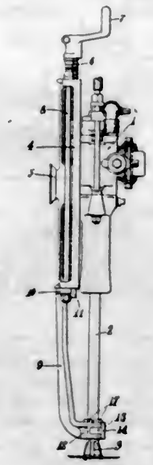
1. In a drilling apparatus, the combination with a drilling motor, pressure fluid actuated feeding means therefor, and means for supplying pressure fluid to the



latter, of pressure fluid controlled means controlled by pressure variations in said feeding means for automatically arresting an abnormal rate of feeding movement when the resistance on said feeding means is decreased.

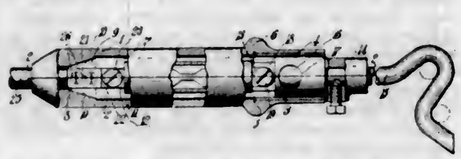
1,679,139. DRILLING MECHANISM. ELMER G. GARTIN, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Mar. 24, 1924. Serial No. 701,368. 6 Claims. (Cl. 255—45.)

1. A rock drilling mechanism comprising a plurality of unitary percussive tools adapted to use drill steels of different length, and means for positively feeding said tools toward the work including means operative to adjust the relative position of the tools whereby the same may drill holes of uniform depth and including feeding means having an operating element common to all of said tools.



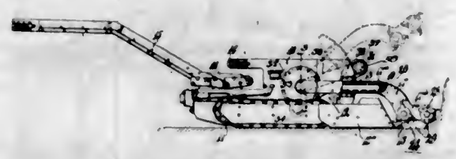
1,679,140. DRILLING MECHANISM. JAMES G. GRAHAM, Butte, Mont., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed May 7, 1924. Serial No. 711,530. 11 Claims. (Cl. 121—13.)

1. In a rock drill, the combination with an impact motor having a cylinder, and a piston reciprocable therein having a forwardly projecting extension, of lubricating means for said extension comprising a lubricant reservoir formed in said cylinder at the forward end thereof, a passage formed in said cylinder and connecting said reservoir with said extension, and means comprising a valve for providing intermittent flow of lubricant through said passage.



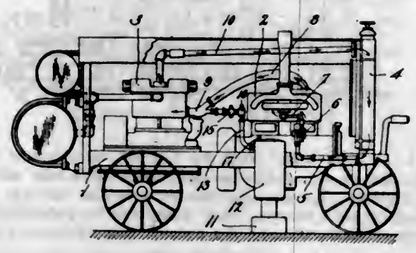
1,679,141. DRILLING MECHANISM. ELMER G. GARTIN, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Oct. 27, 1924. Serial No. 746,243. 6 Claims. (Cl. 255—51.)

1. In a drilling mechanism, the combination with a support on which the drill is longitudinally movable, said support including side rods to hold the parts thereof in operative assembled relation, and a drill steel carried by the drill, of guiding means for the drill steel including an elongated supporting arm secured to the



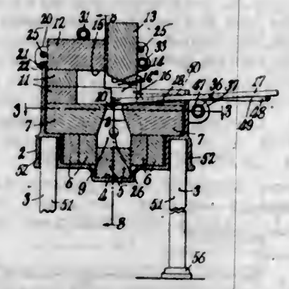
forward end of said support by said side rods out of the path of movement of the drill whereby the forward end of the latter may be moved a substantial distance in advance of said support.

1,679,142. ELECTRICAL APPARATUS. CHARLES W. WYMAN, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Dec. 29, 1924. Serial No. 758,755. 9 Claims. (Cl. 200—115.5.)



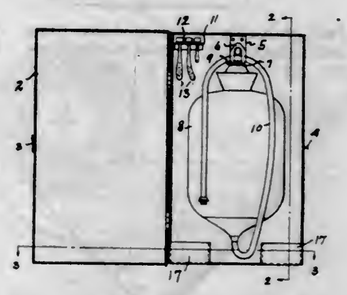
1. A combined trolley clip handle and fuse container having a fuse chamber therein provided with an opening leading therefrom, and substantially flat diverging walls extending in the same general transverse direction connecting the walls of said opening and chamber.

1,679,143. LOADING MECHANISM. WADE H. WINEMAN, Michigan, City, Ind., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Jan. 23, 1926. Serial No. 83,367. 11 Claims. (Cl. 198—9.)



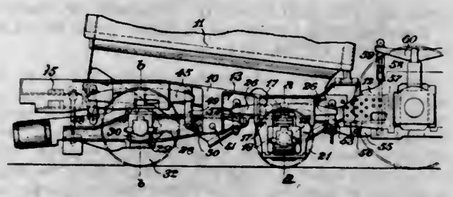
1. The combination with loading mechanism comprising a body and a conveyor thereon having a material receiving end, of means for feeding material towards said end comprising a plurality of cooperating rotary material engaging devices movable about separate axes disposed transversely of the receiving end, said devices being connected to the body by means providing for vertical movement thereof, one of said devices receiving material brought back by the other device and moving the material onto the receiving end of said conveyor.

1,679,144. COOLING SYSTEM. FRED D. HOLDSWORTH, Claremont, N. H., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Aug. 20, 1926. Serial No. 130,526. 12 Claims. (Cl. 123—174.)



1. In a portable compressor outfit, the combination with a gasoline engine, an air compressor driven thereby, and a cooling system for said engine and compressor including a fluid connection extending between the same, of auxiliary heating means for the fluid in said system including means interposed in said fluid connection for introducing heat into said fluid from an auxiliary source.

1,679,145. FURNACE. WADE H. WINEMAN, Michigan City, Ind., assignor to Sullivan Machinery Company, a Corporation of Massachusetts. Filed Apr. 1, 1927. Serial No. 180,254. 13 Claims. (Cl. 263—9.)



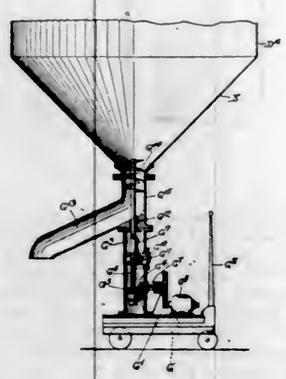
1. In a furnace, an elongated combustion chamber having a relatively restricted slotted top opening, an elongated heating chamber of uniform cross section directly above and substantially coextensive with said combustion chamber with which said restricted opening communicates, and a laterally located flue formed in one side of said heating chamber through which the articles to be heated are insertible and which constitutes the sole vent from the heating chamber.

1,679,146. DOUCHE CASE. GRADY S. APPLING, El Campo, Tex., assignor of one-half to Nadine Rivers Appling, Hollywood, Calif. Filed Sept. 23, 1925. Serial No. 58,061. 1 Claim. (Cl. 206—69.)

A douche case including a box like body, a cover hinged thereto, releasable interlocking means carried by the body and the free edge of the cover for securing the cover in closed position, a wide metal strap secured to the inside wall of the back of the body at its top whose free end is upturned forming a hook, the central part of the strap being formed with a tong whose lower end is free and upturned forming a hook, a rack secured to the wall of said body adjacent said strap said rack being provided with a plurality of deep notches, the central part of the top and bottom of the body being perforated and a receptacle on each side of the perforations of said bottom.

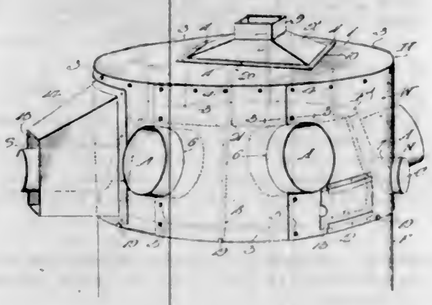
1,679,147. LOCOMOTIVE TRAILING TRUCK. GEORGE B. ASHWORTH, Amsterdam, N. Y. Filed Aug. 18, 1926. Serial No. 129,916. 17 Claims. (Cl. 105—174.)

1. In a locomotive, the combination of a main frame; a cradle secured thereto; a pair of idler wheels, mounted on an axle rotating in bearings in the cradle; means for permitting lateral movement of said idler wheels on curves; and a trailing truck connected to said cradle.



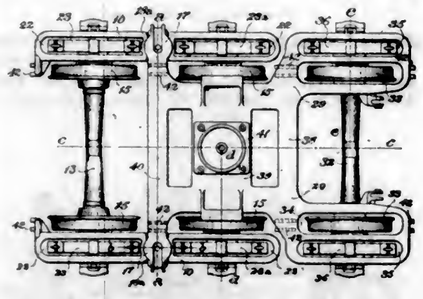
1,679,148. TROUSERS. BENJAMIN BASSKIN, St. Louis, Mo. Filed Mar. 12, 1925. Serial No. 14,879. 4 Claims. (Cl. 2—234.)

4. In the art of making trousers, the process comprising placing a piece of cloth and lining containing buttonholes against the outer face of the trousers cloth with the lining outside and with the edges of the piece and lining



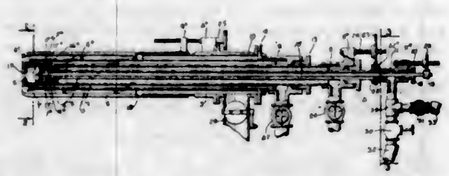
along the edge of the trousers opening, placing another piece of lining against the inner face of the trousers cloth and along the trousers opening, stitching along the alined edges of the pieces of cloth and lining and trousers, turning the attached piece and its lining along the seam against the other lining piece and securing the same.

1,679,149. PROCESS OF HYDRATING LIME. CHRISTIAN P. BERG, Chicago, Ill. Filed Feb. 8, 1926. Serial No. 86,700. 11 Claims. (Cl. 23—188.)



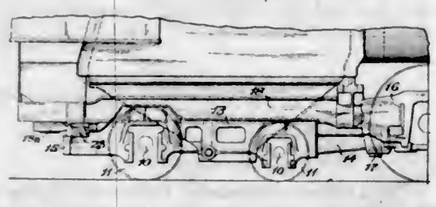
2. The method of hydrating lime which includes mixing lime and water, holding the mixture so formed in a curing zone, draining from the mixture a substantial proportion of the water therein contained and passing through the mixture additional volumes of water, and taking off the putty so cured.

1,679,150. FURNACE HOOD. NICHOLAS W. BETZOLD, Brainerd, Minn. Filed Apr. 6, 1925. Serial No. 21,148. 3 Claims. (Cl. 126—114.)



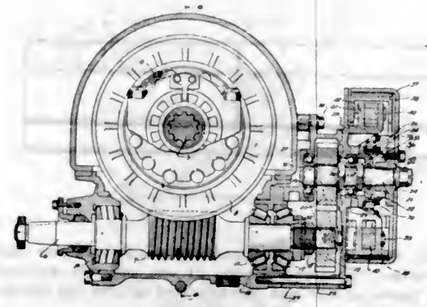
1. A furnace hood adapted to extend over and to surround the upper end portion of a furnace, said hood having a hot air outlet and a cool air inlet, and a plurality of hangers within said hood for supporting the same, each hanger being connected at its lower end to the hood, and having a hook portion to rest on the upper end of the furnace and having a portion projecting upwardly from said hook portion into contact with the top of the hood to prevent sagging of the latter.

1,679,151. TRUCK FOR RAILROAD VEHICLES. JAMES G. BLUNT, Schenectady, N. Y. Filed Feb. 15, 1927. Serial No. 168,286. 12 Claims. (Cl. 105—195.)



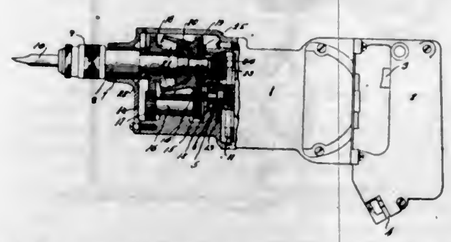
1. In a six wheel truck for railroad vehicles, the combination of a two axle section; and a one axle section, articulated thereto, the two axle section having independent side frames, each formed with pedestals and pockets for housing spring equalizing mechanism.

1,679,152. HYDROCARBON BURNER. GEORGE W. BOWEN, San Diego, Calif. Filed Aug. 11, 1926. Serial No. 128,673. 8 Claims. (Cl. 158—74.)



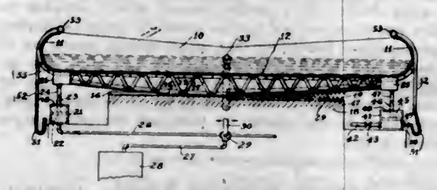
1. In a hydrocarbon burner, oil, steam and air conductors positioned concentrically with respect to each other, a mixing chamber positioned at the coincident ends of said oil and steam conductors, a nozzle positioned at one end of said mixing chamber, a cylinder steam valve reciprocally mounted in said mixing chamber adapted to cover and uncover orifices in said steam conductor and provided with oil ports therein and with a valve seat at its forward end, and an oil valve member reciprocally mounted in said mixing chamber adapted to engage the seat at the forward end of said steam valve.

1,679,153. LOCOMOTIVE TRUCK. ALFRED W. BRUCE, New York, N. Y. Filed Oct. 15, 1926. Serial No. 141,811. 13 Claims. (Cl. 105—174.)



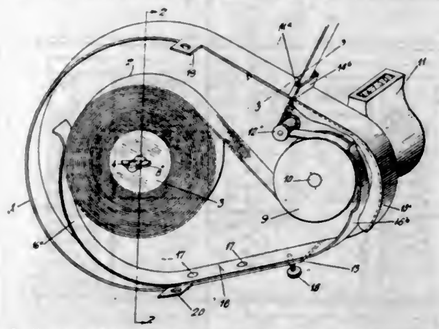
1. In a centering device for railroad vehicles, the combination of means for carrying, on curved track, a portion of the load of the vehicle; and means for carrying, on tangent track, a portion of the load borne by said first mentioned means on curved track, said last mentioned means also functioning, when carrying the load, to resist lateral vibrations of the vehicle.

1,679,154. TRANSMISSION BRAKE MECHANISM. NIELS A. CHRISTENSEN, Cleveland, Ohio. Filed Apr. 24, 1926. Serial No. 104,323. 4 Claims. (Cl. 188—76.)



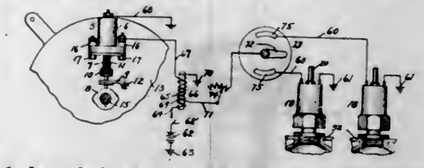
1. In brake mechanism for vehicles, the combination with the rear axle, the pinion shaft and the gearing connection between said shaft and axle, of a brake shaft having a transmission connection with said pinion shaft separate from said gearing connection, and brake mechanism associated with said brake shaft.

1,679,155. POWER HAND TOOL. EDWIN L. CONNELL, Cleveland, Ohio, assignor to The Van Dorn Electric Tool Company, Cleveland, Ohio, a Corporation of Ohio. Filed July 26, 1926. Serial No. 125,002. 4 Claims. (Cl. 144—32.)



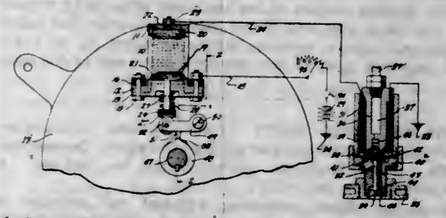
1. In a tool of the class described, motor means, a pair of members having driving surfaces, driving connections between said motor means and said members whereby said members are driven at differing speeds, a tool carrying member, and planetary elements engageable between said driving surfaces and having driving connection with said tool carrying member.

1,679,156. ARTIFICIAL-SURF BATHING POOL. WILLIAM FISCH, Atlanta, Ga. Filed Nov. 22, 1926. Serial No. 150,108. 19 Claims. (Cl. 4—178.)



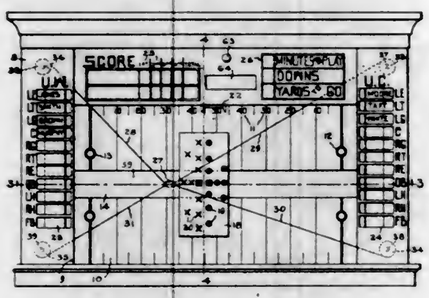
1. A bathing pool comprising an elongated tank, longitudinally extending truss rockers disposed beneath the tank, power means to impart a rocking motion to the tank to displace water therein, means to convert the rush of displaced water into a breaking wave, and means to control the movement of the tank.

1,679,157. MEASURING DEVICE. MAX GILBERT, Bronx, N. Y., assignor to Gilbert Bindometer Corporation, Brooklyn, N. Y., a Corporation of New York. Filed Oct. 4, 1926. Serial No. 139,285. 7 Claims. (Cl. 33—134.)



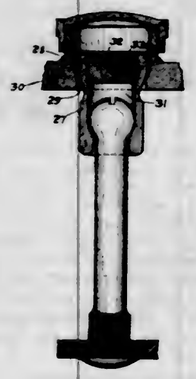
1. In a device of the character described, a normally closed and locked casing provided with an outlet mouth, means for supporting within the casing a roll of braid for rotation, a measuring indicator mounted on the exterior of the casing and having an operating shaft extending into the interior thereof, a measuring wheel secured to the indicator shaft and positioned within the casing, said wheel being positioned so that braid extending from the roll to the outlet mouth will be looped about the measuring wheel, means for holding the braid firmly against the circumference of the measuring wheel to preclude slipping of the braid with respect to said wheel, and means for braking the roll of braid.

1,679,158. FUEL-INJECTION SYSTEM. LOUIS O. FRENCH, Milwaukee, Wis. Filed Apr. 21, 1926. Serial No. 103,561. 6 Claims. (Cl. 123—32.)



1. In a fuel injection system for internal combustion engines, the combination of a primary control circuit including a variable resistance, a secondary circuit inductively associated with said primary circuit and periodically influenced thereby in cyclic synchronism with the engine, an electromagnetically controlled fuel-metering device controlling the amount of fuel delivered to the engine and having its control electromagnet included in said secondary circuit, and means for varying said resistance to vary the action of said control electromagnet and thus cause said metering device to vary the amount of fuel charges delivered to the engine.

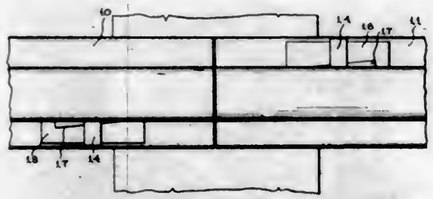
1,679,159. CIRCUIT-CONTROL MECHANISM FOR INTERNAL-COMBUSTION ENGINES. LOUIS O. FRENCH, Milwaukee, Wis. Filed Feb. 23, 1927. Serial No. 170,328. 15 Claims. (Cl. 123—32.)



1. In a timer for internal combustion engines, the combination of a variable resistance, and engine-controlled means for periodically varying said resistance.

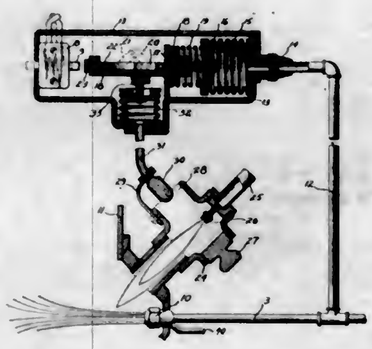
1,679,160. FOOTBALL-GAME-REPORTING DEVICE. NYMAN E. HELLAND, CLIFFORD C. HARRISON, and OTTO A. BIERBRAUER, Seattle, Wash. Filed Apr. 9, 1925. Serial No. 21,965. 10 Claims. (Cl. 116—120.)

9. A football game reporting device embodying a board having a football field illustrated thereon; a slot extending longitudinally of said board; a "field of play" mounting means operatively disposed in said slot; a "field of play" means pivotally mounted upon and releasably fixedly disposed upon said mounting means; a slot closing curtain secured to said "field of play" mounting means, whereby said slot may be maintained closed; a "line-man" means slidably disposed upon a upper edge of said board; and a symbol of a football movable over the face of said board.



1,679,161. FLEXIBLE STAY BOLT. JULIUS KINDERVATER, Richmond, Va. Filed June 10, 1926. Serial No. 115,029. 6 Claims. (Cl. 85—15.)

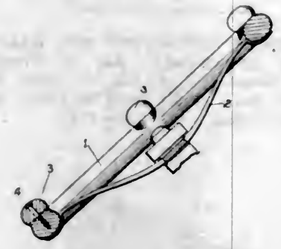
1. In a boiler staybolt structure, a bolt adapted to be attached at its inner end to the fire box wall and having a spherical outer end, and a sleeve member having an exterior bearing surface at its outer end spherically formed to provide a ball and socket connection with the boiler shell, said sleeve member having a socket at its other end in which is fitted the spherical outer end of the bolt.



1,679,162. RAIL JOINT. OSB LOCKARD, Commodore, Pa., assignor of one-half to Max Crawford, Commodore, Pa. Filed Sept. 29, 1926. Serial No. 138,465. 2 Claims. (Cl. 238—230.)

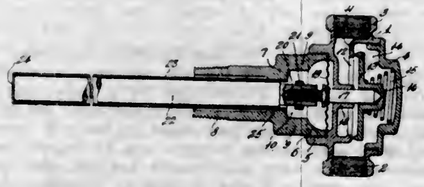
1. A rail joint comprising adjacent rail sections of which the web portions are provided with longitudinally extending tongues, the tongue of one section overlapping the web of the adjacent section, the tongues being formed with lateral extensions projecting through slots in the rail webs, said extensions having slots, and keys insertable

in the slots in the extensions and notched on one edge to engage the extension slots at one end and provided with lateral projections opposite said notches for engagement with the slots in the rail webs.



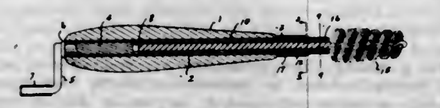
1,679,163. AUTOMATIC CUT-OFF DEVICE FOR FUEL-OIL BURNERS. DORR R. MARTIN, Detroit, Mich. Filed Apr. 22, 1926. Serial No. 103,832. 6 Claims. (Cl. 158—42.4.)

1. The combination with a furnace, of a fuel oil burner having a fuel nozzle discharging into the furnace, electrically controlled means for discharging oil through the said nozzle, a switch in the circuit for the said electrically controlled means, a pressure actuated device caused to operate upon operation of the electrically controlled means to discharge the oil into the furnace, the said pressure actuated device being arranged to open the switch at a certain time period subsequent to discharge of oil into the furnace, a conduit open to the furnace, a pilot flame extending through the conduit and adapted to ignite the oil when discharged, a device sensitive to change in temperature positioned adjacent the pilot flame and when heated to a predetermined extent adapted to prevent switch actuation by the pressure actuated device, the arrangement providing that, upon normal operation of the device and ignition of the fuel by the pilot, the increase of pressure within the furnace at the time of ignition causes heat of the pilot flame to be forced backwardly through the conduit to influence the temperature sensitive device.



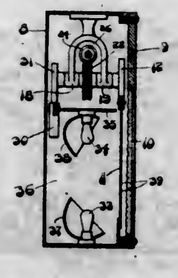
1,679,164. VEHICLE STEERING WHEEL. ARTHUR C. MCBRIDE, San Diego, Calif. Filed June 2, 1925. Serial No. 34,315. 3 Claims. (Cl. 74—33.)

1. A vehicle steering wheel provided at its one side with a relatively flat rounded knob adapted to conform with and extend into the palm of the hand of the person operating the wheel, the distance from the outer end of the knob to the back side of the wheel being such as to



permit the fingers to grip the back side of the wheel while the palm of the hand rests on the outer end of the knob.

1,679,165. THERMOSTATIC VALVE. CLARENCE H. MORROW, Cleveland, Ohio, assignor to The Hotstream Heater Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 10, 1925. Serial No. 49,384. 3 Claims. (Cl. 236—102.)



1. Thermostatic mechanism comprising a valve body having a partition dividing it into inlet and discharge chambers, said partition being provided with a gas opening and valve seat and said casing being provided with an opening in axial alignment with said valve seat, a skirt surrounding said casing opening and providing a diaphragm seat, a supporting structure comprising a sleeve, a skirt ring and connecting webs therebetween, said ring being adapted for securement to said skirt, a diaphragm located between said ring and said skirt diaphragm seat, a gas valve within said body, a thermostat mounted in the sleeve of the support and adapted for axial movement with respect to said sleeve portion, an actuating member between said thermostat and said gas valve and comprising a rod engaging the gas valve and sealed through said diaphragm, and adjustable means carried by said rod and arranged between it and said thermostatic element.

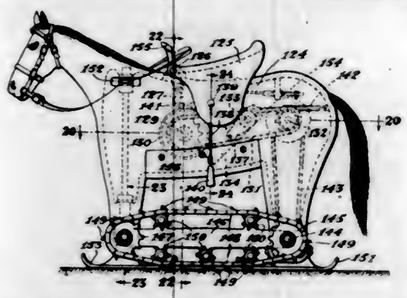
1,679,166. ROTARY TOOTHBRUSH. WALTER S. MURDOCK, Houston, Tex. Filed Nov. 22, 1924. Serial No. 751,658. 13 Claims. (Cl. 15—25.)

1. An implement of the character described including a handle having a longitudinal bore, a metallic lining in the bore forming a bearing, a shaft in said bearing, means for rotating the shaft, a brush carried by and detachable from the shaft, said bearing being extended, at one end, beyond the handle, a lip piece fixed to the brush and fitting over said extended end.

1,679,167. SIGN. THADDENS A. NOLAN, Cincinnati, Ohio. Filed Nov. 15, 1926. Serial No. 148,580. 3 Claims. (Cl. 40—133.)

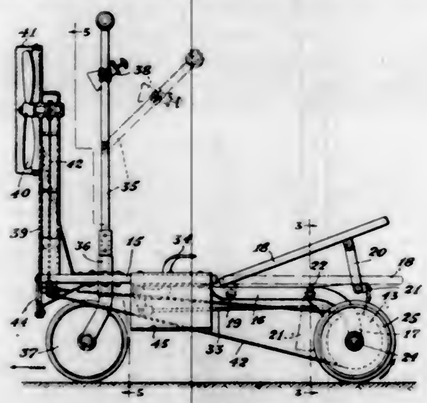
1. A sign comprising a rough surfaced light permeable sight portion, a perforated screen adjacent to and located to one side of the sight portion, a source of light located to throw light on the side of the screen opposite the sight portion, means adjacent to and covering the sight portion having characters permitting the passage of light conforming to the shape of the characters, one of said foregoing elements being capable of reciprocating movement, and means to impart said movement to said movable element.

1,679,168. ADJUSTABLE STILT. JAMES F. O'BRIEN, Seattle, Wash. Filed Feb. 15, 1926. Serial No. 88,200. 2 Claims. (Cl. 272—70.2.)



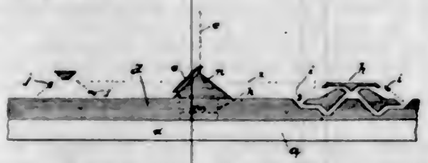
1. A step for an adjustable stilt stamped from a single piece of sheet metal and having an aperture formed therein adjacent one end thereof, to accommodate a pole and the like, one edge of said aperture having a series of pole engaging serrations, the material of the step being angularly and downwardly bent adjacent said aperture to form an arcuate foot engaging portion and the angularly bent portion return-bent to form a pole abutting heel thereat and a tread portion for said step extending outwardly therefrom, said pole abutting heel having a series of pole engaging serrations formed therein.

1,679,169. TOY VEHICLE. JAMES F. O'BRIEN, Seattle, Wash. Filed Mar. 15, 1926. Serial No. 94,745. 5 Claims. (Cl. 208—42.)



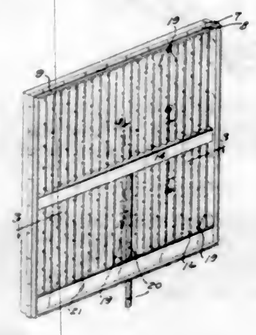
1. In a toy vehicle, in combination, a mobile body, a manually operable oscillative seat attached thereto.

spring retracted ratchet propelling mechanism for said body interconnected with said seat for actuation there-



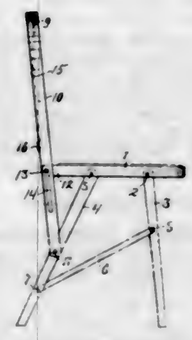
by, and manually operable flexible stirrups connected to said propelling mechanism for alternately actuating the same relative to the seat actuation thereof.

1,679,170. VELOCIPEDE. JAMES F. O'BRIEN, Seattle, Wash. Filed Mar. 25, 1926. Serial No. 97,199. 4 Claims. (Cl. 208—161.)



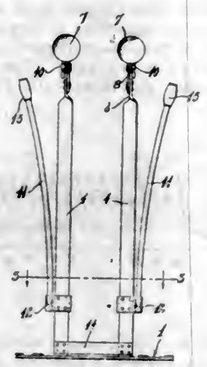
1. In a velocipede, in combination, a mobile body having front steering and rear driving wheels, a manually operable oscillative treadle attached to said body, mechanism interconnecting said rear driving wheels and treadle for actuation by the latter to propel the body in a forward direction, and a screw propeller rotatively mounted upon one end of said body for actuation by the mechanism thereof.

1,679,171. CLEANING ATTACHMENT FOR CIRCULAR-KNITTING MACHINES. THETUS D. PICKELL, New York, N. Y., assignor to A. V. Victorius & Company, New York, N. Y., a Corporation of New York. Filed Aug. 10, 1926. Serial No. 128,355. 4 Claims. (Cl. 66—168.)



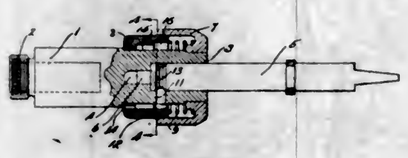
1. A cleaning attachment for circular knitting machines comprising, in combination, needles, knitting cams, picker cams adapted to lift certain of the needles to an inactive position and means adapted to lift all of the needles to a height not less than that to which certain of the needles are adapted to be lifted by the picker cams.

1,679,172. STEAM APPLICATOR FOR WALL-PAPER-REMOVING APPARATUS. RAY G. PIETERS, Chicago, Ill., assignor of one-half to Albert N. Terry, Minneapolis, Minn. Filed June 21, 1926. Serial No. 117,397. 5 Claims. (Cl. 126—271.1.)



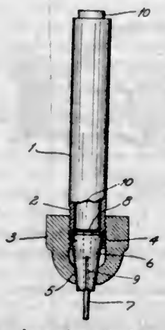
1. An applicator of the kind described comprising a casing, a hollow reinforcing rib affording a steam distributing chamber, a connection for a steam supply member on said chamber, a corrugated sheet in said casing having its corrugations closed by the back thereof to afford lateral steam conduits each having one end in communication with said chamber and the other end closed, said conduits having a plurality of orifices for the escape of steam.

1,679,173. FOLDING CHAIR. WILLIAM C. RABTETTEH, Fort Wayne, Ind. Filed Dec. 3, 1925. Serial No. 72,886. 3 Claims. (Cl. 155—139.)



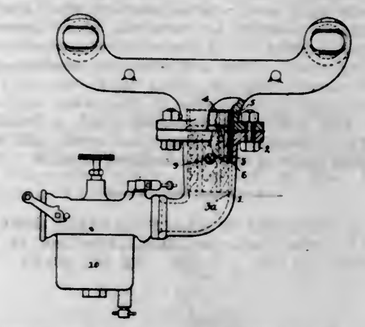
3. A folding chair comprising a seat frame; a pair of folding fore-legs in connection with the seat frame in the forward part thereof; a pair of folding rear legs in connection with the seat frame at a point therein spaced from the connection of the forelegs with said frame; a strut connecting each rear leg with the corresponding foreleg and a back member having pivotal connection with said rear legs and a connection with the rear end of the seat frame admitting of limited sliding movement therebetween.

1,679,174. BODY-PUNCH RESISTANCE DEVELOPER. EDWIN H. RICHARDS and FRANK A. RICHARDS, Pomona, Calif. Filed Mar. 12, 1927. Serial No. 174,777. 5 Claims. (Cl. 272—57.)



1. A body punch resistance developer comprising a platform, a spring arm rising from the platform, means on said spring arm operable by the user to flex said spring arm, and an impact block on said spring arm, and means to adjust said impact block on the spring arm.

1,679,175. CHUCK. FRANKLIN SCHNEIDER and EDWIN L. CONNELL, Cleveland, Ohio, assignors to The Van Dorn Electric Tool Company, Cleveland, Ohio, a Corporation of Ohio. Filed Aug. 26, 1926. Serial No. 131,692. 4 Claims. (Cl. 279—74.)

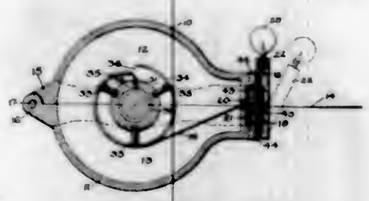


1. In a chuck, a spindle having an axial bit receiving bore, means for preventing rotation of a bit in said bore, said spindle being also provided with an abutment and a shoulder spaced therefrom, a sleeve movable upon said spindle between said abutment and said shoulder, a spring operative between said sleeve and said abutment to normally maintain said sleeve against said shoulder, said spindle being also provided with a radial opening, a headed bit retaining member arranged in said opening and adapted to project into said axial bore for engagement with a bit therein, said sleeve being provided with a longitudinal groove adapted to clear the head of said bit retaining member but to maintain said member projecting into said bore, said sleeve being also provided with an annular groove intersecting said longitudinal groove and adapted to allow relative rotation of said sleeve and said spindle subject to prior longitudinal movement of said sleeve against said spring, said sleeve being also provided with an arcuate groove circumferentially spaced from said longitudinal groove and communicating with said annular groove, said arcuate groove being of sufficient depth to allow said bit retaining member, when aligned therewith, to clear said axial bore.

1,679,176. PUNCH. PHILIPP SCHNEIDER, St. Louis, Mo. Filed Feb. 21, 1927. Serial No. 169,904. 1 Claim. (Cl. 164—94.)

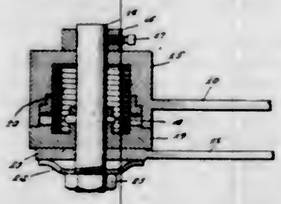
A punch of the class described, comprising a hollow frusto-conical-shaped bit holder having its lower portion longitudinally slotted adapted to fit a conic opening in a nut, a screw-threaded, hollow, cylindrical portion adapted to be screwed into said nut thereby tending to force the said frusto-conical bit holder outwardly, a solid cylindrical anvil adapted to reciprocate in said hollow, screw-threaded, cylindrical portion when struck by a hammer thereby imparting energy to a bit enclosed in said frusto-conical bit holder, a bit having a flanged head, said bit being adapted to be rigidly held in said frusto-conical bit holder when said cylindrical body portion is screwed into said nut, a nut having its upper portion screw-threaded adapted to engage the screw-threaded portion of the said cylindrical portion, and an opening in its lower portion having sloping walls adapted to fit the periphery of the said frusto-cone-shaped, slotted bit holder and adapted to rigidly hold a bit when said cylindrical portion is tightly screwed into said nut.

1,679,177. MIXING DEVICE. WILLIAM SEYMOUR, Paterson, N. J. Filed Feb. 10, 1926. Serial No. 87,225. 1 Claim. (Cl. 48—180.)



A gaseous fuel mixing device adapted to be positioned in the intake manifold of an internal combustion engine comprising, in combination, a body having a rough-surfaced bore therethrough, a spiral-ribbed element occupying and having its ribs at their outer edges in contact with the rough surface of the bore, said ribs and the roughened surface of the bore forming a spiral passage one side of which is constituted by said surface.

1,679,178. TAPE CASING. NATHAN H. SHILLMAN, Baltimore, Md. Filed Jan. 29, 1926. Serial No. 84,563. 7 Claims. (Cl. 242—84.8.)

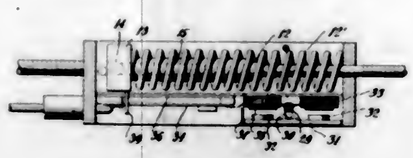


1. A tape holding device comprising a pair of diametrically opposed substantially similar members adapted when fitted together to form a housing for a tape, integral

bearing bosses of unequal diameters disposed centrally of said members and a rotating element carried by said bear-

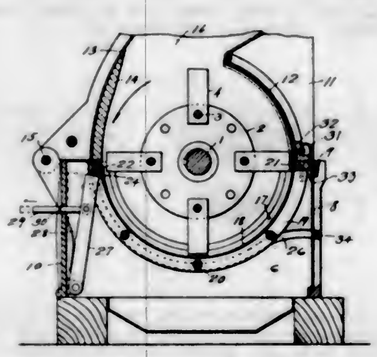
ings on journals seated in said bearings, the inner walls of said bearings being provided with grooves for receiving a lubricant.

1,679,179. REBOUND DAMPER. WILLIAM CARLETON STARKEY, Indianapolis, Ind., assignor to L. G. S. Devices Corporation, Indianapolis, Ind., a Corporation of Indiana. Filed June 6, 1925. Serial No. 35,281. 2 Claims. (Cl. 188—130.)



1. A rebound check for automobiles, comprising two friction brake members, a third member rotatable relatively to said brake members, means for connecting said third member and one of said brake members respectively with two parts of an automobile which separate on rebound whereby said brake member and said third member will rotate relatively to each other when said two automobile parts move relatively to each other, that one of said brake members not connected to an automobile part being provided with a central circular recess, and a coil spring located within said recess and bearing against the wall thereof, said coil spring being operatively connected to said third member so that when said third member and said recessed member tend to rotate on rebound in a direction to unwind said spring said spring will expand and lock said two members together.

1,679,180. PROCESS OF MANUFACTURING JEWELRY. JOHN P. STERK, Dollar Bay, Mich. Filed Jan. 18, 1927. Serial No. 161,851. 2 Claims. (Cl. 29—160.6.)

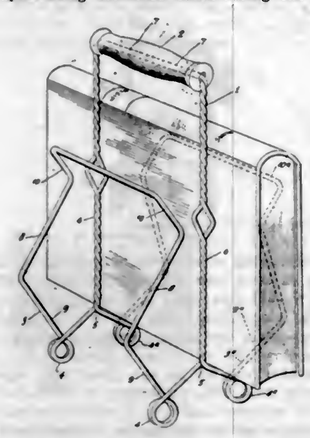


1. A process of forming articles of jewelry consisting of first forming segments from plates of different metals so that the segments may be placed in edge to edge relationship, then placing a drop of solder on one face of the assembled segments and simultaneously imbedding the head of a supporting element in the drop of solder.

1,679,181. SPRING CONTROL. KARL O. SCHAUMAN, STIRLING R. YANCEY, and JOSE L. MIFSUD, New York, N. Y., assignors to Sure-Guard Corporation, New York, N. Y., a Corporation of New York. Filed June 23, 1927. Serial No. 200,800. 10 Claims. (Cl. 188—167.)

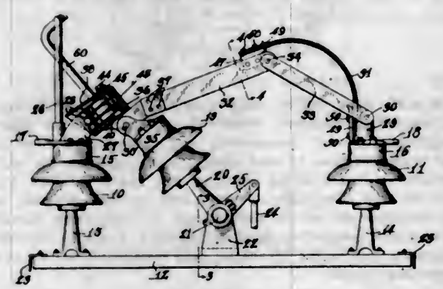
5. A spring control comprising a casing having means for attachment to a support, a slide rod in the casing, a tension spring in the casing acting against an abutment on the slide rod, a trigger mechanism for locking the spring in retracted position, electromagnetic means for releasing the trigger mechanism, an electric circuit and means for opening and closing said circuit by the movement of the spring.

1,679,182. GRINDER. HARRY J. SHELTON, University City, Mo. Filed Nov. 7, 1927. Serial No. 231,547. 6 Claims. (Cl. 82—11.)



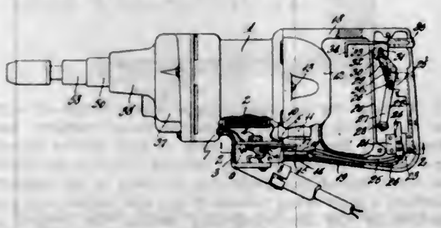
1. A grinder of the class described comprising rotary hammers, a casing having an end door and side casing grooves adjacent to the hammers, an arcuate screen and supporting frame detachably mounted in the casing adjacent to the hammers—one end of said frame having side projections engaging the side casing grooves and forming a sliding pivotal engagement with the casing allowing withdrawal through the end opening—and means to secure the screen and frame in operative position.

1,679,183. BOOK CARRIER. IGNATZ SIDON, Astoria, N. Y. Filed Mar. 18, 1927. Serial No. 176,356. 2 Claims. (Cl. 224—45.)



1. In a book holder, a pair of wire loops constituting opposed clamping jaws, the wires from which said loops are formed being provided at the bases of the loops with

spring coils and the wires of the two loops being extended from said coils toward one another and twisted together to form upstanding members constituting the side mem-

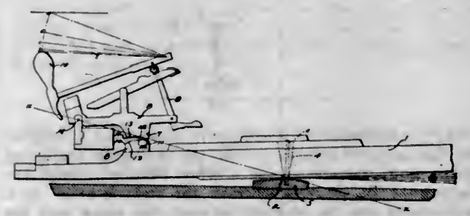


bers of a bail, the upper portions of said side members being bent toward one another and secured together to form a handle to the bail.

1,679,184. DISCONNECTING SWITCH. ROBERT R. STEVENSON, Philadelphia, Pa., assignor to Electrical Development & Machine Company, Philadelphia, Pa., a Corporation of Delaware. Filed Sept. 20, 1923. Serial No. 663,767. 16 Claims. (Cl. 200—48.)

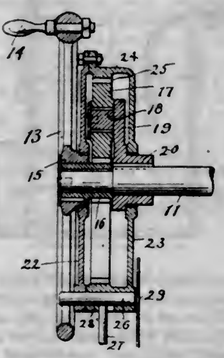
16. In an electric switch, a sectional contact arm, a contact mounted at the free end of a section of said arm, a hood housing said contact, and a member jointed to said section to flex the latter downward in open circuit position.

1,679,185. SCREW DRIVER. BURTON W. SWEET, Cleveland, Ohio, assignor to The Van Dorn Electric Tool Company, Cleveland, Ohio. Filed July 3, 1925. Serial No. 41,453. 2 Claims. (Cl. 172—36.)



1. In a motor hand tool, a main casing, a motor therein, a work spindle driven thereby, a suitable cable connection for the supply cable leading to the tool, a junction block for the motor terminals and the cable connection, and including switch contacts, and a combined end cap and handle removably secured to the casing and provided with a controlling switch and suitable contacts adapted to cooperate with the contacts of the junction block whereby the end cap and handle may be removed without disturbing the electrical connections to the motor.

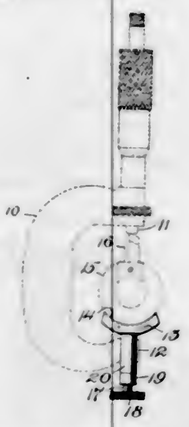
1,679,186. PROCESS FOR PRODUCING CITRIC ACID BY MEANS OF FERMENTATION. JOSEF SZÜCS, Vienna, Austria, assignor to Montan- und Industrialwerke vormals Joh. Dav. Starck, Prague, Czechoslovakia, a Company of Czechoslovakia. Filed Dec. 4, 1924, Serial No. 753,803, and in Austria Dec. 19, 1923. 6 Claims. (Cl. 260—120.)



1. Process for producing citric acid by fermentation, which process consists in cultivating citric acid producers on molasses at a temperature between the limits of 15° and 30° C., selecting cultures adapted for conducting the citric acid fermentation without production of oxalic acid and growing the selected cultures—which cannot be distinguished on morphological grounds from other strains of the same species—upon a culture medium made up from molasses.

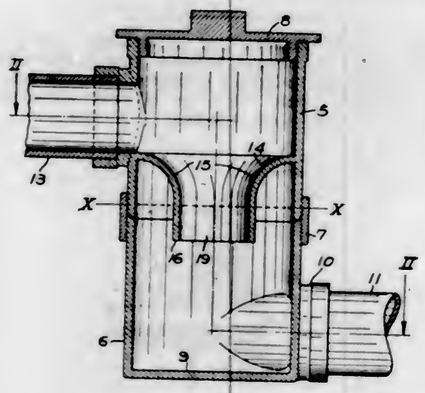
1,679,187. PIANO. PAUL H. TAYLOR, Wakefield, Mass. Filed Feb. 28, 1927. Serial No. 171,425. 9 Claims. (Cl. 84—239.)

8. A piano action comprising a key, a wippen, contacting surfaces on each, the parts engaging each other when in action along a concave and a convex surface, every point of contact being in the plane of a straight line passing through the fulcra of the key and wippen, and producing accelerated speed of the hammer according to an approximately logarithmic ratio.



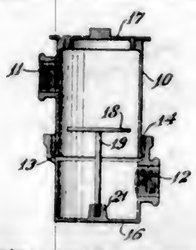
1,679,188. DOOR-EXTRACTOR-OPERATING MECHANISM. IVOR D. THOMAS, Palmyra, Ohio, assignor to The Wellman-Seaver-Morgan Company, Cleveland, Ohio, a Corporation of Ohio. Filed Apr. 15, 1925. Serial No. 23,224. 4 Claims. (Cl. 74—84.)

1. In a device of the character described, a supporting frame, a shaft mounted on the frame, a hand wheel rotatably mounted on the shaft, a planetary gear casing



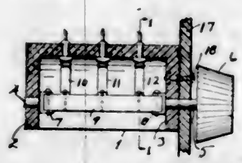
rotatably mounted upon the shaft alongside the hand wheel, said hand wheel having a hub projecting into the casing, a gear fixed to the hub within the casing, an internal gear fixed to said casing, an arm fixed to said shaft and extending within said casing, a gear carried by said arm and meshing with said internal gear and with the gear on the hub and means carried by said casing for locking the same to the hand wheel or to the frame.

1,679,189. MICROMETER ATTACHMENT FOR ADJUSTING TOOLS. ALBERT H. WADELL, Newark, N. J. Filed Apr. 6, 1927. Serial No. 181,287. 1 Claim. (Cl. 33—167.)



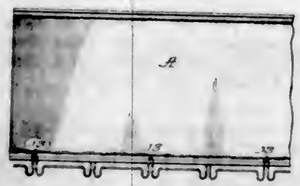
An attachment for micrometers comprising a member having an arcuate plate at the top, a stirrup projecting downwardly therefrom, and a screw passing through the bottom of the stirrup whereby the fixed contact of a micrometer can be clamped between the screw and the bottom of the plate.

1,679,190. WASTE TRAP. ROBERT G. WESTBROOK, Birmingham, Ala. Filed Sept. 16, 1926. Serial No. 135,965. 7 Claims. (Cl. 182—7.)



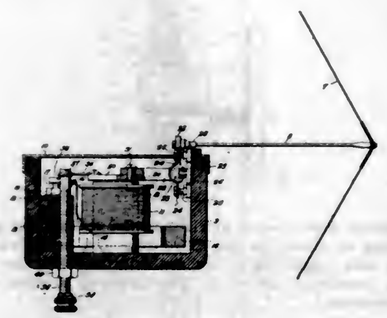
1. In a waste trap, a cylindrical body having a lower inlet and an upper outlet, both said inlet and said outlet being in the side wall of the body, and means interposed between the inlet and outlet forming an inverted annular chamber of such dimensions as to hold sufficient liquid to seal the inlet, said inlet having such form and arrangement that the inflowing fluid is given a swirling movement within the trap.

1,679,191. REVERSIBLE WASTE TRAP. ROBERT G. WESTBROOK, Birmingham, Ala. Filed Sept. 19, 1927. Serial No. 220,498. 8 Claims. (Cl. 182—7.)



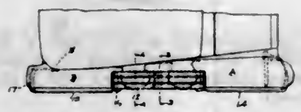
1. A non-siphoning waste trap comprising a cylindrical body having an inlet near the bottom and an outlet near the top, both said inlet and said outlet being disposed normal to the longitudinal axis of the body, a detachable cover for one end of the body, a stem extending from one end of the body to the mid portion thereof, and a circular flat disk member carried by the stem, and rigidly supported thereby, said disk permitting a restricted flow of liquid thereby whereby said trap is reversible end for end to locate said cover at the upper or the lower end of said trap when in use.

1,679,192. RADIO WAVE SWITCH. JESSE S. WHEELAND, San Francisco, Calif. Filed Jan. 4, 1926. Serial No. 79,175. 1 Claim. (Cl. 200—8.)



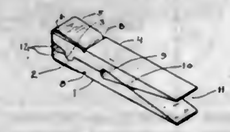
A radio wave switch comprising a semi-cylindrical shell of insulating material, electrical contacts, spaced apart longitudinally and transversely and arranged in rows on the inside surface of said shell, contact springs for each transverse row adapted to span the space between any two of said longitudinal rows, said springs adapted to be mounted on an insulating bar, an operating handle having side projecting bearing members, bearings for said members, means for attaching said insulating bar to said operating handle.

1,679,193. CAGING. WILLIAM E. WHITE, Chicago, Ill., assignor to Kalman Steel Company, Chicago, Ill., a Corporation of Delaware. Filed Jan. 3, 1927. Serial No. 158,625. 3 Claims. (Cl. 72—109.)



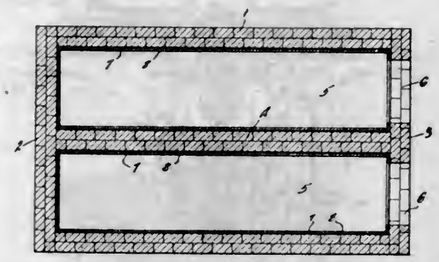
1. A beam caging, comprising a single length of wire bent to provide a series of spaced flange-engaging and form-spacing devices therein, each of said devices including a loop projecting laterally from the wire in one direction and a second loop projecting laterally in the opposite direction, a hook being formed in the last named loop and constituting the flange-engaging means, the length of wire occupying a position midway between the extremities of the two loops and spaced away from the face of the beam.

1,679,194. RADIO RECEIVING APPARATUS. EUGENE A. WIDMANN, Brooklyn, N. Y., and FRANK D. LEWIS, West Orange, N. J., assignors, by mesne assignments, to Pathe Phonograph & Radio Corporation, a Corporation of New York. Filed June 20, 1922, Serial No. 569,692. Renewed July 7, 1927. 4 Claims. (Cl. 179—108.)



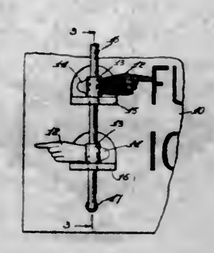
3. A loud-speaker for radio-receiving sets, comprising a watch-case telephone receiver embodying a cup, a cover therefor, and an electro-magnet and an armature for the same disposed within the cup; a large conical amplifying diaphragm disposed external to the telephone receiver; a vibration-transmission element connected at one end with the armature and leading through the cup directly to the apex of the conical diaphragm to vibrate the latter in accordance with the movements of the armature; and an adjusting screw extending through the cup and connected to move the armature toward or from the pole-piece or pieces of the magnet to regulate its normal position with respect thereto, said screw having a manipulating portion external to the cup.

1,679,195. AUTOMOBILE SIDE BUMPER. CARL WILLIAMS, San Francisco, Calif. Filed Aug. 30, 1926. Serial No. 132,347. 2 Claims. (Cl. 280—164.)



1. The combination with an automobile, of running-boards extending along the sides of the automobile and substantially horizontally disposed resilient brackets constituting the sole means of connecting the running-boards with and supporting the same on the sides of the automobile, and which bracket yields laterally incident to encounter of the running-board with an obstruction.

1,679,196. CLOTHESPIN. HENRY C. ZIEBURTZ, Cleveland Heights, Ohio. Filed Feb. 7, 1928. Serial No. 252,523. 1 Claim. (Cl. 24—137.)

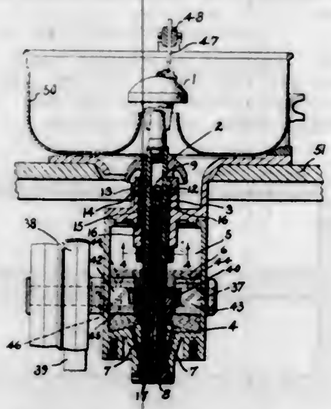


A clothes pin comprising a pair of wooden jaws one of which has a cross groove in the inner side thereof and the other of which has a cross rib fitting in said groove and forming a pivot, each jaw having a rear end beveled on the inner side behind the pivot to limit the extent of opening of the jaws, and a flat spring bent around and enclosing the rear ends of both jaws and having its ends engaged with the outer sides of the jaws in advance of the pivot.

1,679,197. SETTING STRUCTURE FOR LUMBER KILNS AND THE LIKE. JACOB M. AARONS, Cleveland Heights, Ohio. Filed Feb. 16, 1924. Serial No. 693,282. 2 Claims. (Cl. 72—16.)

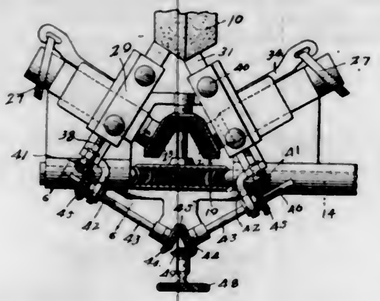
1. A setting structure for lumber kilns wherein considerable heat and moisture are encountered, comprising a setting of porous material and a heat insulating and moisture proof coating applied to the inner surface thereof, said coating comprising a primer coat of gilsonite and pine oil and a finishing coat of asbestos fibres, gilsonite, and pine oil.

1,679,198. REMINDER. FRANK ALLEGREZZA, Chicago, Ill. Filed Sept. 8, 1927. Serial No. 218,215. 3 Claims. (Cl. 116—134.)



2. In a reminder device of the character described comprising a metallic mounting plate provided on its face with a list of itemized information, flat substantially horizontally projecting perforated lugs struck out of said plate adjacent each of the items of the list, a common pivot extending upwardly through all of said lugs in spaced relation to the mounting plate, an indicator aligned with each item, said indicator being formed adjacent one end with a loop for loosely mounting on the common pivot, and slidably supported on the flat upper surface of the lug adjacent the aligned item whereby to permit free movement of indicators into reminding and non-reminding positions relative to the items aligned therewith.

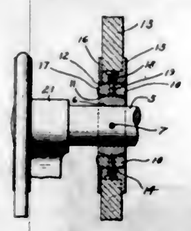
1,679,199. MACHINE LUBRICATION. NELSON M. BAKER, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Mar. 8, 1926. Serial No. 93,157. 5 Claims. (Cl. 308—170.)



1. In a device of the character described, a hollow shaft, bearings for the shaft, a rod within the hollow shaft having a longitudinal slot for the length of the

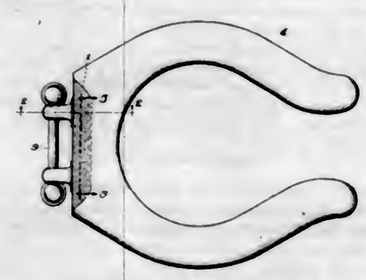
rod on the outside thereof, a spiral member in the bore of the shaft and secured thereto, an oil well communicating with the spiral member, and means for rotating

the shaft whereby the spiral member will drive the oil from the oil well along the longitudinal slot in the rod to the bearings.



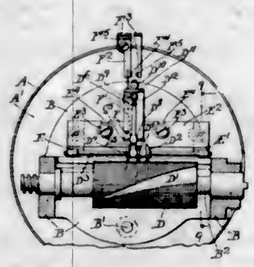
1,679,200. GRINDSTONE HONING DEVICE. NELSON M. BAKER, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Aug. 6, 1923. Serial No. 656,009. 4 Claims. (Cl. 125—11.)

1. In combination with a grinding machine including a rotary stone, a housing arranged in front of the stone, a sleeve carried by the housing, a shaft arranged within the sleeve, a hone carriage associated with the sleeve, a cam carried by the shaft, means to connect said hone carriage and cam, and means to rotate said shaft whereby the hone carriage is reciprocated in the path of the stone face.



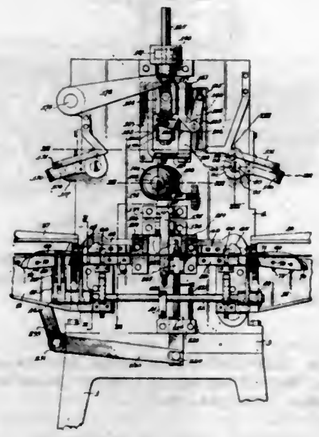
1,679,201. UNIVERSAL STONE MOUNTING. NELSON M. BAKER and GEORGE L. LJUNGLOF, Southbridge, Mass., assignors to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Nov. 16, 1923. Serial No. 675,069. 2 Claims. (Cl. 51—168.)

1. A grindstone mounting of the character described comprising a shaft, a ring member on the shaft having a spherical peripheral surface, an annular ring enclosing the spherical surface of the first ring and a third ring enclosing the second ring, an annular grindstone member, means securing the third ring to the annular grindstone member, a pin extending through the shaft and the first ring and into the second ring on opposite sides thereof in a plane which lies centrally between the bounding rotational planes of the grinding surface of the grindstone, the extensions of the pin into the second ring acting as pivots for said ring, and pivot members extending from the third ring into the second ring on



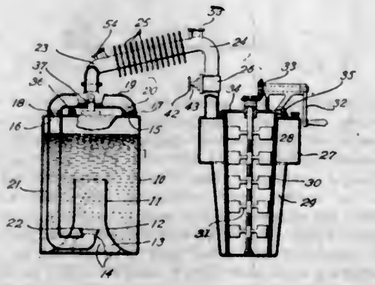
opposite sides thereof at right angles to the first pin and acting as pivots for the third ring and being located in the said plane which lies centrally between the bounding rotational planes of the grinding surface of the grindstone.

1,679,202. TOILET-SEAT HINGE. JOSEPH W. BISHOP, Muskegon, Mich., assignor to The Brunswick-Balke-Collender Company, Chicago, Ill., a Corporation of Delaware. Filed Nov. 1, 1926. Serial No. 145,557 8 Claims. (Cl. 4—237.)



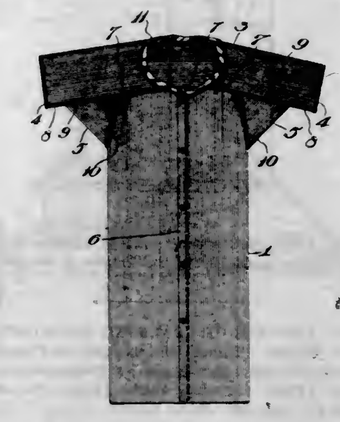
1. The combination of a toilet seat, a flat metallic insert embedded therein and having a corrugated surface for preventing displacement thereof, and a hinge secured to said insert.

1,679,203. SPEEDOMETER. GUY W. BLACKBURN, Elgin, Ill. Filed Apr. 9, 1924. Serial No. 705,235. 25 Claims. (Cl. 264—21.)



1. In a speed indicator, a rotatably mounted visual indicating drum, mechanical means for rotating it through a predetermined angle in response to speed variations and yielding means for resisting the rotation of the drum, said means comprising a receptacle containing an oil bath in which the edge of the drum only is immersed.

1,679,204. WIREWORKING MACHINE. JAMES D. CONEY and BERNT GARLLUS, Detroit, Mich., assignors to Star Service Hanger Co., Detroit, Mich., a Corporation of Michigan. Filed Jan. 2, 1924. Serial No. 683,954. 16 Claims. (Cl. 140—71.)

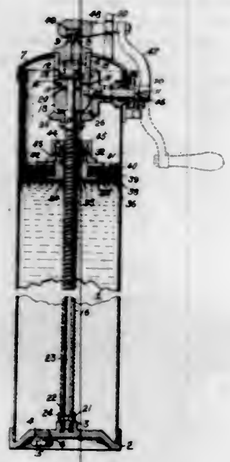


1. In a wire working machine for forming a blank piece of wire into a garment hanger having coat arms, a shank and hook:—wire blank holders, swingable shoulder forming dies adapted to place the ends of the wire blank together, an anvil, a cam actuated clamping member adapted to cooperate with said anvil in temporarily holding the ends of said arms together, wire twisting means adapted to be lowered over the ends of said arms to twist said arms and form a shank, and hook forming means adapted to operate on the hanger shank while said hanger is held by said blank holders and said clamping means.

1,679,205. REFRIGERATION. FERNAN O. CONILL, Marseille, France. Filed Jan. 16, 1923. Serial No. 612,885. 5 Claims. (Cl. 62—120.)

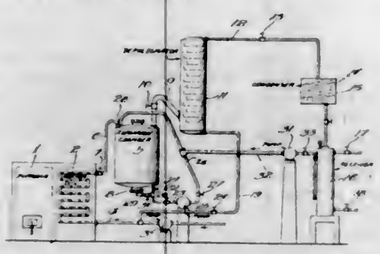
1. In refrigerating apparatus, in combination, a receptacle adapted to receive a liquid having dissolved therein a condensible gas which may be released from said liquid upon heating thereof in one stage of operation of the apparatus, a second receptacle connected to receive and have condensed therein the gas driven out of solution from the liquid in the first receptacle upon the heating of the latter, said first receptacle being adapted to be submerged in a cooling liquid during another stage of operation of the apparatus to cause the re-absorption of said gas within the liquid therein, a signal adapted to be operated by vapor pressure, and means associated with said first receptacle and forming a reservoir adapted to be filled with cooling liquid upon the submerging of said first receptacle, said reservoir-forming means being in thermal contact with said first receptacle and adapted upon a subsequent heating of the latter to supply vapor for operating said signal upon the attainment of a predetermined abnormal pressure of gas within said first receptacle.

1,679,206. UNDERGARMENT. JAMES H. CROSSINGHAM, Germantown, Pa. Filed Jan. 19, 1925. Serial No 3,336. 1 Claim. (Cl. 2—113.)



A knitted garment comprising a one piece body provided with vertical wales, which body extends upwardly to the neck-opening at the garment front and nearly to the neck-opening at the garment back, a narrow, transverse seamless yoke the wales of which are horizontally extended, said yoke being shaped to fit the neck-opening and arranged between the upper ends of the body and secured thereto by lines of stitches, said yoke being extended across the garment at the rear of the neck-opening, said yoke being extended to form integral sleeve portions, and seamless arm pit gussets each substantially of the configuration of an isosceles trapezium, the wales of which gussets are arranged at an inclination to both the wales of the body and the wales of the yoke, said yoke being connected to said body and said gussets at the front and rear by lines of stitches, the stitches at the garment front extending from the neck-opening to the sleeve ends, and the stitches at the back extending entirely across the back to the sleeve ends, said gussets being connected by lines of stitches extending vertically from points below the body top to said yoke, and horizontally across the gusset top to said yoke, from points short of the sleeve ends to said vertical lines of stitches.

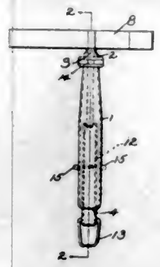
1,679,207. FIRE EXTINGUISHER. EDWARD F. DELFOE, Brooklyn, N. Y. Filed Oct. 28, 1922. Serial No. 597,492. 9 Claims. (Cl. 299—93.)



1. In a fire extinguisher comprising a cylindrical body, the combination of a threaded hollow shaft therein, the interior of which communicates with the interior of the cylinder, a handle operatively associated with the shaft for rotating the same, a piston mounted on said shaft, and comprising a liquid proof cup held between metallic plates having yieldable outer edges and a triangular pack-

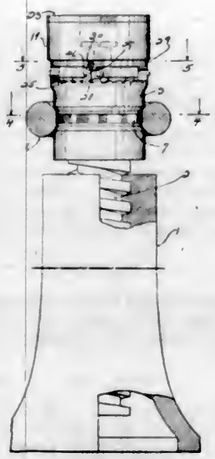
ing ring, said piston adapted to move on said shaft by a rotary movement of the handle to cause liquid to be forced through the shaft, a nozzle communicating with

the hollow shaft, and means in said handle for closing and sealing the nozzle when the handle is in inoperative position.



1,679,208. PROCESS OF CRACKING PETROLEUM OIL. GUSTAV EGLOFF, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed Oct. 22, 1923. Serial No. 669,931. 2 Claims. (Cl. 196—66.)

2. A continuous process of oil conversion comprising subjecting an advancing stream of oil to a cracking temperature in a heating zone, passing heated oil from said stream into an enlarged reaction chamber wherein a body of liquid oil accumulates and substantial vaporization occurs, dephlegmating the evolved vapors, continuously withdrawing unvaporized residual oil from said reaction zone, isolating predetermined portions of such residual oil from the system, uniting with the remaining portions of the residual oil uncondensable gases produced in the process, returning such portion of the unvaporized oil and the uncondensable gases united therewith directly and without passage through said heating zone to the vapor space of said reaction chamber for further treatment.

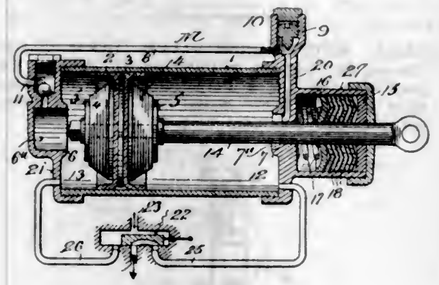


1,679,209. CIGARETTE HOLDER. EDWARD EKSERGIAN, St. Louis, Mo., and WALFRID WALLENTHIN, Attleboro, Mass.; said Wallenthin assignor to said Eksergian. Filed Aug. 27, 1921. Serial No. 496,068. 2 Claims. (Cl. 131—10.)

2. In a cigarette holder, a tubular handle, a V-shaped flat spring slidingly mounted in one end of said handle, a rigid member slidingly mounted in the other end of said handle and engaging the bottom of said spring, a spring seat secured to said handle, a coil spring compressed be-

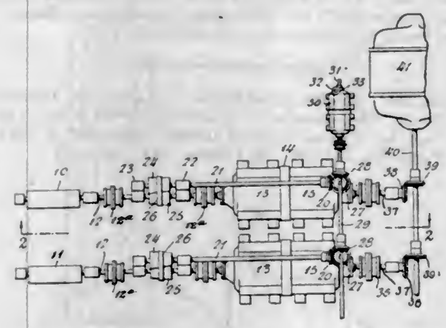
tween said seat and the outer end of said member, and opposed finger and thumb gripping surfaces on said handle and member.

1,679,210. LIFTING JACK. ALVA RAY ESMOND, Union Grove, Wis. Filed Mar. 25, 1927. Serial No. 178,467. 3 Claims. (Cl. 254—100.)



1. A lifting jack comprising a body portion having a vertical aperture therethrough provided with internal threads, a lifting screw cooperating with the internally threaded aperture and provided with an enlarged head having a peripheral channel and having ratchet teeth, a pair of curved arms embracing said head and fitting within sid channel, one of said arms being provided with a pawl cooperating with said ratchet teeth, and a handle for operating said arms, said head having an upwardly projecting stub shaft, and a shoe revolubly mounted upon said stub shaft.

1,679,211. MEHOD OF SULPHONATION. HENRY B. FABER, Buffalo, N. Y., assignor to National Aniline & Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed July 2, 1921. Serial No. 482,140. 7 Claims. (Cl. 260—67.)

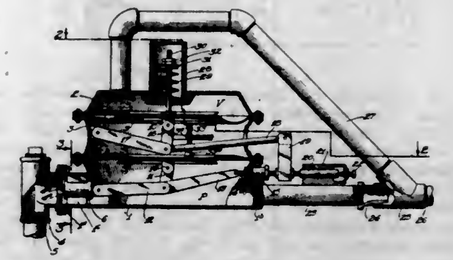


6. The method of sulphonating alcohol soluble organic coloring matters which comprises subjecting the same in a solid state to the action of gaseous sulfur trioxide.

1,679,212. PRESSURE-ACTUATED MOTOR FOR OPERATING DOORS OR THE LIKE. PARIS R. FORMAN, Rahway, N. J., assignor to National Pneumatic Company, New York, N. Y., a Corporation of West Virginia. Filed Sept. 29, 1923. Serial No. 665,680. 3 Claims. (Cl. 121—44.)

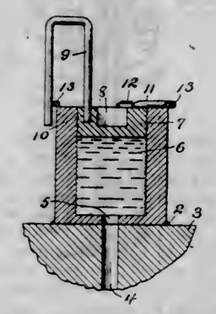
1. In a pressure actuated motor for operating doors, a cylinder, a piston operating therein, and a piston rod for connection to the door to be operated and pressure supply and exhaust connections to piston ends of the cylinder, in combination with a by pass connecting opposite ends of said cylinder, means for adjusting the area of communication between said by pass and one end of said cylinder, and a check valve controlling the communication between the by pass and the other end of said cylinder said piston acting at each end of its stroke to cut off communication between the cylinder and the by-pass to prevent any exhaust of fluid pressure to the atmosphere.

1,679,213. POWER-TRANSMITTING DEVICE. HARRY P. FOWLER, Waterbury, Conn., assignor to The Waterbury Tool Company, Waterbury, Conn., a Corporation of Connecticut. Filed June 9, 1927. Serial No. 197,555. 7 Claims. (Cl. 74—7.)



1. The combination with a plurality of machine units adapted to perform successive steps of a continuous operation upon material treated by such units, of a plurality of driving units for each of said machine units, characterized by each of said driving units consisting of a hydraulic variable speed gear having a control shaft adapted to be rotated to vary the driving speed of said speed gear, a master control shaft for simultaneously actuating all of said control shafts, and means driven by the driving shaft of each respective speed gear for counteracting the adjustment of its respective control shaft produced by rotation of the master shaft, said means including an adjustable device for varying its effect.

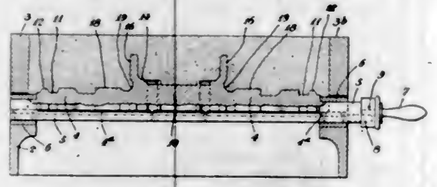
1,679,214. PROCESS FOR PRODUCING RESIN BY POLYMERIZATION. WESLEY REIFF GERGES, Philadelphia, Pa., assignor to The Barrett Company, a Corporation of New Jersey. Filed Nov. 6, 1924. Serial No. 748,121. 12 Claims. (Cl. 260—7.)



1. The process which comprises polymerizing solvents containing polymerizable constituents of the coumarone and indene classes and before all the polymerizable constituents have been polymerized diluting the mixture with a sufficient amount of a non-neutralizing diluent for the polymerizing agent to arrest polymerization.

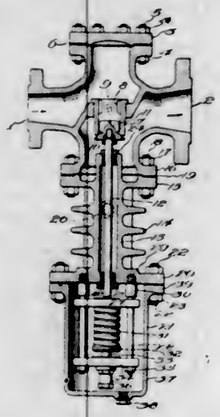
1,679,215. FLUID REGULATOR. OTTO B. GOLDKAMP, San Diego, Calif., assignor of one-half to San Diego Consolidated Gas and Electric Company, San Diego, Calif., a Corporation of California, and one-fourth to Selmar R. Siebert, San Diego, Calif. Filed May 19, 1924. Serial No. 714,382. 8 Claims. (Cl. 50—10.)

1. In a fluid regulator, a fluid conducting means, a valve member shiftably mounted therein, a Venturi means positioned in said fluid conducting means, a vacuum chamber member provided on one side with a diaphragm whose axis is disposed at right angles to the axis of said valve member, the interior of said chamber member communicating with said fluid conducting means at said Venturi means, lever and link means operatively connecting said diaphragm with said valve member, a pressure chamber member communicating with said fluid conducting means between said valve member and said Venturi means and provided on one side with a diaphragm in spaced parallel relation with said first diaparagm, and a link means connecting said last mentioned diaphragm with said lever and link means.



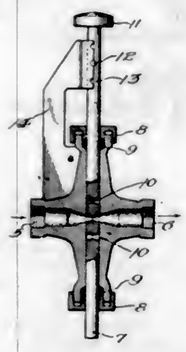
1,679,216. GREASE CUP. MARION J. HENRY, Kansas City, Kans. Filed Aug. 6, 1927. Serial No. 211,170. 3 Claims. (Cl. 184—48.)

1. A grease cup having a discharge opening, a rotary plug fitted in and having threaded connection with said cup, a U shaped member having one arm fastened to



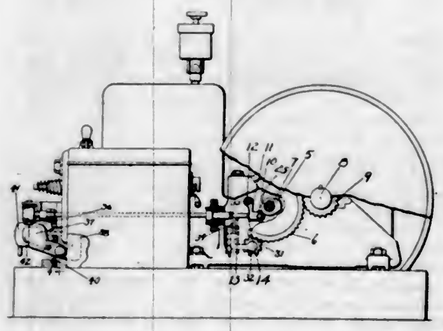
and movable with said plug and having its other arm revoluble around and movable lengthwise of said cup with said plug, and means on said cup adapted to be yieldingly engaged by said other arm for releasably limiting the rotation of said plug.

1,679,217. MANUFACTURE OF CYLINDRICAL CASTINGS AND THE LIKE. ALBERT JOHN HOAGLIND, Villa Park, Ill., assignor to National Malleable and Steel Castings Company, Cleveland, Ohio, a Corporation of Ohio. Filed Feb. 16, 1924. Serial No. 693,176. 5 Claims. (Cl. 22—24.)



1. Apparatus for forming cylindrical impressions in sand, which comprises a bed plate having a shaft extending longitudinally therethrough, pattern parts of cylindrical shape arranged along the shaft, the bed plate having an aperture conforming to the longitudinal cross sectional shape of the patterns, a pattern part immovable with regard to the plate carrying marking characters arranged to impart marking impressions to the sand, a flask mounted on the plate, the pattern parts on the shaft arranged on actuation by the shaft to be rotated out of the flask and below the face of the bed plate to free the pattern from the corresponding impressions in the sand formed by the patterns and the plate carrying marking characters being freed from its impressions by a movement of translation.

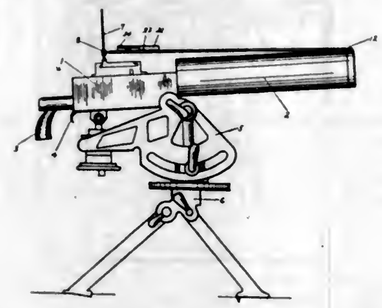
1,679,218. SAFETY OR AUTOMATIC RELEASE VALVE. LYMAN C. HUFF, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed Feb. 5, 1925. Serial No. 6,940. 2 Claims. (Cl. 137—53.)



1. In an unloading valve having inlet and outlet, the combination with a vertically movable valve normally contacting with a valve seat, a stem depending vertically below the valve and connected therewith, a cooling chamber, having an inlet for the introduction of cooling liquid enclosing said stem, an adjustable tension coil spring depending below the stem, a cooling chamber enclosing said spring, and means for admitting a cooling liquid thereto, the valve and stem being adapted to compress the spring when the pressure exerted on the valve overcomes the predetermined adjusted tension of the spring.

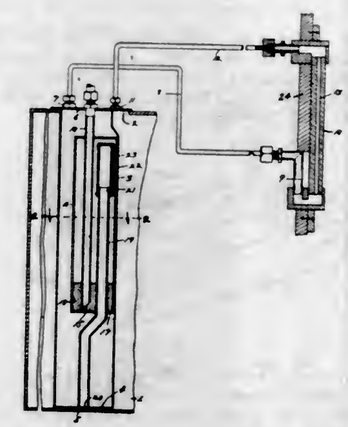
1,679,219. MULTIORIFICE VALVE. LYMAN C. HUFF, Chicago, Ill., assignor to Universal Oil Products Company, Chicago, Ill., a Corporation of South Dakota. Filed Feb. 11, 1925. Serial No. 8,350. 2 Claims. (Cl. 251—51.)

1. In valves, the combination with a chamber having an inlet and an outlet each converging to a common diameter, of a slidable stem in said chamber, a plurality of orifices of different sizes in said stem, each of said orifices being so formed that the edges of each orifice will coincide with the inlet and outlet whereby no shoulder is presented at the juncture of the inlet and outlet with the orifices, said inlet and outlet tapering inwardly adjacent said orifices to present an unbroken smooth surface, and means for locking said stem in any adjusted position, comprising a notched bracket on said valve chamber for receiving projections on said slidable stem.



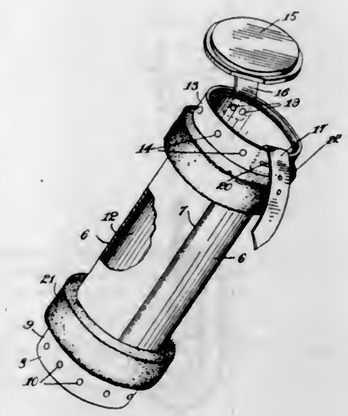
1,679,220. IGNITION SYSTEM. CHARLES B. JAHNKE, Beloit, Wis., assignor to Fairbanks, Morse & Co., Chicago, Ill., a Corporation of Illinois. Filed Oct. 9, 1924. Serial No. 742,630. 10 Claims. (Cl. 123—152.)

1. In an ignition system, a valve-operating device having a rod, electrical contacts about said rod, one of said contacts being carried by a bearing element for said rod



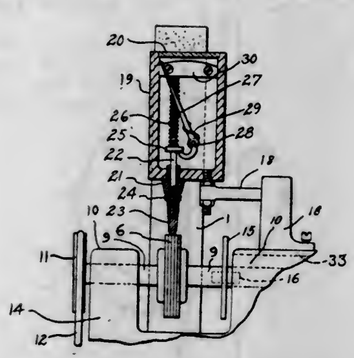
and adapted to serve as a motion-limiting means therefor, and means operated by said valve-operating device for periodically making electrical connection between said contacts.

1,679,221. SIGHTING ATTACHMENT FOR GUNS. RICHARD W. KELM, Binghamton, N. Y. Filed Nov. 21, 1927. Serial No. 234,714. 3 Claims. (Cl. 33—53.)



1. In combination with the front sight and a vertically adjustable rear sight of a gun, a sighting attachment extending between such sights and attachable thereto for adjustment with said rear sight, and a level for indicating the horizontal position of said attachment.

1,679,222. DEPTH-INDICATING DEVICE. HORACE W. KING, Ann Arbor, Mich., assignor to King-Seeley Corporation, Ann Arbor, Mich., a Corporation of Michigan. Filed Aug. 30, 1919. Serial No. 230,799. Renewed Feb. 10, 1922. Serial No. 535,619. 6 Claims. (Cl. 73—54.)

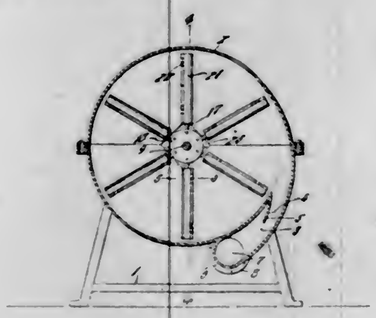


1. In a depth indicating device for liquids, the combination with a closed tank containing a liquid, of a tube extending into the liquid and communicating therewith at the full depth to be mensured, a second tube adapted for the passage of air under pressure and extending into said first-mentioned tube, means communicating with the interior of said first mentioned tube and containing a liquid at the lower end of said second tube for closing the same, and means connected to said first mentioned tube and said tank above the level of the liquid contained therein for indicating the differences in air pressures in said first mentioned tube and in said tank above the level of the liquid contained therein.

1,679,223. PNEUMATIC DISPATCH CARRIER. DANIEL J. MACMILLAN, Brooklyn, N. Y. Filed May 2, 1927. Serial No. 188,071. 15 Claims. (Cl. 243—35.)

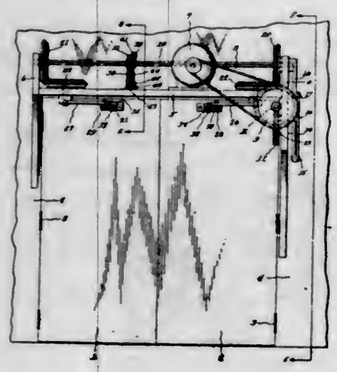
1. A pneumatic dispatch carrier comprising a cylinder formed of leather, a closure for one end of the carrier that is secured to the leather cylinder, an inner tube composed of a cylinder of comparatively rigid fiber secured to the leather cylinder, and a closure for the open end of the carrier.

1,679,224. EDGING MACHINE. ALBERT E. MAYNARD, Southbridge, Mass., assignor to American Optical Company, Southbridge, Mass., a Voluntary Association of Massachusetts. Filed Oct. 16, 1919. Serial No. 331,058. 2 Claims. (Cl. 33—172.)



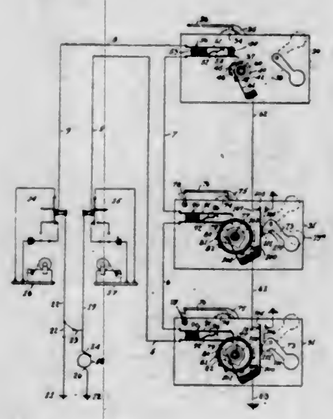
1. In a device of the character described, lens clamps, means for rotating the lens clamps, a reciprocating rod adapted to engage the edge of a lens held in the lens clamps, a spring encircling the reciprocating rod, adapted to hold the rod against the edge of the lens, an extension on the reciprocating rod, a pivoted bell crank pointer member having a portion engaging the extension on the rod, an arm extending from the pivot on the side opposite from the portion engaging the rod, and a pointer point offset at right angles to the arm, an arcuate scale plate centered about the pivot of the pointer member and underlying the offset pointer, and indications on the scale under the pointer to indicate the movement of the pointer point when the rod is reciprocated.

1,679,225. PIPE CUTTER. JOHN D. MERRIFIELD, Erie, Pa., assignor to Reed Manufacturing Company, Erie, Pa., a Corporation of Pennsylvania. Filed Feb. 19, 1923. Serial No. 619,882. 1 Claim. (Cl. 81—192.)



In a pipe cutter, the combination of a shank of rectangular cross-section having integral top, bottom and side walls with a longitudinal cavity within the walls"; a cutter head slidingly mounted on the shank; a nose extending from the shank and having a slot opening on the inner surface of the nose, said slot communicating with the opening in the shank and forming a means of communication to the opening through which a core forming the opening may be supported; and cutter wheels arranged in the slot and mounted in the nose.

1,679,226. AIR COMPRESSOR. JOHN R. MITRO, Kincaid, Ill. Filed July 24, 1925. Serial No. 45,878. 1 Claim. (Cl. 230—133.)



A casing of cylindrical formation for a centrifugal air compressor, said casing having an offset side merging into a duct at the air outlet of the casing, and the inner wall provided by the opening having an angle flange extending into the duct, the end wall of the duct being rounded and merging into the casing and having an outlet at one side thereof, and a nozzle connected to the outlet and whereby the air forced by the compressor into the duct will contact with the end wall thereof, the backward rush of air will be resisted by the flange into the duct to prevent the reentrance thereof into the casing and the air caussd to circulate in the duct will be forcibly ejected through the nozzle.

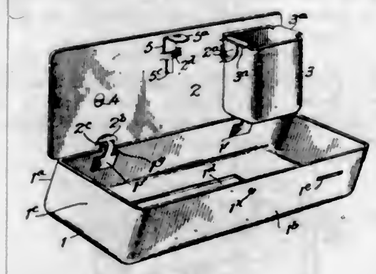
1,679,227. DOOR-HANDLING MECHANISM. JOSEPH S. NEFCZESAUSKAS, Cleveland, Ohio. Filed Jan. 25, 1922. Serial No. 531,756. 1 Claim. (Cl. 268—63.)

Door opening and closing mechanism, comprising bracket means arranged in close proximity to the door opening and extending across the top and along the sides of the same, an operating motor mounted on the top portion of said bracket means, crank arms extending along and mounted in one side portion of said bracket means, operative connections between said motor and crank arms, a shaft mounted in the side portions of said bracket means and extending across the top portion thereof, and crank arms for the door having operative connections through the top portion of said bracket means with said operating shaft, said parts being so constructed and arranged as to effect opening and closing of the door by operation of the motor in the same direction.

1,679,228. METHOD AND APPARATUS FOR TESTING SIGNALING SYSTEMS. JAMES G. NOLEN, New York, N. Y., assignor to Robert L. McElroy, Charlottesville, Va. Filed Dec. 11, 1924. Serial No. 755,214. 12 Claims. (Cl. 177—367.)

1. In combination, a main line; a signal receiving device and a generator in said line; a master transmitter and normally wound individual transmitters interposed in said line; a secondary line passing said individual transmitters; said master transmitter including means adapted to connect the main line with the secondary line and to send testing signal current through the latter; and a switch in each individual transmitter for completing the secondary line when the transmitter is wound and breaking the secondary line when the transmitter is unwound.

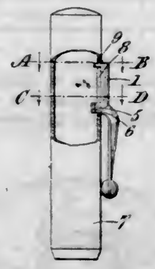
1,679,229. LOCKING SAFETY PIN. PEDRO RIOSECO, New York, N. Y. Filed Mar. 19, 1927. Serial No. 176,777. 3 Claims. (Cl. 24—156.)



1. An article of the character described comprising, a pin portion and a guard, said pin portion being crimped adjacent its point, and said guard including a channel portion, part of which channel portion is bent at angles more acute than those of the crimped pin portion so as not to substantially conform thereto.

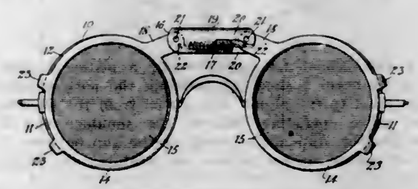
1,679,230. PURIFICATION OF INDANTHRENE. DONALD G. ROGERS, Buffalo, N. Y., assignor to National Aniline & Chemical Company, Inc., New York, N. Y., a Corporation of New York. Filed Mar. 8, 1923. Serial No. 623,732. 9 Claims. (Cl. 260—31.)

1. In the process of making N-dihydro-1,2-1',2'-anthraquinonazine by subjecting 2-aminoanthraquinone to the action of molten caustic potash wherein a fused reaction-mass is obtained, the steps which comprise dissolving said fused mass in water and crystallizing the alkali metal salt of the leuco dye from the resulting solution.



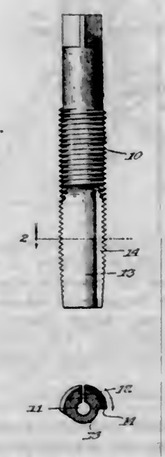
1,679,231. COMBINATION HOLDER FOR RAZOR BLADES AND PAPER. HOWARD B. SHERMAN and DONALD P. ORDWAY, Battle Creek, Mich., assignors to American Stamping Co., Battle Creek, Mich., a Corporation of Michigan. Filed Sept. 17, 1925. Serial No. 56,944. 4 Claims. (Cl. 206—1.)

1. A holder for used razor blades comprising a hollow casing closed at top, bottom, each end and one side, and open at the other side, and having a slot in its wall for the entry of used blades; a plate forming a closure for the open side of the casing, and a blade receiver detachably attached to the said closure plate and positioned beneath the said blade receiving slot when the closure plate is attached to the casing.



1,679,232. FOUNTAIN-PEN AND PENCIL CLIP. JULIUS SHUBE, Chingford, England. Filed Dec. 21, 1926. Serial No. 156,179, and in Great Britain Dec. 30, 1925. 4 Claims. (Cl. 24—11.)

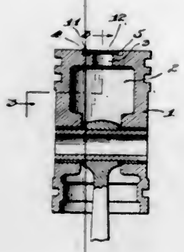
1. In a fountain pen, the combination with a pen cap having a slot through its wall, of a clip formed with portions extending inwardly toward each other from opposite edges of the clip and then bent outwardly away from each other to form hooks, said hooks adapted to be inserted through the slot in the pen with the clip at



right angles to the longitudinal axis of the cap, and said hooks engaged under the edges of the slot with the clip turned to normal position on the cap.

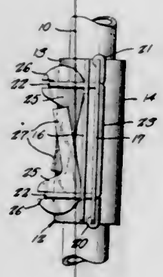
1,679,233. ATTACHMENT FOR OPHTHALMIC MOUNTINGS. LEO STRAUSS, Far Rockaway, N. Y. Filed Feb. 24, 1927. Serial No. 170,589. 6 Claims. (Cl. 88—41.)

1. An ophthalmic device comprising a pair of lens frames, a bridge member, means connecting the bridge member with said lens frames so as to permit the frames to be moved with respect to each other to be juxtaposed side by side, or edge to edge in the same plane, and means connected with the frames and having a normal tendency to urge the frames to the side by-side relationship.



1,679,234. THREAD-CUTTING TAP. OLOF A. A. TENOW, Chicago, Ill., assignor of one-half to Justus P. Seeburg. Filed Aug. 13, 1926. Serial No. 128,976. 5 Claims. (Cl.10—141.)

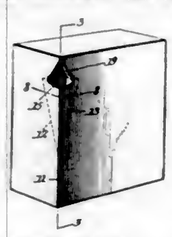
1. A thread-cutting tap having a thread-cutting portion with a portion thereof at one side of its axis extending lengthwise of the tap cut away to provide cutting edges.



said tap being slotted lengthwise thereof at the other side of its axis, with the slot so disposed that the cutting edge portions of the tap move toward the axis thereof when encountering the resistance of relatively hard portions of the work.

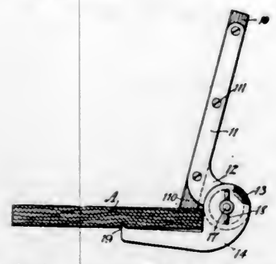
1,679,235. VALVE CONSTRUCTION. HARRY E. THOMPSON, Detroit, Mich., assignor to Universal Cooler Corporation, Detroit, Mich., a Corporation of Michigan. Filed Oct. 13, 1927. Serial No. 225,880. 6 Claims. (Cl. 230—221.)

1. A valve construction comprising a piston having a port in its head, a shoulder bounding the port, a bridge member fixed to the piston and spaced from the shoulder, a disk valve operating between the shoulder and the bridge member, and means bridging the gap between the shoulder and the bridge member for retaining and guiding the valve.



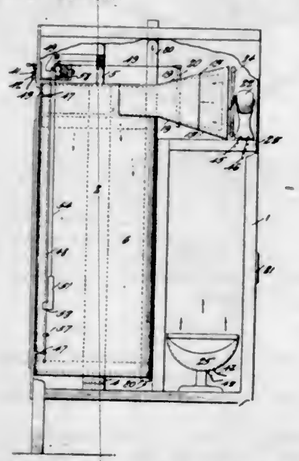
1,679,236. PIPE PATCH. JAMES L. WILSON and THOMAS GARRARD VICARS, Pineville, Ky. Filed Aug. 24, 1927. Serial No. 215,198. 2 Claims. (Cl. 24—19.)

1. In a device of the character described, a pair of semi-cylindrical members hinged together at one edge, radial flanges extending from the opposite edges, loops extending from one of said flanges and adapted to be received in apertures in the other flange adapted to receive said loops projecting therethrough, and cam members on said loops adapted to draw the flanges together.



1,679,237. DISPENSING DEVICE. HARRY A. BIRNBAUM, Troy, N. Y., assignor of one-half to Alan S. Cobden, Troy, N. Y. Filed June 23, 1827. Serial No. 200,897. 12 Claims. (Cl. 229—17.)

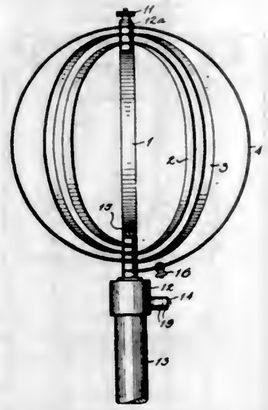
2. A container of the class described having a corner section, a trough associated with the inner face of said section, and arranged to receive a certain quantity of the material in said container, the outer face of said



section having a normally closed cut-out portion adapted when forced inwardly to form a communicating opening with said trough.

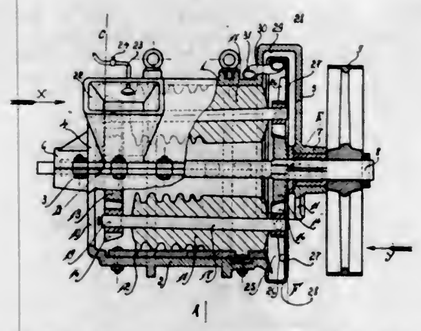
1,679,238. SEAT BACK. HENRY A. BOIES, Middlebury, Vt. Filed Apr. 4, 1927. Serial No. 180,819. 2 Claims. (Cl. 155—133.)

1. A seat back, comprising a back member, a pair of end members secured to said back member at the side edges thereof, said side members having rearward extensions at their lower ends, a clamp for each of said side members extending forwardly, and means adjustably connecting said extensions to said clamps, the lower portion of said back member below said elements thereon being adapted to bind against the top of a seat board to which the seat back is secured so as to coact with the clamps in holding the seat back in position on the seat board.



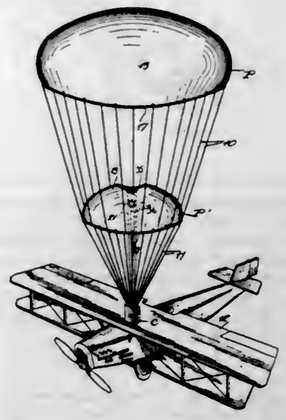
1,679,239. PHOTOGRAPHIC-FILM DRIER. HENRI CASSEREAU, Mexico City, Mexico. Filed Sept. 3, 1927, Serial No. 217,380, and in Mexico Sept. 29, 1926. 15 Claims. (Cl. 34—26.)

1. In a film drier, a reversely-rotatable film carrier, gaseous pressure means for rotating said carrier, means



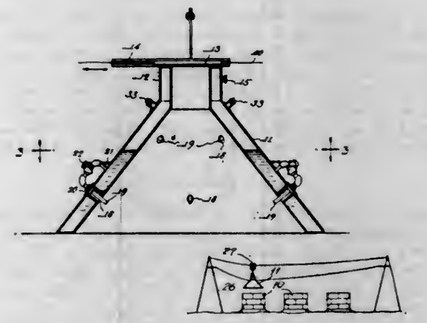
for directing such gas under pressure over the films as a drying medium, and means controlled by the rotation of the carrier for governing the direction of rotation.

1,679,240. ANTENNA. HENRY CSANYI, New York, N. Y. Filed Nov. 16, 1926. Serial No. 148,655. 6 Claims. (Cl. 250—33.)



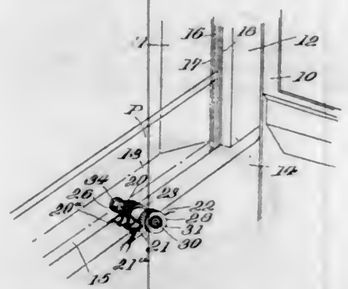
1. An antenna comprising a plurality of similar helical convolutions in series conductivity and pivoted together to swing into a common plane or into a plurality of intersecting planes.

1,679,241. GRINDING AND MIXING APPARATUS. MICHEL DAVID, Jemeppe sur Meuse, Belgium. Filed Sept. 28, 1925, Serial No. 59,202, and in Belgium Oct. 2, 1924. 8 Claims. (Cl. 83—9.)



1. In an apparatus for the purpose set forth, the combination comprising a stationary cylindrical jacket, means for supplying material to be treated thereto, means for discharging treated material therefrom, and means cooperating with said jacket, said means comprising a plurality of rollers, one of said rollers having a helical groove extending from its feed end toward its discharge end and decreasing in depth from feed end toward discharge end and having a portion adjacent the discharge end of smooth conical shape, another of said rollers being of similar construction but its grooved and smooth portions being reversed in position and the direction of its helical groove the reverse of that of the first mentioned roller so that the action of the one in the axial movement of the material being treated will be opposed by the action of the other, and another roller having an annularly grooved portion and a smooth conical portion, its grooved portion being adjacent the feed end of the jacket and formed with a plurality of annular grooves decreasing in depth toward the smooth portion, said grooved portion serving to progressively crush the material being treated without moving it axially.

1,679,242. PARACHUTE. FRIEDRICH WILHELM DENDA, Cleveland, Ohio. Filed Nov. 20, 1926. Serial No. 149,608. Renewed Mar. 30, 1928. 7 Claims. (Cl. 244—21.)



1. In combination, a container, a plurality of flexibly connected parachutes adapted to be stowed in superimposed relation within the container when collapsed, a spring associated with each parachute for projecting it out of the container, and means engageable with the uppermost parachute for releasably retaining said parachutes within the container against the action of their projecting springs.

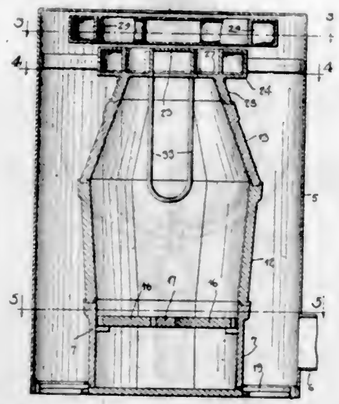
1,679,243. FIRE EXTINGUISHER. DOMINICK FASUL, New York, N. Y. Filed June 11, 1927. Serial No. 198,099. 10 Claims. (Cl. 169—4.)

1. An apparatus of the class described including a generally frusto conical cap including spaced conical walls, the space between the walls being adapted to serve as a steam and water chamber, said chamber being closed at its top and bottom, steam pipes tapping the chamber and steam nozzles connected to the steam pipes and discharging interiorly of the cap, the pipes tapping the outer wall of the cap, and the cap having passageways therein extending through said walls and space through which the nozzles project.

1,679,244. ANTIRATTLER. PATRICK J. FITZGERALD, Torrington, Conn., assignor to The Fitzgerald Manufacturing Company, Torrington, Conn., a Corporation of Connecticut. Filed Nov. 8, 1926. Serial No. 147,033. 7 Claims. (Cl. 292—75.)

1. In a quick detachable anti-rattler for sliding panes movable into and out of a pocket casing, a friction member to engage the pane, means to resiliently force said member and therewith the pane toward one wall of said pocket, clamping devices to detachably engage the faces of the other wall of the pocket to support said member and means, and adjustment means to permit regulation of the distance from said clamping devices to the contact portion of said friction member.

1,679,245. APPARATUS FOR PREVENTING DISTURBANCES OF THE STATE OF HEALTH DUE TO SEESAW AND ROTARY MOTIONS. GUSTAV GAERTNER, Vienna, Austria, assignor of one-half to the Firm Joh. Kremenezky, Vienna, Austria. Filed May 9, 1927, Serial No. 189,998, and in Austria July 29, 1926. 2 Claims. (Cl. 174—89.)



1. In apparatus for preventing mal de mer and dizziness from rotational motions and the like, a headset including a resilient frame, electrodes of similar polarity carried at the opposite sides thereof adapted to press against the sides of the head, and a third electrode of opposite polarity in circuit with the first-named electrodes, and with an electrical source, said third electrode being adapted also to make contact with some part of the body.

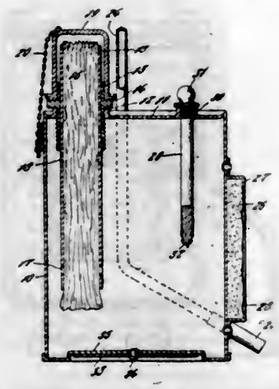
1,679,246. RECOVERY OF INSOLUBLE UREA FORMALDEHYDE RESINS. ALPHONSE GAMS and GUSTAV WIDMER, Basel, Switzerland, assignors to the Firm "Society of Chemical Industry in Basle," Basel, Switzerland. Filed Jan. 4, 1926, Serial No. 79,262, and in Switzerland Jan. 17, 1925. 4 Claims. (Cl. 260—3.)

1. A process of converting insoluble condensation products of urea and formaldehyde into a soluble form, by heating the product with aqueous formaldehyde under pressure.

1,679,247. HOT-AIR FURNACE. GABRIEL HATVANI, Medina, Ohio. Filed July 8, 1926. Serial No. 121,176. 2 Claims. (Cl. 126—99.)

1. In a hot air furnace, a casing, an inner shell spaced from the casing and forming an ash pit, a fire pot and a combustion chamber, means to facilitate supply of cold air into the bottom of the casing and the exit of hot air from the top of the casing about said shell, and a heat radiator in the top of the casing including a horizontal ring-like smoke conduit communicating with the top of the inner shell and adapted for connection with a chimney, an annular flange depending from the heat radiator and mounted on the upper edge of the wall of the combustion chamber for supporting the radiator in position, said heat radiator further comprising a central smoke dome arranged concentrically within the ring-like smoke conduit

and communicating at its rear side with the rear portion of said smoke conduit, a forward smoke box for the conduit, and a superposed horizontal smoke conduit communicating at its forward side with the upper portion of the smoke box and adapted for connection at its rear side, said upper smoke conduit comprising a horizontal ring-like smoke drum of larger diameter than the first named smoke conduit and spaced therefrom vertically and concentrically to permit the flow of air to be heated thereover.

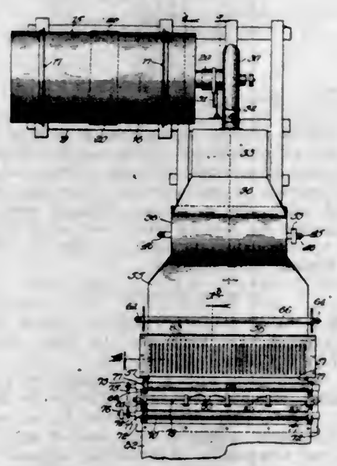


1,679,248. PROCESS OF MAKING CORNER BEADS AND NAIL SPACERS. CHARLES E. KEAS, Los Angeles, Calif., assignor, by direct and mesne assignments, to Economy Products Corporation, Los Angeles, Calif. Filed Oct. 2, 1925. Serial No. 59,991. 2 Claims. (Cl. 153—2.)

1. The process of making a corner bead which consists in stamping a strip of sheet metal to form two rows of openings therethrough, and bending the same longitudinally between said rows of openings to form a corner bead, the part cut out from each opening being designed to be folded into a nail spacer, said openings being of rectangular form with the corners extended slightly in the line of one of the sides to form spaced lugs on said part to be bridged by the head of a nail, substantially as shown and described.

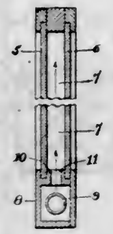
1,679,249. SOLDERING TORCH. JOHN J. LAWLESS, Atlantic City, N. J. Filed Apr. 28, 1927. Serial No. 187,312. 1 Claim. (Cl. 158—35.)

In a torch of the character described, a casing serving as a fuel reservoir, a thimble detachably mounted within the top of the casing, a guide slidably mounted within the thimble, a wick within the guide, and a blow-tube mounted exteriorly upon the casing in longitudinal relation thereto and having one end closed and terminating



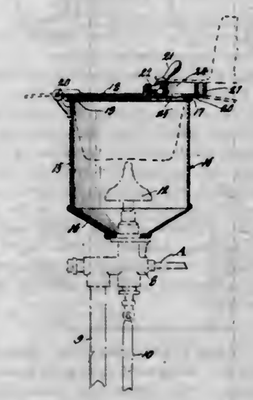
adjacent the wick, said tube being formed in its side toward the wick with an air discharge opening whereby a current of air may be forced transversely of the flame at the wick.

1,679,250. UREASE PREPARATION. OTTO LIND, Dusseldorf, Germany. Filed Sept. 3, 1927, Serial No. 217,527, and in Germany Sept. 15, 1926. 4 Claims. (Cl. 167—4.)



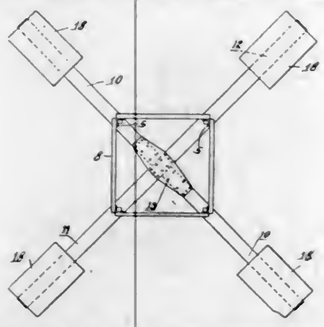
2. A method for making stable, easily soluble, light-colored, dry urease preparations which consists in extracting urease-containing vegetable with water, adding alkali-metal phosphates to the aqueous extract and atomizing such extract into a dry and heated gas stream to free it from water.

1,679,251. BODY FORMED OF SEPARATE FIBERS. HARVEY B. LINDSAY, Oakland, Calif., assignor to Dry Zero Corporation, Wilmington, Del., a Corporation of Delaware. Filed Jan. 22, 1925. Serial No. 4,018. 4 Claims. (Cl. 19—144.)



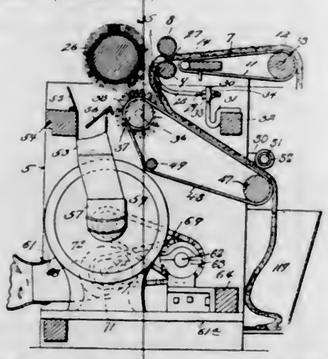
1. A body of thermal insulating material comprising kapok fibers with the greater portion thereof extending from end to end generally in the same direction.

1,679,252. WINDSHIELD FOR AUTOMOBILES. MARY A. LOCKWOOD, Margaretville, N. Y. Filed Apr. 5, 1926. Serial No. 99,996. 1 Claim. (Cl. 20—40.5.)



A device of the character described comprising, a frame embodying a base, a pair of side members and a top member, said base being hollow and having a detachable side, and being provided in its upper wall with a longitudinal groove, a longitudinal recess adjacent the detachable side and a longitudinal slot disposed between said groove and recess, said side members having reduced upper ends to form shoulders thereon and being formed with grooves corresponding to the first mentioned groove, transparent panes slidable in the grooves of the side members to seat in the groove and recess in said base, securing strips seated on said shoulders extending in parallel relation to said top member, and being formed with recesses to receive therein the upper edges of said panes, and a heating coil disposed in said base co-extensive with the slot in the upper wall thereof.

1,679,253. COMBINATION STEAM CHAMBER. SPIROS C. MARKATOS, New York, N. Y. Original application filed June 12, 1923, Serial No. 644,980. Divided and this application filed Oct. 21, 1925. Serial No. 64,052. 3 Claims. (Cl. 223—26.)

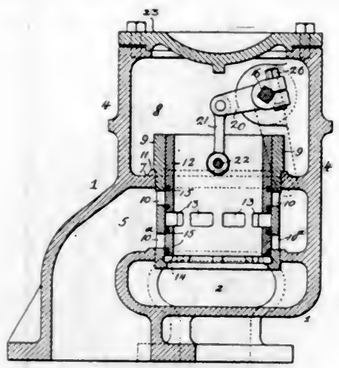


1. In a hat steaming apparatus, a steam chamber for receiving the crown of a hat to be steamed, a cover for closing the chamber after the crown has been steamed, and a laterally projecting brim steaming collar carried by the cover having communication with the chamber.

1,679,254. SUPPORT FOR THE PYLONS OF STAGING AND THE LIKE. CHARLES PIERRE MASSON, Nancy, France. Filed May 27, 1927, Serial No. 194,826, and in France June 10, 1926. 4 Claims. (Cl. 189—21.)

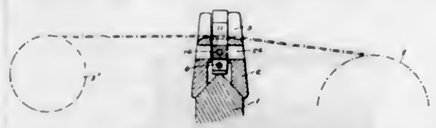
1. A supporting base for pylons, comprising a cruciform iron member resting directly on the ground and to the limbs of which the uprights of the pylon are bolted at points removed from the intersection of said limbs; and weighting devices resting on the ends of the limbs of the cruciform member to render the entire structure stable.

1,679,255. MACHINE FOR TREATING BLANKETS OR FABRICS. JOHN MCCREARY and EDWARD J. MCCREARY, Cohoes, N. Y. Filed Sept. 4, 1925. Serial No. 54,470. 10 Claims. (Cl. 26—37.)



1. In a machine of the class specified, a brushing cylinder, means for feeding a fabric to and holding the fabric in close relation to the said cylinder for napping, delivery means for the treated fabric from the cylinder including downwardly inclined endless belts for moving the treated fabric towards and out through the front of the machine, and yieldingly mounted rollers disposed over and bearing on said belts near the transverse center of the fabric and exerting downward pressure on the fabric and the belts and acting as a holding means for the short length of fabric engaged thereby to maintain the full length of the fabric in regular engagement with the delivery means until relensed from the latter.

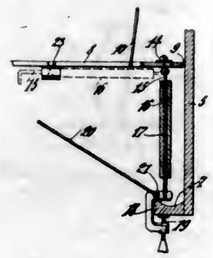
1,679,256. PURIFYING ORGANIC LIQUID. CARL MÜLLER, Mannheim, WALTER FRANKENBURGER, Ludwigshafen-on-the-Rhine, and FRIEDRICH GRASSNER, Mannheim, Germany, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany, a Corporation of Germany. Filed Aug. 17, 1925, Serial No. 50,850, and in Germany Aug. 30, 1924. 3 Claims. (Cl. 260—156.)



1. A process of removing metal carbonyl from organic liquids containing less than about 10 per cent thereof which consists in exposing the liquid to the action of ultra-violet rays.

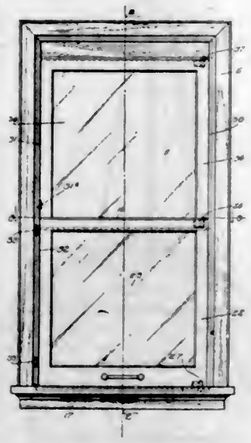
1,679,257. THROTTLE VALVE. LAWRENCE L. NEEBE, Woodbury, N. J. Filed Aug. 10, 1926. Serial No. 128,444. 1 Claim. (Cl. 251—78.)

The combination in a smoke-box throttle-valve, of a valve-casing having a transverse passage at its lower end arranged to be coupled to a super-heater, and having a central extension in which is a passage leading to the cylinders, said two passages being separated by a horizontal partition; a chamber above the passage leading to the cylinders and separated from said chamber by a second partition; a bushing extending through both partitions and having two sets of ports therein, one set being above the other set; a cylindrical valve located in the bushing and having a single series of ports arranged to align with the upper series of ports in the bushing when the valve is raised, the lower end of the valve opening the lower series of ports; an operating shaft; an arm on said shaft; and a link connecting the arm with the valve.



1,679,258. THREAD CLEANER. EUGENE C. NEU, Ridgefield, N. J., assignor to The Schwarzenbach-Huber Company, Union City, N. J., a Corporation of New Jersey. Filed Oct. 28, 1927. Serial No. 229,391. 4 Claims. (Cl. 28—70.)

1. A thread cleaner, comprising a pair of cleaning blades, one of said blades having a notch therein near one end, a spacing blade arranged between said blades, a block secured to said spacing blade and extending into said notch, and means for clamping said cleaning blades against the spacing blade, said notch being of a size to accommodate said block whereby the block will not be brought under tension.

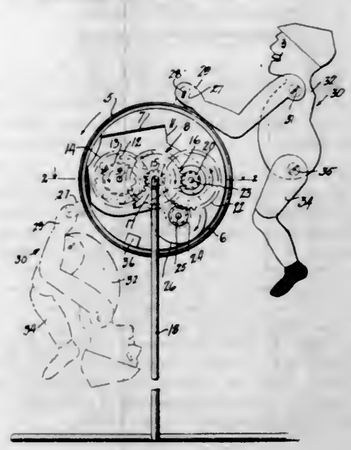


1,679,259. SUPPORTING DEVICE. HUGO NEWMAN, New York, N. Y. Filed Oct. 12, 1926. Serial No. 141,177. 5 Claims. (Cl. 45—51.)

2. In combination with a fixed structure, a supporting member, clamping devices adapted to be detachably engaged with a part of said structure, an adjustable means detachably connected with each of said clamping devices and attached to said member adjacent one end thereof, a bracing member pivotally connected with said clamping devices and means for adjustably pivoting said member to the supporting member adjacent the opposite end thereof, and an additional bracing member pivotally connected with the supporting member adjacent its first named end and adapted for detachable connection to another part of sad structure, sad adjustable means adapted to be detached from said clamping de-

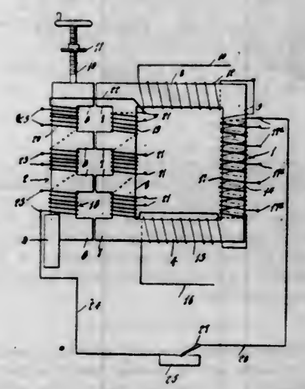
vices to permit the supporting member to be pivotally moved relative to said bracing members to a collapsed position closely adjacent to said structure.

1,679,260. WINDOW STRUCTURE. NICCOLA NICOLAI, Chicago, Ill. Filed Apr. 12, 1926. Serial No. 101,369. 7 Claims. (Cl. 20—48.)



1. The combination of a window-frame, upper and lower frames movable up and down in said window-frame, guides on said window-frame for said upper and lower frames, window-sashes mounted in said upper and lower frames and movable relative thereto, and removable stops on said window-frame for said sashes for holding the latter against displacement in the frames in which they are mounted.

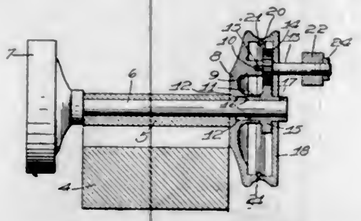
1,679,261. MULTIGRAPH TYPE. JOSEPH C. NORWOOD, San Francisco, Calif. Filed May 31, 1927. Serial No. 195,355. 1 Claim. (Cl. 101—396.)



A type slug for use in a printing machine having a bed plate provided with transverse type-receiving slots, comprising a type bearing member, a web portion having its inner extremity flared outwardly and rearwardly to form cam surfaces, a connecting body portion adapted to be removed therefrom, said body portion having cam surfaces formed parallel to said first mentioned cam surfaces, and being cut away substantially half of its width to form a shoulder substantially parallel with the head of the type bearing member and a cam surface parallel with one of said first mentioned cam surfaces.

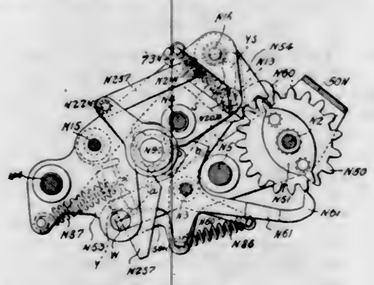
1,679,262. MECHANICAL CLOWN TOY. HARRY A. OKEL, Pleasanton, W. Va., assignor to The Ferdinand Strauss Corporation, New York, N. Y., a Corporation of New York. Filed June 21, 1927. Serial No. 200,317. 4 Claims. (Cl. 46—40.)

1. In a toy of the nature described, a support, a drum rotatably mounted thereon, a motor in the drum for rotating same about the support, and a jointed figure swingingly suspended from the drum adapted to perform acrobatic stunts substantially as described when the drum is rotated.



1,679,263. TRANSFORMER FOR ELECTRIC ARC CUTTING, REPAIRING, AND WELDING APPARATUS. FREDERICK C. OWEN, Fayetteville, N. C. Filed Apr. 19, 1927. Serial No. 185,010. 6 Claims. (Cl. 171—119.)

1. A transformer comprising a core embodying relatively fixed and adjustable sections, a primary winding, a secondary winding embodying main and auxiliary coils,



the auxiliary coil embodying sections of which one is mounted on the fixed and the other on the adjustable core section, and means for moving the adjustable core section with respect to the fixed core section.

1,679,264. TRANSMISSION GEARING. ROBERT C. PARKER, La Porte, Ind., assignor of forty one-hundredths to Wilbur D. Cram, La Porte, Ind. Filed Aug. 13, 1927. Serial No. 212,677. 5 Claims. (Cl. 74—34.)

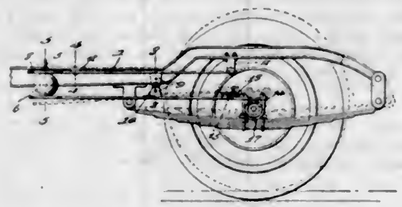
1. A transmission gearing comprising a driven shaft, a casing member mounted on said shaft and revolvable with respect thereto, a stub shaft carried by the revolvable casing member and provided with a bore, a gear fixedly secured to said shaft, a second gear in mesh with said first gear, a crank pin rigidly secured to said second gear on one side thereof, a trunnion secured to said second-named gear on the opposite side thereof and arranged to enter the bore in said stub shaft, a second casing member secured to said first-named casing member for enclosing said gears, said second-named casing member being provided with an opening for the passage of the crank pin, and a connecting rod rigidly secured to said crank pin on the exterior of the casing.

1,679,265. ADDING AND SUBTRACTING ACCUMULATOR. NATHAN W. PERKINS, East Orange, and EMIL JOHN ENS, Newark, N. J., assignors to Ellis Adding Typewriter Company, Newark, N. J., a Corporation of New Jersey. Filed Oct. 19, 1926. Serial No. 142,580. 10 Claims. (Cl. 235—60.)

1. In an adding and subtracting mechanism, the combination with accumulator wheels, of a reciprocatory carrying device for each accumulator wheel, and a single, rockable adding and subtracting controlling mechanism for each wheel adapted to co-operate with the carrying device thereof to shift it in one direction or the other, whereby carrying may be effected either in an adding or a subtracting operation.

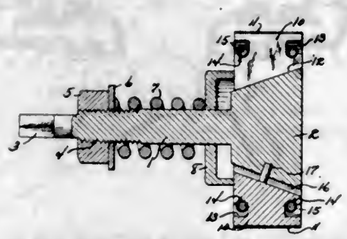
1,679,266. FASTENER. RION C. PLACE, Detroit, Mich., assignor of one-half to George E. Gagnier, Detroit, Mich. Filed Nov. 25, 1927. Serial No. 235,638. 11 Claims. (Cl. 24—106.)

1. A spring fastener complete in itself comprising a head, a pair of arms secured to said head, and a resilient holding element carried by each of said arms and extending away from said head, said holding elements being disposed in a plane normal to said head and arranged normally in divergent relation to each other but being



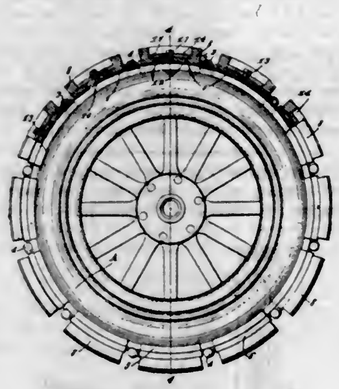
capable of being brought into approximate side by side arrangement in opposition to the torsion set up in said arms, whereby said torsion tends to firmly return said elements to their divergent position.

1,679,267. COMBINED WALKING STICK AND TRIPOD. CLARA RIEGER, Reutlingen, Germany. Filed Sept. 10, 1927. Serial No. 218,769, and in Germany Sept. 10, 1926. 6 Claims. (Cl. 248—44.)



1. A triped stick comprising in combination an outer casing, a hollow semi-cylindrical tube adapted to slide therein, a head on said tube, and two telescopic legs articulated to said head, the said legs being exteriorily of semi-cylindrical shape and adapted to fit against the interior surface of said semi-cylindrical tube.

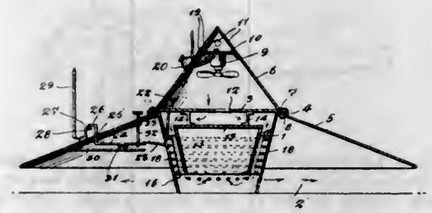
1,679,268. SHOCK ABSORBER. TOM A. RIGNEY, Laurel, Mont. Filed Jan. 19, 1927. Serial No. 162,094. 1 Claim. (Cl. 267—31.)



A shock absorber for a vehicle comprising a supporting bar, means for connecting the bar to a part of the vehicle, a pneumatic sphere carried by one end of the supporting bar, a lever pivoted to the supporting bar and having one end engaging the sphere, the other end of the lever having an elongated eye formed thereon, a plate, a pivot pin carried by the plate and passing through the eye and means for fastening the plate to an axle of the vehicle.

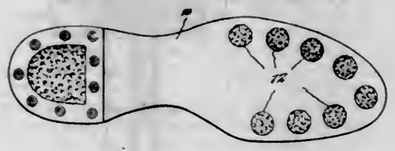
1,679,269. SECTIONAL ABRASIVE REAMER. RALPH S. RODGERS, Pittsburgh, Pa., assignor of one-fourth to James E. Harmon and one-fourth to Ike J. Nelson, Pittsburgh, Pa. Filed Jan. 27, 1926. Serial No. 84,229. 1 Claim. (Cl. 51—206.)

A reamer, comprising a cone carrying shank, a reamer head comprising a circular member having an abrasive face and made up of segments the inner faces of said segments being complemental to and resting against the cone, said segments having continuous sockets in their end faces spaced from the outer abrasive faces thereof, endless coiled springs received in said sockets, means holding the segments from circumferential movement on the cone, but permitting longitudinal movement thereof, a flanged collar on the shank contacting with the segments, a nut screwed on the shank, a helical spring on the shank, contacting with the collar and a washer engaged by the nut and contacted by the spring.



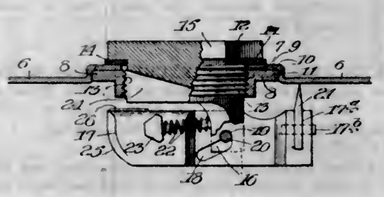
1,679,270. ANTISKID DEVICE FOR AUTOMOBILES. IGNATZ ROLKA, Gallitzin, Pa. Filed Sept. 12, 1927. Serial No. 219,142. 2 Claims. (Cl. 152—16.)

1. An anti-skid device of the character described comprising a plurality of sections hingedly secured together to encircle a vehicle tire, a base member included in each section, a recessed elastic block for each base member, projection carrying means arranged in the recesses of the blocks, and means for securing the projection carrying members and blocks respectively to the base members thereof.



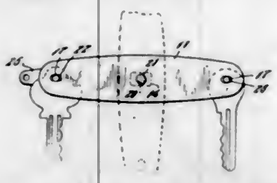
1,679,271. BROODER. WILLIAM CROCKER SANCTUARY and WENDELL ALBERT JONES, Amherst, Mass. Filed June 14, 1924. Serial No. 720,010. 3 Claims. (Cl. 119—33.)

1. A brooder comprising a frusto-conical heater drum disposed in inverted position, a cover plate for said heater drum, said cover plate extending at its marginal edge beyond said heater drum, a frusto-conical hover plate surrounding said heater drum and attached to the extending marginal portion of said cover plate, said cover plate having a central opening and said heater drum



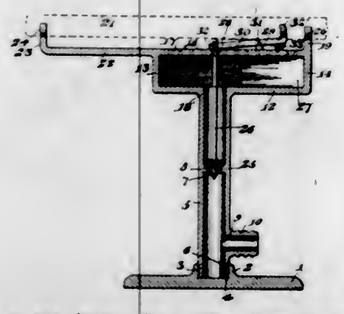
having an outlet adjacent to its lower end, a heating element disposed in said heater drum, and means disposed above said cover plate for forcing air through said central opening of the cover plate into and through said heater drum.

1,679,272. HEEL. FREDERICK A. SCHULTZ, Hasbrouck Heights, N. J. Filed Dec. 31, 1925. Serial No. 78,605. 1 Claim. (Cl. 36—59.)



A heel tread section comprising a heel shaped body formed of yieldable material, and having an open pocket located therein, a pad of relatively softer yieldable material carried in said pocket, said body portion having a series of fastener receiving sockets formed therein and surrounding the pocket, a non-yielding element embedded in said body portion, completely surrounding the pocket, and having openings coinciding with the sockets in the body portion for the reception of said fasteners, whereby the body portion will be reinforced and said pad will be retained in said pocket.

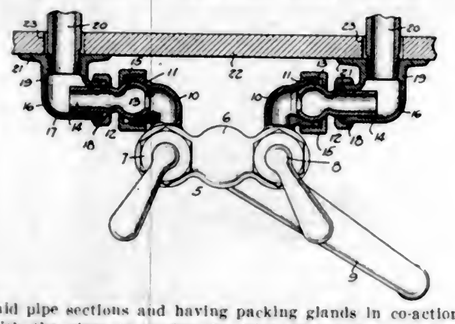
1,679,273. CONTAINER. SAUL SCHWARTZ, Chicago, Ill., assignor to Henry Schwartz, Chicago, Ill. Filed June 11, 1927. Serial No. 198,241. 16 Claims. (Cl. 220—48.)



1. The combination with a container having a threaded opening, of a threaded closure-plug for said opening provided with means operating upon the unscrewing of said plug to mutilate the portion of the container in which said threaded opening is provided beyond the thread thereof.

1,679,274. KEY CONTAINER. DOUGLAS SETTLE, San Diego, Calif. Filed Aug. 10, 1927. Serial No. 212,037. 3 Claims. (Cl. 59—96.)

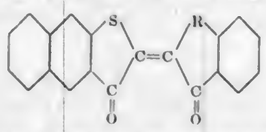
2. A key container comprising a pair of spring plates, a spacing member extending from and having one of its ends secured to one of said plates and its other end having a pivotal connection with the other plate, and key posts at opposite ends of and secured to one of said plates and having a detachable connection with the other of said plates.



1,679,275. CURLING-IRON HEATER. JOHN T. SHOEMAKER, Flint, Mich., assignor, by direct and mesne assignments, to Flint Automatic Heater Company, a Corporation of Michigan. Filed Oct. 29, 1926. Serial No. 145,027. 2 Claims. (Cl. 126—238.)

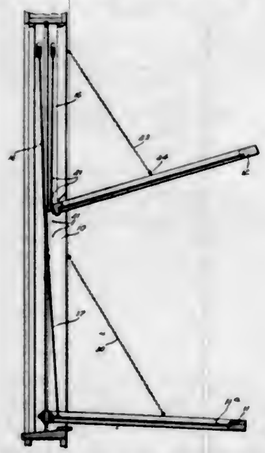
1. In a gas heater for curling irons including a burner element formed with a gas receiving chamber having an opening in its top wall, a gas supply means opening into the chamber through the bottom wall thereof and provided with a valve seat, the combination of a valve stem extending through said opening and chamber and into said gas supply means and provided at its inner end with a valve coacting with said seat, a lever arranged over the top wall of said chamber, a pin and slot connection between the said lever and the outer end of said stem above said top wall, means for pivotally connecting said lever at a point between its transverse median and its outer end to said top wall, a tool engaging portion extending upwardly from the outer end of said lever and carried by the latter, and a controlling spring interposed between the outer end of said lever and said top wall.

1,679,276. PLUMBING FIXTURE. HENRY W. SLINING, Los Angeles, Calif., assignor to Republic Brass & Mfg. Co., Los Angeles, Calif., a Corporation of California. Filed Oct. 27, 1926. Serial No. 144,524. 1 Claim. (Cl. 277—52.)



A fixture formed with a mixing chamber and provided with integral elbows having flared terminal seats opening, respectively, in opposite directions, each elbow formed with an external thread outwardly of its flared seat, coupling sleeves adjustable on the threads of said elbows, pipe sections extending through the sleeves and having apertured ball portions mounted in the respective sockets and adapted to be brought into water-tight frictional contact with the walls of the sockets when the coupling sleeves are adjusted in one direction, the pipe sections adapted to be tilted with respect to said elbows, and elbows mounted for longitudinal sliding movement on

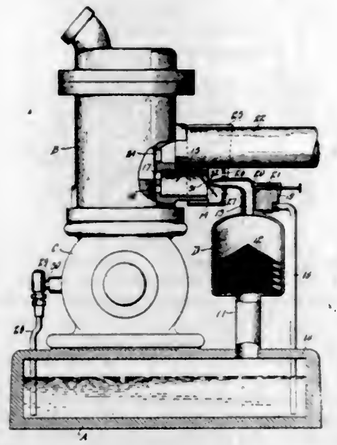
said pipe sections and having packing glands in co-action with the pipes to render the joints therebetween water-tight.



1,679,277. INDIGOID DYESTUFF. HERMANN STAUDINGER, Zurich, RICHARD TOBLER and ROBERT STOCKER, Basel, JAKOB MÜLLER, Munchenstein, near Basel, and ARMIN BUCHER, Basel, Switzerland, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Filed Nov. 24, 1923, Serial No. 676,858, and in Switzerland Dec. 7, 1922. 9 Claims. (Cl. 260—53.)

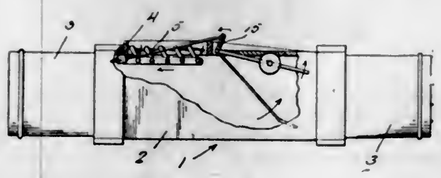
3. As new products the unsymmetrical indigoid dyestuffs which are characterized by the atom grouping

wherein the naphthalene nucleus is halogenized, R standing for NH or S and in which the benzene nucleus may carry substituents, which dyestuffs form red-violet to brown-black and green-blue powders which dissolve in concentrated sulfuric acid with red-violet to blue and olive green color, yielding with hydrosulfite and caustic soda solution yellow to orange and brown vats which dye cotton fast red-violet to green-blue tints.



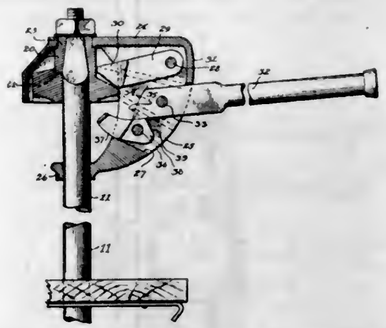
1,679,278. WINDOW CONSTRUCTION. JACOB SUTER, West New York, N. J. Filed Mar. 18, 1927. Serial No. 176,506. 2 Claims. (Cl. 20—43.)

1. A window including a frame, upper and lower sliding sashes therein, parting strips and moulding strips guiding



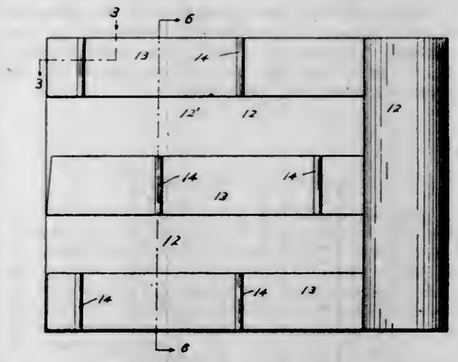
the sliding movement of the sashes and including lower removable sections to permit the sashes to be swung inwardly, means for holding the sashes in inwardly and upwardly swung position when the lower strip sections are removed, including levers pivoted to the inner face of the frame and swinging inwardly under the upwardly swung sashes in planes parallel to the planes of sliding movement of the sashes.

1,679,279. CHARGE-FORMING DEVICE. IRA T. SWARTZ, Indianapolis, Ind., assignor, by mesne assignments, to Ira T. Swartz, trustee, Indianapolis, Ind. Filed June 30, 1920. Serial No. 393,116. 8 Claims. (Cl. 123—134.)



1. An apparatus for forming combustible gas comprising a liquid fuel tank, a crank-case and a motor disposed one above the other, means of communication between the cylinder of said motor and said crank-case and between said crank-case and said fuel tank, a gas-dome connected with the top of said tank, a nozzle leading from said gas-dome to a mixing chamber, a pipe leading to said nozzle from within the bottom of said fuel tank, and means for varying simultaneously the supply of fuel from said nozzle and the supply of air from the outside to said mixing chamber, substantially as set forth.

1,679,280. COTTON REGULATOR. EUGENE S. TOWNS, Pharr, Tex. Filed Aug. 4, 1927. Serial No. 210,577. 5 Claims. (Cl. 19—72.)

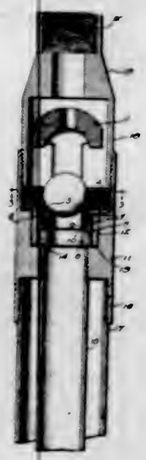


1. A cotton regulator for use in association with a cotton gin comprising a suction conduit thru which the cotton is adapted to flow, said conduit provided with an air inlet port for retaining a substantially constant mixture of air and cotton in these conduits, and means for producing said constant mixture embodying a control valve for said air port which is automatically operated by the amount of cotton passing through said conduit.

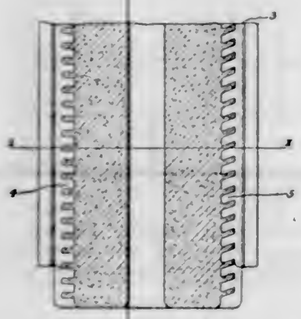
1,679,281. SAFETY REVERSE RATCHET BRAKE. GEORGE VAN BRIMER, HOMER A. MAGRATH, JOHN KLANCHER, and BURL SOOTS, Pueblo, Colo. Filed Jan. 23, 1926. Serial No. 83,333. 3 Claims. (Cl. 74—54.)

1. In a mechanism for the purpose described, a rotatable shaft, a bracket rotatably mounted on said shaft, right hand and left hand ratchets fixed on the shaft, a pawl pivoted to said bracket and movable into and out of engagement with the first ratchet, a second pawl also pivoted to the bracket and movable into and out of engagement with the second ratchet, and a lever pivoted between said pawls on said bracket to swing in a plane radially of the shaft, said lever having a short end which, in its lowered position, engages the under side of the first said pawl forward of its pivot to lift it out of engagement with the ratchet and bears laterally against the second pawl rearward of its pivot to swing it up into engagement with the ratchet, and said lever, when swung into its uppermost position, disengages both pawls, whereby the first pawl drops into engagement with its ratchet and the second pawl drops away from its ratchet.

1,679,282. WALL CONSTRUCTION. GEORGE F. VOIGHT, Oakland, Calif., assignor to Economy Products Corporation, a Corporation of California. Filed July 26, 1922. Serial No. 577,595. 3 Claims. (Cl. 72—120.)



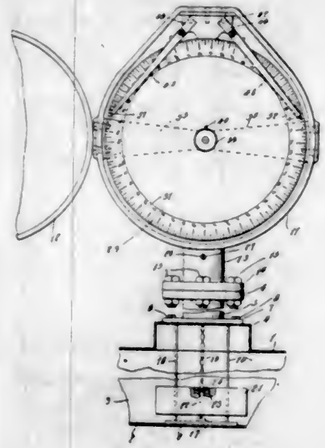
2. In means of the character described, a sheathing paper having an inner layer with an outer layer in separated strips, said strips being corrugated to form spacing ribs.



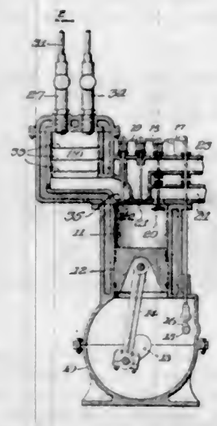
1,679,283. VALVE FOR OIL PUMPS. LOUIE F. WELLS and OLIVER C. WHITLING, Bryant, Okla. Filed May 10, 1924. Serial No. 712,482. 1 Claim. (Cl. 251—121.)

In a well pump, the combination with a collar having an internally threaded bore enlarged at its upper end defining a stop shoulder, of a standing valve including a

sleeve externally threaded in the enlarged portion of the bore and having its lower end seating against the shoulder and a cage above the sleeve, the sleeve being internally reduced at its upper end defining a stop shoulder and provided with internal threads below the shoulder, a removable valve seat including a ring and an outwardly extending rib at a point equidistant its ends fitted against the shoulder in the sleeve, a tubular retaining member threaded into the sleeve against the rib and having an enlarged opening at its upper end to snugly receive the portion of said ring below the rib, the lower end of said retaining member being seated on the shoulder of said collar, and a ball valve for the seat.

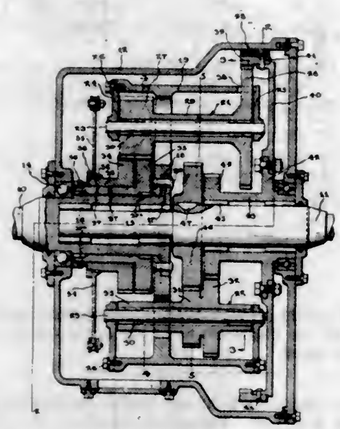


1,679,284. PROCESS FOR PRODUCTION OF SELF-BAKING ELECTRODES. JENS WESTLY, Christiansand, Norway, assignor to Det Norske Aktieselskab for Elektrokemisk Industri of Norway, Oslo, Norway. Filed Jan. 5, 1925, Serial No. 712, and in Norway Jan. 17, 1924. 9 Claims. (Cl. 266—1.6.)



1. A selfbaking electrode having a mantle of one composition, non detrimental to the process in connection with which the electrode is being used, and internally projecting ribs of another composition attached to said mantle.

1,679,285. GAUGE AND RECORDER. HENRY F. WRIGHT, Huntington, Calif. Filed Apr. 14, 1927. Serial No. 183,737. 7 Claims. (Cl. 234—10.)



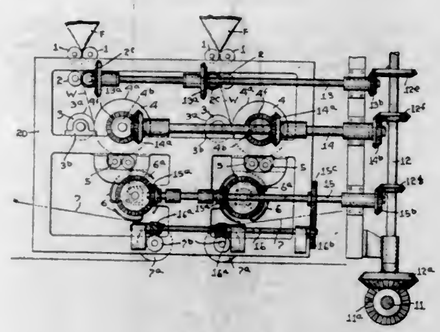
1. A device of the character set forth, comprising a support, a dial rotatably mounted on the support, a float, means establishing an operative connection between the dial and float, a chart carried by the dial, markers mounted for swinging movement with respect to the chart and for movement into and out of operative position with respect to the chart, means adapted during the movement of the dial in one direction to hold one of the markers in inoperative position and adapted during the movement of the dial in the opposite direction to hold the other marker in inoperative position and means for swinging the marker in operative position.

1,679,286. INTERNAL-COMBUSTION ENGINE. WLADIMIR M. ZAIKOWSKY, Pasadena, Calif., assignor to Standard Oil Development Company, a Corporation of Delaware. Filed Oct. 24, 1925. Serial No. 64,544. 5 Claims. (Cl. 123—1.)

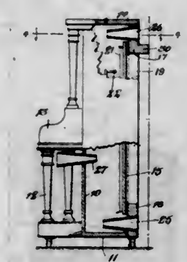
1. The method of operating a reciprocating internal combustion engine having a cylinder comprising compressing the charge partly in the cylinder and partly in a chamber connected thereto, and feeding a liquid to be vaporized to said chamber whereby the vaporization of said liquid will cool the charge in said chamber, and causing said chamber to communicate with said cylinder on the compression stroke only, said chamber receiving a substantial portion of the charge.

1,679,287. TRANSMISSION. ZENO ALEXANDER, Kansas City, Mo. Filed Dec. 20, 1927. Serial No. 241,357. 10 Claims. (Cl. 74—34.)

1. A transmission comprising driving and driven members, a planet carrier operatively connected with the driving member, a rotary member, sets of planetary gears of which one set operatively connects the driven member and the rotary member and the other set is operatively connected with the rotary member, and a governor operatively connected with said other set to control the axial rotation of the same.



1,679,288. WEATHERPROOF SIGN. GEORGE H. ALLEN, Clinton, N. Y. Filed Nov. 19, 1926. Serial No. 149,489. 3 Claims. (Cl. 40—135.)



1. A weatherproof sign consisting of a translucent sheet and an opaque sign sheet having sign characters cut therefrom, the two sheets being superimposed and impregnated and coated with a waterproof coating which unites them.

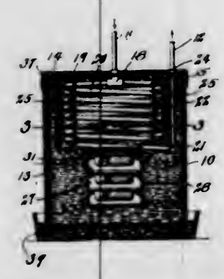
1,679,289. CHANGEABLE ROTARY FOLDER. HENRY F. BECHMAN, Battle Creek, Mich., assignor to Duplex Printing Press Company, Battle Creek, Mich., a Corporation of Michigan. Filed Sept. 13, 1924, Serial No. 737,552. Renewed Feb. 9, 1928. 6 Claims. (Cl. 270—76.)

1. A rotary folder having cutting and folding cylinders interchangeable with like cutting and folding cylinders of different size in order to cut and fold different lengths of sheets; means for relatively adjusting the cylinders in the folder according to their size; second fold rolls adapted to receive the sheets from the folding cylinder; and means for adjusting the second fold rolls in accordance with the size of the folding cylinder.

1,679,290. UPRIGHT PIANO. VETAL BESSIER, Brooklyn, N. Y. Filed May 15, 1926. Serial No. 109,887. 9 Claims. (Cl. 84—189.)

3. An upright piano casing including a sounding board arranged at the rear portion thereof, and means providing passageways for the sound waves to escape from the space in the interior of the casing forwardly of the sounding board including amplifying horns extending through the back of the casing below and above the sounding board, and having their inner ends disposed in front of the sounding board.

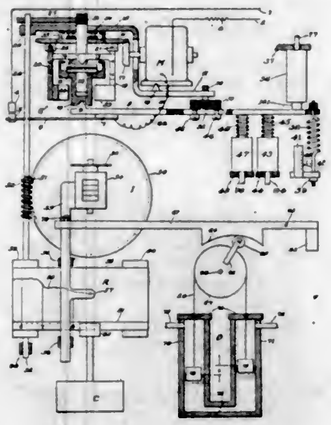
1,679,291. CUSHIONING HANDLE FOR PNEUMATIC TOOLS. STANLEY BYERS, Bedford, Ind. Filed June 17, 1926. Serial No. 116,699. 1 Claim. (Cl. 121—36.)



In combination with a pneumatic tool having a barrel, a piston reciprocable in the barrel and having an impact member at its forward end, said barrel having a socket, a bit having a portion of its shank receivable in the socket and adapted to be engaged with the impact member of the piston when pressed inwardly, a combined casing and handle enclosing the barrel and having a socket receiving a portion of the shank of the bit, releasable means co-operable with the bit for holding it in inoper-

ative position out of the field of action of the impact member of the hammer, and a spring engaging the barrel of the hammer and the bit to urge the bit outwardly out

of the field of operation of the impact member of the hammer until and unless the bit is pressed against the work.

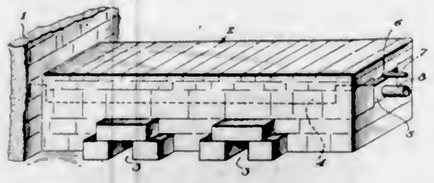


1,679,292. COOLING TANK. JOHN O. CARREY, St. Louis, Mo., assignor to Carrey-Morse Engineering Company, St. Louis, Mo., a Corporation of Missouri. Filed Mar. 27, 1924. Serial No. 702,363. 1 Claims. (Cl. 62—95.)

1. A cooling tank for refrigerating systems comprising an open topped container, a removable cover therefor, an expansion coil secured to and extending from said cover into said container, an inlet and an outlet connection for said expansion coil, a horizontally disposed sump arranged below said coil and connected to the discharge end of said expansion coil and said outlet connection and a fibrous covering for said tank, said covering being kept saturated with a non-freezing medium to prevent formation of ice and snow on said tank.

1,679,293. METER. CLARENCE A. DAWLEY, Plainfield, N. J. Filed Nov. 13, 1923. Serial No. 674,531. 3 Claims. (Cl. 73—167.)

3. In a flow meter for variable density fluids, a displaceable member, means under the influence of the fluid density and tending to displace said member, a member displaceably opposed to said first named member, a motor, a centrifugal member driven by the motor and operatively

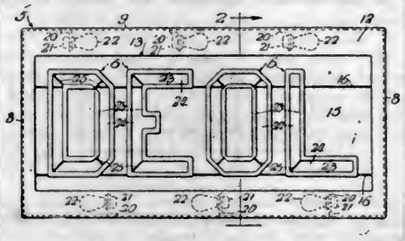


connected to said displaceably opposed member, and means governed by the displacement of the latter for controlling the motor speed.

1,679,294. TREATMENT OF ORES OF COPPER AND OTHER METALS. FERDINAND DIETZSCH, Kingston-on-Thames, England. Filed Oct. 31, 1927. Serial No. 230,170, and in Great Britain July 7, 1926. 4 Claims. (Cl. 75—18.)

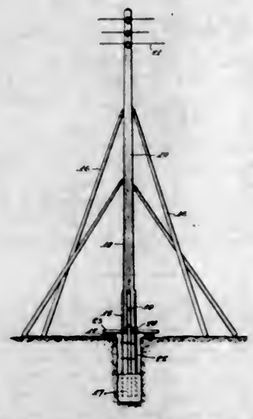
4. A process for treating copper sulphide ores, which consists in mixing the ore with an alkali sulphate in proportion not exceeding 2 per cent of the weight of the ore, roasting the mixture, and finally extracting the values.

1,679,295. BRIDGE WALL FOR GLASS TANKS. ALFRED W. DODGE, Zanesville, Ohio, assignor to Hazel-Atlas Glass Co., Wheeling, W. Va., a Corporation of West Virginia. Filed Jan. 13, 1927. Serial No. 160 918. 14 Claims. (Cl. 49—54.)



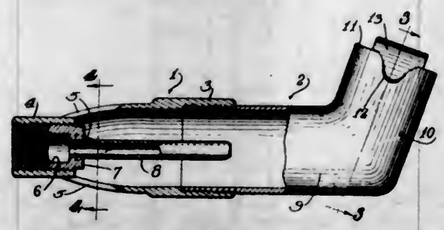
1. A bridge wall for glass tanks, having a trough in the interior thereof, the side walls and bottom of said trough formed of the refractory material of the bridge wall, and means for circulating cooling water in said trough in contact with the refractory material.

1,679,296. ILLUMINATED SIGN AND LETTER THEREFOR. CHARLES B. EHNBORN, Glen Ellyn, Ill., assignor to Thomas Cusack Company, Chicago, Ill., a Corporation of New Jersey. Filed Apr. 24, 1924. Serial No. 708,618. 2 Claims. (Cl. 40—133.)



1. An illuminated sign comprising in combination, an open front casing having a light reflecting background, vertically spaced rods extending longitudinally of the open front of the casing, letter members re-

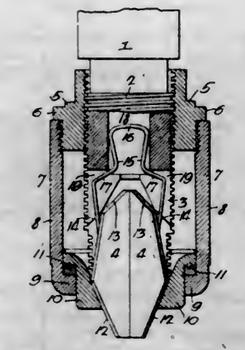
movably supported and longitudinally shiftable on said rods, each letter member including spaced strips defining



the out-line of a letter in contrast to said light reflecting back-ground, and concealed means in the casing for illuminating said light reflecting back-ground.

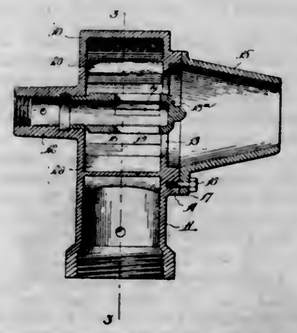
1,679,297. METHOD AND APPARATUS FOR PLACING POLES. ALBERT EHRLER, New York, N. Y. Filed Feb. 20, 1925. Serial No. 10,669. 3 Claims. (Cl. 72—83.)

1. The combination with a pole, of a concrete base for the pole, a plurality of channel bars having their lower ends embedded in the base, and their upper ends projecting from the base and secured to the pole, one of the upper end portions of said bars being in two sections, and means for securing the sections together above the ground, said means consisting of a plate in the channel of the sections and screws or bolts passing through the plate and sections into the pole.



1,679,298. GAS BURNER. SILAS M. EVANS, Sand Springs, Okla. Filed Apr. 5, 1927. Serial No. 181,192. 4 Claims. (Cl. 158—99.)

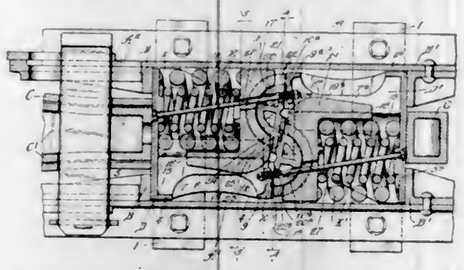
1. In a burner of the character described, a burner body comprising a gas and air mixer section and a burner tip section, said mixer section having air inlet openings in its side wall, a gas nozzle inclosed therein, the burner tip section being in the form of an elbow



a pair of outwardly divergent plates at the outlet end of the burner tip, the wall of the burner tip at its outer end being cut away and underlying the divergent plates to cause lateral projections of the flame jet, and the inner adjacent ends of the plates being spaced to permit an axial flame projection.

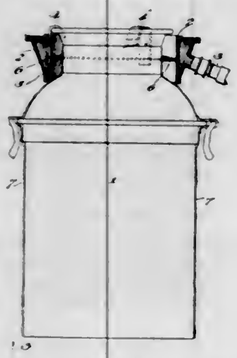
1,679,299. CHUCK. THOMAS J. FEGLEY and GEORGE O. LEOPOLD, Philadelphia, Pa., assignors to North Bros. M'f'g. Co., Philadelphia, Pa., a Corporation of Pennsylvania. Filed Aug. 31, 1923. Serial No. 660,358. 1 Claim. (Cl. 279—56.)

The combination in a chuck, of a body portion having an external screw-thread, and having a transverse slot at its outer end, the walls of the slot having inclined bearing portions, the body portion also having a central opening extending inwards from the slot; two jaws mounted in the slot, said jaws having beveled ends, the inner ends of the jaws arranged to slide on the inclined bearing portions of the body; a U-shaped spring having a reduced portion extending beyond the jaws and into the central opening, the arms of the spring having shoulders located in the inner portion of the transverse slot in the body and beyond the jaws and extending back of the jaws, said arms being connected to the jaws at their outer ends; a casing; a sleeve secured thereto, said sleeve being mounted on the threaded portion of the body; and a bearing carried by the casing and having a conical opening through which the beveled ends of the jaws extend.



1,679,300. BURNER. CARL FISCHER, West Homestead, Pa., assignor to American Heat Economy Bureau, Pittsburgh, Pa., a Corporation of Delaware. Filed Mar. 24, 1927. Serial No. 178,047. 6 Claims. (Cl. 158—99.)

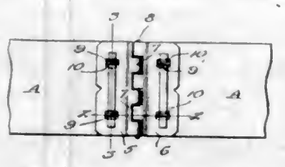
1. A burner comprising a body portion having a commingling chamber with fuel and air inlet openings leading into the same at right angles to each other and a



discharge opening in one side, a fuel discharging tube leading into the commingling chamber from the fuel inlet openings and having tangential discharge openings, a series of baffle-plates in the commingling chamber surrounding the fuel discharging tube, and a contracted nozzle attached to the body portion to receive the admixture of fuel and air from the discharge opening of the commingling chamber.

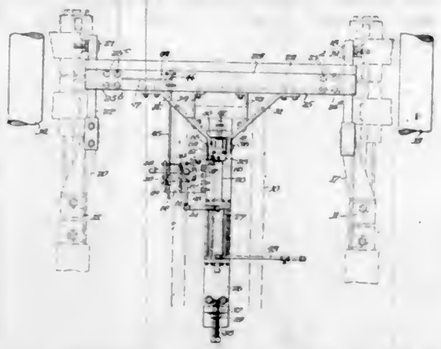
1,679,301. DRAFT GEAR. JOSEPH E. FORSYTH, Chicago, Ill., assignor to Forsyth Draft-Gear Corporation, a Corporation of Illinois. Filed Mar. 6, 1926. Serial No. 92,764. 4 Claims. (Cl. 213—27.)

1. In a draft-gear, the combination of a pair of opposed follower-blocks, each presenting an inner end bearing abutment and each carrying a coil-spring and a spring-cap, and a two-member rock-lever interposed between the spring-caps and the opposed bearing abutments of the follower-blocks.



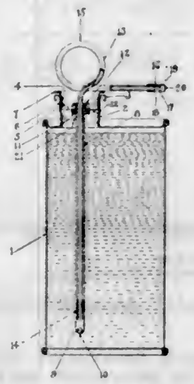
1,679,302. MILK-COOLING DEVICE. HERMAN J. FOSTER, Stowe, Vt. Filed Aug. 27, 1926. Serial No. 132,021. 2 Claims. (Cl. 257—189.)

2. A milk cooler comprising an annular reservoir including an inner wall and an outer wall through the latter of which water may be introduced, the inner wall provided with a circumferential row of perforations substantially midway its upper and lower edges whereby a continuous spray of water may be directed against and around the neck of a milk can, said inner wall also provided with clips to suspend the reservoir from the rim of the can neck and spaced from the said neck, said inner wall constituting a baffle to prevent entrance of the spray into the milk can.



1,679,303. BELT COUPLING. PHILLIP FRUHOF, Norfolk, Nebr. Filed Aug. 29, 1927. Serial No. 216,249. 2 Claims. (Cl. 24—33.)

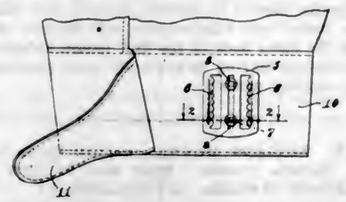
1. A belt coupling comprising a pair of members hingedly connected together, each member being formed with two limbs to receive a belt end between them, an eye forming member carried by one limb, the other limb having a slot therein to receive the eye forming member and the belt end also having a slot therein to receive



said member and a member adapted to be passed through the end of the eye forming member to hold the parts assembled.

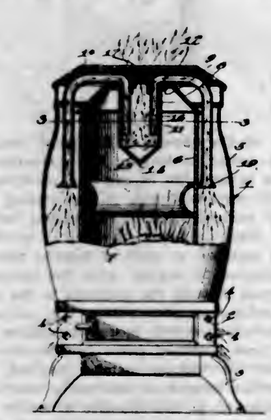
1,679,304. LOOPING AND GUIDING DEVICE FOR ROLLING MILLS. RANDOLPH B. HANCOCK, Gary, Ind. Filed Aug. 9, 1923. Serial No. 656,548. 15 Claims. (Cl. 80—51.)

1. In combination a pair of roll stands, a guide extending between said roll stands, the guide comprising a pair of separable members one of said members having a channel therein and means controlled by the passage of the bar through the said channel whereby the member having the channel therein is pulled away from the other member, the members being separable in a horizontal direction whereby clearance is allowed to a bar passing between the roll stands.



1,679,305. ATOMIZER. H. HOWARD HELLER, Sound Beach, Conn. Filed Aug. 23, 1921. Serial No. 494,535. 2 Claims. (Cl. 299—97.)

1. An atomizer for use with a container having a tapering nozzle comprising an air-vented recess-forming member adapted to be pushed into said nozzle and having

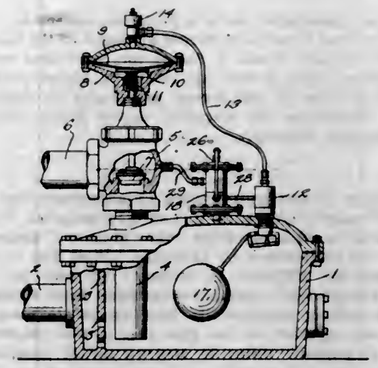


a rim to extend thereabove, an outer tube extending through said member, an inner tube adapted to reciprocate within the outer tube and provided with a piston at its lower end, separate devices exteriorly mounted on said outer tube fastening the same to said member one forming a guide for said outer tube, and means at the upper end of said inner tube for spraying liquid expelled therefrom by downward movement of the piston, said inner tube having a laterally projecting portion adapted to engage the rim of said member to limit such movement.

1,679,306. SLIDE BUCKLE. FRED HIRSH, New York, N. Y., assignor to Adjusta Company, New York, N. Y., a Corporation of New York. Filed Feb. 2, 1925. Serial No. 6,244. 3 Claims. (Cl. 24—169.)

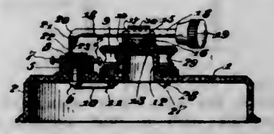
3. A buckle of the type described comprising a body pierced to form a plurality of transverse bars and intermediate slots, the inner edges of the two outer bars being notched and upset to provide inturned lips with blunt teeth, and, as means for its attachment, two rivets fixed in transverse spaced relationship centrally thereof.

1,679,307. AIR CIRCULATOR FOR STOVES. WILLIAM G. HUTCHISON, Portsmouth, Ohio. Filed Nov. 28, 1927. Serial No. 236,215. 3 Claims. (Cl. 126—67.)



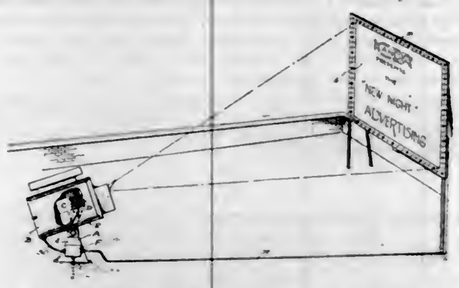
1. The combination with a stove having inner and outer spaced walls surrounding a fire box with an opening in its upper end; of a heated air circulator comprising a hollow body member, insertable through said opening and having means for supporting it therein, and a tubular arm associated with said body and having a free open end located in the space between the walls of the stove, said stove having air inlets between said walls.

1,679,308. METHOD OF PLATING METALS WITH ALUMINUM. FRANZ JORDAN, Wickede-on-the-Ruhr, Germany. Filed July 7, 1927, Serial No. 204,134, and in Germany Feb. 11, 1926. 1 Claim. (Cl. 29—189.)



The method of coating metal plates comprising feeding through rolls upper and lower continuous aluminum strips unwound from reels, introducing heated plates successively between the strips whereby both strips and plates are subjected to the pressure of the rolls to effect intimate cohesion between plates and strips whereby a continuous strip of compound metal stock is formed and separating the stock at points between the plates to form individual pieces of coated metal.

1,679,309. STEAM TRAP. HENRY W. JUSTUS, Napanoch, N. Y. Filed Apr. 28, 1927. Serial No. 187,241. 3 Claims. (Cl. 137—103.)

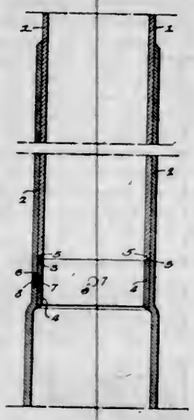


1. In combination with a steam trap and its controlling valve, means for normally holding the valve in open position, a diaphragm chamber associated with the valve, a diaphragm in the chamber, means for supplying steam to the diaphragm chamber from the trap to cause the diaphragm to close the valve, a float operated valve for controlling the supply of steam to the diaphragm chamber, a casing having an exhaust chamber and upper and lower diaphragm chambers therein and a passage connecting the exhaust chamber with the lower diaphragm chamber, a diaphragm in each diaphragm chamber, the lower chamber having its lower part in communication with the trap, means for placing the upper part of the top diaphragm chamber in communication with the passage, a valve for controlling communication between the passage and the exhaust chamber, stems on the valve engaging the upper and lower diaphragms and means for placing the passage in communication with the means for connecting the trap with the main diaphragm chamber above the float operated valve.

1,679,310. DETECTOR APPARATUS. ARTHUR ATWATER KENT, Ardmore, Pa. Filed May 28, 1923. Serial No. 641,835. 16 Claims. (Cl. 250—31.)

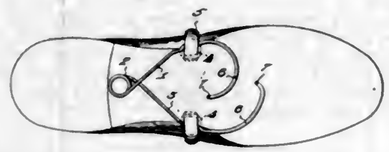
1. In a detector, a member rotatable in but one plane and having a groove in a face thereof, a rod disposed in said groove for longitudinal and rotative movement therein, and a detector element carried by said rod.

1,679,311. AUTOMATIC ADVERTISING PROJECTING AND DISPLAY APPARATUS. ADMIRAL S. KNOTT, Columbus, Ohio. Filed June 21, 1926. Serial No. 117,435. 5 Claims. (Cl. 88—24.)



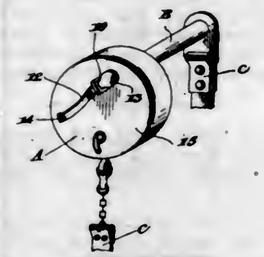
1. In combination with a projector screen, an incandescent lamp illuminated border arranged on the marginal surface of said screen, a flasher for controlling said incandescent lamp border, an automatic stereopticon projector focussed on said screen, and means for simultaneously controlling the operation of said flasher and said stereopticon projector.

1,679,312. SYNTHETIC RESIN AND METHOD OF MAKING SAME. GUSTAVE E. LANDT, Norristown, Pa., assignor to Diamond State Fibre Company, Bridgeport, Pa., a Corporation of Delaware. Filed Feb. 7, 1927. Serial No. 166,597. 12 Claims. (Cl. 260—4.)



1. The process of making a synthetic resin which comprises causing substantially pure xylenol to react with a second reactant of the type that is used in preparation of phenolic resins to give an initial condensation product which is capable of being converted by further heating into a hard, infusible, insoluble resin.

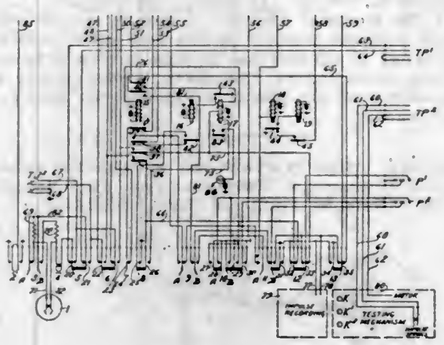
1,679,313. FLAGPOLE CONSTRUCTION. ARCHIBALD E. LINGO, Collingswood, N. J. Filed Apr. 28, 1925. Serial No. 26,514. 3 Claims. (Cl. 189—26.)



1. A sectional flag-pole construction, one section of which is provided with a ring adapted to form a shoulder, said ring and said section being recessed, and added metal in said recess welded to said ring and said section so as to rigidly secure the ring in position, another section of said pole being supported on said shoulder.

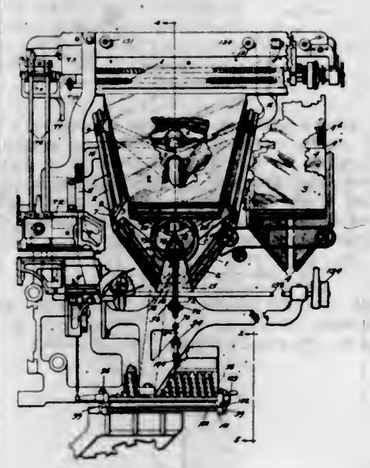
1,679,314. ANTISLIP DEVICE. JOHN B. LOCKER, St. Louis, Mo. Filed May 13, 1927. Serial No. 191,133. 1 Claim. (Cl. 36—59.)

An anti-slip device comprising a generally loop-shaped member having a pair of crossed spring arms and means thereon for engaging a shoe sole; said arms terminating at their forward ends in extensions curved forwardly and laterally inward in spaced relation and adapted to rest one under and adjacent the ball portion of a shoe sole and the other back of the first named extension, and both extensions having downwardly bent portions forming anti-slipping means.



1,679,315. SEALING MEANS. ARCHIE EDGAR LOW, Ottawa, Ontario, Canada. Filed Mar. 22, 1927. Serial No. 177,419. 9 Claims. (Cl. 292—307.)

1. A device of the character described comprising in combination, a casing, a locking bolt extending through and protruding beyond the casing and provided with an opening therethrough, openings in the casing, a locking member rigidly mounted within the casing between said openings and communicating therewith, spring locking means in said member, a strip of flexible metal formed with a seal adapted to engage with the opening in the bolt and to extend through the openings in the casing and through the locking member within the casing, and to travel freely in one direction, means formed on said strip adapted at a predetermined point in the travel thereof to engage with the locking member to lock the strip and means further formed on said strip adapted on the strip being tensioned in the opposite direction to engage with the locking member at two different points simultaneously to double lock the strip.



1,679,316. TESTING EQUIPMENT FOR AUTOMATIC TELEPHONE SYSTEMS. FRED T. MADSEN, Forest Park, Ill., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill., a Corporation of Delaware. Filed Oct. 15, 1924, Serial No. 743,660. Renewed May 28, 1927. 21 Claims. (Cl. 179—175.)

4. In a telephone exchange, a plurality of digit translating devices common to and controlled by a plurality of trunk circuits containing relays, a test mechanism, means for connecting said test mechanism to said translating

device in lieu of said trunk circuits, and means in said test mechanism for then controlling said translating device.

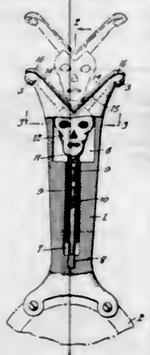
1,679,317. TYPOGRAPHICAL MACHINE. GEORGE E. MARLATT, Pasadena, Calif. Filed Mar. 24, 1922. Serial No. 546,383. 72 Claims. (Cl. 199—16.)

1. In a typographical machine, matrix magazines arranged in superposed groups about a common center, means for rotating the several groups about their center in order to render a selected group operative; a magazine-entrance channel-group movable to register with a selected magazine of a selected group, an assembler-entrance channel-group movable to register with a selected magazine of a selected group; means for moving said magazine-entrance channel-group and said assembler-entrance channel-group in unison for joint registry with a selected magazine; a vertical magazine mounted independently of said rotatable groups of magazines, means for further moving said assembler-entrance channel-group to register with said vertical magazines; escapements associated with each of said magazines, a group of key-controlled reeds for actuating said escapements, means for raising and lowering said group of reeds longitudinally to and from operative relation with the escapements of a selected magazine, other means for moving said group of reeds laterally to and from operative relation with the escapements of a selected magazine, and means for causing said lateral movement of the reeds to occur in unison with the movement of said assembler-entrance channel-group to and from registration with a selected magazine.

1,679,318. TYPOGRAPHICAL ASSEMBLING AND DISTRIBUTING MACHINE. GEORGE E. MARLATT, Pasadena, Calif. Filed Oct. 5, 1926. Serial No. 139,721. 23 Claims. (Cl. 199—20.)

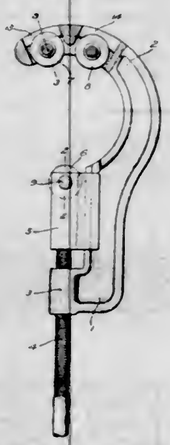
1. In a typographical machine, in combination with a magazine having a series of channels in each of which matrices bearing a like character are stored in column arrangement for successive and intermittent release therefrom, and matrices therein having a short lug at their forward end and a relatively longer following lug on the same edge therewith, a perforation through the floor of each of said channels in which the short lug of each forward matrix in a column lodges and thus hinders the escape of said matrices from their channel, and means for releasing said matrices one at a time from lodgement in said perforation, said means acting from beneath and through said perforation to lift said matrix out of said perforation.

1,679,319. SHEET PILING. HORACE M. MARSHALL, Vicksburg, Miss. Filed Dec. 11, 1923. Serial No. 680,056. 4 Claims. (Cl. 61—58.)



1. A wooden sheet piling comprising a plurality of sections, each section being built up wholly by flat boards and wooden pieces L-shaped in cross-section, each of said pieces consisting only of a web and a flange arranged at right angles and integrally united, the length of the flange of each piece being substantially equal to the thickness of said flat boards and to the thickness of the web, said elements being assembled and secured together with a flat board interposed between two reversely arranged opposed L-shaped pieces, the edges of said board being spaced from the flanges of said L-shaped pieces a distance equal to the thickness of said flanges, whereby each section is provided at its edges with a tongue and groove, the grooves and tongues of adjacent sections being constructed to interlock.

1,679,320. SPEED-WARNING DEVICE. JESSE MATTHEWS, Absecon, N. J. Filed June 25, 1927. Serial No. 201,407. 5 Claims. (Cl. 116—116.)



5. A device of the character described, including a post having a longitudinal bore, a pin fixed in said bore, rollers carried by said pin and projecting from the surface of the pin, a vertically movable member having a tubular lower end receiving the pin and engaged by the rollers, a figure constituting a part of the vertically mov-

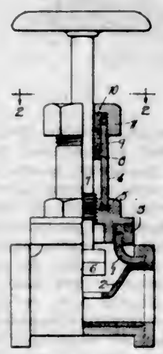
able member and normally enclosed in the post, wings on the upper end of the vertically movable member above the post adapted to be engaged by the wind to cause the

member to elevate and expose the figure, and spring fingers on the lower end of the movable member limiting the downward and upward movements of said member.

1,679,321. PIPE CUTTER. RICHARD FREDRICK MCKAY, Brooklyn, N. Y. Filed Mar. 7, 1927. Serial No. 173,525. 1 Claim. (Cl. 81—192.)

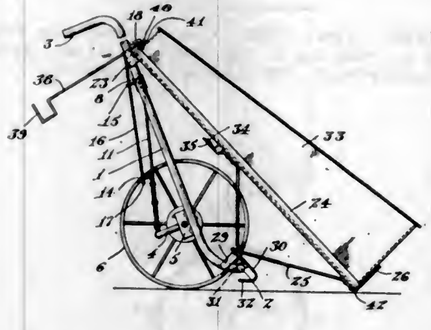
A pipe cutter, comprising a body formed at its outer end with a pair of notches merging into slots and with a hollow internally threaded projection at its inner end, a slide mounted on said body adjacent said inner end, a handle having a threaded section extending through said threaded projection and positioned to adjust said slide, said slide having a notch merging into a slot, a cutter formed with a hub and blade positioned so that said hub will be in the notch in said slide while the blade will extend through the slot in the slide, a journal pin carried by said slide for rotatably supporting said cutter, a pair of cutters for the outer end of said body, said cutters being formed with hubs positioned in the respective notches in said outer end and with blades extending into the slots in said outer end, a journal pin for each of said last mentioned cutters carried by said outer end for rotatably supporting said last mentioned cutters, said last mentioned cutters being substantially in line with the cutter carried by said slide, the structure carrying the respective slots presenting walls frictionally engaging the sides of the respective blades for holding the blades in their correct operative positions.

1,679,322. SYNTHETIC RESIN AND METHOD OF MAKING SAME. JAMES MCINTOSH, Norristown, Pa., assignor to Diamond State Fibre Company, Elsmere, Del., a Corporation of Delaware. Filed Apr. 4, 1922. Serial No. 549,522. 14 Claims. (Cl. 260—2.)



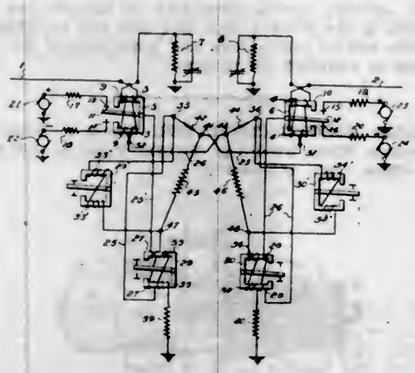
1. The process of forming a potentially reactive resin which comprises causing a phenolic body and an essential oil having an aldehyde base to react to form a fusible, soluble non-crystalline condensation product capable of transformation into a hard, infusible product upon further heating.

1,679,323. WINDOW-CLEANING APPARATUS. CLARENCE E. MORTLOCK, Wilmington, Del. Filed Mar. 30, 1927. Serial No. 179,618. 4 Claims. (Cl. 15—29.)



1. A window cleaning apparatus comprising a closed tank to contain cleansing fluid, means for supplying air under pressure to said tank, a brush, a fluid-actuated motor connected with said air supplying means for operating said brush, and a nozzle adjacent said brush and connected with said tank for directing a stream of cleansing fluid at the free end of said brush.

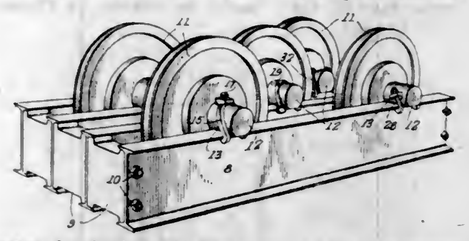
1,679,324. VALVE BONNET AND THE LIKE. THOMAS E. MURRAY, Brooklyn, N. Y. Filed July 19, 1924. Serial No. 726,903. 4 Claims. (Cl. 251—49.)



4. A valve bonnet having a tubular body, a base and an internal shoulder for holding the packing for the valve stem, the body being a separate piece from the base and shoulder and being welded to these parts.

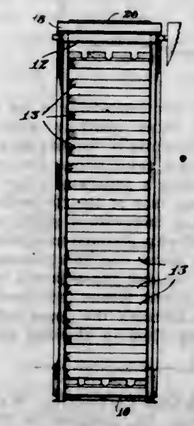
1,679,325. CONVERTIBLE HAND TRUCK AND VEHICLE. NATHANIEL S. BLACK, Newtonville, Mass., assignor to The Casey Foster Co., Boston, Mass., a Corporation of Massachusetts. Filed May 26, 1927. Serial No. 194,472. 7 Claims. (Cl. 280—53.)

1. A device of the kind described, comprising a U-frame having its upper ends formed as handles, an axle, wheels on said axle, a frame detachably secured to said U-shaped frame at a plurality of points, said wheels and one end of said frame forming supports for the device.



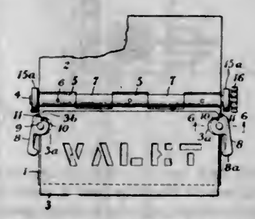
1,679,326. POTENTIAL-INDICATING SYSTEM. HERBERT W. DRAKE, East Orange, N. J., assignor to The Western Union Telegraph Company, New York, N. Y., a Corporation of New York. Filed Nov. 20, 1924. Serial No. 751,178. 7 Claims. (Cl. 178—69.)

1. A transmission system, comprising, a main line, a source of electrical energy adapted to be connected thereto, an indicating instrument electrically remote from and responsive to potential variations of said source, and compensating means for said instrument to compensate for the effect of disturbing potential variations other than the potential variations of said source, comprising a differential winding for said instrument connected in the main line.



1,679,327. CROWN BLOCK. WILLIAM S. EVANS, Palisades Park, N. J., assignor to Lucey Manufacturing Corporation of Tennessee, Chattanooga, Tenn., a Corporation of Tennessee. Filed Aug. 11, 1927. Serial No. 212,213. 2 Claims. (Cl. 308—59.)

1. In a crown block, the combination of spaced parallel frame beams, a supporting shaft resting on said beams, a sheave rotatably mounted on said shaft, oppositely inclined yokes engaged over opposite end portions of said shaft, hooks on the ends of said yokes engaged beneath the outer flanges of the supporting beams and screw

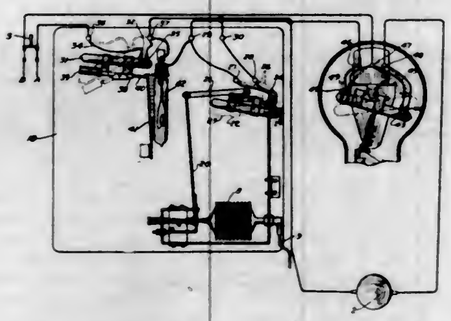


means for forcing said hooks into holding engagement with the flanges and the yoke structures gripped about the shaft.

1,679,328. CONTAINER. CLAUD E. FULLER, New York, N. Y., assignor to New York Brick Handling Corporation, New York, N. Y., a Corporation of New York. Filed Oct. 19, 1927. Serial No. 227,233. 4 Claims. (Cl. 34—26.)

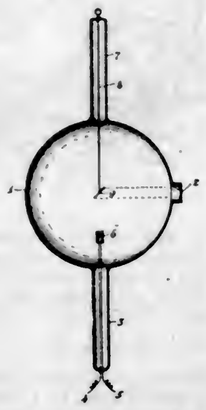
1. An improved container for open top dryers comprising a rectangular open framework, a plurality of ledges fomed thereon for acting as supports for a plurality of groups of superimposed pallets, and means forming part of the container for making a gas tight joint between the container and an open top dryer.

1,679,329. BLADE HOLDER. HENRY J. GAISMAN, New York, N. Y., assignor to Autostrop Patents Corporation, Dover, Del., a Corporation of Delaware. Original application filed June 24, 1924, Serial No. 721,972. Divided and this application filed Dec. 17, 1926. Serial No. 155,400. 1 Claim. (Cl. 30—12.)



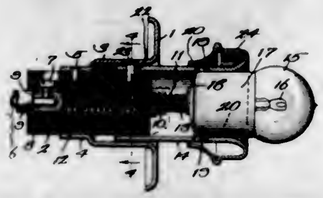
A safety razor including two shafts geared together, and two blade-holding plates mounted on one of said shafts, one of said plates being rotatable with respect to said shaft.

1,679,330. BOOT-TREE OR LAST. CARL SODERLUND, Belmont, Mass., assignor to Hood Rubber Company, Watertown, Mass., a Corporation of Massachusetts. Filed Feb. 17, 1927. Serial No. 168,980. 5 Claims. (Cl. 18—46.)



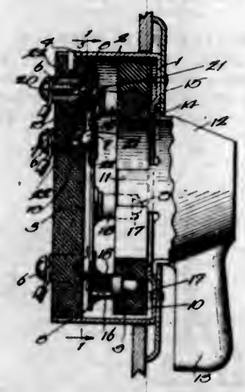
1 A boot tree or last comprising a leg section and a toe section having faces abutting along intersecting planes which are substantially lengthwise and transverse to the body of the last respectively, the lengthwise face of the leg section having a guideway, a bar secured at its ends to the lengthwise face of the toe section and spaced therefrom and forming therewith a guide, said guide projecting into said guideway, a transverse pin carried by the leg section near its lower end and passing through the space between said bar and the adjacent face of the toe section, and spring detent means interposed between the leg and toe sections adjacent the upper end of the latter for releasably holding them in abutting relation.

1,679,331. OIL-BURNER CONTROL. WALTER W. WILLIAMS, Bloomington, Ill., assignor to Williams Oil-O-Matic Heating Corporation, Bloomington, Ill., a Corporation of Illinois. Filed Mar. 11, 1925. Serial No. 14,621. 6 Claims. (Cl. 158—28.)



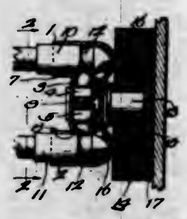
1. In a liquid fuel burner construction having an electrical operating means therefor and a room thermostat in circuit therewith controlling the normal operation thereof, in combination with a safety device in said circuit requiring a manual setting to close the circuit, means actuated by the passage of the current therethrough to hold the set position, and additional means in circuit with said holding means and operating circuit, independent of the thermostat, controlled by the heat generated by the burner flame and adapted to break said circuit upon failure of said flame, said thermostat having means operable upon breaking the operating circuit to simultaneously close the circuit through the safety device, and holding means.

1,679,332. X-RAY TUBE. GUSTAV BUCKY, New York, N. Y. Filed May 7, 1924, Serial No. 711,561, and in Germany May 8, 1923. 2 Claims. (Cl. 250—35.)



1. An X-ray tube of the heated cathode type for emitting X-rays of adjustable penetration, and having an X-ray emitting portion constituted of material non-absorptive of the softer X-rays, said tube also including a cathode and an anti-cathode and being adapted for operation at sustained low tensions.

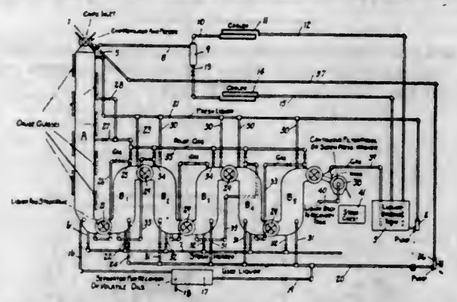
1,679,333. CIRCUIT CONNECTER. HARRY A. DOUGLAS, Bronson, Mich. Filed Sept. 5, 1922. Serial No. 586,269. 1 Claim. (Cl. 173—349.)



A circuit connecter comprising a mounting member provided with a tubular portion, a plug having a portion thereof fitted within the tubular portion in snug engagement therewith throughout its circumferential extent whereby it is held rigidly by said mounting member against tilting movement with respect thereto, means holding said plug against longitudinal movement with respect to said mounting member, a portion of said plug extending outwardly of the tubular portion of said mounting member, a rotatable and longitudinally movable sleeve engaged over the outwardly extending portion of said plug, a pin fixed with respect to said plug and mounting member passing through a diagonal slot in said sleeve whereby rotation of said sleeve results in its longitudinal movement with respect to said plug, and a contact carried by said plug for cooperation with a circuit continuing member mounted in the sleeve.

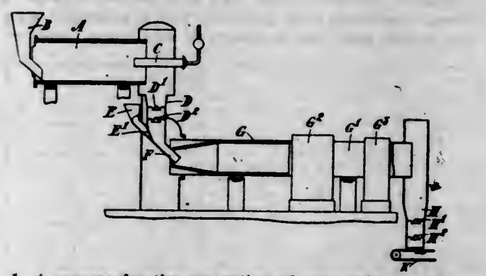
1,679,334. ELECTRIC SWITCH. HARRY A. DOUGLAS, Bronson, Mich. Filed Jan. 27, 1926. Serial No. 84,098. 1 Claim. (Cl. 200—166.)

In an electric switch, the combination with a contact carrier; of a contact upon said carrier; a second contact carrier; a contact upon the second carrier, the two carriers being relatively movable to bring the contacts into and out of contacting alignment, one of said contacts having a recess in its contacting face and the other contact having a ball projecting therefrom and rotatable upon the carrier for the first contact, said ball being receivable within said recess, the contact having the ball also having another portion engageable with the other contact and holding the ball out of engagement with said other contact when the contacts are in engagement.



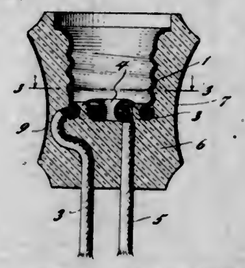
1,679,335. CIRCUIT CONTINUING DEVICE. HARRY A. DOUGLAS, Bronson, Mich. Filed Nov. 17, 1927. Serial No. 233,876. 8 Claims. (Cl. 173—328.)

1. In a circuit continuing device, the combination with a spring barrel having openings through its ends; of plunger contacts projecting through said openings; spring means within said spring barrel for pressing said plunger contacts outwardly to yieldingly maintain them in place; and a basket receiving said spring barrel and contacts lengthwise thereof and having an ear formation that laps and holds the barrel in place the ends of the basket being formed with plug receiving sockets that are angular to said spring barrel and into whose interiors the outer ends of the plunger contacts respectively adjacent thereto extend to be engageable by plugs inserted within said sockets.



1,679,336. METHOD AND APPARATUS FOR CONTINUOUS COOKING OF FIBROUS MATERIAL. THOMAS L. DUNBAR, Watertown, N. Y., assignor, by mesne assignments, to Chemipulp Process, Inc., Watertown, N. Y., a Corporation of New York. Filed Oct. 25, 1926. Serial No. 143,993. 24 Claims. (Cl. 92—7.)

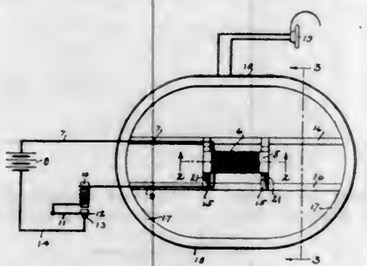
1. A method for the continuous cooking of fibrous material, consisting in feeding the material through a series of cooking chambers arranged end to end, cooking the material in each of said chambers by means of a heated chemical cooking liquor, subjecting the material in the first chamber of the series to hydrostatic pressure, and



subjecting the material in succeeding chambers of the series to a higher temperature and super-atmospheric pressure.

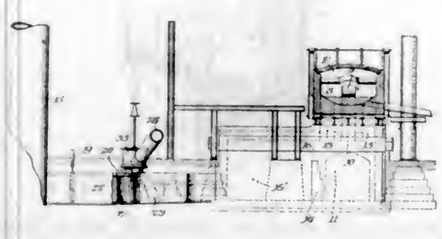
1,679,337. HEAT TREATMENT AND CONCENTRATION OF COPPER ORES. JOHN COLLETT MOULDEN and BRUCE TAPLIN, London, England, assignors to Metals Production Company of North America Incorporated, New York, N. Y., a Corporation. Filed Sept. 14, 1925, Serial No. 56,228, and in Great Britain Oct. 29, 1924. 21 Claims. (Cl. 75—62.)

1. A process for the separation of copper from gangue in ores and like materials of the kind defined characterised by heating the ore in admixture with solid carbonaceous matter and in the presence of a haloid at a temperature lower than the melting point of copper and yet adequate to produce a reaction so that the copper is caused to come out of the ore particles which originally contained it and is found outside them in the metallic condition amongst the charge.



1,679,338. LAMP SOCKET. HARRY ROTHENBERG, West Norwood, N. J., and OTTO C. BRITSCH, Woodhaven, N. Y., assignors to Henry Hyman, Brooklyn, N. Y. Filed Apr. 23, 1926. Serial No. 104,029. 1 Claim. (Cl. 173—358.)

A lamp socket, consisting of a sheet metal socket member screw-threaded to receive a lamp base and having an end turned over around a conductor, a center con-



tact in the form of an eyelet folded around a conductor, said socket and eyelet being held in position by insulating compound molded in place around the same.

1,679,339. HIDDEN-METAL DETECTOR. SHIAL HERE, Crawfordsville, Ind. Filed Feb. 4, 1924. Serial No. 690,360. 4 Claims. (Cl. 175—182.)

1. In a metal detector, the combination with a source of electric current, an automatic vibrating contact breaker, and a telephone receiver, of a pole-piece, a primary winding on said pole-piece in electrical circuit with said source of electric current and said contact breaker, a frame supporting said pole-piece, and a secondary winding wound about the periphery of said frame, said secondary winding being at right angles to and being at a substantial distance from said primary winding and being in electrical circuit with said telephone receiver.

1,679,340. METALLURGICAL FURNACE. FRANK B. MCKUNE, Hamilton, Ontario, Canada, assignor, by mesne assignments, to Open Hearth Combustion Company, Chicago, Ill., a Corporation of Delaware. Filed May 5, 1922. Serial No. 558,756. 7 Claims. (Cl. 263—15.)

1. In combination with a reversible metallurgical furnace, air entrance passages, movable means whereby the entrance area for incoming air to the furnace chamber may be restricted, and fans for supplying forced air to said passages.

July 3, 1928

ALPHABETICAL LIST OF REGISTRANTS OF TRADE-MARKS.

Acme Company. (See Marsh, Halbert G.)
Adams Bros. Mfg. Co. Inc., Pittsburgh, Pa. Gas heaters and parts thereof. 243,959; July 3; Serial No 251,470; published Apr. 24, 1928. Class 34.
Adams-White Brush Company Boston, Mass. Cylindrical and flat industrial brushes and machine-operated brushes. 243,923; July 3; Serial No. 257,846; published Apr. 24, 1928. Class 29.
Air-Chrome Studios, Inc., The, Irvington, N. J. Radio loud speakers. 243,983; July 3; Serial No. 261,855; published Apr. 24, 1928. Class 21.
Allen Belting Company, Clifton Heights, Pa. Round leather belting. 243,900; July 3; Serial No. 263,062; published Apr. 24, 1928. Class 35.
Alligator Company, The, St. Louis, Mo. Hospital sheeting of waterproof fabric. 243,814; July 3; Serial No. 244,485; published Apr. 10, 1928. Class 44.
Alpha Delta Pi, Ames, Iowa. Fraternity badges, lapel buttons, pins, cuff links, clasps, etc. 243,817; July 3; Serial No. 244,341; published Apr. 17, 1928. Class 28.
Alpha Portland Cement Company, to Alpha Portland Cement Company, Easton, Pa., successor. Portland cement. 70,500; renewed Sept. 8, 1928.
Ament, Lucy C., New York, N. Y. Dolls. 243,848; July 3; Serial No. 261,473; published Apr. 17, 1928. Class 22.
American Chain Company, Inc., New York, N. Y., and Bridgeport, Conn. Telltale devices. 243,972; July 3; Serial No. 231,468; published Apr. 24, 1928. Class 19.
American Crayon Company, The, Sandusky, Ohio. Emulsion for wall covering. 243,833; July 3; Serial No. 260,482; published Apr. 17, 1928. Class 16.
American Pastry Products Corporation. (See Denaro, James, assignor.)
American Signs Corporation, Kalamazoo, Mich. Luminous electric signs. 243,845; July 3; Serial No. 261,601; published Apr. 17, 1928. Class 21.
American Solvents & Chemical Corporation, New York, N. Y. Alcoholic liquors. 243,815; July 3; Serial No. 244,383; published Apr. 24, 1928. Class 49.
American Stores Company, Philadelphia, Pa. Gelatine dessert. 243,886; July 3; Serial No. 262,012; published Apr. 17, 1928. Class 46.
American Woolen Company, Boston, Mass. Woolen piece goods. 243,907; July 3; Serial No. 263,063; published Apr. 24, 1928. Class 42.
Anderson & Kroener, New York, N. Y. Platinum bracelets. 243,999; July 3; Serial No. 262,438; published Apr. 24, 1928. Class 28.
Ansonia Clock Company The, Brooklyn, N. Y. Clocks. 244,058; July 3. Class 27.
Automatic Cone Company. (See Denaro, James.)
Axel Bros., New York, N. Y. Jewelry. 243,942; July 3; Serial No. 260,931; published Apr. 24, 1928. Class 28.
Barber Asphalt Company, The, Philadelphia, Pa. Asphalt shingles. 244,047; July 3. Class 12.
Bartles-Maguire Oil Company, The, Milwaukee, Wis. Gasoline, motor oil, and other lubricating oils and greases. 243,890; July 3; Serial No. 262,198; published Apr. 17, 1928. Class 15.
Baum Bros. & Mayer Neckwear Co., St. Louis, Mo. Men's and boys' neckties and cravats. 244,051; July 3. Class 39.
Beck Products Co., Spokane, Wash. Expander steel for piston rings. 244,055; July 3. Class 14.
Berger, Sigmund, New York, N. Y. Jewelry. 243,943; July 3; Serial No. 260,932; published Apr. 24, 1928. Class 28.
Berry, Dodge Company, Boston, Mass. Tea. 243,961; July 3; Serial No. 245,827; published Mar. 13, 1928. Class 46.
Bloom Manufacturing Company, Inc., The, Nashua, Iowa. Toy and souvenir banks. 243,843; July 3; Serial No. 261,734; published Apr. 10, 1928. Class 22.
Blue Ribbon Oil Company, Chicago, Ill. Oils and greases, kerosene, and gasoline. 243,869; July 3; Serial No. 246,883; published Aug. 2, 1927. Class 15.
Borden Company, The. (See Union Condensed Milk Company, assignor.)
Bowser, S. F., & Company, Inc., Fort Wayne, Ind. Pumps. 243,899; July 3; Serial No. 262,793; published Apr. 24, 1928. Class 23.
Bramhall Food Products Corporation, Washington, D. C. Mayonnaise, Thousand Island dressing, and relish. 243,965; July 3; Serial No. 248,670; published Nov. 29, 1927. Class 46.
Bright Star Battery Co., Hoboken, N. J., doing business as Unedilt Battery Co., New York, N. Y. Electric batteries. 243,937; July 3; Serial No. 260,552; published Apr. 24, 1928. Class 21.
Browning-Drake Corporation, Cambridge, Mass. Radio receiving sets and radio receiver construction kits and parts thereof. 243,872; July 3; Serial No. 254,790; published Apr. 17, 1928. Class 21.
Buescher Manufacturing Co., The, assignor, by mesne assignments, to Buescher Band Instrument Co., Elkhart Ind. Band instruments. 31,953; renewed Sept. 6, 1928.
Buford, Henry C., Sacramento, Calif. Fresh deciduous fruits and fresh grapes. 244,057; July 3.
Bull Dog Floor Clip Company. (See Krabiel, William C.)
Burnett, L. H., doing business as Burnett Bros., San Francisco, Calif. Watches. 243,974; July 3; Serial No. 228,224; published Apr. 24, 1928. Class 27.
Burton & Davis Co., New York, N. Y. Canned fruits and vegetables. 70,723; renewed Sept. 29, 1928.
California Petroleum Corporation, Los Angeles, Calif. Gasoline. 243,823; July 3; Serial No. 241,392; published Apr. 17, 1928. Class 15.
Cartier. (See Crane, Clarence A.)
Chemische Fabrik von Heyden Aktien-Gesellschaft, Radebeul, near Dresden, Germany, assignor, by mesne assignments to Heyden Chemical Corporation, Inc., New York, N. Y. Antiseptic silver salts. 66,947; renewed Jan. 7, 1928.
Chicago White Lead & Oil Co., Chicago, Ill. Paint enamel. 243,825; July 3; Serial No. 217,998; published Oct. 12, 1926. Class 16.
Clifton Manufacturing Company, Jamaica Plain, Boston, Mass. Rubberized textile fabrics. 244,039; July 3. Class 50.
Clusor, Incorporated, New York, N. Y. Binding machines. 243,863; July 3; Serial No. 258,621; published Apr. 24, 1928. Class 23.
Cohn, Leo R., doing business as Estes Hosiery Company, Denver, Colo. Hosiery. 244,061; July 3. Class 39.
Combined Buyers Limited, Wellington, New Zealand. Lubricating oils, greases, petrol, and kerosene. 243,920; July 3; Serial No. 256,335; published Apr. 24, 1928. Class 15.
Compagnie du Vin St. Raphael (Societe Anonyme), Valence, Drome, France. Still wine. 243,812; July 3; Serial No. 244,744; published July 12, 1927. Class 47.
Compagnie Métallurgique de la Campine Soc. An., Antwerp, Belgium. Antimony oxide. 243,906; July 3; Serial No. 262,954; published Apr. 24, 1928. Class 6.
Compania Frutera Transcontinental S. A., Mexico City, Mexico, and El Paso, Tex. Bananas. 243,901; July 3; Serial No. 262,649; published Apr. 24, 1928. Class 46.
Compania Frutera Transcontinental S. A., Mexico City, Mexico, and El Paso, Tex. Bananas. 243,950; July 3. Serial No. 262,648; published Apr. 24, 1928. Class 46.
Corinthian Pharmacy. (See Silberman, Joseph.)
Crane, Clarence A., doing business as Cartier, Cleveland, Ohio. Candy. 244,008; July 3; Serial No. 262,209; published Apr. 24, 1928. Class 46.
Creofloat Manufacturing Co., Inc., Seattle, Wash. Moth repellant. 243,991; July 3; Serial No. 261,306; published Apr. 24, 1928. Class 6.
Cron & Dehn, Inc., Seattle, Wash. Fresh fruit, canned fish, etc. 244,065; July 3; Serial No. 262,293; published Apr. 24, 1928. Class 46.
Crown Oil & Wax Co., Baltimore, Md. Lubricating oils and greases. 243,875; July 3; Serial No. 253,312; published Apr. 3, 1928. Class 15.
Crump, Edward B., Louisville, Ky. Hair restorer. 244,014; July 3; Serial No. 262,064; published Apr. 24, 1928. Class 6.
Davies, J. P., Company, The, to The Davies-Young Soap Company, Dayton, Ohio, successor. Soap. 70,548; renewed Sept. 15, 1928.
Davis & Lowe Company, Newark, N. J. Cuff buttons, belt buckles, hatpins, etc. 243,952; July 3; Serial No. 260,104; published Apr. 24, 1928. Class 28.
De Bar, Harold L., Los Angeles, Calif. Vaginal syringes and ointment applicators. 243,891; July 3; Serial No. 262,295; published Apr. 17, 1928. Class 44.
Denaro, James, doing business as Automatic Cone Company, assignor to American Pastry Products Corporation, Cambridge, Mass. Ice-cream molding and dispensing device. 243,842; July 3; Serial No. 261,739; published Apr. 24, 1928. Class 23.
Duncan Oil Company, The, Youngstown, Ohio. Storage batteries. 243,849; July 3; Serial No. 261,426; published Apr. 10, 1928. Class 21.
Eastern Lacquer Company, Lynn and Wakefield, Mass. Lacquer, lacquer enamels, stains, etc. 243,865; July 3; Serial No. 257,973; published Apr. 17, 1928. Class 16.
Egal Metal Products Company, The, Baltimore, Md. Aluminum alloys. 244,002; July 3; Serial No. 262,352; published Apr. 17, 1928. Class 14.
England, Klein & Levy, Incorporated, New York, N. Y. Finger rings and mountings, scarfpins, brooches, bar pins, pendants, and clasps. 243,840; July 3; Serial No. 260,006; published Apr. 17, 1928. Class 28.
Englund, August O., West Chester, Pa. Candies, fancy cakes, ice cream, etc. 243,818; July 3; Serial No. 244,006; published Apr. 17, 1928. Class 46.
Estes Hosiery Company. (See Cohn, Leo R.)
Excellent Mfg. Co. (See Nowak, Walter.)
Faber, Eberhard, New York, N. Y., assignor to Eberhard Faber Pencil Company, Brooklyn, N. Y. Lead and colored pencils. 71,436; renewed Nov. 24, 1928.
Fairmont Railway Motors, Inc., Fairmont, Minn. Roller bearings. 244,052-3; July 3. Class 23.

Finn, John, San Francisco, Calif. Movable automobile arm rests. 244,054; July 3. Class 19.
Fischer, Carl, Inc., New York, N. Y. Violins, violas, cellos, and bass viols. 244,037; July 3. Class 36.
Fischer, Philip. (See Mason, Jas. S., Co.)
Flemington Milling Co., Flemington, N. J. Graham and wheat flour. 244,049; July 3. Class 46.
Flickinger, J. H., Company, The, San Jose, Calif. Canned fruits. 71,302; renewed Nov. 17, 1928.
Fargo, Stephen, Cleveland, Ohio. Preparation. 243,924; July 3; Serial No. 258,806; published Apr. 24, 1928. Class 6.
Fastidious Company, The, San Francisco, Calif. Bidets. 243,874; July 3; Serial No. 253,322; published Apr. 17, 1928. Class 44.
Finnell System, Inc., Elkhart, Ind. Floor-treating machines, scrubbing machines, mop trucks, etc. 243,873; July 3; Serial No. 254,275; published Apr. 24, 1928. Class 23.
Frank, Edgar K., & Co., New York, N. Y. Linings in the piece. 243,933; July 3; Serial No. 260,172; published Apr. 3, 1928. Class 42.
Gabriel & Jos. Sedlmayr, Spaten-Franziskaner-Leistbräu A.-G., München, Munich, Germany. Malt syrups and malt extracts. 243,804; July 3; Serial No. 258,502; published Apr. 17, 1928. Class 46.
Gamewell Company, The, Newton Upper Falls, Mass. Electrical fire-alarm systems and parts thereof. 243,861; July 3; Serial No. 258,867; published Apr. 17, 1928. Class 21.
Gardner & Yates, Bellefonte, Pa. Aluminum solder. 243,922; July 3; Serial No. 257,540; published Apr. 24, 1928. Class 14.
Garfinkel, B. J., doing business as Good-Will Malt and Hops Supply Company, Harrisburg, Pa. Malt syrup. 243,895; July 3; Serial No. 262,398; published Apr. 17, 1928. Class 46.
Garson, Isaac, New York, N. Y. Finger rings, bar pins, scarfpins, and bracelets. 243,947; July 3; Serial No. 260,996; published Apr. 24, 1928. Class 28.
General Appliance Corporation, San Francisco, Calif. Electric-circuit interrupters or flashers. 243,819; July 3; Serial No. 243,852; published Apr. 17, 1928. Class 21.

Spray and gargle, Nose and throat. McKesson & Robbins, Incorporated. 243,910; July 3; Serial No. 262,757; published Apr. 24, 1928.

Spray and gargle, Nose and throat. McKesson & Robbins, Incorporated. 243,913; July 3; Serial No. 262,739; published Apr. 24, 1928.

Tablets, Cold and grip. McKesson & Robbins, Incorporated. 243,914; July 3; Serial No. 262,738; published Apr. 24, 1928.

Toilet articles. Les Parfums de Rosine, Inc. 244,018–36; July 3.

Tonic having a wine base, General. S. Paul. 243,978; July 3; Serial No. 261,982; published Apr. 24, 1928.

CLASS 7.

Lines and rope. Mordt Company. 244,046; July 3.

CLASS 8.

Cigar cases and the like, Device for supplying moisture in. Ward Cowman and Company. 244,050; July 3.

CLASS 10.

Fertilizer. Synthetic Nitrogen Products Corporation. 244,000; July 3; Serial No. 262,429; published Apr. 24, 1928.

Fertilizers. Uniform Products Company. 243,962; July 3; Serial No. 251,289; published Sept. 27, 1927.

CLASS 11.

Carbon paper. Smith Premier Typewriter Company. 244,015; July 3; Serial No. 262,042; published Apr. 24, 1928.

CLASS 12.

Cement, Portland. Alpha Portland Cement Company. 70,500; renewed Sept. 8, 1928.

Partitions, doors, and window and door frames. Mills Company. 244,048; July 3.

Shingles, Asphalt. Barber Asphalt Company. 244,047; July 3.

CLASS 13.

Bathtubs, lavatories, and basins, Enameled cast-iron. H. Mueller Manufacturing Company. 70,303; renewed Aug. 18, 1928.

Bathtubs, sinks, and lavatories. Wolff Manufacturing Corporation. 243,956; July 3; Serial No. 252,872; published Apr. 24, 1928.

Clips, Metal. W. C. Krabiel. 243,979; July 3; Serial No. 261,962; published Apr. 24, 1928.

Fittings and furnishings, Boiler. Reliance Gauge Company. 32,083; renewed Oct. 18, 1928.

Hydrants, Fire. Waterous Fire Engine Works, Incorporated. 243,954; July 3; Serial No. 245,385; published Apr. 24, 1928.

Nails, Clinching. G. G. Roberts Corporation. 243,931; July 3; Serial No. 259,877; published Apr. 24, 1928.

Nuts. A. H. Tinnerman. 244,038; July 3.

Pipe fittings, valves, and cocks. Grinnell Company. 243,955; July 3; Serial No. 249,898; published Apr. 24, 1928.

CLASS 14.

Alloys, Aluminum. Egal Metal Products Company. 244,002; July 3; Serial No. 262,352; published Apr. 17, 1928.

Castings, Ferrous-metal. Pullman Car and Manufacturing Corporation. 243,990; July 3; Serial No. 261,587; published Apr. 17, 1928.

Solder, Aluminum. Gardner & Yates. 243,922; July 3; Serial No. 257,540; published Apr. 24, 1928.

Steel for piston rings, Expander. Beck Products Co. 244,055; July 3.

CLASS 15.

Candles. Smith & Nichols, Incorporated. 243,813; July 3; Serial No. 244,578; published Apr. 17, 1928.

Gasoline. California Petroleum Corporation. 243,823; July 3; Serial No. 241,392; published Apr. 17, 1928.

Gasoline. Lubrite Refining Company. 244,060; July 3.

Gasoline and lubricating oils. Looboyle Refining Company. 243,857; July 3; Serial No. 259,367; published Apr. 17, 1928.

Gasoline, motor oil, and other lubricating oils and greases. Bartles-Maguire Oil Company. 243,890; July 3; Serial No. 262,198; published Apr. 17, 1928.

Kerosene, benzine, distillate, and lubricating oils and greases. Pure Oil Company. 243,822; July 3; Serial No. 242,208; published Apr. 17, 1928.

Kerosene, fuel oil, naphtha, and gasoline. Blue Ribbon Oil Company. 243,809; July 3; Serial No. 246,883; published Aug. 6, 1927.

Oil and grease, Lubricating. Penn Petroleum and Supply Company. 244,007; July 3; Serial No. 262,257; published Apr. 24, 1928.

Oil, Penetrating graphite. G. A. Lazear. 243,808; July 3; Serial No. 248,849; published Apr. 17, 1928.

Oils and greases. Standard Oil Company of New Jersey. 244,001; July 3; Serial No. 262,421; published Apr. 24, 1928.

Oils and greases, Lubricating. Crown Oil & Wax Co. 243,875; July 3; Serial No. 253,312; published Apr. 3, 1928.

Oils and greases, motor oil, cup grease, and compounds, Lubricating. O'Kay Products Corporation. 243,935; July 3; Serial No. 260,344; published Apr. 3, 1928.

Oils, greases, petrol, and kerosene, Lubricating. Combined Buyers Limited. 243,920; July 3; Serial No. 256,335; published Apr. 24, 1928.

Petroleum, Refined. Standard Oil Company of New York. 69,676; renewed June 30, 1928.

CLASS 16.

Emulsion for wall covering. American Crayon Company. 243,833; July 3; Serial No. 260,482; published Apr. 17, 1928.

Enamel, Paint. Chicago White Lead & Oil Co. 243,825; July 3; Serial No. 217,998; published Oct. 12, 1926.

Lacquers, lacquer enamels, stains, etc. Eastern Lacquer Company. 243,865; July 3; Serial No. 257,973; published Apr. 17, 1928.

Paints, Artists'. M. Grumbacher. 243,871; July 3; Serial No. 254,911; published Apr. 10, 1928.

Paints, varnishes, paint enamels, and lacquers. Paraffine Companies. 243,868; July 3; Serial No. 255,604; published Apr. 10, 1928.

Polish for automobiles and furniture, Liquid. Quicksheen Polish Co. 243,856; July 3; Serial No. 259,874; published Apr. 17, 1928.
Polish, Furniture and piano. W. Nowak. 243,862; July 3; Serial No. 258,647; published Apr. 17, 1928.

CLASS 17.

Cigars. G. G. Haaxma. 243,878; July 3; Serial No. 261,113; published Apr. 24, 1928.
Cigars, chewing and smoking tobacco. Meads Tobacco Co. 243,867; July 3; Serial No. 256,735; published Apr. 24, 1928.

American Type Founders Company. (See Morrison, Lewis E., assignor.)
American Window Company. (See Lewis, Claude A., assignor.)
Amishasel, Frank, et al. (See Kreft, Ewald, assignor.)
signor.)
Andale Engineering Company. (See McNeal, Daniel R., assignor.)
Anderson, Carl H., Stratford, assignor to The Bryant Electric Company, Bridgeport, Conn. Circuit breaker. 1,675,322; July 3.
Anderson, Carl O., Mitchell, S. Dak. Valve-adjusting tool. 1,675,781; July 3.
Andrade, Julius, East Cleveland, assignor to Chandler Motor Car Company, Cleveland, Ohio. Rumble seat for automobile bodies. 1,675,685; July 3.
Andres, William J., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Brake. Re17,015; July 3.
Andrews, Albert, Spearfish, S. Dak. Engine construction. 1,675,629; July 3.
Andrews, Dudley, et al. (See Watkins, Irah J., assignor.)
Armstrong Bros. Tool Co. (See Armstrong, Paul, assignor.)
Armstrong, Edwin H., Yonkers, N. Y., assignor, by mesne assignments, to Westinghouse Electric & Manufacturing Company, East Pittsburgh, Pa. Wave signaling system. 1,675,323; July 3.
Armstrong, Joseph, Allston, assignor to American Moistening Company, Boston, Mass. Humidifier. 1,675,782; July 3.
Armstrong, Paul, assignor to Armstrong Bros. Tool Co., Chicago, Ill. Pipe wrench. 1,676,210; July 3.
Arnout, James L., et al. (See Watkins, Irah J., assignor.)
Aron, William P. (See Gahagan, H. I., and Aron.)
Aron, William P., Dallas, Tex., assignor, by mesne assignments, to The Whisk Razor Corporation, Buffalo, N. Y. Blade. 1,676,001; July 3.
Ash, Charles S., Detroit, Mich. Disk wheel. 1,675,630; July 3.
Ashmun, Harry S. (See Titcomb, L. R., and Ashmun.)
Atkinson, James S., London, England, assignor, by mesne assignments, to Open Hearth Combustion Company, Chicago, Ill. Reversible regenerative furnace. 1,675,588; July 3.
Atkinson, Ralph W., and G. J. Shurts, Perth Amboy, N. J., assignors, by mesne assignments, to General Cable Corporation. High-tension cable. 1,675,918; July 3.
Augenstein, Carl, Cranston, assignor to Automatic Gold Chain Company, Edgewood, R. I. Bracelet hook. 1,675,324; July 3.
Austin, Frederick W., Oldham, England. Loom for weaving tufted pile fabrics and apparatus for use therewith. 1,675,836; July 3.
Automatic Electric Inc. (See Gillings, Charles, assignor.)
Automatic Electric Inc. (See Lomax, Clarence E., assignor.)
Automatic Gold Chain Company. (See Augenstein, Carl, assignor.)
B. O. T. Mfg. Co. (See Tilden, Bert O., assignor.)
Babcock, Garrison, Everett, Wash. Meter-operating means. 1,675,919; July 3.
Babineau, Oliver D., Minneapolis, Minn. Insulator. 1,675,589; July 3.
Backlund, Nils O., Stockholm, Sweden, assignor to Bergedorfer Eisenwerk Aktiengesellschaft, Sande, near Bergedorf-Hamburg, Germany. Separating from fluid hydrocarbons other hydrocarbons which precipitate at low temperature. 1,676,069; July 3.
Baily, Thaddeus F., Alliance, Ohio. Shaft-type electric furnace. 1,675,744; July 3.
Baldsiefen, Walter D., Parlin, N. J., and T. H. Rogers, assignors to E. I. du Pont de Nemours & Company, Wilmington, Del. Oil composition and process of retardment developing of rancidity therein. 1,675,631; July 3.
Ballauf, Fritz, F. Muth, and A. Schmelzer, Elberfeld, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Dyestuff intermediates. 1,675,478; July 3.

Bancroft, Frank E., Longsight, Manchester, assignor to Ripaults, Limited, London, England. Variable-capacity electric condenser. 1,676,002; July 3.

Barber Asphalt Company, The. (See Barnes, Eugene L., assignor.)

Bargen, William J., Missoula, Mont. Article of furniture. 1,676,174; July 3.

Barnes, Eugene L., Buffalo, N. Y., assignor to The Barber Asphalt Company, Philadelphia, Pa. Compressor. 1,675,686; July 3.

Barrett, Arthur M., Chicago, Ill. Binder post. 1,675,479; July 3.

Barrett Company, The. (See Weisberg, Louis, assignor.)

Barton, James L., Summer Shade, Ky. Cheese cutter. 1,675,745; July 3.

Bassett, Harry P., Cynthiana, Ky. Manufacture of artificial silk. 1,676,003; July 3.

Bassick Manufacturing Company, The. (See Davis, Ernest W., assignor.)

Bassick Manufacturing Company, The. (See Fesler, Douglas F., assignor.)

Bassick Manufacturing Company, The. (See Pierce, Earl F., assignor.)

Bates, Adelmer M., assignor, by mesne assignments, to Bates Valve Bag Corporation, Chicago, Ill. Wire-tie-twisting apparatus. 1,675,746; July 3.

Bates, C. J., & Son. (See Bates, Hamilton C., assignor.)

Bates, Hamilton C., assignor to C. J. Bates & Son, Chester, Conn. Manicure implement. Des. 75,672; July 3.

Bates Valve Bag Corporation. (See Bates, Adelmer M., assignor.)

Bath, William H., Torrance, Calif. Saw. 1,675,480; July 3.

Bauer, Martin, Berlin, Germany. Handpiece for toothboring machines. 1,675,873; July 3.

Baumann, Harold C., West Long Branch, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Amplifying electrical variations. 1,675,874; July 3.

Bayer, Gaudenz, Augsburg, Germany. Refrigerating apparatus. 1,676,068. July 3.

Bayerische Celluloidwarenfabrik, vorm. Albert Wakker, A.-G. (See Weidinger, C., Gradl, and Schönner, assignors.)

Bazzoni, Lewis J., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Stop mechanism. 1,675,590; July 3.

Beach, H. D., Company, The. (See Gibson, Francis W., assignor.)

Beacon Steel Furniture Co. (See Rosenthal, A. E., and Clarin, assignors.)

Beal, Charles L., San Francisco, Calif. Photograph-enlarging light box. 1,675,783; July 3.

Beam, Charles C., assignor to The Potomac Glass Company, Cumberland, Md. Goblet or similar article. Des. 75,673; July 3.

Beam, Charles C., assignor to The Potomac Glass Company, Cumberland, Md. Goblet or similar article. Des. 75,674; July 3.

Beaney Rubber Company Inc. (See Beaney, Thomas A., assignor.)

Beaney, Thomas A., Poughkeepsie, assignor to Beaney Rubber Company Inc., New York, N. Y. Machine for cutting off and skiving stock. 1,675,875; July 3.

Becker, Joseph, assignor to The Koppers Company, Pittsburgh, Pa. Coking retort oven. 1,675,687; July 3.

Beckmann, Johannes, Altona-Ottensen, Germany. Explosionproof fitting for electric glow lamps. 1,675,837; July 3.

Bell, Daniel, assignor to Invincible Laundry Equipment Co., Chicago, Ill. Cylinder door latch. 1,675,591; July 3.

Bell, Earl R., assignor of one-fourth to A. L. Evans and one-fourth to R. A. Lenox, Covington, Ky. Concrete-spreader mold. 1,675,443; July 3.

Bell & Howell Company. (See Howell, Albert S., assignor.)

Bell, John E. (See Isom, E. W., and Bell.)

Bell Telephone Laboratories, Incorporated. (See Baumann, Harold C., assignor.)

Bell Telephone Laboratories, Incorporated. (See Curtis, Austen M., assignor.)

Bell Telephone Laboratories, Incorporated. (See Hague, Alfred E., assignor.)

Bell Telephone Laboratories, Incorporated. (See Porter, Leslie F., assignor.)

Bellman, Richard J., Winfield, Kans. Egg-candling device. 1,675,632; July 3.

Bemis Bro. Bag Co. (See Young, Raymond L., assignor.)

Bendix Brake Company. (See Andres, William J., assignor.)

Bendix Brake Company. (See Bendix, Vincent, assignor.)

Bendix Brake Company. (See Dodge, Adiel Y., assignor.)

Bendix, Vincent, assignor to Bendix Brake Company, Chicago, Ill. Brake mechanism. 1,675,526; July 3.

Benedict, Herschel A., East Orange, and E. M. Moller, South Orange, N. J. Fastening means. 1,675,688; July 3.

Bennett, Claude C., Seattle, Wash., assignor to A. E. Feragen, Inc., Seattle, Wash. Motor-vehicle wheel gauge. 1,675,481; July 3.

Bennett, James C., assignor of forty per cent to W. H. Fraser, New York, N. Y., five per cent to G. O'Neill, East Orange, and five per cent to A. A. de Bonneville, Bayonne, N. J. Combined propeller and rotor. 1,675,527; July 3.

Benz, Johannes, Dusseldorf, Germany. Centering device for use in machining crank shafts, eccentrics, or the like. 1,676,175; July 3.

Bergedorfer Eisenwerk Aktiengesellschaft. (See Backlund, Nils O., assignor.)

Berger Manufacturing Company, The. (See Schlafly, Julius H., assignor.)

Bernard, William A., assignor to The William Schollhorn Company, New Haven, Conn. Hand tool. 1,675,838; July 3.

Bernier, Henri, Levallois-Perret, France. Tip wagon. 1,676,127; July 3.

Besse, Carl H., et al. (See Bowers, Arlan L., assignor.)

Bethlehem Steel Company. (See McCarty, Richard J., jr., assignor.)

Biggert, Florence C., jr., Crafton, assignor to United Engineering and Foundry Company, Pittsburgh, Pa. Strip mill. 1,676,176; July 3.

Biggs, Charles P., assignor to W. H. Crawford, Mound City, Mo. Electrically-heated dispensing pump. 1,675,689; July 3.

Binz, Arthur, and C. Räth, Berlin, Germany. Preparing nitropyridine arsinic acids. 1,675,402; July 3.

Bird Machine Company. (See Laird, Isaac L., assignor.)

Bishop, Mabel M., Milwaukee, Wis. Instructional musical-harmony card game. 1,675,528; July 3.

Black, Harold S., Newark, N. J., assignor, by mesne assignments, to Western Electric Company, Incorporated. Translating circuits. 1,675,876; July 3.

Blaine, Joseph R., Oak Park, assignor to Miehle Printing Press & Manufacturing Company, Chicago, Ill. Gripper mechanism. 1,675,592; July 3.

Blake, Preston L., Amarillo, Tex. Typewriter copy-holder and line marker. 1,675,784; July 3.

Blanchard, Benjamin F., Fullerton, Calif. Hydraulic underreamer. 1,675,325; July 3.

Blanding, Forrest H., Detroit, Mich., assignor to Chicago Pneumatic Tool Company, New York, N. Y. Hammer drill. 1,675,326; July 3.

Blando, Frank, New York, N. Y. Press. 1,675,444; July 3.

Blando, Frank, New York, N. Y. Press. 1,675,445; July 3.

Bleitner, Eduard. (See Hartmann, O. H., and Bleitner.)

Bloom, David, Berkeley, Calif. Jar closure. 1,675,920; July 3.

Bloom, Julius, West Bronx, N. Y. Wave setter for hair-dressing purposes. 1,675,839; July 3.

Bluemel, Gustave, assignor of one-half to Drying Systems, Inc., Chicago, Ill. Furnace for producing and diluting products of combustion. 1,676,070; July 3.

Boca, Joseph, Flint, assignor to General Motors Corporation, Detroit, Mich. Door. 1,675,633; July 3.

Bock, Alfred C. O. (See Glass, C. F., Bock, and Milligan.)

Boe, Endre A., Watford City, N. Dak. Cutter guard and ledger plate. 1,675,634; July 3.

Bohner, Clyde C., East Orange, assignor to Tung-Sol Lamp Works, Newark, N. J. Projector lamp for motor vehicles. 1,675,690; July 3.

Bohnsack, John A., Cleveland Heights, assignor to The E. F. Hauserman Company, Cleveland, Ohio. Floor shim. 1,675,593; July 3.

Bolinder, Eric A., Stockholm, Sweden. Sawing tool and plane iron. 1,676,071; July 3.

Bordwell, Lavern, New York, N. Y. Beater. 1,676,128; July 3.

Borland, Bruce, Chicago, Ill. Seal. 1,675,327; July 3.

Borland, Bruce, Chicago, Ill. Seal. 1,675,328; July 3.

Bornmann, Carl A., assignor, by mesne assignments, to Agfa Ansco Corporation, Binghamton, N. Y. Catch for camera fronts. 1,675,529; July 3.

Bouchery, August, Brooklyn, assignor of one-half to J. O. Seifert, Auburndale, Flushing, N. Y. Lock. 1,675,594; July 3.

Boudios, Edmond E., Paris, assignor to Les Fils de Emile Boudios, Romilly, s/Seine, Aube, France. Knitting machine for the manufacture of corsets and belts. 1,675,691; July 3.

Bouin, Charles, Boston, Mass. Lamp house. 1,675,595; July 3.

Bowers, Arlan L., Bristow, assignor to F. M. Mahan, Pawhuska, E. McCarty, Wynona, and C. H. Besse, Burfan, Okla. Oil-well derrick. 1,675,635; July 3.

Bowers, W. W. (See Condit, George M., assignor.)

Bowler, William E., Niagara Falls, N. Y., assignor to The Spirella Company, Meadville, Pa. Machine for severing wire fabric. 1,675,747; July 3.

Boye, James H., Chicago, Ill. Curtain and portière rod. Des. 75,675; July 3.

Boyet, John F., Covington, Ky., assignor of one-half to W. W. Burns, Washington, D. C. Toy. 1,675,482; July 3.

Boynton, Vern K., Beaumont, Tex., assignor to Perry & Webster, Inc., New York, N. Y. Apparatus for fume control. 1,675,403; July 3.

Brack, Julius L., Twining, Mich. Cultivator. 1,675,636; July 3.

Bradbury, Clifford C., Glencoe, Ill. Variable-pitch gear. 1,675,596; July 3.

Bradley Washfountain Company. (See Heine, Herman E., assignor.)

Brandon, Delia, Oak Park, Ill. Skin preparation. 1,675,840; July 3.

Braselton, Chester H. (See MacLaren, Fred B., assignor.)

Brayton, Harold M., Dover, N. J. Powder time fuse. 1,675,530; July 3.

Brewster, Harry C., Shreveport, La. Drilling machine. 1,676,129; July 3.

Bricker, Orrin W., Cleveland, assignor, by mesne assignments, to The Ohio Brass Company, Mansfield, Ohio. Rail-bond straightener. 1,675,785; July 3.

Briggs, William P., New Bedford, Mass. Adapter for plug and cut-outs. 1,675,637; July 3.

Brinkerhoff, Frederic H., Belleville, N. J. Pilot-light-controlled gas valve. 1,675,638; July 3.

Bristol, Carlton W. (See Kuntney, G. W., and Bristol.)

Bristol Company, The. (See Kuntney, G. W., and Bristol, assignors.)

Britnell, Charles A., Marrickville, near Sydney, New South Wales, Australia. Cleaning the cock connections between mains and service or branch pipes. 1,675,968; July 3.

Brockway, Don M., Los Angeles, Calif. Delivery apparatus. 1,676,072; July 3.

Broido, Benjamin N., assignor to The Superheater Company, New York, N. Y. Apparatus for joining pipes. 1,675,329; July 3.

Bronander, Wilhelm B., Montclair, N. J., assignor to American Machine & Foundry Company. Machine for labeling circular articles. 1,675,692; July 3.

Bronson, Adelbert E., assignor to The Dill Manufacturing Company, Cleveland, Ohio. Rim nut. 1,675,597; July 3.

Brooks, William J., Letchworth, England. Calendar. 1,675,483; July 3.

Brower, Charles E., and C. N. Hines, Yuma, Colo. Seeding machine. 1,676,130; July 3.

Brown, Carl D., assignor to Draper Corporation, Hopedale, Mass. Picker mechanism for looms. 1,676,214; July 3.

Brown, Henry B., assignor to Taylor Instrument Companies, Rochester, N. Y. Thermometer. 1,675,531; July 3.

Brown, Marion, and J. Green, National Home, Wis. Safety gate for railway crossings. 1,675,447; July 3.

Brown, Newton N., assignor to Gold Medal Camp Furniture Company, Racine, Wis. Collapsible bar. 1,676,073; July 3.

Brown, Newton N., assignor to Gold Medal Camp Furniture Co., Racine, Wis. Chair. 1,676,074; July 3.

Bruijnes, Johannes. (See Holst, G., Oosterhnis, and Bruijnes.)

Bryant Electric Company, The. (See Anderson, Carl E., assignor.)

Bryce, James W., Bloomfield, N. J., assignor to International Time Recording Company of New York, Endicott, N. Y. Alarm device for clocks in signaling systems. 1,676,075; July 3.

Buchanan, Monty J., Seattle, Wash. Wall-board-joint filler strip. 1,676,076; July 3.

Buchanan, Stephen N., New York, N. Y., assignor to The Thomas & Betts Co., Elizabeth, N. J. Mounting electrical fittings. 1,675,921; July 3.

Buchholz, Frank. (See Buchholz, William C. and F.)

Buchholz, William C. and F., Brooklyn, N. Y. Illuminated dial. Re17,017; July 3.

Buchner, Max, Hanover-Kleefeld, Germany, assignor to A. F. Meyerhofer, Zurich, Switzerland. Production of carbonates. 1,675,786; July 3.

Buck, Henry L., et al. (See Mason, Charles T., assignor.)

Buckeye Steel Castings Company, The. (See Johnson, George T., assignor.)

Buffalo Hammer Mill Corporation. (See Mursch, John, assignor.)

Bull, Fredrik R., deceased, by Hilditch and U. Strom, Oslo, Norway, executors. Automatic printing machine. 1,675,969; July 3.

Bullington, Frank A., Kansas City, Mo. Internal-combustion engine. 1,676,212; July 3.

Bullington, Frank A., assignor to Bullington Motors, Kansas City, Mo. Transmission for rotary engines. 1,676,211; July 3.

Bullington Motors. (See Bullington, Frank A., assignor.)

Bulova, Adolph, assignor to Bulova Watch Company, Inc., New York, N. Y. Wrist-watch bracelet. 1,676,213; July 3.

Bulova Watch Company. (See Bulova, Adolph, assignor.)

Bultman, Charles E., decreased; I. M. Bultman, executrix, assignor to E. D. MacDougall, Chicago, Ill. Insulated vessel. 1,676,004; July 3.

Bultman, Ida M., executrix. (See Bultman, Charles E.)

Bunker, Arthur C., Montclair, assignor to Crocker-Wheeler Electric Manufacturing Company, Ampere, N. J. Motor-starting switch. 1,676,077; July 3.

Bunker, Frank S., Long Beach, Calif., assignor to J. W. Hughes, Compton, Calif. Pipe tongs. 1,675,748; July 3.

Burdt, Hugo C., Chicago, Ill. Light. 1,675,877; July 3.

Burke, Robert F., Phoenixville, Pa., assignor to Heine Boiler Company, St. Louis, Mo. Truck-body construction. 1,675,317; July 3.

Burns, Walter W. (See Boyet, John F., assignor.)

Burress, John R., Arlington, Tex., assignor to W. A. Cenee and W. A. Davis, Tulsa, Okla. Automatic railway gate. 1,676,227; July 3.

Burrowes, E. T., Company, The. (See King, William J., assignor.)

Burt, Isaac E., Minneapolis, Minn. Necktie rack. 1,675,922; July 3.

Burt machine Company. (See Wild, Charles H., assignor.)

Burton, Ralph J. (See Powell, Clarence H., assignor.)

Butler, W. N., et al., trustees. (See Mathews, Theodore A., assignor.)

Byrd, Hugh L., Stockport, assignor to Drey, Simpson & Company, Limited, South Reddish, near Stockport, England. Tensioning yarns or the like in looms, winding, doubling, and other textile machines. 1,675,330; July 3.

Cabrera, Charles T., Philadelphia, Pa., assignor of one-fourth to B. J. Macdonald, New York, N. Y., and one-tenth to W. W. Williamson, Philadelphia, Pa. Induction exhauster. 1,676,078; July 3.

Calkins & Holden. (See Clarke, James A., assignor.)

Calvo, José, New York, N. Y. Flying toy. 1,675,970; July 3.

Cameron Appliance Company. (See Dissel, Theodore A., assignor.)

Cameron, Robert F. (See Holcomb, Jarrett C., assignor.)

Campos, Adolfo, Philadelphia, Pa. Picture hanger. 1,676,131; July 3.

Camyre, Joseph J., Springfield, Mass. Combination floor lamp and ash tray. Des. 75,676; July 3.

Carlisle, Paul J. (See Magill, P. L., and Carlisle.)

Carr Fastener Company. (See Carr, Fred S., assignor.)

Carr Fastener Company. (See Walters, Rollo F., assignor.)

Carr, Fred S., Newton, Mass., assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,675,787; July 3.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,675,788; July 3.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,675,789; July 3.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,675,790; July 3.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,675,791; July 3.

Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,675,792; July 3.

Carson, Ira, Barberton, Ohio, assignor to The Diamond Match Company, Chicago, Ill. Inking mechanism for printing presses. 1,675,448; July 3.

Cavazos, Isidore, Kingsville, Tex. Rotary motor. 1,675,693; July 3.

Cease, W. A., et al. (See Burress, John R., assignor.)

Central Alloy Steel Corporation. (See Fitz Gerald, Joseph G., assignor.)

Central National Bank of Cleveland. (See McKee, Willis, assignor.)

Cessna, Charles L., Fort Dodge, Iowa. Rat trap. 1,675,532; July 3.

Chain Belt Company. (See Shafer, Samuel, jr., assignor.)

Chamberlain, Mildred, Chicago, Ill., assignor to American Home Economics Association. Badge or similar article. Des. 75,677; July 3.

Champion, Albert, assignor to A C Spark Plug Company, Flint, Mich. Instrument panel. 1,675,639; July 3.

Chandler Motor Car Company. (See Andrade, Julius, assignor.)

Chapman, William H., Montclair, N. J., assignor to General Motors Corporation, Detroit, Mich. Work holder. 1,675,449; July 3.

Charlier, Camille, and A. Errera, Brussels, Belgium. Cooking pot. 1,675,640; July 3.

Chesterton, Arthur W., Brookline, Mass. Packing. 1,675,923; July 3.

Chetteville, Rudolph, New York, N. Y. Camera focusing attachment. 1,675,598; July 3.

Chicago North Shore & Milwaukee Railroad Company. (See Otis, Harold A., assignor.)

Chicago Pneumatic Tool Company. (See Blanding, Forrest H., assignor.)

Chicago Telephone Supply Company. (See Frost, Herbert H., assignor.)

Christensen, Norman V., assignor to Union Special Machine Company, Chicago, Ill. Filled-bag-sewing machine. 1,675,450; July 3.

Christman, Matthias, Springfield, Mo. Journal box. 1,675,641; July 3.

Class, August, Harsewinkel, Germany. Knotter for binding mowers and straw binders. 1,676,177; July 3.

Clarin, Werner E. (See Rosenthal, A. E., and Clarin.)

Clark, John J. (See Witherell, Eugene R., assignor.)

Clarke, James A., Yonkers, assignor to Calkins & Holden, New York, N. Y. Powder box. 1,676,132; July 3.

Claybourn, Leslie W., Milwaukee, Wis. Mixing machine. 1,675,694; July 3.

Claybourn, Leslie W., Milwaukee, Wis. Conditioning printing ink. 1,675,695; July 3.

Clayton, Andrew B., Union, assignor to The Singer Manufacturing Company, Elizabeth, N. J. Presser mechanism for sewing machines. 1,675,696; July 3.

Clement, Edward E., assignor to E. F. Colladay, Washington, D. C. Radio metering system. Re17,023; July 3.

Cleveland Graphite Bronze Company, The. (See Johnson, Carl W., assignor.)

Clewell, John H., Arlington, N. J., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Manufacture of decorative plastic. 1,675,642; July 3.
Cody, James M., Seattle, Wash. Burglar alarm. 1,675,878; July 3.
Coe, John E., Jamestown, N. Y. Tool box. 1,675,484; July 3.
Cohn, Aaron, Philadelphia, Pa. Damper. 1,675,404; July 3.
Cohoon, Luther E., La Grange, Ill. Toilet construction. 1,675,841; July 3.
Coleman, Harris C., Fort Worth, assignor, by mesne assignments, to Tray Service Company, Dallas, Tex. Detachable supporting stand. 1,675,794; July 3.
Colladay, Edward F. (See Clement, Edward E., assignor.)
Collins, Richard P., Norwood, Pa. Attaching flue pipes in chimneys. 1,676,133. July 3.
Commonwealth Steel Company. (See Westlake, Charles T., assignor.)
Condit, George M., Waterville, assignor of one-half to W. W. Bowers, Waterbury, Conn. Switch socket. 1,676,079; July 3.
Conroy, John F., sr. (See O'Connor, William H., assignor.)
Constantine, Arthur R. (See Harley, W. S., and Constantine.)
Conti, Eugene, Cliffside Park, N. J., assignor to A. Herz, New Rochelle, N. Y. Gumming machine. 1,676,005; July 3.
Coover, Harry S. (See Walsh, T., and Coover.)
Cope, Frank T., assignor to The Electric Furnace Company, Salem, Ohio. Discharging and quenching mechanism for furnaces. 1,675,795; July 3.
Copeman, Lloyd G., Flint, Mich. Sharp-freezing container for mechanical refrigerators. 1,675,599; July 3.
Cornwell, Virgil O., assignor to The Federal Glass Company, Columbus, Ohio. Apparatus for forming glassware. 1,675,971; July 3.
Cory, Chas., & Son, Incorporated. (See Oneal, Lloyd E., assignor.)
Coughlan, Robert E., Chicago, Ill. Apparatus for treating boilers and boiler feed. 1,676,134; July 3.
Coulston, Earl V., Cleveland, Ohio. Combined electrical stove and toaster. 1,675,924; July 3.
Cox, Walter C., Denver, Colo. Coursing track. 1,675,972; July 3.
Craig, Ellsworth. (See Pfeifer, Ferdinand A., assignor.)
Crandall, Irving B., East Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. System for producing and transmitting high-frequency sound energy. 1,675,879; July 3.
Crawford, Preston M., Pittsburgh, Pa. Form for concrete. 1,675,749; July 3.
Crawford, William H. (See Biggs, Charles P., assignor.)
Crocker-Wheeler Electric Manufacturing Company. (See Bunker, Arthur C., assignor.)
Crook, Louis H., Washington, D. C., assignor of one-half to H. Jakobsson, Takoma Park, Md. Antioscillating and stress-reducing device for cables. 1,676,006; July 3.
Csanyi, Henry, New York, N. Y. Battery cell. 1,676,007; July 3.
Csanyi, Henry, assignor to L. Klopman and W. W. Huselton, deceased, New York, N. Y.; S. Lebson, executor, assignor to Dry Storage Battery Corporation, Philadelphia, Pa. Battery cell. 1,675,973; July 3.
Cumfer, Harry A., assignor to "Guyton & Cumfer Mfg. Co.," Chicago, Ill. Shingle-making machine. 1,675,533; July 3.
Curtis, Austen M., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Electric-current transmission. 1,675,880; July 3.
Cuyler, Frederick A., Rochester, assignor to O. W. Cuyler, Model City, N. Y. Can opener. 1,676,135; July 3.
Cuyler, Otto W. (See Cuyler, Frederick A., assignor.)
Dahl, George B., Brooklyn, N. Y. Oil burner. 1,675,842; July 3.
Dahl, George B., Brooklyn, N. Y. Oil burner. 1,675,843; July 3.
Dahlstrom, Frank P., and C. L. Larson, Worcester, Mass., assignors to The American Steel and Wire Company of New Jersey. Rail bond. 1,675,750; July 3.
Davidson, Alexander R., Edmonton, Alberta, Canada. Phonograph-record-rotating mechanism. 1,675,697; July 3.
Davis, Charles A., Seattle, Wash. Pressure siphon. 1,675,534; July 3.
Davis, Ernest W., Oak Park, assignor to The Bassick Manufacturing Company, Chicago, Ill. Lubricant compressor. 1,675,451; July 3.
Davis, Henry A., Jeffersonville, Ind. Liquid-fuel burner. 1,676,080; July 3.
Davis, James L., Adrian, Mo. Brake attachment for motor vehicles. 1,676,136; July 3.
Davis, John W. (See Tolman, R. C., De Baufre, Davis, and Roberts.)
Davis, W. A., et al. (See Burress, John R., assignor.)
Day, Charles, Fort Smith, Ark. Timer brush. 1,675,925; July 3.
Day, William H., East Haven, Conn., assignor, by mesne assignments, to Remington Rand Inc., New York, N. Y. Index or file. 1,675,331; July 3.
Dayton Scale Company. (See Rogers, Joseph E., assignor.)
Dean, Reginald S., La Grange, Ill., and W. E. Hudson, Los Angeles, Calif., assignors to Western Electric Company, Incorporated, New York, N. Y. Storage-battery grid. 1,675,643; July 3.
Dean, Reginald S., La Grange, Ill., and W. E. Hudson, Los Angeles, Calif., assignors to Western Electric Company, Incorporated, New York, N. Y. Age-hardening process. 1,675,644; July 3.
De Baufre, William L. (See Tolman, R. C., De Baufre, Davis, and Roberts.)
De Bellescize, Henri J. J. M., de R., Toulon, France. Direction finder. 1,675,332; July 3.
De Bonneville, Arthur A., et al. (See Bennett, James C., assignor.)
De Camp, Ray E., Glendale, Calif., assignor to Westinghouse Electric & Manufacturing Company. Control mechanism. 1,675,333; July 3.
Deere & Company. (See Paul, William L., assignor.)
Deere & Company. (See Strandlund, Carl G., assignor.)
De Haven, Avery S. (See Fremon, J. A., and De Haven.)
Del Castillo, Guillermo D., Habana, Cuba. Safety razor. 1,675,793; July 3.
De Mazuroff, George, New York, N. Y. Mail box. 1,676,008; July 3.
Dempster Mill Manufacturing Company. (See Schlachter, Henry, assignor.)
Denney, Lawrence A., Chicago, Ill. Apparatus for forming rope mats. 1,675,881; July 3.
Dennis, William J., Chicago, Ill. Weather stripping. 1,675,844; July 3.
Denyes, Harry M., Saginaw, assignor to General Motors Corporation, Detroit, Mich. Steering gear. 1,675,645; July 3.
Deppé, William P. (See Strong, William E. S., assignor.)
Detlefsen, Peter, North Bend, Nebr. Trimming tool. 1,675,535; July 3.
Deutsche Werke Kiel Aktiengeselischaft. (See Kade, Friedrich, assignor.)
Dexter Folder Company. (See Rader, Earl D., assignor.)
Diamond Match Company, The. (See Carson, Ira, assignor.)
Diamond Match Company, The. (See Donnelly, Joseph C., assignor.)
Diamond Match Company, The. (See Wright, Charles F., assignor.)
Dienner, John A., assignor to Stromberg Motor Devices Co., Chicago, Ill. Liquid-level indicator. 1,675,698; July 3.
Dill Manufacturing Company, The. (See Bronson, Adelbert E., assignor.)
Dills, Henry W. (See Faucher, E. W., and Dills.)
Dissel, Theodore A., Winchester, assignor to Cameron Appliance Company, Everett, Mass. Treating articles being galvanized. 1,675,926; July 3.
Doble, Abner, assignor to Doble-Detroit Steam Motors Co., Detroit, Mich. Steam-generator regulation. 1,675,600; July 3.
Doble-Detroit Steam Motors Co. (See Doble, Abner, assignor.)
Dodge, Adiel Y., South Bend, Ind., assignor to Bendix Brake Company, Chicago, Ill. Brake mechanism. 1,675,536; July 3.
Dodge, William E., Shawnee, Okla. Favor distributor. 1,676,137; July 3.
Dole, Myron W., Belmont, Mass. Liquid pump. 1,675,405; July 3.
Domestic Stoker Company. (See Hall, C. H., and Lloyd, assignors.)
Donle, Harold P., Meridan, Conn., assignor, by mesne assignments, to Radio Corporation of America. Electron device. 1,675,334; July 3.
Donnelly, Joseph C., Barberton, Ohio, assignor to The Diamond Match Company, Chicago, Ill. Machine for making match books. 1,676,009; July 3.
Dorer, Oscar H. (See Spillmann, M., and Dorer.)
Dorer, Oscar H., East Orange, N. J., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Waterworks auxiliary pump. 1,675,845; July 3.
Doroski, John, Calverton, N. Y. Combined planter and potato digger. 1,676,233; July 3.
Doty, John W., Olney, Ill. Mop. 1,675,601; July 3.
Douglas, James D., Detroit, Mich. Portfolio. 1,675,406; July 3.
Douglas, Paul H. (See Thomas, I. D., and Douglas.)
Downing, Omer L., South Norwood, Ohio. Adjustable hose cap for fire-department connections. 1,676,081; July 3.
Doyle, John T. (See Kliburn, I. J., and Doyle.)
Draper Corporation. (See Brown, Carl D., assignor.)
Draper Corporation. (See Hammett, O. C., and Scott, assignors.)
Draper Corporation. (See Merrill, Charles F., assignor.)
Drenning, Percy R., Baltimore, Md., assignor, by mesne assignments, to The Symington Company, New York, N. Y. Draft rigging. 1,676,178; July 3.
Drevitson, Carl B., Somerville, Mass. Golf tee. 1,675,335; July 3.
Drey, Simpson & Company. (See Byrd, Hugh L., assignor.)
Droege, Charles E. (See Moseley, T. H., and Droege.)
Dry Storage Battery Corporation. (See Csanyi, Henry, assignor.)

Drying Systems, Inc. (See Bluemel, Gustave, assignor.)
Duffy, James A., Fairmont, W. Va. Car chair. 1,676,010; July 3.
Dunn, Albert H. (See Lyans, C. K., and Dunn.)
Du Pont, E. I., de Nemours & Company. (See Baldsiefen, W. D., and Rogers, assignors.)
Du Pont, E. I., de Nemours & Company. (See Clewell, John H., assignor.)
Du Prel, Dr., Elektromedizenische Apparate G. m. b. H. (See Du Prel, Gerhard F., assignor.)
Du Prel, Gerhard F., assignor to Dr. du Prel Elektromedizenische Apparate G. m. b. H., Munich, Germany. High-frequency circuits. 1,675,882; July 3.
Dvorine, Israel, Baltimore, Md. Optometrical instrument. 1,675,407; July 3.
Dyer, Reamey H., Roanoke, Va. Waste retainer. 1,675,751; July 3.
Dyke, Darrell F., assignor to The Seng Company, Chicago, Ill. Bed davenport. 1,675,883; July 3.
Edmonds, George P., assignor to G. & W. Electric Specialty Company, Chicago, Ill. Electrical-conductor-protecting means. 1,675,408; July 3.
Edmonds, Warren O., Kansas City, Mo., assignor to Westinghouse Electric & Manufacturing Company. Relay system. 1,675,336; July 3.
Eitelgeorge, Frank A., Denver, Colo. Window wiper. 1,675,537; July 3.
Electric Auto-Lite Company, The. (See Gilchrist, C. F., and Patterson, assignors.)
Electric Fireplace Manufacturing Company. (See Meany, D. N., and Ellsworth, assignors.)
Electric Furnace Company, The. (See Cope, Frank T., assignor.)
Electrical Improvements Limited. (See Grant, Lewis C., assignor.)
Electrolux Servel Corporation. (See Von Platen, B. C., and Munters, assignors.)
Elliott Company. (See Rodgers, James P., assignor.)
Ellsworth, Edward N. (See Meany, D. N., and Ellsworth.)
Elmen, Gustaf W., Leonia, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Magnetic material. 1,675,884; July 3.
Embossing Company, The. (See Graham, Tom C., assignor.)
Engineering Specialties Company. (See Replogle, Delbert E., assignor.)
Entz, Theodore B. (See Klock, R. A., and Entz.)
Epstein, Albert K. (See Sokolsky, Louis, assignor.)
Epstein, Albert K., Chicago, Ill. Providing a new food product and improved product produced thereby. 1,676,138; July 3.
Errera, Abraham. (See Charlier, C., and Errera.)
Ettlinger, Ralph, Kansas City, Mo. Sausage casing. 1,676,082; July 3.
Evans, Albert E., Pittsburgh, Pa., assignor to Pittsburgh Plate Glass Company. Glass-cutting table. 1,676,011; July 3.
Evans, Arthur L., et al. (See Bell, Earl R., assignor.)
Evans, Will, Inglewood, Calif. Mop. 1,675,699; July 3.
Everedy Company, The. (See Lebherz, Harry J., assignor.)
Failing, Otto C. (See Mason, A. R., and Failing.)
Failor, Charles W., Pittsburgh, Pa., assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,675,927; July 3.
Fairchild, William, assignor to Albany Perforated Wrapping Paper Company, Albany, N. Y. Dispensing cabinet. 1,675,700; July 3.
Falk Corporation, The. (See Frentzel, Herman E., assignor.)
Farley, John C., Opelika, Ala. Vacuum-tube contact device. 1,675,485; July 3.
Farr, Fred D., Perry, N. Y., assignor to A. Schrader's Son, Incorporated, Brooklyn, N. Y. Valve cap. 1,675,752; July 3.
Farwell, Fay O., Toledo, Ohio. Loud speaker. Re17,024; July 3.
Fascetta, Michael, New York, N. Y. Antiseptic container for barkers' tools. 1,676,012; July 3.
Faucher, Edgar W., and H. W. Dills, Los Angeles, Calif. Radiator-cap ornament. Des. 75,678; July 3.
Faulconer, Richard R. and W. E., Lewiston, Mo. Saw set. 1,676,013; July 3.
Faulconer, William E. (See Faulconer, Richard R. and W. E.)
Faure, Charles E., Ivry-sur-Seine, assignor to Société à Responsabilité Limitée Bonnart & Cie., Paris, France. Fastening device for belts. 1,676,083; July 3.
Faust, William N., Kansas City, Mo. Suspended aerial-cable terminal. 1,675,602; July 3.
Fawick, Thomas L., Racine, Wis. Transmission. 1,675,538; July 3.
Fecher, Jacob, Ludenscheid, assignor to Lüdenscheider Metall-Werke Akt.-Ges. vorm. Jul. Fischer & Basse, Ludenscheid, Westphalia, Germany. Safety locking device. 1,676,014; July 3.
Fedders, John M., Buffalo, N. Y., assignor to Fedders Manufacturing Company, Inc. Radiator. 1,675,796; July 3.
Fedders Manufacturing Cimpany. (See Fedders, John M., assignor.)
Federal Glass Company, The. (See Cornwell, Virgil O., assignor.)
Federal Glass Company, The. (See Middendorf, David L., assignor.)
Federal Phosphorus Company. (See Neville, Neil, assignor.)
Feick, Otto, Schonau-on-the-Brenz, Germany. Sporting apparatus. 1,676,015; July 3.
Ferngen, A. E., Inc. (See Bennett, Claude C., assignor.)
Fesler, Douglas F., assignor to The Bassick Manufacturing Company, Chicago, Ill. Lubricant compressor. 1,675,452; July 3.
Field, Burnham E. (See Franks, R. and Field.)
Fifer, William A., assignor to Quincy Show Case Works, Quincy, Ill. Display case or similar article. Des. 75,679; July 3.
Fifth Avenue Coach Company. (See Forrester, Michael J., assignor.)
Fingerprint Machine Corporation. (See Glass, C. F., Bock, and Milligan, assignors.)
Fiuk, Colin G., Yonkers, N. Y. Form of tungsten and producing the same. 1,675,486; July 3.
Finney, Gassius L., et al. (See Green, Lee B., assignor.)
Firestone Tire and Rubber Company, The. (See Maranville, Harvey F., assignor.)
Fischer, Charles, New York, N. Y. Screen for telephones. 1,675,846; July 3.
Fischer, Sigmund, Providence, R. I. Unit for use in the manufacture of separable cuff links. 1,675,797; July 3.
Fisher, Alfred L., Yale, Iowa. Control for aircraft. 1,675,928; July 3.
Fisher, Carl G., Port Washington, N. Y. Electric switch attachment. 1,675,847; July 3.
Fisher, Roy, Los Angeles, Calif. Combined radiator-cap ornament and traffic signal. Des. 75,680; July 3.
Fitch, Benjamin F., Greenwich, Conn., assignor to Motor Terminals Company, Wilmington, Del. Freight truck. 1,675,701; July 3.
Fitz Gerald, Joseph G., assignor to Cental Alloy Steel Corporation, Canton, Ohio. Zinc coating ferrous metal. 1,675,646; July 3.
Fitz Harris, Thomas J. New Rochelle, assignor to Franklin Simon & Co. Inc., New York, N. Y. Shoe. Des. 76,681; July 3.
Flagg, Charles N., Meriden, Conn. Combination float and diaphragm valve. 1,676,084; July 3.
Fleming, Wills M., Holyoke, Mass., assignor to Worthington Pump and Machinery Corporation, New York, N. Y. Valve. 1,676,179; July 3.
Flori, Louis, Boulogne sur Seine, France. Press for drying and ironing wearing linen. 1,675,929; July 3.
Flumerfelt, Olin F., Hamburg, N. Y. Tire-inflating apparatus. 1,676,139; July 3.
Folberth, Frederick G. and W. M., Cleveland, Ohio, assignors to Trico Products Corporation, Buffalo, N. Y. Windshield cleaner. 1,675,337; July 3.
Folberth, Frederick G. and W. M., Cleveland, Ohio, assignors to Trico Products Corporation, Buffalo, N. Y. Windshield cleaner. 1,675,338; July 3.
Folberth, William M. (See Folberth, Frederick G. and W. M.)
Foley, Charles B., Fort Wayne, Ind. Traffic-control system. 1,675,339; July 3.
Forrester, Michael J., Astoria, N. Y., assignor to Fifth Avenue Coach Company. Vehicle top. 1,675,539; July 3.
Forry, Archie D., Clarksville, Iowa. Adjustable game device. 1,675,453; July 3.
Fowler, William R., Hamilton, Ohio. Attachment for felt conditioners. 1,675,540; July 3.
Fox, Gordon, assignor to Freyn Engineering Company, Chicago, Ill. Roll-heating means. 1,676,018; July 3.
Francis, Daniel R., assignor to The Waterbury Tool Company, Waterbury, Conn. Remote control for rolling-mill screw downs. 1,676,180; July 3.
Francis, Jacob R. (See Heginbottom, W. G., and Francis.)
Frankel, William, Astoria, N. Y. Peephole for doors. 1,676,140; July 3.
Franklin Railway Supply Company. (See Martin, Frederick W., assignor.)
Franklin Railway Supply Company. (See Roberts, Montague H., assignor.)
Franklin Simon & Co. Inc. (See Fitz Harris, Thomas J., assignor.)
Franks, Russell, Brooklyn, and B. E. Field, Douglaston, N. Y., assignors to Haynes Stellite Company. Alloy and making same. 1,675,798; July 3.
Franz, Frederick, Woodhaven, N. Y. Treatment of containers. 1,675,541; July 3.
Franzen, Frank, et al. (See Schiffko, Ewald J., assignor.)
Fraser, William H., et al. (See Bennett, James C., assignor.)
Frazier, Chauncey E., Washington, Pa. Melting furnace. 1,675,542; July 3.
Fremon, Jules A., and A. S. De Haven, Leeper, Mo., assignors to W. A. Sheaffer Pen Co., Fort Madison, Iowa. Fountain pen desk stand. 1,675,543; July 3.
French, Raymond E., Los Angeles, Calif. Nonclogging baseball-shoe spike. 1,675,885; July 3.
Frentzel, Herman E., assignor to The Falk Corporation, Milwaukee, Wis. Bending machine. 1,676,215; July 3.

Freyn Engineering Company. (See Fox, Gordon, assignor.)
Fried. Krupp Aktiengesellschaft. (See Schön, L., and Leukert, assignors.)
Friis, Harald T., Red Bank, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Transmission regulation. 1,675,848; July 3.
Fritchey, Franklin W., Cumberland, Md. Bearing. 1,676,181; July 3.
Frost, Herbert H., Chicago, Ill., assignor, by mesne assignments, to Chicago Telephone Supply Company, Elkhart, Ind. Jack. 1,676,016; July 3.
Fuller Brush Company, The. (See Hines, William J., assignor.)
Fuller, Claud E., assignor to New York Brick Handling Corporation, New York, N. Y. Kiln bottom and method of building kilns. 1,676,182; July 3.
Fuller, John N., Lansdale, Pa. Internal-combustion engine. 1,675,702; July 3.
Fulton Syphon Company, The. (See Giesler, Jean V., assignor.)
Fultz, Miles E., Brooklyn, assignor to Western Electric Company, Incorporated, New York, N. Y. Alarm and control device. 1,675,849; July 3.
G. & W., Electric Specialty Company. (See Edmonds, George P., assignor.)
Gabriel, John C., assignor to Western Electric Company, Incorporated, New York, N. Y. High-frequency transmission. 1,675,890; July 3.
Gabrielson, Otto S., and M. J. Wennerstrom, Minneapolis, Minn. Anchoring device for boats. 1,675,930; July 3.
Gade, Harald F., Philadelphia, Pa., assignor to Standard Pressed Steel Co., Jenkintown, Pa. Lubricating means for loose pulleys and the like. 1,675,703; July 3.
Gahagan, Herman I., and W. P. Aron, Dallas, Tex., assignors, by mesne assignments, to The Whisk Razor Corporation, Buffalo, N. Y. Razor. 1,675,487; July 3.
Galloway, Robert M., and R. E. Sterling, assignors to The National Automatic Tool Company, Richmond, Ind. Reversing mechanism for drilling machines. 1,675,850; July 3.
Gambarotta, Piero, Quinto al Mare, Italy. Speed-indicating device. 1,675,974; July 3.
Gano, Harlan S., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Thermal regulator. 1,675,340; July 3.
Gardner, Harold A., sr., Rochester, N. Y. Antisiphon trap. 1,675,409; July 3.
Garfunkle, Jacob N. Cincinnati, Ohio. Attachment for razors. 1,676,183; July 3.
Garraway, Lee O., Memphis, Tenn. Feed-water heater for locomotive boilers. 1,676,141; July 3.
Gartner, John H., San Francisco, Calif., assignor of one-fifth to P. S. Higgins, one-fifth to J. D. Skelly, and one-fifth to W. Shackleton. Presure-indicating device. 1,675,410; July 3.
Gas Research Company, The. (See Smith, Harry F., assignor.)
Gass, Elmer J., and D. W. Thurston, Detroit, Mich. Form for concrete and the like. 1,676,184; July 3.
Gatkowski, Stanley, Chicago, Ill. Electric sign. 1,675,851; July 3.
Geer, Edmund S., New York, N. Y. Record stop. 1,675,852; July 3.
General Cable Corporation. (See Atkinson, R. W., and Shurts, assignors.)
General Electric Company. (See Mittag, Albert H., assignor.)
General Electric Company. (See White, William C., assignor.)
General Motors Corporation. (See Boca, Joseph, assignor.)
General Motors Corporation. (See Chapman, William H., assignor.)
General Motors Corporation. (See Denyes, Harry M., assignor.)
General Motors Corporation. (See Knudsen, William S., assignor.)
General Motors Corporation. (See Lewellen, Albert R., assignor.)
General Motors Corporation. (See Martin, William L., assignor.)
General Motors Corporation. (See Spencer, Louis M., assignor.)
General Motors Corporation. (See Taub, Alex, assignor.)
General Motors Corporation. (See Taylor, Herbert B., assignor.)
General Motors Research Corporation. (See Short, Charles R., assignor.)
General Rubber Company. (See Rose, Reed P., assignor.)
Genjack, Conrad, Vancouver, British Columbia, Canada. Can-opening device. 1,675,647; July 3.
Gerrard Company, The. (See Rychlewski, Frank, assignor.)
Gerrish, Lloyd E., Kittery, Me. Toy. 1,676,085; July 3.
Gesellschaft für Drahtlose Telegraphie m. b. H. (See Meissner, Alexander, assignor.)
Gibson, Calder C., Buffalo, N. Y. Sealing press. 1,676,017; July 3.
Gibson, Francis W., West Roxbury, Mass., assignor to The H. D. Beach Company, Coshocton, Ohio. Display stand. 1,676,216; July 3.
Gibson, Francis W., West Roxbury, Mass., assignor to The H. D. Beach Company, Coshocton, Ohio. Table. 1,676,217; July 3.
Giesler, Jean V., assignor, by mesne assignments, to The Fulton Syphon Company, Knoxville, Tenn. Thermostatically-controlled valve unit. 1,675,341; July 3.
Gilbert, A. C., Company, The. (See Gilbert, Alfred C., assignor.)
Gilbert, Alfred C., Hamden, assignor, by mesne assignments, to The A. C. Gilbert Company, New Haven, Conn. Casing for fruit-juice extractor. Des. 75,682; July 3.
Gilchrist, Clarence F., and H. R. Patterson, assignors, by mesne assignments, to The Electric Auto-Lite Company, Toledo, Ohio. Combined timer and distributor. 1,676,185; July 3.
Gillinder Brothers, Inc. (See Gillinder, Edwin B., assignor.)
Gillinder, Edwin B., assignor to Gillinder Brothers, Inc., Port Jervis, N. Y. Light-diffusing fixture. Des. 75,683; July 3.
Gillings, Charles, Liverpool, England, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Director circuits. 1,675,544; July 3.
Girtanner, Alexander, Bayside, N. Y., and J. J. Mc Nulta, Summit, N. J., assignors to Girtanner Engineering Corporation, New York, N. Y. Soot-removing device. 1,676,019; July 3.
Girtanner Engineering Corporation. (See Girtanner, A., and McNulta, assignors.)
Gits, Remi J., assignor of one-third to W. E. Hann, Chicago, Ill. Lubricating means. 1,676,086; July 3.
Glass, Charles F., and A. C. O. Bock, Brooklyn, N. Y., and J. F. Milligan, Ridgefield Park, N. J., assignors to Fingerprint Machine Corporation. Fingerprint machine. 1,676,020; July 3.
Gold Medal Camp Furniture Manufacturing Company. (See Brown, Newton N., assignor.)
Goldberg, Herman, Washington, D. C. Direction-indicating signal. 1,675,342; July 3.
Goldman, Alvin D. (See Methudy, Carl E., assignor.)
Goldschmidt, Rudolf, Charlottenburg, Berlin, Germany. Mechanism for measuring the frequency of the pulse. 1,675,799; July 3.
Goldschmidt, Rudolf, Charlottenburg, Berlin, Germany. Mechanism for measuring the frequency of the pulse. 1,675,800; July 3.
Goldsmith, Bertram J., and E. Koeb, New York, assignors, by mesne assignments, to Perfect Window Regulator Corporation, Long Island City, N. Y. Window and door construction. 1,675,704; July 3.
Goodkewitz, Hyman S., Suffolk, Va. Vehicle wheel rim. 1,675,488; July 3.
Gorman, John. (See Poland, John, assignor.)
Gorman, Thomas A., Johnstown, Pa. Stamping apparatus. 1,675,801; July 3.
Goss, Plumb R., Kansas City, Mo. Store-service apparatus. 1,675,545; July 3.
Gould, John H., assignor to McCord Radiator & Mfg. Co., Detroit, Mich. Heater for motor vehicles. 1,676,021; July 3.
Gould Storage Battery Company. (See Klock, R. A., and Entz, assignors.)
Gouldbourn, Joseph, and F. Ricks, Leicester, England, assignors to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating upon boots and shoes. 1,675,753; July 3.
Gourlay, Clarence A., Jamaica, N. Y. Cover table for typewriters. 1,675,648; July 3.
Gove, Edward H., deceased, Biddeford, Me.; E. J. Gove, executor. Pendulum or swinging flush valve for waterclosets. 1,676,234; July 3.
Gove, Everard J., executor. (See Gove, Edward H.)
Gradl, Ludwig. (See Weldinger, C., Gradl, and Schönner.)
Graham, Thaddeus, Los Angeles, Calif. Sound reproducer. 1,675,343; July 3.
Graham, Tom C., assignor to The Embossing Company, Albany, N. Y. Domino and making the same. 1,675,891; July 3.
Grant, Lewis C., assignor to Electrical Improvements Limited, Newcastle-upon-Tyne, England. Lightning or surge arrester. 1,675,649; July 3.
Grasselli Chemical Company, The. (See Howard, Henry, assignor.)
Grasselli Dyestuff Corporation. (See Ballauf, F., Muth, and Schmelzer, assignors.)
Grasselli Dyestuff Corporation. (See Kramer, Erwin, assignor.)
Graves, Harry S., Detroit, Mich. Piston-ring-clamping device. 1,675,603; July 3.
Gray, George S., Capron, Okla. Grave-decoration chest. Des. 75,684; July 3.
Green, Julius. (See Brown, M., and Green.)
Green, Lee B., Lakewood, assignor of one-third to E. L. Jones, Cleveland, one-third to C. L. Finney, Canton, and one-third to C. B. Krause, Cleveland, Ohio. Compressor. 1,675,546; July 3.
Gregory & Read Company. (See Gulliford, Nicholas L., assignor.)
Griffin, Edward B., Somerville, Mass. Railway spike. 1,676,022; July 3.
Grimmich, William, assignor to E. J. Paidar Company, Chicago, Ill. Reclining chair and foot rest. 1,675,547; July 3.
Grimshaw, William, Chicago, Ill. Ceiling plate. 1,676,228; July 3.

Grom, Louise, New York, N. Y. Finger-wave comb. 1,675,754; July 3.
Grossman, Mollie L., and J. N. Lowe, New York, N. Y. Hand hat bag. 1,676,229; July 3.
Grout, Martin B., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Mandrel. 1,675,489; July 3.
Grout, Martin B., assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Winding machine. 1,675,650; July 3.
Guild, Thomas A., Honolulu, Hawaii. Mechanical cane cutter. 1,675,651; July 3.
Gulf Refining Company. (See Prichard, George L., assignor.)
Gullette, Mary I. (See Gullette, William A., assignor.)
Gullette, William A., assignor, by mesne assignments, to M. I. Gullette, Wheeling, W. Va. Lamp support for automobile running boards. 1,675,931; July 3.
Gulliford, Nicholas L., Peabody, assignor to Gregory & Read Company, Lynn, Mass. Machine for turning heels. 1,676,218; July 3.
Gump, B. F., & Co. (See Jubien, Paul, assignor.)
Gunnlaugsson, Skúli, Rio Vista, Calif. Tobacco pipe. 1,676,142; July 3.
Gustafson, Edwin A., assignor to A C Spark Plug Company, Flint, Mich.. Calibration. 1,675,604; July 3.
Guthrie, William S., Terrell, Tex., assignor to Marvel Carburetor Company, Flint, Mich. Carburetor. 1,675,344; July 3.
Guyton & Cumfer Mfg. Co. (See Cumfer, Harry A., assignor.)
Gwinn, George W., Hewlett, N. Y., assignor to American Machine & Foundry Company. Making containers for cakes, etc. 1,675,652; July 3.
Hague, Alfred E., West Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Telephone system. 1,675,886; July 3.
Hall, Carter F., and F. W. Lee, Baltimore, Md.; said Lee assignor to said Hall. Refrigerating system. Re17,019; July 3.
Hall, Clarence A., Philadelphia, Pa. Apparatus for making leaden powder. 1,675,345; July 3.
Hall, Cortice H., Paterson, N. J., and W. Lloyd, Hazleton, Pa., assignors to Domestic Stoker Company, New York, N. Y. Burner for solid fuel. 1,675,548; July 3.
Hall, Walter O., Franklin, Mass., assignor to American Type Founders Company, Jersey City, N. J. Transfer mechanism. 1,675,346; July 3.
Haller, Oliver J. (See Schiller, M. B., and Haller.)
Hamilton, Ferdinand A., Los Angeles, Calif., assignor to Southern California Gas Company. Testing machines. 1,675,802; July 3.
Hammer, Charles, Hollis Court Boulevard, assignor to American Metal Cap Company, Brooklyn, N. Y. Glass thread container. 1,676,023; July 3.
Hammer, Hans, Munich, Germany. Daybook. 1,675,887; July 3.
Hammett, Oren C., and G. R. Scott, Knoxville, Tenn., assignors to Draper Corporation, Hopedale, Mass. Feeler mechanism for looms. 1,675,549; July 3.
Hammond, Cecil F., and W. Shackleton, London, England. Apparatus for boiling or raising the temperature of water and other liquids. 1,675,347; July 3.
Hanauer, Darwin, La Grange, assignor to Kinney-Rome Company, Chicago, Ill. Collapsible bed. 1,675,411; July 3.
Handley, Arthur, Tunstall, England. Press for shaping covers of teapots and the like. 1,675,550; July 3.
Hann, William E. (See Gits, Remi J., assignor.)
Hansen, Augie L., assignor to H. S. Strausser, Chicago, Ill. Filter unit and making same. 1,676,024; July 3.
Hanson, Herman C., Los Angeles, Calif. Extension table. 1,676,025; July 3.
Harbison-Walker Refractories Company, The. (See Oeffner, Abiram A., assignor.)
Hardsocg Wonder Drill Co. (See Smith, George W., assignor.)
Harley-Davidson Motor Company. (See Harley, W. S., and Constantine, assignors.)
Harley, William S., and A. R. Constantine, assignors to Harley-Davidson Motor Company, Milwaukee, Wis. Cycle support. 1,675,551; July 3.
Harris, Floyd E., Flint, Mich. Heat-controlling apparatus. 1,675,605; July 3.
Harrison, Henry C., Port Washington, assignor to Western Electric Company, Incorporated, New York, N. Y. Wave-energy-translating diaphragm and mounting same. 1,675,853; July 3.
Harrison, Samuel A., Los Angeles, Calif. Sorting desk. 1,675,454; July 3.
Harrison, William O., and G. W. Johnson, Buffalo, N. Y. Combined vending and display case. Des. 75,685; July 3.
Hart & Cooley Manufacturing Company, The. (See Hart, Stanley, assignor.)
Hart, Stanley, assignor to The Hart & Cooley Manufacturing Company, New Britain, Conn. Register and ventilator. 1,675,854; July 3.
Hartford-Empire Company. (See Peiler, Karl E., assignor.)
Hartmann, Otto H., and E. Bleitner, assignor to Schmidt'sche Heissdampf-Gesellschaft m. b. H., Kassel-Wilhelmshohe, Germany. Steam boiler. 1,675,892; July 3.
Hartmann, Otto H., and H. Peperkorn, assignors to Schmidt'sche Heissdampf-Gesellschaft m. b. H., Kassel-Wilhelmshohe, Germany. Water gauge for steam boilers. 1,676,026; July 3.
Hartmann Trunk Company. (See Ritter, Julius, jr., assignor.)
Harvey, George H., Rochester, assignor of one-half partnership interest to E. A. Lawrence, Bellevue, Pa. Process and apparatus for drawing sheet glass. 1,676,027; July 3.
Harvey, William J., New York, N. Y. Foot and ankle protecting means. 1,675,348; July 3.
Harwood, George S., & Son. (See Howe, Joseph B., assignor.)
Hauserman, E. F., Company, The. (See Bohnsack, John A., assignor.)
Hawkins, Roe C., assignor of one-third to F. E. Abbott, Long Beach, Calif. Valve control for plunger pumps. 1,676,186; July 3.
Hawxhurst, Henry I., Sierra Madre, Calif. Gymnastic appliance. 1,675,552; July 3.
Haynes, Pierre E., East Aurora, N. Y. System of refrigeration. 1,675,455; July 3.
Haynes Stellite Company. (See Franks, R. and Field, assignors.)
Healy, Leon J. D., Milwaukee, assignor to Wright Rubber Products Company, Racine, Wis. Paving block. Re17,020; July 3.
Heany, John A., assignor to Heany Laboratories, Inc., New Haven, Conn. Electric transmission. 1,676,028; July 3.
Heany Laboratories. (See Heany, John A., assignor.)
Heginbottom, Walter G., and J. R. Francis, Flint, Mich. Intake manifold for internal-combustion engines. 1,675,349; July 3.
Heine Boiler Company. (See Burke, Robert F., assignor.)
Heine, Herman E., assignor to Bradley Washfountain Company, Milwaukee, Wis. Trap. 1,676,029; July 3.
Heising, Raymond A., Millburn, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Radiotransmission. 1,675,888; July 3.
Helin, Francis A., Watertown, N. Y. Twenty-four-hour clock. 1,676,030; July 3.
Hem, Halvor O., assignor to Toledo Scale Company, Toledo, Ohio. Coin-operated weighing scale. 1,675,975; July 3.
Hem, Halvor O., assignor to Toledo Scale Company, Toledo, Ohio. Weighing scale. 1,675,976; July 3.
Henderson, Elizabeth E., Dedham, Mass. Sheet-supporting clip. 1,675,755; July 3.
Henderson, Louis S., Philadelphia, Pa. Rug or similar article. Des. 75,686; July 3.
Henry, Francis M., Minneapolis, Minn. Boat. 1,675,606; July 3.
Henry, Francis M., Minneapolis, Minn. Self-dumping barge. 1,675,607; July 3.
Herborn, Ludwig, Bierstadt, assignor of one-third to W. Horn and one-third to A. Horn, Wiesbaden, Germany. Brake for hoisting devices and the like. 1,676,087; July 3.
Herlbauer, Joseph J. (See Smith, J. E., and Herlbauer.)
Herr, Herbert T., Merion, Pa., assignor to Westinghouse Electric and Manufacturing Company. Adjustable bearing. 1,675,490; July 3.
Herz, Alexander. (See Conti, Eugene, assignor.)
Hewetson, Harold F., assignor, by mesne assignments, to Truscon Steel Company, Youngstown, Ohio. Sheet-feeding guide for expanding machines. 1,675,803; July 3.
Hickey, Patrice H., Happy Camp, Calif. Time indicator. Des. 75,687; July 3.
Higgins, Patrick S., et al. (See Gartner, John H., assignor.)
Hilditch, Ernst, et al., executors. (See Bull, Fredrik R.)
Hill, Lucille, et al. (See Schiffko, Ewald J., assignor.)
Hines, Calvin N. (See Brower, C. E., and Hines.)
Hines, William J., assignor to The Fuller Brush Company, Hartford, Conn. Vanity case. Des. 75,688; July 3.
Hitchings & Company. (See King, Thomas E., assignor.)
Hitchings & Company. (See Macdonald, John K., assignor.)
Hoban, Mark S., London, England. Circuit breaker. 1,676,143; July 3.
Hoeller, Richard, et al. (See Kreft, Ewald, assignor.)
Hoffer, Le Roy H., assignor to T. E. Murray, Brooklyn, N. Y. Electric welding machine. 1,675,705; July 3.
Hohnhorst, Ferdinand J., Covington, Ky. Abrading nib for abrading machines. 1,675,804; July 3.
Holcomb, Jarrett C., Sulphur Springs, assignor of one-half to R. F. Cameron, Dallas, Tex. Electric razor. 1,675,805; July 3.
Holden, Crofton C., assignor to Royal Comb Company, Leominster, Mass. Clasp. 1,675,806; July 3.
Holden, William H. T., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Echo and singing suppressor system. 1,675,412; July 3.
Holley, Clarence M., Highland Park, Mich., assignor, by mesne assignments, to The Hoover Company, North Canton, Ohio. Expansion valve. 1,676,031; July 3.
Holmes, Henry S., New York, assignor to T. E. Murray, Brooklyn, N. Y. Wheel nave and the like and forming it. 1,675,706; July 3.
Holmes, Pedro, Kansas City, Kans. Mowing machine. 1,676,088; July 3.

Holst, Gilles, E. Oosterhuis, and J. Bruijnes, assignors to Naamlooze Vennootschap Philips' Gloeilampenfabrieken, Eindhoven, Netherlands. Electric gas-filled glow-discharge device. 1,675,350; July 3.

Holte, Harold O., Wilkinsburg, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,675,553; July 3.

Hoover Company, The. (See Holley, Clarence M., assignor.)

Hoover Company, The. (See Smellie, Donald G., assignor.)

Hopwood, John M. (See Peebles, Thomas A., assignor.)

Horn, August, et al. (See Herborn, Ludwig, assignor.)

Horn, Willy, et al. (See Herborn, Ludwig, assignor.)

Hornaday, James M., Richmond, Va. Cut-off mechanism for cigarette machines. 1,675,351; July 3.

Houghton, Erol V., Syracuse, N. Y. Can opener. 1,675,807; July 3.

Houseknecht, Eli M., Thurmond, W. Va. Diaper. 1,676,144; July 3.

Howard, Henry, assignor to The Grasselli Chemical Company, Cleveland, Ohio. Making sodium hydrosulphide. 1,675,491; July 3.

Howard, Joseph O., Evanston, Ill. Holder. 1,676,032; July 3.

Howard, Karl S. (See Quinby, George F., assignor.)

Howe, James M., assignor to The Murray Manufacturing Company, Cleveland, Ohio. Bearing mechanism. 1,675,932; July 3.

Howell, Albert S., assignor to Bell & Howell Company, Chicago, Ill. Incandescent-electric-lamp socket, lamp, and adapter therefor. 1,675,554; July 3.

Howell, Albert S., assignor to The Bell & Howell Company, Chicago, Ill. Photographic device. 1,675,555; July 3.

Hower, Joseph B., Worcester, assignor to George S. Harwood & Son, Boston, Mass. Card-feeding mechanism. 1,675,756; July 3.

Howle, Kenneth, Norristown, Pa., assignor to Wildman Mfg. Co., Norristown, Pa. Yarn guide for knitting machines. 1,675,556; July 3.

Howle, Kenneth, assignor to Wildman Mfg. Co., Norristown, Pa. Knitting implement for knitting machines. 1,675,557; July 3.

Hoxton, L. G., et al. (See Page, Charles H., assignor.)

Hudson, William E., et al. (See Dean, R. S., and Hudson.)

Huebner-Bleistein Patents Company. (See Huebner, William C., assignor.)

Huebner, William C., assignor to Huebner-Bleistein Patents Company, Buffalo, N. Y. Vacuum pressure device and mask. 1,675,492; July 3.

Huebner, William C., assignor to Huebner-Bleistein Patents Company, Buffalo, N. Y. Holding and supporting device for printing or print-receiving elements or the like. 1,675,493; July 3.

Hufford, Harry J., Scranton, Pa. Thread cleaner. 1,676,187; July 3.

Hughes, Jesse W. (See Bunker, Frank S., assignor.)

Hugus, James A., Fort Scott, Kans. Saw-filing guide. 1,676,188; July 3.

Hull, Foster J., assignor to Pangborn Corporation, Hagerstown, Md. Sand-blast-abrasive reclaiming chute. 1,675,707; July 3.

Hull, Lewis M., assignor to Radio Frequency Laboratories, Incorporated, Boonton, N. J. Adjusting audion circuits. 1,676,145; July 3.

Humphrey, Ernest N., New Britain, Conn., assignor to United Royalties Corporation, New York, N. Y. Beater-blade support. 1,676,189; July 3.

Huntley Manufacturing Co. (See Morse, Theodore F., assignor.)

Huselton, William W., et al. (See Csanyi, Henry, assignor.)

Hybinette, Noak V., Wilmington, Del. Alloy. 1,675,708; July 3.

Hybinette, Noak V., Wilmington, Del. Heat-resisting alloy and structure. 1,675,709; July 3.

Industrial Associates, Incorporated. (See Riley, Champlain L., assignor.)

Industrial Brownhoist Corporation. (See Taylor, Ernest W., assignor.)

International Spotlight Corporation. (See Sklarek, Clifford, assignor.)

International Time Recording Company of New York. (See Bryce, James W., assignor.)

Invincible Laundry Equipment Co. (See Bell, Daniel, assignor.)

Ioco Rubber & Waterproofing Company, The. (See Ryan, Alfred, assignor.)

Isom, Edward W. (See Parmelee, C. L., and Isom.)

Isom, Edward W., Winnetka, Ill., and C. L. Parmelee, Orange, N. J., assignors to Sinclair Refining Company, Chicago, Ill. Cracking hydrocarbons. 1,675,558; July 3.

Isom, Edward W., Winnetka, Ill., and J. E. Bell, Brooklyn, N. Y., assignors to Sinclair Refining Company, Chicago, Ill. Circulatory cracking still and pump therefor. 1,676,202; July 3.

Isom, Edward W., Winnetka, Ill., and J. E. Bell, Brooklyn, N. Y., assignors to Sinclair Refining Company, Chicago, Ill. Operation of pressure stills. 1,676,203; July 3.

Isom, Edward W., Scarsdale, N. Y., and A. C. Vobach, Whiting, Ind., assignors to Sinclair Refining Company, Chicago, Ill. Oil still. 1,676,204; July 3.

Iymori, Satoyasu, and K. Suzuki, assignors to Z. H. R. Kenkyujo, Tokyo, Japan. Making solvent oil. 1,675,977; July 3.

Jackson, John H., Needham, Mass. Necktie renovator. 1,675,757; July 3.

Jacobson, Arthur G., assignor to Miehle Printing Press & Manufacturing Company, Chicago, Ill. Gripper mechanism. 1,675,559; July 3.

Jakobsson, Herman. (See Crock, Louis H., assignor.)

Jammer, Jacob S., assignor to Western Electric Company, Incorporated, New York, N. Y. Carrier-wave transmission. 1,675,893; July 3.

Jelley, James J. (See Ledyard, H. A., and Jelley.)

Jennings, George. (See Jennings, William and G.)

Jennings, William and G., Morpeth, England. Screw and nut gearing. 1,675,494; July 3.

Jo Pet, Inc. (See Petty, John, assignor.)

Johanson, Pehr, and D. E. Webster, assignors to Norton Company, Worcester, Mass. Rubber-bonded abrasive wheel and making same. 1,676,190; July 3.

Johns-Manville Corporation. (See Kemper, Ray T., assignor.)

Johnson, Carl W., Shaker Heights, assignor to The Cleveland Graphite Bronze Company, Cleveland, Ohio. Bearing. 1,675,933; July 3.

Johnson, David A., Belvue, Kans. Grubbing machine. 1,675,413; July 3.

Johnson, Fred D., et al., trustees. (See Mathews, Theodore A., assignor.)

Johnson, George T., assignor to The Buckeye Steel Castings Company, Columbus, Ohio. Brake hanger. 1,675,608; July 3.

Johnson, George W. (See Harrison, W. O., and Johnson.)

Johnson, John E., assignor to Speedaumat Addressing Machinery, Incorporated, Chicago, Ill. Selector-discharge mechanism. 1,675,710; July 3.

Johnson & Johnson. (See Johnson, Robert W., assignor.)

Johnson, Robert W., assignor to Johnson & Johnson, New Brunswick, N. J. Sterilizing ligature tubes. 1,676,090; July 3.

Johnson, William W., Memphis, Tenn. Ice-can bracket and drop tube. 1,676,089; July 3.

Jones, Earl L., et al. (See Green, Lee B., assignor.)

Jones, George A., assignor to Shoe Products, Inc., Lynn, Mass., Shoe. 1,675,711; July 3.

Jordahl, Anders, New York, N. Y. Filter medium for air filters. 1,676,191; July 3.

Joyce, Harold L., East Orange, N. J., assignor, by mesne assignments, to Splitdorf Electrical Company, Newark, N. J. Switch. 1,675,352; July 3.

Jubien, Paul, assignor to B. F. Gump Co., Chicago, Ill. Agitator. 1,675,560; July 3.

Junkers, Hugo. (See Weismann, Charles, assignor.)

Kade, Friedrich, assignor to Deutsche Werke Kiel Aktiengesellschaft, Kiel, Germany. Protective device for compensated asynchronous motors. 1,675,495; July 3.

Karfiol, Edward, Brooklyn, N. Y. Dolly. Des. 75,689; July 3.

Kasdan, Nathan, Bronx, and D. Pollack, Brooklyn, assignors to Majestic Metal Specialties, Inc., New York, N. Y. Cosmetic-stick holder. 1,675,496; July 3.

Kavle, Oscar C. (See Moulton, L. W., and Kavle.)

Kay, Lloyd D., Los Angeles, Calif. Dual-tired truck wheel. 1,675,934; July 3.

Keel, Glen I., Indianapolis, Ind. Sensitized screen and making same. 1,675,561; July 3.

Keeney Manufacturing Company. (See Macristy, Walter, assignor.)

Kellett, William P., Brantford, Ontario, Canada. Freight-transportation means. 1,675,562; July 3.

Kelley, Lawrence E., Blue Ridge, Tex. Quilter. 1,675,609; July 3.

Kelliher, Frederick H., Cleveland, Ohio. Producing carbon-dioxide gas. 1,675,497; July 3.

Kellner, Louis, Chicago, Ill. Safety plug and lamp socket. 1,675,353; July 3.

Kellogg Switchboard and Supply Company. (See Grout, Martin B., assignor.)

Kemp, C. M., Manufacturing Co., The. (See Kemp, William W., assignor.)

Kemp, William W., Baltimore, Md. Drying apparatus. 1,676,091; July 3.

Kemp, William W., assignor to The C. M. Kemp Manufacturing Co., Baltimore, Md. Drying apparatus. 1,676,092; July 3.

Kemper, Ray T., Los Angeles, Calif., assignor, by mesne assignments, to Johns-Manville Corporation, New York, N. Y. Oil-tank insulation. 1,675,354; July 3.

Kenkyujo, Zaidan H. R. (See Iymori, S., and Suzuki, assignors.)

Keyser, Johann J., Aarau, Switzerland. Spinning and twisting machine. 1,676,093; July 3.

Kilburn, Isaac J., Denver, Colo., and J. T. Doyle, Broomfield, Colo. Cattle guard. 1,675,653; July 3.

King, Thomas E., Westfield, assignor to Hitchings & Company, Elizabeth, N. J. Greenhouse. 1,675,712; July 3.

King, William J., assignor to The E. T. Burrowes Company, Portland, Me. Folding table. 1,675,355; July 3.

Kinney-Rome Company. (See Hanauer, Darwin, assignor.)

Kinzler, Edward F., assignor of one-half to R. Rawsthorne, jr., Pittsburgh, Pa. Apparatus for making photographic reproductions. 1,676,033; July 3.

Kirchhoff, Ernest, Great Kills, assignor to Elias Reiss & Company, New York, N. Y. Textile fabric. Des. 75,690; July 3.

Kirk, Henry C., Baltimore, Md. Treating oils. 1,676,230; July 3.

Kirkpatrick, Thomas P., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Motor-control system. 1,675,356; July 3.

Kishpaugh, Arthur W., East Orange, N. J., assignor to Western Electric Company, Incorporated. Electric wave signaling system. 1,675,889; July 3.

Klein, Frederick, College Point, N. Y. Signal apparatus. 1,675,713; July 3.

Kliss, Charles J., Scranton, Pa. Pipe joint. 1,675,808; July 3.

Klock, Raymond A., Rockaway Beach, and T. B. Entz, Brooklyn, N. Y., assignors, by mesne assignments, to Gould Storage Battery Company, Inc. Storage battery. 1,675,978; July 3.

Klohe, Joseph, New York, N. Y. Mitering and cutting machine. 1,675,563; July 3.

Klopman, Lee, et al. (See Csanyi, Henry, assignor.)

Knowlton, Eugene W., Buffalo, N. Y. Sanitary meat grinder. 1,675,809; July 3.

Knox, Luther L., assignor to Knox Products Company, Pittsburgh, Pa. Compound wall structure. 1,676,094; July 3.

Knox Products Company. (See Knox, Luther L., assignor.)

Knudsen, William S., assignor to General Motors Corporation, Detroit, Mich. Steering-column support. 1,675,610; July 3.

Koch, Fred, Brooklyn, assignor to The Sanitation Corporation, New York, N. Y. Catch basin. 1,675,714; July 3.

Koch, Paul W., & Company. (See Schreiner, John A., assignor.)

Koeb, Emil. (See Goldsmith, B. J., and Koeb.)

Koff, Samuel, New York, N. Y. Box. 1,675,414; July 3.

Kogler, Albert P. (See Kogler, Elsa S. and A. P.)

Kogler, Elsa S. and A. P., San Francisco, Calif. Combination strainer and container. 1,675,855; July 3.

Kollman, Bartley H., and E. R. Phillips, Indianapolis, Ind. Advertising sign. 1,675,357; July 3.

Kolody, Andrew, Chicago, Ill. Aeroplane steering device. 1,675,935; July 3.

Konoff, Alexander, New York, N. Y., assignor to Voices Incorporated, Wilmington, Del. Sounding device for dolls and other toys. 1,675,358; July 3.

Koppers Company, The. (See Becker, Joseph, assignor.)

Korzenborn, Charles, Cincinnati, Ohio. Printer's sheet receptacle. 1,676,095; July 3.

Krafft, Bruno A., San Francisco, Calif. Safety cover for cooking vessels. 1,676,146; July 3.

Kramer, Erwin, Cologne-Deutz, Germany, assignor to Grasselli Dyestuff Corporation, New York, N. Y. Sulphur dyestuff. 1,675,498; July 3.

Kramer, Erwin, Cologne-Deutz, Germany, assignor to Grasselli Dyestuff Corporation, New York, N. Y. Sulphur dyestuff dyeing cotton yellow. 1,675,499; July 3.

Krause, Conrad B., et al. (See Green, Lee B., assignor.)

Kreft, Ewald, assignor of one-sixth to R. Hoeller, one-sixth to F. L. Werner, one-sixth to F. Schindler, one-sixth to F. Amiehaensel, and one-sixth to L. Neudecker, St. Louis, Mo. Slaughtering device. 1,675,856; July 3.

Kropp, Walter, Elberfeld, Germany, assignor to Winthrop Chemical Company, Inc., New York, N. Y. Pharmaceutical compound. 1,675,500; July 3.

Kueppers, Frederick C., Hawthorne, N. J. Glare shield. 1,675,936; July 3.

Kunthey, Gregory W., Waterbury, and C. W. Bristol, Naugatuck, assignors to The Bristol Company, Waterbury, Conn. Regulating apparatus. 1,675,359; July 3.

Kusterle, Frank, assignor to Simmons Company, Kenosha, Wis. Bolted connection for bedstead-corner locks. 1,675,564; July 3.

Kwasnicki, Adolf, Brooklyn, N. Y. Doll or the like. 1,676,096; July 3.

Lacy, Edward J., New York, N. Y. Method and apparatus for reducing carbon monoxide in motor exhaust gases. 1,675,611; July 3.

Lalug, John B., et al. (See Stroup, Robert D., assignor.)

Laird, Frank J., Butte, Mont. Valve. 1,675,979; July 3.

Laird, Isaac L., assignor to Bird Machine Company, South Walpole, Mass. Screen for paper making. 1,675,612; July 3.

Laird, Isaac L., assignor to Bird Machine Company, South Walpole, Mass. Screen for paper making. 1,675,613; July 3.

Lamps, Walter, New York, N. Y. Paper clip or similar article. Des. 75,691; July 3.

Landis Tool Company. (See Rowell, Ralph K., assignor.)

Lang, George L., South Orange, N. J., assignor to Splitdorf Electrical Company, Newark, N. J. Indicating means for radio apparatus. 1,675,360; July 3.

Lang, George R., Pittsburgh, Pa. Coal digging and loading machine. 1,676,097; July 3.

Langdon, John W., Walla Walla, Wash. Valve. 1,676,034; July 3.

Larson, Charles L. (See Dahlstrom, F. P., and Larson.)

Lasting, Hyman B., Portsmouth, Va. Golf game. 1,675,937; July 3.

Laterra, John, Patterson, N. Y. Padding and sizing machine for silk or cotton fabric. 1,675,810; July 3.

Law, John B., Jersey City, N. J. Rim remover. 1,675,938; July 3.

Lawrence, Edward A. (See Harvey, George H., assignor.)

Layman, Milton R., Johnstown, Pa. Soda-fountain ice-cream machine and manufacturing and dispensing ice cream. 1,675,361; July 3.

Lebherz, Harry J., assignor to The Everedy Company, Frederick, Md. Silent door closer. 1,675,980; July 3.

Lebson, Samuel, executor. (See Csanyi, Henry, assignor.)

Ledyard, Harry A., and J. J. Jelley, Ashland, Ohio; said Jelley assignor to said Ledyard. Combined transporting and lowering burial apparatus. 1,675,362; July 3.

Lee, Aubrey M., assignor to Simplex Ice and Manufacturing Company, Dallas, Tex. Ice-scoring machine. 1,676,192; July 3.

Lee, Frederick W. (See Hall, C. F., and Lee.)

Lee, Mathias S., Seattle, Wash. Saw. 1,675,565; July 3.

Lee, Robert E., Cincinnati, Ohio. Metallic window frame and sash. 1,676,193; July 3.

Lees, John W., Los Angeles, Calif. Graver-sharpening and facet-cutting machine. 1,675,981; July 3.

Lehman, Nicholas, Birmingham, Ala. Cotton-picking device. 1,675,501; July 3.

Lehnert, Henry W. A., New York, N. Y. Nozzle. 1,676,035; July 3.

Leinert, Charles H., assignor to Leinert Valve Company, Chicago, Ill. Valve for compressors. 1,675,566; July 3.

Leinert Valve Company. (See Leinert, Charles H., assignor.)

Lenox, Russell A., et al. (See Bell, Earl R., assignor.)

Leoni, Hugo, New York, N. Y. Necktie. 1,675,768; July 3.

Leprestre, René, New York, N. Y. Steaming iron. 1,676,098; July 3.

Les Fils de Emile Boudios. (See Boudios, Edmond E., assignor.)

Lesourd, Georges. (See Alkan, R., and Lesourd.)

Leukert, Wilhelm. (See Schön, L., and Leukert.)

Levitt, Samuel, Brooklyn, assignor to United Metal Hose Company, Inc., New York, N. Y. Pipe coupling. 1,676,036; July 3.

Lewellen, Albert R., assignor to General Motors Corporation, Detroit, Mich. Circuit-controlling device. 1,675,614; July 3.

Lewis, Claude A., Houston, Tex., assignor to American Window Company. Window support. 1,675,939; July 3.

Lewis, Winford L., Evanston, Ill. Dispersing noxious materials. 1,675,940; July 3.

Liebowitz, Benjamin, Pennside, Pa. Wire connecter. 1,675,857; July 3.

Liebrich, John E., Indianapolis, Ind. Candy package. 1,675,415; July 3.

Liftin, Daniel, New York, N. Y. Finger ring. 1,675,715; July 3.

Lind, Ebba, New York, N. Y. Comb. 1,676,099; July 3.

Lindhard, Povl T., Brooklyn, assignor to F. L. Smidth & Co., New York, N. Y. Rotary kiln and cooler. 1,675,416; July 3.

Lindridge, Charles D., Montclair, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Method and apparatus for recording and reproducing sound. 1,675,894; July 3.

Lindsay, Lycurgus, Los Angeles, Calif. Vacuum air separator. 1,675,941; July 3.

Litter, Frederick A., Columbus, Ohio. Reamer grinder. 1,675,858; July 3.

Lloyd, William. (See Hall, C. H., and Lloyd.)

Lockrow, Laurice L., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Electrical apparatus. 1,675,567; July 3.

Lodding, Frederick W., assignor to Rice, Barton & Fales, Inc., Worcester, Mass. Controlling means for calender doctors. 1,675,363; July 3.

Loeck, Günther, assignor to the firm George Wolf G. m. b. H., Berlin, Germany. Optical apparatus for examining cavities and tubes in the body. 1,675,364; July 3.

Lomax, Clarence E., assignor, by mesne assignments, to Automatic Electric Company, Chicago, Ill. Telephone system. 1,675,502; July 3.

Lord, Fred W., assignor to The Oakes Manufacturing Company, Tipton, Ind. Furnace brooder. 1,676,194; July 3.

Lord, James H., Methuen, Mass. Incubating apparatus. 1,675,895; July 3.

Lose, James E., Wilkinsburg, Pa. Tuyère cooler. 1,675,811; July 3.

Losey, Arthur, Bay Shore, N. Y., assignor to United States Cast Iron Pipe & Foundry Company, Burlington, N. J. Apparatus for casting pipe and other annular articles centrifugally. 1,675,716; July 3.

Loud, William H. (See Roehrich, Frank N., assignor.)

Lovejoy, Ralph M., Boston, Mass. Shock absorber. 1,676,147; July 3.

Lowe, Joseph N. (See Grossman, M. L., and Lowe.)

Lowkrantz, Gunne, assignor, by mesne assignments, to Agfa Ansco Corporation, Binghamton, N. Y. Film-moving mechanism. 1,676,037; July 3.

Loyd, Lee G., Ardmore, Okla. Storage-battery tool. 1,675,812; July 3.

Loyd, William C., and A. R. McArthur, Gary, Ind., assignors to American Sheet and Tin Plate Company, Pittsburgh, Pa. Grease-melting furnace. 1,675,813; July 3.

Lüdenscheider Metall-Werke Akt.-Ges. vorm. Jul. Fischer & Basse. (See Fecher, Jacob, assignor.)

Lummis, Charles W., assignor to Morgan Construction Company, Worcester, Mass. Gas producer. 1,676,148; July 3.

Lundberg, Charles A., Chicago, Ill. Outlet-box support. 1,675,942; July 3.

Lund, Gustav A., Milwaukee, Wis. Aeroplane. 1,675,759; July 3.

Lund, Oscar J., Omaha, Nebr. Cradle. 1,676,100; July 3.

Luther, Fritz, assignor to G. Polysius, Dessau, Germany. Drying apparatus for rotary kilns. 1,675,717; July 3.

Lyall, John, Leith, Scotland. Control or change-over valve mechanism. 1,675,982; July 3.

Lyans, Cecil K., Baldwin, N. Y., and A. H. Dunn, Du Bois, Pa. Phonograph. 1,676,101; July 3.

Lyda, Arthur W., North Canton, Ohio. Releasing hook. 1,675,896; July 3.

Lyen, Andrew C., and C. W. Morgan, Chicago, Ill. Inserting or seating the outer races of ball bearings, bushings, and the like in machine housings. 1,675,568; July 3.

Lynch, Joseph H., Asbury Park, N. J. Laundry-checking device. 1,675,718; July 3.

Lynam, Thornton L., Dartmouth, Mass. Lemon squeezer. 1,676,102; July 3.

Macdonald, Benjamin J., et al. (See Cabrera, Charles T., assignor.)

Macdonald, John K., Ridgewood, assignor to Hitchings & Company, Elizabeth, N. J. Greenhouse. 1,675,719; July 3.

MacDougall, Ernest E. (See Bultman, Charles E., assignor.)

Mackenzie, Fred L., of Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Fastening-inserting machine. 1,675,569; July 3.

MacLaren, Fred B., Jamaica, assignor to C. H. Braselton, New York, N. Y. Pump-modifying mechanism for fuel-feeding devices. 1,676,038; July 3.

Macristy, Walter, New Britain, assignor to Keeney Manufacturing Company, Newington, Conn. Floor or ceiling plate. 1,675,983; July 3.

MacWilliams, James F., Cresson, Pa. Apparatus for testing coils. 1,676,195; July 3.

Madigan, Thomas J., Brooklyn, N. Y. Eraser. 1,675,570; July 3.

Magill, Paul L., and P. J. Carlisle, Niagara Falls, assignors to The Roessler & Hasslacher Chemical Co., New York, N. Y. Manufacture of hydrocyanic acid from formamide. 1,675,366; July 3.

Mahan, Frank M., et al. (See Bowers, Arlan L., assignor.)

Mahar, Merton E., assignor to Milwaukee Stamping Company, West Allis, Wis. Reenforcing frame for wardrobe-trunk sections. 1,675,654; July 3.

Mairich, Carl, Berlin, Germany. Bakehouse oven. 1,675,943; July 3.

Majestic Metal Specialties, Inc. (See Kasdan, N., and Pollack, assignors.)

Maney, Thomas, Louisville, Ky. Claw bar. 1,676,149; July 3.

Manzel, Charles W., Buffalo, N. Y. Hydraulic shock absorber. 1,675,760; July 3.

Maranville, Harvey F., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Apparatus for removing fabric strips from cutting machines. 1,675,984; July 3.

Marbury, Lucian B., Metropolis, Ill. Cigarette-package dispenser. 1,675,814; July 3.

Marlatt, George E., Pasadena, Calif. Typographical distributing bar. 1,676,196; July 3.

Marrinan, John, Washington, D. C. Ground anchor. 1,676,197; July 3.

Marshall, Charles O., assignor to Toledo Scale Company, Toledo, Ohio. Weighing-scale mechanism. 1,675,944; July 3.

Martin, Frederick W., Manhattan Beach, N. Y., assignor to Franklin Railway Supply Company. Railway booster. 1,675,571; July 3.

Martin, George C., Los Angeles, Calif. Pump. 1,675,945; July 3.

Martin, Harold W., San Bernardino, Calif. Adjustable tray for child's chair. 1,675,985; July 3.

Martin, William L., assignor to General Motors Corporation, Detroit, Mich. Control mechanism. 1,675,615; July 3.

Martini, Marco, Oakmont, Pa. Calendar clock. 1,675,761; July 3.

Marvel Carburetor Company. (See Guthrie, William S., assignor.)

Mason, Arthur R., and O. C. Failing, Medford, Oreg., assignors to Accurate Gasoline Recording Company. Recording and sales-check mechanism for fluid-dispensing pumps. 1,676,198; July 3.

Mason, Charles T., Sumter, assignor of one-half to H. L. Buck, Conway, and one-half to R. P. Yates, Sumter, S. C. Lubricating and sealing system for rotary compressors. 1,676,103; July 3.

Mason, Harold L., London, England. Full-way or gate valve. 1,675,986; July 3.

Mason, Howard, Saxonville, Mass. Pile-fabric loom. 1,676,039; July 3.

Mathews, Oralee, Detroit, Mich. Hair-straightening device. 1,675,762; July 3.

Mathews, Theodore A., assignor of 40 per cent to F. D. Johnson and W. N. Butler, trustees, Washington, Pa. Air compressor. 1,675,457; July 3.

Mawby, John H., West Midland, Western Australia, Australia. Pneumatically-driven ship. 1,676,150; July 3.

McArthur, Arthur R. (See Loyd, W. C., and McArthur.)

McAtree, John L., New York, N. Y., assignor to Scovill Manufacturing Company, Waterbury, Conn. Lip stick. 1,675,365; July 3.

McCabe, Ira E., Chicago, Ill. Safety electric control device. 1,675,897; July 3.

McCabe, Ira E., Chicago, Ill. Housing for light-actuated switches. 1,675,898; July 3.

McCallum, Wallace, Minburn, Iowa. Ventilating attachment for milk-can covers. 1,675,503; July 3.

McCarthy, Charles T., South Weymouth, assignor of one-half to E. R. Wharton, Medford, Mass. Handles for portable incandescent lamps. 1,675,763; July 3.

McCarty, Earnest, et al. (See Bowers, Arlan L., assignor.)

McCarty, Richard J., jr., Bethlehem, Pa., assignor to Bethlehem Steel Company. Auxiliary locomotive support. 1,675,456; July 3.

McCord Radiator & Mfg. Co. (See Gould, John H., assignor.)

McCormick, Robert, Ames, Iowa. Surveyor's device. 1,675,946; July 3.

McDonald, Oliver R., Bridgeport, Conn., assignor to American Chain Company, Inc. Automobile bumper. 1,675,458; July 3.

McEntire, Frederick W., Salt Lake City, Utah. Control apparatus for centrifugal separators. 1,675,947; July 3.

McKee, Ralph H., New York, N. Y. Filtering material and process of filtering. 1,676,151; July 3.

McKee, Willis, Cleveland, Ohio, assignor to Central National Bank of Cleveland. Conveyer. 1,675,948; July 3.

McKee, Willis, Cleveland, Ohio, assignor to Central National Bank of Cleveland. Hotbed. 1,675,949; July 3.

McKee, Willis, Cleveland, Ohio, assignor to Central National Bank of Cleveland. Cooling work blanks. 1,675,950; July 3.

McMahon, William F., Riverside, Calif. Grinding-mill screen. 1,675,417; July 3.

McManus, Hugh K., Vicksburg, Miss. Washer and sterilizer. 1,675,655; July 3.

McMullen, John E., Council Bluffs, Iowa. Rail-chair plate. 1,675,504; July 3.

McNeal, Daniel R., Palmyra, N. J., assignor to Andale Engineering Company. Strainer. 1,675,505; July 3.

McNulta, Joseph J. (See Girtanner, A., and McNulta.)

Meany, Daniel N., and E. N. Ellsworth, assignors to Electric Fireplace Manufacturing Company, Chicago, Ill. Electric fireplace. 1,675,418; July 3.

Mefford, Fred E. (See Murphy, Roy E., assignor.)

Meinig, E. Richard Co. (See Meinig, Ernest R., assignor.)

Meinig, Ernst R., Wyomissing, assignor to E. Richard Meinig Co., Inc., Reading, Pa. Warp knit fabric. 1,675,506; July 3.

Meissner, Alexander, assignor to Gesellschaft für Drahtlose Telegraphie m. b. H., Berlin, Germany. Method and arrangement for generating oscillations by two-anode electron tube. 1,675,367; July 3.

Mengden, Hippolyte F., Houston, Tex. Mop. 1,675,368; July 3.

Meredith, William J., Newton, Iowa. Wheel-angle indicator for automobiles. 1,675,656; July 3.

Merke, Alois, Chicago, Ill. Massage appliance. 1,676,104; July 3.

Merrill, Charles F., assignor to Draper Corporation, Hopedale, Mass. Constructing spinning-ring travelers. 1,676,205; July 3.

Messinger, William, Philadelphia, Pa. Hydraulic punch. 1,675,369; July 3.

Methudy, Carl E., assignor, by mesne assignments, to A. D. Goldman, St. Louis, Mo. Ignition device for gas burners. 1,675,859; July 3.

Methudy, Carl E., assignor, by mesne assignments, to A. D. Goldman, St. Louis, Mo. Automatic igniter for gas stoves and the like. 1,675,899; July 3.

Methudy, Carl E., assignor, by mesne assignments, to A. D. Goldman, St. Louis, Mo. Oven lighter for gas stoves. 1,675,900; July 3.

Meunier, Julien, Troarn, Calvados, France. Tractor-operated stump-uprooting device. 1,676,040; July 3.

Meyerhofer, Albert F., (See Buchner, Max, assignor.)

Michalka, Frank A. (See Michalka, Joseph, F. A. and R. A.)

Michalka, Joseph, F. A., M., and R. A., Cameron, Tex. Stalk cutter. 1,676,105; July 3.

Michalka, Joseph, jr., F. A., and R. A., Cameron, Tex. Stalk cutter. 1,676,106; July 3.

Michalka, Ralph A. (See Michalka, Joseph, F. A., and R. A.)

Mickel, Georg, Lobau, Germany. Sparking plug. 1,675,764; July 3.

Middendorf, David L., assignor to The Federal Glass Company, Columbus, Ohio. Process and apparatus for producing crackled glassware. 1,675,951; July 3.

Middendorf, David L., assignor to The Federal Glass Company, Columbus, Ohio. Process and apparatus for producing crackled glassware. 1,675,952; July 3.

Miehle Printing Press & Manufacturing Company. (See Blaine, Joseph R., assignor.)

Miehle Printing Press & Manufacturing Company. (See Jacobson, Arthur G., assignor.)

Mildren, Lory J. (See Taylor, James S., assignor.)

Miller, Frederick H., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Thermal relay. 1,675,370; July 3.

Miller, John E., Huntington, W. Va. Dental forceps. 1,675,815; July 3.

Miller, Philip M., assignor, by mesne assignments, to R. E. H. Incorporated, Brooklyn, N. Y. Demountable tire-carrying rim. 1,675,371; July 3.

Milligan, John F. (See Glass, C. F., Bock, and Milligan.)

Mills, Chester B., assignor to Sperry Gyroscope Company, Brooklyn, N. Y. Searchlight. 1,675,720; July 3.

Milwaukee Stamping Company. (See Mahar, Merton E., assignor.)

Miner, W. H., Inc. (See O'Connor, John F., assignor.)

Minich, Verne E., Scarsdale, assignor to The American Foundry Equipment Company, New York, N. Y. Sand-treating machine. 1,675,721; July 3.

Minton, Gustave M., jr., New York, N. Y. Cap for atomizers. Des. 75,692; July 3.

Minton, Gustave M., jr., New York, N. Y. Perfume atomizer. Des. 75,693; July 3.

Mittag, Albert H., Schenectady, N. Y., assignor to General Electric Company. Radiotelegraphy. 1,675,987; July 3.

Mitts & Merrill. (See Mitts, P. S., and Winston, assignors.)

Mitts, Philip S., and W. J. Winston, assignors to Mitts & Merrill, Saginaw, Mich. Disintegrating machine. 1,675,901; July 3.

Mohr, Hartwig, Brooklyn, N. Y. Swimming device. 1,675,372; July 3.

Mokma, Frederic, Sand Creek, Mich. Windshield wiper. 1,675,816; July 3.

Moller, Edvard M. (See Benedict, H. A., and Moller.)

Moores, Charles H., assignor to Moores & Dunford, Inc., New York, N. Y. Transfer car for moving boxes in warehouses and the like. 1,675,722; July 3.

Moores & Dunford, Inc. (See Moores, Charles H., assignor.)

Morraine Products Company. (See Valentine, Albert H., assignor.)

Morgan, Charles W. (See Lyen, A. C., and Morgan.)

Morgan Construction Company. (See Lummis, Charles W., assignor.)

Morgan, David W. R., Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company. Surface condenser. 1,675,472; July 3.

Morgan, Edmund C., deceased, New York, N. Y.; O. E. Morgan, executrix. Mining and loading machine. 1,675,723; July 3.

Morgan, Edmund C., deceased, New York, N. Y.; O. E. Morgan, executrix. Mining and loading apparatus. 1,675,902; July 3.

Morgan, Olive E., executrix. (See Morgan, Edmund C.)

Morrison, Lewis B., Newark, N. J., assignor to American Type Founders Company. Automatic feeder for printing presses. 1,676,152; July 3.

Morrison Stitcher Corporation. (See Allen, Howard G., assignor.)

Morse, Theodore F., assignor to Huntley Manufacturing Co., Silver Creek, N. Y. Separating machine. 1,675,572; July 3.

Moseley, Thomas H., Oklahoma City, and C. E. Droege, Cushing, Okla. Valve mechanism. 1,675,817; July 3.

Mossberg, Frank, assignor to Mossberg Pressed Steel Corporation, Attleboro, Mass. Reel. 1,675,507; July 3.

Mossberg Pressed Steel Corporation. (See Mossberg, Frank, assignor.)

Most, Lucifer J. (See Sheaffer, W. A., and Most.)

Motor Requirements Corporation. (See Pearson, Carl E., assignor.)

Motor Terminals Company. (See Fitch, Benjamin F., assignor.)

Mottlau, August J., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric curling iron. 1,675,373; July 3.

Moulton, Lloyd W., and O. C. Kayle, Syracuse, N. Y. Centrifugal babbitting machine. 1,675,657; July 3.

Mueller, Stephen E., and G. M. Rodgers, Moline, Ill. Portable milling machine. 1,675,374; July 3.

Müller, Georg, Berlin-Adlershof, Germany. Buttonhole-sewing machine. 1,675,508; July 3.

Munters, Carl G. (See Von Platen, B. C., and Munters.)

Murnane, Daniel J., San Mateo, Calif. Hinge. 1,675,573; July 3.

Murphy, Roy E., assignor of one-third to F. E. Mefford, Colorado Springs, Colo. Bean harvester. 1,675,903; July 3.

Murray Manufacturing Company, The. (See Howe, James M., assignor.)

Murray, Thomas E. (See Hoffer, Le Roy H., assignor.)

Murray, Thomas E. (See Holmes, Henry S., assignor.)

Mursch, John, Utica, assignor to Buffalo Hammer Mill Corporation, Buffalo, N. Y. Grinding mill. 1,675,658; July 3.

Muth, Friedrich. (See Ballauf, F., Muth, and Schmelzer.)

Myers, Thomas G., assignor to United States Electrical Manufacturing Company, Los Angeles, Calif. Insulating motor windings. 1,675,419; July 3.

Mykins, William K., St. Louis, Mo. Plumber's lead-pipe-bending spring. 1,675,574; July 3.

Naamlooze Vennootschap Philips' Gloeilampenfabrieken. (See Holst, G., Oosterhuis, and Bruijnes, assignors.)

Nagao, Seturo, Tokyo, Japan. Unloading machine. 1,676,041; July 3.

Nasby, Alexander, Gordon, W. Va. Railway tie. 1,676,107; July 3.

National Automatic Tool Company, The. (See Galloway, R. M., and Sterling, assignors.)

National Vulcanized Fibre Company. (See Shoemaker, William M., jr., assignor.)

Navarro, Saturnino G., Habana, Cuba. Plowhandle. 1,675,904; July 3.

Nelson, H. S., et al. (See Stroup, Robert D., assignor.)

Netschert, Frank, New York, N. Y. Combination furniture. 1,675,375; July 3.

Nettheim, Keith S., Manly, near Sydney, New South Wales, Australia. Sport boot and shoe. 1,675,905; July 3.

Neudecker, Louis, et al. (See Kreft, Ewald, assignor.)

Neumann, August, Reppen, Germany, assignor, by mesne assignments, to The Permutit Company, New York, N. Y. Apparatus for softening water. 1,675,860; July 3.

Nevière, Louis A., Tours, France, assignor to American Lighter Corporation, New York, N. Y. Pocket lighter. 1,675,861; July 3.

Neville, Neil, assignor to Federal Phosphorus Company, Birmingham, Ala. Phosphate reducer for bottom chrome dyeing. 1,675,459; July 3.

New Process Multi-Castings Company. (See Wood, John R., assignor.)

Newman, George W., Chicago, Ill., assignor to Wilson-Jones Loose Leaf Company. Ring book and method of assembly. 1,675,509; July 3.

New York Brick Handling Corporation. (See Fuller, Cland E., assignor.)

Nichol, Dorsey E., Washington, D. C. Built-in folding table. 1,675,953; July 3.

Nolan, John R., New York, N. Y. Vending machine. 1,675,510; July 3.

Nolan, John R., New York, N. Y. Coin-controlled mechanism for vending machines. 1,675,511; July 3.

Nordin, Josef A., assignor to Aktiebolaget Stille-Werner, Stockholm, Sweden. Meat-slicing machine. 1,675,659; July 3.

Norton Company. (See Johanson, P., and Webster, assignors.)

Novak, James, Cleveland, Ohio. Convertible table. 1,676,108; July 3.

Noyes, Harry A., Sound Beach, Conn., assignor to Texas Gulf Sulphur Company, Bay City, Tex. Sulphur-bearing article. 1,675,376; July 3.

Nyquist, Harry, Millburn, N. J., assignor to American Telephone and Telegraph Company. Distortion compensator. 1,675,460. July 3.

Oakes Manufacturing Company, The. (See Lord, Fred W., assignor.)

Oeffner, Abiram A., Mount Union, assignor to The Harbison-Walker Refractories Company, Pittsburgh, Pa. Forming and delivering charges of fictile material. 1,675,906; July 3.

O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,675,660; July 3.

O'Connor, John F., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,675,661; July 3.

O'Connor, William H., assignor to J. F. Conroy, sr., East Orange, N. J. Rotary cutting head. 1,675,765; July 3.

O'Connor, John P., New York, N. Y. Flying machine. 1,675,988; July 3.

Ogden, John J., Memphis, Tenn. Dentist's forceps. 1,676,042; July 3.

Ohaver, David W., Rockville, Ind. Automobile headlight. 1,675,766; July 3.

Ohio Brass Company, The. (See Bricker, Orrin W., assignor.)

Ohl, Russell S., New York, N. Y., assignor to American Telephone and Telegraph Company. Telephone substation circuits. 1,675,423; July 3.

Ohlbaum, Karl, & Son Inc. (See Steiner, Erich F., assignor.)

Oldenbusch, Ernest, Brooklyn, N. Y. Dispensing device. 1,676,109; July 3.

Olsson, Nils G., Aurora, Ill. Roofing plate or shingle. 1,676,043; July 3.

Olt, Henry, New York, N. Y. Receptacle closure. 1,676,044; July 3.

Oneal, Lloyd E., East Orange, N. J., assignor to Chas. Cory & Son, Incorporated, New York, N. Y. Annunciator system. 1,675,989; July 3.

O'Neill, Gonzalo, et al. (See Bennett, James C., assignor.)

Oosterhuis, Ekko. (See Holst, G., Oosterhuis, and Bruijnes.)
Open Hearth Combustion Company. (See Atkinson, James S., assignor.)
Ormsbee, Willard A., Taunton, Mass. Belt clasp. Des. 75,694; July 3.
Otis, Harold A., assignor to Chicago North Shore & Milwaukee Railroad Company, Chicago, Ill. Transporting goods. 1,675,512; July 3.
Pacent, Louis G., Winfield, N. Y. Variable-control device. 1,675,377; July 3.
Page, Charles H., assignor of one-third to L. G. Hoxton and one-third to J. H. Ryalls, Charlottesville, Va. Valve tappet construction. 1,675,954; July 3.
Paidar, Emil J., Company. (See Grimmich, William, assignor.)
Paige, Arthur E., Philadelphia, Pa. Surfacing mechanism. 1,675,862; July 3.
Palmer, Harmon S., Washington, D. C. Concrete building block and making same. 1,676,153; July 3.
Pangborn Corporation. (See Hull, Foster J., assignor.)
Park, Carl P., Lewiston, Me., assignor to U. S. Bobbin & Shuttle Company, Providence, R. I. Jack spool. 1,675,907; July 3.
Parker, Lars, assignor to Quality Hardware & Machine Co., Chicago, Ill. Hydraulic press. 1,675,513; July 3.
Parmelee, Charles L. (See Isom, W., and Parmelee.)
Parmelee, Charles L., Orange, N. J., and E. W. Isom, Winnetka, assignor to Sinclair Refining Company, Chicago, Ill. Cracking oils. 1,675,575; July 3.
Parsons, Philip D., Philadelphia, Pa., assignor to Scott Paper Company. Unloading device for slitter and rewinding machines. 1,675,863; July 3.
Parsons, Stuart W., assignor to The Stanley Works, New Britain, Conn. Box-strap-tightening device. 1,675,420; July 3.
Patterson, Ernest G., Chicago, Ill. Lamp-shade construction. 1,675,514; July 3.
Patterson, Harry R. (See Gilchrist, C. F., and Patterson.)
Paul, William L., Berkeley, Calif., assignor to Deere & Company, Moline, Ill. Hitch device. 1,675,461; July 3.
Payne, Marshall J., assignor to The Payne Valve Corporation, Staunton, Va. Tire valve. 1,675,990; July 3.
Payne Valve Corporation, The. (See Payne, Marshall J., assignor.)
Pearson, Carl E., assignor to Motor Requirements Corporation, Camden, N. J. Gasoline purifier. 1,675,378; July 3.
Pedersen, Christian, Ugledige, near Allersley, Denmark. Suspension device for maps and the like. 1,675,515; July 3.
Peebles, Thomas A., Pittsburgh, assignor to J. M. Hopwood, Dormont, Pa. Apparatus for controlling steam generation. 1,675,818; July 3.
Peller, Karl E., West Hartford, assignor to Hartford-Empire Company, Hartford, Conn. Apparatus for feeding molten glass. 1,675,819; July 3.
Pejchar, Josef, Brooklyn, N. Y. Cuff link. 1,675,379; July 3.
Pekowsky, Louis I., New York, N. Y. Cloth hat. 1,675,864; July 3.
Peperkorn, Heinrich. (See Hartmann, O. H., and Peperkorn.)
Perfect Window Regulator Corporation. (See Goldsmith, B. J., and Koeb, assignors.)
Permutit Company, The. (See Neumann, August, assignor.)
Perry, Frank R., Chicago, Ill. Condenser for automobile engine radiators. 1,676,045; July 3.
Perry, Samuel A., New York, N. Y. Accompaniment harmonica. 1,676,154; July 3.
Perry & Webster, Incorporated. (See Boynton, Vern K., assignor.)
Peruzzi, Mario, assignor to Planters Nut & Chocolate Co., Wilkes-Barre, Pa. Glass jar. Des. 75,695; July 3.
Peterson, John A., assignor to C. J. Turner and J. H. Young, Kansas City, Mo. Vapor moistener. 1,676,110; July 3.
Petro, Howard E., Salt Lake City, Utah. Ore-concentrating apparatus. 1,675,955; July 3.
Pettee, Allen D., Mount Vernon, and C. H. Shaw, Jackson Heights, N. Y. Covering for cables and the like. 1,675,421; July 3.
Petty, John, assignor to Jo Pet, Inc., Lebanon, Pa. Fire-tube boiler. 1,675,724; July 3.
Petty, John, assignor to Jo Pet, Inc., Lebanon, Pa. Soot blower. 1,675,725; July 3.
Petty, John, assignor to Jo Pet, Inc., Lebanon, Pa. Soot blower. 1,675,726; July 3.
Petty, John, assignor to Jo Pet, Inc., Lebanon, Pa. Securing stay rods to plates. 1,675,727; July 3.
Pew, Arthur E., jr., Bryn Mawr, assignor to Sun Oil Company, Philadelphia, Pa. Producing high-viscous lubricating oil and high-grade asphalt from petroleum. 1,675,462; July 3.
Pfeifer, Ferdinand A., assignor of forty-nine per cent to E. Craig, Springfield, Ohio. Circuit breaker and closer. 1,676,155; July 3.
Pfestroff, Ernesto, Porto Alegre, Brazil. Making wooden-soled shoes. 1,675,865; July 3.
Philbrick, Frank B., deceased, Waterville, Me.; H. S. Philbrick, executor, Evanston, Ill., assignor to Waterville Iron Works, Waterville, Me. Paper-pulp shredder. 1,676,048; July 3.
Philbrick, Herbert S., executor. (See Philbrick, Frank B.)
Phillips, Brace A., East Lansdowne, Pa. Steam and hot-air generator. 1,676,046; July 3.
Phillips, Elmer R. (See Kollman, B. H., and Phillips.)
Phillips, Loyd F., St. Louis, Mo. Polishing device. 1,675,662; July 3.
Phillips, Morris G. P., London, England. Machine for cleaning the stems of tobacco leaves. 1,676,047; July 3.
Pierce, Earl F., Winnetka, assignor to The Bassick Manufacturing Company, Chicago, Ill. Lubricant compressor. 1,675,424; July 3.
Pierce, Leon, New York, N. Y. Composite penetrator and shell for pikes. 1,675,663; July 3.
Pierce, Paul H., Westfield, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Selective signaling circuits. 1,675,866; July 3.
Pierce, Winslow S., jr., Bayville, N. Y. Antifriction bearing. 1,675,728; July 3.
Pike, Robert D., San Francisco, Calif. Production of wrought iron direct from electrolytic iron. 1,675,867; July 3.
Pisarcik, Andro, Vandergrift, assignor to American Sheet and Tin Plate Company, Pittsburgh, Pa. Rolling-mill guide. 1,675,820; July 3.
Pitt, Guy L., Rocky Mount, N. C. Road sign. Des. 75,696; July 3.
Pittsburgh Plate Glass Company. (See Evans, Albert E., assignor.)
Pittsburgh Plate Glass Company. (See Showers, Lee, assignor.)
Poland, John, Cascade, assignor of one-half to J. Gorman, Belt, Mont. Battery connecter. 1,675,991; July 3.
Pollack, Daniel. (See Kasdan, N., and Pollack.)
Pollard, Walter S., Philadelphia, Pa. Ball game. 1,675,463; July 3.
Polysius, G. (See Luther, Fritz, assignor.)
Porter, George M., New York, N. Y. Pad holder. 1,675,821; July 3.
Porter, Leslie F., Passaic, N. J., assignor to Bell Telephone Laborntories, Incorporated, New York, N. Y. Telephone system. 1,675,956; July 3.
Post, George B., New York, N. Y. Boat. 1,675,422; July 3.
Potato Waffles, Inc. (See Ruffner, Meyer F., assignor.)
Potomac Glass Company, The. (See Beam, Charles C., assignor.)
Potts, Louis M., Tenafly, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Telegraph transmitter. 1,675,823; July 3.
Powell, Clarence H., assignor of one-half to R. J. Burton, Detroit, Mich. Airplane construction 1,676,231; July 3.
Planters Nut & Chocolate Co. (See Peruzzi, Mario, assignor.)
Plotner, James A. (See Tullis, John T., assignor.)
Prichard, George L., Port Arthur, Tex., assignor to Gulf Refining Company, Pittsburgh, Pa. Cracking oils. 1,676,207; July 3.
Pryor, William M., assignor to Southern Manganese Steel Company, St. Louis, Mo. Shredder-type pulverizing hammer. 1,675,464; July 3.
Pund, Fred W., Cincinnati, Ohio. Electric-light-bulb cap. 1,675,380; July 3.
Pushaiski, Stanley, Cleveland, Ohio. Wire-drawing block. 1,675,822; July 3.
Quality Hardware & Machine Co. (See Parker, L., assignor.)
Quinby, George F., Boston, Mass., assignor, by mesne assignments, to K. S. Howard, St. Louis, Mo. Innersole-applying device. Re17,018; July 3.
Quincy Show Case Works. (See Fifer, William A., assignor.)
R. E. H. Incorporated. (See Miller, Philip M., assignor.)
Rader, Earl D., Bedford, assignor to Dexter Folder Company, New York, N. Y. Wire-stitching folding machine. 1,676,156; July 3.
Radinse, Rudolf R., Cleveland, Ohio. Rotary brush. 1,675,616; July 3.
Radinse, Rudolph R., Cleveland, Ohio. Rotary wire brush. 1,675,617; July 3.
Radio Corporation of America. (See Donle, Harold P., assignor.)
Radio Frequency Laboratories, Incorporated. (See Hull, Lewis M., assignor.)
Raschick, Charles T., St. Paul, Minn. Sales-check system. 1,675,908; July 3.
Räth, Curt. (See Bing, A., and Räth.)
Ratliff, Stanley M., Norwood, assignor to The American Tool Works, Cincinnati, Ohio. Traveling drilling machine. 1,676,206; July 3.
Rava, Alexander, New York, N. Y., assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Inductively heating the metallic parts of inclostd electrical devices. 1,676,049; July 3.
Rawsthorne, Robert, jr. (See Kinsler, Edward F., assignor.)
Reagan, Maurice E., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Automatic hydroelectric station. 1,675,381; July 3.

Reeves, Orwell C., assignor to Toledo Scale Company, Toledo, Ohio. Packing case. 1,675,957; July 3.
Reiber, Edwin H., West Webster, N. Y. Surfacing machine. 1,676,111; July 3.
Reinhardt, Franz C., Paterson, N. J. Shuttle. 1,675,516; July 3.
Reinhardt, Otto K., Jamaica, assignor, by mesne assignments, to Yale Electric Corporation, New York, N. Y. Battery-making machine. 1,675,382; July 3.
Reiss, Elias, & Company. (See Kirchhoff, Ernest, assignor.)
Remington Rand Inc. (See Day, William H., assignor.)
Renie, Jack J., Los Angeles, Calif. Aeroplane toy. Des. 75,697; July 3.
Renz, Frederick, Brooklyn, N. Y. Blank-book-making machine. 1,676,112; July 3.
Replogle, Delbert E., Watertown, assignor to Engineering Specialties Company, Boston, Mass. Cable support. 1,676,208; July 3.
Reuss, Wilhelm, Mannheim, Germany. Welding medium for aluminum. 1,675,664; July 3.
Reynolds, Charles L., Seattle, Wash. Transit concrete-mixer drive means. 1,675,958; July 3.
Reynolds, Thomas A., Los Angeles, Calif. Sucker-rod wrench. 1,675729; July 3.
Rhodus, Thomas, Chicago, Ill. Rheostat. 1,676,050; July 3.
Rice, Barton & Fales, Inc. (See Lodding, Frederick W., assignor.)
Rice, Louis W., assignor to Bernard Rice's Sons, Inc., New York, N. Y. Pitcher or like article. Des. 75,698; July 3.
Rice's, Bernard, Sons, Inc. (See Rice, Louis W., assignor.)
Rich, Minnie D. (See Rich, Sam D. and M. D.)
Rich, Sam D. and M. D., Columbus, Ohio. Headlight attachment. 1,675,767; July 3.
Ricks, Fred. (See Gouldbourn, J., and Ricks.)
Riker, Andrew L., Fairfield, Conn. Windshield. 1,675,909; July 3.
Riker, Andrew L., Fairfield, Conn. Tool for drawing tubular bosses. 1,675,910; July 3.
Riley, Champlain L., North Plainfield, N. J., assignor to Industrial Associates, Incorporated, New York, N. Y. Nebulizer. 1,676,113; July 3.
Ripaults, Limited. (See Bancroft, Frank E., assignor.)
Ritter, Julius, jr., assignor to Hartmann Trunk Company, Racine, Wis. Combined top and front-door lock. 1,675,425; July 3.
Ritz Woller, Oliver C., Chicago, Ill. Step plate. 1,675,665; July 3.
Ritz Woller, Oliver C., Chicago, Ill. Step plate. 1,675,682; July 3.
Roberts, Floyd E., Melbourne, Iowa. Windshield heater. 1,675,911; July 3.
Roberts, Montague H. (See Tolman, R. C., De Baufre, Davis, and Roberts.)
Roberts, Montague H., Englewood, N. J., assignor to Franklin Railway Supply Company, New York, N. Y. Power reverse-gear mechanism. 1,675,576; July 3.
Robinson, Roy H., Chicago, Ill. Tennis racket. 1,676,051; July 3.
Roccaforte, Baldassare N., Houston, Tex. Mirror for barber or beauty-parlor chairs. 1,675,883; July 3.
Rodgers, Guy M. (See Mueller, S. E., and Rodgers.)
Rodgers, James P., assignor to Elliott Company, Pittsburgh, Pa. Tube cleaner. 1,676,157; July 3.
Rodgers, John B., Little Rock, Ark. Gate mechanism. 1,675,824; July 3.
Rodney-Hunt Machine Company. (See Simonds, W. J., and Spear, assignors.)
Roe, William J., Newburgh, N. Y. Propelling and steering means for power speed. 1,675,158; July 3.
Roehrich, Frank N., assignor to W. H. Loud, Jersey City, N. J. Locking mechanism for automobiles. 1,675,465; July 3.
Roessler & Hasslacher Chemical Co. (See Magill, P. L., and Carlisle, assignors.)
Rogers, Joseph E., Mamaroneck, N. Y., assignor to Dayton Scale Company, Dayton, Ohio. Scale and chart therefor. 1,676,052; July 3.
Rogers, Thomas H., et al. (See Baldsiefen, W. D., and Rogers.)
Rorabeck, Claude, Chicago Heights, assignor to American Manganese Steel Company, Chicago, Ill. Conveyer-chain link. 1,676,053; July 3.
Rose, Reed P., Jackson Heights, assignor to General Rubber Company, New York, N. Y. Manufacture of sheet material. 1,675,959; July 3.
Rosenthal, Aaron E., and W. E. Clarin, assignors to Beacon Steel Furniture Co., Chicago, Ill. Folding chair. 1,675,577; July 3.
Ross, Victor G., assignor to Seattle Can Company, Seattle, Wash. Automatic stop mechanism. 1,675,426; July 3.
Roth, Joseph W., New Brunswick, N. J. Sled. 1,676,159; July 3.
Rowell, Ralph K., West Palm Beach, Fla., assignor to Landis Tool Company, Waynesboro, Pa. Automatic cam-grinding machines. 1,675,466; July 3.
Royal Comb Company. (See Holden, Crofton C., assignor.)
Rubber Products Company, The. (See Whisler, Chauncy P., assignor.)
Ruffner, Meyer F., Washington, D. C., assignor to Potato Waffles, Inc., New York, N. Y. Food products and making the same. 1,676,160; July 3.
Rusdell, William J., Wolverhampton, England. Pump for liquids or hydraulic motor. 1,676,114; July 3.
Ryalls, J. H., et al. (See Page, Charles H., assignor.)
Ryan, Alfred, Anniesland, Glasgow, assignor to The Ioco Rubber & Waterproofing Company, Limited, Glasgow, Scotland. Rigid airship. 1,675,427; July 3.
Rychlewski, Frank, Chicago, Ill., assignor, by mesne assignments, to The Gerrard Company, Inc., San Francisco, Calif. Tension device for wire-tying machines. 1,675,730; July 3.
S & W Machine Company. (See Wermes, Frederick J., assignor.)
Sachs, Joseph, Hartford, Conn. Inclosed electric switch and assembling the same. 1,675,467; July 3.
Sachs, Joseph, Hartford, Conn. Inclosed electric switch and assembling the same. 1,675,468; July 3.
Salterini, John B., New York, N. Y. Finial. Des. 75,699; July 3.
Sanitation Corporation, The. (See Koch, Fred, assignor.)
Satterholm, Robert W., Chicago, Ill. Warm-air furnace. 1,676,054; July 3.
Sawyer, Emerson D., Chicago, Ill. Yieldable barrier. 1,675,912; July 3.
Schallhorn, William, Company, The. (See Bernard, William A., assignor.)
Schau, William, Kalamazoo, Mich. Auxiliary heating attachment for furnaces. 1,675,384; July 3.
Schellenger, Newton C., Elkhart, Ind. Jack. 1,676,055; July 3.
Schifko, Ewald J., assignor of one-third to F. Franzen and one-third to L. Hill, Oakland, Calif. Protective apparatus. 1,675,428; July 3.
Schiller, Morgan B., and O. J. Haller, Pittsburgh, Pa., assignor, by mesne assignments, to American Tubular Elevator Company. Tower. 1,676,161; July 3.
Schiller, Rudolf. Brooklyn, N. Y. Arch support. 1,676,162; July 3.
Schindler, Ferdinand, et al. (See Kreft, Ewald, assignor.)
Schlachter, Henry, assignor to Dempster Mill Manufacturing Company, Beatrice, Neb. Double-stroke working head. 1,676,163; July 3.
Schlaegel, Daniel H., Wadena, Minn. Door-operating device. 1,676,164; July 3.
Schlafly, Julius H., assignor, by mesne assignments, to The Berger Manufacturing Company, Canton, Ohio. Trussed beam. 1,675,825; July 3.
Schmelzer, Albert. (See Ballauf, F., Muth, and Schmelzer.)
Schmidt'sche Heissdampf-Gesellschaft m. b. H. (See Hartmann, O. H., and Bleitner, assignors.)
Schmidt'sche Heissdampf-Gesellschaft m. b. H. (See Hartmann, O. H., and Peperkorn, assignors.)
Schnee, Henry E., Chicago, Ill., assignor to American Telephone and Telegraph Company. Reeling device. 1,675,429; July 3.
Schofield, George L., National City, Calif. Antiglare and light-distributing means for vehicle head lamps. 1,675,731; July 3.
Scholl, William M., Chicago, Ill. Matrix for making casts. 1,675,517; July 3.
Scholl, William M., Chicago, Ill. Metatarsal-arch-supporting pad or cushion. 1,675,578; July 3.
Schön, Ludwig, Essen, Germany, and W. Leukert, Leipa, Czechoslovakia, assignors to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Alternating-current induction motor. 1,675,960; July 3.
Schönner, Martin. (See Weldinger, C., and Gradl, and Schönner.)
Schrader's, A., Son, Incorporated. (See Farr, Fred D., assignor.)
Schreiner, John A., assignor, by mesne assignments, to Paul W. Koch & Company, Chicago, Ill. Drill or cutter. 1,675,469; July 3.
Schultheiss, John, Baltimore, Md. Pipe cutter. 1,675,386; July 3.
Schwarber, Henry, Weehawken, N. J. Embroidered edging. Des. 75,700; July 3.
Schwarz, Roland S., sr., Huntington, W. Va. Mop. 1,676,115; July 3.
Schweitzer, Heinrich, New York. Wax dental form and making same. 1,675,732; July 3.
Scott, George R. (See Hammett, O. C., and Scott.)
Scott Paper Company. (See Parsons, Philip D., assignor.)
Scougal, De Witt C., Seattle, Wash. Auxiliary vise automatic. 1,675,868; July 3.
Scovill Manufacturing Company. (See McAtree, John L., assignor.)
Seattle Can Company. (See Ross, Victor G., assignor.)
Seifert, John O. (See Bouchery, August, assignor.)
Seng Company, The. (See Dyke, Darrell F., assignor.)
Seng, Raymond P. L., Paris, France. Double-acting latch. 1,675,579; July 3.
Sereff, Peter H., Lima, Ohio. Reenforced supporting member. 1,675,768; July 3.
Severns, Ray W., and R. W. Tiemeyer, Lima, Ohio. Sign. 1,675,580; July 3.
Seymour, Julius H., and T. S. Spear, Bartow, Fla.; said Seymour, assignor to said Spear. Thrust bearing. 1,676,219; July 3.

Seymour, Julius H., and T. S. Spear, Bartow, Fla.; said Seymour assignor to said Spear. Thrust bearing. 1,676,220; July 3.

Seymour, Julius H., and T. S. Spear, Bartow, Fla.; said Seymour assignor to said Spear. Thrust bearing. 1,676,221; July 3.

Shackleton, William, et al. (See Gartner, John H., assignor.)

Shackleton, William. (See Hammond, C. F., and Shackleton.)

Shafer, Lincoln M., Jersey City, N. J., assignor to Tower Manufacturing Co., Inc. Sulphur dyestuff. 1,675,430; July 3.

Shafer, Samuel, jr., assignor to Chain Belt Company, Milwaukee, Wis. Mechanism for timing the operations of concrete-mixing and other machines. 1,675,733; July 3.

Sharp, Donald E., Hamburg, assignor to Spencer Lens Company, Buffalo, N. Y. Light transmitting and reflecting device. 1,675,431; July 3.

Sharples, David T. (See Sharples, Philip M. and D. T.)

Sharples, Philip M. and D. T., assignors to Sharples Separator Company, West Chester, Pa. Cream separator. 1,676,165; July 3.

Sharples Separator Company. (See Sharples, Philip M. and D. T., assignors.)

Shaw, Carroll H. (See Pettee, A. D., and Shaw.)

Sheaffer, W. A., Pen Co. (See Fremon, J. A., and De Haven, assignors.)

Sheaffer, Walter A., Fort Madison, Iowa, and L. J. Most, New York, N. Y.; said Most assignor to said Sheaffer. Pencil. 1,675,826; July 3.

Sheldon, William O., Lakewood, assignor to The Yoder Company, Cleveland, Ohio. Making sheet-metal frames. 1,676,222; July 3.

Sherman, Howard B., assignor to H. B. Sherman Manufacturing Co., Battle Creek, Mich. Drain valve for lawn-sprinkling systems. 1,675,992; July 3.

Sherman, H. B., Manufacturing Co. (See Sherman, Howard B., assignor.)

Sherman, Ralston M., Glastonbury, assignor to Silent Glow Oil Burner Corporation, Hartford, Conn. Vapor burner. 1,676,223; July 3.

Sherry, John C., Wilmington, Calif. Lock. 1,675,581; July 3.

Shlick, Leo, Boston, Mass. Beating engine. 1,675,385; July 3.

Shoe Products, Inc. (See Jones, George A., assignor.)

Shoemaker, William M., jr., Kennett Square, Pa., assignor to National Vulcanized Fibre Company, Wilmington, Del. Making fiber board. 1,675,666; July 3.

Shoemaker, William M., jr., Kennett Square, Pa., assignor to National Vulcanized Fibre Company, Wilmington, Del. Apparatus for making fiber board. 1,675,667; July 3.

Short, Charles R., Dayton, Ohio, assignor to General Motors Research Corporation, Detroit, Mich. Composite piston. 1,675,618; July 3.

Showers, Lee, Charlerol, Pa., assignor to Pittsburgh Plate Glass Company. Plate-glass-rolling apparatus. 1,676,056; July 3.

Shrader, Arthur T., New Albany, Ind. Take-down table. 1,675,827; July 3.

Shurts, George J. (See Atkinson, R. W., and Shurts.)

Sibley, Edward L., Bennington, Vt. Making eyelets. 1,675,913; July 3.

Siegmund, Humphreys O., West Orange, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Electrolyte. 1,675,828; July 3.

Siemens-Schuckertwerke Gesellschaft mit beschrankter Haftung. (See Weinert, Helmuth, assignor.)

Silent Glow Oil Burner Corporation. (See Sherman, Ralston M., assignor.)

Silver, Jesse W., Tacoma, Wash. Propeller for dirigible airship. 1,675,914; July 3.

Silver, Joseph A., New York, N. Y. Railroad-rail fastening. 1,675,993; July 3.

Simmons Company. (See Rusterle, Frank, assignor.)

Simonds, Warren J., and J. G. Spear, assignors to Rodney-Hunt Machine Company, Orange, Mass. Joining wood pieces for making rolls. 1,675,387; July 3.

Simplex Ice and Manufacturing Company. (See Lee, Aubrey M., assignor.)

Sims, James T. (See Stanley, A. M., and Sims.)

Sinclair Refining Company. (See Isom, E. W., and Bell, assignors.)

Sinclair Refining Company. (See Isom, E. W., and Parmalee, assignors.)

Sinclair Refining Company. (See Isom, E. W., and Vobach, assignors.)

Sinclair Refining Company. (See Parmalee, C. L., and Isom, assignors.)

Singer Manufacturing Company, The. (See Clayton, Andrew B., assignors.)

Skelly, James D., et al. (See Gartner, John H., assignor.)

Skinner, Allan D., assignor to Skinner Patent Holding Company, Erie, Pa. Method of and apparatus for controlling power-driven vehicles. 1,675,388; July 3.

Skinner Patent Holding Company. (See Skinner, Allan D., assignor.)

Sklarek, Clifford, assignor to International Spotlight Corporation, Chicago, Ill. Dirigibly-mounted light. 1,675,915; July 3.

Slusser, Carl W., Chicago, Ill. Medical instrument. 1,676,057; July 3.

Smellie, Donald G., Maywood, Ill., assignor to The Hoover Company, North Canton, Ohio. Handle control. 1,676,058; July 3.

Smidth, F. L., & Co. (See Lindhard, Povl T., assignor.)

Smith, Burgess, W., assignor to The Todd Company, Inc., Rochester, N. Y. Protective paper and making the same. 1,675,769; July 3.

Smith, Charles R., Maplewood, N. J. Door-latch mechanism. 1,676,039; July 3.

Smith, Elmer H., Minneapolis, Minn. Torch tip. 1,675,668; July 3.

Smith, Errett G., Washington, D. C. Lavatory fixture. 1,676,116; July 3.

Smith, George W., assignor to Hardsocg Wonder Drill Co., Incorporated, Ottumwa, Iowa. Tool retainer. 1,675,432; July 3.

Smith, Goodwin B., New York, N. Y. Coin-controlled vending machine. 1,675,994; July 3.

Smith, Harry F., assignor to The Gas Research Company, Dayton, Ohio. Heat engine. 1,675,829; July 3.

Smith, Jarvis E., and J. J. Heilbauer, Jamaica, N. Y. Tire-rim clamp. 1,675,869; July 3.

Smith, John H., Philadelphia, Pa., assignor to Westinghouse Electric & Manufacturing Company. Condenser. 1,675,470; July 3.

Smith, John H., Philadelphia, Pa., assignor to Westinghouse Electric & Manufacturing Company. Heat-balance condenser plant. 1,675,471; July 3.

Smith, Wheeler E., Pueblo, Colo. Joiner's clamp. 1,675,389; July 3.

Smolczyk, Eduard. (See Wollin, K., and Smolczyk.)

Snedeker, Grant A. (See Styer, O. S., and Snedeker.)

Snyder, John L., Grandview, Wash. Press. 1,675,669; July 3.

Société à Responsabilité limitée Bonnart & Cie. (See Faure, Charles E., assignor.)

Societe Anonyme Overcau. (See Veglio, Gaetano, assignor.)

Sokolsky, Louis, assignor to A. K. Epstein, Chicago, Ill. Food-producing process and improved product produced thereby. 1,676,166; July 3.

Sorlien, Harold A., Pasadena, Calif. Game. 1,675,619; July 3.

Southern California Gas Company. (See Hamilton, Ferdinand A., assignor.)

Southern Manganese Steel Company. (See Pryor, William M., assignor.)

Spahn, John G., Lyons, Iowa. Lawn edger. 1,675,670; July 3.

Spear, John G. (See Simonds, W. J., and Spear.)

Spear, Thomas S. (See Seymour, J. H., and Spear.)

Speednumat Addressing Machinery, Incorporated. (See Johnson, John E., assignor.)

Spencer Lens Company. (See Sharp, Donald E., assignor.)

Spencer, Louis M., assignor to General Motors Corporation, Detroit, Mich. Thermostatic water valve. 1,675,620; July 3.

Spencer, William W., Kendallville, Ind. Bookholder. 1,675,621; July 3.

Sperry Gyroscope Company. (See Mills, Chester B., assignor.)

Spiliotakaras, Assimakis, and F. L. Taylor, Mobridge, S. Dak. Dispensing container. 1,676,224; July 3.

Spillman, Albert, North Tonawanda, N. Y. Heater for automobiles. Des. 75,701; July 3.

Spillmann, Max, Richfield, and O. H. Dorer, East Orange, N. J., assignors to Worthington Pump and Machinery Corporation, New York, N. Y. High-pressure centrifugal pump. 1,675,830; July 3.

Spinelli, Benjamin, Philadelphia, Pa. Price indicator. 1,676,060; July 3.

Spirella Company, The. (See Bowler, William E., assignor.)

Spitzdorf Electrical Company. (See Joyce, Harold L., assignor.)

Spitzdorf Electrical Company. (See Lang, George L., assignor.)

Sprague, Robert C., Quincy, Mass. Tone-control means. 1,675,831; July 3.

Sprain, Joseph E., assignor to Vickers Machine Works, Smackover, Ark. Safety hook. 1,676,167; July 3.

Standard Neckwear Company. (See Weinstein, Otto, assignor.)

Standard Pressed Steel Co. (See Gade, Harald F., assignor.)

Stanley, Arthur M., Lynn, and J. E. Sims, Quincy, assignors to Stanley Steel Welded Wheel Corporation, Boston, Mass. Welding machine. 1,675,734; July 3.

Stanley Steel Welded Wheel Corporation. (See Stanley, A. M., and Sims, assignors.)

Stanley Works, The. (See Parsons, Stuart W., assignor.)

Stark, Gustaf A., Atwater, Minn. Grave covering and lining device. 1,675,770; July 3.

Starysky, Charles, Marysville, Tex. Packing for oil wells. 1,676,168; July 3.

Starysky, Charles, Wichita Falls, Tex. Pump. 1,675,390; July 3.

Stearns, Henry G., Arapahoe, Nebr. Governor-controlled mechanism for internal-combustion engines. 1,675,995; July 3.

Stein, John A., New York, N. Y., assignor to American Machine & Foundry Company. Belt-tensioning device. 1,675,671; July 3.

Steiner, Erich F., Sonneberg, Germany, assignor to Karl Ohlbaum & Son Inc., New York, N. Y. Voice-producing apparatus for dolls and other toy figures. 1,675,832; July 3.

Stenger, Victor R., Chicago, Ill. Intermittent-movement mechanism. 1,676,117; July 3.

Sterling, Raymond E. (See Galloway, R. M., and Sterling.)

Stirling, Sidney, Los Angeles, Calif. Antimarring means for picture frames. 1,675,771; July 3.

Steuart, Douglas S. S., London, England. Telephone accessory. 1,675,622; July 3.

Steuart, Douglas S. S., London, England. Flexible supporting device. 1,675,672; July 3.

Stewart, John R., Rydal, Pa. Method of and machine for blending fibers. 1,675,916; July 3.

Stewart-Warner Speedometer Corporation. (See Rava, Alexander, assignor.)

Stockbridge, George H., Los Angeles, Calif. Vibration damper. 1,675,591; July 3.

Stöhr, Franz, Essen/Ruhr, Germany. Baking the linings of crucibles. 1,675,735; July 3.

Stone, Irving I., Chicago, Ill. Attachment for printing presses. 1,675,582; July 3.

Strandlund, Carl G., assignor to Deere & Company, Moline, Ill. Power lift plow. 1,675,433; July 3.

Strausser, Herbert S. (See Hansen, Augle L., assignor.)

Strittmatter, August, Freiburg, Baden, Germany. Apparatus for the manufacture of artificial-marble slabs. 1,675,833; July 3.

Stroinski, Frank, St. Louis, Mo. Oil-cup-cap holder. 1,675,518; July 3.

Strom, Arthur C. E., Ortega, Fla. Gymnasium apparatus. 1,676,061; July 3.

Strom, Ulrich, et al., executors. (See Bull, Fredrik R.)

Stromberg Motor Devices Co. (See Dienner, John A., assignor.)

Strong, William E. S., assignor to W. P. Deppé, New York, N. Y. Manifold and thermostatic regulating device therefor. 1,675,870; July 3.

Stroup, Robert D., Marfrance, assignor of one-third to H. S. Nelson, Leslie, and one-third to J. B. Laing, Lewisburg, W. Va. Brake mechanism. 1,675,673; July 3.

Studiengesellschaft fuer Wirtschaft u. Industrie m. b. H. (See Weckerle, Ferdinand, assignor.)

Sturgis, Herbert M., Kansas City, Mo., assignor to Sturgis Mop Company. Mop head. 1,675,736; July 3.

Sturgis Mop Company. (See Sturgis, Herbert M., assignor.)

Styer, Oliver S., and G. A. Snedeker, Bridgeport, Conn. Fence post. Des. 75,702; July 3.

Sukert, Philip, Chicago, Ill. Combination cigar-box moistener and cover holder. 1,676,118; July 3.

Sun Oil Company. (See Pew, Arthur E., jr., assignor.)

Superheater Company, The. (See Broido, Benjamin N., assignor.)

Suzuki, Koji. (See Iymori, S., and Suzuki.)

Swanson, Swan J., St. Louis, Mo. Toy. 1,676,062; July 3.

Swift Electric Welder Company. (See Woofter, Herbert A., assignor.)

Symington Company, The. (See Drenning, Percy R., assignor.)

Szarvasy, Imre, Budapest, Hungary. Production of carbon electrodes. 1,675,674; July 3.

Taub, Alex, assignor to General Motors Corporation, Detroit, Mich. Internal-combustion engine. 1,675,623; July 3.

Taylor, Ernest W., Cleveland Heights, Ohio, assignor, by mesne assignments, to Industrial Brownhoist Corporation. Apparatus for removing railroad ballast. 1,676,063; July 3.

Taylor, Frank L. (see Spiliotakaras, A., and Taylor.)

Taylor, Herbert B., Syracuse, N. Y., assignor to General Motors Corporation, Detroit, Mich. Locking device. 1,675,624; July 3.

Taylor Instrument Companies. (See Brown, Henry B., assignor.)

Taylor, James S., assignor of one-half to L. J. Mildren, Ponca City, Okla. Cable clamp. 1,675,996; July 3.

Technicolor Motion Picture Corporation. (See Young, Melvin G., assignor.)

Teeple, Floyd, Muscatine, Iowa. Compressed-air well pump. 1,675,772; July 3.

Teich, Ernest L., assignor to The American Hardware Corporation, New Britain, Conn. Lock-controlled electric switch. 1,675,737; July 3.

Texas Gulf Sulphur Company. (See Noyes, Harry A., assignor.)

Thomas & Betts Co., The. (See Buchanan, Stephen N., assignor.)

Thomas, Edward G., assignor to Toledo Scale Company, Toledo, Ohio. Pivot-adjusting means. 1,675,961; July 3.

Thomas, Ivor D., Palmyra, and P. H. Douglas, Cleveland Heights, assignors to The Wellman-Seaver-Morgan Company, Cleveland, Ohio. Automatic rope take-up for leveler bars. 1,675,917; July 3.

Thompson, Henry P., Chicago, Ill. Spotlight and mounting therefor. 1,675,519; July 3.

Thompson, Howard A., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,675,583; July 3.

Thurston, David W. (See Gass, E. J., and Thurston.)

Tiemeyer, Edward W. (See Severns, R. W., and Tiemeyer.)

Tilden, Bert O., assignor to B. O. T. Mfg. Co., Trenton, N. J. Combined flush tank and cabinet. Des. 75,703; July 3.

Tipil, Frank M., Milwaukee, Wis. Fishline holder. 1,676,119; July 3.

Tissler, Josef, Philadelphia, Pa. Rivet holder. 1,675,773; July 3.

Titcomb, Lee R., Brooklyn, and H. S. Ashmun, New York, N. Y. Nozzle-propelling mechanism and propelling the same. 1,675,738; July 3.

Tittensor, Harry, assignor to A C Spark Plug Company, Flint, Mich. Ford transmission speedometer drive. 1,675,625; July 3.

Todd Company, The. (See Smith, Burgess W., assignor.)

Toledo Scale Company. (See Hem, Halvor O., assignor.)

Toledo Scale Company. (See Marshall, Charles O., assignor.)

Toledo Scale Company. (See Reeves, Orwell C., assignor.)

Toledo Scale Company. (See Thomas, Edward G., assignor.)

Tolman, Richard C., Washington, D. C., W. L. De Baufre, Lincoln, Nebr.; J. W. Davis, Washington, D. C.; and M. H. Roberts, Englewood, N. J., assignors to S. G. Allen, trustee. Liquefaction apparatus. 1,676,225; July 3.

Tompkins, Stonewall, Passaic, N. J. Transmission gearing. 1,675,392; July 3.

Tower Manufacturing Co. (See Shafer, Lincoln M., assignor.)

Transue, Charles, Mount Jewett, Pa. Pressure-retaining valve. 1,676,169; July 3.

Tray Service Company. (See Coleman, Harris C., assignor.)

Trico Products Corporation. (See Folberth, Frederick G. and W. M., assignors.)

Trofimoff, Iwan, Moscow, Russia. One-line brake. 1,675,962; July 3.

Troiel, Arthur E., Berkeley, Calif. Protective armor. 1,676,170; July 3.

Trumpler, William E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Balancing machine. 1,675,393; July 3.

Truscon Steel Company. (See Hewetson, Harold F., assignor.)

Tucker, Alice M., East Orange, N. J. Shoe. 1,675,774; July 3.

Tullis, John T., Dallas, Tex., assignor of one-half to J. A. Plotner, El Dorado, Ark. Crossing signal. 1,675,997; July 3.

Tung-Sol Lamp Works. (See Bohner, Clyde C., assignor.)

Turner, Clyde J., et al. (See Peterson, John A., assignor.)

Tuttle, Arthur S., Sherbourne, N. Y. Radio battery-charging cabinet. 1,675,626. July 3.

Uhrig, John H., Beverly, assignor to United States Cast Iron Pipe & Foundry Company, Burlington, N. J. Furnace door. 1,675,739; July 3.

Umbarger, Joseph C., Cedar Grove, La. Apparatus for the treatment of crude oil. 1,675,775; July 3.

Underwood Elliott Fisher Company. (See Waldheim, John, assignor.)

Underwood, Western, Los Angeles, Calif. Capital for lamp-posts. Des. 75,704; July 3.

Underwood, Western, Los Angeles, Calif. Head for lamp-posts. Des. 75,705; July 3.

Underwood, Western, Los Angeles, Calif. Street-light lantern. Des. 75,706; July 3.

Union Special Machine Company. (See Christensen, Norman V., assignor.)

Union Switch & Signal Company, The. (See Ackerly, Donald G., assignor.)

Union Switch & Signal Company, The. (See Failor, Charles W., assignor.)

Union Switch & Signal Company, The. (See Holte, Harold O., assignor.)

Union Switch & Signal Company, The. (See Lockrow, Laurice L., assignor.)

Union Switch & Signal Company, The. (See Thompson, Howard A., assignor.)

Union Switch & Signal Company, The. (See Wallace, Herbert A., assignor.)

United Engineering and Foundry Company. (See Biggert, Florence C., jr., assignor.)

United Metal Hose Company. (See Levitt, Samuel, assignor.)

United Royalties Corporation. (See Humphrey, Ernest N., assignor.)

United Shoe Machinery Corporation. (See Bazzoni, Lewis J., assignor.)

United Shoe Machinery Corporation. (See Gouldbourn, J., and Ricks, assignors.)

United Shoe Machinery Corporation. (See Mackenzie, Fred L., assignor.)

U. S. Bobbin & Shuttle Company. (See Park, Carl P., assignor.)

United States Cast Iron Pipe & Foundry Company. (See Losey, Arthur, assignor.)

United States Cast Iron Pipe & Foundry Company. (See Uhrig, John H., assignor.)
United States Electrical Manufacturing Company. (See Myers, Thomas G., assignor.)
Upington, Walter W., Tacoma, Wash. Razor-blade sharpener. 1,676,209; July 3.
Valentine, Albert H., assignor to Moraine Products Company, Dayton, Ohio. Inserting bearings in bearing recesses. 1,676,171; July 3.
Van Amburgh, Charles, Long Beach, Calif. Fluid pump. 1,675,434; July 3.
Veglio, Gaetano, Levallois-Perret, assignor to Societe Anonyme Overcau, Paris, France. Resilient suspension for motor vehicles. 1,675,963; July 3.
Vennard, William, London, England. Loose-leaf binder. 1,675,394; July 3.
Vibber, John, Breckenridge, Mich. Tractor device. 1,676,120; July 3.
Vickers Machine Works. (See Sprain, Joseph E., assignor.)
Vobach, Arnold C. (See Isom, E. W., and Vobach.)
Voices Incorporated. (See Konoff, Alexander, assignor.)
Volz, Chris L., Detroit, Mich. Radio receiving circuits. 1,675,473; July 3.
Von der Heide, Richard, Schwiebus, Germany. Transforming pieces of curds into cheese by treatment with salts. 1,676,121; July 3.
Von Platen, Baltazar C., and C. G. Munters, Stockholm, Sweden, assignors, by mesne assignments, to Electrolux Servel Corporation. Refrigerator of the absorption type. 1,675,474; July 3.
Vreeland, Charles E., Davenport, Iowa. Closure-operating mechanism. 1,676,064; July 3.
Wadsworth, Arthur W., Fort Thomas, assignor to The Wadsworth Watch Case Company, Dayton, Ky. Watchcase. 1,675,675; July 3.
Wadsworth Electric Manufacturing Company, The. (See Wadsworth, George B., assignor.)
Wadsworth, George B., assignor to The Wadsworth Electric Manufacturing Company, Covington, Ky. Electrical switch. 1,675,435; July 3.
Wadsworth Watch Case Company, The. (See Wadsworth, Arthur W., assignor.)
Wagner Electric Corporation. (See Weichsel, Hans, assignor.)
Waldheim, John, Elizabeth, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 1,675,436; July 3.
Waldheim, John, Elizabeth, N. J., assignor to Underwood Elliott Fisher Company, New York, N. Y. Apparatus for holding work webs for typewriting machines. 1,675,740; July 3.
Waldron, Frederick A., Westfield, N. J. Method of and apparatus for shaping golf-club faces and club produced thereby. 1,675,437; July 3.
Wallace, Herbert A., Edgewood Borough, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic controlling apparatus. 1,675,584; July 3.
Walsh, James M., assignor to James M. Walsh Co., Milwaukee, Wis. Strap protector. 1,676,085; July 3.
Walsh, James M., Co. (See Walsh, James M., assignor.)
Walsh, Timothy, and H. S. Conver, Philadelphia, Pa. Variable-speed transmitting mechanism. 1,675,438; July 3.
Walters, Rollo F., Detroit, Mich., assignor to Carr Fastener Company, Cambridge, Mass. Separable fastener. 1,675,998; July 3.
Walther, Ewald, Durlach, Baden, Germany. Press for the cold extruding of tubes from metal disks. 1,675,676; July 3.
Waring, Olaf L., Long Island City, N. Y. Filling machine. 1,675,741; July 3.
Warner, Daniel W., near Edmonton, Alberta, Canada. Cultivator and weed destroyer. 1,676,172; July 3.
Waterville Iron Works. (See Philbrick, Frank B., assignor.)
Watkins, Irah J., Cincinnati, Ohio, assignor to D. Andrews, Indianapolis, Ind., and J. L. Arnout, Buffalo, N. Y. Automobile steering gear. 1,675,520; July 3.
Waterbury Tool Company, The. (See Francis, Daniel R., assignor.)
Weaver, Carrie L., et al. (See Alferink, William, assignor.)
Weaver, Gallard E., assignor to Weaver Manufacturing Company, Springfield, Ill. Tire spreader. 1,675,521; July 3.
Weaver, Joseph H., et al. (See Alferink, William, assignor.)
Weaver Manufacturing Company. (See Weaver, Gallard E., assignor.)
Webber, George R., Augusta, Me. Combination vending and dispensing case. Des. 75,707; July 3.
Webster, Duane E. (See Johanson, P., and Webster.)
Weckerle, Ferdinand, assignor to Studiengesellschaft fuer Wirtschaft u. Industrie m. b. H., Munich, Germany. Electrode holder for electric furnaces. 1,675,742; July 3.
Weibeler, Joseph N., Belle Plaine, Minn. Fuse plug. 1,676,122; July 3.
Weichsel, Hans, assignor to Wagner Electric Corporation, St. Louis, Mo. Alternating-current motor. 1,675,677; July 3.
Weidinger, Christian, L. Gradl, and M. Schöner, assignors to Bayerische Celluloidwarenfabrik, vorm. Albert Wakker, A.-G., Nuremberg, Germany. Diver toy. 1,675,522; July 3.
Weinert, Helmuth, Dresden-Kotzschenbroda, assignor to Siemens-Schuckertwerke Gesellschaft mit beschränkter Haftung, Siemensstadt, Germany. Arrangement of 6n-pole windings. 1,676,123; July 3.
Weinreich, Christ G., St. Louis, Mo. Device for locating submerged bodies. 1,675,964; July 3.
Weinreich, Christ G., St. Louis, Mo. Device for locating submerged bodies. 1,675,965; July 3.
Weinstein, Otto, assignor to Standard Neckwear Company, Boston, Mass. Necktie and making the same. 1,675,999; July 3.
Weisberg, Louis, Grantwood, N. J., assignor to The Barrett Company. Fractional condensation of mixed vapors. 1,676,232; July 3.
Weismann, Charles, Paris, France, assignor to Junkers, Dessau, Germany. Explosion motor to be utilized under various atmospheric conditions. 1,675,678; July 3.
Welburn, John D., Clayton, Ga. Dirigible headlight. 1,675,475; July 3.
Wellman-Seaver-Morgan Company, The. (See Thomas, I. D., and Douglas, assignors.)
Wendt, Gustav A., Cincinnati, Ohio. Smoker's stand. Des. 75,708; July 3.
Wennerstrom, Malcolm J. (See Gabrielson, O. S., and Wennerstrom.)
Wermes, Frederick J., Norwood, assignor to S & W Machine Company, Cincinnati, Ohio. Beading machine. 1,676,173; July 3.
Werner, Fred L., et al. (See Kreft, Ewald, assignor.)
West, William J., Alder, Wash. Combination tool. 1,675,476; July 3.
Western Electric Company. (See Black, Harold S., assignor.)
Western Electric Company. (See Crandall, Irving B., assignor.)
Western Electric Company. (See Dean, R. S., and Hudson, assignors.)
Western Electric Company. (See Elmen, Gustaf W., assignor.)
Western Electric Company. (See Friis, Harald T., assignor.)
Western Electric Company. (See Fultz, Miles E., assignor.)
Western Electric Company. (See Gabriel, John C., assignor.)
Western Electric Company. (See Harrison, Henry C., assignor.)
Western Electric Company. (See Heising, Raymond A., assignor.)
Western Electric Company. (See Jammer, Jacob S., assignor.)
Western Electric Company. (See Kishpaugh, Arthur W., assignor.)
Western Electric Company. (See Lindridge, Charles D., assignor.)
Western Electric Company. (See Pierce, Paul H., assignor.)
Western Electric Company. (See Potts, Louis M., assignor.)
Western Electric Company. (See Siegmund, Humphreys O., assignor.)
Western Electric Company. (See White, John H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Armstrong, Edwin H., assignor.)
Westinghouse Electric & Manufacturing Company. (See De Camp, Ray E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Edmonds, Warren O., assignor.)
Westinghouse Electric & Manufacturing Company. (See Gano, Harlan S., assignor.)
Westinghouse Electric & Manufacturing Company. (See Herr, Herbert T., assignor.)
Westinghouse Electric & Manufacturing Company. (See Kirkpatrick, Thomas P., assignor.)
Westinghouse Electric & Manufacturing Company. (See Miller, Frederick H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Morgan, David W. R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Mottlau, August J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Reagan, Maurice E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Smith, John H., assignor.)
Westinghouse Electric & Manufacturing Company. (See Trumpler, William E., assignor.)
Westinghouse Electric & Manufacturing Company. (See White, Harold E., assignor.)
Westinghouse Electric & Manufacturing Company. (See Wilson, Joseph R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Wise, Allen S., assignor.)
Westlake, Charles T., assignor to Commonwealth Steel Company, St. Louis, Mo. Locomotive trailer truck. 1,675,679; July 3.
Wever, Frank M., Anderson, S. C. Acid-phosphate hot-den excavator. 1,675,871; July 3.
Wharton, Edward R. (See McCarthy, Charles T., assignor.)
Whisk Razor Corporation, The. (See Aron, William P., assignor.)
Whisk Razor Corporation, The. (See Gahagan, H. I., and Aron, assignors.)

Whisler, Chauncy P., Kenmore, assignor to The Rubber Products Company, Barberton, Ohio. 1,675,395; July 3.
White, Harold E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Thermal relay. 1,675,396; July 3.
White, Harold E., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Magnetic thermal relay. 1,675,680; July 3.
White, John H., Cranford, N. J., assignor, by mesne assignments, to Western Electric Company, Incorporated. Permanent magnet and making the same. 1,675,872; July 3.
White, William C., Schenectady, N. Y., assignor to General Electric Company. Electron-discharge apparatus. 1,675,585; July 3.
White, William C., Schenectady, N. Y., assignor to General Electric Company. Electron-discharge apparatus. 1,675,586; July 3.
Whiteside, Sidney B., New York, N. Y. Ice-cream dipper. 1,675,776; July 3.
Whitman, Philip L., Halifax, Nova Scotia, Canada. Dial attachment for clocks. 1,676,000; July 3.
Wier, Stuart A., Dallas, Tex. Steam-cleaning method and apparatus. Re17,021; July 3.
Wiese, Ernest P., Lincoln, Nebr. Clevis. 1,675,681; July 3.
Wild, Charles H., Baltimore, Md., assignor to Burt Machine Company, Incorporated. Can-labeling-machine pick-up cement heater. 1,675,397; July 3.
Wildman Mfg. Co. (See Howie, Kenneth, assignor.)
Wilkie, Lorne A., Windsor, Ontario, Canada. Flowerpot holder. 1,676,124; July 3.
Willard, James A., Greensboro, N. C. Yarn director for knitting machines. 1,675,627; July 3.
Williamson, Wilbur W., et al. (See Cabrera, Charles T., assignor.)
Wilson-Jones Loose Leaf Company. (See Newman, George W., assignor.)
Wilson, Joseph B., Chicago, Ill., assignor to Westinghouse Electric & Manufacturing Company. Governor. 1,675,477; July 3.
Wilson, Scott L., Dinuba, Calif. Bolt. 1,675,777; July 3.
Wilson, Wylie G., Elizabeth, N. J. Reciprocating valve. Re17,022; July 3.
Winston, William J. (See Mitts, P. S., and Winston.)
Winthrop Chemical Company. (See Kropp, Walter, assignor.)
Wirkkala, Oscar A., Deming, Wash. Choker-hook rigging. 1,675,778; July 3.
Wise, Allen S., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Laundry machine. 1,675,398; July 3.
Withered, Eugene R., and J. J. Clark, Framingham, Mass. Hobbyhorse. 1,675,399; July 3.
Witkus, William J., Maspeth, N. Y. Drawing device. 1,676,226; July 3.
Woge, Conrad, New York, N. Y. Kit for sewing outfits or the like. 1,676,066; July 3.
Wolf, Albert, et al. (See Wolf, Howard A., assignor.)
Wolf, Benjamin, et al. (See Wolf, Howard A., assignor.)
Wolf Brothers. (See Wolf, Howard A.)
Wolf, Clarence, et al. (See Wolf, Howard A., assignor.)
Wolf, Edwin, et al. (See Wolf, Howard A., assignor.)
Wolf, George, G. m. b. H. (See Loeck, Günther, assignor.)
Wolf, Howard A., Elkins Park, assignor to E., B., C., L., and A. Wolf, Philadelphia, Pa., copartners trading as Wolf Brothers. Envelope and separable handle therefor. 1,675,439; July 3.
Wolf, Louis, et al. (See Wolf, Howard A., assignor.)
Wolff, Friedrich, Berlin, Germany. Regulating device for gas and air mixing plants, gas-delivery plants, and the like. 1,675,966; July 3.
Wollin, Karl, Berlin-Charlottenburg, and E. Smolczyk, Biesdorf-Sud, near Berlin, Germany. Device for indicating admixtures to gases and liquids. 1,676,125; July 3.
Wood, John R., Hatboro, Pa., assignor to New Process Multi-Castings Company, Newark, N. J. Mold shell. 1,676,199; July 3.
Wood, John R., Hatboro, Pa., assignor to New Process Multi-Castings Company, Newark, N. J. Pouring shell for pipe molds. 1,676,200; July 3.
Wood, John R., Hatboro, Pa., assignor to The New Process Multi-Castings Company Incorporated, Newark, N. J. Molding machine. 1,676,201; July 3.
Woodard, William E., Forest Hills, N. Y. Locomotive auxiliary cylinder-port arrangement. 1,676,067; July 3.
Woofter, Herbert A., Kenton, Ohio, assignor to Swift Electric Welder Company, Detroit, Mich. Switch. 1,675,683; July 3.
Worthington Pump and Machinery Corporation. (See Dorer, Oscar H., assignor.)
Worthington Pump and Machinery Corporation. (See Fleming, Wills M., assignor.)
Worthington Pump and Machinery Corporation. (See Spillman, M., and Dorer, assignors.)
Wright, Charles F., Akron, Ohio, assignor to The Diamond Match Company, New York, N. Y. Mechanism for assembling match strips. 1,675,440; July 3.
Wright Rubber Products Company. (See Healy, Leon J. D., assignor.)
Wright, Sumner B., South Orange, N. J., assignor to American Telephone and Telegraph Company. Measuring balance of electrical networks. 1,675,441; July 3.
Yale Electric Corporation. (See Reinhardt, Otto K., assignor.)
Yarnall, David R., assignor to Yarnall-Waring Company, Philadelphia, Pa. Indicating and recording nonreturn valve. 1,675,523; July 3.
Yarnall-Waring Company. (See Yarnall, David R., assignor.)
Yarrow, Harold E., Glasgow, Scotland. Economizer for water-tube boilers. 1,676,126; July 3.
Yates, Robert P., et al. (See Mason, Charles T., assignor.)
Yoder Company, The. (See Sheldon, William O., assignor.)
Young, Albert H., Victoria, British Columbia, Canada. Music holder. 1,675,834; July 3.
Young, James H., et al. (See Peterson, John A., assignor.)
Young, Melvin G., North Cambridge, assignor, by mesne assignments, to Technicolor Motion Picture Corporation, Boston, Mass. Method and apparatus for contacting films. 1,675,743; July 3.
Young, Raymond L., assignor to Bemis Bro. Bag Co., St. Louis, Mo. Apparatus for and method of splicing multiply thread. 1,675,400; July 3.
Zajac, Leopold, Milwaukee, Wis. Rotary compressor or motor. 1,675,524; July 3.
Zeitinger, Anthony F., St. Louis, Mo. Inking mechanism. 1,675,442; July 3.
Zitkowski, Emil C., San Fernando, P. I. Comparator. 1,675,967; July 3.
Zubaty, Joseph, assignor to A C Spark Plug Company, Flint, Mich. Illuminated instrument panel. 1,675,628; July 3.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 3D DAY OF JULY, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abrasive wheel and making same, Rubber-bonded. P. Johanson and D. E. Webster. 1,676,190; July 3.
Acids, Preparing nitropyridine arsinic. A. Binz and C. Räth. 1,675,402; July 3.
Adapter and plug for cut-outs. W. P. Briggs. 1,675,637; July 3.
Aeroplane. G. A. Lund. 1,675,759; July 3.
Agitator. P. Jubien. 1,675,500; July 3.
Aircraft control. A. L. Fisher. 1,675,928; July 3.
Airplane construction. C. H. Powell. 1,676,231; July 3.
Airship, Rigid. A. Ryan. 1,675,427; July 3.
Alarm: *See*—
Burglar alarm.
Alarm and control device. M. E. Fultz. 1,675,849; July 3.
Alarm device for clocks in signaling systems. J. W. Bryce. 1,676,075; July 3.
Alloy. N. V. Hybinette. 1,675,708; July 3.
Alloy and making same. R. Franks and B. E. Field. 1,675,798; July 3.
Alloy and structure, Heat-resisting. N. V. Hybinette. 1,675,709; July 3.
Amplifying electrical variations. H. C. Baumann. 1,675,874; July 3.
Amusement device. S. P. Ambrose. 1,675,684; July 3.
Anchor, Ground. J. Marrinan. 1,676,197; July 3.
Anchoring device for boats. O. S. Gabrielson and M. J. Wennerstrom. 1,675,930; July 3.
Annunciator system. L. E. Oneal. 1,675,989; July 3.
Antisiphon trap. H. A. Gardner, sr. 1,675,409; July 3.
Arch support. R. Schiller. 1,676,162; July 3.
Armor, Protective. A. E. Troiel. 1,676,170; July 3.
Atomizer, Perfume. G. M. Minton, jr. Des. 75,693; July 3.
Atomizers, Cap for. G. M. Minton, jr. Des. 75,692; July 3.
Audion circuits, Adjusting. L. M. Hull. 1,676,145; July 3.
Automobile bodies, Rumble seat for. J. Andrade. 1,675,685; July 3.
Babbitting machine, Centrifugal. L. W. Moulton and O. C. Kavle. 1,675,657; July 3.
Badge or similar article. M. Chamberlain. Des. 75,677; July 3.
Bag: *See*—
Hat bag.
Balancing machine. W. E. Trumpler. 1,675,393; July 3.
Ballast, Apparatus for removing railroad. E. W. Taylor. 1,676,063; July 3.
Bar: *See*—
Claw bar.
Collapsible bar.
Typographical distributing bar.
Barge, Self-dumping. F. M. Henry. 1,675,607. July 3.
Barrier, Yieldable. E. D. Sawyer. 1,675,912; July 3.
Basin, Catch. F. Koch. 1,675,714; July 3.
Battery: *See*—
Secondary or storage battery.
Storage battery.
Battery cell. H. Csanyi. 1,675,973; July 3.
Battery cell. H. Csanyi. 1,676,097; July 3.
Battery connecter. J. Poland. 1,675,991; July 3.
Battery-making machine. O. K. Reinhardt. 1,675,382; July 3.
Beam, Trussed. J. H. Schlafly. 1,675,825; July 3.
Bearing. F. W. Fritchey. 1,676,181; July 3.
Bearing. C. W. Johnson. 1,675,933; July 3.
Bearing, Adjustable. H. T. Herr. 1,675,490; July 3.
Bearing, Antifriction. W. S. Pierce, jr. 1,675,728; July 3.
Bearing mechanism. J. M. Howe. 1,675,932; July 3.
Bearing, Thrust. J. H. Seymour and T. S. Spear. 1,676,219–21; July 3.
Bearings in bearing recesses, Inserting. A. H. Valentine. 1,676,171; July 3.
Bearings, Preventing overheating of. E. A. M. Alric. 1,675,780; July 3.
Beater. L. Bordwell. 1,676,128; July 3.
Beater-blade support. E. N. Humphrey. 1,676,189; July 3.
Beating engine. L. Shlick. 1,675,385; July 3.
Bed, Collapsible. D. Hanauer. 1,675,411; July 3.
Belt clasp. W. A. Ormsbee. Des. 75,694; July 3.
Belt-tensioning device. J. A. Stein. 1,675,671; July 3.
Bending machine. H. E. Frentzel. 1,676,215; July 3.
Bending machine. F. J. Wermes. 1,676,173; July 3.
Bending spring, Plumber's lead-pipe. W. K. Mykins. 1,675,574; July 3.
Binder, Loose-leaf. W. Vennard. 1,675,394; July 3.
Binder post. A. M. Barrett. 1,675,479; July 3.
Blade. W. P. Aron. 1,676,001; July 3.
Blending fibers, Method of and machine for. J. R. Stewart. 1,675,916; July 3.
Block: *See*—
Paving block.
Wire-drawing block.
Boat. F. M. Henry. 1,675,606; July 3.
Boat. G. R. Post. 1,675,422; July 3.
Boiler: *See*—
Fire-tube boiler.
Steam boiler.
Boilers and boiler feed water, Apparatus for treating. R. E. Coughlan. 1,676,134; July 3.
Boilers, Economizer for water-tube. H. B. Yarrow. 1,676,126; July 3.
Boiling or raising the temperature of water and other liquids, Apparatus for. C. F. Hammond and W. Shackleton. 1,675,347; July 3.
Bolt. S. L. Wilson. 1,675,777; July 3.
Bolted connection for bedstead-corner locks. F. Kusterle. 1,675,564; July 3.
Book and assembly, Ring. G. W. Newman. 1,675,509; July 3.
Bookholder. W. W. Spencer. 1,675,621; July 3.
Book-making machine, Blank-. F. Renz. 1,676,112; July 3.
Boot and shoe, Sport. K. S. Nettheim. 1,675,905; July 3.
Boring machines, Handpiece for tooth-. M. Bauer. 1,675,873; July 3.
Bottle, Water. C. P. Whisler. 1,675,395; July 3.
Box: *See*—
Journal box.
Mail box.
Photograph-enlarging light box.
Powder box.
Tool box.
Box. S. Koff. 1,675,414; July 3.
Box-strap-tightening device. S. W. Parsons. 1,675,420; July 3.
Box support, Outlet-. C. A. Lundberg. 1,675,942; July 3.
Bracelet book. C. Augenstein. 1,675,324; July 3.
Bracelet, Wrist-watch. A. Bulova. 1,676,213; July 3.
Bracket and drop tube, Ice-can. W. W. Johnson. 1,676,089; July 3.
Brake: *See*—
One-line brake.
Brake. W. J. Andres. Re17,015; July 3.
Brake attachment for motor vehicles. J. L. Davis. 1,676,136; July 3.
Brake for hoisting devices and the like. L. Herborn. 1,676,087; July 3.
Brake hanger. G. T. Johnson. 1,675,608; July 3.
Brake mechanism. V. Bendix. 1,675,526; July 3.
Brake mechanism. A. Y. Dodge. 1,675,536; July 3.
Brake mechanism. R. D. Stroup. 1,675,673; July 3.
Brooder, Furnace. F. W. Lord. 1,676,194; July 3.
Brush, Rotary. R. R. Radinse. 1,675,616; July 3.
Brush, Rotary wire. R. R. Radinse. 1,675,617; July 3.
Brush, Timer. C. Day. 1,675,925; July 3.
Bumper, Automobile. O. R. McDonald. 1,675,458; July 3.
Burglar alarm. J. M. Cody. 1,675,878; July 3.
Burner: *See*—
Liquid-fuel burner.
Oil burner.
Solid-fuel burner.
Vapor burner.
Cabinet, Dispensing. W. Fairchild. 1,675,700; July 3.
Cabinet, Radio battery-charging. A. S. Tuttle. 1,675,626; July 3.
Cable clamp. J. S. Taylor. 1,675,996; July 3.
Cable, High-tension. R. W. Atkinson, and G. J. Shurts. 1,675,918; July 3.
Cable support. D. E. Replogle. 1,676,208; July 3.
Cables and the like, Covering for. A. D. Pettee, and C. H. Shaw. 1,675,421; July 3.
Cables, Antioscillating and stress-reducing device for. L. H. Crook. 1,676,006; July 3.
Calendar. W. J. Brooks. 1,675,483; July 3.
Calender doctors, Contrlling means for. F. W. Lodding. 1,675,363; July 3.
Calibration. E. A. Gustafson. 1,675,604; July 3.
Camera focusing attachment. R. Chetteville. 1,675,598; July 3.
Camera fronts, Catch for. C. A. Bornmann. 1,675,529; July 3.
Can opener. F. A. Cuyler. 1,676,135; July 3.

Can opener. E. V. Houghton. 1,675,807; July 3.
Can-opening device. C. Genjack. 1,675,647; July 3.
Candy package. J. E. Liebrich. 1,675,415; July 3.
Cane cutter, Mechanical. T. A. Guild. 1,675,651; July 3.
Car chair. J. A. Duffy. 1,676,010; July 3.
Car for moving boxes in warehouses and the like, Transfer. C. H. Moores. 1,675,722; July 3.
Carbon-dioxide gas, Producing. F. H. Kelliher. 1,675,497; July 3.
Carbon electrodes, Production of. I. Szarvasy. 1,675,674; July 3.
Carbon monoxide in motor exhaust gases, Method and apparatus for reducing. E. J. Lacy. 1,675,611; July 3.
Carbonates, Production of. M. Buchner. 1,675,786; July 3.
Carbureter. W. S. Guthrie. 1,675,344; July 3.
Card-feeding mechanism. J. B. Howe. 1,675,756; July 3.
Case: *See*—
Packing case.
Watchcase.
Casing for fruit-juice extractor. A. C. Gilbert. Des. 75,682; July 3.
Casting pipe and other annular articles centrifugally, Apparatus for. A. Losey. 1,675,716; July 3.
Ceiling plate. W. Grimshaw. 1,676,228; July 3.
Cement heater, Can-labeling-machine pick-up. C. H. Wild. 1,675,397; July 3.
Centering device for use in machining crank shafts, eccentrics, or the like. J. Benz. 1,676,175; July 3.
Chain link, Conveyer-. C. Rornbeck. 1,676,053; July 3.
Chair: *See*—
Folding chair.
Chair. N. N. Brown. 1,676,074; July 3.
Chair and foot rest, Reclining. W. Grimmich. 1,675,547; July 3.
Check system, Sales-. C. T. Raschick. 1,675,908; July 3.
Checking device, Laundry-. J. H. Lynch. 1,675,718; July 3.
Cheese cutter. J. L. Barton. 1,675,745; July 3.
Chest, Grave-decoration. G. S. Gray. Des. 75,684; July 3.
Chute, Sand-blast-reclaiming. F. J. Hull. 1,675,707; July 3.
Cigar-box moistener and cover holder, Combination. P. Sukert. 1,676,118; July 3.
Cigarette machines, Cut-off mechanism for. J. M. Hornaday. 1,675,351; July 3.
Circuit breaker. C. E. Anderson. 1,675,322; July 3.
Circuit breaker. M. S. Hoban. 1,676,143; July 3.
Circuit breaker and closer. F. A. Pfeifer. 1,676,155; July 3.
Circuit-controlling device. A. R. Lewellen. 1,675,614; July 3.
Circuits, Director. C. Gillings. 1,675,544; July 3.
Circuits, High-frequency. G. F. Du Prel. 1,675,882; July 3.
Circuits, Selective signaling. P. H. Pierce. 1,675,866; July 3.
Circuits, Translating. H. S. Black. 1,675,876; July 3.
Clamp: *See*—
Cable clamp.
Joiner's clamp.
Rim clamp.
Clamping device, Piston-ring-. H. S. Graves. 1,675,603; July 3.
Clasp. C. C. Holden. 1,675,806; July 3.
Claw bar. T. Maney. 1,676,149; July 3.
Cleaner: *See*—
Thread cleaner.
Tube cleaner.
Windshield cleaner.
Cleaning the cock connections between mains and service or branch pipes. C. A. Britnell. 1,675,968; July 3.
Clevis. E. P. Wiese. 1,675,681; July 3.
Clincher for wire-stapling machines. H. G. Allen. 1,675,779; July 3.
Clip: *See*—
Sheet-supporting clip.
Clock, Calendar. M. Martini. 1,675,761; July 3.
Clock, Twenty-four-hour. F. A. Helin. 1,676,030; July 3.
Closure-operating mechanism. C. E. Vreeland. 1,676,064; July 3.
Coils, Apparatus for testing. J. F. MacWilliams. 1,676,195; July 3.
Collapsible bar. N. N. Brown. 1,676,073; July 3.
Column support, Steering. W. S. Knudsen. 1,675,610; July 3.
Comb: *See*—
Finger-wave comb.
Comb. E. Lind. 1,676,099; July 3.
Comparator. E. C. Zitkowski. 1,675,967; July 3.
Compensator, Distortion. H. Nyquist. 1,675,460; July 3.

Pipe joint. C. J. Kliss. 1,675,808; July 3.
Pipe wrench. P. Armstrong. 1,676,210; July 3.
Pipes, Apparatus for joining. R. N. Broido. 1,675,329; July 3.
Piston, Composite. C. R. Short. 1,675,618; July 3.
Pitcher or like article. L. W. Rice. Des. 75,698; July 3.
Pivot-adjusting means. E. G. Thomas. 1,675,961; July 3.
Planter and potato digger, Combined. J. Doroski. 1,676,233; July 3.
Plastic, Manufacture of decorative. J. H. Clewell. 1,675,642; July 3.
Plate, Rail-chair. J. E. McMullen. 1,675,504; July 3.
Plowhandle. S. G. Navarro. 1,675,904; July 3.
Plow, Power lift. C. G. Strandlund. 1,675,433; July 3.

Plug and lamp socket, Safety. L. Kellner. 1,675,353; July 3.
Plug, Sparking. G. Mickel. 1,675,764; July 3.
Polishing device. L. F. Phillips. 1,675,662; July 3.
Portfolio. J. D. Douglas. 1,675,406; July 3.
Post: *See*—
Binder post.
Pot: *See*—
Cooking pot.
Powder box. J. A. Clarke. 1,676,132; July 3.
Powder, Making leaden. C. A. Hall. 1,675,345; July 3.
Preparation, Skin. D. Brandon. 1,675,846; July 3.
Press: *See*—
Hydraulic press. Sealing press.
Press. F. Blando. 1,675,444–5; July 3.
Press. J. L. Snyder. 1,675,669; July 3.
Press for drying and ironing wearing linen. L. Flori. 1,675,929; July 3.
Press for shaping covers of teapots and the like. A. Handley. 1,675,550; July 3.
Press for the cold extruding of tubes from metal disks. E. Walther. 1,675,676; July 3.
Price indicator. B. Spinelli. 1,676,060; July 3.
Printing machine, Automatic. F. R. Bull. 1,675,969; July 3.
Printing or print-receiving elements or the like, Holding and supporting device for. W. C. Huebner. 1,675,493; July 3.
Printing presses, Attachment for. I. I. Stone. 1,675,582; July 3.
Propeller and a rotor, Combined. J. C. Bennett. 1,675,527; July 3.
Propeller for dirigible airships. J. W. Silver. 1,675,914; July 3.
Propelling and steering means for power speed boats. W. J. Roe. 1,676,158; July 3.
Protective apparatus. E. J. Schiffke. 1,675,428; July 3.
Pump. G. C. Martin. 1,675,945; July 3.
Pump. C. Starysky. 1,675,390; July 3.
Pump, Compressed-air well. F. Teeple. 1,675,772; July 3.
Pump, Electrically-heated dispensing. C. P. Biggs. 1,675,689; July 3.
Pump, Fluid. C. Van Amburgh. 1,675,434; July 3.
Pump for liquids or hydraulic motor. W. J. Rusdell. 1,676,114; July 3.
Pump, High-pressure centrifugal. M. Spillman and O. H. Dorer. 1,675,830; July 3.
Pump, Liquid. M. W. Dole. 1,675,405; July 3.
Pump-modifying mechanism for fuel-feeding devices. F. B. MacLaren. 1,676,038; July 3.
Pump, Waterworks auxiliary. O. H. Dorer. 1,675,845; July 3.
Pumps, Recording and sales-check mechanism for fluid-dispensing. A. R. Mason and O. C. Failing. 1,676,198; July 3.
Punch, Hydraulic. W. Messinger. 1,675,369; July 3.
Purifier, Gasoline. C. E. Pearson. 1,675,378; July 3.
Quilter. L. E. Kelley. 1,675,609; July 3.
Rack: *See*—
Necktie rack.
Radiator. J. M. Fedders. 1,675,796; July 3.
Radio apparatus, Indicating means for. G. L. Lang. 1,675,360; July 3.
Radio metering system. E. E. Clement. Re17,023; July 3.
Radio receiving circuits. C. L. Volz. 1,675,473; July 3.
Radiotelegraphy. A. H. Mittag. 1,675,987; July 3.
Radiotransmission. R. A. Heising. 1,675,888; July 3.
Rail bond. F. P. Dahlstrom and C. L. Larson. 1,675,750; July 3.
Railroad-rail fastening. J. A. Silver. 1,675,993; July 3.
Railway booster. F. W. Martin. 1,675,571; July 3.
Railway gate, Automatic. J. R. Burress. 1,676,227; July 3.
Railway tie. A. Nasby. 1,676,107; July 3.
Rat trap. C. L. Cessna. 1,675,532; July 3.
Razor. H. I. Gahagan and W. P. Aron. 1,675,487; July 3.
Razor, Electric. J. C. Holcomb. 1,675,805; July 3.
Razor, Safety. G. D. del Castillo. 1,675,793; July 3.
Razors, Attachment for. J. N. Garfunkle. 1,676,183; July 3.
Receptacle closure. H. Olt. 1,676,044; July 3.
Receptacle, Printer's sheet. C. Korzenborn. 1,676,095; July 3.
Record stop. E. S. Geer. 1,675,852; July 3.
Reel. F. Mossberg. 1,675,507; July 3.
Reeling device. H. E. Schnee. 1,675,429; July 3.
Refrigerating apparatus. G. Bayer. 1,676,068; July 3.
Refrigerating system. C. F. Hall and F. W. Lee. Re17,019; July 3.
Refrigeration, System of. P. E. Haynes. 1,675,455; July 3.
Refrigerator of the absorption type. B. C. Von Platen and C. G. Munters. 1,675,474; July 3.
Regenerative furnace, Reversible. J. S. Atkinson. 1,675,588; July 3.
Register and ventilator. S. Hart. 1,675,854; July 3.
Regulating apparatus. G. W. Kuntney and C. W. Bristol. 1,675,359; July 3.
Regulating apparatus for operating from a distance devices for releasing projectiles from aircraft. R. Alkan and G. Lesourd. 1,675,835; July 3.
Regulating device for gas and air mixing plants, gas-delivery plants and the like. F. Wolff. 1,675,966; July 3.
Regulator: *See*—
Thermal regulator.
Relay, Magnetic thermal. H. E. White. 1,675,680; July 3.
Relay system. W. O. Edmonds. 1,675,336; July 3.
Relay, Thermal. F. H. Miller. 1,675,370; July 3.
Relay, Thermal. H. E. White. 1,675,396; July 3.
Releasing hook. A. W. Lyda. 1,675,896; July 3.
Renovator, Necktie. J. H. Jackson. 1,675,757; July 3.
Reproducer, Sound. T. Graham. 1,675,343; July 3.
Rheostat. T. Rhodus. 1,676,050; July 3.
Rigging, Choker-hook. O. A. Wirkkala. 1,675,778; July 3.
Rigging, Draft. P. R. Dreuning. 1,676,178; July 3.
Rim clamp, Tire-. J. E. Smith and J. J. Herlbauer. 1,675,869; July 3.
Rim, Demountable tire-carrying. P. M. Miller. 1,675,371; July 3.
Rim remover. J. B. Law. 1,675,938; July 3.
Ring: *See*—
Finger ring.
Rivet holder. J. Tissler. 1,675,773; July 3.
Rods to plates, Securing stay. J. Petty. 1,675,727; July 3.
Roofing plate or shingle. N. G. Olsson. 1,676,043; July 3.
Rotary motor. I. Cavazos. 1,675,693; July 3.
Rug or similar article. L. S. Henderson. Des. 75,686; July 3.
Safety gate, Railway-crossing. M. Brown and J. Green. 1,675,447; July 3.
Safety hook. J. E. Sprain. 1,676,167; July 3.
Sand-treating machine. V. E. Minich. 1,675,721; July 3.
Sausage casing. R. Ettlinger. 1,676,082; July 3.
Saw. W. H. Bath. 1,675,480; July 3.
Saw. M. S. Lee. 1,675,565; July 3.
Saw-filing guide. J. A. Hugus. 1,676,188; July 3.
Saw set. R. R. Faulconer and W. E. Faulconer. 1,676,013; July 3.
Scale and chart therefor. J. E. Rogers. 1,676,052; July 3.
Scale, Coin-operated weighing. H. O. Hem. 1,675,975; July 3.
Scale mechanism, Weighing-. C. O. Marshall. 1,675,944; July 3.
Scale, Weighing. H. O. Hem. 1,675,976; July 3.
Screen: *See*—
Grinding-mill screen.
Screen for paper making. I. L. Laird. 1,675,612–13; July 3.
Screen for telephones. C. Fischer. 1,675,846; July 3.
Seal. B. Borland. 1,675,327–8; July 3.
Sealing press. C. C. Gibson. 1,676,017; July 3.
Searchlight. C. B. Mills. 1,675,720; July 3.
Secondary or storage battery. C. Ambruster. 1,675,321; July 3.
Seeding machine. C. E. Brower and C. N. Hines. 1,676,130; July 3.
Sensitized screen and making same. G. I. Keel. 1,675,561; July 3.
Separating machine. T. F. Morse. 1,675,572; July 3.
Separator: *See*—
Cream separator. Vacuum air separator.
Separators, Control apparatus for centrifugal. F. W. McEntire. 1,675,947; July 3.
Sewing machine, Buttonhole-. G. Müller. 1,675,508; July 3.
Sewing machine, Filled-bag-. N. V. Christensen. 1,675,450; July 3.
Sewing machines, Presser mechanism for. A. B. Clayton. 1,675,696; July 3.
Shade construction, Lamp. E. G. Patterson. 1,675,514; July 3.
Sharpener, Razor-blade. W. W. Upington. 1,676,209; July 3.
Sharpening and facet-cutting machine, Graver. J. W. Lees. 1,675,981; July 3.
Sheet material, Manufacture of. R. P. Rose. 1,675,959; July 3.
Sheet-supporting clip. E. B. Henderson. 1,675,755; July 3.
Ship, Pneumatically-driven. J. H. Mawby. 1,676,150; July 3.
Shock absorber. R. M. Lovejoy. 1,676,147; July 3.
Shock absorber, Hydraulic. C. W. Manzel. 1,675,760; July 3.
Shock-absorbing mechanism, Friction. J. F. O'Connor. 1,675,660–1; July 3.
Shoe. T. J. Fitz Harris. Des. 75,681; July 3.
Shoe. G. A. Jones. 1,675,711; July 3.
Shoe. A. M. Tucker. 1,675,774; July 3.
Shoes, Making wooden-soled. E. Pfestroff. 1,675,865; July 3.
Shredder, Paper-pulp. F. B. Philbrick. 1,676,048; July 3.
Shuttle. F. C. Reinhardt. 1,675,516; July 3.
Sign. R. W. Saverns and E. W. Tiemeyer. 1,675,580; July 3.
Sign, Advertising. B. H. Kollman and E. R. Phillips. 1,675,857; July 3.

Sign, Electric. S. Gatkowski. 1,675,851; July 3.
Sign, Road. G. L. Pitt. Des. 75,696; July 3.
Signal: *See*—
Crossing signal. Direction-indicating signal.
Signal apparatus. F. Klein. 1,675,713; July 3.
Signaling system, Electric wave. A. W. Kishpaugh. 1,675,889; July 3.
Signaling system, Wave. E. H. Armstrong. 1,675,323; July 3.
Silk, Manufacture of artificial. H. P. Bassett. 1,676,003; July 3.
Siphon, Pressure. C. A. Davis. 1,675,534; July 3.
Six-pole windings, Arrangement of. H. Weinert. 1,676,123; July 3.
Slaughtering device. E. Kreft. 1,675,856; July 3.
Sled. J. W. Roth. 1,676,159; July 3.

Transmission regulation. H. T. Friis. 1,675,848; July 3.
Transmission speedometer drive, Ford. H. Tittensor. 1,675,625; July 3.
Transmitter, Telegraph. L. M. Potts. 1,675,823; July 3.
Transporting and lowering burial apparatus, Combined. H. A. Ledyard and J. J. Jelley. 1,675,362; July 3.
Transporting goods. H. A. Otis. 1,675,512; July 3.
Transportation means, Freight-. W. P. Kellett. 1,675,562; July 3.
Trap: *See*—
Antisiphon trap. Rat trap.
Trap. H. E. Heine. 1,676,029; July 3.
Tray for child's chair, Adjustable. H. W. Martin. 1,675,985; July 3.
Treating articles being galvanized. T. A. Diesel. 1,675,926; July 3.
Truck-body construction. R. F. Burke. 1,675,317; July 3.
Truck, Freight. B. F. Fitch. 1,675,701; July 3.
Truck, Locomotive trailer. C. T. Westlake. 1,675,679; July 3.
Truck-wheel, Dual-tired. L. D. Kay. 1,675,934; July 3.
Tube cleaner. J. P. Rodgers. 1,676,157; July 3.
Tungsten and producing the same, Form of. C. G. Fink. 1,675,486; July 3.
Tuyère cooler. J. E. Lose. 1,675,611; July 3.
Typewriter copyholder and line marker. P. L. Blake. 1,675,784; July 3.
Typewriting machine. J. Waldheim. 1,675,436; July 3.
Typewriting machines, Apparatus for holding work webs for. J. Waldheim. 1,675,740; July 3.
Typographical distributing bar. G. E. Mariatt. 1,676,196; July 3.
Underreamer, Hydraulic. B. F. Blanchard. 1,675,325; July 3.
Unloading device for slitter and rewinding machines. P. D. Parsons. 1,675,863; July 3.
Unloading machine. S. Nagao. 1,676,041; July 3.
Unit for use in the manufacture of separable cuff links. S. Fischer. 1,675,797; July 3.
Vacuum air separator. L. Lindsay. 1,675,941; July 3.
Vacuum pressure device and mask. W. C. Huebner. 1,675,492; July 8.
Vacuum-tube contact device. J. C. Farley. 1,675,485; July 3.
Valve. W. M. Fleming. 1,676,179; July 3.
Valve. F. J. Laird. 1,675,979; July 3.
Valve. J. W. Langdon. 1,676,034; July 3.
Valve cap. F. D. Farr. 1,675,752; July 3.
Valve, Combination float and diaphragm. C. N. Flagg. 1,676,084; July 8.
Valve control for plunger pumps. R. C. Hawkins. 1,676,186; July 3.
Valve, Expansion. C. M. Holley. 1,676,031; July 3.
Valve for water-closets, Pendulum or swinging flush. E. H. Gove. 1,676,234; July 3.
Valve for compressors. C. H. Leinert. 1,675,566; July 3.
Valve for lawn-sprinkling systems, Drain. H. B. Sherman. 1,675,992; July 3.
Valve, Full-way or gate. H. L. Mason. 1,675,986; July 3.
Valve, Indicating and recording nonreturn. D. R. Yarnall. 1,675,523; July 3.
Valve mechanism. T. H. Moseley and C. E. Droege. 1,675,817; July 3.
Valve mechanism, Control or change-over. J. Lyall. 1,675,982; July 3.
Valve, Pilot-light-controlled gas. F. H. Brinkerhoff. 1,675,638; July 3.
Valve, Piston. E. Allzeit. 1,675,320; July 3.
Valve, Pressure-retaining. C. Transue. 1,676,169; July 3.
Valve, Reciprocating. W. G. Wilson. Re17,022; July 3.
Valve-tappet construction. C. H. Page. 1,675,954; July 3.
Valve, Thermostatic water. L. M. Spencer. 1,675,620; July 3.
Valve, Tire. M. J. Payne. 1,675,990; July 3.
Valve unit, Thermostatically-controlled. J. V. Giesler. 1,675,341; July 3.
Vanity case. W. J. Hines. Des. 75,688; July 3.
Vapor burner. R. M. Sherman. 1,676,223; July 3.
Vapor moistener. J. A. Peterson. 1,676,110; July 3.
Vapors, Fractional condensation of mixed. L. Welsberg. 1,676,232; July 3.
Vehicle heater, Motor-. J. H. Gould. 1,676,021; July 3.
Vehicle top. M. J. Forrester. 1,675,539; July 3.
Vehicles, Method of and apparatus for controlling power-driven. A. D. Skinner. 1,675,388; July 3.
Vehicles, Resilient suspension for motor. G. Veglio. 1,675,963; July 3.
Vending and dispensing case, Combination. G. R. Webber. Des. 75,707; July 3.
Vending and display case, Combined. W. O. Harrison and G. W. Johnson. Des. 75,685; July 3.
Vending machine. J. R. Nolan. 1,675,510; July 3.
Vending machine, Coin-controlled. G. B. Smith. 1,675,994; July 3.
Vending machines, Coin-controlled mechanism for. J. R. Nolan. 1,675,511; July 3.
Ventilating attachment for milk-can covers. W. McCallum. 1,675,503; July 3.
Vise automatic, Auxiliary. D. C. Scougal. 1,675,868; July 3.
Voice-producing apparatus for dolls and other toy figures. E. F. Steiner. 1,675,832; July 3.
Wagon, Tip. H. Bernier. 1,676,127; July 3.
Wall structure, Compound. L. L. Knox. 1,676,094; July 3.
Warm-air furnace. R. W. Satterholm. 1,676,054; July 3.
Warp-knit fabric. T. R. Meinig. 1,675,500; July 3.
Washer and sterilizer. H. K. McManus. 1,675,655; July 8.
Waste retainer. R. H. Dyer. 1,675,751; July 3.
Watchcase. A. W. Wadsworth. 1,675,675; July 3.
Water gauge, Steam-boiler. O. H. Hartmann and H. Peperkorn. 1,676,026; July 3.
Wave setter for hair-dressing purposes. J. Bloom. 1,675,839; July 3.
Welding machine. A. M. Stanley and J. E. Sims. 1,675,734; July 3.
Welding machine, Electric. L. H. Hoffer. 1,675,705; July 3.
Welding medium for aluminum. W. Reuss. 1,675,664; July 3.
Wheel: *See*—
Disk wheel. Truck wheel.
Wheel gauge, Motor-vehicle-. C. C. Bennett. 1,675,481; July 3.
Wheel nave and the like and method of forming it. H. S. Holmes. 1,675,706; July 8.
Wheel rim, Vehicle. H. S. Goodkowitz. 1,675,488; July 3.
Winding machine. M. B. Grout. 1,675,650; July 3.
Window and door construction. B. J. Goldsmith and E. Koeb. 1,675,704; July 3.
Window support. C. A. Lewis. 1,675,939; July 3.
Window wiper. F. A. Eitelgoerge. 1,675,537; July 3.
Windshield. A. L. Riker. 1,675,909; July 3.
Windshield cleaner. F. G. and W. M. Folberth. 1,675,337–8; July 3.
Windshield heater. F. E. Roberts. 1,675,911; July 3.
Wiper, Windshield. F. Mokma. 1,675,816; July 3.
Wire-drawing block. S. Pushalski. 1,675,822; July 3.
Wire-stitching folding machine. E. D. Rader. 1,676,156; July 3.
Wire-tie-twisting apparatus. A. M. Bates. 1,675,746; July 3.
Wood pieces for making rolls, Joining. W. J. Simonds and J. G. Spear. 1,675,387; July 3.
Work holder. W. H. Chapman. 1,675,449; July 3.
Working head, Doublestroke. H. Schlachter. 1,676,163; July 3.
Wrench: *See*—
Pipe wrench. Sucker-rod wrench.
Yarns or the like in looms, winding, doubling, and other textile machines, Tensioning. H. L. Byrd. 1,675,330; July 3.
Zinc coating ferrous metal. J. G. Fitz Gerald. 1,675,646; July 3.

CLASSIFICATION OF PATENTS

ISSUED JULY 3, 1928.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 4: 1,675,779
2— 146: 1,675,758
151: 1,675,999
197: 1,675,864
4— 7: 1,676,116
57: 1,676,234
72: 1,675,841
5— 13: 1,675,883
18: 1,675,411
289: 1,675,564
7— 3: 1,675,476
8— 13: 1,675,459
19: 1,675,810
9— 21: 1,675,372
10— 137: 1,675,850
11— 1: 1,676,112
12— 39: R. 17,018
87: 1,676,218
146: 1,675,711
15—104.14: 1,676,157
120: 1,675,601
1,675,699
179: 1,675,616
198: 1,675,617
228: 1,675,736
1,676,115
253: 1,675,537
255: 1,675,816
16— 66: 1,675,980
114: 1,675,812
163: 1,676,073
179: 1,675,573
17— 1: 1,675,856
45: 1,676,082
18— 5: 1,675,517
48.8: 1,675,642
54: 1,676,003
55: 1,675,376

Why They Call it The Danger Line. For Dental Cream. E. R. Squibb & Sons. 11,037; July 10.
Youth and Health are Priceless Gifts. For Dental Cream. E. R. Squibb & Sons. 11,042; July 10.

ALPHABETICAL LIST OF PATENTEES

TO WHOM

PATENTS WERE ISSUED ON THE 10TH DAY OF JULY, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

A-V. Burner Company. (See Axtell, J. M., and Von Hofen, assignors.)
Abbott Laboratories, The. (See Adams, R., and Volwiler, assignors.)
Absolute Con-Tac-Tor Corporation. (See Phelan, Louis A. M., assignor.)
Absolute Con-Tac-Tor Corporation. (See Phelan, L. A. M., and Hotchkiss, assignors.)
Adam, Frank, Electric Co. (See Stieglitz, Henry M., assignor.)
Adams, Edwin J., Little Falls, N. Y. Baby carriage. 1,677,011; July 10.
Adams, Nathan H. (See Fuller, T. S., Adams, and Nolte.)
Adams, Roger, Urbana, and E. H. Volwiler, assignors to The Abbott Laboratories, Chicago, Ill. Production of esters of aromatic acids. 1,676,470; July 10.
Aehischer, Joseph. (See Smallhouse, Albert A., assignor.)
Aero, Tovarna Ctadel. (See Arigi, Julius, assignor.)
Affel, Herman A., Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. Radio signaling system. 1,676,240; July 10.
Akers, J. B. (See Luzzi, August F., assignor.)
Aktien-Gesellschaft für Schmiertecknik. (See Conrad, Ewald, assignor.)
Albach, Frank, assignor to Fred Medart Manufacturing Company, St. Louis, Mo. Cabinet and locker. 1,676,235; July 10.
Albright, Henry F., jr., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Feeding mechanism. 1,676,606; July 10.
Alden Manufacturing Co. (See Alden, Milton, assignor.)
Alden, Milton, assignor to Alden Manufacturing Co., Springfield, Mass. Telephone plug. 1,677,068; July 10.
Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. System of electric ship propulsion. 1,676,312; July 10.
Alkan, Robert, and G. Lesourd, Paris. Device for releasing projectiles on aircraft. 1,676,762; July 10.
Allen, Howard E., Lima, Ohio. Two-cycle gas engine. 1,676,512; July 10.
Allied Packers, Inc. (See Cushman, Arthur W., assignor.)
Altemus, Jacob K., Philadelphia, Pa. Yarn-winding machine. 1,676,374; July 10.
Aluminum Die-Casting Corporation. (See Bungay, George W., assignor.)
Alvey Manufacturing Company. (See Bohn, William J., assignor.)
American Bemberg Corporation. (See Kempf, Hubert, assignor.)
American Can Company. (See Loesel, Nicholas, assignor.)
American Can Company. (See Magill, Donald G., assignor.)
American Can Company. (See Pittelkow, August, assignor.)
American Circular Loom Company. (See Lutz, George A., assignor.)
American Crayon Company, The. (See Parmenter, George E., assignor.)
American Encaustic Tiling Company. (See Prouty, Theodore C. and W. O., assignors.)
American Engineering Company. (See Kelly, P. C., and Landis, assignors.)
American Engineering Company. (See Lamond, Robert C., assignor.)
American Meter Company. (See Huettig, Arno R., assignor.)
American Ornamental Bottle Corporation. (See Mas, George N., assignor.)
American Potash & Chemical Corporation. (See Mumford, Russell W., assignor.)
American Range Corporation. (See Zarth, Henry F., assignor.)
American Sales Book Company, Limited. (See Bottle, Edward K., assignor.)
American Telephone and Telegraph Company. (See Affel, Herman A., assignor.)
American Telephone and Telegraph Company. (See Blackwell, O. B., and Martin, assignors.)
American Telephone and Telegraph Company. (See Carpe, Allen, assignor.)
American Telephone and Telegraph Company. (See Coxhead, Harry B., assignor.)
American Telephone and Telegraph Company. (See Toomey, John F., assignor.)
American Tool Works Company, The. (See Robinson, A. E., and Sosa, assignors.)
American Vitrified Products Company. (See Colwell, David M., assignor.)
American Window Company. (See Lewis, Claude A., assignor.)
American Wiremold Company. (See Frederickson, Otto A., assignor.)
Amsden, Ralph D., Lynn, Mass., assignor to General Electric Company. Vibratory converter. 1,676,973; July 10.
Anchor Cap and Closure Corporation. (See Hardiman, James S., assignor.)
Anchor Cap and Closure Corporation. (See Podel, Abraham, assignor.)
Anderson, Arvid E., Schenectady, N. Y., assignor to General Electric Company. Automatic reclosing circuit-breaker system. 1,676,313; July 10.
Anderson, Arvid E., Schenectady, N. Y., assignor to General Electric Company. Automatic reclosing circuit-breaker system. 1,676,314; July 10.
Anderson, Arvid E., Schenectady, N. Y., assignor to General Electric Company. Automatic reclosing circuit-breaker system. 1,676,315; July 10.
Anderson, Arvid E., Schenectady, N. Y., assignor to General Electric Company. Automatic reclosing circuit-breaker system. 1,676,974; July 10.
Anderson, Arvid E., Scotia, N. Y., assignor to General Electric Company. Automatic reclosing circuit-breaker system. 1,676,316; July 10.
Anderson, Church, Los Angeles, Calif. Oil burner for furnaces. 1,676,471; July 10.
Anderson, John G., Crestwood, and R. H. Waldo, assignors to John Wanamaker, New York, New York, N. Y. Golf-ball box. 1,676,975; July 10.
Anderson, Paul, Vasteras, Sweden. Machine for the sintering of ore and the like. 1,676,720; July 10.
Anderson, Preston W., Los Angeles, Calif. Cradles. 1,676,420; July 10.
Anderson, Swan F., Rockford, assignor by mesne assignments to C. P. Parker, trustee, Chicago, Ill. Rubbing machine. 1,677,112; July 10.
Andrews, Isaac, Spartanburg, S. C. Loom reed. 1,676,513; July 10.
Anetsberger, Frank A. and W., Chicago, Ill. Humidifying apparatus. 1,676,763; July 10.
Anetsberger, William. (See Anetsberger, Frank A. and W.)
Angle, Glenn D., and G. E. A. Hallett, Dayton, Ohio. Engine cylinder. 1,676,976; July 10.
Anstey, Tracey J., Oakland, Calif. Wedge closure fastener. 1,676,515; July 10.
Anthony, Wendell P., Ridley Park, Pa., assignor to The Mynol Chemical Company. Hypodermic syringe. 1,676,881; July 10.
Antoniola, Alessandro. (See Casati, P., and Antoniola.)
Arigi, Julius, Marianske Lazne, assignor to the firm: Aero Továrna Ctadel, Praha-Vysocany, Czechoslovakia. Combined lock and latch. 1,677,012; July 10.
Arkell Safety Bag Company. (See Widmer, Howard G., assignor.)
Armstrong, Frederick A., Kirksville, Mo. Nipple applicator. 1,676,236; July 10.
Armstrong, Lyman P., San Jose, Calif. Convertible furniture. 1,676,514; July 10.
Arrowood, Reuben H., assignor of one-half to M. M. Mier, Los Angeles, Calif. Cutter for ice cream and similar products. 1,677,115; July 10.
Art Metal Construction Company. (See Ulrich, Charles B., assignor.)
Asbury, Dorsey F., Broomes Island, Md. Gearing. 1,676,421; July 10.
Astle, William. (See Neal, S. G., Astle, and Wilson.)
Astley, Edward F., assignor to H. M. Seyer, Chicago, Ill. Brush. 1,676,812; July 10.
Atlantic Refining Company, The. (See Smith, L. B., and Jamison, assignors.)
Atwater, Harry A., assignor to Combustion Equipment Company, Kansas City, Mo. Oil burner. 1,676,813; July 10.
Atwood Machine Company, The. (See Bradley, E. E., and Rowe, assignors.)
Au, Bertha B., et al. (See Au, Carl H., assignor.)
Au, Carl H., assignor to B. B. Au and J. K. Hoyt, Washington, D. C. Recorder. 1,676,848; July 10.
Austin, Nellie F. (See Austin, William S., assignor.)
Austin, William J. (See Crummey, J. D., Austin, and Lewis.)

Austin, William S., assignor of one-half to N. F. Austin, Kansas City, Mo. Attachment for typographical machines. 1,676,516; July 10.
Automatic Electric Inc. (See Crocker, Thomas F., assignor.)
Automatic Electric Inc. (See Homrighous, John H., assignor.)
Automatic Electric Inc. (See Ostline, John E., assignor.)
Automatic Electric Inc. (See Wicks, John, assignor.)
Automatic Straight Air Brake Company. (See Neal, Spencer G., assignor.)
Automatic Straight Air Brake Company. (See Neal, S. G., Astle, and Wilson, assignor.)
Ayars, Charles H., assignor to Ayars Machine Company, Salem, N. J. Vegetable slicer. 1,676,241; July 10.
Ayars Machine Company. (See Ayars, Charles H., assignor.)
Axelrod, Meyer L., assignor to Ohio Chemical & Manufacturing Company, Cleveland, Ohio. Dental flask. 1,676,677; July 10.
Axtell, Jay M., and F. G. Von Hofen, assignors to A.-V. Burner Company, Fort Worth, Tex. Circulating gas burner. 1,676,472; July 10.
Bach, Oscar B., New York, N. Y. Decorative panel for metal work. Des. 75,709; July 10.
Baines, Joseph E., Pittsburgh, and J. P. Bosie, Mount Oliver, assignors to National Tube Company, Pittsburgh, Pa. Chuck-operating mechanism. 1,676,814; July 10.
Baker, Dudley M. (See Moore, Henry W., assignor.)
Baker, John H., Royal Oak, Mich. Mixing device. 1,676,237; July 10.
Baker Ranking Company, The. (See Stahl, Edward J., assignor.)
Baldus, Paul C. (See Wollensak, A. C., Jacobs, and Baldus.)
Baldwin, James V. (See Van Hise, Lester E., assignor.)
Ballou, B. A., & Co. (See Ballou, F. A., jr., and Morehouse, assignors.)
Ballou, B. A., & Co. (See Ballou F. A., and Stafford, assignors.)
Ballou, Frederick A., jr., and E. Morehouse, Providence, R. I., assignors to B. A. Ballou & Co., Inc., Providence, R. I. Guard for stickpins. 1,676,376; July 10.
Ballou, Frederick A., Nayatt, and R. T. Stafford, East Providence, assignor to B. A. Ballou & Co., Inc., Providence, R. I. Shoe strap. Des. 75,710; July 10.
Barany, Edmund R., Brooklyn, N. Y., assignor to French Battery Company, Madison, Wis. Flash light. 1,676,849; July 10.
Barber, Howard M., Pawcatuck, Conn., assignor to C. B. Cottrell & Sons Company, Westerly, R. I. Collecting folding, and delivery mechanism for printing presses. 1,676,882; July 10.
Barling, Walter H., Astoria, N. Y. Empennage and plane arrangement. 1,677,069; July 10.
Bartholdy, Max, Essen, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Gauge with a precision indicator for testing the flank diameter of external threads. 1,676,721; July 10.
Bartlett, George M., Indianapolis, Ind. Flexible shaft coupling. 1,676,242; July 10.
Basel, Eli A., Kansas City, Mo. Controlling means for multiple fuel burners. 1,676,764; July 10.
Bassick Company, The. (See Moore, R. G., and Claude-Mantle, assignors.)
Bassick Manufacturing Company, The. (See Carr, Moses F., assignor.)
Bassick Manufacturing Company, The. (See Davis, Ernest W., assignor.)
Bassick Manufacturing Company, The. (See Murphy, Howard, J., assignor.)
Bassick Manufacturing Company, The. (See Zerk, Oscar V., assignor.)
Bateman, Louis C., West Ealing, London, England. Compound rubber tread. 1,677,013; July 10.
Batty, Harold L., West Croydon, England, assignor to Eastman Kodak Company, Rochester, N. Y. Package for photographic mounts. 1,676,238; July 10.
Bauer, Carl, assignor to Doetsch & Bauer Company, Chicago, Ill. Settee frame or similar article. Des. 75,711; July 10.
Bauer, Carl, assignor to Doetsch & Bauer Company, Chicago, Ill. Settee frame or similar article. Des. 75,712; July 10.
Bauer, Carl, assignor to Doetsch & Bauer Company, Chicago, Ill. Settee frame or similar article. Des. 75,713; July 10.
Bauer, Carl, assignor to Doetsch & Bauer Company, Chicago, Ill. Settee frame or similar article. Des. 75,714; July 10.
Baum, David, Livermore Falls, Me. Shoe locater for shoe-turning machines. 1,676,722; July 10.
Baumgarten, Paul, Richmond Hill, N. Y. Combination chair and window seat. 1,676,723; July 10.
Bean Spray Pump Co. (See Crummey, J. D., Austin, and Lewis, assignors.)
Beaney Rubber Company Inc. (See Beaney, Thomas A., assignor.)
Beaney, Thomas A., Poughkeepsie, assignor to Beaney Rubber Company Inc., New York, N. Y. Machine for cutting off and preparing stock strips. 1,676,883; July 10.
Beatty, Douglas T., Birmingham, Ala., assignor to Sand Spun Patents Corporation, Wilmington, Del. Method of and apparatus for lining pipes. 1,676,815; July 10.
Beaumont, R. H., Company. (See Beaumont, Robert H., assignor.)
Beaumont, Robert H., Radnor, assignor to R. H. Beaumont Company, Philadelphia, Pa. Mechanism for operating winding-drum friction clutches. 1,676,765; July 10.
Becker, Arman E., Newark, N. J., assignor to Standard Oil Development Company. Distillation. 1,676,724; July 10.
Belden, Katheryne L., Peoria, Ill. Toy. 1,676,884; July 10.
Bell Telephone Laboratories, Incorporated. (See Black, Harold S., assignor.)
Benford, Frank A., Schenectady, N. Y., assignor to General Electric Company. Reflectometer. 1,677,014; July 10.
Benjamin Electric Manufacturing Company. (See Benjamin, Reuben B., assignor.)
Benjamin Electric Manufacturing Company. (See Niemann, George F., assignor.)
Benjamin, Reuben B., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Housing construction. 1,676,239; July 10.
Bennett, George L., Cleveland, Ohio. Metallic stairway. 1,676,317; July 10.
Bennett, Raymond B., assignor to Montague City Rod Company, Montague City, Mass. Level-winding fishing reel. 1,676,678; July 10.
Bensinger, Wilson, Lodi, Ohio. Concrete fence post. 1,676,679; July 10.
Benton, Curran S., Port Huron, Mich. Bean separator. 1,677,015; July 10.
Berentsen, Gertrude M., Wauwatosa, Wis. Seat cover for infants' toilets. 1,676,243; July 10.
Berger Manufacturing Company, The. (See Schmitz, Fred A., assignor.)
Bergmann, Christian N., assignor to Bergmann Packaging Machine Company, Pittsburgh, Pa. Unit-measuring machine. 1,676,377; July 10.
Bergmann, Christian N., Pittsburgh, Pa.; E. Z. Taylor, Newark, N. J.; and C. Taylor, Hartford, Conn., assignors to Bergmann Packaging Machine Company, Pittsburgh, Pa. Cover-placing mechanism for unit-measuring machines. 1,676,378; July 10.
Bergmann, Conrad, assignor to Columbia Steel Equipment Company, Philadelphia, Pa. Drawer mount. 1,676,991; July 10.
Bergmann, George, assignor to Columbia Steel Equipment Company, Philadelphia, Pa. Drawer mount. 1,676,992; July 10.
Bergmann Packaging Machine Company. (See Bergmann, Christian N., assignor.)
Bergmann Packaging Machine Company. (See Bergmann, C. N., E. Z., and C. Taylor, assignors.)
Berry, Edward R., Malden, Mass., assignor to General Electric Company. Quartz applicator. 1,677,016; July 10.
Besse, David J., San Angelo, Tex. Air cooler. 1,677,070; July 10.
Best, Harry A., assignor to H. A. Best Lamp Company, Chicago, Ill. Finial. 1,676,422; July 10.
Best, H. A., Lamp Company. (See Best, Harry A., assignor.)
Bethenod, Joseph, Paris, France. System for the electric transmission of signals along lines for power distribution. 1,676,680; July 10.
Beveridge, Ernest G., Brooklyn, assignor to R. Hoe & Co., Inc., New York, N. Y. Counting mechanism. 1,676,939; July 10.
Bible, P. M., et al. (See Jones, Hugh J., assignor.)
Biers, Chris T., Lamoille, Ill. Rim for vehicle wheels. 1,676,725; July 10.
Bigney, S. O., Company. (See Payette, Joseph A., assignor.)
Bing, Bridget T., New York, N. Y. Sanitary toilet-seat cover. 1,676,940; July 10.
Birdsey, Charles R., Hinsdale, Ill., assignor to United States Gypsum Company, Chicago, Ill. Apparatus for making lap-edged plaster sheathing board. 1,676,318; July 10.
Birkholz, Richard G., Milwaukee, Wis., assignor to Penn Metal Company, Cambridge, Mass. Expanded-metal machine. 1,676,517; July 10.
Bissell, Carl H., assignor to Crouse-Hinds Company, Syracuse, N. Y. Electric flasher switch mechanism. 1,676,850; July 10.
Black, Harold S., East Orange, N. J., assignor to Bell Telephone Laboratories, Incorporated, New York, N. Y. Reducing cross talk in carrier-current signaling systems. 1,676,627; July 10.
Blackwell, Otto R., Plandome, N. Y., and De L. K. Martin, West Orange, N. J., assignors to American Telephone and Telegraph Company. Multiple channel radioreceiver. 1,676,244; July 10.
Bluetz, Harry M., assignor to Royal Electrotype Company, Philadelphia, Pa. Backing electrotype plates. 1,676,628; July 10.
Blair, John G., Poplar, England. Lighting ships' lifeboats and the like. 1,676,977; July 10.

Blanchard, Frederick C., assignor to Detroit Lubricator Company, Detroit, Mich. Lubricator. 1,676,473; July 10.
Bleuel, William H., Detroit, Mich. Spring-forming machine. 1,676,598; July 10.
Bloch, Leon. (See Richards, P. R., and Bloch.)
Bloodhart, John W., assignor to Midland Chemical Laboratories, Inc., Dubuque, Iowa. Liquid dispenser. 1,676,851. July 10.
Boardman, Charles H., Columbus, Ohio. Vehicle for children. 1,677,017; July 10.
Bobbitt, Ralph D., Norfolk, Va. Crown bearing. 1,677,071; July 10.
Boehm, Edward, Duluth, Minn. Baby walker. Des. 75,715; July 10.
Hoehringer, C. H., Sohn Chemische Fabrik. (See Häussler, Alfred, assignor.)
Bohn, William J., assignor to Alvey Manufacturing Company, St. Louis, Mo. Conveyer. 1,676,978; July 10.
Bolduc, David J., San Francisco, Calif. Metal hair tube. 1,676,681; July 10.
Boles, Sherman L., San Francisco, Calif. Adjustable head for golf clubs. 1,676,518; July 10.
Bolinder, Erik A., Stockholm, Sweden. Dovetailed stave for barrels and casks. 1,676,319; July 10.
Bonat & Bro. et al. (See Mack, Carl, assignor.)
Bonat, Harry, et al. (See Mack, Carl, assignor.)
Bonat, Samuel, et al. (See Mack, Carl, assignor.)
Boos, August N. E., New York, N. Y. Recording apparatus. 1,676,629; July 10.
Borkman, George F., Salt Lake City, Utah. Eccentrically-pivoted armature mounting for vibratory units. 1,676,380; July 10.
Bosie, Jacob P. (See Baines, J. E., and Bosie.)
Bottle, Edward K., Elmira, N. Y., assignor to American Sales Book Company, Limited, Toronto, Ontario, Canada. Sales-check holder. 1,676,726; July 10.
Boxboard Products Company. (See Kondolf, Mathias R., assignor.)
Boye, James H., Chicago, Ill. Curtain and portière rod. Des. 75,716; July 10.
Boye, James H., Chicago, Ill. Curtain and portière rod. Des. 75,717; July 10.
Boye, James H., Chicago, Ill. Curtain and portière rod. Des. 75,718; July 10.
Bradley, Edward E., Stonington, Conn., and I. R. Rowe, Westerly, R. I., assignors to The Atwood Machine Company, Stonington, Conn. Winding and reeling machine. 1,676,885; July 10.
Brandt, Abram, assignor to Jos. Brandt & Bro., New York, N. Y. Artificial-horsehair upholstery fabric. 1,676,886; July 10.
Brandt, Carl A. (See Brooks, C. E., and Brandt.)
Brandt, Carl A., Great Neck, N. Y. Water screen. 1,676,245; July 10.
Brandt, Jos., & Bro. (See Brandt, Abram, assignor.)
Branum, Solomon C., assignor of one-half to J. E. Mason, Oklahoma City, Okla. Sack holder. 1,676,852; July 10.
Brase, Wilhelm, assignor of one-half to C. Graaff, Berlin, Germany. Sewing machine with several needles. 1,676,853; July 10.
Braun, Gaius A. (See Maury, Alfred D., assignor.)
Braun, Philip N., assignor, by mesne assignments, to The Prosperity Company, Inc., Syracuse, N. Y. Garment press. 1,676,423; July 10.
Breidenbach, George, Chicago, Ill. Removable closure. 1,676,379; July 10.
Breitenstein, Arthur L., deceased, Akron, Ohio; M. E. Breitenstein, administratrix. 1,676,630; July 10.
Breitenstein, Maude E., administratrix. (See Breitenstein, Arthur L.)
Breneman, Paul E., Detroit, Mich., assignor to The Studebaker Corporation, South Bend, Ind. Body construction. 1,676,599; July 10.
Brettschneider, William F., St. Paul, Minn. Signal. 1,676,766; July 10.
Briggs, Frederick, assignor to Briggs Packing Co., Washington, D. C. Openwork container for treating meats. 1,676,816; July 10.
Briggs Packing Co. (See Briggs, Frederick, assignor.)
British Aluminum Company, The. (See Gwyer, A. G. C., and Phillips, assignors.)
Broido, Benjamin, assignor to The Superheater Company, New York, N. Y. Furnace-wall construction. 1,676,246; July 10.
Broido, Benjamin, assignor to The Superheater Company, New York, N. Y. Water-tube boiler. 1,676,631; July 10.
Brooks, Charles E., Montreal, Canada, and C. A. Brandt, Great Neck, N. Y.; said Brandt assignor to The Superheater Company, New York, N. Y. Steam locomotive. 1,676,247; July 10.
Broughton, Arthur E., Minneapolis, Minn. Machine and method for drying macaroni. 1,676,474; July 10.
Brown, E. T. (See Hochstein, Ludwig, assignor.)
Browne, Lyle W., assignor to The Fisher Governor Company, Marshalltown, Iowa. Liquid-controlling device. 1,677,096; July 10.
Brunhoff, Edward, Cincinnati, Ohio. Display and vending apparatus. 1,676,682; July 10.
Brunhoff, Edward, Wyoming, Ohio. Humidor display lid. 1,676,683; July 10.
Brütsch, Hans. (See Knecht, O., and Brütsch.)
Bryant, William L., Springfield, Vt. Micrometer gauge. 1,676,248; July 10.
Buckland, Bruce O., and G. B. Warren, Schenectady, N. Y., assignors to General Electric Company. Geared turbine installation. 1,677,026; July 10.
Bukow, Reinhold, Long Island City, assignor to Hardman, Peck & Co., New York, N. Y. Tracking device. 1,676,475; July 10.
Bulla, Horace E. (See Reed, M. L., and Bulla.)
Bundy, Philander R., Indianapolis, Ind. Rim lock. 1,676,684; July 10.
Bungay, George W., Plainfield, assignor to Aluminum Die-Casting Corporation, Garwood, N. J. Hydraulic construction. 1,676,249; July 10.
Burdette, Richard S., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Sectional air bag. 1,676,817; July 10.
Burns, Elmer G., Los Angeles, Calif. Vacuum tank. 1,676,767; July 10.
Burroughes, William J., London, England, assignor of one-third to F. A. Roden and one-third to C. Taylor, Santa Monica, Calif. Boiler bottom. 1,676,320; July 10.
Burrows, Charles W., New York, assignor, by mesne assignments, to Magnetic Analysis Corporation, Long Island City, N. Y. Method of and apparatus for testing magnetizable objects. 1,676,632; July 10.
Buttolph, Leroy J., Grantwood, assignor to Cooper Hewitt Electric Company, Hoboken, N. J. Transformer and circuit. 1,676,768; July 10.
Byers, Burwell B. (See Fortune, Drury D., assignor.)
Caldwell, Edwin, New York, N. Y. Clutch pencil. 1,676,250; July 10.
Caldwell, Frank W. (See Fales, E. N., and Caldwell.)
Callison, Abner F., New York, N. Y. Swiveled wheel for supporting portable containers. 1,676,381; July 10.
Cammen, Leon, New York, N. Y. Apparatus for the annealing of metals in continuous cold rolling. 1,676,685; July 10.
Canadian Electro Products Company. (See Matheson, Howard W., assignor.)
Cantu, Tomas, Elgin, Tex. Garden roller. 1,676,941; July 10.
Cape Cod Shop. (See Moore, Henry W.)
Capstaff, John G., assignor to Eastman Kodak Company, Rochester, N. Y. Diaphragm control for projection printers. 1,676,600; July 10.
Carbo-Oxygen Company. (See Rose, James R., assignor.)
Carlson, Alexander, assignor to Dayton-Wright Company, Dayton, Ohio. Automobile body construction. 1,676,476; July 10.
Carlson, Carl A., San Francisco, Calif. Windshield wiper. 1,677,018; July 10.
Carpe, Allen, New York, N. Y., assignor to American Telephone and Telegraph Company. Secrecy signaling system. 1,676,321; July 10.
Carpentier, Ateliers J., et al. (See Verdan, C., and Loiseau, assignors.)
Carr, Arthur J., et al. (See Foster, Clarence B., assignor.)
Carr, Edward G., Chicago, Ill. Road-form connection. 1,676,477; July 10.
Carr Fastener Company. (See Carr, Fred S., assignor.)
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,677,097; July 10.
Carr, Fred S., Newton, assignor to Carr Fastener Company, Carbridge, Mass. Fastener. 1,676,882; July 10.
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Separable fatener. 1,676,883; July 10.
Carr, Moses F., Lexington, Mass., assignor, by mesne assignments, to The Bassick Manufacturing Company, Chicago, Ill. Lubricating apparatus. 1,676,424; July 10.
Carter, Clarence W., assignor to Carter-Mayhew Manufacturing Company, Minneapolis, Minn. Dockage tester. 1,676,519; July 10.
Carter, Floyd, Gridley, Ill. Harvesting machine for soy beans and the like. 1,676,521; July 10.
Carter, Hazel H., Norwood, Ohio. Can opener. 1,676,520; July 10.
Carter, John D., Lansdowne, Pa. Composite board. 1,676,727; July 10.
Carter-Mayhew Manufacturing Company. (See Carter, Clarence W., assignor.)
Casati, Pietro, and A. Antoniola, Turin, Italy. Arrangement for eliminating the dangers due to back fires in carburetors. 1,677,019; July 10.
Casterline, Edwin D., assignor to J. E. Casterline, Oakland, Calif. Roll-material holder. 1,676,854; July 10.
Casterline, Julia E. (See Casterline, Edwin D., assignor.)
Cavanaugh, Leo C., Youngstown, Ohio. Fountain toothbrush. 1,676,601; July 10.
Central Scientific Company. (See Stannard, Winfield H., assignor.)
Cesar, Gyula, Sopron, Hungary, assignor of one-half to S. Toth. Organ-pipe construction. 1,676,942; July 10.
Chamberlin, John R., Branxville, N. Y. Core-drill bit. 1,676,887; July 10.
Chambers, Bryan, et al. (See Starkweather, George E., assignor.)

Champion Manufacturing Company. (See Dunbaugh, George J., jr., assignor.)
Chandler, Henry Thomas, New York, N. Y. Bearing steel. 1,676,384; July 10.
Chapman, Ralph E., Brooklyn, N. Y. Apparatus for packing joints. 1,676,425; July 10.
Cheatham, Chester W., assignor of one-half to J. N. Nissen, Seattle, Wash. Measuring weir. 1,676,855; July 10.
Cheek, Tolbert F., assignor, by mesne assignments, to Welte-Mignon Corporation, New York, N. Y. Record-controlled musical instrument. 1,676,633; July 10.
Cheeseman, Ralph T., Lynn, Mass., assignor to General Electric Company. Vibratory converter. 1,676,979; July 10.
Cheney, Byron M., Chicago, Ill. Bearing plate for rail anchors. 1,676,888; July 10.
Chéron, Jules J., Paris, France. Fountain brush. 1,676,857; July 10.
Cheshier, Reuel C., assignor to Schlosser Brothers, Incorporated, Frankfort, Ind. Thermostatic control. 1,676,478; July 10.
Chicago Hardware Foundry Company. (See Wackerle, Lewis E., assignor.)
Chicago Trust Company, trustees. (See Kus, Thomas G., assignor.)
Childs, William L. (See Humason, G. A., and Childs.)
Chilton, Roland, Keyport, N. J., assignor, by mesne assignments, to Healey-Aeromarine Bus Company, Inc. Driving mechanism. 1,676,322; July 10.
Christenson, Harold, Savannah, Ga. Pedal-actuating device. 1,676,686; July 10.
Christensen, Niels A., Cleveland, Ohio. Brake-control valve. 1,676,980; July 10.
Christianson, Arnold and C., Hammond, Ind. Car-door structure. 1,676,426; July 10.
Christianson, Christian. (See Christianson, Arnold and C.)
Churcher, William B., assignor to The White Motor Company, Cleveland, Ohio. Automotive head lamp. 167,760; July 10.
Cincinnati Grinders Incorporated. (See Norton, Charles H., assignor.)
Cincinnati Victor Company, The. (See Ryder, Charles D., assignor.)
Clamp Nail Company. (See Jensen, Carl C., assignor.)
Clark, Emery E., Topeka, Kans. Rotary amusement device. 167,522; July 10.
Clark, George S., Huntington, W. Va. Lamp holder. 1,677,072; July 10.
Clark, John M., assignor to Universal Button Fastening and Button Company, Detroit, Mich. Germent loop. 1,676,770; July 10.
Claud-Mantle, Arthur. (See Moore, R. G., and Claud-Mantle.)
Clay, Marshall F., Canton, Ohio. Window ventilator. 1,676,251; July 10.
Claybourn, Leslie W., Milwaukee, Wis. Forming molds for printing plates. 1,676,602; July 10.
Clayton, Nephi W., Salt Lake City, Utah. Liquid-vending apparatus. 1,677,113; July 10.
Clemetson, Selmer A., and O. H. Rasmussen, Iron Mountain, Mich. Electric lamp lock. 1,676,323; July 10.
Clow, Samuel C. (See Winter, August P., assignor.)
Cohen, George, New York, N. Y. Building material. 1,677,073; July 10.
Coleman, A. B. (See Morris, Jolly L., assignor.)
Coleman, Stewart P., Cambridge, Mass., and W. S. Hughes, Goose Creek, Tex., assignors to Standard Oil Development Company. Reclaiming distillation residue. 1,676,687; July 10.
Colgan, John R., Kansas City, Mo. Lapel pin or the like; Des. 75,719; July 10.
Collins, Thomas A., et al. (See Foster, Clarence B., assignor.)
Collins, Wallace E. J. (See Wood, Sidney C., assignor.)
Columbia Steel Equipment Company. (See Bergmann, Conrad, assignor.)
Columbia Steel Equipment Company. (See Bergmann, George, assignor.)
Colwell, David M., assignor to American Vitrified Products Company, Akron, Ohio. Structural block. 1,676,385; July 10.
Combustion Equipment Company. (See Atwater, Harry A., assignor.)
Compagnie Francaise pour l'Exploitation des Procedes Thomson-Houston et al. (See Verdan, C., and Loiseau, assignors.)
Conner, William H., Berkeley, Calif. Tire-rim tool. 1,676,634; July 10.
Conrad, Ewald, Quasnitz, near Leipzig, assignor to the firm Aktien-Gesellschaft für Schmiertechnik, Leipzig, Germany. Grease cup. 1,676,523; July 10.
Conrad, George R., Watson, Mo. Aerial. 1,676,524; July 10.
Conrader, Rudolph, Erie, Pa. Pump-controlling mechanism. 1,676,818; July 10.
Constantin, Louis, Paris, assignor of one-half to Fortier-Beaulieu, Roanne, France. Connecting windmills with electric generators. 1,677,027; July 10.
Container Corporation of America. (See Walter, Harrison B., assignor.)
Conti, Emile, Alfortville, France. Shock-absorbing means for automobiles. 1,676,525; July 10.
Cook Electric Company. (See Persons, Lawrence M., assignor.)
Cook, William A., and E. P. Stroup, assignors to Marion Machine, Foundry & Supply Company, Marion, Ind. Soot blower. 1,676,479; July 10.
Cooke, James, New York, assignor of one-half to W. A. Creamer, Brooklyn, N. Y. Incandescent-lamp lock. 1,676,728; July 10.
Cooney, Thomas F., West Haven, Conn. Juice extractor; Des. 75,720; July 10.
Cooper Hewitt Electric Company. (See Buttolph, Leroy J., assignor.)
Cooper Hewitt Electric Company. (See Malley, Roy D., assignor.)
Cooper Hewitt Electric Company. (See Malley, R. D., and Winninghoff, assignors.)
Cooper Hewitt Electric Company. (See Millar, George A., assignor.)
Cooper Hewitt Electric Company. (See O'Shea, James P., assignor.)
Cooper Hewitt Electric Company. (See Walker, Warren R., assignor.)
Cooper, Leopold. (See Olson, O. E., and Cooper.)
Corcoran, Thomas J., assignor to the Thos. J. Corcoran Lamp Co., Cincinnati, Ohio. Closure fastener and glass retainer. 1,677,074; July 10.
Corcoran, Thos. J., Lamp Co., The. (See Corcoran, Thomas J., assignor.)
Corrigan, Frederick S., Toronto, Ontario, assignor, by mesne assignments to General Steel Wares Limited, Toronto, Canada. Sink drainage board. 1,676,771; July 10.
Costello, Michael, Jersey City, N. J. Compound condiment holder. 1,676,635; July 10.
Cotter, Luke. (See Murphy, D. F., and Cotter.)
Cottrell, C. B., & Sons Company. (See Barber, Howard M., assignor.)
Coughlin, James M., Wilkes-Barre, Pa. Ventilator. 1,676,324; July 10.
Cox, Joseph B., Tulare, Calif. Low-tire-pressure signal. 1,676,526; July 10.
Cox, Walter, and A. Shuman, assignors to Pennsylvania Wire Glass Company, Philadelphia, Pa. Process and apparatus for making sheet glass. 1,676,772; July 10.
Cox, Walter, and A. Shuman, assignors to Pennsylvania Wire Glass Company, Philadelphia, Pa. Making corrugated wire glass. 1,676,773; July 10.
Coxhead, Harry B., Hollis, N. Y., assignor to American Telephone and Telegraph Company. Multiple-channel radioreceiver. 1,676,252; July 10.
Coxon, John B., assignor to Kokomo Sanitary Pottery Company, Kokomo, Ind. Closet tank. Des. 75,721; July 10.
Creamer, Wilcox A. (See Cooke, James, assignor.)
Crimp, John A., Yakima, Wash. Air pump. 1,676,527; July 10.
Critchfield, Robert M., Anderson, Ind., assignor to Delco-Remy Corporation, Dayton, Ohio. Sound signal. 1,676,528; July 10.
Crocker, Bertram E., Los Angeles, Calif. Making synthetic carbonaceous coke briquettes for metallurgical uses. 1,676,729; July 10.
Crocker, Charles T., Fitchburg, Mass. Soaking machine employed in making paper. 1,676,636; July 10.
Crocker, Thomas F., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Telephone system. 1,676,480; July 10.
Cronk, Wesley M., Burlingame, assignor to Master Products Corporation, San Francisco, Calif. Brake-testing gauge. 1,676,774; July 10.
Crook, Charles M., and A. E. Long, assignors to Stromberg Electric Company, Chicago, Ill. Time-controlled mechanism. 1,676,253; July 10.
Crouse-Hinds Company. (See Bissell, Carl H., assignor.)
Crummey, John D., W. J. Austin, and F. H. Lewis, assignors to Bean Spray Pump Co., San Jose, Calif. Conveyer. 1,676,481; July 10.
Cuendet, Maurice E., Lausanne, Switzerland, assignor to Eastman Kodak Company, Rochester, N. Y. Camera shutter. 1,676,529; July 10.
Cummings, James D., assignor of one-half to C. J. Manuagh, Houston, Tex. Boom attachment for tractors. 1,676,688; July 10.
Cupples Company, Manufacturers. (See Fleischli, John A., assignor.)
Cushman, Arthur W., Winnetka, assignor to Allied Packers, Inc., Chicago, Ill. Preparing smoked joint meats. 1,676,730; July 10.
Cutler, Clarence, W., Chicago, Ill. Eyeglasses. 1,676,819; July 10.
Cutler-Hammer Mfg. Co., The. (See Evans, Clarence T., assignor.)
Czorboy, Mihaly S., et al. (See Molnar, Zoltan, assignor.)
Dahl, Berent O., Viroqua, Wis. Trap. 1,676,427; July 10.
Danielson, Ernest G., San Francisco, Calif. Variable condenser. 1,677,020; July 10.
Danley, Warren E., Highland Park, assignor to Fansteel Products Company, Inc., North Chicago, Ill. High-frequency filament-heating means. 1,677,021; July 10.
Danna, Salvatore A. (See Plowman, Arthur S., assignor.)
Dargavel James B., St. Paul, Minn. Humidifier for cigar cases. 1,676,943; July 10.

Darrow, Burgess, assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Wheel mounting. 1,676,820; July 10.
Davis, Charles E., assignor to Goodman Manufacturing Company, Chicago, Ill. Mining machine. 1,676,428; July 10.
Davis, Charles E., assignor to Goodman Manufacturing Company, Chicago, Ill. Mining machine. 1,676,429; July 10.
Davis, Ernest W., Oak Park, Ill., assignor to The Bassick Manufacturing Company, Chicago, Ill. Lubricating system. 1,676,386; July 10.
Davis, George C., assignor to G. M. Davis Regulator Company, Chicago, Ill. Gas-relief valve. 1,676,889; July 10.
Davis, G. M., Regulator Company. (See Davis, George C., assignor.)
Davis, Roy P. M. (See McClelland, William H., assignor.)
Davison, Lawrence, Edmon, assignor of one-fourth to W. Goudy and one-fourth to D. H. Slonaker, Avonmore, Pa. Guard bracket for electric wires. 1,676,944; July 10.
Dayton-Wright Company. (See Carlson, Alexander, assignor.)
Delany, Edward L., assignor to Delany Realty Corporation, Brooklyn, N. Y. Flush-valve float for flush tanks. 1,676,430; July 10.
Delany Realty Corporation. (See Delany, Edward L., assignor.)
De Lapotterie, Otto H., assignor to R. H. Smith, Kent, Ohio. Threading nut blanks. 1,676,482; July 10.
Delco-Remy Corporation. (See Critchfield, Robert M., assignor.)
Delco-Remy Corporation. (See Jones, Russell G., assignor.)
Delco-Remy Corporation. (See McConnell, Duncan A., assignor.)
Delco-Remy Corporation. (See Rippingille, Edward V., assignor.)
De Lorme, Alfred C., Newark, N. J. Battery connector. 1,676,387; July 10.
De Luxe Metal Furniture Company. (See Levene, Albert H., assignor.)
De Montmollin, Guillaume. (See Straub, F. de Montmollin, and Schmid.)
Denman, Clifford K., Los Angeles, Calif. Automobile hood illumination. 1,676,431; July 10.
De Rensis, Guglielmo, Sarzana, Italy. Apparatus for the manufacture of bottles and other glass hollow ware. 1,676,981; July 10.
Despard, Victor E., assignor to McGill Manufacturing Company, Valparaiso, Ind. Husk or socket housing. 1,676,254; July 10.
Detroit Lubricator Company. (See Blanchard, Frederick C., assignor.)
Deutschmeister, Abraham, New York, N. Y. Advertisement carrier. 1,677,022; July 10.
Deutschmeister, Herman, New York, N. Y. Combination sample and phamplet carrier. 1,677,023; July 10.
Dewar, James, Chicago, Ill. Cinder-notch stopper. 1,676,530; July 10.
Di Bona, George, and T. Jellow, Quincy, Mass. Producing designs upon stones. 1,676,637; July 10.
Dick, Hugo P., assignor to Merrimack Manufacturing Company, Lowell, Mass. Pile fabric. Des. 75,722; July 10.
Dick, William R., San Diego, Calif. Cooking and heating appliance. 1,676,603; July 10.
Dicks, George F., Homedale, Idaho. Railroad-tie spacer. 1,676,982; July 10.
Dieterich, Francis L., Newark, N. J. Packing material and gasket made therefrom. 1,676,432; July 10.
Dittlinger, Alphons, E. V., jr., and N., St. Louis, Mo. Liquid-quantity-indicating device. 1,676,255; July 10.
Dittlinger, Emil V., jr. (See Dittlinger, Alphons, E. V., jr., and N.)
Dittlinger, Nicholas. (See Dittlinger, Alphons, E. V., jr., and N.)
Dodd, Richard H., Stockton, Calif. Transfer-filer hanger. 1,676,531; July 10.
Doetsch & Bauer Company. (See Bauer, Carl, assignor.)
Doherty Research Company. (See Kitchen, John F., assignor.)
Doherty, Thomas P., Providence, R. I. Plumber's tool. 1,676,775; July 10.
Dohme, Alfred R. L., assignor to Sharp & Dohme, Inc., Baltimore, Md. Normal amylyl resorcinol. 1,677,116; July 10.
Dohme, Alfred R. L., assignor to Sharp & Dohme, Inc., Baltimore, M. Iso-butyryl resorcinol. 1,677,117; July 10.
Doll, William S., Akron, Ohio. Mandrel. 1,676,325; July 10.
Donnelly, R. D., et al. (See Peaden, William H., assignor.)
Dorsey, Leonard E., Coatesville, Pa. Radio tuning dial. 1,677,075; July 10.
Dotterweich, Andrew J., Pittsburgh, Pa. Apparatus for treating water. 1,676,532; July 10.
Dougherty, Leslie E., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Press. 1,676,821; July 10.
Dover Manufacturing Company, The. (See Johnson-Vea, Charles T., assignor.)
Drake, Clarence E. (See Kienast, S. P., and Drake.)
Drake, Otto S., Newburgh, N. Y. Speaker unit. 1,676,890; July 10.
Draper Corporation. (See Northrop, Jonas, assignor.)
Dreilick, Axel C. G., Sundsvall, Sweden. Tool for joining wooden articles. 1,676,326; July 10.
Drieghe, Maurice, Butte, Mont. Gun sight. 1,676,533; July 10.
Dual Motors Corporation. (See Streeter, Albert B., assignor.)
Dubilier Condenser Corporation. (See Nyman, Alexander, assignor.)
Dufour, Joseph, Guatemala City, Guatemala. Defibrating machine. 1,677,076; July 10.
Dunbaugh, George J., jr., assignor to Champion Manufacturing Company, Chicago, Ill. Liquid-level-indicating means. 1,676,534; July 10.
Dunkelberg, Ralph C., Fort Wayne, Ind. Apparatus for filtering and softening water. 1,676,891; July 10.
Dunn, Hugh, Falkirk, Scotland. Machine for finishing book covers by lining, lettering, or ornamenting. 1,676,892; July 10.
Du Pont, E. J., de Nemours & Company. (See Kramer, Richard L., assignor.)
Dura Company, The. (See Jackson, Shuman R., assignor.)
Duthie, William E., Indianapolis, Ind. Valve grinder. 1,676,483; July 10.
Dwyer, Robert E., Concord, N. H. Indian club. 1,676,689; July 10.
Eastham, Joseph S., assignor to Willamette Iron and Steel Works, Portland, Oreg. Load binder for lumber carriers. 1,676,638; July 10.
Eastman Kodak Company. (See Batty, Harold L., assignor.)
Eastman Kodak Company. (See Capstaff, John G., assignor.)
Eastman Kodak Company. (See Cuendet, Maurice E., assignor.)
Eastman Kodak Company. (See Frederick, Charles W., assignor.)
Eastman Kodak Company. (See Fritts, Edwin C., assignor.)
Eastman Kodak Company. (See Jones, John G., assignor.)
Eastman Kodak Company. (See Sheppard, Samuel E., assignor.)
Eastman Kodak Company. (See Wittel, Otto, assignor.)
Eaton, John, Schenectady, N. Y., assignor to General Electric Company, Brake. 1,677,024; July 10.
Edelman, Philip E, Chicago, Ill. Stabilizing means for radio receiving systems. 1,676,256; July 10.
Ehrlich, John B., Portland, Oreg. Fireplace. 1,676,484; July 10.
Eisele, Louis F., Philadelphia, Pa. Fireplace attachment. 1,676,893; July 10.
Electrad, Inc. (See Richter, Henry G., assignor.)
Elliot, William S., assignor to Pro-phy-lac-tic Brush Company, Northampton, Mass. Shifting device for positioning mechanism for brush machines. 1,676,640; July 10.
Elliot, William S., and G. E. Lindgren, assignors to Prophy-lac-tic Brush Company, Northampton, Mass. Handle-feeding mechanism for brush machines. 1,676,639; July 10.
Ellis, Carleton, Montclair, N. J. Quality of sulphur. 1,676,604; July 10.
Ellis, Laurence V., New York, N. Y. Dry-cell battery. 1,676,945; July 10.
Engel, Philip C., Minneapolis, Minn. Pie plate. Des. 75,723; July 10.
English, William E. (See Hannan, J. R., and English.)
Enterprise Tinware Company. (See Pfeffer, Morris, assignor.)
Eremeeff, Ivan I., Dayton, Ohio. Barometric device. 1,676,983; July 10.
Eschenbach, Gustavus W., Los Angeles, Calif. Interchangeable panoramic-picture blocks. 1,676,641; July 10.
Estill, Spencer C., and J. A. Todd, Fort Worth, Tex. Brick or tile veneer binder. 1,676,535; July 10.
Evans, Clarence T., assignor to The Cutler-Hammer Mfg. Co., Milwaukee, Wis. Motor starter. 1,676,388; July 10.
Evers, Arthur J., Chicago, Ill. Electrical switching mechanism. 1,676,433; July 10.
Fales, Elisha N., Dayton, Ohio, and F. W. Caldwell, Lookout Mountain, Tenn. Visualizing air-flow phenomena. 1,676,984; July 10.
Falken, August, Jamaica, N. Y. Bookmarker. 1,676,644; July 10.
Fansteel Products Company. (See Danley, Warren E., assignor.)
Faries Manufacturing Company. (See Peters, Henry M., assignor.)
Faulds, Norval M., Clearwater, Fla. Device for porch curtains. 1,676,327; July 10.
Fechheimer, Carl J., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Centrifugal pump. 1,676,946; July 10.
Feisthamel, Frederick L., et al. (See Foster, Clarence B., assignor.)
Felty, Edna F., Philadelphia, Pa. Educational chart. 1,676,328; July 10.
Ferber, Herman G., and J. A. Luyben, Fort Wayne, Ind. Vacuum cleaner. 1,676,858; July 10.

Ferkel, Karl A., Los Angeles, Calif. Temperature-indicating means. 1,676,536; July 10.
Field, Oscar S., Roselle, N. J., assignor, by mesne assignments, to Union Switch & Signal Co., Swissvale, Pa. Light socket. 1,677,114; July 10.
Finch, Paul R., assignor to A. C. White, Des Moines, Iowa. Liquid-pumping apparatus. 1,676,822; July 10.
Finucane, Daniel J., Brooklyn, N. Y. Leader-pipe strap. 1,676,485; July 10.
Firestone Tire and Rubber Company, The. (See Stevens, Horace D., assignor.)
Fisher Governor Company, The. (See Browne, Lyle W., assignor.)
Fitzgerald Manufacturing Company, The. (See Reichold, Ludwig, assignor.)
Flannery, John F., Carbondale, Pa. Vehicle headlight. 1,676,690; July 10.
Flarsheim, Edwin S. (See Liebel, J. G. H., and Flarsheim.)
Flarsheim, Edwin S., assignor of one-half to J. G. H. Liebel, Cincinnati, Ohio. Time switch. 1,677,107; July 10.
Fleischli, John A., Clayton, assignor to Cupples Company, Manufacturers, St. Louis, Mo. Method of and apparatus for making rubber tubes. 1,676,776; July 10.
Fleischmann Company, The. (See Harrison, Arthur P., assignor.)
Fleischmann Company, The. (See Kohman, H. A., Irvin, and Stateler, assignors.)
Fletcher, Harold W., Houston, Tex. Cleaning soaking drums. 1,676,389; July 10.
Fluegel, Otto L., Birmingham, Mich. Compounding ingredients of a chemical paint remover. 1,676,642; July 10.
Forbes, Thomas C., Hopkins, assignor to Waters-Genter Company, Minneapolis, Minn. Electric switch. 1,676,257; July 10.
Ford, Henry, Dearborn, Mich. Fuel-filtering screen. 1,677,118; July 10.
Fork, Charles H., Detroit, Mich., assignor of one-half to W. J. Rush, Dearborn, Mich. Making trussed structures. 1,676,258; July 10.
Forster, Arthur G., Oakland, Calif. Visor attachment for motor vehicles. 1,676,537; July 10.
Fortier-Beaulieu, Paul. (See Constantin, Louis, assignor.)
Fortune, Drury D., Cliffside, assignor of one-half to B. B. Byers, Shelby, N. C. Hose protector. 1,677,077; July 10.
Foster, Clarence B., Glendale, assignor of one-sixth to F. L. Feisthamel, one-sixth to A. J. Carr, and one-sixth to T. A. Collins, Los Angeles, Calif. Fabricated-steel tower or derrick constuction. 1,676,538; July 10.
Foster, Clarence B., Glendale, assignor of one-sixth to F. L. Feisthamel, one-sixth to A. J. Carr, and one-sixth to T. A. Collins, Los Angeles, Calif. Fabricated-steel derrick or tower construction. 1,676,539; July 10.
Frank, Pardee H., assignor to The Timken Roller Bearing Company, Canton, Ohio. Shaft bearing. 1,676,894; July 10.
Franklin Railway Supply Company. (See Roberts, Montague H., assignor.)
Franklin Railway Supply Company. (See Vincent, Harry S., assignor.)
Franklin Railway Supply Company. (See Wallis, John S., assignor.)
Frazier, Franklin M., Placerville, Colo. Knitting needle. 1,676,947; July 10.
Frech, Theodore W., Cleveland, Ohio, assignor to General Electric Company. Headlamp-adjusting chart. 1,677,028; July 10.
Frederick, Charles W., assignor to Eastman Kodak Company, Rochester, N. Y. Camera finder. 1,676,540; July 10.
Frederickson, Otto A., assignor to American Wiremold Company, Hartford, Conn. Conduit for electric conductors. 1,676,486; July 10.
Free Sewing Machine Company. (See Kelso, Ralph S., assignor.)
French Battery Company. (See Barany, Edmund R., assignor.)
Fresk, Per A., Robertsfors, Sweden. Charging cellulose digesters and the like and means therefor. 1,676,691; July 10.
Frick Company. (See Small, Norman M., assignor.)
Fried. Krupp Aktiengesellschaft. (See Bartholdy, Max, assignor.)
Fried. Krupp Aktiengesellschaft. (See von Eberhard, Otto, assignor.)
Friedman, Joseph, New York, N. Y. Hinge. 1,676,541; July 10.
Fritts, Edwin C., assignor to Eastman Kodak Company, Rochester, N. Y. Motion-picture projector. 1,676,542; July 10.
Fuller, James W. (See Kinyon, Alonzo G., assignor.)
Fuller, Truman S., N. H. Adams, and F. G. Nolte, Schenectady, N. Y., assignors to General Electric Company. Thermoelectric generator. 1,677,029; July 10.
Funk, John E., Stockton, Calif. Dredger-frame construction. 1,676,645; July 10.
Funk, John E., assignor to Funk Soil Pulverizer Company, Stockton, Calif. Supporting and inclosing structure for ground-working implements. 1,676,646; July 10.
Funk Soil Pulverizer Company. (See Funk, John E., assignor.)
Furneaux, George A., The Dalles, Oreg. Spreader for distancing spaced pipes and the like. 1,676,434; July 10.
Gams, Alphonse, and G. Widmer, assignor to the firm: Society of Chemical Industry in Basle, Basel, Switzerland. Condensation products of urea and formaldehyde and making same. 1,676,543; July 10.
Gane, George W. (See Hopkirk, J., and Gane.)
Garrett, Robert E., assignor of one-half to F. J. Schubert, Nashville, Tenn. Supporting loop for garments, etc. 1,677,078; July 10.
Gary, Lee J., assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for cracking petroleum. 1,676,895; July 10.
Gault, John S., Athol, Idaho. Snow remover. 1,676,823; July 10.
Gebrüder Hardy Maschinenfabrik und Giesserei Aktien Gesellschaft. (See Krehann, Emil, assignor.)
Gee, William J., London, England. Variable-speed gear. 1,676,859; July 10.
General Electric Company. (See Alexanderson, Ernst F. W., assignor.)
General Electric Company. (See Amsden, Ralph D., assignor.)
General Electric Company. (See Anderson, Arvid E., assignor.)
General Electric Company. (See Benford, Frank A., assignor.)
General Electric Company. (See Berry, Edward R., assignor.)
General Electric Company. (See Buckland, B. O., and Warren, assignors.)
General Electric Company. (See Cheeseman, Ralph T., assignor.)
General Electric Company. (See Eaton, John, assignor.)
General Electric Company. (See Frech, Theodore W., assignor.)
General Electric Company. (See Fuller, T. S., Adams, and Nolte, assignors.)
General Electric Company. (See Geschke, Johannes, assignor.)
General Electric Company. (See Grier, Arthur G., assignor.)
General Electric Company. (See Haughton, Frank A., assignor.)
General Electric Company. (See Hendricks, Allan B., jr., assignor.)
General Electric Company. (See Maryan, Colin C., assignor.)
General Electric Company. (See Mittag, Albert H., assignor.)
General Electric Company. (See Moore, Daniel M., assignor.)
General Electric Company. (See Pohl, Robert, assignor.)
General Electric Company. (See Summers, Ivan H., assignor.)
General Electric Company. (See Townsend, George R., assignor.)
General Electric Company. (See van der Poel, Johannes M., assignor.)
General Electric Company. (See Weaver, Arthur B., assignor.)
General Railway Signal Company. (See Lindner, John C., assignor.)
General Steel Wares Limited. (See Corrigan, Frederick S., assignor.)
Geschke, Johannes, Berlin, Germany, assignor to General Electric Company. Magnet wheel. 1,677,030; July 10.
Getchell, Charles K., Schenectady, N. Y. Truck radius bar for locomotives. 1,676,259; July 10.
Geyer, Harvey D. (See Scott, A. W., and Geyer.)
Geyer, Harvey D., assignor to The Inland Manufacturing Company, Dayton, Ohio. Horn-button mounting for steering wheels. 1,676,487; July 10.
Geyer, Harvey D., assignor to Inland Manufacturing Company, Dayton, Ohio. Steering wheel. 1,676,488; July 10.
Geyer, Harvey D., assignor to The Inland Manufacturing Company, Dayton, Ohio. Spring shackle. 1,676,489; July 10.
Geyer, Harvey D., assignor to The Inland Manufacturing Company, Dayton, Ohio. Spring shackle. 1,676,490; July 10.
Gilchrist, Dan H. (See Hill, Thomas, assignor.)
Giles, Isaac F., Yonkers, assignor to Ilelte Electric Manufacturing Corporation, Tuckahoe, N. Y. Multiple socket. 1,676,435; July 10.
Gilmont Products Corporation. (See Hopkins, Nevil M., assignor.)
Gilson, William E., St. Louis, Mo. Chimney. 1,676,544; July 10.
Gleason Works. (See Wildhaber, Ernest, assignor.)
Glidden, Alfred A., Watertown, and F. R. McKenzie, Brighton, assignors to Hood Rubber Company, Watertown, Mass. Lining for rubber boots and method of manufacturing. 1,676,329; July 10.
Glidden, Harvey L., Needham Heights, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Cutting machine. 1,676,260; July 10.

Glines, Frederick S., Lynn, assignor to Peerless Machinery Company, Boston, Mass. Device for setting invisible eyelets. 1,676,647; July 10.
Goldsborough, Paul, assignor of one-fourth to A. P. Upton, Minneapolis, Minn. Combined radio and phonographic recording and reproducing system. 1,676,491; July 10.
Goodman Manufacturing Company. (See Davis, Charles E., assignor.)
Goodrich, Chauncey M., Windsor, Ontario, Canada. Beam or pole structure. 1,676,824; July 10.
Goodwin, George L., Chicago, Ill., assignor to The International Committee of Young Men's Christian Associations, New York, N. Y. Card rack. 1,676,492; July 10.
Goodyear Tire & Rubber Company, The. (See Burdette, Richard S., assignor.)
Goodyear Tire & Rubber Company, The. (See Darrow, Burgess, assignor.)
Goodyear Tire & Rubber Company, The. (See Dougherty, Leslie E., assignor.)
Goodyear Tire & Rubber Company, he. (See Haase, Jörgen L., assignor.)
Goodyear Tire & Rubber Company, The. (See Hunter, John R., assignor.)
Goodyear Tire & Rubber Company, The. (See O'Brien, William G., assignor.)
Goodyear Tire & Rubber Company, The. (See Sebrell, Lorin B., assignor.)
Goodyear Tire & Rubber Company, The. (See Shively, Jess A., assignor.)
Goodyear Tire & Rubber Company, The. (See Shoaff, Paul S., assignor.)
Goodyear Tire & Rubber Company, The. (See Teisher, Austin A., assignor.)
Goodyear-Zeppelin Corporation. (See Liebert, H. R., and Schoettel, assignors.)
Gordon, George D. (See Gordon, Harry E. and G. D.)
Gordon, Harry E. and G. D., Rochester, N. Y. Electric signal for automobiles. 1,676,948; July 10.
Gordon, Isaac. (See Smith, James E., assignor.)
Goudy, William, et al. (See Davison, Lawrence, assignor.)
Gould & Eberhardt. (See Zimmermann, William F., assignor.)
Gould, Roy F., Chicago, Ill., assignor to Reserve Holding Company, Kansas City, Mo. Zone-metering telephone system. 1,677,079; July 10.
Graaff, Clemens. (See Brase, Wilhelm, assignor.)
Grader, Russell, Manufacturing Company. (See Gustafson, Carl A., assignor.)
Graff-Baker, William S., Ealing, London, England, assignor to The National Pneumatic Company, New York, N. Y. Swinging door. 1,676,375; July 10.
Graham, B. R., et al. (See Peaden, William H., assignor.)
Grand Rapids Store Equipment Corporation. (See Woltz, Albert M., assignor.)
Grant, Clinton B. (See Turner, Erven R., assignor.)
Grass, Otto R., assignor to The Oro-Tone Company, Chicago, Ill. Sound-conveying apparatus. 1,676,493; July 10.
Grassey, Henry, Glen Rock, N. J. Jigger. 1,676,261; July 10.
Grasselli Chemical Company, The. (See Howard, Henry, assignor.)
Grasselli Dyestuff Corporation. (See Herz, R., Schulte, and Zerweck, assignors.)
Grasselli Dyestuff Corporation. (See Kaltwasser, O., Oehrn, and Kirchhoff, assignors.)
Grasselli Dyestuff Corporation. (See Krecke, Friedrich, assignor.)
Grasselli Dyestuff Corporation. (See Neelmeier, Wilhelm, assignor.)
Gray, Leonard G., Decatur, Ill. Dispensing cabinet for bottled beverages. Des. 75,724; July 10.
Great Northern Paper Company. (See Weldon, Roy V., assignor.)
Grebecz, Mihaly, et al. (See Molnar, Zontan, assignor.)
Green, Cordelia A., administratrix. (See Green, Edwin L.)
Green, Edwin L., Cross Plains, Tex.; C. A. Green, administratrix. Turning guide for fishing tools. 1,676,860; July 10.
Grier, Arthur G., Peterboro, Canada, assignor to General Electric Company. Compensated meter. 1,677,025; July 10.
Groenenstein, Philip J., Cleveland, Ohio. Glass shield. 1,676,896; July 10.
Grolan Manufacturing Company, The. (See Hill, Reuben, assignor.)
Gross, Reinhold, Hohenneuendorf, near Berlin, assignor to Siemens & Halske Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Induction furnace. 1,676,545; July 10.
Grover, Albert D., Long Island City, N. Y. Extension tailpieces. 1,676,546; July 10.
Gruendler, Gustav J., Clayton, Mo. Refrigerant container. 1,676,404; July 10.
Guibrand, Carl G., Los Angeles, Calif. Rail-holding tie. 1,676,547; July 10.
Gunderman, Lester S., Pittsburgh, Pa. Safety device for clothes wringer. Re17,080; July 10.
Gustafson, Carl A., assignor to Russell Grader Manufacturing Company, Minneapolis, Minn. Road-finishing machine. 1,676,548; July 10.
Gwyer, Alfred G. C., and H. W. L. Phillips, assignors to The British Aluminum Company, Limited, London, England. Alloy. 1,676,856; July 10.
Haase, Jorgen L., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Washing machine. 1,676,825; July 10.
Hadaway, John B., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Heel. 1,676,262; July 10.
Halferty, Jess E., Manhattan, Kans. Striker plate for locks. 1,676,390; July 10.
Hall Airways Corporation. (See Hall, Charles S., assignor.)
Hall, Charles S., Los Angeles, Calif., assignor to Hall Airways Corporation, Dover, Del. Aircraft. 1,676,549; July 10, 1928.
Hall, George R., Waterville, Kans. Awning. 1,677,080; July 10.
Hallett, George E. A. (See Angle, G. D., and Hallett.)
Halvorsen, Severin, Chicago, Ill., assignor to The Newspaper Stuffing Machine Company, Seattle, Wash. Pneumatic feed mechanism. 1,676,897; July 10.
Hamlin, Frank B., Evanston, Ill. Front-wheel drive for motor vehicles. 1,676,436; July 10.
Hammond Bolt & Nut Company. (See Lowery, William, assignor.)
Hammond, John H., jr., Gloucester, Mass. System for transmitting energy. 1,677,121; July 10.
Hammond, William M., Des Moines, Iowa. Identifying individuals. 1,676,495; July 10.
Hansmann, Anton, Vienna, Austria. Water-closet system. 1,676,550; July 10.
Handlan, Alexander H., St. Louis, Mo. Lantern. 1,676,861; July 10.
Hannan, John R., Shortlands, England, and W. E. English, Bishopston, South Wales. Superheater and boiler combination. 1,677,081; July 10.
Hansen, Fred E., Lakewood, assignor to The Hansen Manufacturing Company, Cleveland, Ohio. Inflating valve. 1,676,777; July 10.
Hansen Manufacturing Company, The. (See Hansen, Fred E., assignor.)
Hanson, Bengt M. W., deceased, Hartford, Conn.; E. A. Hanson and C. E. Whitney, executors. Grinding machine. 1,676,643; July 10.
Hanson, Einar A., et al., executors. (See Hanson, Bengt M. W.)
Hanson, Swan. (See Olson, Anders, assignor.)
Hardiman, James S., assignor to Anchor Cap and Closure Corporation, Long Island City, N. Y. Uncapping tool. 1,676,648; July 10.
Hardiman, Peck & Co. (See Bukow, Reinhold, assignor.)
Hardtke, Edward J., assignor to Seaman Body Corporation, Milwaukee, Wis. Door. 1,676,496; July 10.
Hardwick & Magee Company. (See Williams, Noble W., assignor.)
Harness, William E., Bloomington, Ill. Golf club. 1,677,099; July 10.
Harper, Philip S., Chicago, Ill. Gas-range bunrer. 1,676,898; July 10.
Harrison, Arthur P., Yonkers, assignor to The Fleischmann Company, New York, N. Y. Manufacture of yeast. 1,676,437; July 10.
Harrison, James, Brooklyn, N. Y. Denominating machine. 1,676,731; July 10.
Harrison, Nellie, executrix. (See Harrison, William H.)
Harrison Radiator Corporation. (See Muir, Wellington W., assignor.)
Harrison, William H., deceased, Philadelphia, Pa.; N. Harrison, executrix. Shuttle. 1,676,438; July 10.
Hart, Carl D., La Grange, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Feeding mechanism. 1,676,605; July 10.
Haseltine, Stacy B., assignor to W. H. Miner, Inc., Chicago, Ill. Friction shock-absorbing mechanism. 1,676,613; July 10.
Haughton, Frank A., Schenectady, N. Y., assignor to General Electric Company. Automatic arc-welding machine. 1,676,985; July 10.
Hauser, Emil, New York, N. Y. Umbrella stand. Des. 75,725; July 10.
Häussler, Alfred, assignor to C. H. Boehringer Sohn, Chemische Fabrik, Niederingelheim-on-the-Rhine, Germany. Production of quinoline-4-carboxylic acids. 1,676,862; July 10.
Hawkins, Percy O., Hammond, Ind. Automobile frame straightener. 1,676,263; July 10.
Hawley, Charles G., assignor to Locomotive Firebox Company, Chicago, Ill. Locomotive fire box. 1,676,732; July 10.
Hawley, Charles G., assignor to Locomotive Firebox Company, Chicago, Ill. Machine for forming, bending, folding, and shaping heavy metal sheets. 1,676,733; July 10.
Heaton, Nathan C., Westmont, assignor to Montgomery Ward & Company, Chicago, Ill. Feed mechanism for stencil-cutting machines. 1,676,551; July 10.
Healey-Aeromarine Bus Company. (See Chilton, Roland, assignor.)
Heckman, Edward L., Notre Dame, Ind. Steering wheel. 1,677,082; July 10.

Heft, Hattie L., M. B. Van Arsdale, and D. E. Shank, New York, N. Y., assignors to Teachers College. Edible product and producing same. 1,676,899; July 10.

Heising, Raymond A., Millburn, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Frequency-grouping arrangement for communication systems. 1,676,614; July 10.

Heminger, Joel R., Akron, Ohio. Water wings. 1,677,083; July 10.

Henderson, Hiram L., Syracuse, N. Y. Apparatus for drying lumber. 1,676,552; July 10.

Hendricks, Allan B., jr., Pittsfield, Mass., assignor to General Electric Company. Transformer. 1,677,084; July 10.

Hering, Paul C., Lawrence, Mass. Stop motion for looms. 1,677,085; July 10.

Herr, Shirl, Crawfordville, Ind. Device for underground prospecting. 1,676,779; July 10.

Herz, Richard, F. Schulte, Frankfort-on-the-Main, and W. Zerweck, Fechenheim, near Frankfort-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Converting cyannaphthalene-sulphonic acids. 1,676,692; July 10.

Herz, Richard, F. Schulte, Frankfort-on-the-Main, and W. Zerweck, Fechenheim near Frankfort-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Converting cyannaphthalene sulphonic acids. 1,677,086; July 10.

Hess, William J., Fort Wayne, Ind., assignor to Van Arnam Manufacturing Company. Hinge for water-closet seats and covers. 1,676,900; July 10.

Hewitt, Edward R., Midvale, N. J. Screen for picture projection. 1,676,553; July 10.

Hexter, Julian S., Chicago, Ill., assignor to Underwood Elliott Fisher Company, New York, N. Y. Accounting-machine demonstration chart. 1,677,087; July 10.

Heyman, Joseph J., assignor to Milano Furniture Company, Chicago, Ill. Table or similar article. Des. 75,726; July 10.

Heyman, Joseph J., assignore to Milano Furniture Company, Chicago, Ill. Table or similar article. Des. 75,727; July 10.

Heyman, Joseph J., assignor to Milano Furniture Company, Chicago, Ill. Table or similar article. Des. 75,728; July 10.

Higgins, John J., East Orange, N. J., assignor to Westinghouse Lamp Company. Soldering leading-in wires to lamp bases. 1,676,949; July 10.

Hilford, Glen G., Tulsa, Okla. Funnel. 1,676,986; July 10.

Hill, Guy. (See Mauborgne, J. O., and Hill.)

Hill, Myron F., New York, N. Y. Internal-combustion engine. 1,676,264; July 10.

Hill, Reuben, West Hartford, Conn., assignor to The Grolan Manufacturing Company, Dayton, Ohio. Valve. 1,676,330; July 10.

Hill, Thomas, assignor to D. H. Gilchrist, Detroit, Mich. Mop. 1,676,497; July 10.

Hinds, Sherwood, Galesburg, Mich. Vending-machine casing. Des. 75,729; July 10.

Hinrichs, John A., Paterson, N. J. Picker stick. 1,677,088; July 10.

Hochstein, Ludwig, Wandsbek, Germany, assignor to E. T. Brown, Thomaston, Me. Heat-resistant borosilicate glass. 1,676,331; July 10.

Hoe, R., & Co. (See Beveridge, Ernest G., assignor.)

Hoffman, Edward, St. Louis, Mo. Rubber heel. 1,676,332; July 10.

Holland, Thomas A., et al. (See Starkweather, George E., assignor.)

Holman, Arthur T. (See Holman, John L. and A. T.)

Holman Brothers Limited. (See Holman, John L. and A. T., assignors.)

Holman, John L. and A. T., assignors to Holman Brothers Limited, Camborne, England. Valve mechanism for fluid-operated rock drills. 1,676,950; July 10.

Holmes, Franklin T., Springfield, assignor to Tryco Products, Inc., Westfield, Mass. Temperature-controlled relief valve. 1,676,650; July 10.

Holt, Geoffrey, Los Angeles, Calif. Table. Des. 75,730; July 10.

Holt, Geoffrey, Los Angeles, Calif. Buffet. Des. 75,731; July 10.

Homrighous, John H., Oak Park, assignor, by mesne assignments to Automatic Electric Inc., Chicago, Ill. Impulse-transmitting device. 1,677,091; July 10.

Hood Rubber Company. (See Gilliden, A. A., and McKenzie, assignors.)

Hoopman, Aldus A., Seattle, Wash. Topical medicine. 1,676,554; July 10.

Hopewell, Samuel H., Ensley, Ala. Goggles. 1,677,089; July 10.

Hopkins, Nevil M., New York, N. Y., assignor, by mesne assignments, to Gilmont Products Corporation. Apparatus and method for filling collapsible tubes. 1,676,734; July 10.

Hopkirk, Joseph, Cambridge, and G. W. Gane, Normanby, New Zealand. Milking-machine releaser. 1,676,693; July 10.

Horne, James, Birmingham, Ala. Apparatus for cleaning slag pockets. 1,676,555; July 10.

Hotchkiss, Clifford. (See Phelan, L. A. M., and Hotchkiss.)

Howard, Frank A., Elizabeth, N. J., assignor to Standard Oil Development Company. Pyrogensis of petroleum products. 1,676,694; July 10.

Howard, Frank A., Elizabeth, N. J., assignor to Standard Oil Development Company. Treating oils. 1,676,826; July 10.

Howard, Frank A., Elizabeth, and T. R. Parker, Jersey City, N. J., assignors to Standard Development Company. Method of and apparatus for preventing knocking in internal-combustion engines. 1,676,827; July 10.

Howard, Frank A., Elizabeth, N. J., and T. R. Parker, New York, N. Y., assignors to Standard Development Company. Method of and apparatus for preventing knocking in internal-combustion engines. 1,676,828; July 10.

Howard, Henry, assignor to The Grasselli Chemical Company, Cleveland, Ohio. Preparation of sodium phosphate. 1,676,556; July 10.

Hoyt, Jennie K., et al. (See Au, Carl H., assignor.)

Hubbell, Harvey, Incorporated. (See Hubbell, Harvey, jr., assignor.)

Hubbell, Harvey, jr., assignor to Harvey Hubbell, Incorporated, Bridgeport, Conn. Battery switch. 1,676,608; July 10.

Hueller, Walter, West New York, N. J. Image reflector for vehicles. 1,676,901; July 10.

Huettig, Arno R., Stratford, Conn., assignor to American Meter Company, Incorporated, New York, N. Y. Gas meter. 1,676,651; July 10.

Hughes, Wayne S. (See Coleman, S. P., and Hughes.)

Hull, Lewis M., Boonton, N. J., assignor to Radio Frequency Laboratories, Incorporated, Boston, Mass. Vacuum-tube circuits. 1,677,090; July 10.

Humason, Granville A., and W. L. Childs; said Childs assignor to Reed Roller Bit Company, Houston, and said Humason assignor to J. A. Logan, Harris County, Tex. Pump. 1,676,391; July 10.

Hummel & Downing Co. (See Ratcliff, Arthur, assignor.)

Hunneman, Roger D., Chicago, Ill., assignor to Standard Oil Company, Whiting, Ind. Distilling hydrocarbon oils. 1,676,609; July 10.

Hunneman, Roger D., Chicago, Ill., assignor to Standard Oil Company, Whiting, Ind. Continuous distillation of hydrocarbon oils. 1,667,611; July 10.

Hunt, Henry E., Toronto, Ontario, Canada. Baler. 1,676,951; July 10.

Hunter, John R., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Tapered plug for circular mandrels. 1,676,829; July 10.

Huntley, Burton L., assignor, by mesne assignments, to Speedpak Dispenser Corporation, Minneapolis, Minn. Ice-cream-carton filler. 1,676,952; July 10.

Huseby, Edmond A., Chicago, Ill. Control-carrying slide for self-playing musical instruments. 1,676,780; July 10.

Huseby, Edmond A., Chicago, Ill. Tracker-tube support for player piano. 1,676,781; July 10.

Ide, Harry H., La Grange, assignor to Kellogg Switch Board and Supply Company, Chicago, Ill. Calling device. 1,676,392; July 10.

Ile, William, Little Falls, N. J., assignor to Ilelte Electric Manufacturing Corporation, Tuckahoe, N. Y. Three-way electric plug. 1,676,439; July 10.

Ilelte Electric Manufacturing Corporation. (See Giles, Isaac F., assignor.)

Ilelte Electric Manufacturing Corporation. (See Ile, William, assignor.)

Inland Manufacturing Company, The. (See Geyer, Harvey D., assignor.)

Inland Manufacturing Company, The. (See Scott, A. W., and Geyer, assignors.)

International Combustion Engineering Corporation. (See Wood, Wilfred R., assignor.)

International Committee of Young Men's Christian Associations. (See Goodwin, George L., assignor.)

International Silver Company. (See Kintz, Alfred G., assignor.)

International Spotlight Corporation. (See Sklarek, Clifford, assignor.)

Irvin, Roy. (See Kohman, H. A., Irvin, and Stateler.)

Jack, George B., jr. (See Seidell, L., and Jack.)

Jackson, Benjamin B., Delphi, assignor, by mesne assignments, to The Marvel Company, Hammond, Ind. Brush mounting for suction cleaners. 1,676,782; July 10.

Jackson, Mary G., New Haven, Conn. Tracing table. 1,676,440; July 10.

Jackson, Shuman R., Syracuse, N. Y., assignor to The Dura Company, Toledo, Ohio. Mechanical movement. 1,676,441; July 10.

Jacobs, Anton. (See Wollensak, A. C., Jacobs, and Baldus.)

James, Cleveland A. (See Miller, E. A., and James.)

Jamison, George W. (See Smith, L. B., and Jamison.)

Jaton Manufacturing Corporation. (See Seidell, L., and Jack, assignors.)

Jellow, Timothy. (See Di Bona, G., and Jellow.)

Jensen, Andrew M., Stockton, Calif. Brush construction. 1,676,557; July 10.

Jensen, Carl C., assignor to Clamp Nail Company, Chicago, Ill. Clamp nail. 1,677,092; July 10.

Jensen, James A., assignor to Quaker City Iron Works, Philadelphia, Pa. Metallic container. 1,677,100; July 10.

Johnson, Alfred E., Denver, Colo. Hoist controller. 1,677,108; July 10.

Johnson, Josiah F., Swarthmore, Pa., assignor to Westinghouse Electric and Manufacturing Company. Equalizing means for multiple-collar bearings. 1,677,093; July 10.

Johnson, Norman E., Chicago, Ill., assignor to Spencer Thermostat Company, Cambridge, Mass. Toy and advertising novelty. 1,677,122; July 10.

Johnson-Vea, Charles T., assignor to The Dover Manufacturing Company, Dover, Ohio. Electric smoothing iron. Des. 75,732; July 10.

Jones, Hugh J., Denver, assignor of one-half to The Western Battery & Supply Company, Denver, Colo., and 10 per cent to G. A. Bible, Rawlings, Wyo., and P. M. Bible, Denver, Colo. Transmission means. 1,677,094; July 10.

Jones, John G., assignor to Eastman Kodak Company, Rochester, N. Y. Film-winding machine. 1,676,558; July 10.

Jones, Joshua J., Schenectady, N. Y. Locomotive valve gear. 1,676,265; July 10.

Jones, Lee B., and E. H. Werzner, assignors to Sunbeam Electric Manufacturing Company, Evansville, Ind. Governor. 1,676,902; July 10.

Jones, Lee B., and E. H. Werzner, assignors to Sunbeam Electric Manufacturing Company, Evansville, Ind. Valve. 1,676,903; July 10.

Jones, Mortimer, Fort Worth, Tex. Gas burner. 1,676,953; July 10.

Jones, Percival W., Warwick, assignor to Rosenheim Co., Inc., Providence, R. I. Bracelet clasp. 1,676,695; July 10.

Jones, Russell G., New York, N. Y., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Manufacture of commutators. 1,676,442; July 10.

Jordan, Charles J., assignor of one-fourth to R. G. Schaub, Woodbury, N. J. Method and apparatus for manufacturing fire-polished sheet glass. 1,677,095; July 10.

Kaffer, Joan W. J., Meester-Cornelis, Java, Dutch East Indies. Electrical heating and cooking apparatus. 1,677,032; July 10.

Kaltwasser, Oskar, Berlin, H. Oehrn, Charlottenburg, and H. Kirchhoff, Berlin-Lichterfelde, Germany, assignors, by mesne assignments, to Grasselli Dyestuff Corporation, New York, N. Y. Ortho-hydroxyazo dye. 1,676,697; July 10.

Kanawyer, Osceola and H. Keener, Huntington Beach, Calif. Clothesline pole and reel. 1,676,696; July 10.

Kanneman, George E., Woodbury, N. Y. Flagpole holder for golf courses. 1,676,954; July 10.

Kaspe, Joseph, Charbin, Russia. Safety device for elevators and the like. 1,676,443; July 10.

Kassner, Ernst, New York, N. Y. Duplex adding machine and cash register. 1,676,559; July 10.

Kassner, Ernst, Berlin, Germany. Transfer mechanism for duplex adding machines, cash registers, etc. 1,676,560; July 10.

Kattwinkel, Hans, Coswig, Germany. Resilient intermediate member for jointed couplings and the like. 1,676,333; July 10.

Kearney, James B., Kansas City, Mo. Pole butt. 1,676,266; July 10.

Keener, Howard. (See Kanawyer, O., and Keener.)

Keller, Charles L., Glendale, assignor to The Richardson Company, Lockland, Ohio. Apparatus and process for cleaning paper stock. 1,676,652; July 10.

Kellogg Switch Board and Supply Company. (See Ide, Harry H., assignor.)

Kelly, John A., Brooklyn, N. Y. Heel-attaching mechanism. 1,676,904; July 10.

Kelly, Peirce C., Philadelphia, Pa., and H. A. Landis, Haddon Heights, N. J., assignors to American Engineering Company, Philadelphia, Pa. Ferry bridge. 1,676,993; July 10.

Kelso, Ralph S., assignor to Free Sewing Machine Company, Rockford, Ill. Chain construction. 1,676,863; July 10.

Kemp, William E., New York, N. Y. Intake manifold for internal-combustion engines. 1,676,955; July 10.

Kempf, Hubert, Barmen, Germany, assignor, by mesne assignments, to American Bemberg Corporation. Spinning apparatus. 1,676,334; July 10.

Keyes, Donald B., New York, N. Y., assignor to U. S. Industrial Alcohol Co. Obtaining absolute alcohol. 1,676,735; July 10.

Kienast, Selden P., Battle Creek, and C. E. Drake, Parma, Mich. Windshield wiper. 1,676,561; July 10.

King, Francis M., sr., Philadelphia, Pa. Combined dishwasher and soap holder. 1,676,905; July 10.

King, Robert W., Toronto, Ontario, Canada. Rotary pump. 1,676,783; July 10.

Kintz, Alfred G., Wallingford, Conn., assignor to International Silver Company, Meriden, Conn. Dish or similar article. Des. 75,733; July 10.

Kintz, Alfred G., Wallingford, Conn., assignor to International Silver Company, Meriden, Conn. Dish or similar article. Des. 75,734; July 10.

Kintz, Alfred G., Wallingford, Conn., assignor to International Silver Company, Meriden, Conn. Dish or similar article. Des. 75,735; July 10.

Kinyon, Alonzo G., Allentown, assignor, by mesne assignments, to J. W. Fuller, Catasauqua, Pa. Apparatus for conveying pulverized material. 1,677,119; July 10.

Kirchhoff, Ernest, Great Kills, N. Y., assignor to Rousmaniere, Williams & Co., Boston, Mass. Textile fabric. Des. 75,736; July 10.

Kirchhoff, Hermann. (See Kaltwasser, O., Oehrn, and Kirchhoff.)

Kisecker, Charles N., Dayton, Ohio. Headlight. 1,676,393; July 10.

Kitchen, John F., Erie, Pa., assignor by mesne assignments to Doherty Research Company, New York, N. Y. Demand limiting and volumetric meter. 1,676,444; July 10.

Klein, Mathias, & Sons. (See Rueckert, Curtis, assignor.)

Knecht, Oskar, and Hans Brütsch, assignors to Society "Chemical Works formerly Sandoz" Basel, Switzerland. Manufacture of trisazole coloring matters. 1,676,562; July 10.

Knight, James M., San Antonio, Tex. Door fastener. 1,676,335; July 10.

Knoll, William J., assignor to H. B. Rouse & Company, Chicago, Ill. Beveling machine. 1,676,336; July 10.

Knudson, Joachim R. M. (See Yeager, Fay A., assignor.)

Koch, William C., St. Paul, Minn. Display case for brick. 1,676,445; July 10.

Koehring Company. (See Russell, Leslie A., assignor.)

Kohman, Henry A., R. Irvin, and E. S. Stateler, Pittsburgh, Pa., assignor, by mesne assignments, to Fleischmann Company, New York, N. Y. Production of enzymes for use in the manufacture of bread. 1,676,446; July 10.

Kohn, Koby, New York, N. Y. Toy torpedo. 1,677,034; July 10.

Kohn, Koby, New York, N. Y. Toy torpedo. 1,677,035; July 10.

Kokomo Sanitary Pottery Company. (See Coxon, John B., assignor.)

Kondolf, Mathias R., Cynwyd, assignor to Boxboard Products Company, Philadelphia, Pa. Tool for manipulating fasteners for container closures. 1,676,907; July 10.

Konkus, Johan, Fords, N. J. Permutation double lock. 1,676,394; July 10.

Konoff, Alexander, Brooklyn, N. Y., assignor to Voices Incorporated, Wilmington, Del. Sounding device for dools and other toys. 1,676,906; July 10.

Körner, Bruno H., assignor of one-half to E. Pietzsch, Dohna, near Pirna, Germany. Apparatus for stopping leaks especially in the bottom and side walls of ships' hulls. 1,676,395; July 10.

Korper, Isaac, New York, N. Y. Adjustable shoulder-strap stay. 1,677,109; July 10.

Kramer, Richard L., assignor to E. I. du Pont de Nemours & Company, Wilmington, Del. Cellulose-ester composition. 1,676,612; July 10.

Kranz, Clara, Chicago, Ill. Separable fastener. 1,676,396; July 10.

Kratochwill, Rudolph A., Greeneville, Tenn. Combination cigarette and match box. 1,677,036; July 10.

Krause, Hermann, Menomonee Falls, Wis. Line-shaft bearing. 1,676,784; July 10.

Krecke, Friedrich, Offenbach, near Frankfort-on-the-Main, Germany, assignor to Grasselli Dyestuff Corporation, New York, N. Y. 2-hydroxynaphthalene-3-monosulpho-6-carboxylic acid and making it. 1,676,698; July 10.

Krehann, Emil, assignor of one-half to the firm Gebrüder Hardy Maschinenfabrik und Giesserei Atkien Gesellschaft, Vienna, Austria. Air-pressure brake. 1,677,033; July 10.

Krum, Charles L. and H. L., Chicago, Ill., assignors to Morkrum-Kleinschmidt Corporation, Chicago, Ill. Electric selecting apparatus. 1,676,447; July 10.

Krum, Charles L and H. L., assignors to Morkrum-Kleinschmidt Corporation, Chicago, Ill. Selecting apparatus for electric telegraphs. 1,676,448; July 10.

Krum, Howard L. (See Krum, Charles L. and H. L.)

Kruse, Frederich E., Binghamton, N. Y. Carnation plant holder. 1,676,337; July 10.

Kuehn, Louis, assignor to Milwaukee Corrugating Company, Milwaukee, Wis. Sheet-metal roofing. 1,677,031; July 10.

Künzel, Kurt, Uhsmannsdorf, Germany. Making glass in a shaft furnace. 1,676,267; July 10.

Kus, Thomas G., assignor, by mesne assignments, to Chicago Trust Company, trustee, Chicago, Ill. Coke oven. 1,676,736; July 10.

L. T. N. Manufacturing & Development System, The. (See La Plant, Simeon H., assignor.)

Lacoss, Edward W., Florence, Kans. Paring knife. 1,676,699; July 10.

Ladwig, Amos F., Waterloo, Iowa. Combination hanger. 1,676,737; July 10.

Lamplough, Leslie F., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Feeding mechanism. 1,676,607; July 10.

Lamond, Robert C., assignor to American Engineering Company, Philadelphia, Pa. Control mechanism. 1,676,994; July 10.

Lancaster Asphalt, Inc. (See Robinson, Thomas, assignor.)

Landis, Herbert A. (See Kelly, P. C., and Landis.)

Lanz, Josef, Mendrisio, Switzerland. Double-sided cuff for men's shirts, blouses, and the like. 1,676,397; July 10.

La Plant, Simeon H., Salida, assignor to The L. T. N. Manufacturing & Development System, Platteville, Colo. Carburetion system for internal-combustion engines. 1,676,563; July 10.

Larsen, Louis H., Englewood, N. J. Raking attachment. 1,676,830; July 10.

Lauber, William, Meadowbrook, Pa. Stocking. Des. 75,737; July 10.

Laurence, Daniel, trustee. (See Sperti, G., Norris, Withrow, and Schneider, assignors.)

Laurie, Alexander, Chicago, Ill., assignor to H. F. Lessmann, Des Moines, Iowa. Scoop attachment for traction engines. Re17,025; July 10.

Lausen, Christian A., Fort Worth, Tex. Gas burner. 1,676,564; July 10.

La Valleé, Oliver, and O. Lemelin, New Britain, Conn. Overflow alarm. 1,676,565; July 10.

Lawrence, Harry W., Denver, Colo. Sub or removable building front. 1,676,498; July 10.

Leaver, James M., jr. (See Leaver, James M. and J. M., jr.)

Leaver, James M., jr., Oakland, Calif. Rotary binding machine. 1,676,956; July 10.

Leaver, James M. and J. M., jr., Oakland, Calif. Method and apparatus for unstacking lumber. 1,676,957; July 10.

Lederer, Frederick J., Buffalo, N. Y. Hoisting machine. 1,676,449; July 10.

Lees-Brander Company, The. (See Schurr, Charles H., assignor.)

Lehon Company, The. (See McDavitt, Charles J., assignor.)

Lemelin, Odilon. (See La Valleé, O., and Lemelin.)

L'Enfant, Charles, New York, N. Y. Assembling device for card cases. 1,676,338; July 10.

Lengemann, Paul, Bremen, Germany. Foot-arch support. 1,676,398; July 10.

Le Noue, Cyril W., Los Angeles, Calif. Lock. 1,676,450; July 10.

Lesourd, Georges. (See Alkan, R., and Lesourd.)

Lessmann, Herbert F. (See Laurie, Alexander, assignor.)

Lester, Leonard B. (See Lotterman, W., Lester, and Odton.)

Levene, Albert H., Newark, N. J., assignor to De Luxe Metal Furniture Company. Construction in bins. 1,676,908; July 10.

Levene, Albert H., Newark, N. J., assignor to De Luxe Metal Furniture Company. Shelving. 1,676,909; July 10.

Levene, Albert H., Newark, N. J., assignor to De Luxe Metal Furniture Company. Movable shelf divider. 1,676,910; July 10.

Leventis, Constantine, Phoenix, Ariz. Serum and producing the same. 1,676,995; July 10.

Leventis, Constantine, Phoenix, Ariz. Gland serum. 1,676,996; July 10.

Leventis, Constantine, Phoenix, Ariz. Antituberculer serum and producing the same. 1,676,997; July 10.

Levey, Thomas J., Baltimore, Md. 1,676,339; July 10.

Levy, Leonard A., Cricklewood, England. Nozzle for the production of artificial filaments. 1,676,831; July 10.

Leweke, Eva, administratrix. (See Leweke, Fred F.)

Leweke, Fred F., deceased, Rocky Ford, Colo.; E. Leweke, administratrix. Fruit-grading machine. 1,676,037; July 10.

Lewis, Claude A., Houston, Tex., assignor to American Window Company. Window. 1,676,399; July 10.

Lewis, Claude A., assignor to American Window Company, Houston, Tex. Mounting for window sash. 1,676,400; July 10.

Lewis, Frank, H. (See Crummey, J. D., Austin, and Lewis.)

Lewis, James O., Tulsa, Okla. Method of and apparatus for grouting the walls of an oil well. 1,676,785; July 10.

Lewis, Warren K., Newton, Mass., assignor to Standard Oil Development Company. Dehydrating alcohol and the like. 1,676,700; July 10.

Lickhard, Karl, New York, N. Y. Soup bowl. Des. 75,738; July 10.

Liebeck, Harry, Swarthmore, Pa., assignor to Scott Paper Company. Paper-stock refining. 1676,653; July 10.

Liebel, John G. H. (See Flarsheim, Edwin S., assignor.)

Liebel, John G. H., and E. S. Flarsheim, Cincinnati, Ohio. Time switch. 1,677,106; July 10.

Liebert, Gustav, assignor to Süddeutschen Telephon-Apparate-Kabel- u. Drahtwerke Aktien Gesellschaft, Nuremberg, Germany. Manufacturing electron-emitting cathodes. 1,676,701; July 10.

Liebert, Herman R., and E. Schottel, assignors to Goodyear-Zeppelin Corporation, Akron, Ohio. Gas cell for rigid airships. 1,676,832; July 10.

Lilge, Friedrich, Oberhausen, Germany. Packing or filling body. 1,676,451; July 10.

Lindbladh Corporation, The. (See Lindbladh, Harmon E., assignor.)

Lindbladh, Harmon E., Brookline, Mass., assignor to The Lindbladh Corporation. Apparatus for controlling sheets. 1,676,654; July 10.

Lindgren, Gottfrid E. (See Elliot, W. S., and Lindgren.)

Lindner, John C., Rochester, assignor to General Railway Signal Company, Gates, N. Y. Relay. 1,676,340;

Line, John M., Springfield, Mo. Portable bed for automobiles of the sedan type. 1,676,987; July 10.

Lipscomb, Gaston J., Montclair, N. J. Pressure and vacuum filter. 1,676,268; July 10.

Lissauer, Adolph W., assignor to Louisville Drying Machinery Co., Inc., Louisville, Ky. Drier control. 1,676,786; July 10.

Lissauer, Adolph W., assignor to Louisville Drying Machinery Co., Inc., Louisville, Ky. Heat exchanger. 1,676,787; July 10.

Little, Edwin O., Aledo, Ill. Casing for advertising device. Des. 75,739; July 10.

Locomotive Firebox Company. (See Hawley, Charles G., assignor.)

Loesel, Nicholas, Richmond Hill, assignor to American Can Company, New York, N. Y. Sifter-top closing device. 1,676,615; July 10.

Loewe, Siegmund, Berlin-Friedenau, Germany, assignor to Radio Corporation of America. Operate electrostatic telephones. 1,676,452; July 10.

Logan, J. A. (See Humason, G. A., and Childs, assignors.)

Loiseau, Louis M. J. (See Verdan, C., and Loiseau.)

Long, Albert E. (See Crook, C. M., and Long.)

Long, Eli M., assignor, by mesne assignments, to Shar-On Standard Optical Company, Inc., Geneva, N. Y. Lens-cutting machine. 1,676,566; July 10.

Longvall, Raymond C., assignor to Warp Compressing Machine Company, Worcester, Mass. Arrangement of spindles for creels. 1,676,864; July 10.

Look, Frank L., Lamanda Park, Calif. Beverage cooler. Des. 75,740; July 10.

Lookabaugh, Harry C., Jacksonville, Fla. Safety guard for dangerous highways. 1,677,038; July 10.

Lorant, Hugo, assignor to Schloemann Aktiengesellschaft, Dusseldorf, Germany. Metal tube and bar press. 1,676,401; July 10.

Lorenz, William A., assignor to The Otaka Fabric Company, West Hartford, Conn. Paper-making machine. 1,676,655; July 10.

Lotterman, William, L. B. Lester, and M. K. Orton, Grand Rapids, Mich. Automatic woodworking machine. 1,676,738; July 10.

Louisville Drying Machinery Co. (See Lissauer, Adolph W., assignor.)

Lowery, William, Hammond, Ind., assignor, by mesne assignments, to Hammond Bolt & Nut Company. Automatic feed mechanism for heading machines. 1,676,567; July 10.

Lowy, Samuel, New York, N. Y. Extensible pilaster. 1,676,616; July 10.

Lucas, Samuel M., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway signaling. 1,676,788; July 10.

Lu-Mi-Nus Signs, Inc. (See Wesley, Joseph A., assignor.)

Lund, Thomas, Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Blank-assembling machine. 1,676,341; July 10.

Lusk, Charles H., Newton, Mass. Compressor and pump. 1,676,789; July 10.

Lutz, George A., Cranford, N. J., assignor to American Circular Loom Company, Pittsburgh, Pa. Resistance welding electrode. 1,676,656; July 10.

Lutz, Julius H., New York, N. Y. Suction element and suction ventilator for automobiles. 1,676,269; July 10.

Luyben, Joseph A. (See Ferber, H. G., and Luyben.)

Luzzi, August F., Houston, assignor to J. B. Akers, Breckenridge, Tex. Truss. 1,676,657; July 10.

M S Co. (See Nittel, Frederick W., assignor.)

MacGuire, Elmer E., Anaconda, Mont. Traction lug for vehicles. 1,676,453; July 10.

Mack, Carl, assignor, by mesne assignments, to S. Bonat and H. Bonat, constituting the firm of Samuel Bonat & Bro., New York, N. Y. Hair winder. 1,676,402; July 10.

Mackenzie, Donald G., Montreal, Quebec, Canada. Vehicle frame. 1,676,342; July 10.

Magill, Donald G., Brooklyn, assignor to American Can Company, New York, N. Y. Fiber board for containers and the like. 1,676,617; July 10.

Maginnis, William J., assignor to Royal Electrtype Company, Philadelphia, Pa. Plate and preparation of plate for electrotyping. 1,676,658; July 10.

Magnetic Analysis Corporation. (See Burrows, Charles W., assignor.)

Magruder, Willett C., Louisville, Ky. Tiling. 1,677,039; July 10.

Malley, Roy D., East Orange, assignor to Cooper Hewitt Electric Company, Hoboken, N. J. Electric lamp. 1,676,790; July 10.

Malley, Roy D., East Orange, assignor to Cooper Hewitt Electric Company. Switching apparatus. 1,676,791; July 10.

Malley, Roy D., East Orange, assignor to Cooper Hewitt Electric Company, Hoboken, N. J. Vapor electric lamp. 1,676,792; July 10.

Malley, Roy D., East Orange, assignor to Cooper Hewitt Electric Company, Hoboken, N. J. Electric vapor lamp. 1,676,793; July 10.

Malley, Roy D., East Orange, assignor to Cooper Hewitt Electric Company, Hoboken, N. J. Thermostatically-controlled switch. 1,676,794; July 10.

Malley, Roy D., East Orange, and W. J. Winninghoff, South Orange, assignors to Cooper Hewitt Electric Company, Hoboken, N. J. Glass-working machinery. 1,676,795; July 10.

Mallory, Gladys F., Martins Ferry, Ohio. Combined window shade and drapery support. 1,676,403; July 10.

Malone, James P., Pittsburgh, Pa. Fuel-mixing device. 1,676,958; July 10.

Manaugh, Carl J. (See Cummings, James D., assignor.)

Manglalett, Gaetano, Brooklyn, N. Y. Cover back and hinge. 1,676,865; July 10.

Marckworth, Otto S., Columbus, Ohio. Applying, blending, and setting colors. 1,676,739; July 10.

Marden, John W. (See Rentschler, H. C., and Marden.)

Marion Machine, Foundry & Supply Company. (See Cook, W. A., and Stroup, assignors.)

Marlatt, George E., Pasadena, Calif. Typographical machine. 1,676,959; July 10.

Martin, De Loss K. (See Blackwell, O. B., and Martin.)

Marvel Company, The. (See Jackson, Benjamin B., assignor.)

Maryan, Colin C., Lawrence Park, Pa., assignor to General Electric Company. Flux for welding cast iron. 1,676,988; July 10.

Mas, George N., Washington, D. C., assignor to American Ornamental Bottle Corporation, Lynchburg, Va. Bottle. Des. 75,741; July 10.

Mason, Joe E. (See Branum, Solomon C., assignor.)

Master Products Corporation. (See Cronk, Wesley M., assignor.)

Matheson, Howard W., assignor to Canadian Electro Products Company, Limited, Montreal, Quebec, Canada. Making acetic acid. 1,676,454; July 10.

Mattison, Norman D., Montclair, N. J. Golf club. 1,676,270; July 10.

Mauborgne, Joseph O., and G. Hill, Washington, D. C. System of radio communication. 1,676,404; July 10.

Maury, Alfred D., Ilion, assignor, by mesne assignments, of one-third to G. A. Braun, Syracuse, N. Y. Actuating mechanism for pressing machines. 1,676,866; July 10.

McCandless, Henry W., New Albany, Ind. Stanchion. 1,676,568; July 10.

McClelland, A. B. (See Welch, Abraham L., assignor.)

McClelland, William H., Huntingdon, assignor, by mesne assignments, to R. P. M. Davis, Mount Union, Pa. Sanding device. 1,676,406; July 10.

McCollum, Burton, Washington, D. C. Method and apparatus for studying geologic contours. 1,676,619; July 10.

McConnell, Duncan A., Montclair, N. J., assignor, by mesne assignments, to Delco-Remy Corporation, Dayton, Ohio. Electric horn. 1,676,455; July 10.

McCorkindale, William P., Holyoke, Mass. Producing folded toilet-seat covers. 1,676,499; July 10.

McDavitt, Charles J., assignor to The Lehon Company, Chicago, Ill. Shingle-grouping machine. 1,676,911; July 10.

McDowell, Lamont A., Racine, Wis. Seat construction. 1,676,456; July 10.

McEwen, John D., assignor to Lee C. Moore & Company, Incorporated, Pittsburgh, Pa. Derrick. 1,676,271; July 10.

McEwen, John D., assignor to Lee C. Moore & Company, Incorporated, Pittsburgh, Pa. Derrick. 1,676,272; July 10.

McGlehan, Cornelius H., Glens Falls, N. Y. Paper receptacle. 1,677,040; July 10.

McGill Manufacturing Company. (See Despard, Victor R., assignor.)

McGinnis, Claude C., Sedro Woolley, Wash. Sliding door. 1,676,500; July 10.

McIntyre, Michael J., Eden Center, N. Y. Musical toy or instrument. 1,676,659; July 10.

McKamey, William O., Knoxville, Tenn. Railway car. 1,676,343; July 10.

McKenzie, Frank R. (See Glidden, A. A., and McKenzie.)

McMenamin, Emmett G., Monterey, Calif. Aeronautic toy mounting. 1,676,989; July 10.

McQuinn, Thomas H., London, England, assignor of one-third to H. M. Sargood, Toorak, Victoria, Australia. Electric radiator. 1,676,834; July 10.

Meacham, Frederick C., Garden City, N. Y. Device for calculating time. 1,676,912; July 10.

Meakin & Ridgway, Inc. (See Woodman, Walter S., assignor.)

Mejart, Fred, Manufacturing Company. (See Albach, Frank, assignor.)

Meillati, Bruno R., Salt Lake City, Utah. Bottle cap and fastener. 1,676,998; July 10.

Merrimack Manufacturing Company. (See Dick, Hugo P., assignor.)

Midland Chemical Laboratories. (See Bloodhart, John W., assignor.)

Mier, Millard M. (See Arrowood, Reuben H., assignor.)

Milano Furniutre Company. (See Heyman, Joseph J., assignor.)

Milk Novelty Company. (See Mills, Fred L., assignor.)

Millar, George A., Ridgefield Park, assignor to Cooper Hewitt Electric Company, Hoboken, N. J. Glassworking machinery. 1,676,796; July 10.

Miller, Edgar A., and C. A. Janes, Philadelphia, Pa. Signal device. 1,676,273; July 10.

Miller, William F., Buffalo, N. Y. Oil burner. 1,676,274; July 10.

Mills, Fred L., Oak Park, Ill., assignor to Milk Novelty Company, Chicago, Ill. Front plate for a vending-machine cabinet. Des. 75,742; July 10.

Mills, Robert D., jr., Nashville, Tenn. Cigarette and match dispenser. 1,677,041; July 10.

Milwaukee Corrugating Company. (See Kuehn, Louis, assignor.)

Miner, W. H., Inc. (See Haseltine, Stacy B., assignor.)

Mitchell, Kearney F., Sulphur, La. Automatic drill-pipe cutter. 1,676,569; July 10.

Mittag, Albert H., Schenectady, N. Y., assignor to General Electric Company. System of distribution. 1,676,990; July 10.

Mobley, Henry G., League City, Tex. Pressure-relief apparatus. 1,676,999; July 10.

Molnar, Zoltan, Welland, Ontario, Canada, assignor of one-fourth to M. S. Czorboy and one-fourth to M. Grebecz. Automatic railroad gate. 1,676,960; July 10.

Montague City Rod Company. (See Bennett, Raymond B., assignor.)

Montgomery, Gustavus A., assignor to Titusville Forge Company, Titusville, Pa. Combined casing spider and elevator. 1,676,275; July 10.

Montgomery Ward & Company. (See Heaton, Nathan C., assignor.)

Moore, Charles W., assignor to The Moore Flange Corporation, New York, N. Y. Seal. 1,676,276; July 10.

Moore, Daniel M., East Orange, N. J., assignor to General Electric Company. Electric discharge device. 1,677,000; July 10.

Moore Fabric Company. (See Moore, John V., assignor.)

Moore Flange Corporation, The. (See Moore, Charles W., assignor.)

Moore, Henry W., Hingham, Mass., assignor to D. M. Baker, doing business as Cape Cod Shop, New York, N. Y. Tankard. Des. 75,743; July 10.

Moore, John V., assignor to Moore Fabric Company, Pawtucket, R. I. Curvilinear fabric. 1,677,042; July 10.

Moore, Lee C., & Company. (See McEwen, John D., assignor.)

Moore, Raymond G., and A. Claud-Mantle, assignors to The Bassick Company, Bridgeport, Conn. Latch. 1,676,867; July 10.

Moors, George F., assignor to Recip-Roto, Engine Company, St. Louis, Mo. Burner. 1,676,501; July 10.

Moreau, Jules, La Garenne-Colombes, France. Lubricating device for axle journals. 1,677,001; July 10.

Morehouse, Eugene. (See Bailou, F. A., jr., and Morehouse.)

Morgan, David W. R., Swarthmore, Pa., assignor to Westinghouse Electric & Manufacturing Company. Condenser. 1,676,740; July 10.

Morgan, Francis L., Burlingame, Calif. Pencil holder. Des. 75,744; July 10.

Morgan, Francis L., Burlingame, Calif. Pencil holders. Des. 75,745; July 10.

Morkrum-Kleinschmidt Corporation. (See Krum, Charles L. and H. L., assignors.)

Morrill, James M., Milbank, S. Dak. Bread proofer. 1,677,043; July 10.

Morris, John W., Rensselaer, N. Y. Ladder support. 1,676,618; July 10.

Morris, Jolly L., Crafton, assignor of fifty-one one hundreds to A. B. Coleman, Pittsburgh, Pa. Dispensing apparatus. 1,676,833; July 10.

Moskowitz, Jacob, Brooklyn, N. Y. Book-corner protector. 1,676,741; July 10.

Moss, Thomas, Long Beach, Calif. Washing compound. 1,677,044; July 10.

Moyer, William W., Camden, N. J., assignor to Victor Talking Machine Company. Driving mechanism for talking machines. 1,676,660; July 10.

Mugler, Casper M., Clay Center, Kans. Metal flooring. 1,676,570; July 10

Muir, Wellington W., assignor to Harrison Radiator Corporation, Lockport, N. Y. Process of and apparatus for cooling internal-combustion engines. 1,676,961; July 10.

Mumford, Russell W., Trona, Calif., assignor by mesne assignments, to American Potash & Chemical Corporation, New York, N. Y. Cooling apparatus. 1,676,277; July 10.

Murphy, Christena, New York, N. Y. Comfort cushion. 1,676,962; July 10.

Murphy, Daniel F., and L. Cotter, Boise, Idaho. Electric signaling device for vehicles. 1,676,571; July 10.

Murphy, Howard J., Reading, Mass., assignor, by mesne assignments, to the Bassick Manufacturing Company, Chicago, Ill. Lubricating apparatus. 1,676,457; July 10.

Murray, Thomas E. (See Phelps, George H., assignor.)

Myers, Lewis C., Freeport, assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,676,278; July 10.

Myers, Lewis C., Freeport, assignor to Royal Typewriter Company, Inc., New York, N. Y. Typewriting machine. 1,676,279; July 10.

Mynol Chemical Company, The. (See Anthony, Wendell P., assignor.)

Nasmith, John W., Manchester, England. Comb in combing machines. 1,676,702; July 10.

National Enameling & Stamping Co. (See Sladky, Alexander C. and J., assignors.)

National Pneumatic Company, The. (See Graff-Baker, William S., assignor.)
National Pneumatic Company. (See Paul, Abram F., assignor.)
National Tube Company. (See Baines, J. E., and Bosle, assignors.)
Naugatuck Chemical Company, The. (See Ostromislensky, Iwan, assignor.)
Neal, Spencer G., New York, N. Y., assignor to Automatic Straight Air Brake Company, Wilmington, Del. Air-brake apparatus. Re17,026; July 10.
Neal, Spencer G., New York, N. Y., assignor to Automatic Straight Air Brake Company, Wilmington, Del. Air-brake apparatus. Re17,028; July 10.
Neal, Spencer G., New York, N. Y., assignor to Automatic Straight Air Brake Company, Wilmington, Del. Re17,029; July 10.
Neal, Spencer G., New York, W. Astle, Brooklyn, N. Y., and E. P. Wilson, East Orange, N. J., assignors to Automatic Straight Air Brake Company, Wilmington, Del. Air-brake apparatus. Re17,027; July 10.
Neelmeier, Wilhelm, Leverkusen, near Cologne-on-the Rhine, Germany, assignor to Grasselli Dyestuff Corporation, New York, N. Y. Hydroxy-naphthalene-arylsulphoester azo dyestuff and making the same. 1,676,407; July 10.
Neelmeier, Wilhelm, Leverkusen-on-the-Rhine, Germany, assignor to Grasselli Dyestuff Corporation, New York, N. Y. Hydroxy-naphthalent-arylsulfoester azo dyestuff and making the same. 1,676,458; July 10.
Neilsen, Karl P., Long Beach, Calif. Standing-valve puller. 1,676,661; July 10.
New Britain Machine Company. (See Victory, William J., assignor.)
Newmann, John, Glendale, N. Y. Hoisting apparatus. 1,676,344; July 10.
Newmann, John, Glendale, N. Y. Transmission mechanism. 1,676,345; July 10.
Newspaper Stuffing Machine Company, The. (See Halvorsen, Severin, assignor.)
Nicholls, William H., Brooklyn, N. Y. Jolt mechanism for molding machines. 1,676,662; July 10.
Nicholls, William H., Brooklyn, N. Y. Sand-mulling device. 1,676,663; July 10.
Niemann, George F., assignor to Benjamin Electric Manufacturing Company, Chicago, Ill. Switch socket. 1,676,280; July 10.
Nissen, J. N. (See Cheatham, Chester W., assignor.)
Nittel, Frederick W., Attleboro Falls, assignor to M S Co., Attleboro, Mass. Watch-bracket end hook. 1,677,101; July 10.
Nocito, Garibaldi, Rosario, Argentina. Arrangement for the better exhaust and use of the explosion of the motor gas in order to operate an alarm bell. 1,676,346; July 10.
Nolte, Frank G. (See Fuller, T. S., Adams, and Nolte.)
Norris, Robert J. (See Sperti, G., Norris, Withrow, and Schneider.)
Northrop, Jonas, assignor, by mesne assignments, to Draper Corporation, Hopedale, Mass. Feeler loom. 1,676,913; July 10.
Norton, Charles H., Plainville, Conn., assignor, by mesne assignments, to Cincinnati Grinders Incorporated, Cincinnati, Ohio. Grinding apparatus. 1,676,620; July 20.
Nuyts, Georges, Paris, France. Toothbrush. 1,676,703; July 10.
Nyman, Alexander, Tuckahoe, assignor to Dubilier Condenser Corporation, New York, N. Y. Tension regulator. 1,676,797; July 10.
Oatley, Henry B., Flushing, N. Y., assignor to The Superheater Company, New York, N. Y. Locomotive front end. 1,676,347; July 10.
Oberheu, Fred A., Detroit, Mich. Sign-supporting device. 1,676,835; July 10.
O'Brien, William G., assignor to The Goodyear Tire & Ruhber Company, Akron, Ohio. Making articles from a fibrous composition. 1,676,798; July 10.
Odom, Daniel E., Bennettsville, S. C. Spring-handling apparatus. 1,676,704; July 10.
Odom, Daniel E., Bennettsville, S. C. Spring motor. 1,677,045; July 10.
Oehmichen, Etienne, Valentigney, France. Propelling or lifting device with automatic correction. 1,676,572; July 10.
Oehrn, Hans. (See Kaltwasser, O., Oehrn, and Kirchhoff.)
O'Hara, Skidmore, assignor to O'Hara Waltham Company, Waltham, Mass. Machine for printing or embossing. 1,676,836; July 10.
O'Hara Waltham Company. (See O'Hara, Skidmore, assignor.)
Ohio Chemical & Manufacturing Company. (See Axelrod, Meyer L., assignor.)
Ohio Foundry and Manufacturing Company, The. (See Sharp, William L., assignor.)
O'Leary, Margaret K., Fordham, N. Y. Dispensing closure for containers. 1,676,348; July 10.
Olson, Anders, Galesburg, Ill. Fly swatter. 1,677,046; July 10.
Olson, Anders, assignor of one-half to S. Hanson, Galesburg, Ill. Conveyer for corn harvesters. 1,676,916; July 10.
Olson, Otto E., and L. Cooper, Douglas, Ariz. Repairing means for furnace arches. 1,677,002; July 10.
O'Malley, Matthew V. (See Paulson, Charles J., assignor.)
Oro-Tone Company, The. (See Grass, Otto R., assignor.)
Orton, Merritt K. (See Lotterman, W., Lester, and Orton.)
O'Shea, James P., New York, N. Y., assignor to Cooper Hewitt Electric Company. Mercury switch. 1,676,408; July 10.
Osmera, Frank, Wauneta, Nebr. Corn sheller. 1,676,573; July 10.
Ostermeier, George A., New London, Wis. Process trimmer. 1,676,574; July 10.
Ostline, John E., Liverpool, England, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Traffic-recording equipment for telephone systems. 1,676,742; July 10.
Ostromislensky, Iwan, New York, N. Y., assignor to The Naugatuck Chemical Company, Naugatuck, Conn. Making powdered vitreous polymerized styrol and its homologues, to the powder so produced, and articles including such material. 1,676,281; July 10.
Ostrovsky, Harry, Bryn Athyn, Pa. Apparatus for promoting flexibility of the joints of the hands. 1,676,664; July 10.
Otaka Fabric Company, The. (See Lorenz, William A., assignor.)
Overgaard, Olav, Brooklyn, N. Y., assignor to Star Contra Propeller Ltd. A/S., Oslo, Norway. Removable contrapropeller. 1,676,409; July 10.
Owen, Fredrick C., Fayetteville, N. C. Transformer for electric arc cutting, repairing, and welding apparatus. 1,677,003; July 10.
Packard Motor Car Company. (See Tibbetts, Milton, assignor.)
Packard Motor Car Company. (See Vincent, Jesse G., assignor.)
Pagenhart, Benjamin F., assignor of one-half to T. Young, Minneapolis, Minn. Brake mechanism for traction devices of the endless-belt type. 1,677,047; July 10.
Palm, Per W., Baudette, Minn. Tread attachment for vehicle wheels. 1,676,705; July 10.
Parker, C. Paul. (See Anderson, Swan F., assignor.)
Parker, Thomas R. (See Howard, F. A., and Parker.)
Parkersburg Rig and Reel Company, The. (See Schwemlein, William, assignor.)
Parmenter, George E., New York, N. Y., assignor to The American Crayon Company, Sandusky, Ohio. Display container. 1,676,917; July 10.
Parrish, Harry B. (See Vanderveld, Anthony, assignor.)
Paul, Abram F., Llanerch, Pa., assignor to National Pneumatic Company, New York, N. Y. Push-button apparatus for multiple-unit door-control systems. 1,676,743; July 10.
Paul, Leon R., New York, N. Y. Toy. 1,676,410; July 10.
Paulson, Charles J., assignor of one-third to M. V. O'Malley, Brooklyn, N. Y. Coin-selecting mechanism. 1,676,914; July 10.
Paulus, Charles L. (See Russell, H. O., and Paulus.)
Paulus, Charles L., Dayton, Ohio. Adjustable wind-vane sight. 1,676,963; July 10.
Payette, Joseph A., assignor to S. O. Bigney Company, Attleboro, Mass. Bracelet. 1,676,706; July 10.
Payne, El Roy L., assignor to Payne Furnace and Supply Company, Beverly Hills, Calif. Gas furnace. 1,676,665; July 10.
Payne Furnace and Supply Company. (See Payne, El Roy L., assignor.)
Peaden, William H., assignor to R. D. Donnelly and B. R. Graham, Tulsa, Okla. Dust-proof oil-dispensing vessel. 1,676,411; July 10.
Pedersen, Johannes T., Flushing, N. Y. Fork-tine straightener. 1,676,918; July 10.
Peer, Edward S., Los Angeles, Calif. Safety-deposit receptacle. 1,676,707; July 10.
Peerless Machinery Company. (See Glines, Frederick S., assignor.)
Penn Metal Company. (See Birkhols, Richard G., assignor.)
Pennsylvania Wire Glass Company. (See Cox, W., and Shuman, assignors.)
Persons, Lawrence M., assignor to Cook Electric Company, Chicago, Ill. Making hollow rivets. 1,676,919; July 10.
Pervier, William A., Watertown, Mass., assignor, by mesne assignments, to W. A. Pervier, trustee. Alarm signal for automobiles. 1,676,412; July 10.
Pervier, William A., trustee. (See Pervier, William A., assignor.)
Peters, Henry M., Chicago, Ill., assignor to Faries Manufacturing Company, Decatur, Ill. Reading lamp. Des. 75,746; July 10.
Petersen, Albert C., Copenhagen, Denmark. Arrangement for closing boxes. 1,676,868; July 10.
Pfeffer, Morris, assignor to Enterprise Tinware Company, New York, N. Y. Sanitary refuse can. 1,677,048; July 10.
Phelan, Louis A. M., and C. Hotchkiss, Beloit, Wis., assignors to Absolute Con-Tac-Tor Corporation. Electrical switch. 1,676,920; July 10.

Phelan, Louis A. M., and C. Hotchkiss, Beloit, Wis., assignors to Absolute Con-Tac-Tor Corporation. Electrical apparatus. 1,676,921; July 10.
Phelan, Louis A. M. Elkhart, Ind., assignor, by mesne assignments, to Absolute Con-Tac-Tor Corporation. Electric apparatus. 1,676,922; July 10.
Phelan, Louis A. M., Elkhart, Ind., and C. Hotchkiss, Milwaukee, Wis., assignors to Absolute Con-Tac-Tor Corporation. Electrical apparatus. 1,676,923; July 10.
Phelps, George H., Warehouse Point, Conn., assignor to T. E. Murray, Brooklyn, N. Y. Electric welding. 1,676,282; July 10.
Phillips, Henry W. L. (See Gwyer, A. G. C., and Phillips.)
Pickard, Greenleaf W., Newton Center, assignor to Wireless Specialty Apparatus Company, Boston, Mass. Electrical amplifier. 1,676,744; July 10.
Pickard, Greenleaf W., Newton Center, assignor to Wireless Specialty Apparatus Company, Boston, Mass. Electrical reactance and method and apparatus. 1,676,745; July 10.
Pierce Electric Company. (See Tideman, Selim N., assignor.)
Pietzsch, Emil. (See Körner, Bruno H., assignor.)
Pittelkow, August, Chicago, Ill., assignor to American Can Company, New York, N. Y. Interchangeable-cover cracker can. 1,676,621; July 10.
Pivoto, Felix L., Beaumont, Tex. Valve mechanism. 1,676,666; July 10.
Plate, Sten V. C., Chicago, Ill. Device for separating liquid from solid material. 1,676,459; July 10.
Plowman, Arthur S., assignor of one-fifth to S. A. Danna, New York, N. Y. Fruit seeder. 1,676,413; July 10.
Plunkett, Gaither A., Bay Point, Calif. Device for moving freight-car doors. 1,676,502; July 10.
Pneumatic Appliances Corporation. (See Weiland, Alfred, assignor.)
Podel, Abraham, assignor to Anchor Cap and Closure Corporation, Long Island City, N. Y. Cap opener. 1,676,649; July 10.
Pohl, Robert, Berlin, Germany, assignor to General Electric Company. Magnetic shield for dynamo-electric machines. 1,677,004; July 10.
Poivilliers, Georges J., Paris, France. Apparatus for automatically drawing maps and plans from two terrestial or aerial photographs. 1,676,708; July 10.
Polanyi, Michael, Berlin-Zehlendorf Mitte, and S. von Bogdandy, Berlin-Dahlem, Germany. Determining the composition of copper and zinc alloys. 1,676,709; July 10.
Pollock, Robert T., New York, N. Y., assignor to Universal Oil Products Company, Chicago, Ill. Process and apparatus for cracking oil. 1,676,924; July 10.
Pope Elmer R., Hamilton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Attaching machine. 1,676,283; July 10.
Popper, John, Montreal, Quebec, Canada. Perfume bottle or similar container. Des. 75,747; July 10.
Powell, George A., Forest Hills Gardens, N. Y. Door-check. 1,676,284; July 10.
Prell, Henry, Chicago, Ill. Riddle. 1,676,255; July 10.
Priebe, Ernest B., Inwood, N. Y. Furnace grate 1,676,349; July 10.
Pritchard, Carl B., Scottdale, Pa. Bull wheel. 1,676,925; July 10.
Proctor, William N., Knoxville, Tenn. Towel holder. 1,677,049; July 10.
Pro-phy-lac-tic Brush Company. (See Elliot, William S., assignor.)
Pro-phy-lac-tic Brush Company. (See Elliot, W. S., and Lindgren, assignors.)
Prosperity Company, The. (See Braun, Philip N., assignor.)
Prouty, Theodore C. and W. O., Hermosa Beach, Calif., assignors to American Encaustic Tiling Company, Ltd., New York, N. Y. Supporting and exposing ceramic products in the course of their production. 1,676,799; July 10.
Pouty, Theodore C. and W. O., Hermosa Beach, assignors, by mesne assignments, to American Encaustic Tiling Company, Ltd., Los Angeles, Calif. Making tile. 1,677,098; July 10.
Prouty, Willis O. (See Prouty, Theodore C. and W. O.)
Puc, Vojtěch, Prague-Weinberge, Czechoslovakia. Press button. 1,676,710; July 10.
Quaker City Iron Works. (See Jensen, James A., assignor.)
Quick, Charles E., Houston, Tex. Aircraft motor 1,676,667; July 10.
Quisling, Sverre, Philadelphia, Pa. Adjustable pneumatic spring. 1,676,350; July 10.
Radio Corporation of America. (See Loewe, Siegmund, assignor.)
Radio Corporation of America. (See Round, Henry J., assignor.)
Radio Frequency Laboratories, Incorporated. (See Hull, Lewis M., assignor.)
Rampfel, Heinrich, Lakewood, N. J., assignor to Nathan Straus & Sons, Inc., New York, N. Y. Plate or similar article. Des. 75,745; July 10.
Rankin, Ernest L., London, England. Divider or compass. 1,676,964; July 10.
Rasmussen, Oluf H. (See Clemetson, S. A., and Rasmussen.)
Ratcliff, Arthur, assignor to Hummel & Downing Co., Milwaukee, Wis. Shirt envelope. 1,676,286; July 10.
Reaney Limited. (See Reaney, Russell J., assignor.)
Reaney, Russell J., Ottawa, Ontario, assignor to Reaney Limited, Ottawa, Canada. Wheel structure. 1,677,104; July 10.
Reap, Edward A., Oilton, Okla. Can. 1,676,711; July 10.
Recip-Roto Engine Company. (See Moors, George F., assignor.)
Reed, Martin L., and H. E. Bulla, Wilson, Okla. Paraffin cutter; 1677,050; July 10.
Reed Roller Bit Company. (See Humanson, G. A., and Childs, assignors.)
Reichold, Ludwig, Winsted, assignor to The Fitzgerald Manufacturing Company, Torrington, Conn. Non-warping hot plate. 1,677,005; July 10.
Reid, James S., Cleveland, Ohio. Pulley structure. 1,676,460; July 10.
Reid, Marcellus, Cleveland, Ohio. Universal drafting table. 1,676,746; July 10.
Rentschler, Harvey C., and J. W. Marden, East Orange, N. J., assignors to Westinghouse Lamp Company. High-frequency furnace. 1,676,926; July 10.
Republic Brass Company, The. (See Richards, P. R., and Bloch, assignors.)
Reserve Holding Company. (See Gould, Roy F., assignor.)
Richard, Joseph C., North Long Branch, N. J. Marker for trees, plants, and flowers. 1,676,927; July 10.
Richards, Peter R., and L. Bloch, assignors to The Republic Brass Company, Cleveland, Ohio. Combination faucet for laundry tubs and sinks. 1,676,800; July 10.
Richardson Company, The. (See Keller, Charles L., assignor.)
Richter, Henry G., Roselle Park, N. J., assignor to Electrad, Inc., New York, N. Y. Resistance unit and rheostat. 1,676,869; July 10.
Riffé, Antonio C., Barcelona, Spain. Shedding mechanism. 1,676,870; July 10.
Rippingille, Edward V., Detroit, Mich., assignor to Delco-Remy Corporation, Dayton, Ohio. Dual ignition for 2-cylinder engines. 1,676,503; July 10.
Rings, Fred, Chicago, Ill. Toothpick holder. 1,676,747; July 10.
Risley, Inez E., Los Angeles, Calif. Fit-easy facing for hats. 1,676,504; July 10.
Robadey-Margot, Louise, Geneva, Switzerland. Hair-waving tongs. 1,676,405; July 10.
Robbins & Myers Company, The. (See Stuart, Harve R., assignor.)
Roberts, Montague H., Englewood, N. J., assignor to Franklin Railway Supply Company. Railway booster. 1,676,575; July 10.
Robeson-Rochester Corporation. (See Scott, Howard H., assignor.)
Robinson, Albert E., and A. M. Sosa, assignors to The American Tool Works Company, Cincinnati, Ohio. Drilling machine. 1,676,461; July 10.
Robinson, John W., Woodland, Calif. Fruit-tray cleaner. 1,676,801; July 10.
Robinson, Thomas, New York, N. Y., assignor to Lancaster Asphalt, Inc. Prepared roofing and method of making. 1,676,351; July 10.
Roden, Frank A., et al. (See Burroughes, William J., assignor.)
Romano, Anthony, and R. Vitale, Brooklyn, N. Y. Valve-reseating machine. 1,676,414; July 10.
Root Manufacturing Company, The. (See Root, Ralph R., assignor.)
Root, Ralph R., Lakewood, assignor to The Root Manufacturing Company, Cleveland, Ohio. Powder-dispensing device. 1,676,462; July 10.
Rose, James R., Edgeworth, assignor to Carbo-Oxygen Company, Pittsburgh, Pa. Gaseous fuel. 1,676,871; July 10.
Rosenheim Co., Inc. (See Jones, Percival W., assignor.)
Round, Henry J., London, England, assignor to Radio Corporation of America. Telephone transmitter. 1,676,668; July 10.
Rouse, H. B., & Company. (See Knoll, William J., assignor.)
Rousmaniere, Williams & Co. (See Kirchhoff, Ernest, assignor.)
Rowe, Irving R. (See Bradley, E. E., and Rowe.)
Rowlands, Percy O., Birmingham, England. Change-speed gearing. 1,676,802; July 10.
Royal Electrotype Company. (See Blaets, Harry M., assignor.)
Royal Electrotype Company. (See Maginnis, William J., assignor.)
Royal Typewriter Company. (See Myers, Lewis C., assignor.)
Ruben, Samuel, New York, N. Y. Radiosignaling. 1,676,748; July 10.
Rudin, Joseph, Brooklyn, N. Y. Combination ladle and strainer. 1,677,120; July 10.
Rueckert, Curtis, assignor to Mathias Klein & Sons, Chicago, Ill. Blowtorch burner. 1,676,352; July 10.
Ruemelin, Richard, St. Paul, Minn. Sand-blast curtain. 1,676,576; July 10.
Rush, William J. (See Fork, Charles H., assignor.)

Russell, Herbert O., Detroit, Mich., and C. L. Paulus, Dayton, Ohio. Ground-speed indicator. 1,676,965; July 10.
Russell, Leslie A., assignor to Koebring Company, Milwaukee, Wis. Crane and shovel convertible operating mechanism. 1,676,353; July 10.
Russen, Anthony C. P., Edgewood, R. I. Thread-control attachment for looms. 1,676,803; July 10.
Ryan, Bernard R., Sidney, New South Wales, Australia. Shoe heel. 1,676,928; July 10.
Ryan, Walter D'A., Schenectady, N. Y. Headlight. 1,676,463; July 10.
Ryan, Walter D'A., Schenectady, N. Y. Headlight. 1,676,464; July 10.
Ryder, Charles D., Covington, Ky., assignor to The Cincinnati Victor Company. Lamp. 1,676,712; July 10.
Sachsse, Anna E., Dresden-Blasewitz, Germany. Back support for baths. 1,676,354; July 10.
St. John, Gamaliel C., Greenwich, Conn. Dashpot. 1,676,674; July 10.
Sakhatwalla, Byramji D., Crafton, Pa. Copper chromium ferrous alloys. 1,676,929; July 10.
Salt's Textile Manufacturing Co., The. (See Shipway, George E., assignor.)
Sand Spun Patents Corporation. (See Beatty, Douglas T., assignor.)
Sanderson, Harleigh E., Alva, Okla. Automobile signal. 1,676,287; July 10.
Sands, Thomas J., Auburn, R. I. Slug or bunch catcher. 1,677,110; July 10.
Saperston, Perry, Chicago, Ill. Insole. 1,676,355; July 10.
Saperston, Perry, Chicago, Ill. Arch support. 1,676,415; July 10.
Saplnsley, Milton C., Providence, R. I. Display cabinet. 1,676,356; July 10.
Sargood, Harry M. (See McQuinn, Thomas H., assignor.)
Scanlan, Thomas J., Oakland, Calif. Game or puzzle. 1,676,505; July 10.
Schaeffer, Charles, assignor to Société Anonyme des Anciens Etablissements Panhard & Levassor, Paris, France. Sleeve of the engine of the sleeve-valve type. 1,677,051; July 10.
Schaffler, Oscar, Detroit, Mich. Electric cooking and heating device. 1,676,669; July 10.
Schaub, Rudolph G. (See Jordan, Charles J., assignor.)
Scheck, Clarence W., Pittsburgh, Pa. Golf game apparatus. 1,676,804; July 10.
Schieler, Harry H., New Meadows, Idaho, assignor of one-third to C. E. Stoltz, Webster Groves, Mo. Motor vehicle. 1,676,357; July 10.
Schley, Rudolph E., Beaver Dam, Wis. Mechanical movement. 1,676,506; July 10.
Schloemann Aktiengesellschaft. (See Lorant, Hugo, assignor.)
Schlosser Brothers, Incorporated. (See Cheshier, Reuel C., assignor.)
Schlosser, Elizabeth M., Minneapolis, Minn. Sanitary belt. 1,676,288; July 10.
Schmalz, Albano, Chicago, Ill. Machinist's work clamp. 1,676,289; July 10.
Schmid, Max. (See Straub, F., de Montmollin, and Schmid.)
Schmitt, Joseph, Brunstatt, France. Carding machine. 1,676,577; July 10.
Schmitz, Fred A., assignor to The Berger Manufacturing Company, Canton, Ohio. Metallic shelving. 1,676,930; July 10.
Schmunk, Charles E., Crafton, Pa. Lamp. 1,676,670; July 10.
Schneider, Herman. (See Sperti, G., Norris, Withrow, and Schneider.)
Schott, Charles R., New York, N. Y. Dispensing device. 1,676,358; July 10.
Schott, Howard H., assignor to Robeson-Rochester Corporation, Rochester, N. Y. Coffee percolator. Des. 75,749; July 10.
Schott, Howard H., assignor to Robeson-Rochester Corporation, Rochester, N. Y. Waffle iron. Des. 75,750; July 10.
Schott, Howard H., assignor to Robeson-Rochester Corporation, Rochester, N. Y. Coffee percolator. Des. 75,751; July 10.
Schoettel, Eugen. (See Liebert, H. R., and Schoettel.)
Schron, Christy, assignor to The White Motor Company, Cleveland, Ohio. Work holder. 1,676,290; July 10.
Schubert, Franz J. (See Garrett Robert E., assignor.)
Schulte, Fritz. (See Herz, R., Schulte, and Zerweck.)
Schultz, Edward J., Covington, Ky. Tie. 1,676,291; July 10.
Schulzke, Richard F., assignor to Zoss Ladder Works, Portland, Oreg. Ladder. 1,676,915; July 10.
Schurmann, William A., assignor to W. A. Schurmann & Co., Inc., Chicago, Ill. Egg carton. 1,676,872; July 10.
Schurmann, W. A., & Co. (See Schurmann, William A., assignor.)
Schurr, Charles H., assignor to The Lees-Bradner Company, Cleveland, Ohio. Hobbing machine. 1,676,873; July 10.
Schwartz, Frank, New York, N. Y. Beam compass. 1,676,359; July 10.
Schwartz, Frank, New York, N. Y. Auxiliary beam-compass kit for drawing instruments. 1,676,360; July 10.
Schwartz, Gerhardt F., St. Louis, Mo. Electric control device. 1,676,671; July 10.
Schwemlein, William, assignor to The Parkersburg Rig and Reel Company, Parkersburg, W. Va. Bearing. 1,676,292; July 10.
Schwinn, Frank W., Chicago, Ill. Refrigerating system. 1,676,837; July 10.
Scott, Alva W., and H. D. Geyer, assignors to The Inland Manufacturing Company, Dayton, Ohio. Locking handwheel. 1,676,465; July 10.
Scott Paper Company. (See Liebeck, Harry, assignor.)
Scuterud, Harold, Chicago, Ill. Automobile bumper. 1,676,749; July 10.
Seager, Royal A., Ogden, Utah. Connecting link for cross chains of anti-skid. 1,676,966; July 10.
Seaman Body Corporation. (See Hardtke, Edward J., assignor.)
Sebrell, Lorin B., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Accelerator, method of vulcanizing caoutchouc and product thereof. 1,676,838; July 10.
Seghers, Emiel P., Chicago, Ill. Valve-stem cover. 1,676,578; July 10.
Seidell, Le Roy, and G. B. Jack, jr., New York, assignors to Jaton Manufacturing Corporation, Brooklyn, N. Y. Waterproof fabric. 1,676,362; July 10.
Seidell, Le Roy, and G. B. Jack, jr., New York, assignors to Jaton Manufacturing Corporation, Brooklyn, N. Y. Impregnating machine and process. 1,676,363; July 10.
Semenov, Ivan A., Pilsen, Czechoslovakia. Apparatus for pressing together the edges of tubes. 1,676,361; July 10.
Senger, Albert C., Hamilton, Ohio. Tire-changing apparatus. 1,677,052; July 10.
Sepon, John, Chelsea, Mass. Toy vehicle. 1,676,839; July 10.
Seyer, Humboldt M. (See Astley, Edward F., assignor.)
Shank, Dorothy E. (See Heft, H. L., Van Arsdale, and Shank.)
Sharp & Dohme, Inc. (See Dohme, Alfred R. L., assignor.)
Sharp, William L., assignor to The Ohio Foundry and Manufacturing Company. Steubenville, Ohio. Gas heater. Des. 75,752; July 10.
Shaukis, Arthur J., Haverhill, Mass. Atomizer. 1,677,053; July 10.
Shaw, Louis E., East Orange, N. J., assignor to E. Unger, New York, N. Y. Heater-supporting chandelier. 1,677,054; July 10.
Sheppard, Samuel E., assignor to Eastman Kodak Company, Rochester, N. Y. Photograph and making the same. 1,676,580; July 10.
Shipway, George E., Noroton, assignor to The Salt's Textile Manufacturing Co., Bridgeport, Conn. Manufacture of colored pile fabrics. 1,676,931; July 10.
Shively, Jess A., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Valve mechanism. 1,676,840; July 10.
Shoaff, Paul S., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Golf-ball center. 1,676,841; July 10.
Shoemaker, Alvin H., Seattle, Wash. Wheel. 1,676,874; July 10.
Shortt, Howard G., Carthage, assignor of one-half to Stebbins Engineering and Manufacturing Company, Watertown, N. Y. Automatic receiver pump. 1,676,875; July 10.
Shuman, Arno. (See Cox, W., and Shuman.)
Shur-On Standard Optical Company. (See Long, Eli M., assignor.)
Siemens & Halske Aktiengesellschaft. (See Gross, Reinhold, assignor.)
Silver, Benjamin J., Gloversville, N. Y. Shoe inner sole. 1,677,105; July 10.
Simmen, Frank P., San Mateo, assignor to Sunset Feather Company, San Francisco, Calif. Feather-washing machine. 1,676,713; July 10.
Simmons, Ralph C., Beverly, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Feeding mechanism. 1,676,293; July 10.
Simon, Louis J., London, England. Terminal for electric and wireless connections. 1,676,967; July 10.
Simons, Abraham, New York, N. Y. Diamond lathe tool. 1,677,055; July 10.
Sklarek, Clifford, assignor to International Spotlight Corporation. Chicago, Ill. Dirigibly-mounted light. 1,676,364; July 10.
Sladky, Alexander C., and J., assignors to National Enameling & Stamping Co., Inc., Milwaukee, Wis. Liquid-fuel heating stove. 1,676,805; July 10.
Sladky, Joseph. (See Sladky, Alexander C. and J.)
Slonaker, D. H., et al. (See Davison, Lawrence, assignor.)
Small, Norman M., assignor to Frick Company, Waynesboro, Pa. Check valve. 1,677,056; July 10.
Smalley, William D., Minneapolis, Minn. Turbine. 1,676,806; July 10.
Smallhouse, Albert A., Los Angeles, assignor of thirty-nine one-hundredths to J. Aebicher, Palmdale, Calif. Washing and cleaning apparatus. 1,676,842; July 10.
Smallidge, Frank E., Wenatchee, Wash. Fruit-cleaning machine. 1,676,714; July 10.
Smith, James E., Wilkinsburg, assignor of one-half to I. Gordon, Pittsburgh, Pa. Process and apparatus for forming grids. 1,676,366; July 10.

Smith, Lloyd B., and G. W. Jamison, assignors to The Atlantic Refining Company, Philadelphia, Pa. Sludge treatment. 1,676,294; July 10.
Smith, Roy H. (See de Lapotterie, Otto H., assignor.)
Smith, S., & Sons (Motor Accessories) Limited. (See Spiller, Herbert W., assignor.)
Smith, Walter S., Columbus, Ohio. Scale. 1,676,295; July 10.
Smirnoff, Nicholas, Brooklyn, N. Y. Rocking and galloping horse. 1,676,365; July 10.
Snavely, Clarence S., Pittsburgh, and W. B. Wells, Wilkinsburg, asignors to The Union Switch & Signal Company, Swissvale, Pa. Electrical relay. 1,676,466; July 10.
Snyder, Earl M., Detroit, Mich. Amalgam plugger. 1,676,715; July 10.
Société Anonyme des Anciens Etablissements Panhard & Levassor. (See Schaeffer, Charles, assignor.)
Society "Chemical Works formerly Sandoz." (See Knecht, O., and Brutsch, assignors.)
Society of Chemical Industry in Basle. (See Gams, A., and Widmer, assignors.)
Society of Chemical Industry in Basle. (See Straub, F., de Montmollin, and Schmid, assignors.)
Sosa, Augustus M. (See Robinson, A. E., and Sosa.)
Spanovic, Ninko, Dusquesne, Pa. Pipe wrench. 1,676,507; July 10.
Speedpak Dispenser Corporation. (See Huntley, Burton L., assignor.)
Spencer, John A., Revere, assignor to Spencer Thermostat Company, Cambridge, Mass. Figure toy. 1,676,296; July 10.
Spencer Thermostat Company. (See Johnson, Norman E., assignor.)
Spencer Thermostat Company. (See Spencer, John A., assignor.)
Sperti, George, Covington, Ky., R. J. Norris, Greenville, R. B. Withrow and H. Schneider, Cincinnati, assignors to D. Laurence, trustee, Cincinnati, Ohio. Light-treatment process. 1,676,579; July 10.
Spiller, Herbert W., assignor to S. Smith & Sons (Motor Accessories) Limited, London, England. Carbureting device. 1,676,932; July 10.
Stafford, Rogers T. (See Ballou, F. A., and Stafford.)
Stahl, Edward J., assignor to The Baker-Raulang Company, Cleveland, Ohio. Seat construction and seat attachment. 1,676,672; July 10.
Stalker, Frederick W., assignor to Taylor Instrument Companies, Rochester, N. Y. Gauging instrument. 1,676,673; July 10.
Stancliffe, Cecil W., assignor to Valveless Oil Burner Corporation, New York, N. Y. Fuel control for liquid fuel burners. 1,676,933; July 10.
Standard Development Company. (See Howard, F. A., and Parker, assignors.)
Standard Oil Company. (See Hunneman, Roger D., assignor.)
Standard Oil Company. (See Wilson, Robert E., assignor.)
Standard Oil Development Company. (See Becker, Arman E., assignor.)
Standard Oil Development Company. (See Coleman, S. P., and Hughes, assignors.)
Standard Oil Development Company. (See Howard, Frank A., assignor.)
Standard Oil Development Company. (See Lewis, Warren K., assignor.)
Stanley, Robert, De Witt, Iowa. Oat huller. 1,677,111; July 10.
Stannard, Winfield H., Matteson, assignor to Central Scientific Company, Chicago, Ill. Constant-temperature oven. 1,676,876; July 10.
Star Contra Propeller Ltd. A/S. (See Overgaard, Olav, assignor.)
Starkweather, George E., assignor of one-fourth to T. A. Holland and one-fourth to B. Chambers, Los Angeles, Calif. Heater. 1,677,006; July 10.
Stateler, Ernest S. (See Kohman, H. A., Irvin, and Stateler.)
Stebbins Engineering and Manufacturing Company. (See Shortt, Howard G., assignor.)
Steeb, Harry L., Rock Island, Ill. Book end. Des. 75,753; July 10.
Steele, Edwin G. (See Sutton, H. M., and Steele.)
Steele, Walter L. (See Sutton, H. M., and Steele.)
Stein, Harry B., Chicago, Ill. Door and jamb construction. 1,677,058; July 10.
Steiner, George A., assignor to Steiner Sales Company, Salt Lake City, Utah. Towel cabinet. Re17,031; July 10.
Steiner Sales Company. (See Steiner, George A., assignor.)
Stephens, Andrew J., Kansas City, Mo. Rubber stop sign. 1,676,843; July 10.
Stergianopulos, Demetrios P., New York, N. Y. Portable lamp attachment. 1,676,934; July 10.
Sterling Motor Truck Company. (See Wollensak, A. C., Jacobs, and Baldus, assignors.)
Stevens, Fred N., Salem, Va. Roofing tongs. 1,676,844; July 10.
Stevens, Horace D., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Flap-trimming machine. 1,676,807; July 10.
Stewart, Franklin W., Chicago, Ill. Combined steering wheel and ignition lock. 1,676,416. July 10.
Stewart-Warner Speedometer Corporation. (See Van Guilder, Walter, assignor.)
Stewart, William C., Swampscott, Mass., assignor to United Shoe Machinery Corporation, Patterson, N. J. Heel-seat-fitting machine. 1,676,297; July 10.
Stieglitz, Henry M., assignor to Frank Adam Electric Co., St. Louis, Mo. Outlet box. 1,676,298; July 10.
Stock, Johann J. F., Munich, Germany. Device for cleaning and smoothing films and the like. 1,676,299; July 10.
Stöckemann, Ernst, Berlin-Tempelhof, Germany. Stageless change-speed gearing. 1,676,367; July 10.
Stoltz, Charles E. (See Schieler, Harry H., assignor.)
Stone, Howard B., London, England. Filing post for loose-leaf ledgers and like binders. 1,676,968; July 10.
Straub, Fritz, de Montmollin, Basel, and M. Schmid, Riehen, near Basel, assignor to the firm Society of Chemical Industry in Basle, Basel, Switzerland. Chromium compound of pyrazolone-azo-dyestuff and making same. 1,676,581; July 10.
Straus, Nathan, & Sons, Inc. (See Rampfel, Heinrich, assignor.)
Straw, Walter E., Keene, Tex. Brooder. 1,676,583; July 10.
Strecter, Albert B., assignor to Dual Motors Corporation, New York, N. Y. Air compressor for internal-combustion engines. 1,677,057; July 10.
String, Joseph S., East Orange, assignor to J. S. & J. F. String Incorporated, Newark, N. J. Hydrocarbon-burner system. 1,676,877; July 10.
String, J. S. & J. F., Incorporated. (See String, Joseph S., assignor.)
Stromberg Electric Company. (See Crook, C. M., and Long, assignors.)
Stroup, Everett P. (See Cook, W. A., and Stroup.)
Stuart, Donald R., Omaha, Nebr. Corner piece for buildings. 1,676,582; July 10.
Stuart, Harve R., assignor to The Robbins & Myers Company, Springfield, Ohio. Oscillating fan. 1,676,467; July 10.
Studebaker Corporation, The. (See Breneman, Paul E., assignor.)
Stuler, Rudolph W., McKeesport, Pa. Furnace for heating metal sheets and plates. 1,676,590; July 10.
Stumpf, Johann, Berlin, Germany. Delivering preheated feedwater. Re17,032; July 10.
Süddeutschen Telephone-Apparate-Kabel- u. Drahtwerke Aktien Gesellschaft. (See Liebert, Gustav, assignor.)
Summers, Ivan H., Lynn, Mass., assignors to General Electric Company. Coil winding. 1,677,007; July 10.
Sunbeam Electric Manufacturing Company. (See Jones, L. B., and Werzner, assignors.)
Ktien Gesellschaft. (See Liebert, Gustav, assignor.
Sunset Feather Company. (See Simmen, Frank P., assignor.)
Superheater Company. The. (See Broide, Benjamin, assignor.)
Superheater Company, The. (See Brooks, C. E., and Brandt.)
Superheater Company, The. (See Oatley, Henry B., assignor.)
Sutton, Henry M., and W. L. and E. G. Steele, Dallas, Tex. One-fan combined dust-collecting and air-supply system for pneumatic separators and cleaners. 1,676,969; July 10.
Sved, Alexander, New York, N. Y. Incandescent electric lamp. 1,676,300; July 10.
Taumac Corporation, The. (See Zuschlag, Theodor, assignor.)
Taussig, John H., assignor to The U. G. I. Contracting Company, Philadelphia, Pa. Automatic control for water-gas sets. 1,677,102; July 10.
Taylor, Charles, et al. (See Burroughes, William J., assignor.)
Taylor, Cyrus. (See Bergmann, C. N., and E. Z. and C. Taylor.)
Taylor, Elmer Z. (See Bergmann, C. N., and E. Z. and C. Taylor.)
Taylor, George C., Philadelphia, Pa., assignor to Westinghouse Electric & Manufacturing Company. Power plant. 1,676,935; July 10.
Taylor Instrument Companies. (See Stalker, Frederick W., assignor.)
Taylor, James H., assignor of one-half to W. T. Teeden, jr., Devon Conn. Shock absorber for motor vehicles. 1,676,808; July 10.
Teachers College. (See Heft, H. L., Van Arsdale, and Shank, assignors.)
Tebbs, Paul M., Harrisburg, Pa. Electrical contactor. 1,677,059; July 10.
Teeden, William T., jr. (See Taylor, James H., assignor.)
Teisher, Austin A., assignor to The Goodyear Tire & Rubber Company, Akron, Ohio. Belt and making the same. 1,676,845; July 10.
Thomas, Albert H., Louisville, Ky. Tire spreader. 1,676,970; July 10.
Thorne, Joseph G., Barnum, Minn. Door fastener. 1,677,060; July 10.
Tibbetts, Milton, assignor to Packard Motor Car Company, Detroit, Mich. Motor vehicle. 1,676,878; July 10.

Tice, Percival S., Chicago, Ill. Internal-combustion engine temperature control. 1,677,103; July 10.
Tideman, Selim N., Wilmette, Ill., assignor to Pierce Electric Company. Stringing conductors. 1,676,584; July 10.
Tiefenbacher, Thomas B., North Elizabeth, N. J. Locking coupling. 1,676,585; July 10.
Timken Roller Bearing Company, The. (See Frank, Pardee H., assignor.)
Timken Roller Bearing Company, The. (See Wallin, Philip, assignor.)
Titusville, Forge Company. (See Montgomery, Gustavus A., assignor.)
Todd, James A. (See Estill, S. C., and Todd.)
Toman, James, Chicago, Ill. Velocipede. 1,677,061; July 10.
Toomey, John F., New York, N. Y., assignor to American Telephone and Telegraph Company. Program-transmission system for apartment houses. 1,676,301; July 10.
Toth, Stephen. (See Cesar, Gyula, assignor.)
Townsend, George R., Schenectady, N. Y., assignor to General Electric Company. Rotary switch mechanism. 1,677,008; July 10.
Trevino, Diana R., Rome, Tex. Garment hanger. 1,676,936; July 10.
True, Edwin S., Oak Park, Ill. Electrical condenser. 1,676,417; July 10.
Trumble, Milon J., Los Angeles, Calif. Recovering light hydrocarbons from carbonaceous material. 1,676,675; July 10.
Tryco Products, Inc. (See Holmes, Franklin T., assignor.)
Turner, Erven R., assignor to C. B. Grant, Memphis, Tenn. Multiple lock. 1,676,623; July 10.
Turner, George F., Mahoningtown, Pa. Air-compression-cylinder lubricator. 1,676,586; July 10.
U. G. I. Contracting Company. (See Taussig, John H., assignor.)
Uhlig, Richard W., Newark, N. J., assignor to Albert Voigt, Brooklyn, N. Y. Typewriting machine. 1,676,809; July 10.
Ulmer, Joseph A., Los Angeles, Calif. Ignition device for smudge pots. 1,676,368; July 10.
Ulrich, Charles B., assignor to Art Metal Construction Company, Jamestown, N. Y. Posting bus or truck. 1,676,810; July 10.
Ulrich, William S. L., Grafton, Ill. Tractor. 1,676,622; July 10.
Ulrich, William S. L., Grafton, Ill. Tractor mechanism. 1,676,624; July 10.
Underwood Elliott Fisher Company. (See Hexter, Julian S., assignor.)
Unger, Ernest. (See Shaw, Louis E., assignor.)
Union Switch & Signal Co. (See Field, Oscar S., assignor.)
Union Switch & Signal Company, The. (See Lucas, Samuel M., assignor.)
Union Switch & Signal Company, The. (See Snavely, C. S., and Wells, assignors.)
United Shoe Machinery Corporation. (See Glidden, Harvey L., assignor.)
United Shoe Machinery Corporation. (See Hadaway, John B., assignor.)
United Shoe Machinery Corporation. (See Lund, Thomas, assignor.)
United Shoe Machinery Corporation. (See Pope, Elmer R., assignor.)
United Shoe Machinery Corporation. (See Simmons, Ralph C., assignor.)
United Shoe Machinery Corporation. (See Stewart, William C., assignor.)
United States Gypsum Company. (See Birdsey, Charles R., assignor.)
U. S. Industrial Alcohol Co. (See Keyes, Donald B., assignor.)
Universal Button Fastening and Button Company. (See Clark, John M., assignor.)
Universal Oil Products Company. (See Pollock, Robert T., assignor.)
Upton, Albert P. (See Goldsborough, Paul, assignor.)
Valveless Oil Burner Corporation. (See Stancliffe, Cecil W., assignor.)
Van Arsdale, May B. (See Heft, H. L., Van Arsdale, and Shank.)
Van Arnan Manufacturing Company. (See Hess, William J., assignor.)
Van der Poel, Johannes M., Eindhoven, Netherlands, assignor to General Electric Company. Exhaust machine. 1,676,302; July 10.
Vanderveld, Anthony, assignor of one-half to H. B. Parrish, Grand Rapids, Mich. Pedestal mounting. 1,676,508; July 10.
Vanderveld, Anthony, assignor of one-half to H. B. Parrish, Grand Rapids, Mich. Cloth-measuring machine. 1,676,587; July 10.
Van Guilder, Walter, assignor to Stewart-Warner Speedometer Corporation, Chicago, Ill. Vehicle searchlight mounting. 1,676,750; July 10.
Van Hise, Lester E., Altadena, assignor to J. V. Baldwin, Los Angeles, Calif. Fuel-feed system for internal-combustion engines. 1,676,751; July 10.
Van Hise, Lester E., Los Angeles, Calif.; said Van Hise assignor to J. V. Baldwin. Internal-combustion engine. 1,676,811; July 10.
Van Zyl, Cornelius, Sheldon, Iowa. Machine for stapling chick boxes. 1,676,718; July 10.
Verdan, Charles, Strasbourg, and L. M. J. Loiseau, Paris, France, assignors to Compagnie Francaise pour l'Exploitation des Procedes Thompson-Houston and Ateliers J. Carpentier. Signaling system applicable to telegraphy and telemechanical transmission. 1,677,062; July 10.
Victor Talking Machine Company. (See Moyer, William W., assignor.)
Victory, William J., assignor to New Britain Machine Company, New Britain, Conn. Speed-handle wrench extension. 1,676,370; July 10.
Vidarshof, Eric E., Westby, Wis. Adjustable boring-bar holder. 1,676,937; July 10.
Vincent, Harry S., Ridgewood, N. J., assignor to Franklin Railway Supply Company. Locomotive booster apparatus. 1,676,509; July 10.
Vincent, Jesse G., assignor to Packard Motor Car Company, Detroit, Mich. Internal-combustion engine. 1,676,369; July 10.
Vincent, Jesse G., Dayton, Ohio, assignor to Packard Motor Car Company, Detroit, Mich. Hydrocarbon motor. 1,676,418; July 10.
Vitale, Ralph. (See Romano, A., and Vitale.)
Voices, Incorporated. (See Konoff, Alexander, assignor.)
Voigt, Albert. (See Uhlig, Richard W., assignor.)
Volwiler, Ernest H. (See Adams, R., and Volwiler.)
Von Bogdandy, Stephan. (See Polanyi, M., and von Bogdandy.)
Von Eberhard, Otto, Essen, assignor to Fried. Krupp Aktiengesellschaft, Essen-on-the-Ruhr, Germany. Milling cutter. 1,676,719; July 10.
Von Hofen, Frederick G. (See Axtell, J. M., and Von Hofen.)
Wackerle, Lewis E., Waukegan, Ill., assignor to Chicago Hardware Foundry Company, North Chicago, Ill. Table. Des. 75,754; July 10.
Wagenhorst, James H., Jackson, Mich. Vehicle wheel. 1,676,303; July 10.
Wagner, Emanuel E., Lamar, Mo. Gauge tool. 1,677,063; July 10.
Waldo, Richard H. (See Anderson, J. G., and Waldo.)
Walker, Warren R., Great Kills, N. Y., assignor to Cooper Hewitt Electric Company, Hoboken, N. J. Electric switch. 1,676,752; July 10.
Walker, Warren R., Great Kills, N. Y., assignor to Cooper Hewitt Electric Company, Hoboken, N. J. Liquid-flow switch. 1,676,753; July 10.
Walker, Warren R., Great Kills, N. Y., assignor to Cooper Hewitt Electric Company, Hoboken, N. J. Mercury switch. 1,676,754; July 10.
Walker, William L., New York, N. Y. Sound transmitter. 1,676,625; July 10.
Wallin, Philip, assignor to The Timken Roller Bearing Company, Canton, Ohio. Gauging machine. 1,676,879; July 10.
Wallis, John S., Great Neck, N. Y., assignor to Franklin Railway Supply Company. Lateral motion for axle boxes. 1,676,588; July 10.
Walstad, Adolph N., Tacoma, Wash. Hinge. 1,676,589; July 10.
Walter, Harrison B., assignor, by mesne assignments, to Container Corporation of America, Chicago, Ill. Packing doors, frames, and the like. 1,676,304; July 10.
Walton, Alfred L., Blackpool, England. Game apparatus. 1,676,755; July 10.
Wanamaker, John, New York. (See Anderson, J. G., and Waldo, assignors.)
Warner Gear Company. (See White, Samuel O., assignor.)
Warp Compressing Machine Company. (See Longvall, Raymond C., assignor.)
Warren, Glenn B. (See Buckland, B. O., and Warren.)
Warwick, Harold L., Fort Worth, Tex. Teaching the deaf to hear and mutes to speak. 1,676,716; July 10.
Washburn Company, The. (See Williams, Myrl J., assignor.)
Waterman, Nixon, Canton, Mass. Plant support. 1,676,468; July 10.
Waters-Genter Company. (See Forbes, Thomas C., assignor.)
Watson, Charles S., Toronto, Ontario, Canada. Closure for containers. 1,676,846; July 10.
Watt, James A. D., London, England. Fastening for boxes or cases containing rotary sharpening apparatus for razors and edge tools. 1,677,064; July 10.
Weaver, Arthur B., Philadelphia, Pa., assignor to General Electric Company. Pull-button-controlling switch. 1,676,971; July 10.
Weichsel, Arthur J., New York, N. Y. Rotary container. 1,676,756; July 10.
Weiland, Alfred, Neshanic, N. J., assignor to Pneumatic Appliance Corporation, New York, N. Y. Universal joint. 1,676,676; July 10.
Weiss, John P., South Bend, Ind. Electric table lamp. Des. 75,753; July 10.
Welch, Abraham L., assignor of one-half to A. B. McClelland, Rush Run, W. Va. Securing device for miners' lamps. 1,676,972; July 10.

Welcomer, Harry C., Steelton, Pa. Electrical water heater. 1,676,510; July 10.
Weldon, Roy V., assignor to Great Northern Paper Company, Millinocket, Me. Paper making. 1,676,305; July 10.
Weller, John H., Cadillac, Mich. Vaporized gas and air starter for automobiles and the like. 1,676,591; July 10.
Wells, Clinton. (See Zimmerman, F. D., and Wells.)
Wells, Wesley B. (See Snavely, C. S., and Wells.)
Welte-Mignon Corporation. (See Cheek, Tolbert F., assignor.)
Werzner, Edward H. (See Jones, L. B., Werzner.)
Wesley, Joseph A., assignor to Lu-Mi-Nus Signs, Inc., Chicago, Ill. Advertising sign. Des. 75,756; July 10.
West, Oscar E., New Orleans, La. Apparatus for trimming grain. 1,676,757; July 10.
Western Battery & Supply Company, The, et al. (See Jones, Hugh J., assignor.)
Western Electric Company. (See Albright, Henry F., jr., assignor.)
Western Electric Company. (See Hart, Carl D., assignor.)
Western Electric Company. (See Heising, Ryamond A., assignor.)
Western Electric Company. (See Lamplough, Leslie F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Fechheimer, Carl J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Johnson, Josiah F., assignor.)
Westinghouse Electric & Manufacturing Company. (See Morgan, David W. R., assignor.)
Westinghouse Electric & Manufacturing Company. (See Taylor, George C., assignor.)
Westinghouse Lamp Company. (See Higgins, John J., assignor.)
Westinghouse Lamp Company. (See Rentschler, H. C., and Marden, assignors.)
Whitaker, William D., Elkins Park, Pa. Mop. 1,676,880; July 10.
White, Alvah C. (See Finch, Paul R., assignor.)
White, Edward A., Lewiston, Idaho. Fruit-cleaning apparatus. 1,676,306; July 10.
White, James S., Chicago, Ill. Golf bag. 1,676,592; July 10.
White Motor Company, The. (See Churcher, William B., assignor.)
White Motor Company, The. (See Schron, Christy, assignor.)
White, Samuel O., assignor to Warner Gear Company, Muncie, Ind. Auxiliary transmission. 1,676,758; July 10.
White, William E., Chicago, Ill. Bar clip. 1,677,066; July 10.
Whitney, Clarence E., et al., executors. (See Hanson, Bengt M. W.)
Wicks, John, Oak Park, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic telephone system. 1,676,469; July 10.
Widmer, Gustave. (See Gama, A., and Widmer.)
Widmer, Howard G., Brooklyn, assignor to Arkell Safety Bag Company, New York, N. Y. Process and mechanism for producing stretchable paper. 1,676,759; July 10.
Wildhaber, Ernest, Brooklyn, assignor to Gleason Works, Rochester, N. Y. Method of and machine for producing gears. 1,676,371; July 10.
Wildhaber, Ernest, Rochester, N. Y., assignor to Gleason Works, Rochester, N. Y. Method of and machine for producing gears. 1,676,419; July 10.
Wilhelm, Herman, New York, N. Y. Boudoir slipper. Des. 75,757; July 10.
Willamette Iron and Steel Works. (See Eastham, Joseph S., assignor.)
Williams, Myrl J., Chicago, Ill., assignor to The Washburn Company, Worcester, Mass. Support. 1,676,372; July 10.
Williams, Noble W., assignor to Hardwick & Magee Company, Philadelphia, Pa. Carpet. Des. 75,758; July 10.
Wilson, Edward P. (See Neal, S. G., Astle, and Wilson.)
Wilson, Fred D. (See Wilson, Horace R. and F. D.)
Wilson-Haffenden, James, London, England. Hand iron. 1,677,065; July 10.
Wilson, Horace R. and F. D., Harvey, Ill. Road grader. 1,676,938; July 10.
Wilson, John A., Windsor, Ontario, Canada. Goggles. 1,676,760; July 10.
Wilson, Robert E., Chicago, Ill., assignor to Standard Oil Company, Whiting, Ind. Distilling hydrocarbon oils. 1,676,610; July 10.
Wiltsie, Oliver E., Troy, N. Y. Adjustable releasing device. 1,677,009; July 10.
Winninghoff, Wilford J. (See Malley, R. D., and Winninghoff.)
Winter, August P., assignor, by mesne assignments, to S. C. Clow, Minneapolis, Minn. Grate for dump pits. 1,676,307; July 10.
Winters, Alexander F., Grand Rapids, Mich. Cupboard latch. 1,676,593; July 10.
Wireless Specialty Apparatus Company. (See Pickard, Greenleaf W., assignor.)
Withrow, Robert B. (See Sperti, G., Norris, Withrow, and Schneider.)
Wittel, Otto, assignor to Eastman Kodak Company, Rochester, N. Y. Motion-picture mechanism. 1,676,594; July 10.
Wittel, Otto, assignor to Eastman Kodak Company, Rochester, N. Y. Optical unit for cameras. 1,676,595; July 10.
Wittel, Otto, assignor to Eastman Kodak Company, Rochester, N. Y. Spring motor. 1,676,596; July 10.
Wollensak, Arthur C., A. Jacobs, and P. C. Baldus, assignors to Sterling Motor Truck Company, Milwaukee, Wis. Brake. 1,676,761; July 10.
Woltz, Albert M., Baltimore, Md., assignor, by mesne assignments, to Grand Rapids Store Equipment Corporation, Grand Rapids, Mich. Division-board support. 1,676,373; July 10.
Wood, Sidney C., Brooklyn, assignor of one-half to Wallace E. J. Collins, Huntington, Long Island, N. Y. Sanitary syringe nozzle. 1,676,308; July 10.
Wood, Wilfred R., London, England, assignor to International Combustion Engineering Corporation, New York, N. Y. Pulverized-fuel burner. 1,676,511; July 10.
Woodin, William H., jr., Plainfield, N. J. Combination sink unit. 1,676,717; July 10.
Woodman, Walter S., Macclesfield, England, assignor to Meakin & Ridgeway, Inc., New York, N. Y. Plate or similar article. Des. 75,759; July 10.
Wright, John H., Larchmont, assignor to Zonite Products Company, New York, N. Y. Antiseptic preparation. 1,676,309; July 10.
Yeager, Fay A., assignor to J. R. M. Knudsen, Muskegon, Mich. Window construction. 1,676,597; July 10.
Young, Thomas. (See Pagenhart, Bejamin F., assignor.)
Zarth, Henry F., assignor to American Range Corporation, Shakopee, Minn. Range. Des. 75,760; July 10.
Zerk, Oscar U., Chicago, Ill., assignor, by mesne assignments, to The Bassick Manufacturing Company. Lubricating-dispensing apparatus. 1,676,626; July 10.
Zerweck, Werner. (See Herz, R., Schuite, and Zerweck.)
Zimmermann, Fred D., and C. Wells, Mount Clare, Nebr., said Wells assignor to said Zimmermann. Automatic all-weather-strip. 1,677,067; July 10.
Zimmermann, Lillie, Fond du Lac, Wis. Card game. 1,677,010; July 10.
Zimmermann, William F., Maplewood, assignor to Gould & Eberhardt, Newark, N. J. Adjustable spindle bearing for hobbing machines. 1,676,310; July 10.
Zimmermann, William F., Maplewood, assignor to Gould & Eberhardt, Newark, N. J. Cross-rail guard. 1,676,311; July 10.
Zonite Products Company. (See Wright, John H., assignor.)
Zoss Ladder Works. (See Schulzke, Richard F., assignor.)
Zuschlag, Theodor, assignor to The Taumac Corporation, New York, N. Y. Method and apparatus for exploring subterranean strata. 1,676,847; July 10.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 10TH DAY OF JULY, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Accelerator, Vulcanizing caoutchouc and product thereof. L. B. Sebrell. 1,676,838; July 10.
Acid, Making acetic. H. W. Matheson. 1,676,454; July 10.
Acids, Converting cyannaphthalene sulphonic. R. Herz, F. Schulte, and W. Zerweck. 1,676,692; July 10.
Acids, Converting cyannaphthalene sulphonic. R. Herz, F. Schulte, and W. Zerweck. 1,677,086; July 10.
Acids, Production of esters of aromatic. R. Adams and E. H. Volwiler. 1,676,470; July 10.
Adding machine and cash register, Duplex. E. Kassner. 1,676,559; July 10.
Advertisement carrier. A. Deutschmeister. 1,677,022; July 10.
Aerial. G. R. Conrad. 1,676,524; July 10.
Air bag, Sectional. R. S. Burdette. 1,676,817; July 10
Air-brake apparatus. S. G. Neal. Re17,026; July 10.
Air-brake apparatus. S. G. Neal. Re17,028–9; July 10.
Air-brake apparatus. S. G. Neal, W. Astle, and E. P. Wilson. Re17,027; July 10.
Air cooler. D. J. Besse. 1,677,070; July 10.
Aircraft. C. S. Hall. 1,676,549; July 10.
Aircraft motor. C. E. Quick. 1,676,667; July 10.
Air-flow phenomena, Visualizing. E. N. Fales and F. W. Caldwell. 1,676,984; July 10.
Air-pressure brake. E. Krehann. 1,677,033; July 10.
Airships, Gas cell for rigid. H. R. Liebert and E Schoettel. 1,676,832; July 10.
Alarm: *See*—
Overflow alarm.
Alarm bell, Arrangement for the better exhaust and use of the explosion of the motor gas in order to operate an. G. Nocito. 1,676,346; July 10.
Alcohol and the like, Dehydrating. W. K. Lewis. 1,676,700; July 10.
Alcohol, Obtaining absolute. D. B. Keyes. 1,676,735; July 10.
Alloy. A. G. C. Gwyer and H. W. L. Phillips. 1,676,856; July 10.
Alloys, Copper chromium ferrous. B. D. Saklatwalla. 1,676,929; July 10.
Alloys, Determining the composition of copper and zinc. M. Polanyi and S. von Bogdandy. 1,676,709; July 10.
Amalgam plugger. E. M. Snyder. 1,676,715; July 10.
Amusement device, Rotary. E. E. Clark. 1,676,522; July 10.
Amylyl resorcinol, Normal. A. R. L. Dohme. 1,677,116; July 10.
Antiseptic preparation. J. H. Wright. 1,676,309; July 10.
Applicator, Quartz. E. R. Berry. 1,677,016; July 10.
Arch support. P. Saperston. 1,676,415; July 10.
Arch support, Foot-. P. Langemann. 1,676,398; July 10.
Armature mounting for vibratory units, Eccentrically-pivoted. G. F. Borkman. 1,676,380; July 10.
Arrangement for closing boxes. A. C. Petersen. 1,676,868; July 10.
Assembling device for cardcases. C. L'Enfant. 1,676,338; July 10.
Assembling machine, Blank-. T. Lund. 1,676,341; July 10.
Atomizer. A. J. Shaukis. 1,677,053; July 10.
Attaching machine. E. R. Pope. 1,676,283; July 10.
Automobile alarm signal. W. A. Pervier, 1,676,412; July 10.
Automobile body construction. A. Carlson, 1,676,476; July 10.
Automobile hood illumination. C. K. Denman 1,676,431; July 10.
Automobile signal. H. E. Sanderson. 1,676,287; July 10.
Automobiles, Shock-absorbing means for. E. Conti. 1,676,525; July 10.
Awning. G. R. Hall. 1,677,080; July 10.
Axle boxes, Lateral motion for. J. S. Wallis. 1,676,588; July 10.
Baby walker. E. Boehm. Des. 75,715; July 10.
Back support for baths. A. E. Sachsse. 1,676,354; July 10.
Bag: *See*—
Golf bag.
Baking attachment. L. H. Larsen. 1,676,830; July 10.
Bar clip. W. E. White. 1,677,066; July 10.
Bar holder, Adjustable boring. E. E. Vidarshof. 1,676,937; July 10.
Barometric device. I. I. Bremeeff. 1,676,983; July 10.
Battery: *See*—
Dry-cell battery.
Battery connecter. A. C. De Lorme. 1,676,387; July 10.
Battery switch. H. Hubbell, jr. 1,676,608; July 10.
Beam or pole structure. C. M. Goodrich. 1,676,824; July 10.
Bean separator. C. S. Benton. 1,677,015; July 10.
Bearing. W. Schwemlein. 1,676,292; July 10.
Bearing, Crown. R. D. Bobbitt. 1,677,071; July 10
Bearing for hobbing machines, Adjustable spindle. W. F. Zimmermann. 1,676,310; July 10.
Bearing, Line-shaft. H. Krause. 1,676,784; July 10.
Bearing plate for rail anchors. B. M. Cheney. 1,676,888; July 10.
Bearing, Shaft. P. H. Frank. 1,676,894; July 10.
Bed for automobiles of the sedan type, Portable. J. M. Line. 1,676,987; July 10.
Belt and making the same. A. A. Teisher. 1,676,845; July 10.
Belt, Sanitary. E. M., Schlosser. 1,676,288; July 10.
Beveling machine. W. J. Knoll. 1,676,336; July 10.
Binder, Brick or tile veneer. S. C. Estill and J. A. Todd. 1,676,535; July 10.
Binding machine, Rotary. J. M. Leaver, jr. 1,676,956; July 10.
Bins, Construction in. A. H. Levene. 1,676,908; July 10.
Bit: *See*—
Core-drill bit.
Block: *See*—
Picture block. Structural block.
Blowtorch burner. C. Rueckert. 1,676,352; July 10.
Board: *See*—
Composite board. Drainage board.
Body construction. P. E. Breneman. 1,676,599; July 10.
Boiler: *See*—
Water-tube boiler.
Boiler bottom. W. J. Burroughes. 1,676,320; July 10.
Book-corner protector. J. Moskowitz. 1,676,741; July 10.
Book end. H. L. Steeb. Des. 75,753; July 10.
Borosilicate glass, Heat-resistant. L. Hochstein. 1,676,331; July 10.
Bottle. G. N. Mas. Des. 75,741; July 10.
Bottle cap and fastener. B. R. Mediati. 1,676,998; July 10.
Bottle or similar container, Perfume. J. Popper. Des. 75,747; July 10.
Bottles and other glass hollow ware, Apparatus for the Manufacture of. G. De Renzis. 1,676,981; July 10.
Bowl, Soup. K. Lickhard. Des. 75,738; July 10.
Box: *See*—
Golf-ball box. Outlet box.
Locomotive fire box.
Bracelet. J. A. Payette. 1,676,706; July 10.
Bracelet clasp. P. W. Jones. 1,676,695; July 10.
Bracket for electric wires, Guard. L. E. Davison. 1,676,944; July 10.
Brake: *See*—
Air-pressure brake.
Brake. J. Eaton. 1,677,024; July 10.
Brake. A. C. Wollensak, A. Jacobs, and P. C. Baldus. 1,676,761; July 10.
Brake mechanism for traction devices of the endless-belt type. B. F. Pagenhart. 1,677,047; July 10.
Bread proofer. J. M. Morrill. 1,677,043; July 10.
Brick display case. W. C. Koch. 1,676,445; July 10.
Bridge, Ferry. P. C. Kelly and H. A. Landis. 1,676,993; July 10.
Brooder. W. E. Straw. 1,676,583; July 10.
Brush. E. F. Astley. 1,676,812; July 10.
Brush construction. A. M. Jensen. 1,676,557; July 10.
Brush, Fountain. J. J. Chéron. 1,676,857; July 10.
Brush machines, Handle-feeding mechanism for. W. S. Elliot and G. E. Lindgren. 1,676,639; July 10.
Brush machines, Shifting device for positioning mechanism for. W. S. Elliot. 1,676,640; July 10.
Brush mounting for suction cleaners. B. B. Jackson. 1,676,782; July 10.
Buffet. C. Holt. Des. 75,731; July 10.
Building front, Sub or removable. H. W. Lawrence. 1,676,498; July 10.
Building material. G. Cohen. 1,677,073; July 10.
Bull wheel. C. B. Pritchard. 1,676,925; July 10.
Bumper, Automobile. H. Scuterud. 1,676,749; July 10.
Burner: *See*—
Blowtorch burner. Gas-range burner.
Gas burner. Oil burner.
Burner. G. F. Moors. 1,676,501; July 10.
Bus or truck, Posting. C. B. Ulrich. 1,676,810; July 10.

Button, Press. V. Puc. 1,676,710; July 10.
Cabinet and locker. F. Albach. 1,676,235; July 10.
Cabinet, Display. M. C. Sapinsley. 1,676,356; July 10.
Cabinet for bottled beverages, Dispensing. L. G. Gray. Des. 75,724; July 10.
Cabinet, Towel. G. A. Steiner. Re17,031; July 10.
Calculating time, Device for. F. C. Meacham. 1,676,912; July 10.
Calling device. H. H. Ide. 1,676,392; July 10.
Camera finder. C. W. Frederick. 1,676,540; July 10.
Camera shutter. M. E. Cuendet. 1,676,529; July 10.
Can: *See*—
Cracker can. Refuse can.
Can. E. A. Reap. 1,676,711; July 10.
Can opener. H. H. Carter. 1,676,520; July 10.
Cap opener. A. Podel. 1,676,649; July 10.
Car, Railway. W. O. McKamey. 1,676,343; July 10.
Carbureters, Arrangement for eliminating the dangers due to back fires in. P. Casati and A. Antoniola. 1,677,019; July 10.
Carbureting device. H. W. Spiller. 1,676,932; July 10.
Carburetion system for internal-combustion engines. S. H. La Plant. 1,676,503; July 10.
Card rack. G. L. Goodwin. 1,676,492; July 10.
Carding machine. J. Schmitt. 1,676,577; July 10.
Carpet. N. W. Williams. Des. 75,758; July 10.
Carriage, Baby. E. J. Adams. 1,677,011; July 10.
Carrier: *See*—
Advertisement carrier.
Sample and pamphlet carrier.
Carton, Egg. W. A. Schurmann. 1,676,872; July 10.
Case: *See*—
Brick display case.
Casing for advertising device. E. O. Little. Des. 75,739; July 10.
Casing, Vending-machine. S. Hinds. Des. 75,729; July 10.
Cathodes, Manufacturing electron-emitting. G. Llebert. 1,676,701; July 10.
Cellulose digesters and the like and means therefor, Charging. P. A. Fresk. 1,676,691; July 10.
Cellulose ester composition. R. L. Kramer. 1,676,612; July 10.
Ceramic products in the course of their production, Supporting and exposing. T. C. and W. O. Prouty. 1,676,799; July 10.
Chain construction. R. S. Kelson. 1,676,863; July 10
Chair and window seat, Combination. P. Baumgarten. 1,676,723; July 10.
Chandelier, Heater-supporting. L. E. Shaw. 1,677,054; July 10.
Chart, Accounting-machine demonstration. J. S. Hexter. 1,677,087; July 10.
Chart, Educational. E. F. Felty. 1,676,328; July 10.
Chimney. W. E. Gilson. 1,676,544; July 10.
Chromium compound of pyrazolone-azo-dyestuff and making same. F. Straub, G. de Montmollin, and M. Schmid. 1,676,581; July 10.
Chuck-operating mechanism. J. E. Baines and J. P. Bosle. 1,676,814; July 10.
Cigarette and match box, Combination. R. A. Kratochwill. 1,677,036; July 10.
Cigarette and match dispenser. R. D. Mills, jr. 1,677,041; July 10.
Cinder-notch stopper. J. Dewar. 1,676,530; July 10.
Circuit-breaker system, Automatic reclosing. A. E. Anderson. 1,676,313–16; July 10.
Circuit-breaker system, Automatic reclosing. A. E. Anderson. 1,676,974; July 10.
Circuits, Vacuum-tube. L. M. Hull. 1,677,090; July 10.
Clamp: *See*—
Work clamp.
Clasp: *See*—
Bracelet clasp.
Cleaner: *See*—
Tray cleaner. Vacuum cleaner.
Cleaning and smoothing films and the like, Device for. J. J. F. Stock. 1,676,299; July 10.
Cleaning apparatus, Fruit-. E. A. White. 1,676,306; July 10.
Cleaning paper stock, Apparatus and process for. C. L. Keller. 1,676,652; July 10.
Cleaning slag pockets, Apparatus for. J. Horne. 1,676,555; July 10.
Cleaning soaking drums. H. W. Fletcher. 1,676,389; July 10.
Clip: *See*—
Bar clip.
Closet tank. J. B. Coxon. Des. 75,721; July 10.
Closure for containers. C. S. Watson. 1,676,846; July 10.
Closure, Removable. G. Breidenbach. 1,676,879; July 10.
Clothesline pole and reel. O. Kanawyer and H. Keener. 1,676,696; July 10.
Clutches, Mechanism for operating winding-drum friction. R. H. Beaumont. 1,676,765; July 10.
Coin-selecting mechanism. C. J. Paulson. 1,676,914; July 10.
Coil winding. I. H. Summers. 1,677,007; July 10.
Coke briquettes for metallurgical uses, Making synthetic carbonaceous. B. E. Crocker. 1,676,729; July 10.
Coloring matters, Manufacture of trisazole. O. Knecht and H. Brütsch. 1,676,562; July 10.
Colors, Applying, blending, and setting. O. S. Marckworth. 1,676,739; July 10.
Comb in combing machines. J. W. Nasmith. 1,676,702; July 10.
Combination hanger. A. F. Ladwig. 1,676,737; July 10.
Comfort cushion. C. Murphy. 1,676,962; July 10.
Commutators, Manufacture of. R. G. Jones. 1,676,442; July 10.
Compass, Beam. F. Schwartz. 1,676,359; July 10.
Compensated meter. A. G. Grier. 1,677,025; July 10
Composite board. J. D. Carter. 1,676,727; July 10.
Compounding ingredients of a chemical paint remover O. L. Fluegel. 1,676,642; July 10.
Compressor and pump. C. H. Lusk. 1,676,789; July 10.
Compressor for internal-combustion engines, Air. A. B. Streeter. 1,677,057; July 10.
Condensation product of urea and formaldehyde and making same. A. Gams and G. Widmer. 1,676,543; July 10.
Condenser. D. W. R. Morgan. 1,676,740; July 10.
Condenser, Electrical. E. S. True. 1,676,417; July 10.
Condenser, Variable. E. G. Danielson. 1,677,020; July 10.
Conductor, Stringing. S. N. Tideman. 1,676,584; July 10.
Conduit for electric conductors. O. A. Frederickson. 1,676,486; July 10.
Container, Display. G. E. Parmenter. 1,676,917; July 10.
Container for treating meats, Openwork. F. Briggs. 1,676,816; July 10.
Container, Metallic. J. A. Jensen. 1,677,100; July 10.
Container, Refrigerant. G. J. Gruendler. 1,676,494; July 10.
Container, Rotary. A. J. Welchsel. 1,676,756; July 10.
Contrapropeller, Removable. O. Overguard. 1,676,409; July 10.
Control for water-gas jets, Automatic. J. H. Taussig. 1,677,102; July 10.
Control mechanism. R. C. Lamond. 1,676,994; July 10.
Controlling switch, Pull-button-. A. B. Weaver. 1,676,971; July 10.
Conveyer. W. J. Bohn. 1,676,978; July 10.
Conveyer. J. D. Crummey, W. J. Austin, and F. H. Lewis. 1,676,481; July 10.
Conveyer for corn harvesters. A. Olson. 1,676,916; July 10.
Conveying pulverized material, Apparatus for. A. G. Kinyon. 1,677,119; July 10.
Cooking and heating appliance. W. R. Dick. 1,676,603; July 10.
Cooking and heating device, Electric. O. Schaffer. 1,676,669; July 10.
Cooler: *See*—
Air cooler.
Cooler, Beverage. F. L. Look. Des. 75,740; July 10.
Cooling apparatus. R. W. Mumford. 1,676,277; July 10.
Cooling internal-combustion engines, Process of and apparatus for. W. W. Muir. 1,676,961; July 10.
Core-drill bit. J. R. Chamberlin. 1,676,887; July 10.
Corn sheller. F. Osmera. 1,676,573; July 10.
Corner piece for buildings. D. R. Stuart. 1,676,582; July 10.
Counting mechanism. E. G. Beveridge. 1,676,939; July 10.
Coupling: *See*—
Locking coupling. Shaft coupling.
Couplings and the like, Resilient intermediate member for jointed. H. Kattwinkel. 1,676,333; July 10.
Cover back and hinge. G. Mangialetti. 1,676,865; July 10.
Cover for infants' toilets, Seat. G. M. Berentsen. 1,676,243; July 10.
Cracker can, Interchangeable-cover. A. Pittelkow. 1,676,621; July 10.
Cradle. P. W. Anderson. 1,676,420; July 10.
Crane and shovel convertible operating mechanism. L. A. Russell. 1,676,353; July 10.
Cuff for men's shirts, blouses, and the like, Double-sided. J. Lanz. 1,676,397; July 10.
Curtain and portière rod. J. H. Boye. Des. 75,716–18; July 10.
Curtain, Sand-blast. R. Ruemelin. 1,676,576; July 10.
Curtains, Device for porch. N. M. Faulds. 1,676,327; July 10.
Curvilinear fabric. J. V. Moore. 1,677,042; July 10.
Cushion: *See*—
Comfort cushion.
Cutter: *See*—
Milling cutter. Pipe cutter.
Paraffin cutter.
Cutter for ice cream and similar products. R. H. Arrowood. 1,677,115; July 10.
Cutting machine. H. L. Glidden. 1,676,260; July 10.
Cylinder, Engine. G. D. Angle. 1,676,976; July 10.
Cylinder lubricator, Air-compression-. G. F. Turner. 1,676,586; July 10.
Dashpot. G. C. St. John. 1,676,674; July 10.
Defibrating machine. J. Dufour. 1,677,076; July 10.
Denominating machine. J. Harrison. 1,676,731; July 10.
Dental flask. M. L. Axelrod. 1,676,677; July 10.
Derrick. J. D. McEwen. 1,676,271-2; July 10.
Derrick or tower construction, Fabricated-steel. C. B. Foster. 1,676,539; July 10.

Designs upon stones, Producing. G. Di Bona and T. Jellow. 1,676,637; July 10.
Detector: *See*—
Metal detector.
Device for underground prospecting. S. Herr. 1,676,779; July 10.
Diaphragm control for projection printers. J. G. Capstaff. 1,676,600; July 10.
Dirigibly-mounted light. C. Sklarek. 1,676,364; July 10.
Dish or similar article. A. C. Kintz. Des. 75,733–5; July 10.
Dishwasher and soap holder, Combined. F. M. King, sr. 1,676,905; July 10.
Dispenser, Liquid. J. W. Bloodhart. 1,676,851; July 10.
Dispensing apparatus. J. L. Morris. 1,676,833; July 10.
Dispensing apparatus, Lubricating-. O. U. Zerk. 1,676,626; July 10.
Dispensing closure for containers. M. K. O'Leary. 1,676,348; July 10.
Dispensing device. C. R. Schott. 1,676,358; July 10.
Display and vending apparatus. E. Brunhoff. 1,676,682; July 10.
Distillation. A. E. Becker. 1,676,724; July 10.
Distillation of hydrocarbon oils, Continuous. R. D. Hunneman. 1,676,611; July 10.
Distillation residues, Reclaiming. S. P. Coleman and W. S. Hughes. 1,676,687; July 10.
Distilling hydrocarbon oils. R. D. Hunneman. 1,676,609; July 10.
Distilling hydrocarbon oils. R. E. Wilson. 1,676,610; July 10.
Distribution system. A. H. Mittag. 1,676,990; July 10.
Divider or compass. E. L. Rankin. 1,676,964; July 10.
Dockage tester. C. W. Carter. 1,676,519; July 10.
Dolls and other toys, Sounding device for. A. Konoff. 1,676,906; July 10.
Door. E. J. Harditke. 1,676,496; July 10.
Door and jamb construction. H. B. Stein. 1,677,058; July 10.
Doorcheck. G. A. Powell. 1,676,284; July 10.
Door, Sliding. C. C. McGinnis. 1,676,500; July 10.
Door structure, Car-. A. and C. Christiansen. 1,676,426; July 10.
Door, Swinging. W. S. Graff-Baker. 1,676,375; July 10.
Double lock, Permutation. J. Konkus. 1,676,394; July 10.
Drafting table, Universal. M. Reid. 1,676,746; July 10.
Drainage board, Sink. F. S. Corrigan. 1,676,771; July 10.
Drawer mount. C. Bergmann. 1,676,991–2; July 10.
Dredger-frame construction. J. E. Funk. 1,676,645; July 10.
Drier control. A. W. Lissauer. 1,676,786; July 10.
Drilling machine. A. E. Robinson and A. M. Sosa. 1,676,461; July 10.
Driving mechanism. R. Chilton. 1,676,322; July 10.
Dry-cell battery. L. V. Ellis. 1,676,945; July 10.
Drying lumber, Apparatus for. H. L. Henderson. 1,676,552; July 10.
Dyes, Ortho-hydroxyazo. O. Kaltwasser, H. Oehrn, and H. Kirchhoff. 1,676,697; July 10.
Dyestuff and making the same, Hydroxy-naphthalene-arylsulphoester azo. W. Neelmeier. 1,676,407; July 10.
Dyestuff and making the same, Hydroxy-naphthalene-arylsulphoester azo. W. Neelmeier. 1,676,458; July 10.
Edible product and producing same. H. L. Heft, M. B. Van Arsdale, and D. E. Shank. 1,676,899; July 10.
Electric control device. G. F. Schwartz. 1,676,671; July 10.
Electric discharge device. D. M. Moore. 1,677,000; July 10.
Electric machines, Magnetic shield for dynamo-. R. Pohl. 1,677,004; July 10.
Electric plug, Three-way. W. Ile. 1,676,439; July 10.
Electric selecting apparatus. C. L. and H. L. Krum. 1,676,447; July 10.
Electric switch. T. C. Forbes. 1,676,257; July 10.
Electric switch. W. R. Walker. 1,676,752; July 10.
Electrical amplifier. G. W. Pickard. 1,676,744; July 10.
Electrical apparatus. L. A. M. Phelan. 1,676,922; July 10.
Electrical apparatus. L. A. M. Phelan and C. Hotchkiss. 1,676,921; July 10.
Electrical apparatus. L. A. M. Phelan and C. Hotchkiss. 1,676,923; July10.
Electrical contactor. P. M. Tebbs. 1,677,059; July 10.
Electrical reactance, and method and apparatus. G. W. Pickard. 1,676,745; July 10.
Electrical switch. L. A. M. Phelan and C. Hotchkiss. 1,676,920; July 10.
Electrical switching mechanism. A. J. Evers. 1,676,433; July 10.
Electrode, Resistance welding. G. A. Lutz. 1,676,656; July 10.
Electrotype plates, Backing. H. M. Blaetz. 1,676,628; July 10.
Electrotyping, Plate and preparation of plate for. W. J. Maginnis. 1,676,658; July 10.
Empennage and plane arrangement. W. H. Barling. 1,677,069; July 10.
Engine: *See*—
Gas engine. Internal-combustion engine.
Engine of the sleeve-valve type, Sleeve of the. C. Schaeffer. 1,677,051; July 10.
Engines, Fuel feed system for internal-combustion. L. E. Van Hise. 1,676,751; July 10.
Engines, Scoop attachment for traction. A. Laurie. Re17,025; July 10.
Envelope, Shirt. A. Ratcliff. 1,676,286; July 10.
Enzymes for use in the manufacture of bread, Production of. H. A. Kohman, E. Irvin, and E. S. Stateler. 1,676,446; July 10.
Equalizing means for multiple-collar bearings. J. F. Johnson. 1,677,093; July 10.
Exhaust machine. J. M. van der Pool. 1,676,302; July 10.
Exploring subterranean strata, Method and apparatus for. T. Zuschlag. 1,676,847; July 10.
Eyeglasses. C. W. Cutler. 1,676,819; July 10.
Eyelets, Device for setting invisible. F. S. Gilmes. 1,676,647; July 10.
Fabric: *See*—
Curvilinear fabric. Waterproof fabric.
Upholstery fabric.
Fabric, Pile. H. P. Dick. Des. 75,722; July 10.
Fabrics, Manufacture of colored pile. G. E. Shipway. 1,676,931; July 10.
Fan, Oscillating. H. R. Stuart. 1,676,467; July 10.
Fastener. F. S. Carr. 1,676,382; July 10.
Fastener. F. S. Carr. 1,677,097; July 10.
Fastener and glass retainer, Closure. T. J. Corcoran. 1,677,074; July 10.
Fastener, Door. J. M. Knight. 1,676,335; July 10.
Fastener, Door. J. G. Thorne. 1,677,060; July 10.
Fastener, Separable. A. L. Breitenstein. 1,676,630; July 10.
Fastener, Separable. F. S. Carr. 1,676,383; July 10.
Fastener, Separable. C. Krans. 1,676,396; July 10.
Fastener, Wedge closure. T. J. Anstey. 1,676,515; July 10.
Fastening for boxes or cases containing rotary sharpening apparatus for razors and edge tools. J. A. D. Watt. 1,677,064; July 10.
Faucet for laundry tubs and sinks, Combination. P. R. Richards. 1,676,800; July 10.
Feed mechanism, Pneumatic. S. Halvorsen. 1,676,897; July 10.
Feeding mechanism. H. F. Albright, jr. 1,676,606; July 10.
Feeding mechanism. C. D. Hart. 1,676,605; July 10.
Feeding mechanism. L. F. Lamplough. 1,676,607; July 10.
Feeding mechanism. R. C. Simmons. 1,676,293; July 10.
Feedwater, Delivering preheated. J. Stumpf. Re17,032; July 10.
Fence post, Concrete. W. Bensinger. 1,676,679; July 10.
Fiber board for containers and the like. D. G. Magill. 1,676,617; July 10.
Fibrous composition, Method of making articles from a. W. C. O'Brien. 1,676,798; July 10.
Filing post for loose-leaf ledgers and like binders. H. B. Stone. 1,676,968; July 10.
Filler, Ice-cream-carton. B. L. Huntley. 1,676,952; July 10.
Film-winding machine. J. G. Jones. 1,676,558; July 10.
Filter, Pressure and vacuum. G. J. Lipscomb. 1,676,268; July 10.
Filtering and softening water, Apparatus for. R. C. Dunkelberg. 1,676,891; July 10.
Filtering screen, Fuel-. H. Ford. 1,677,118; July 10.
Finial. H. A. Best. 1,676,422; July 10.
Fireplace. J. B. Ehrlich. 1,676,484; July 10.
Fireplace attachment. L. F. Eisele. 1,676,893; July 10.
Fishing reel, Level-winding. R. B. Bennett. 1,676,678; July 10.
Fitting machine, Heel-seat-. W. C. Stewart. 1,676,297; July 10.
Flash light. E. R. Barany. 1,676,849; July 10.
Flask: *See*—
Dental flask.
Flexibility of the joints of the hands, Apparatus for promoting the. H. Ostrovsky. 1,676,664; July 10.
Flooring, Metal. C. M. Mugler. 1,676,570; July 10.
Frame: *See*—
Vehicle frame.
Fruit-cleaning machine. F. E. Smallidge. 1,676,714; July 10.
Fruit-grading machine. F. F. Leweke. 1,677,037; July 10.
Fuel burner, Pulverized-. W. R. Wood. 1,676,511; July 10.
Fuel burners, Controlling means for multiple-. E. A. Basel. 1,676,764; July 10.
Fuel control for liquid-fuel burners. C. W. Stancliffe. 1,676,933; July 10.
Fuel, Gaseous. J. R. Rose. 1,676,871; July 10.
Funnel. G. G. Hilford. 1,676,986; July 10.
Furnace: *See*—
Gas furnace. Induction furnace.
High-frequency furnace.
Furnace arches, Repairing means for. O. E. Olson and L. Cooper. 1,677,002; July 10.
Furnace for heating metal sheets and plates. R. W. Stuler. 1,676,590; July 10.
Furnace-wall constructions. B. Brodio. 1,676,246; July 10.
Furniture, Convertible. L. P. Armstrong. 1,676,514; July 10.

Game apparatus. A. L. Walton. 1,676,755; July 10.
Game, Card. L. Zimmermann. 1,677,010; July 10.
Game or puzzle. T. J. Scanlan. 1,676,505; July 10.
Garden roller. T. Cantu. 1,676,941; July 10.
Garment hanger. D. R. Trevino. 1,676,936; July 10.
Garment press. P. N. Braun. 1,676,423; July 10.
Gas burner. M. Jones. 1,676,953; July 10.
Gas burner. C. A. Lausen. 1,676,564; July 10.
Gas burner, Circulating. J. M. Axtell and F. G. von Hofen. 1,676,472; July 10.
Gas engine, Two-cycle. H. E. Allen. 1,676,512; July 10.
Gas furnace. E. L. Payne. 1,676,665; July 10.
Gas heater. W. L. Sharp. Des. 75,752; July 10.
Gas meter. A. R. Huettig. 1,676,651; July 10.
Gas-range burner. P. S. Harper. 1,676,898; July 10.
Gate: *See*—
Railroad gate.
Gauge: *See*—
Micrometer gauge. Testing gauge.
Gauge with a precision indicator for testing the flank diameter of external threads. M. Bartholdy. 1,676,721; July 10.
Gauging instrument. F. W. Stalker. 1,676,673; July 10.
Gauging machine. P. Wallin. 1,676,879; July 10.
Gear, Locomotive valve. J. J. Jones. 1,676,265; July 10.
Gear, Variable-speed. W. J. Gee. 1,676,859; July 10.
Gearing. D. F. Asbury. 1,676,421; July 10.
Gearing, Change-speed. P. O. Rowlands. 1,676,802; July 10.
Gearing, Stageless change-speed. E. Stöckemann. 1,676,367; July 10.
Gears, Method of and machine for producing. E. Wildhaber. 1,676,371; July 10.
Gears, Method of and machine for producing. E. Wildhaber. 1,676,419; July 10.
Generator: *See*—
Thermoelectric generator.
Glare shield. P. J. Groenenstein. 1,676,896; July 10.
Glass: *See*—
Borosilicate glass.
Glass, Making corrugated wire. W. Cox and A. Shuman. 1,676,773; July 10.
Glass, Method and apparatus for manufacturing fire-polished sheet. C. J. Jordan. 1,677,095; July 10.
Glass, Process and apparatus for making sheet. W. Cox and A. Shuman. 1,676,772; July 10.
Goggles. S. H. Hopewell. 1,677,089; July 10.
Goggles. J. A. Wilson. 1,676,760; July 10.
Golf bag. J. S. White. 1,676,592; July 10.
Golf-ball box. J. G. Anderson and R. H. Waldo. 1,676,975; July 10.
Golf-ball center. P. S. Shoaff. 1,676,841; July 10.
Golf club. W. E. Harness. 1,677,099; July 10.
Golf club. N. D. Mattison. 1,676,270; July 10.
Golf clubs, Adjustable head for. S. L. Boles. 1,676,518; July 10.
Golf game apparatus. C. W. Scheck. 1,676,804; July 10.
Governor. L. B. Jones and E. H. Werzner. 1,676,902; July 10.
Grader, Road. H. R. and F. D. Wilson. 1,676,938; July 10.
Gate for dump pits. A. P. Winter. 1,676,307; July 10.
Grate, Furnace. E. B. Priebe. 1,676,349; July 10.
Grease cup. E. Conrad. 1,676,523; July 10.
Grinder, Valve. W. E. Duthie. 1,676,483; July 10.

Heater: *See*—
Water heater.
Heater. G. E. Starkweather. 1,677,006; July 10.
Heating and cooking apparatus, Electrical. J. W. J. Kaffer. 1,677,032; July 10.
Heating means, High-frequency filament-. W. E. Danley. 1,677,021; July 10.
Heel. J. B. Hadaway. 1,676,262; July 10.
Heel-attaching mechanism. J. A. Kelly. 1,676,904; July 10.
Heel, Rubber. E. Hoffman. 1,676,332; July 10.
Heel, Shoe. B. R. Ryan. 1,676,928; July 10.
High-frequency furnace. H. C. Rentschler and J. W. Marden. 1,676,926; July 10.
Hinge. J. Friedman. 1,676,541; July 10.
Hinge. A. N. Walstad. 1,676,589; July 10.
Hinge for water-closet seats and covers. W. J. Hess. 1,676,900; July 10.
Hobbing machine. C. H. Schurr. 1,676,873; July 10.
Hoist controller. A. E. Johnson. 1,677,108; July 10.
Hoisting apparatus. J. Newmann. 1,676,344; July 10.
Hoisting machine. F. J. Lederer. 1,676,449; July 10.
Holder, Compound condiment. M. Costello. 1,676,635; July 10.
Holder for golf courses, Flagpole. G. E. Kannemann. 1,676,954; July 10.
Holder, Lamp. G. S. Clark. 1,677,072; July 10.
Holder, Pencil. F. L. Morgan. Des. 75,744–5; July 10.
Holder, Roll-material. E. D. Casteriine. 1,676,854; July 10.
Holder, Sales-check. E. K. Bottle. 1,676,726; July 10.
Holder, Toothpick. F. Rings. 1,676,747; July 10.
Holder, Towel. W. N. Proctor. 1,677,049; July 10.
Hook: *See*—
Watch-bracelet end hook.
Horn, Electric. D. A. McConnell. 1,676,455; July 10.
Horse, Rocking and galloping. N. Smirnoff. 1,676,365; July 10.
Hose protector. D. D. Fortune. 1,677,077; July 10.
Hot plate, Nonwarping. L. Reichold. 1,677,005; July 10.
Housing construction. R. B. Benjamin. 1,676,239; July 10.
Huller: *See*—
Oat huller.
Humidifier for cigar cases. J. B. Darguvel. 1,676,943; July 10.
Humidifying apparatus. F. A. and W. Anetsberger. 1,676,763; July 10.
Humidor display lid. E. Brunhoff. 1,676,683; July 10.
Husks or socket housing. V. R. Despard. 1,676,254; July 10.
Hydraulic construction. G. W. Bungay. 1,676,249; July 10.
Hydrocarbon-burner system. J. S. String. 1,676,877; July 10.
Hydrocarbon motor. J. G. Vincent. 1,676,418; July 10.
Hydrocarbons from carbonaceous material, Recovering light. M. J. Trumble. 1,676,675; July 10.
Identifying individuals. W. M. Hammond. 1,676,495; July 10.
Ignition device for smudge pots. J. A. Ulmer. 1,676,368; July 10.
Ignition for 2-cylinder engines, Dual. E. V. Rippingille. 1,676,503; July 10.
Impregnating machine and process. L. Seidell and G. B. Jack, jr. 1,676,363; July 10.
Indicating device, Liquid-quantity-. E. V., jr., and N. Dittlinger. 1,676,255; July 10.
Indicator: *See*—
Speed indicator.
Indian club. R. E. Dwyer. 1,676,689; July 10.
Induction furnace. R. Gross. 1,676,545; July 10.
Insole. P. Saperston. 1,676,355; July 10.
Internal-combustion engine. M. F. Hill. 1,676,264; July 10.
Internal-combustion engine. L. E. Van Hise. 1,676,811; July 10.
Internal-combustion engine. J. G. Vincent. 1,676,369; July 10.
Internal-combustion engines, Method of and apparatus for preventing knocking in. F. A. Howard and T. R. Parker. 1,676,827–8; July 10.
Iron: *See*—
Hand iron.
Jigger. H. Grassey. 1,676,261; July 10.
Joint: *See*—
Universal joint.
Joints, Apparatus for packing. R. E. Chapman. 1,676,425; July 10.
Juice extractor. T. F. Coopey. Des. 75,720; July 10.
Kit for drawing instruments, Auxiliary beam-compass. F. Schwartz. 1,676,860; July 10.
Knife, Paring. E. W. Lacoss. 1,676,699; July 10.
Ladder. R. F. Schulske. 1,676,915; July 10.
Ladder support. J. W. Morris. 1,676,618; July 10.
Ladle and strainer, Combination. J. Rudin. 1,677,120; July 10.
Lamp. C. D. Ryder. 1,676,712; July 10.
Lamp. C. E. Schmunk. 1,676,670; July 10.
Lamp attachment, Portable. D. P. Stergianopulos. 1,676,934; July 10.
Lamp, Automotive head. W. B. Churcher. 1,676,769; July 10.
Lamp, Electric. R. D. Malley. 1,676,790; July 10.
Lamp, Electric table. J. P. Weiss. Des. 75,755; July 10.
Lamp, Electric vapor. R. D. Malley. 1,676,793; July 10.

Lamp, Incandescent electric. A. Sved. 1,676,300; July 10.
Lamp lock, Electric-. S. A. Clemetson and O. H. Rasmussen. 1,676,323; July 10.
Lamp lock, Incandescent-. J. Cooke. 1,676,728; July 10.
Lamp, Reading. H. M. Peters. Des. 75,746; July 10.
Lamp, Vapor electric. R. D. Malley. 1,676,792; July 10.
Lamps, Securing device for miners'. A. L. Welch. 1,676,972; July 10.
Lantern. A. H. Handlan. 1,676,861; July 10.
Latch. R. G. Moore and A. Claud-Mantle. 1,676,867; July 10.
Latch, Cupboard. A. F. Winters. 1,676,593; July 10.
Leaks, especially in the bottom and side walls of ships' hulls, Apparatus for stopping. B. H. Körner. 1,676,395; July 10.
Lens-cutting machine. E. M. Long. 1,676,566; July 10.
Light: *See*—
Dirigibly-mounted light. Flash light.
Light-treatment process. G. Sperti, R. J. Norris, R. B. Withrow, and H. Schneider. 1,676,579; July 10.
Lighting ships' lifeboats and the like. J. G. Blair. 1,676,977; July 10.
Limiting and volumetric meter, Demand. J. F. Kitchen. 1,676,444; July 10.
Lining for rubber boots and manufacturing. A. A. Glidden and F. R. McKenzie. 1,676,329; July 10.
Lining pipes, Method of and apparatus for. D. T. Beatty. 1,676,815; July 10.
Link for cross chains of antiskid chains, Connecting. R. A. Seager. 1,676,966; July 10.
Liquid-controlling device. L. W. Browne. 1,677,096; July 10.
Liquid-flow switch. W. R. Walker. 1,676,753; July 10.
Liquid from solid material, Device for separating. S. V. C. Plate. 1,676,459; July 10.
Liquid-level-indicating means. G. J. Dunbaugh, Jr. 1,676,534; July 10.
Lock: *See*—
Double lock. Multiple lock.
Lamp lock. Rim lock.
Lock. C. W. Le Noue. 1,676,450; July 10.
Lock and latch, Combined. J. Arigi. 1,677,012; July 10.
Locking coupling. T. B. Tiefenbacher. 1,676,585; July 10.
Locomotive booster apparatus. H. S. Vincent. 1,676,509; July 10.
Locomotive firebox. C. G. Hawley. 1,676,732; July 10.
Locomotive front end. H. B. Oatley. 1,676,347; July 10.
Locomotive, Steam. C. R. Brooks and C. A. Brandt. 1,676,247; July 10.
Loom, Feeler. J. Northrop. 1,676,913; July 10.
Loom reed. I. Andrews. 1,676,513; July 10.
Looms, Stop motion for. P. C. Hering. 1,677,085; July 10.
Looms, Thread-control attachment for. A. C. P. Russen. 1,676,803; July 10.
Loop for garments, etc., Supporting. R. E. Garrett. 1,677,078; July 10.
Loop, Garment. J. M. Clark. 1,676,770; July 10.
Low-tire-pressure signal. J. B. Cox. 1,676,526; July 10.
Lubricating apparatus. M. F. Carr. 1,676,424; July 10.
Lubricating apparatus. H. J. Murphy. 1,676,457; July 10.
Lubricating device for axle journals. J. Moreau. 1,677,001; July 10.
Lubricating system. E. W. Davis. 1,676,386; July 10.
Lubricator. *See*—
Cylinder lubricator.
Lubricator. F. C. Blanchard. 1,676,473; July 10.
Lumber carriers, Load binder for. J. S. Eastham. 1,676,638; July 10.
Lumber, Method and apparatus for unstacking. J. M. and J. M. Leaver, jr. 1,676,937; July 10.
Machine and method for drying macaroni. A. E. Broughton. 1,676,474; July 10.
Machine for cutting off and preparing stock strips. T. A. Beaney. 1,676,883; July 10.
Machine for finishing book covers by inlaid, lettering, or ornamenting. H. Dunn. 1,676,892; July 10.
Machine for forming, bending, folding, and shaping heavy metal sheets. C. G. Hawley. 1,676,733; July 10.
Machine for stapling chick boxes. C. Van Zyl. 1,676,718; July 10.
Machine for the sintering of ore and the like. P. Anderson. 1,676,720; July 10.
Machinery, Glassworking. R. D. Malley and W. J. Winninghoff. 1,676,795; July 10.
Machinery, Glass-working. G. A. Millar. 1,676,796; July 10.
Magnet wheel. J. Geschke. 1,677,030; July 10.
Magnetizable objects, Method of and apparatus for testing. C. W. Burrows. 1,676,632; July 10.
Mandrel. W. S. Doll. 1,676,325; July 10.
Mandrels, Tapered plug for circular. J. R. Hunter. 1,676,829; July 10.
Manifold for internal-combustion engines, Intake. W. E. Kemp. 1,676,955; July 10.
Maps and plans from two terrestial or aerial photographs, Apparatus for automatically drawing. G. J. Poivilliers. 1,676,708; July 10.
Marker, Book. A. Falken. 1,676,644; July 10.
Marker for trees, plants, and flowers. J. C. Richard. 1,676,927; July 10.
Measuring machine, Cloth-. A. Vanderveld. 1,676,587; July 10.
Measuring machine, Unit-. C. N. Bergmann. 1,676,377; July 10.
Measuring machines, Cover-placing mechanism for unit-. C. N. Bergmann, E. Z. Taylor, and C. Taylor. 1,676,378; July 10.
Measuring weir. C. W. Cheatham. 1,676,855; July 10.
Meats, Preparing smoked joint. A. W. Cushman. 1,676,730; July 10.
Mechanical movement. S. R. Jackson. 1,676,441; July 10.
Mechanical movement. R. E. Schley. 1,676,506; July 10.
Medicine, Topical. A. A. Hoopman. 1,676,554; July 10.
Mercury switch. J. P. O'Shea. 1,676,408; July 10.
Mercury switch. W. R. Walker. 1,676,754; July 10.
Metal hair tube. D. J. Bolduc. 1,676,681; July 10.
Metal machine, Expanded-. R. G. Birkholz. 1,676,517; July 10.
Metals in continuous cold rolling, Apparatus for the annealing of. L. Cammen. 1,676,685; July 10.
Meter: *See*—
Compensated meter. Limiting and volumetric meter.
Gas meter.
Micrometer gauge. W. L. Bryant. 1,676,248; July 10.
Milking-machine releaser. J. Hopkirk and G. W. Gane. 1,676,693; July 10.
Milling cutter. O. von Eberhard. 1,676,719; July 10.
Mining machine. C. E. Davis. 1,676,428–9; July 10.
Mixing device. J. H. Baker. 1,676,237; July 10.
Mixing device, Fuel-. J. P. Malone. 1,676,958; July 10.
Molding machines, Jolt mechanism for. W. H. Nicholls. 1,676,662; July 10.
Molds for printing plates, Forming. L. W. Claybourn. 1,676,802; July 10.
Mop. T. Hill. 1,676,497; July 10.
Mop. W. D. Whitaker. 1,676,880; July 10.
Motor: *See*—
Air-craft motor. Spring motor.
Hydrocarbon motor.
Moving freight-car doors, Device for. G. A. Plunkett. 1,676,502; July 10.
Multiple lock. E. R. Turner. 1,676,623; July 10.
Musical instrument, Record-controlled. T. F. Cheek. 1,676,633; July 10.
Musical instruments, Control-carrying slide for self-playing. E. A. Huseby. 1,676,780; July 10.
Nail, Clamp. C. C. Jensen. 1,677,092; July 10.
Needle, Knitting. ... M. Frazier. 1,676,947; July 10.
Nipple applicator. F. A. Armstrong. 1,676,236; July 10.
Nozzle for the production of artificial filaments. L. A. Levy. 1,676,831; July 10.
Nozzle, Sanitary syringe. S. C. Wood. 1,676,308; July 10.
Nut blanks, Threading. O. H. de Lapotterie. 1,676,482; July 10.
Oat huller. R. Stanley. 1,677,111; July 10.
Oil burner. H. A. Atwater. 1,676,813; July 10.
Oil burner. W. F. Miller. 1,676,274; July 10.
Oil burner, Furnace. C. Anderson. 1,676,471; July 10.
Oil-dispensing vessel, Dust-proof. W. H. Peaden. 1,676,411; July 10.
Oil, Process and apparatus for cracking. R. T. Pollock. 1,676,924; July 10.
Oils, Treating. F. A. Howard. 1,676,826; July 10.
Cameras, Optical unit for. O. Wittel. 1,676,595; July 10.
Organ-pipe construction. G. Cesar. 1,676,942; July 10.
Outlet box. H. M. Stieglitz. 1,676,298; July 10.
Oven, Coke. T. G. Kus. 1,676,736; July 10.
Oven, Constant-temperature. W. H. Stannard. 1,676,876; July 10.
Overflow alarm. O. La Vallée and O. Lemelin. 1,676,565; July 10.
Packing doors, frames, and the like. H. B. Walter. 1,676,304; July 10.
Packing material and gasket made therefrom. F. L. Dieterich. 1,676,432; July 10.
Packing or filling body. F. Lilge. 1,676,451; July 10.
Panel for metal work, Decorative. O. B. Bach. Des. 75,709; July 10.
Paper making. R. V. Weldon. 1,676,305; July 10.
Paper-making machine. W. A. Lorens. 1,676,655; July 10.
Paper, Process and mechanism for producing stretchable. H. G. Widmer. 1,676,759; July 10.
Paper-stock refining. H. Liebeck. 1,676,653; July 10.
Paraffin cutter. M. L. Reed and H. E. Bulla. 1,677,050; July 10.
Pedal-actuating device. H. Christenson. 1,676,686; July 10.
Pedestal mounting. A. Vanderveld. 1,676,508; July 10.
Pencils, Clutch. E. Caldwell. 1,676,250; July 10.
Percolator, Coffee. H. H. Schott. Des. 75,749; July 10.
Percolator, Coffee. H. H. Schott. Des. 75,751; July 10.
Petroleum, Process and apparatus for cracking. L. J. Gary. 1,676,895; July 10.
Petroleum products, Pyrogenesis of. F. A. Howard. 1,676,694; July 10.
Photograph and making the same. S. E. Sheppard. 1,676,580; July 10.
Photographic mounts, Package for. H. L. Batty. 1,676,238; July 10.

Pianos, Tracker-tube support for player. E. A. Huseby. 1,676,781; July 10.
Picker stick. J. A. Hinrichs. 1,677,088; July 10.
Picture block, Interchangeable panoramic. G. W. Eschenbach. 1,676,641; July 10.
Picture mechanism, Motion-. O. Wittel. 1,676,594; July 10.
Picture projector, Motion-. E. C. Fritts. 1,676,542; July 10.
Pilaster, Extensible. S. Lowy. 1,676,616; July 10.
Pin or the like, Lapel. J. R. Colgan. Des. 75,719; July 10.
Pipe cutter, Automatic drill-. K. F. Mitchell. 1,676,569; July 10.
Pipe strap, Leader-. D. J. Finucane. 1,676,485; July 10.
Pipe wrench. N. Spanovic. 1,676,507; July 10.
Piston. T. J. Levey. 1,676,339; July 10.
Plant holder, Carnation. F. E. Kruse. 1,676,337; July 10.
Plant support. N. Waterman. 1,676,468; July 10.
Plate or similar article. H. Rampfel. Des. 75,748; July 10.
Plate or similar article. W. S. Woodman. Des. 75,759; July 10.
Plate, Pie. P. C. Engel. Des. 75,723; July 10.
Plates for locks, Striker. J. E. Haifferty. 1,676,390; July 10.
Pneumatic spring, Adjustable. S. Quisling. 1,676,350; July 10.
Pole butt. J. R. Kearney. 1,676,266; July 10.
Post: *See*—
Fence post.
Powder-dispensing device. R. R. Root. 1,676,462; July 10.
Power plant. G. C. Taylor. 1,676,935; July 10.

Wrench extension, Speed-handle. W. J. Victory. 1,676,370; July 10.
Wringers, Safety device for clothes. L. S. Gunderman. Re17,030; July 10.
Yeast, Manufacture of. A. P. Harrison. 1,676,437; July 10.

CLASSIFICATION OF PATENTS

ISSUED JULY 10, 1928.

NOTE.—First number=class, second number=subclass, third number=patent number.

1— 4: 1,676,718
39: 1,676,283
47: 1,676,326
2— 14: 1,677,089
123: 1,676,397
151: 1,676,291
175: 1,676,504
4— 56: 1,676,430

Alassio, Federico, J. B., T., S., and F., Paysandu, Uruguay. Producing earthenware pipes and products resulting therefrom. 1,677,808; July 17.
Alassio, Florencio. (See Alassio, Federico, J. B., T., S., and F.)
Alassio, Juan B. (See Alassio, Federico, J. B., T., S., and F.)
Alassio, Serafin. (See Alassio, Federico, J. B., T., S., and F.)
Alassio, Tomás. (See Alassio, Federico, J. B., T., S., and F.)
Albrecht, Dieter, Berlin, assignor to Siemens & Halske Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Device for indicating the quotient of two electrical quantities. 1,677,378; July 17.
Aldrich, Alonzo, assignor to Beloit Iron Works, Beloit, Wis. Oscillating suction box. 1,677,128; July 17.
Alesse, Joseph. (See Laviano, B., Alesse, and Campagna.)
Alexander, Harry S., assignor to Tater-Flakes Company, Chicago, Ill. Display device. 1,677,318; July 17.
Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. Antenna. 1,677,698; July 17.
Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. System of electrical distribution. 1,677,699; July 17.
Alexanderson, Ernst F. W., Schenectady, N. Y., assignor to General Electric Company. System of electrical distribution. 1,677,700; July 17.
Allen, Gerald H., Detroit, Mich. Gauge. 1,677,424; July 17.
Allender, Howard W. (See Harrison, H. H., Allender, and Fout.)
Alton, William H., assignor to R. T. Vanderbilt Company, Incorporated, New York, N. Y. New granule and producing same. 1,677,701; July 17.
Amcoin Coffee System Company. (See Wertheimer, Leo, assignor.)
American Bottle Company, The. (See Ginter, Paul A., assignor.)
American Can Company. (See Eberhart, Felix, assignor.)
American Chain Company. (See Goetz, Oscar H., assignor.)
American Flyer Mfg. Co. (See Becker, Harry S., assignor.)
American Gas Machine Company. (See Olsen, W., and Rasmussen, assignors.)
American Lanil Corporation. (See Schweitzer, Wilhelm H., assignor.)
American Laundry Machinery Company, The. (See Prothers, Harold V., assignor.)
American Meter Company. (See Linderman, Garrett B., jr., assignor.)
American Shoe Machinery Company. (See Wright, Wallace C., assignor.)
American Telephone and Telegraph Company. (See Affel, Herman A., assignor.)
American Telephone and Telegraph Company. (See Loynes, Owen H., assignor.)
American Telephone and Telegraph Company. (See McCurdy, Ralph G., assignor.)
American Telephone and Telegraph Company. (See Weaver, Allan, assignor.)
American Valve and Meter Company, The. (See Gray, Wallace M., assignor.)
American Valve and Meter Company, The. (See McGarry, John T., assignor.)
Ames, Louis A., New York, N. Y. Flag holder and support therefor. 1,677,379; July 17.
Amiot, Felix, assignor to "Société d'Emboutissage et de Constructions Mécaniques," Colombes, Seine, France. Frame component. 1,677,577; July 17.
Anchor Cap and Closure Corporation. (See Scofield, Edgar, assignor.)
Andersen, Johan K. K., Brooklyn, N. Y. Changeable-letter device. 1,677,319; July 17.
Anderson, James L., Englewood, N. J., assignor to Air Reduction Company, Incorporated, New York, N. Y. Protection of acetylene lines. 1,677,225; July 17.
Annis, Ralph B., assignor to Mower-Gulden Annis, Inc., Brooklyn, N. Y. Bottle or the like. Des. 75,763; July 17.
Anstiss, George P., Oak Park, Ill., assignor to G. S. Blakeslee & Co., Cicero, Ill. Washing machine. 1,677,320; July 17.
Apex Electrical Manufacturing Company, The. (See Frantz, Walter A., assignor.)
Appleton, Ernst G., A. C. Fischer, and R. Mooney, assignors to Roach-Appleton Manufacturing Company, Chicago, Ill. Extension lamp. 1,677,163; July 17.
Arras, George, Chicago, Ill. Electric-fixture clamp. 1,677,164; July 17.
Arton, Sven, Chicago, Ill. Cash register. 1,677,510; July 17.
Arvid, Joseph S., Co. (See Auerbach, Joseph B., assignor.)
Asselin, Joseph H., Waterbury, Conn. Combination stool and stepladder. 1,677,610; July 17.
Atlas Press Company. (See Collins, James G., assignor.)
Auerbach, Joseph B., assignor to Joseph S. Arvid Co., New York, N. Y. Display sign. Des. 75,764; July 17.
August, Johannes R. C. (See Hunter, Edgar K., assignor.)
Austin, Herbert A., Worcester, Mass. Fastening loop. 1,677,670; July 17.
Automatic Electric Inc. (See Jacobsen, Emil, assignor.)
Automatic Electric Inc. (See Lomax, Clarence E., assignor.)
Automatic Electric Inc. (See Wicks, John, assignor.)
Automotive Fan & Bearing Company. (See Funk, Truman B., assignor.)
Axtell, Frank C., South Pasadena, assignor to Axtell Research Laboratories, Inc., Los Angeles, Calif. Refining of petroleum fractions. 1,677,425; July 17.
Axtell Research Laboratories, Inc. (See Axtell, Frank C., assignor.)
Badische Maschinenfabrik & Eisengiesserei vormals G. Sebold and Sebold & Neff. (See Nagel, O., and Kaempfer, assignors.)
Bahan, William H. (See Crain, William E., assignor.)
Bailey, John, Cobridge, Stoke-on-Trent, assignor to Furnivals 1913 Limited, Cobridge, England. Shaping teacups or the like with integral handles. 1,677,611; July 17.
Bailey, William T., Nashville, Tenn. Fireplace basket. 1,677,540; July 17.

Bailey, William T., Nashville, Tenn. Fireplace basket. 1,677,541; July 17.
Bailey Meter Company. (See Smith, Arthur R., assignor.)
Bakelite Corporation. (See Turkington, Victor H., assignor.)
Ball, Joseph A. (See Troland, L. T., and Ball.)
Ballert, Otto, Berlin, Germany. Tipping car. 1,677,263; July 17.
Ballman, Edwin C., St. Louis, and E. P. Evers, Overland, Mo., assignors, by mesne assignments, to Acme Motion Picture Projector Company, Chicago, Ill. Projecting apparatus. Re17,037; July 17.
Ballman, Edwin C., St. Louis, and E. P. Evers, Overland, Mo., assignors, by mesne assignments, to Acme Motion Picture Projector Company, Chicago, Ill. Projecting apparatus. Re17,038; July 17.
Ballou, B. A., & Co. (See Roberts, George H., assignor.)
Bang, Niels C. (See Howe, F. A., and Bang.)
Banks, Mark B., Knoxville, Tenn. Shoe. 1,677,226; July 17.
Bany, Herman, Scotia, and D. C. Hoffmann, Schenectady, N. Y., assignors to General Electric Company. Control of electric circuits. 1,677,702; July 17.
Barber Asphalt Company, The. (See Ritter, George, assignor.)
Barber, William A., Washington Township, Carroll County, Ill. Vertical sickle divider for grain-harvesting machinery. 1,677,668; July 17.
Barclay, Gustaf L., assignor to Detroit Steel Products Company, Detroit, Mich. Sash-operating mechanism. 1,677,380; July 17.
Barnard, Walter E., assignor to Barr-Morse Corporation, Ithaca, N. Y. Typewriter and the like. 1,677,165; July 17.
Barney, William R., assignor to W. C. Norris, Tulsa, Okla. Making clamps. 1,677,264; July 17.
Barnhart, Richard M. (See Van Cleave, William F., assignor.)
Barr, Louis L., Pittsburgh, Pa. License plate and displaying the same. 1,677,613; July 17.
Barr, Sidney U., Brooklyn, N. Y. Double-hung window. 1,677,578; July 17.
Barr-Morse Corporation. (See Barnard, Walter E., assignor.)
Barrows, Donald S., Rochester, N. Y., assignor, by mesne assignments, to The Symington Company. Journal-box lid. 1,677,321; July 17.
Barry, James J., Gloucester, Mass. Treating crustacea. 1,677,579; July 17.
Bates, Arthur, Leicester, England, assignor to United Shoe Machinery Corporation, Paterson, N. J. Machine for operating on shoes. 1,677,322; July 17.
Bauer, Edward, West New York, and P. Miozzi, Union City, N. J. Loom. 1,677,542; July 17.
Bauer, Marius A., Worcester, Mass., assignor to M. J. Whittall Associates. Actuating mechanism in oriental-rug looms. 1,677,426; July 17.
Baur, Hugo J., assignor to The Vortex Mfg. Co., Chicago, Ill. Cup dispenser. 1,677,166; July 17.
Baxter, Harold G., Baldwin, N. Y., and H. K. Krantz, Wilkinsburg, Pa., assignors to Westinghouse Electric and Manufacturing Company. Switch mechanism. 1,677,323; July 17.
Bay State Optical Company. (See McFadden, Fay, assignor.)
Bead Chain Manufacturing Company, The. (See Goodridge, Gilbert W., assignor.)
Bean, William L., West Haven, Conn., assignor to McClellon Locomotive Boiler Company, Boston, Mass. Locomotive boiler. 1,677,427; July 17.
Bear Tractor Corporation of America. (See Leake, Thomas C., assignor.)
Beauregard, Charles L., Providence, R. I. Safety device for motor vehicles. 1,677,703; July 17.
Bechtold, William S., Newark, N. J. Mirror or similar toilet article. Des. 75,765; July 17.
Bechtold, William S., Newark, N. J. Mirror or similar toilet article. Des. 75,766; July 17.
Bechtold, William S., Newark, N. J. Mirror or similar toilet article. Des. 75,767; July 17.
Bechtold, William S., Newark, N. J. Mirror or similar toilet article. Des. 75,768; July 17.
Beck, Arlie C., and A. S. Morningstar, Bentonville, Ark. Gasoline clarifier. 1,677,824; July 17.
Becker, Donald B., Watervliet, assignor to Geo. P. Ide & Company, Inc., Troy, N. Y. Collar package. 1,677,511; July 17.
Becker, Harry S., River Forest, assignor to American Flyer Mfg. Co., Chicago, Ill. Bell-ringing means for toy locomotives. 1,677,669; July 17.
Beloit Iron Works. (See Aldrich, Alonzo, assignor.)
Bendix Brake Company. (See Bendix, Vincent, assignor.)
Bendix, Vincent, assignor to Bendix Brake Company, Chicago, Ill. Brake-operating means. 1,677,381; July 17.
Benner, Raymond C., Bayside, N. Y., assignor, by mesne assignments, to Prest-O-Lite Storage Battery Corporation. Separator. 1,677,512; July 17.
Benner, Winthrop W., Cuyahoga Falls, and E. A. Hoener, assignors to The Firestone Tire and Rubber Company, Akron, Ohio. Apparatus for splicing fabric. 1,677,857; July 17.
Bennett, Ralph S., Pittsfield, Mass., assignor to General Electric Company. Fuse container. Des. 75,769; July 17.
Benz & Cie. Rheinische Automobil- u. Motoren-Fabrik Aktiengesellschaft. (See Wagner, Max, assignor.)
Berger Manufacturing Company, The. (See Fochrenbach, Arthur F., assignor.)
Berger, Samuel L., Newark, N. J. Toy aviation device. Des. 75,770; July 17.
Berton, Arthur, Limited. (See Berton, Herbert, assignor.)
Berton, Herbert, assignor of one-half to Arthur Berton Limited, London, England. Combined bag and cushion. 1,677,743; July 17.
Bethlehem Steel Company. (See Kinney, James A., assignor.)
Binder, Leo J., Spokane, Wash. Grate. 1,677,809; July 17.
Birchfield, Robert W., assignor to Heggie Simplex Boiler Company, Joliet, Ill. Making boilers. Re17,033; July 17.
Bishop, Benjamin S. T. (See Gifford, A. J., and Bishop.)
Bishop, Benjamin S. T., Shrewsbury, and H. A. Jacobson, Worcester, Mass., assignors to Leland-Gifford Company. Electric reversing device for tapping machines. 1,677,744; July 17.
Biva, Lucien, Brooklyn, N. Y., assignor to Pennsylvania Textile Mills, Inc., Clifton, N. J. Textile fabric. Des. 75,771; July 17.
Blacker, William, Stalybridge, England. Apparatus for beating gold leaf or sheets of other metal and such like. 1,677,513; July 17.
Blake, C. C., Incorporated. (See Blake, Charles C., assignor.)
Blake, Charles C., Brookline, assignor to C. C. Blake, Incorporated, Boston, Mass. Shoes. 1,677,612; July 17.
Blake Electric Mfg. Company. (See Smith, Harry C., assignor.)
Blakeslee, G. S., & Co. (See Anstiss, George P., assignor.)
Blattner, Frederick, jr., and E. Janke, Brooklyn, N. Y. Cooking apparatus. 1,677,227; July 17.
Bloch, Leon, assignor to The Republic Brass Company, Cleveland, Ohio. Four-way diverter valve. Re17,034; July 17.
Blodgett, Herbert C., Kalamazoo, Mich., assignor to Door Control Company, Hartford City, Ind. Automatic electric door control. 1,677,129; July 17.
Bloser, Parker Z., assignor to The Zaner-Bloser Company, Columbus, Ohio. Penholder. Des. 75,772; July 17.
Bogdonawich, Joseph A., Ringtown, Pa. Vegetable cutter. 1,677,543; July 17.
Boidin, Auguste, Seclin, France, and J. Effront, Brussels, Belgium. Making a size or dressing. 1,677,614; July 17.
Boidin, Auguste, Seclin, France, and J. Effront, Brussels, Belgium. Prepared starch material and making it. 1,677,615; July 17.
Bond, Richard T., Stringtown, Okla. Magazine for air guns. 1,677,810; July 17.
Bonetto, Domenico, St. Louis, Mo. Fluid motor. 1,677,745; July 17.
Borgeson, Sidney E., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Material-unwinding device. 1,677,167; July 17.
Bourleaux, Fernand, Saint-Quentin, France. Furnace for heating rivets by means of oxygen and acetylene gases. 1,677,467; July 17.
Boving, Jens O., Westminster, England. Air-lift pump. 1,677,265; July 17.
Bowen, Dudley A., New York, N. Y. Connecter. 1,677,326; July 17.
Bowen, William S., Westfield, N. J. Gas burner. 1,677,811; July 17.
Bradley, Charles E., and C. D. Mason, assignors to Mishawaka Rubber and Woolen Manufacturing Company, Mishawaka, Ind. Footwear lining. 1,677,428; July 17.
Bradley, Merrill L., Detroit, assignor to Universal Power Shovel Company, Highland Park, Mich. Clutch mechanism and control therefor. 1,677,327; July 17.
Brainard, George C., J. A. Fitch, and G. T. Gourley, assignors to The General Fireproofing Company, Youngstown, Ohio. Adjustable-compartment metal drawer. 1,677,544; July 17.
Braundsdorf, Otto, E. Holzapfel, Hochst-on-the-Main, and P. Nawiasky, Ludwigshafen-on-the-Rhine, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Halogen derivative of the benzanthrone series and making same. 1,677,545; July 17.
Brenneman, Ivo G., Blue Ball, Pa. Nut lock. 1,677,266; July 17.
Bristol, Harry R., Findlay, Ohio, assignor of one-half to J. S. Bristol, Charleston, W. Va. Building construction. 1,677,267; July 17.
Bristol, Jay S. (See Bristol, Harry R., assignor.)
Brodex Company. (See Conklin, Archie W., assignor.)
Brohmeyer, Friedrich. (See Rottmann, F., and Brohmeyer.)
Bronson, Adelbert E., assignor to The Dill Manufacturing Company, Cleveland, Ohio. Steering wheel. 1,677,616; July 17.
Brooks, Charles E. (See Casey, W. F. J., Cavin, and Brooks.)

Brown, Alfred B., Caldwell, N. J., assignor to Western Electric Company, Incorporated, New York, N. Y. Machine framework. 1,677,168; July 17.
Brown & Bigelow. (See Swift, George L., assignor.)
Brown, Charles H., Breckenridge, Tex. Underreamer. 1,677,812; July 17.
Brown, John Y., and J. R. Browning, Everettville, W. Va. Bending machine. 1,677,746; July 17.
Brown, Walter J., Eversley, England, assignor, by mesne assignments, to Metropolitan-Vickers Electrical Company, Limited. High-frequency signaling system. 1,677,268; July 17.
Browning, John R. (See Brown, J. Y., and Browning.)
Buchli, Jacob, Winterthur, Switzerland. Oil-motor-driven locomotive. 1,677,704; July 17.
Bugbee, Lucian W., Indianapolis, Ind., assignor, by mesne assignments, to Continental Optical Corporation, New York, N. Y. Making and marking toric and like lenses. 1,677,382; July 17.
Burghart, Thomas N. Philadelphia, Pa. Nonremovable nut. 1,677,269; July 17.
Burkhardt, Harry L., New York, N. Y., assignor to Ruckstell Sales & Manufacturing Company, Berkeley, Calif. Planetary-gear mechanism. Re17,039; July 17.
Burkhardt, John. (See Simkins, H. D., and Burkhardt.)
Burrage, Albert C. (See Burrage, Albert C., jr., assignor.)
Burrage, Albert C. (See Heuser, Ralph V., assignor.)
Burrage, Albert C., jr., Hamilton, assignor, by mesne assignments, to A. C. Burrage, Boston, Mass. Vulcanization of rubber. 1,677,169; July 17.
Burrowes, E. T., Company, The. (See Compton, Percy R., assignor.)
Bushnell, James E., North Plainfield, assignor to Ransome Concrete Machinery Company, Plainfield, N. J. Concrete mixer. 1,677,813; July 17.
Butcher, Charles A., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Automatic reclosing circuit interrupter. 1,677,328; July 17.
Butler, John M., and H. A. Torson, Chicago, Ill., assignors to Ring Pneumatic Tool Company. Tool retainer for pneumatic hammers. 1,677,270; July 17.
C. G. Spring & Bumper Company, The. (See Jandus, Herbert S., assignor.)
C. H. C. Co., The. (See Hapgood, Clarence H., assignor.)
California Transit Company. (See Ahrens, Richard M., assignor.)
Cambridge Rubber Company (See Dunbar, E. W., and Dempsey, assignors.)
Campagna, Salvatore. (See Laviano, B., Alesse, and Campagna.)
Campbell, George W., Hartford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y. Typewriting machine. 1,677,170; July 17.
Cantin, Paul, Eastburg, Alberta, Canada. Cultivator. 1,677,329; July 17.
Carling, William T., Guildford, England. Positive clutch. 1,677,705; July 17.
Carlson, Carl A., Edmonton, Alberta, Canada. Gate construction. 1,677,330; July 17.
Carr, Edward G., Chicago, Ill., assignor to The Lakewood Engineering Company, Lakewood, Ohio. Concrete-road machine. 1,677,877; July 17.
Carr Fastener Company. (See Carr, Fred S., assignor.)
Carr Fastener Company. (See Pierce, Walter H., assignor.)
Carr, Fred S., Newton, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,677,858; July 17.
Carragher, Henry N., Fall River, Mass. Safety lock. 1,677,617; July 17.
Carroll, William J., West Haven, assignor to Sargent & Company, New Haven, Conn. Panic bolt. 1,677,271; July 17.
Carson, Francis L., Berkeley, Calif. Mixing metallic salt in asphaltic compounds. 1,677,272; July 17.
Carty, Richard S., assignor of one-half to C. B. Robinson, Detroit, Mich. Device for displaying automobile numbers. 1,677,580; July 17.
Casey, William F. J., G. Cavin, Kingston, Ontario, and C. E. Brooks, Montreal, Quebec, Canada; said Cavin and said Brooks assignors to said Casey. Bearing. 1,677,171; July 17.
Cavin, Gustave. (See Casey, W. F. J., Cavin, and Brooks.)
Champion Porcelain Company. (See Jeffery, Joseph A., assignor.)
Chemical Preparations, Inc. (See McKenna, Frank J., assignor.)
Cherry, George L., Portland, Oreg. Sill flashing. 1,677,130; July 17.
Chessin, Alexander, New York, N. Y. Gyroscopic apparatus. 1,677,331; July 17.
Chicago-Cleveland Car Roofing Company. (See Jacobs, Francis A., assignor.)
Chrysler Corporation. (See Werdehoff, Albert B., assignor.)
Claflin, Charles A., Medford, assignor to Superior Engineering Company, Boston, Mass. Soot blower for steam boilers. 1,677,383; July 17.
Clapp, Harvey, & Co. (See Person, Axel, assignor.)
Clauder, Arthur W., Bridgeport, Conn., assignor to General Electric Company. Rotary switch handle. 1,677,706; July 17.
Clauss, Robert K., Lehighton, Pa. Pill counting and dispensing machine. 1,677,546; July 17.
Clayton, Martin M., Baden, Pa., assignor to National Metal Molding Company. Liner for electrical connecters. 1,677,332; July 17.
Cleland, Thomas M., Scarboro-on-the-Hudson, N. Y., assignor to Individual Drinking Cup Company, Inc., Easton, Pa. Cup. Des. 75,773; July 17.
Clement, Charles G., assignor to Highway Trailer Company, Edgerton, Wis. Industrial trailer. 1,677,618; July 17.
Cleminshaw, Russell H., Shaker Heights, assignor to The Cleveland Electric Motor Company, Cleveland, Ohio. Sand-mixing machine. 1,677,619; July 17.
Cleveland Electric Motor Company, The. (See Cleminshaw, Russell H., assignor.)
Cleveland Gas Burner and Appliance Company. (See Kerr, Harry E., assignor.)
Clipper Manufacturing Company, The. (See Ortt, Rowley K. and E. K., assignors.)
Close, Otis R. and R. N., Carterville, Mo. Safety snap hook. 1,677,814; July 17.
Close, Roy N. (See Close, Otis R. and R. N.)
Coffman, Samuel M., assignor, by mesne assignments, to Old World Parfum Company, Kansas City, Mo. Perfume-vending machine. 1,677,468; July 17.
Cohen, Benjamin, Brooklyn, N. Y. Awning construction. 1,677,581; July 17.
Cohen, Leon, St. Louis, Mo. Hat pad. 1,677,547; July 17.
Cohen, Leon, St. Louis, Mo. Hat-size reducer. 1,677,548; July 17.
Colbeck, Frederick W., and S. Thronsen, Chicago, Ill., assignors to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for working articles. 1,677,172; July 17.
Cole, Don, assignor of one-half to J. A. Dienner, Chicago, Ill. Internal-combustion engine. 1,677,429; July 17.
Cole, Lester M., Cleveland Heights, E. H. Halter, Maple Heights, and R. H. Lewis, assignors to The Warner & Swasey Company, Cleveland, Ohio. Machine tool for boring and turning irregular surfaces. 1,677,131; July 17.
Coleman, Edward W., Northolt Junction, England. Tire. Des. 75,774; July 17.
Coles, Walter H., Troy, Ohio. Irrigating apparatus. 1,677,228; July 17.
Collins, James G., assignor to Atlas Press Company, Kalamazoo, Mich. High-pressure power press. 1,677,132; July 17.
Collins, William R., Georgetown, Colo. Multiple-air-drill tunneling machine. 1,677,430; July 17.
Columbia Machine Works and Malleable Iron Co. (See Smith, Leo O., assignor.)
Combustion Engineering Corporation. (See Jackson, G. P., and Adamson, assignors.)
Combustion Fuel Oil Burner Company. (See Rogers, H. S., and Raddatz, assignors.)
Compagnie d'Applications Mecaniques. (See Rouanet, Louis, assignor.)
Compton, Percy R., assignor to The E. T. Burrowes Company, Portland, Me. Game board. 1,677,707; July 17.
Conklin, Archie W., assignor, by mesne assignments, to Brodex Company, Winter Haven, Fla. Fruit-treating apparatus. 1,677,229; July 17.
Conklin, Philo H., Toledo, Ohio. Segmental-sleeve-valve engine. 1,677,582; July 17.
Continental Optical Corporation. (See Bugbee, Lucian W., assignor.)
Cook, Benjamin W., Midland, Mich. Gate. 1,677,708; July 17.
Cook, H. N., Belting Company, The. (See Cook, Milton H., assignor.)
Cook, Milton H., assignor to The H. N. Cook Belting Company, San Francisco, Calif. Leather product. 1,677,125; July 17.
Cook, William N., New York, N. Y., assignor to E. B. Meyrowitz, Inc. Goggles. 1,677,747; July 17.
Cord Tire Machine Company, The. (See Morris, Howard L., assignor.)
Cornelissen, Ivar, Galveston, Tex. Hydraulic motor. 1,677,431; July 17.
Cory, M. M. (See Perl, John, assignor.)
Costaguta, David, Buenos Aires, Agentina. Motor fuel. 1,677,273; July 17.
Costello, James F., San Francisco, Calif. Form clamp. 1,677,384; July 17.
Councill, Wilford A., Baltimore, Md. Ureteral stone extractor and dilator. 1,677,671; July 17.
Cousins, Wallace J., Chicago, Ill. Soap dispenser. 1,677,709; July 17.
Cragin, Samuel N., Akron, Ohio. Floor mop. 1,677,748; July 17.
Crain, William E., assignor to W. H. Bahan, Greenville, S. C. Screw for center bearings for looms. 1,677,549; July 17.
Crane, Joseph B., Pittsburgh, Pa., assignor to International Combustion Engineering Corporation. Control of gases through boilers. 1,677,749; July 17.
Crane, Raymond E., Kittanning, Pa. Sanitary fixture. 1,677,550; July 17.

Crippen Manufacturing Company. (See Frevert, Albert A., assignor.)
Croft, Hiram D., assignor to Perkins Machine and Gear Company, Springfield, Mass. Broach. 1,677,815; July 17.
Cromwell, William K., jr., Lake Ruland, assignor to The Gandy Belting Company, Baltimore, Md. Coal bag. 1,677,583; July 17.
Croning, Johannes, Hamburg, Germany, assignor, by mesne assignments, to Crown Lock Company. Adjusting locking cylinders. 1,677,432; July 17.
Cromwell, Carl G., assignor to General Motors Corporation, Detroit, Mich. Adjustable seat structure for automobiles. 1,677,584; July 17.
Crown Lock Company. (See Croning, Johannes, assignor.)
Cummer, Frederick H., Los Angeles, Calif. Asphalt-mixing plant. 1,677,274; July 17.
Cummings, Earle W., assignor of one-half to Santa Barbara Lumber Company, Santa Barbara, Calif. Folding brace. 1,677,620; July 17.
Curley, Robert S., Lowell, Mass., assignor, by mesne assignments, to Kitson Machine Shop. Condenser. 1,677,173; July 17.
"Cyklop" Akt. Ges. (See Stachle, Gustav, assignor.)
Cynthia Mills. (See English, Analdo M., assignor.)
Dabrowski, Joseph M., Brooklyn, assignor to Moore Brothers Company, New York, N. Y. Liquid-soap dispenser. 1,677,750; July 17.
D'Albora, John, Yonkers, N. Y. Scouring implement. 1,677,174; July 17.
Däniker, Alfred, Zurich, Switzerland. Temperature regulator. 1,677,710; July 17.
Daugert, Peter, Wilkes-Barre, H. Frey, Kingston, and J. J. Dunleavy, Plymouth, Pa., assignors to Hess, Goldsmith & Co., Inc., New York, N. Y. Steaming crate. 1,677,385; July 17.
Daun, Carl L., assignor to Silcock Airadiator Corporation, Milwaukee, Wis. Electric motor and dynamo machine. 1,677,433; July 17.
Davidson, Charles L., New York, N. Y. Soot-blower apparatus for steam boilers. 1,677,751; July 17.
Daya, Werner, Berlin-Halensee, Germany. Railway signal apparatus. 1,677,816; July 17.
Dearsley, Irwin E. (See Walker, W. H., Mizer, and Dearsley.)
Deicken, Louis A., Los Angeles, Calif. Food tray. 1,677,276; July 17.
Delaney, Samuel J., Oakland, Calif. Combination convection and radiant heater. 1,677,621; July 17.
Delas, Albert, Paris, France, assignor to Société des Condenseurs Delas. Producing in a solution the crystallization of the body dissolved therein. 1,677,551; July 17.
Deline, Irving A., Denver, Colo. Automatically-operating paper-box shaping and finishing machine. 1,677,386; July 17.
Dely, Frank, New York, N. Y. Ventilator. 1,677,711; July 17.
De Mercurio, Giuseppe, Hammonton, N. J. Rolling window screen. 1,677,230; July 17.
Dempsey, Edmund J. (See Dunbar, E. W., and Dempsey.)
Dennis, Hubert W., London, England. Valve. 1,677,126; July 17.
Dennis, Samuel K., assignor to International Harvester Company, Chicago, Ill. Land-roller bearing. 1,677,127; July 17.
Dennis, Samuel K., Chicago, Ill., assignor to International Harvester Company. Cotton planter. 1,677,469; July 17.
Dent, John A. (See Sessions, Charles R., assignor.)
Derr, Harry E., sr., New York, N. Y., assignor to International Harvester Company. Self-aligning bearing for shafts. 1,677,514; July 17.
Detroit Steel Products Company. (See Barclay, Gustaf I., assignor.)
Deuley, Harvey H., Parkersburg, W. Va. Glass-teeming apparatus. 1,677,275; July 17.
De Verre, Joseph, Oakland, Calif. Apparatus for electroplating and the like. 1,677,817; July 17.
Diamant, Sigismondo, assignor of one-half to C. Scotti, Genoa, Italy. Valve-controlling device for engines and motors. 1,677,552; July 17.
Dibble, Claude M., assignor to Moore Brothers Company, Joliet, Ill. Stove construction. 1,677,585; July 17.
Dieck, Henry W., Brooklyn, assignor to The Standard Textile Products Company, New York, N. Y. Table cover or similar article. Des. 75,775; July 17.
Dieck, Henry W., Brooklyn, assignor to The Standard Textile Products Company, New York, N. Y. Table cover or similar article. Des. 75,776; July 17.
Dieck, Henry W., Brooklyn, assignor to The Standard Textile Products Company, New York, N. Y. Table cover or similar article. Des. 75,777; July 17.
Dieck, Henry W., Brooklyn, assignor to The Standard Textile Products Company, New York, N. Y. Table cover or similar article. Des. 75,778; July 17.
Dieck, Henry W., Brooklyn, assignor to The Standard Textile Products Company, New York, N. Y. Table cover or similar article. Des. 75,779; July 17.
Dieck, Henry W., Brooklyn, assignor to The Standard Textile Products Company, New York, N. Y. Table cover or similar article. Des. 75,780; July 17.
Dieck, Henry W., Brooklyn, assignor to The Standard Textile Products Company, New York, N. Y. Table cover or similar article. Des. 75,781; July 17.
Dienner, John A. (See Cole, Don, assignor.)
Dill Manufacturing Company, The. (See Bronson, Adelbert E., assignor.)
Dion, Jacob, Bitterfeld, Germany, assignor to the firm: I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Electrode holder. 1,677,712; July 17.
Dissett, Thomas B., East St. Louis, Ill. Air heater. 1,677,553; July 17.
Doman, Albert E., Elbridge, N. Y. Mounting for windshield cleaners. 1,677,175; July 17.
Donaly, James L., Newark, N. J. Fish bait. 1,677,176; July 17.
Door Control Company. (See Blodgett, Herbert C., assignor.)
Dorsch, Florence G. (See Dorsch, Max E. and F. G.)
Dorsch, Max E. and F. G., Chicago, Ill. Animal trap. 1,677,470; July 17.
Dorton, John M., Bonner Springs, Kans. Adjustable sent. 1,677,434; July 17.
Douglas, Harry A., Bronson, Mich. Electric reflecting lamp. 1,677,752; July 17.
Dover Stamping & Manufacturing Company. (See Hayes, John E. R., assignor.)
Dover Stamping & Manufacturing Company. (See Whitney, Horace E., assignor.)
Downs, Mabel J., executrix. (See Jones, Albert F.)
Downs, Thomas, Somerset, N. J. Updraft process of and muffle kiln for firing. 1,677,818; July 17.
Drake, Harcourt C., Hempstead, N. Y. Electric toaster. 1,677,177; July 17.
Drouil, Emile J., New Orleans, La. Tool. 1,677,622; July 17.
Drossbach, Otto, Ludwigshafen-on-the-Rhine, and O. Jordan, Mannheim, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Cellulose composition. 1,677,753; July 17.
Dry Quenching Equipment Corporation. (See Moettell, Arnold, assignor.)
Dual Motors Corporation. (See Streeter, Albert B., assignor.)
Dudley, William A., Brooklyn, assignor to The Western Union Telegraph Company, New York, N. Y. Automatic reversing system for multiplex circuits. 1,677,859; July 17.
Dunbar, Ernest W., Hudson, and E. J. Dempsey, West Medford, assignors to Cambridge Rubber Company, Cambridge, Mass. Machine for making straps. 1,677,231; July 17.
Dunham, Henry V., Bainbridge, N. Y., assignor to Van Tassel Company, Boston, Mass. Waterproofing leather. 1,677,435; July 17.
Dunleavy, John J. (See Daugert, P., Frey, and Dunleavy.)
Dunton, Harris D., Schenectady, N. Y., assignor to General Electric Company. Electric switch. 1,677,713; July 17.
Duquette, E. F. (See Lewis, Morgan J., assignor.)
Durand, Antoine M., New Haven, Conn. Package for pile fabrics and the like. 1,677,515; July 17.
Earle, Lee E., Albany, assignor to United Royalties Corporation, New York, N. Y. Beater. 1,677,754; July 17.
Eberhart, Felix, Arlington, N. J., assignor to American Can Company, New York, N. Y. Decorated box. Des. 75,782; July 17.
Edele, Harry H., St. Louis, Mo. Child's vehicle. 1,677,586; July 17.
Edge Moor Iron Company. (See Montgomery, Wallace, assignor.)
Edmondson, Samuel G., St. Louis, Mo. Lamp standard. Des. 75,783; July 17.
Effront, Jean. (See Boidin, A., and Effront.)
Ellar, Oliver P., Lawrenceville, Ill. Patch camp for pipe. 1,677,623; July 17.
Eldridge, Ida M., assignor of one-half to L. R. Hoefler, Los Angeles, Calif. Manicuring instrument. Des. 75,784; July 17.
Electric Household Utilities Corporation. (See Hume, John T., assignor.)
Electric Service Supplies Company. (See Smith, William H., assignor.)
Elliot, William S., and W. Noble, assignors to Pro-phy-lactic Brush Company, Northampton, Mass. Brush-making machine. 1,677,672; July 17.
Elwell-Parker Electric Company, The. (See Goldrick, Albert R., assignor.)
Engel-Kron, George M., New York, N. Y., and S. Trey, Stamford, Conn. Hand bag. 1,677,142; July 17.
English, Analdo M., Brookline, assignor to Cynthia Mills, East Boston, Mass. Package-banding machine. 1,677,587; July 17.
English & Mersick Co., The. (See Kalmer, Richard V., assignor.)
Enterprise Optical Manufacturing Company, The. (See Roebuck, Alvah C., assignor.)
Evans, Alva L. (See Lange, M. E., and Evans.)
Evans, Robert D. (See Fortescue, C. L., and Evans.)
Eveland, La Vere J. (See Watkins, H. L., and Eveland.)
Evers, Edward P. (See Ballman, E. C., and Evers.)
Faessler, J., Manufacturing Company, The. (See Maupin, Graves R., assignor.)

Fain, William H. (See Kantorowicz, Julius, assignor.)
Farquharson, Irving W., Media, Pa. Spark plug. 1,677,516; July 17.
Faust, Jacob, Passaic, N. J. Steam pressing iron. 1,677,819; July 17.
Fay, Joseph W., Villa Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and apparatus for assembling members. 1,677,178; July 17.
Federbush, Jacob D. (See Federbush, Max W. and J. D.)
Federbush, Max W. and J. D., New York, N. Y. Removable window tag for binders. 1,677,277; July 17.
Ferngren, Enoch T., Beaver, Pa., assignor, by mesne assignments, to Hartford-Empire Company, Hartford, Conn. Glass feeding and delivering mechanism and process. 1,677,436; July 17.
Ferrari, John P., San Francisco, Calif. Power-driven fruit press. 1,677,517; July 17.
Ferris, John P., assignor to The Oilgear Company, Milwaukee, Wis. Assembly press. 1,677,860; July 17.
Ferro, Claude B., San Bernardino, Calif. Traffic signal for motor vehicles. 1,677,624; July 17.
Firestone Tire and Rubber Company, The. (See Benner, W. W., and Hoener, assignors.)
Firestone Tire and Rubber Company, The. (See Goodall, Fred, assignor.)
Firestone Tire and Rubber Company, The. (See Pade, Max H., assignor.)
Firestone Tire and Rubber Company, The. (See Putt, Edward D., assignor.)
Firestone Steel Products Company, The. (See Swain, Joseph G., assignor.)
Fischer, Albert C. (See Appleton, E. G., Fischer, and Mooney.)
Fisher, David G., et al. (See Woodman, Mark G., assignor.)
Fitch, Jason A. (See Brainard, G. C., Fitch, and Gourley.)
Fitz Gibbon Co., The. (See Fitz Gibbon, John, assignor.)
Fitz Gibbon, John, Bronxville, assignor to The Fitz Gibbon Co., Inc., New York, N. Y. Glove. Des. 75,785; July 17.
Foehrenbach, Arthur F., assignor to The Berger Manufacturing Company, Canton, Ohio. Locker latch. 1,677,278; July 17.
Folk, Joseph, assignor to U. S. Slicing Machine Company, La Porte, Ind. Slicing machine. 1,677,457; July 17.
Ford, Ben K., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Method of and machine for feeding and working articles. 1,677,133; July 17.
Ford, Henry, Dearborn, Mich. Combined instrument-board and gas-tank construction. 1,677,279; July 17.
Forsyth, George H., Harvey, Ill., assignor, by mesne assignments, to Steel Wheel Corporation, Lansing, Mich. Disk wheel. 1,677,755; July 17.
Fortescue, Charles L., and R. D. Evans, Pittsburgh, Pa., assignors to Westinghouse Electric & Manufacturing Company. Electrical protective system. 1,677,333; July 17.
Foss, Oscar, Aneroid, Saskatchewan, Canada. Music roll for player pianos. 1,677,756; July 17.
Foster, Inez M., Simla, India. Novelty holder. 1,677,820; July 17.
Fout, Richard L. (See Harrison, H. H., Allender, and Fout.)
Fox, Maud C., New York, N. Y. Wall pot holder. Des. 75,786; July 17.
Fralley, Joseph R. (See Kelso, Joseph, assignor.)
Frank, Felix, San Francisco, Calif., assignor, by mesne assignments, to W. W. Kemp, Baltimore, Md. Treatment of carbonaceous and other materials. 1,677,757; July 17.
Frank, Felix, San Francisco, Calif., assignor, by mesne assignments, to W. W. Kemp, Baltimore, Md. Treatment of carbonaceous and other materials. 1,677,758; July 17.
Frantz, Walter A., assignor to The Apex Electrical Manufacturing Company, Cleveland, Ohio. Suction cleaning device. 1,677,625; July 17.
Frappy, Joseph, Stirling, Ontario, Canada. Septic tank. 1,677,626; July 17.
Frease, Hurxthal F., Canton, Ohio. Tubular structure. 1,677,714; July 17.
Frevert, Albert A., assignor to Crippen Manufacturing Company, Alma, Mich. Vibrating mechanism. 1,677,759; July 17.
Frey, Henry. (See Dangert, P., Frey, and Dunleavy.)
Friederici, August, Cologne-Mulheim, Germany, assignor to M. Friederici, Steubenville, Ohio. Electrically-driven forging press. 1,677,471; July 17.
Friederici, Max. (See Friederici, August, assignor.)
Frohnhauser, Heinrich, Dortmund, Westphalia, Germany. Apparatus for producing meshed sheet metal, flat bars, and hoop iron. 1,677,438; July 17.
Frontier Manufacturing Company. (See Schaefer, Adolph A., assignor.)
Fuchs, Friedrich, assignor to the firm Ringler & Co. Verlagsanstalt & Vereinigte Buch- & Steindruckereien Zofingen, Switzerland. Multicolor rotary printing press. 1,677,472; July 17.
Fulton, Le Roy M., Chicago, Ill. Portable support. 1,677,439; July 17.
Funk, Truman B., assignor to Automotive Fan & Bearing Company, Jackson, Mich. Pulley. 1,677,134; July 17.
Furnivals 1913 Limited. (See Bailey, John, assignor.)
Galdos, Alonzo F., Oakland, Calif. Combination pencil container and lead magazine. 1,677,387; July 17.
Gall, John F., Evanston, Ill., assignor to Simmons Company, New York, N. Y. Mattress or cushion and boxing therefor and making same. 1,677,232; July 17.
Galassi, Pasquale, New York, N. Y. Dividing strip for terrazzo flooring. 1,677,760; July 17.
Gallagher, Arthur D. (See Lindgren, A. C., and Gallagher.)
Gams, Alphonse, and P. Scheidegger, assignors to the firm Society of Chemical Industry in Basle, Basel, Switzerland. Compound of gall acids and making same. 1,677,554; July 17.
Gandy Belting Company, The. (See Cromwell, William K., jr., assignor.)
Garvin, Fred W., Jamestown, N. Y. Dump wagon. 1,677,555; July 17.
Gary, Wright W., assignor of one-half to C. O. Middleton, Los Angeles, Calif. Treating petroleums. 1,677,440; July 17.
Gast, William W., Baltimore, Md. Socket wrench and screw driver. 1,677,473; July 17.
Gebr. Staubli & Co. (See Staubli, Hugo, assignor.)
Gem Clay Forming Company, The. (See Greene, Raymond J., assignor.)
General Electric Company. (See Alexanderson, Ernst F. W., assignor.)
General Electric Company. (See Bany, H., and Hoffmann, assignor.)
General Electrical Company. (See Bennett, Ralph S., assignor.)
General Electric Company. (See Clauder, Arthur W., assignor.)
General Electric Company. (See Dunton, Harris D., assignor.)
General Electric Company. (See Gittings, William N., assignor.)
General Electric Company. (See Lincks, George F., assignor.)
General Electric Company. (See Montainger, Vincent M., assignor.)
General Electric Company. (See Robinson, L. T., and Sabbah, assignors.)
General Electric Company. (See Vogdes, Francis B., assignor.)
General Fireproofing Company, The. (See Brainard, G. C., Fitch and Gourley, assignors.)
General Motors Corporation. (See Cronwall, Carl G., assignor.)
Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Thermostatic overload switch. 1,677,334; July 17.
Getchell, Benjamin E., assignor to The Trumbull Electric Manufacturing Company, Plainville, Conn. Automatic electric switch. 1,677,335; July 17.
Gibian, Eric H. (See Gunther, L., and Gibian.)
Gibian, Eric H., Chicago, Ill., assignor to The Vitrolite Company. Tile or artice of simiar nature. Des. 75,790; July 17.
Gibian, Eric H., Chicago, Ill., assignor to The Vitrolite Company. Tile or article of similar nature. Des. 75,791; July 17.
Gifford, Albert J., Shrewsbury, and B. S. T. Bishop, assignors to Leland-Gifford Company, Worcester, Mass. Machine for milling crank-shaft pins. 1,677,761; July 17.
Gilbert, Alfred C., assignor, by mesne assignments, to The A. C. Gilbert Company, New Haven, Conn. Towel bar. 1,677,280; July 17.
Gilbert, Alfred C., assignor, by mesne assignments, to The A. C. Gilbert Company, New Haven, Conn. Electric heater. 1,677,281; July 17.
Gilbert, A. C., Company, The. (See Gilbert, Alfred C., assignor.)
Gilburg, Roy O., assignor to Marathon Electric Mfg. Co., Wausau, Wis. Motor-assembling fixture. 1,677,762; July 17.
Gillett, Merriman C., Philadelphia, assignor to Standard Heater Company, Williamsport, Pa. Steam generator. 1,677,763; July 17.
Gill, Terence A. (See Kochendorfer, F. S., and Gill.)
Gilson, Robert M., Pittsburgh, assignor to The Union Switch & Signal Company, Swissvale, Pa. Railway-traffic-controlling apparatus. 1,677,518; July 17.
Ginter, Paul A., assignor to The American Bottle Company, Toledo, Ohio. Des. 75,787; July 17.
Ginter, Paul A., assignor to The American Bottle Company, Toledo, Ohio. Bottle. Des. 75,788; July 17.
Ginter, Paul A., assignor to The American Bottle Company, Toledo, Ohio. Bottle. Des. 75,789; July 17.
Gittings, William N., Springfield, Pa., assignor to General Electric Company. Automatic switching system. 1,677,715; July 17.
Glockler, John E., Pittsburgh, Pa. Supporting bracket for parallel rails, rods, and the like. 1,677,764; July 17.
Goedeke, Fred W. (See Moll, Walter, assignor.)
Goetz, Oscar H., Springfield, Mass., assignor to American Chain Company, Inc. Automobile fender guard. 1,677,765; July 17.

Goldrick, Albert R., assignor to The Elwell-Parker Electric Company, Cleveland, Ohio. Industrial truck. Re17,043; July 17.

Goldsborough, Shirley L., Pittsburgh, Pa., assignor to Westinghouse Electric and Manufacturing Company. Induction relay. 1,677,330; July 17.

Goller, Eugene E., assignor to Unique Manufacturing Company, Chicago, Ill. Vaporizing nozzle. 1,677,766; July 17.

Gonyk, Ignatz, Ljubljana, Yugoslavia. Automatic lubricating device for hinges of doors and windows. 1,677,441; July 17.

Goodall, Fred, assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Method and apparatus for handling tacky strip material. 1,677,861; July 17.

Goodchild, Walter, and N. Sclar, assignors to Magic Device Corporation, Hoboken, N. J. Vending machine. 1,677,519; July 17.

Goodrich, B. F., Company, The. (See Graham, T. G., and Schippel, assignors.)

Goodrich, B. F., Company, The. (See Mell, Tod J., assignor.)

Goodrich, B. F., Company, The. (See Merrill, Allan B., assignor.)

Goodridge, Gilbert W., Fairfield, assignor to The Read Chain Manufacturing Company, Bridgeport, Conn. Pencil carrier. 1,677,767; July 17.

Goodrow, Harvey L., Hinsdale, assignor to Wm. Goodrow Moulding Co., Chicago, Ill. Window cornice. 1,677,627; July 17.

Goodrow, Wm., Moulding Co. (See Goodrow, Harvey L., assignor.)

Göpel, Carl, Halle-on-the-Saale, Germany. Device for discharging praline cores from the powdering box. 1,677,179; July 17.

Gorton, Walter T., U. S. Army, Springfield, Mass. Sear mechanism. 1,677,588; July 17.

Gottesman, Herman O., New York, N. Y. Emergency umbrella. 1,677,520; July 17.

Gould, Harry V., Bridgeport, Conn. Cable connecter for outlet boxes. 1,677,628; July 17.

Gourley, Glenn T. (See Brainard, G. C., Fitch, and Gourley.)

Graham, Andrew O., Fort Worth, Tex. Brick-mason's gauge. 1,677,821; July 17.

Graham, Thornton G., Kent, and H. F. Schippel, Akron, Ohio, assignors to The B. F. Goodrich Company, New York, N. Y. Tire. Des. 75,792; July 17.

Graham, William S., Canton, assignor to International Harvester Company, Chicago, Ill. Tractor lister. 1,677,474; July 17.

Gramse, Roy A., assignor to Southern Textile Machinery Co., Paducah, Ky. Stop mechanism for sewing machines. 1,677,673; July 17.

Grass Ill Dyestuff Corporation. (See Braunsdorf, O., Holzapfel, and Nawiasky, assignors.)

Grasselli Dyestuff Corporation. (See Keller, F., and Schnitzpahn, assignors.)

Grasselli Dyestuff Corporation. (See Wagner, H., and Vossen, assignors.)

Graves, Charles M., New York, N. Y. Locking device. 1,677,768; July 17.

Gray, Wallace M., Cincinnati, assignor to The American Valve and Meter Company, Cincinnati, Ohio. Automatic switch stand. 1,677,388; July 17.

Green, Thomas L. (See Green, T. L., and Williams, assignors.)

Green, Thomas L., and C. H. Williams, assignors to said Thomas L. Green, Indianapolis, Ind. Cutter mechanism for plastic material. 1,677,180; July 17.

Greene, Raymond J., assignor to The Gem Clay Forming Company, Sebring, Ohio. Making antique surfaces. 1,677,716; July 17.

Grey, Arthur W. (See Parsons, C. A., Rosen, Grey, and Midgley.)

Groetsch, John H. Gaylord, Minn. Lawn-mower sharpener. 1,677,556; July 17.

Grondahl, Hans H. C., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Material-handling apparatus. 1,677,181; July 17.

Gross, Fred G., assignor to Mrs. C. Schneider, Chicago, Ill. Attachment for legs and grates. 1,677,629; July 17.

Grove, Thomas E., Dayton, Ohio. Antrum drill. 1,677,337; July 17.

Gulliford, Nicholas L., Peabody, Mass. Heel block and forming the same. 1,677,822; July 17.

Gunnell, Oswald, Bootle, near Liverpool, England. Label or tab for use with goods which have to be dyed. 1,677,475; July 17.

Gunther, Lillian, and E. H. Gibian, Chicago, Ill., assignors to The Vitrolite Company, Tile or article of similar nature. Des. 75,793; July 17.

Gunzler, Heinrich, and O. Neubert, Elberfield, Germany, assignors to Winthrop Chemical Company, Inc., New York, N. Y. Polyhydroxy-mercury compound. 1,677,823; July 17.

Guthrie, Crerar. (See Guthrie, Thomas W. and C.)

Guthrie, Thomas W., Southport, England, and C. Guthrie, Yoker, Glasgow, Scotland. Billiard-cue tip. 1,677,282; July 17.

Guthrie, William S., Los Angeles, Calif., assignor to Marvel Carburetor Company, Flint, Mich. Carburetor for internal-combustion engines. 1,677,233; July 17.

Haas, Clarence H., and L. J. Mitchell, Warren, Ohio. Steam boiler. 1,677,630; July 17.

Haas, Louis A., St. Paul, Minn. Antibacklash attachment for reels. 1,677,631; July 17.

Haase, Carl O., Winnetka, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Strand-working mechanism. 1,677,135; July 17.

Haberland Manufacturing Company. (See Wulkan, Eugene, assignor.)

Haden, Harry Y., New York, N. Y. Fire-fighting boat. 1,677,769; July 17.

Hagadone, Clinton A., Western Springs, assignor to International Harvester Company, Chicago, Ill. Convertible running gear for wagons. 1,677,476; July 17.

Hale, Samuel O., Whittier, Calif. Combined clutch and brake mechanism for hoisting drums. 1,677,338; July 17.

Hall, John C., Whiting, Ind. Indoor golf apparatus. 1,677,442; July 17.

Hall, Theodore, assignor to The Sperry Gyroscope Company, Brooklyn, N. Y. Projector lamp. 1,677,521; July 17.

Hallberg, Josef H., New York, N. Y. Radio apparatus. 1,677,589; July 17.

Halter, Edmund H. (See Cole, L. M., Halter, and Lewis.)

Hansen Canning Machinery Corporation. (See Hansen, Oswald H., assignor.)

Hansen, Oswald H., assignor to Hansen Canning Machinery Corporation, Port Washington, Wis. Can washer. 1,677,443; July 17.

Hansen, Oswald H., Port Washington, assignor to Hansen Canning Machinery Corporation, Cedarburg, Wis. Beet topper. 1,677,444; July 17.

Hansen, Theodore N., Seattle, Wash. Pocket folding stool. 1,677,339; July 17.

Haygood, Clarence H., assignor, by mesne assignments, to The C. H. C. Co., Toledo, Ohio. Thermostatic regulator. 1,677,340; July 17.

Harden, Walter, Cincinnati, Ohio. Sound-wave transmitting and amplifying device. 1,677,632; July 17.

Hardos, George, Dunmore, Pa. Battery-terminal clamp. 1,677,445; July 17.

Harnsberger, Harry H., Brooklyn, assignor to Modern Management Corporation, New York, N. Y. Pocket wallet. 1,677,770; July 17.

Harris, John, Nuneaton, England. Collar-shaping machine. 1,677,771; July 17.

Harrison, Arthur W., Eagle Rock, assignor of one-half to T. D. Sexton, Los Angeles, Calif. Power brake for motor vehicles. 1,677,633; July 17.

Harrison, Henry H., H. W. Allender, and R. L. Fout, Thomas, W. Va. Coal-loading and track-cleaning machine. 1,677,824; July 17.

Hartford Empire Company. (See Ferngren, Enoch T., assignor.)

Hartmetz, Ernst, Oberesslingen-on-the-Neckar, Germany. Blower. 1,677,446; July 17.

Harvey, Leo M., Los Angeles, Calif. Tie for box straps. 1,677,522; July 17.

Hasselbach, Alexander, assignor to G. Polysius, Dessau, Germany. Manufacturing cements rich in alumina. 1,677,182; July 17.

Hayes, John E. R., Melrose, assignor to Dover Stamping & Manufacturing Company, Cambridge, Mass. Can. 1,677,284; July 17.

Hazeltine Corporation. (See MacDonald, William A. assignor.)

Heggie Simplex Boiler Company. (See Birchfield, Robert W., assignor.)

Hendricks, Jesse C., Greensburg, Ind. Sound-amplifying horn. 1,677,782; July 17.

Hengstenberg, Paul M., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electrode for evacuated electric devices. 1,677,341; July 17.

Hepburn, William M., Denver, Colo., assignor to Surface Combustion Company. Continuous carbonizing furnace. 1,677,136; July 17.

Herbert, Leon S., Cynwyd, Pa. Striping attachment for knitting machines. 1,677,477; July 17.

Herbst, William K., Hillside, and R. H. Stone, Irvington, N. J., assignors to Titeflex Metal Hose Co. Solidified seam tube. 1,677,523; July 17.

Herrold, Russell P., Zanesville, Ohio, assignor to The Mossaic Tile Company. Ceramic-sorting machine. 1,677,862; July 17.

Herthel, Eugene C., and T. D. Tifft, Chicago, Ill., assignors to Sinclair Refining Company, New York, N. Y. Cracking hydrocarbons. 1,677,772; July 17.

Herthel, Eugene C., and T. D. Tifft, Chicago, Ill., assignors to Sinclair Refining Company, New York, N. Y. Cracking hydrocarbon oils. 1,677,773; July 17.

Herthel, Eugene C., and T. D. Tifft, Chicago, Ill., assignors to Sinclair Refining Company, New York, N. Y. Cracking hydrocarbon oils. 1,677,774; July 17.

Herthel, Eugene C., and T. D. Tifft, Chicago, Ill., assignors to Sinclair Refining Company, New York, N. Y. Cracking hydrocarbon oils. 1,677,775; July 17.

Herthel, Eugene C., and T. D. Tifft, Chicago, Ill., assignors to Sinclair Refining Company, New York, N. Y. Cracking hydrocarbon oils. 1,677,776; July 17.

Hess-Bright Manufacturing Company, The. (See Linde, Andrew H., assignor.)

Hess, Goldsmith & Co. (See Daugert, P., Frey, and Dunleavy, assignors.)

Heuser, Ralph V., Elizabeth, N. J., assignor to A. C. Burrage, Manchester, Mass. Vulcanization of rubber and product thereof. 1,677,235; July 17.

Hiering, William C., assignor to J. E. Mergott Co., Newark, N. J. Bag fastener. 1,677,137; July 17.

Higgins, Frank, and A. E. Nordstrom, Princeton, Ill. Hydrocarbon burner. 1,677,447; July 17.

Highway Trailer Company. (See Clement, Charles G., assignor.)

Hilly, Alpheus M., McKeesport, Pa. Sash fastener. 1,677,825; July 17.

Hipp, Didisheim Company. (See Laska, Abraham, assignor.)

Hipple, James L., Canton, Ill., assignor to International Harvester Company. Tractor planter. 1,677,478; July 17.

Hochriem, Gustav F., assignor to Rhodes-Hochriem Manufacturing Co., Chicago, Ill. Attachment for weight-recording scales. 1,677,826; July 17.

Hochriem, Gustav F., assignor to Rhodes-Hochriem Manufacturing Co., Chicago, Ill. Coin-controlled ticket printing and delivering scale. 1,677,827; July 17.

Hodge, John C., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Tension device. 1,677,138; July 17.

Hodgen, James H., Los Angeles, Calif. Back filler for ditches. 1,677,342; July 17.

Hodgson, Harriette E., New York, N. Y. Ice-rescue device. 1,677,236; July 17.

Hoe, R., & Co. (See Lamatsch, Frederick, assignor.)

Hoefler, Lena R. (See Eldridge, Ida M., assignor.)

Hoener, Edmund A. (See Benner, W. W., and Hoener.)

Hoffmann, Daniel C. (See Bany, H., and Hoffmann.)

Hoffman, Harry L., assignor to Richard E. Thibaut, Inc., New York, N. Y. Wall-paper panel or the like. Des. 75,794; July 17.

Holzapfel, Eduard. (See Braunsdorf, O., Holzapfel, and Nawiasky.)

Holzverkohlungs-Industrie Aktiengesellschaft. (See Krause, Erich, assignor.)

Hopkins, Augusta D., New Orleans, La. Grater. 1,677,448; July 17.

Horton, Edgar W., and H. G. Richardson, San Antonio, Tex. Gas outlet. 1,677,634; July 17.

Houseman, Cecil R., Wembley, England, assignor, by mesne assignments, to Air Reduction Company, Incorporated. Heat-interchange device. 1,677,777; July 17.

Howard, Leslie E., and A. D. Potts, Lockport, N. Y., assignors to Simonds Saw and Steel Company, Fitchburg, Mass., Producing permanent magnets. 1,677,674; July 17.

Howe, Fletcher A., and N. C. Bang, Spencer, Iowa. Cleaner attachment for rakes. 1,677,635; July 17.

Howes, Raymond T., Wilmington, assignor to Pan American Petroleum Company, Los Angeles, Calif. Cylinder-oil composition and preparing same. 1,677,389; July 17.

Howlett, Peyton L., Brownwood, Tex. Cotton-tie splice. 1,677,828; July 17.

Howlett, Robert E., Malden, Mass. Stitch-down shoe and making same. 1,677,343; July 17.

Hubbard, Henry E., assignor, by mesne assignments, to Addressograph Company, Chicago, Ill. Addressing machine. 1,677,344; July 17.

Hubbard, Henry E., assignor, by mesne assignments, to Addressograph Company, Chicago, Ill. Printing device. 1,677,449; July 17.

Hubbell, Harvey, Jr., assignor to Harvey Hubbell, Incorporated, Bridgeport, Conn. Electric fan. Des. 75,795; July 17.

Hubbell, Harvey, Incorporated. (See Hubbell, Harvey, jr., assignor.)

Huff, Leslie R., Phillipsburg, N. J., assignor to Ingersoll-Rand Company, Jersey City, N. J. Plate valve. 1,677,717; July 17.

Hughes, Alfred L., Colorado Springs, Colo. Automatic vehicle gate. 1,677,345; July 17.

Hume, John T., assignor, by mesne assignments, to Electric Household Utilities Corporation, Chicago, Ill. Power-operated clothes wringer. 1,677,863; July 17.

Huntington, Willis G. (See Roberts, F. B., and Huntington.)

Hunter, Edgar K., assignor to J. R. C. August, London, England. Automatic-focusing optical projection apparatus. 1,677,778; July 17.

Huot, Elzie. (See Larrigan, Thomas, assignor.)

Hutchins, James V. (See Ditter, Frank M., assignor.)

Hyde Engineering Company. (See Hyde, Henry W., assignor.)

Hyde, Henry W., North Cohasset, assignor to Hyde Engineering Company, Boston, Mass. Spring suspension for vehicles. 1,677,675; July 17.

Hyde, Henry W., North Cohasset, assignor to Hyde Engineering Company, Boston, Mass. Spring suspension for vehicles. 1,677,676; July 17.

I. G. Farbenindustrie Aktiengesellschaft. (See Dion, Jacob, assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Drosbach, O., and Jordan, assignors.)

Ide, Geo. P., & Company. (See Becker, Donald B., assignor.)

I. G. Farbenindustrie Aktiengesellschaft. (See Sator, K., and Pfannmuller, assignors.)

Iden, Max W., Altona, Germany. Float. 1,677,450; July 17.

Independent Pneumatic Tool Company. (See Nelson, John T., assignor.)

Individual Drinking Cup Company. (See Cleland, Thomas M., assignor.)

Industrial Brownhoist Corporation. (See Steinbrenner, Henry G., assignor.)

Inecto, Inc. (See Winogradoff, Alexander, assignor.)

Ingersoll-Rand Company. (See Huff, Leslie R., assignor.)

Ingersoll-Rand Company. (See Prellwitz, William, assignor.)

International Combustion Engineering Corporation. (See Crane, Joseph B. assignor.)

International Harvester Company. (See Dennis, Samuel K., assignor.)

International Harvester Company. (See Derr, Harry E., sr., assignor.)

International Harvester Company. (See Graham, William S., assignor.)

International Harvester Company. (See Hagadone, Clinton A., assignor.)

International Harvester Company. (See Hipple, James L., assignor.)

International Harvester Company. (See Johnson, Andrew L., assignor.)

International Harvester Company. (See Lindgren, A. C., and Gallagher, assignors.)

International Harvester Company. (See Pearson, Charles, assignor.)

International Harvester Company. (See Raney, C. R., and Johnson, assignors.)

International Harvester Company. (See Rice, George L., assignor.)

International Harvester Company. (See Thomson, Clarence Y., sr., assignor.)

Irwin, Dewitt D., East Liverpool, Ohio, assignor of one-half to E. M. Knowles, Newell, W. Va. Sagger-making machine. 1,677,677; July 17.

Jack, Clarence H., Versailles, assignor to Layton Fire Clay Company, McKeesport, Pa. Pavement. 1,677,829; July 17.

Jackson, George P., Flushing, and A. V. Adamson, Hempstead, N. Y., assignors to Combustion Engineering Corporation. Handling and feeding pulverized fuel. 1,677,779; July 17.

Jackson, Ray P., Edgewood Park, Pa., assignor to Westinghouse Electric & Manufacturing Company. Insulator. 1,677,346; July 17.

Jacobs, Francis A., Warren, Ohio, assignor, by mesne assignments, to Chicago-Cleveland Car Roofing Company, Chicago, Ill. Car roof. 1,677,183; July 17.

Jacobsen, Emil, New York, N. Y., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Semiautomatic telephone system. 1,677,451; July 17.

Jacobson, Henry A. (See Bishop, B. S. T., and Jacobson.)

Jaffe, Lawson L., Chicago, Ill., assignor to S. Wechter Company. Ring or similar article. Des. 75,796; July 17.

Jaffe, Lawson L., assignor to S. Wechter Company, Chicago, Ill. Ring or similar article. Des. 75,797; July 17.

Jagschitz, Konrad, Mainz, assignor to Maschinenfabrik Augsburg-Nuernberg A. G., Nuremberg, Bavaria, Germany. Gasometer. 1,677,524; July 17.

Jandus, Herbert S. (See Jandus, William, assignor.)

Jandus, Herbert S., assignor to The C. G. Spring & Bumper Company, Detroit, Mich. Clamp plate. Des. 75,798; July 17.

Jandus, Herbert S., assignor to The C. G. Spring & Bumper Company, Detroit, Mich. Clamp plate. Des. 75,799; July 17.

Jandus, Herbert S., assignor to The C. G. Spring & Bumper Company, Detroit, Mich. Clamp plate. Des. 75,800; July 17.

Jandus, William, East Cleveland, Ohio, assignor of one-half to H. S. Jandus, Detroit, Mich. Measuring instrument. 1,677,864; July 17.

Janke, Emil. (See Blattner, Frederick, jr., and Janke.)

Jaworowski, Joseph F., Cleveland, Ohio. Air pump. 1,677,780; July 17.

Jeffery, Joseph A., Detroit, Mich., assignor to Champion Porcelain Company. Sagger. 1,677,452; July 17.

Jeffrey Manufacturing Company, The. (See Levin, Nils D., assignor.)

Jenkins, Charles F., Washington, D. C. Prism-lens unit. 1,677,590; July 17.

Jenner, Egbert C., Independence, Mo. Projecting machine. 1,677,237; July 17.

Jessen, Victor, Copenhagen, Denmark. Device for actuating the coupling and the brake in automobiles. 1,677,718; July 17.

Johnson, Andrew L., Chicago, Ill., assignor to International Harvester Company. Kafir-corn-cutting attachment. 1,677,479; July 17.

Johnson, Arnold E. W. (See Raney, C. R., and Johnson.)

Johnson, Russell, Pittsburg, Kans. Indoor golf game. 1,677,557; July 17.

Johnston, William D., Independence, Mo. Flue heater. 1,677,636; July 17.

Jones, Albert F., deceased, Salem, Mass.; M. J. Downs, executrix. Machine for making covered boxes. 1,677,390; July 17.

Jones, Caradoc L., Chicago Heights, Ill. Coating machine. 1,677,453; July 17.
Jones, Edgecombe M., Utica, N. Y. Bleaching composition. 1,677,283; July 17.
Jones, Josiah L., St. Petersburg, Fla. Melted-ice water. 1,677,454; July 17.
Jones, Josiah L., St. Petersburg, Fla. Melted-ice-water cooler. 1,677,455; July 17.
Jones, Willis H., Buffalo, N. Y. Pipe-flange wrench. 1,677,637; July 17.
Jordan, Otto. (See Drossbach, O., and Jordan.)
Jost, Albert, Yonkers, N. Y. Saftey device for airplanes. 1,677,638; July 17.
Joughin, Robert, Waikino, New Zealand. Adapting motor tractors for haulage purposes on rail or tram lines. 1,677,184; July 17.
Joyner, Laurie, Philadelphia, Pa. Cylinder cock. 1,677,781; July 17.
Kadel, Byers W., Baltimore, Md., assignor to The Symington Company, New York, N. Y. Side frame. 1,677,347; July 17.
Kaelma Manufacturing Company. (See Snyder, George C., assignor.)
Kaempfer, Wilhelm. (See Nagel, O., and Kaempfer.)
Kalmer, Richard V., assignor to The English & Mersick Co., New Haven, Conn. Latch for vehicle doors. Re17,035; July 17.
Kaisling, William, assignor to Kellogg Switchboard and Supply Company, Chicago, Ill. Receiver. 1,677,185; July 17.
Kallmeyer, Theophilus, Wilmington, Calif. Aparatus for lifting oil in oil wells. 1,677,349; July 17.
Kamerick, Martin T., Pella, Iowa. Tractor hitch. 1,677,639; July 17.
Kantorowicz, Julius, Breslau, Germany, assignor to W. H. Fain, Greenwich, Conn. Treating starch. 1,677,348; July 17.
Karcher, John C., Oak Park, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Increasing the permeability of silicon steel. 1,677,139; July 17.
Kearney, James R., Kansas City, Mo. Electric connection. 1,677,783; July 17.
Keller, Ferdinand, Offenbach-on-the-Main-Burgel, and K. Schnitzspahn, Offenbach-on-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Solid diazosalts of ortho-amino-phenolarylethers. 1,677,558; July 17.
Keller, Ferdinand, Offenbach-on-the-Main-Burgel, and K. Schnitzspahn, Offenbachion-the-Main, Germany, assignors to Grasselli Dyestuff Corporation, New York, N. Y. Solid diazosalt. 1,677,640; July 17.
Keller, George W., Portsmouth, Ohio. Low-water alarm. 1,677,830; July 17.
Kelley-Koett Manufacturing Company, The. (See Werner, Wilbur S., assignor.)
Kellogg Switchboard and Supply Company. (See Kaisling, William, assignor.)
Kelso, Joseph, Bellevue, assignor to J. R. Frailey, Fort Madison, Iowa. Flowerpot-base former. 1,677,391; July 17.
Kemp, William W. (See Frank, Felix, assignor.)
Kemp, William W., Baltimore, Md. Method of and apparatus for reducing materials by heat. 1,677,784; July 17.
Kemp, William W., Baltimore, Md. Producing combustible gas. 1,677,785; July 17.
Kenney, Patrick H., Cumberland, Md. Piston-removing device. 1,677,786; July 17.
Kerr, Harry E., assignor to The Cleveland Gas Burner and Appliance Company, Cleveland, Ohio. Gas burner. 1,677,787; July 17.
Ketterman, John S., Dallas, Tex. Building construction. 1,677,140; July 17.
Kharasch, Morris S., College Park, Ind. Water-soluble organic compound of arsenic and producing it. 1,677,392; July 17.
Kidney, Robert J., Buffalo, N. Y. Bath cabinet. 1,677,393; July 17.
Kinney, James A., Lebanon, assignor to Bethlehem Steel Company, Bethlehem, Pa. Automatic pointing and threading machine. 1,677,238; July 17.
Kinney, Justus R., Jamaica Plain, Mass. Draining pad. 1,677,641; July 17.
Kirchenbauer, Louis J., Chicago, Ill., assignor, by mesne assignments, to The R. K. Le Blond Machine Tool Company. Crank-pin lathe. Re17,040; July 17.
Kirk, William J., Wellsburg, W. Va. Internal applicator. 1,677,642; July 17.
Kitson Machine Shop. (See Surley, Robert S., assignor.)
Kivlan, John L., Boston, assignor, by mesne assignments, to W. L. Walker, Worcester, Mass. Jar-trimming machine. 1,677,239; July 17.
Kleckner, Arthur C., assignor to Webster Electric Company, Racine, Wis. Casing for electrical apparatus. 1,677,350; July 17.
Knowles, Edwin M., (See Irwin, Dewitt D., assignor.)
Knowlton, William A., Dorchester, Mass. Grate. 1,677,787; July 17.
Koch, Aloys, assignor to the firm of Perliner Stickmaschinenfabrik Shrimer, Blau & Co. G. m. b. M., Berlin, Germany. Combined guiding and feeding device for crank embroidery machines and the like. 1,677,559; July 17.
Kochendorfer, Frederic S., River Forest, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Strand-working mechanism. 1,677,186; July 17.
Kochendorfer, Frederic S., River Forest, Ill., and T. A. Gill, Shawinigan Falls, Quebec, Canada, assignors to Western Electric Company, Incorporated, New York, N. Y. Resistance unit. 1,677,240; July 17.
Koefoed, Gunnar. (See Wilming, Valdemar, assignor.)
Koerner, Alvin J., Freeman, S. Dak. Hog-oiling device. 1,677,560; July 17.
Koppel Industrial Car and Equipment Company. (See Schmohl, Alfred C., assignor.)
Koppers Company, The. (See Sperr, Frederick W., jr., assignor.)
Koroknay, Paul, Houston, Tex. Signal-control switch. 1,677,141; July 17.
Krantz, Hubert K. (See Baxter, H. G., and Krantz.)
Krause, Erich, assignor to the firm of Holzverkohlungs-Industrie Aktiengesellschaft, Constance, Baden, Germany. Chlorination of methane. 1,677,831; July 17.
Krehbiel, Benjamin F., Wichita, Kans. Concrete-block machine. 1,677,480; July 17.
Krieger, Isaac G., Lodi, Calif. Automobile signaling device. 1,677,351; July 17.
Kroeger, Edwin J., assignor of three-fourths to S. Lord, Akron, Ohio. Coupling. 1,677,865; July 17.
Kvanbeck, H. K. et al. (See Weed, Harley D., assignor.)
Kvanbeck, Jacob, et al. (See Weed, Harley D., assignor.)
Lakewood Engineering Company, The. (See Carr, Edward G., assignor.)
Lamatsch, Frederick, Grantwood, N. J., assignor to R. Hoe & Co., Inc., New York, N. Y. Web-roll-reloading mechanism. 1,677,561; July 17.
Landis Tool Company. (See Steiner, Amos P., assignor.)
Lange, Max E., and A. L. Evans, East Cleveland, assignors to The Warner and Swasey Company, Cleveland, Ohio. Multiple-tool holder for cross slides of lathes. 1,677,143; July 17.
Langermeier, George F., Cleveland, Ohio. Storage-battery mold. 1,677,241; July 17.
Lareva, Bert A., Spokane, Wash. Vehicle brake. 1,677,481; July 17.
Larrigan, Thomas, assignor of one-half to E. Huot, Kankakee, Ill. Faucet. 1,677,242; July 17.
Larsson, Thure, assignor to Norton Company, Worcester, Mass. Segmental ring wheel. 1,677,866; July 17.
Laska, Abraham, assignor to Hipp. Didisheim Company, Inc., New York, N. Y. Watchcase. 1,677,144; July 17.
Laviano, Benjamin, J. Alesse, and S. Campagna, San Jose, Calif. Shoe stretcher. 1,677,591; July 17.
Lawson, John F., Brooklyn, N. Y. Electric welding of long seams. 1,677,832; July 17.
Layton Fire Clay Company. (See Jack, Clarence H., assignor.)
Leake, Thomas C., assignor to Bear Tractor Corporation of America, New York, N. Y. Tractor. 1,677,878; July 17.
Leake, Thomas C., assignor to Bear Tractor Corporation of America, New York, N. Y. Self-oiling bearing. 1,677,879; July 17.
Le Blond, R. K., Machine Tool Company, The. (See Kirchenbauer, Louis J., assignor.)
Lees-Bradner Company, The. (See Schurr, Charles H., assignor.)
Lehrman, Charles, Brooklyn, assignor to Levolite Co. Inc., New York, N. Y. Wall bracket. Des. 75,801; July 17.
Leibson, Shane E., St. Louis, Mo. Sun visor. 1,677,187; July 17.
Leland-Gifford Company. (See Bishop, B. S. T., and Jacobson.)
Leland-Gifford Company. (See Gifford, A. J., and Bishop, assignors.)
Leren, Nels A., Minneapolis, Minn. Counterbalancing device for window sashes. 1,677,643; July 17.
Lerner, Frank, New York, N. Y. Garment. 1,677,145; July 17.
Lesavoy, Isadore L., New York, N. Y. Garment. 1,677,188; July 17.
Levin, Nils D., assignor to The Jeffrey Manufacturing Company, Columbus, Ohio. Electric controller. 1,677,243; July 17.
Levolite Co. Inc. (See Lehrman, Charles, assignor.)
Lewis, Charles B., and E. D. Robertson, Los Angeles, Calif. Valve equipment for oil-well pumps. 1,677,562; July 17.
Lewis, Morgan J., Massillon, assignor to E. F. Duquette, Hartville, Ohio. Key-locking electric switch. 1,677,719; July 17.
Lewis, Robert H. (See Cole, L. M., Halter, and Lewis.)
Lincks, George F., Pittsfield, Mass., assignor to General Electric Company. Electric cut-out. 1,677,720; July 17.
Lincoln Meter Company Limited, The. (See Paine, Louis A., assignor.)
Linde, Andrew H., assignor to The Hess-Bright Manufacturing Company, Philadelphia, Pa. Laminated cage for antifriction bearings and manufacturing such cages. 1,677,833; July 17.
Linderman, Garrett B., jr., Bethlehem, Pa., assignor, by mesne assignments, to American Meter Company, Incorporated, New York, N. Y. Meter. 1,677,834; July 17.
Linderman, Garrett B., jr., Erie, Pa., assignor to American Meter Company, Incorporated, New York, N. Y. Meter. 1,677,835; July 17.

Lindgren, Alexus C., Chicago, and A. D. Gallagher, Canton, assignors to International Harvester Company, Chicago, Ill. Tractor attachment. 1,677,482; July 17.
Lindgren, Waldemar L., assignor to A. A. Norton, Chicago, Ill. Handle for vacuum cleaners, etc. 1,677,721; July 17.
Lindley, Edward S., Lahore, Ind. Meter for fluids. 1,677,189; July 17.
Lion, Charles R., Los Angeles, Calif. Automatic sewer flusher. 1,677,352; July 17.
Lithographic Technical Foundation, Inc., The. (See Reed, R. F., and Scholl, assignors.)
Lloyd, John, Paterson, assignor of forty per cent to P. S. McLean, Bloomfield, N. J. Envelope fastening. 1,677,867; July 17.
Lloyd, Richard B., Aneroid, Saskatchewan, Canada. Snap hook. 1,677,592; July 17.
Lobner, Charles, New York, N. Y. Tie case or container. 1,677,146; July 17.
Locke Insulator Corporation. (See Robertson, John C., assignor.)
Lomax, Clarence E., assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Automatic battery-charging system. 1,677,644; July 17.
Loomis, Allen, Elkhart, Ind. Octave key mechanism for wood-wind instruments. 1,677,563; July 17.
Loranger, Ubald R. (See Thayer, Allan C., assignor.)
Lord, Selden. (See Kroeger, Edwin J., assignor.)
Lovell, William V., New York, N. Y., assignor to Westinghouse Electric & Manufacturing Company. Automatically-controlled vapor-converter substation. Re17,041; July 17.
Lowrie, Edward D., Detroit, assignor, by mesne assignments, to Steel Wheel Corporation, Lansing, Mich. Forming tapered cross-section disks. 1,677,722; July 17.
Loynes, Owen H., Woodridge, N. J., assignor to American Telephone and Telegraph Company. Modulating arrangement. 1,677,190; July 17.
Loynes, Owen H., Woodridge, N. J., assignor to American Telephone and Telegraph Company. Modulating arrangement. 1,677,191; July 17.
Lucas, Jonathan, Savannah, Ga., assignor to Lucas-Lamborn Loom Corporation, New York, N. Y. Loom. 1,677,192; July 17.
Lucas-Lamborn Loom Corporation. (See Lucas, Jonathan, assignor.)
Lusse, Joseph C. and R. J., Philadelphia, Pa. Amusement car. Des. 75,802; July 17.
Lusse, Robert J. (See Lusse, Joseph C. and R. J.)
Luthander, Thure A., San Diego, Calif. Suds-producing means. 1,677,645; July 17.
Lynn, Harry E. (See Vock, W. A., and Lynn.)
Mabey, Clinton L., Providence, R. I. Battery-box clamp. 1,677,789; July 17.
MacDonald, William A., Little Neck, N. Y., assignor to Hazeltine Corporation, Jersey City, N. J. Electron-discharge device. 1,677,355; July 17.
MacGregor, Halbert P., Clayton, assignor to MacGregor Valve Company, St. Louis, Mo. Lubricated plug valve. 1,677,525; July 17.
MacGregor Valve Company. (See MacGregor, Halbert P., assignor.)
Mackie, John H., Watervliet, N. Y. Lubricating oil. 1,677,244; July 17.
Magic Device Corporation. (See Goodchild, W., and Sclar, assignors.)
Magusiak, Daniel, Detroit, Mich. Engine. 1,677,483; July 17.
Maki, Albin, Toivola, Mich. Trap gun. 1,677,394; July 17.
Manley, Fred B., Paterson, N. J., assignor to Textiles Development Corporation, New York, N. Y. Weftless fabric. 1,677,359; July 17.
Marathon Electric Mfg. Co. (See Gilburg, Roy O., assignor.)
Marmion, Louis G. (See Sohn, F., and Marmion.)
Marsden, John E. (See Milliken, John A., assignor.)
Marshall, Norman, Waltham, Mass., assignor to Remington Arms Company, Inc. Conveying and drying apparatus. 1,677,526; July 17.
Martin, Royal E., Mansfield, Ohio. Antiskid device. 1,677,353; July 17.
Martinussen, Johannes P., Copenhagen, Denmark. Apparatus for cleaning boiler tubes. 1,677,836; July 17.
Marvel Carbureter Company. (See Guthrie, William S., assignor.)
Maschinenfabrik Augsburg-Nuernberg A. G. (See Jagschitz, Konrad, assignor.)
Mason, Claude D. (See Bradley, C. E., and Mason.)
Mathison, Frederick C., assignor of one-third to C. L. Redfield, Chicago, Ill. Bonding metal. 1,677,354; July 17.
Mattson, Alfred, et al. (See Weed, Harley D., assignor.)
Mattson, David, et al. (See Weed, Harley D., assignor.)
Maupin, Graves R., assignor to The J. Faessler Manufacturing Company, Moberly, Mo. Aligning device. 1,677,837; July 17.
Maurer, Asher, Newark, N. J. Headlight. 1,677,678; July 17.
Maxwell, Joel M., Sedalia, Mo. Bird trap. 1,677,723; July 17.

McCarthy, Joseph A., Jamaica, N. Y. Deflector-flue cap. Des. 75,803; July 17.
McClellon Locomotive Boiler Company. (See Bean, William L., assignor.)
McClure, Robert E., Warren, Ohio. Golf club. 1,677,395; July 17.
McCurdy, Ralph G., Englewood, N. J., assignor to American Telephone and Telegraph Company. Short-circuiting switch. 1,677,193; July 17.
McDonald, Samuel F., Memphis, Tenn. Preparing cake. 1,677,245; July 17.
McEwan, James, Palo Alto, Calif. Cooking utensil. 1,677,593; July 17.
McFadden, Fay, Rutland, Vt., assignor to Bay State Optical Company, Attleboro, Mass. Eyeglass frame. Des. 75,804; July 17.
McGarry, John T., assignor to The American Valve and Meter Company, Cincinnati, Ohio. Railway-switch stand. 1,677,356; July 17.
McGregor, Alexander, Burlingame, Calif. Valve. 1,677,357; July 17.
McKenna, Frank J., assignor to Chemical Preparations, Inc., New York, N. Y. Hair-waving solution. 1,677,246; July 17.
McKesson, Elmer I., Toledo, Ohio. Gas measuring. 1,677,147; July 17.
McKillop, Lambert, Copetown, Ontario, Canada. Temper screw. 1,677,358; July 17.
McKinley, William F., Little Rock, Ark. Alarm clock. 1,677,790; July 17.
McLean, Philip S. (See Lloyd, John, assignor.)
McMichael, John L., trustee. (See Nice, Budd G., assignor.)
Mell, Tod J., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Sheet material and making and mounting the same. 1,677,284; July 17.
Mendoza, Arnulfo, North Bergen, N. J. Toothbrush. 1,677,194; July 17.
Mergott, J. E., Co. (See Hiering, William C., assignor.)
Merrill, Allan B., Akron, Ohio, assignor to The B. F. Goodrich Company, New York, N. Y. Composite product and making same. 1,677,360; July 17.
Merriman, Carroll L., assignor to Wayne Company, Fort Wayne, Ind. Liquid measuring and dispensing apparatus. 1,677,285; July 17.
Mescher, Henry J., Dayton, Ohio. Radiator cap. 1,677,594; July 17.
Metropolitan Lamp Co., Inc. (See Zweig, Joseph, assignor.)
Metropolitan-Vickers Electrical Company. (See Brown, Walter J., assignor.)
Metropolitan-Vickers Electrical Company Limited. (See Robinson, Ernest Y., assignor.)
Meyers, Emil, et al. (See Miller, Hugo, assignor.)
Meyers, Raymond L., Miami, Fla. Stormproof awning. 1,677,646; July 17.
Meyrowitz, E. B., Inc. (See Cook, William N., assignor.)
Michael, J., & Co. (See Ullmann, F., and Trewendt, assignors.)
Michaels, Fred D. (See Stone G. B., and Michaels.)
Michigan Wire Goods Company. (See Smith, Benjamin H., assignor.)
Mickel, Clifford G., Berryton, Kans. Triangle. 1,677,396; July 17.
Middleton, Charles O. (See Gary, Wright W., assignor.)
Midgley, Ronald W. (See Parsons, C. A., Rosen, Grey, and Midgley.)
Miller, Hugo, assignor of one-fourth to Mrs. I. Steinert and one-fourth to E. Meyers, Colby, Wis. Fence construction. 1,677,195; July 17.
Miller, Thomas, Brooksville, Key. Tobacco press. 1,677,724; July 17.
Milliken, John A., Ambler, assignor to J. E. Marsden, Philadelphia, Pa. Grinding apparatus. 1,677,484; July 17.
Mills, Fred L., Oak Park, assignor to Mills Novelty Company, Chicago, Ill. Safety catch device. 1,677,647; July 17.
Mills Novelty Company. (See Mills, Fred L., assignor.)
Milne, Winford G., assignor to The N. Slater Company, Limited, Hamilton, Ontario, Canada. Pole top fixture for transmission lines. 1,677,456; July 17.
Miozzi, Philip. (See Bauer, E., and Miozzi.)
Mishawaka Rubber and Woolen Manufacturing Company. (See Bradley, C. E., and Mason, assignors.)
Mitchell, Lewis J. (See Haas, C. H., and Mitchell.)
Mix, William J. (See Mueller, Philip, and L. W., and Mix.)
Mix, William P. (See Meuller, Philip and R. H., and Mix.)
Mizer, Joseph J. (See Walker, W. H., Mizer, and Dearsley.)
Mock, Hugo, New York, N. Y. Tea bag. 1,677,397; July 17.
Modern Management Corporation. (See Harnsberger, Harry H., assignor.)
Modine, Arthur B., Racine, Wis. Heat-exchange unit. 1,677,457; July 17.
Moetteli, Arnold, Oberwinterthur, Switzerland, assignor, by mesne assignments, to Dry Quenching Equipment Corporation, New York, N. Y. Apparatus for cooling incandescent coke. 1,677,196; July 17.

Molin, Adolf G., Stockholm, Sweden. Sizing apparatus for coke or the like. 1,677,838, July 17.
Molins, Walter E., Deptford, London, England. Printing apparatus for use with cigarette machinery. 1,677,679; July 17.
Molins, Walter E., Deptford, London, England. Cigarette machinery. 1,677,680; July 17.
Moll, Walter, assignor to F. W. Goedeke, Evansville, Ind. Stove and oven door. 1,677,286; July 17.
Montels, Adrien, Buenos Aires, Argentina. Fly net for horses. 1,677,839; July 17.
Montgomery, Wallace, Central Miranda, Cuba, assignor to Edge Moor Iron Company, Edge Moor, Del. Bagasse handling. 1,677,725; July 17.
Montsinger, Vincent M., Pittsfield, Mass., assignor to General Electric Company. Transformer. 1,677,681; July 17.
Mooney, Raymond. (See Appleton, E. G., Fischer, and Mooney.)
Moore, Anthony T., New Haven, assignor to Perrys Incorporated, Waterbury, Conn. Laundry-classifying table. 1,677,648; July 17.
Moore Brothers Company. (See Dabrowski, Joseph M., assignor.)
Moore Brothers Company. (See Dibble, Claude M., assignor.)
Moore Fabric Company. (See Moore, John V., assignor.)
Moore, John V., assignor to Moore Fabric Company, Pawtucket, R. I. Tubular gauze fabric. 1,677,398; July 17.
Morgan, Edmund C., deceased; O. E. Morgan, executrix, New York, N. Y. Chain cutter and cutting kerfs. 1,677,399; July 17.
Morgan, Edmund C., deceased, by O. E. Morgan, executrix, New York, N. Y. Lubricating mechanism for sprocket chains. 1,677,649; July 17.
Morgan, Olive E., executrix. (See Morgan, Edmund C.)
Morland & Impey Limited. (See Power, Richard F., assignor.)
Morningstar, Alvie S. (See Beck, A. C., and Morningstar.)
Morris, Howard I., assignor to The Cord Tire Machine Company, Cleveland, Ohio. Cord-fabric and tire making machine. 1,677,400; July 17.
Morris, Howard I., assignor to The Cord Tire Machine Company, Cleveland, Ohio. Apparatus for making tires or tire carcases. 1,677,401; July 17.
Morris, Howard I., assignor to Cord Tire Machine Company, Cleveland, Ohio. Apparatus for making tires or tire carcases. 1,677,402; July 17.
Morrison, Willard L., Melrose, Mass. Closure cap. 1,677,403; July 17.
Mosaic Tile Company, The. (See Herrold, Russell P., assignor.)
Moses, Louis, Brooklyn, N. Y. Display device. 1,677,840; July 17.
Mottlau, August J., Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Temperature time-control device. 1,677,361; July 17.
Mower-Guiden Annis, Inc. (See Annis, Ralph R., assignor.)
Mueller, Adolph, trustee. (See Mueller, P., and Schuermann, assignors.)
Mueller, Adolph, trustee. (See Mueller, Philip and L. W., and Mix, assignors.)
Mueller, Adolph, trustee. (See Mueller, Philip and R. H. and Mix, assignors.)
Mueller, Lucien W. (See Mueller, Philip and L. W. and Mix.)
Mueller, Philip, and A. C. Schuermann, assignors to A. Mueller, trustee, Decatur, Ill. Pop-up waste. 1,677,791; July 17.
Mueller, Philip, and A. C. Schuermann, assignors to A. Mueller, trustee, Decatur, Ill. Trimming soft-metal-pipe flanges. 1,677,792; July 17.
Mueller, Philip and L. W., and W. J. Mix, assignors to A. Mueller, trustee, Decatur, Ill. Attachment for lavatory-outlet-valve devices. 1,677,793; July 17.
Mueller, Philip and R. H., and W. J. Mix, assignors to A. Mueller, trustee, Decatur, Ill. Built-in removable valve. 1,677,794; July 17.
Mueller, Robert H. (See Mueller, Philip and R. H., and Mix.)
Murakoshi, Fred M., San Leandro, Calif. Nail stripper. 1,677,527; July 17.
Murray, Howard S., Los Angeles, Calif. Automatic cooker. 1,677,564; July 17.
Myers, Harry E., Buffalo, N. Y. Portable drier. 1,677,197; July 17.
Nagel, Otto, and W. Knempfer, assignors to Badische Maschinenfabrik & Eisengiesserei vormals G. Sebold und Sebold & Neff, Durlach, Baden, Germany. Method of and apparatus for delivering sand into molds. 1,677,726; July 17.
Nalleigh, Ellis W., Eureka, Calif. Internal-combustion turbine. 1,677,198; July 17.
Naslin, John O., Seattle, Wash. Server of household articles. 1,677,404; July 17.
National Metal Molding Company. (See Clayton, Martin M., assignor.)
Naumburg, Robert E., Winchester, Mass. Apparatus for adjusting automobile curtains. 1,677,287; July 17.
Nawlasky, Paul. (See Braunsdorf, O., Holzapfel, and Nawlasky.)
Nebel, Ernst O., Philadelphia, assignor to Oscar Nebel Co. Inc., Hatboro, Pa. Stocking. Des. 75,805; July 17.
Nebel, Oscar, Co. Inc. (See Nebel, Ernst O.)
Nelson, Elmer L., Chicago, Ill. Glazing bar. 1,677,650; July 17.
Nelson, John T., Aurora, assignor to Independent Pneumatic Tool Company, Chicago, Ill. Handle lock for pneumatic tools. 1,677,199; July 17.
Nelson, Lewen R., Peoria, Ill. Sprinkler. 1,677,485; July 17.
Nelson, Lewen R., Peoria, Ill. Lawn sprinkler. 1,677,486; July 17.
Neubert, Oskar. (See Gunzler, H., and Neubert.)
Neuhaus, Gottfried, Eberswalde, Germany. Sorting machine. 1,677,247; July 17.
New Haven Clock Co., The. (See Whitehead, Richard H., assignor.)
Newman, William E., Utica, N. Y. Rheostat. 1,677,288; July 17.
Nice, Budd G., Ogontz, assignor, by mesne assignments, to J. L. McMichael, trustee, Philadelphia, Pa. Making ball-race elements. 1,677,841; July 17.
Noble, William. (See Elliott, W. S., and Noble.)
Noecker, Joseph F., Bloomfield, Nebr. Conveyer. 1,677,487; July 17.
Noonan, William J., Mansfield, Mass. Electric roaster. 1,677,651; July 17.
Nordstrom, Arthur E. (See Higgins, F., and Nordstrom.)
Norris, W. C. (See Barney, William R., assignor.)
Northrup, Edwin F., Princeton, N. J., assignor to The Ajax Metal Company, Philadelphia, Pa. Rotary-field induction furnace. 1,677,528; July 17.
Norton, Alfred A. (See Lindgren, Waldemar L., assignor.)
Norton Company. (See Larsson, Thure, assignor.)
Novak, Izador J., assignor to Raybestos Company, Bridgeport, Conn. **Brake lining and making same.** 1,677,842; July 17.
Oakley, Clifford H. (See Rett, Carl E., assignor.)
Oakley, Clifford H., Trenton, N. J. Vulcanizing apparatus. 1,677,200; July 17.
Oakley, Clifford H., Trenton, N. J. Apparatus for continuous treatment of work under pressure. 1,677,201; July 17.
Oberdorfer, Henry D., Champaign, Ill. Portable bleacher. 1,677,362; July 17.
Oilgear Company, The. (See Ferris, John P., assignor.)
Old Hickory Furniture Company. (See Patton, William H., assignor.)
Old World Parfum Company. (See Coffman, Samuel M., assignor.)
Oliver, Ernon V., Portland, Oreg. Boiler for stills. 1,677,795; July 17.
Olivier, Georges, assignor to Societe Anonyme le Petiole Synthetique, Asnieres, France. Treating methane gas. 1,677,363; July 17.
Olsen Engine Syndicate Limited, The. (See Olsen Simon D., assignor.)
Olsen, Simon D., assignor to The Olsen Engine Syndicate Limited, London, England. Introducing oil or liquid-fuel charges into internal-combustion engines. 1,677,202; July 17.
Olsen, Walter, and S. Rasmussen, assignors to American Gas Machine Company, Albert Lea, Minn. Gas burner for stoves. 1,677,289; July 17.
Olson, John A., assignor to The S-P Manufacturing Company, Cleveland, Ohio. Piston and packing. Re17,042; July 17.
Oppenheim, Ferdinand S., New York, N. Y. Container. 1,677,565; July 17.
Ortt, Elwood K. (See Ortt, Rowley K. and E. K.)
Ortt, Rowley K. and E. K., assignors to The Clipper Manufacturing Company, Dixon, Ill. Differential mechanism. 1,677,682; July 17.
Owen-Dyneto Corporation. (See Sayre, Gordon B., assignor.)
Pade, Max H., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Apparatus for manufacturing inner tubes. 1,677,868; July 17.
Page Steel & Wire Company. (See Snedeker, James W., assignor.)
Paine, Louis A., assignor to The Lincoln Meter Company Limited, Toronto, Ontario, Canada. Meter for combining the measurement of demand and energy. 1,677,203; July 17.
Pan American Petroleum Company. (See Howes, Raymond T., assignor.)
Park Metalware Company. (See Zilliox, John, assignor.)
Parker, Donald, Fresno, Calif. Egg-case filling and inverting apparatus. 1,677,290; July 17.
Parker, Frank W., Boise, Idaho. Superpressure lubricator. 1,677,595; July 17.
Parkin, Albert S., Plaistow, England. Door hinge and support. 1,677,843; July 17.
Parks & Parks, Inc. (See Smith, Henry E., assignor.)
Parks, Roland D., Lake Linden, Mich. Yieldable support. 1,677,796; July 17.
Parry, George W., Philadelphia, Pa.; R. Parry, administratrix. Hosiery protector. 1,677,683; July 17.
Parry, Rose, administratrix. (See Parry, George W.)

Parsons, Charles A., J. Rosen, A. W. Grey, and R. W. Midgley, Newcastle-on-Tyne, England; said Rosen, Grey, and Midgley assignors to said Parsons. Stranded cable. 1,677,458; July 17.
Parsons, Charles A., J. Rosen, A. W. Grey, and R. W. Midgley, Newcastle-on-Tyne, England, said Rosen, said Grey, and said Midgley assignors to said Parsons. Stranded cable. 1,677,459; July 17.
Parsons, Stuart W., assignor to The Stanley Works, New Britain, Conn. Tool for cutting box strapping and the like. 1,677,684; July 17.
Patton, William H., assignor to Old Hickory Furniture Company, Martinsville, Ind. Stand or support for swings. 1,677,844; July 17.
Payne, Halsey D., Chicago, Ill., assignor to Westinghouse Electric & Manufacturing Company. Washing-machine drive. 1,677,291; July 17.
Pearson, Charles, assignor to International Harvester Company, Chicago, Ill. Stacker. 1,677,488; July 17.
Peck, Clyde A., Newton, Iowa. Figure toy. 1,677,652; July 17.
Peck, Edward, New York, N. Y. Adjustable pliers. 1,677,365; July 17.
Peebles, David D., Eureka, Calif. Treating fish. 1,677,364; July 17.
Peerless Pump Company. (See Wintroath, John A., assignor.)
Pejchar, Josef., Brooklyn, N. Y. Cuff link. Des. 75,806; July 17.
Pennington, Gordon R., Cleveland, Ohio. Shock absorber for motor vehicles. 1,677,405; July 17.
Pennsylvania Textile Mills, Inc. (See Biva, Lucien, assignor.)
Perfection Stove Company. (See Resek, Marc, assignor.)
Perkins Machine and Gear Company. (See Croft, Hiram D., assignor.)
Perl, John, Los Angeles, assignor to M. M. Cory, San Diego, Calif. Saccharification of cellulose-bearing material. 1,677,406; July 17.
Perliner Stickmaschinenfabrik Schirmer, Blau & Co. G. m. b. H. (See Koch, Aloys, assignor.)
Permier Cushion Spring Company. (See Stiles, Douglas S., assignor.)
Perrys Incorporated. (See Moore, Anthony T., assignor.)
Person, Axel, assignor to Harvey Clapp & Co., Attleboro, Mass. Bracelet construction. 1,677,204; July 17.
Peterson, Alfred J., Eland, Wis. Cultivator teeth. 1,677,596; July 17.
Peterson, Georgia, administratrix. (See Peterson, Gust A.)
Peterson, Gust A., deceased; G. Peterson, administratrix, assignor of one-half to G. E. Sellstrom, Chicago, Ill. Goggles and the like. 1,677,566; July 17.
Pfannmüller, Wilhelm. (See Sator, K., and Pfannmüller.)
Philippi, Frank, Philadelphia, Pa. Utility case. 1,677,653; July 17.
Pickering, Joseph W., Topeka, Kans. Plasterer's float. 1,677,366; July 17.
Pierce, Walter H., Watertown, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,677,869; July 17.
Pierce, Walter H., Watertown, assignor to Carr Fastener Company, Cambridge, Mass. Fastener. 1,677,870; July 17.
Pinney, Mary M., Hagerstown, Md. Serving dish. 1,677,845; July 17.
Pitts, Edmund M., assignor to Sunland Sales Cooperative Association, Fresno, Calif. Display container. 1,677,654; July 17.
Plass, Robert H., Upper Montclair, N. J., assignor to Poloris Company, Inc., New York, N. Y. Poultice-making machine. 1,677,685; July 17.
Pollak, Alfred, Vienna, Austria. Manufacture of yeast, especially by the aeration process. 1,677,529; July 17.
Poloris Company. (See Plass, Robert H., assignor.)
Polysius, G. (See Hasselbach, Alexander, assignor.)
Pope, Arthur W., jr., assignor to Waukesha Motor Co., Waukesha, Wis. Valve mechanism. 1,677,460; July 17.
Pope, Joseph H., Hamilton, Mass., assignor to United Shoe Machinery Corporation, Paterson, N. J. Attaching heels. 1,677,292; July 17.
Popkin, Martin E., assignor of one-half to J. Schoeneman, Incorporated, Baltimore, Md. Cloth sponging and shrinking machine. 1,677,367; July 17.
Potts, Allen D. (See Howard, L. E., and Potts.)
Powell, A. L., Power Company Incorporated. (See Powell, Alvah L., assignor.)
Powell, Alvah L., Cleveland, Ohio, assignor, by mesne assignments to The A. L. Powell Power Company, Incorporated. Internal-combustion engine. 1,677,407; July 17.
Powell, George E., Chicago, Ill., assignor of one-half to E. E. Shugart, Council Bluffs, Iowa. Land and water vehicles. 1,677,846; July 17.
Power, Richard F., London, assignor to Morland & Impey, Limited. Birmingham, England. Loose-leaf-securing mechanism. 1,677,461; July 17.
Prellwitz, William, Easton, Pa., assignor to Ingersoll-Rand Company, Jersey City, N. J. Steel retainer. 1,677,530; July 17.
Pressley, Jackson H., Long Branch, N. J. Vacuum-tube-control device. 1,677,727; July 17.
Prentice, George E., Berlin, Conn. Fastener. 1,677,408; July 17.
Prest-O-Lite Storage Battery Corporation. (See Benner, Raymond C., assignor.)
Price, William E., White Plains, N. Y. Mounting for lanterns. 1,677,489; July 17.
Pro-phy-lac-tic Brush Company. (See Elliot, W. S., and Noble, assignors.)
Propst, Jacob Y., Ohatchee, Ala. Propelling boats. 1,677,847; July 17.
Prothers, Harold V., New York, N. Y., assignor to The American Laundry Machinery Company, Cincinnati, Ohio. Blanket-napping machine. 1,677,293; July 17.
Prudden, Theodore M., Grafton, Mass. Ball-bearing spindle construction. 1,677,686; July 17.
Prulett, Charles L., Oil Center, Calif. Stuffing box. 1,677,848; July 17.
Pugh, Emerson, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Device for welding parts. 1,677,205; July 17.
Pugh, Emerson, Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Electric welding. 1,677,206; July 17.
Putt, Edward D., assignor to The Firestone Tire and Rubber Company, Akron, Ohio. Tire-finishing machine. 1,677,871; July 17.
Raddatz, Richard. (See Rogers, H. S., and Raddatz.)
Radio Corporation of America. (See Weinberger, Julius, assignor.)
Rainbow Light, Inc. (See Stokes, John F., assignor.)
Raney, Clemma R., Riverside, and A. E. W. Johnson, assignors to International Harvester Company, Chicago, Ill. Bagging platform and carrier attachment for harvester threshers. 1,677,490; July 17.
Ransome Concrete Machinery Company. (See Bushnell, James E., assignor.)
Rasmussen, Sophus. (See Olsen, W., and Rasmussen.)
Raybestos Company. (See Novak, Izador J., assignor.)
Redfield, Casper L. (See Mathison, Frederick C., assignor.)
Reed, Dudley, Canton, Ohio. Float valve. 1,677,687; July 17.
Reed, Robert F., Norwood, Ohio, and W. Scholl, Washington, D. C., assignors to The Lithographic Technical Foundation, Inc., New York, N. Y. Dampening system for planographic presses. 1,677,655; July 17.
Rees, Alphy, assignor of one-third to E. A. Webb, Coalinga, Calif. Aircraft. 1,677,688; July 17.
Reid, Reginald N., Edinburgh, Scotland. Calendar clock. 1,677,872; July 17.
Reinbold, Robert, St. Paul, Minn. Soldering device. 1,677,248; July 17.
Reiser, John A., Port Jervis, N. Y. Measuring cap for bottles. 1,677,567; July 17.
Remington Arms Company. (See Marshall, Norman, assignor.)
Renetzky, Frank X., Kansas City, Mo. Top and spinner therefor. 1,677,368; July 17.
Republic Brass Company, The. (See Bloch, Leon, assignor.)
Resek, Marc, Cleveland Heights, assignor to Perfection Stove Company, Cleveland, Ohio. Oil stove. 1,677,597; July 17.
Resek, Marc, Cleveland Heights, assignor to Perfection Stove Company, Cleveland, Ohio. Valve. 1,677,598; July 17.
Reserve Holding Company. (See Stehlik, Rudolph F., assignor.)
Rett, Carl E., Akron, Ohio, assignor to C. H. Oakley, Trenton, N. J. Continuous vulcanizer. 1,677,207; July 17.
Rhodes-Hochriem Manufacturing Co. (See Hochriem, Gustav F., assignor.)
Ricardo, Harry R., London, England. Making sleeve valves. 1,677,249; July 17.
Rice, George L., Chicago, Ill., assignor to International Harvester Company. Twine ball. 1,677,491; July 17.
Richardson, Horace G. (See Horton, E. W., and Richardson.)
Rile, Frederick C., Chicago, Ill. Cuff button or similar article. Des. 75,807; July 17.
Ring Pneumatic Tool Company. (See Butler, J. M., and Torson, assignors.)
Ringier & Co. Verlagsanstalt & Vereinigte Buch- & Steindruckereien. (See Fuchs, Friederich, assignor.)
Ritter, Frank M., assignor of three-fourths to J. V. Hutchins, Washington, D. C. Lawn-mower attachment. 1,677,250; July 17.
Ritter, George, Woodbridge, N. J., assignor to The Barber Asphalt Company, Philadelphia, Pa. Apparatus for heating sheet material in preparation for folding. 1,677,492; July 17.
Rix, Edward A., Oakland, Calif. Fluid compressor. 1,677,369; July 17.
Roach-Appleton Manufacturing Company. (See Appleton, E. G., Fischer, and Mooney, assignors.)
Roberts, Frank B., and W. G. Huntington, Anaheim, Calif. Sorting table. 1,677,656; July 17.
Roberts, George H., assignor to B. A. Ballou & Co., Inc., Providence, R. I. Clasp. 1,677,849; July 17.
Robertson, Edgar D. (See Lewis, C. B., and Robertson.)
Robertson, John C., Annapolis, assignor to Locke Insulator Corporation, Baltimore, Md. Insulator-assembling jig. 1,677,294; July 17.
Robinet, Georges, Paris, France. Container for dental impression outfits. 1,677,493; July 17.

Robinson, Charles B. (See Carty, Richard S., assignor.)
Robinson, Ernest Y., Withington, England. System of reception for modulated-wave telegraphy and telephony. 1,677,797; July 17.
Robinson, Ernest Y., Manchester, assignor to Metropolitan-Vickers Electrical Company Limited, London, England. Vacuum tube. 1,677,850; July 17.
Robinson, Ernest Y., Lymm, England, assignor to Metropolitan-Vickers Electrical Company Limited. Vacuum tube. 1,677,851; July 17.
Robinson, John D. M., Roydon, England. Facilitating locomotion on foot. 1,677,728; July 17.
Robinson, Lewis T., and C. A. Sabbah, Schenectady, N. Y., assignors to General Electric Company. Vapor electric device. 1,677,689; July 17.
Robirds, Roland B. (See Sumpter, B. F., Winfree, and Robirds.)
Rockwell, Edward A., New York, N. Y. Motor-indicating system. 1,677,494; July 17.
Roebuck, Alvah C., assignor to The Enterprise Optical Manufacturing Company, Chicago, Ill. Arc-lamp motor feed. 1,677,657; July 17.
Roewade, Edward E., Chicago, Ill., asignor to Wright & Ditson-Victor Co., New York, N. Y. Football shoe. 1,677,370; July 17.
Röger, Karl, Berlin, H. Schoenleben, and F. Walther, Plauen, Germany. Matrix-setting and type-line-casting machine. 1,677,462; July 17.
Rogers, Homer S., and R. Raddatz, assignors to Combustion Fuel Oil Burner Company, Milwaukee, Wis. Automatic safety control for oil burners. 1,677,295; July 17.
Rohrer, William L., New York, N. Y. Dashboard-type heat indicator. 1,677,208; July 17.
Rose, Bruce E., Stockton, and G. Woolwine, Empire, Calif. Scraper. RE17,044; July 17.
Rose, Dalton K., assignor to J. H. Zumbalen, St. Louis, Mo. Surgical instrument. 1,677,209; July 17.
Rose, George F., Hyndsville, N. Y. Typewriting machine. 1,677,210; July 17.
Rosen, Jessel. (See Parsons, C. A., Rosen, Grey, and Midgley.)
Rosenbaum, Bruno, Berlin, Germany, assignor to Westinghouse Electric & Manufacturing Company. Wireless telegraphy and telephony. 1,677,296; July 17.
Rosner, Rudolph, Chicago, Ill. By-pass valve for gas-washing apparatus. 1,677,148; July 17.
Ross, Nathaniel C., Fort Wayne, Ind. Toilet-seat protector. 1,677,211; July 17.
Roth Brothers & Co. (See Williams, Ralph T., assignor.)
Rother, Elwood W., Indianapolis, Ind. Oil burner. 1,677,371; July 17.
Rother, Rudolph, Tamaqua, Pa. Automobile hoisting device. 1,677,297; July 17.
Rothstein, Anna. (See Ulman, Rosana dil F., assignor.)
Rottmann, Fritz, and F. Brohmeyer, Bovinghausen, Germany. Absorption plant for gases and vapors. 1,677,409; July 17.
Rouanet, Louis, assignor to Compagnie d'Applications Mecaniques, Ivry-Port, France. Fixed support for spare wheels. 1,677,212; July 17.
Ruberoid Company, The. (See Abraham, Herbert, assignor.)
Ruckstell Sales & Manufacturing Company. (See Burkhardt, Harry L., assignor.)
Ruhling, Bernard A., Elkhart, Ind. Sheet rubber. 1,677,372; July 17.
Ruths, Johannes, Djursholm, assignor to Aktiebolaget Vaporackumulator, Stockholm, Sweden. Steam plant. 1,677,798; July 17.
S-P Manufacturing Company, The. (See Olson, John A., assignor.)
Sabbah, Camille A. (See Robinson, L. T., and Sabbah.)
Sackrider, Frank E. (See Whaley, Emery G., assignor.)
Saffold, James W., Cleveland, Ohio. Chain tool. 1,677,251; July 17.
Saffold, James W., Cleveland, Ohio. Chain tool. 1,677,658; July 17.
Saffold, James W., Cleveland, Ohio. Chain tool. 1,677,659; July 17.
Salvaggio, Rosario, New Orleans, La. Twine holder. 1,677,799; July 17.
Sams, Charles L., Bridgeport, Ohio. Automatic cut-off valve for gas lines. 1,677,729; July 17.
Sandin, Maurits J., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Thermal plug cut-out. 1,677,298; July 17.
Sanger, Otto C., Hazen, N. Dak. Baby walker. 1,677,213; July 17.
Santa Barbara Lumber Company. (See Cummings, Earle W., assignor.)
Santschi, Arthur E., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Electrically-heated apparatus. 1,677,214; July 17.
Sargent & Company. (See Carroll, William J., assignor.)
Sato, Sadasuke, San Francisco, Calif. Lamp shade. 1,677,660; July 17.
Sator, Karl, and W. Pfannmüller, Ludwigshafen-on-the-Rhine, assignors to I. G. Farbenindustrie Aktiengesellschaft, Frankfort-on-the-Main, Germany. Manufacture of paraformaldehyde. 1,677,730; July 17.
Sautermeister, Carl, Wiesbaden, Germany, and F. Wilhelm, Ploesti, Rumania. Working up acid resins obtained from the refining of mineral-oil derivatives into neutral bitumens. 1,677,731; July 17.
Sayre, Gordon B., assignor to Owen-Dyneto Corporation, Syracuse, N. Y. Mounting for windshield wipers. 1,677,215; July 17.
Schade, Frederik, Copenhagen, Denmark. Method and machine for the producing of tightly-coiled paper. 1,677,599; July 17.
Schaefer, Adolph A., Buffalo, N. Y., assignor to Frontier Manufacturing Company, North Tonawanda, N. Y. Device for testing lubricating oils. 1,677,690; July 17.
Schaefer, Joseph J., jr., Dayton, Ohio. Textile lubricant and process. 1,677,852; July 17.
Schauer, Paul, Zehlendorf, near Berlin, Germany. Rotary compressor. 1,677,216; July 17.
Scheidegger, Paul. (See Gams, A., and Scheidegger.)
Scheilberg, Oscar B., New York, N. Y. Liquid-flow regulator. 1,677,732; July 17.
Schiffner, Joseph, La Gloria, Cuba. Sugar-hauling apparatus. 1,677,733; July 17.
Schippel, Henry F. (See Graham, T. G., and Schippel.)
Schleicher, Frank J., St. Louis, Mo. Box. Des. 75,808; July 17.
Schlosshauer, Alfred, Berlin, Germany. Central lubricating apparatus for stiff lubricants. 1,677,661; July 17.
Schmitt, Henry, Detroit, Mich. Motor boat. 1,677,495; July 17.
Schmohl, Alfred C., Beaver Falls, assignor to Koppel Industrial Car and Equipment Company, Pittsburgh, Pa. Adjustable sill step for railway dump cars. 1,677,373; July 17.
Schneider, Clara. (See Gross, Fred G., assignor.)
Schneider, Hermann. (See Straub, F., Schneider, and Spieler.)
Schneider, Stephan, Meissen, Saxony, Germany, assignor to Westinghouse Electric & Manufacturing Company, Electric steam boiler. 1,677,299; July 17.
Schnitzspahn, Karl. (See Keller, F., and Schnitzspahn.)
Schoeneman, J., Incorporated. (See Popkin, Martin E., assignor.)
Schoenleben, Hans. (See Röger, K., Schoenleben, and Walther.)
Scholl, Walter. (See Reed, R. F., and Scholl.)
Schuermann, Anton C. (See Mueller, P., and Schuermann.)
Shumer Brothers Company, The. (See Schumer, John.)
Schumer, John, assignor to The Schumer Brothers Company, Cincinnati, Ohio. Finger ring. Des. 75,809; July 17.
Schurr, Charles H., assignor to The Lees-Bradner Company, Cleveland, Ohio. Machine for hobbing or cutting gears. 1,677,853; July 17.
Schurr, Henry, Philadelphia, Pa. Window-shade cleaner. 1,677,252; July 17.
Schutte, August E., Northboro, assignor to Warren Brothers Company, Cambridge, Mass. Construction of street pavements. 1,677,600; July 17.
Schwab, Edward L., Chicago, Ill. Cabinet. 1,677,410; July 17.
Schweitzer, Wilhelm H., Heidelberg, Germany, assignor, by mesne assignments, to American Lanil Corporation, Manufacture of textile fibers from animal hair and bristles. 1,677,149; July 17.
Sclar, Nathan. (See Goodchild, W., and Sclar.)
Scofield, Edgar, New York, assignor to Anchor Cap and Closure Corporation, Long Island City, N. Y. Friction cap for bottles and jars. 1,677,253; July 17.
Scotti, Carlo. (See Diamant, Sigismondo, assignor.)
Scoville Eugene M. Milwaukee Wis. assignor of one-half to F. L. Swanberg, Pittsburgh, Pa. Flow meter. 1,677,411; July 17.
Scranton, Henry O., La Fayette, La. Transfer mechanism for sugar canes. 1,677,601; July 17.
See, Oscar J., Peoria, Ill. Oil burner. 1,677,800; July 17.
Segal Lock & Hardware Co. (See Segal, Samuel, assignor.)
Segal, Samuel, assignor to Segal Lock & Hardware Co. Inc., New York, N. Y. Sash fastener. 1,677,300; July 17.
Seghers, Emiel P., Chicago, Ill. Tire deflater. 1,677,301; July 17.
Sellstrom, Gust E. (See Peterson, Gust A., assignor.)
Selvig, John N., Chicago, Ill., assignor to Western Electric Company Incorporated, New York, N. Y. Material-unwinding device. 1,677,217; July 17.
Sessions, Charles R., San Francisco, Calif., assignor of one-half to J. A. Dent, Lawrence, Kans. Critical-speed control. 1,677,496; July 17.
Sexton, Thomas D. (See Harrison, Arthur W., assignor.)
Shand, George, St. James, Minn. Bed. 1,677,218; July 17.
Shanton, Ira A., St. Petersburg, Fla. Spring teetering toy. 1,677,531; July 17.
Shanton, Ira A., Hollywood, Calif. Exercising plaything. 1,677,532; July 17.
Shantz, Vivian F., et al. (See Woodman, Mark G., assignor.)
Sheeley, Earl, assignor to Wright Manufacturing Company, Inc., Philadelphia, Pa. Vigil light cup. Des. 75,810; July 17.
Short, Wayne F., Bloomington, Ind. Combination airplane and zeppelin. 1,677,150; July 17.

Shugart, Elmer E. (See Powell, George E., assignor.)
Siemens & Halske, Aktiengesellschaft. (See Albrecht, Dieter, assignor.)
Siemens & Halske Aktiengesellschaft. (See von Beckerath, Hans, assignor.)
Silcock Airradiator Corporation. (See Daun, Carl L., assignor.)
Silverstein, Oscar. (See Van Valkenberg, Eber H., assignor.)
Simkins, Howard D., and J. Burkhardt, Cleveland, Ohio, assignors to The Superior Screw & Bolt Manufacturing Company. Machine for making nut blanks and similar articles. 1,677,151; July 17.
Simmons Company. (See Gail, John F., assignor.)
Simonds Saw and Steel Company. (See Howard, L. E., and Potts, assignors.)
Sinclair Refining Company. (See Herthel, E. C., and Tifft, assignors.)
Sivertsen, Peter, New York, N. Y. Abrading device. 1,677,497; July 17.
Skwierawski, Walter, Milwaukee, Wis. Bottle washer. 1,677,571; July 17.
Slater, N., Company, The. (See Milne, Winford G., assignor.)
Slauson, Louis E., Rock Island, Ill. Traction wheel 1,677,568; July 17.
Sleeper, Harvey P., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Relay. 1,677,302; July 17.
Smith, Arthur R., Schenectady, N. Y., assignor, by mesne assignments, to Bailey Meter Company. Measuring a substance carried in suspension by a second substance. 1,677,691; July 17.
Smith, Benjamin H., assignor to Michigan Wire Goods Company, Niles, Mich. Basket handle. 1,677,152; July 17.
Smith, Harry C., Arlington, assignor to Blake Electric Mfg. Company, Boston, Mass. Selvage-opening device. 1,677,303; July 17.
Smith, Henry E., assignor to Parks & Parks, Inc., Troy, N. Y. Brush. Des. 75,811; Juy 17.
Smith, Jesse A. B., Stamford, Conn., assignor to Underwood Elliott Fisher Company, New York, N. Y. Accounting-machine demonstration chart. 1,677,569; July 17.
Smith, Leo O., assignor to Columbia Machine Works and Malleable Iron Co., Brooklyn, N. Y. Connecter. 1,677,734; July 17.
Smith, Raymond D., Pleasantville, N. Y., assignor, by mesne assignments, to Tremont Products Corporation, Boston, Mass. Imitative candle fitting. 1,677,412; July 17.
Smith, Sydney, London, England, assignor to The Wellman-Seaver-Morgon Company, Cleveland, Ohio. Pick-up and centering device for billet-handling machines. 1,677,873; July 17.
Smith, Sydney, London, England, assignor to The Wellman-Seaver-Morgan Company, Cleveland, Ohio. Pick-up and centering device for billet-handling machines. 1,677,874; July 17.
Smith, William H., Norristown, assignor, by mesne assignments, to Electric Service Supplies Company, Philadelphia, Pa. Apparatus for undercutting pin holes in the center shells of insulators. 1,677,498; July 17.
Smith William J., Philadelphia, Pa. Rotary valve. 1,677,499; July 17.
Snedeker, James W., Adrian, Mich., assignor to Page Steel & Wire Company, Toy woodpecker. 1,677,463; July 17.
Snyder, George C., assignor to Kaelma Manufacturing Company, Inc., New York, N. Y. Method of and machine for conditioning sheet articles and of and for applying minor members to sheet articles, such as envelopes for example. 1,677,735; July 17.
Snyder, George C., assignor to Kaelma Manufacturing Company, Inc., New York, N. Y. Method of and machine for applying minor members to sheet articles. 1,677,736; July 17.
Societe Anonyme le Petrole Synthetique. (See Olivier, Georges, assignor.)
"Société d'Emboutissage et de Constructions Mécaniques." (See Amiot, Felix, assignor.)
Société des Condenseurs Delas. (See Delas, Albert, assignor.)
Society of Chemical Industry in Basle. (See Gams, A., and Scheidegger, assignors.)
Society of Chemical Industry in Basle. (See Straub, F., Schneider, and Spieler, assignors.)
Sode, Frank E., Chicago, Ill. Hydrometer. 1,677,801; July 17.
Sohn, Frank, Chicago, and L. G. Marmion, Villa Park, Ill., assignors to The Vitrolite Company. Tile or article of similar nature. Des. 75,812; July 17.
Sohn, Frank, Chicago, and L. G. Marmion, Villa Park, Ill., assignors to The Vitrolite Company, Chicago, Ill. Tile or article of similar nature. Des. 75,813; July 17.
Southern Textile Machinery Co. (See Gramse, Roy A., assignor.)
Spencer, Charles H., Los Angeles, Calif. Treating soils to promote plant growth. 1,677,153; July 17.
Sperr, Frederick W., jr., Pittsburgh, Pa., assignor to The Koppers Company. Gas-purification process. 1,677,304; July 17.
Sperry Development Company, The. (See Sperry, Elmer A., assignor.)
Sperry, Elmer A., assignor to The Sperry Development Company, Brooklyn, N. Y. Two-cycle supercharging combustion engine. 1,677,305; July 17.
Sperry Gyroscope Company, The. (See Hall, Theodore, assignor.)
Spieler, Joseph. (See Straub, F., Schneider, and Spieler.)
Spieth, William C., Geneva, Ohio. Arc lamp. 1,677,602; July 17.
Sprinkle, Jake H., Brooklyn, N. Y. Artificial teeth. 1,677,662; July 17.
Spurges, Charles, De Kalb, Ill. Swimming device. 1,677,254; July 17.
Staats, Oshel C., Ripley, W. Va. Radio tuning device. 1,677,254; July 17.
Stade, Charles E., New York, N. Y. Muffler. 1,677,570; July 17.
Staehle, Gustav, Stuttgart, Germany, assignor to "Cyklop" Akt. Ges., Schaffhausen, Switzerland. Electrically-actuated surfacing machine. 1,677,533; July 17.
St. Amour, Moses E., Faust, N. Y. Overalls. 1,677,663; July 17.
Stancliff, Clifton L., Bakersfield, Calif. Electric welding tongs. 1,677,306; July 17.
Standard Heater Company. (See Gillett, Merriman C., assignor.)
Standard Textile Products Company, The. (See Dieck, Henry W., assignor.)
Stanley Works, The. (See Parsons, Stuart W., assignor.)
Staubli, Hugo, Zurich, assignor to Gebr. Staubli & Co., Horgen, Switzerland. Apparatus for the driving of a pattern mechanism or shed-forming machine. 1,677,255; July 17.
Steel Wheel Corporation. (See Forsyth, George H., assignor.)
Steel Wheel Corporation. (See Lowrie, Edward D., assignor.)
Steen, Svend A., assignor to Dadhams Oil Company, Milwaukee, Wis. Grease-gun grease container. 1,677,603; July 17.
Stehlik, Rudolph F., Chicago, Ill., assignor to Reserve Holding Company, Kansas City, Mo. Automatic telephone system. 1,677,413; July 17.
Stehlik, Rudolph F., Chicago, Ill., assignor to Reserve Holding Company, Kansas City, Mo., Automatic telephone system. 1,677,414; July 17.
Steinbrenner, Henry G., Cleveland, Ohio, assignor, by mesne assignments, to Industrial Brownhoist Corporation. Controlling the driving gear of locomotive cranes. 1,677,374; July 17.
Steiner, Amos P., assignor to Landis Tool Company, Waynesboro, Pa. Automatic sizing device for grinding machines. 1,677,307; July 17.
Steinert, (Mrs.) Ida, et al. (See Miller, Hugo, assignor.)
Stember, Bernard, New York, N. Y. Bag fastener. 1,677,154; July 17.
Stevens, Arthur L., assignor to Arthur L. Stevens Corporation, Chicago, Ill. Operating open-hearth furnaces. 1,677,664; July 17.
Stevens, Arthur L., Corporation. (See Stevens, Arthur L., assignor.)
Stiles, Douglas S., assignor to Premier Cushion Spring Company, Detroit, Mich. Rim-frame construction. 1,677,500; July 17.
Stokes, Charles L., Los Angeles, Calif. Inflating and driving an aerial machine and means therefor. 1,677,308; July 17.
Stokes, John F., New York, N. Y., assignor to Rainbow Light, Inc. Electrical cut-out. 1,677,692; July 17.
Stone, George B., Los Angeles, and F. D. Michaels, Fresno, Calif. Liquid draw-off. 1,677,501; July 17.
Stone, R. Harry. (See Herbst, W. K., and Stone.)
Straka, John, assignor to The Wahl Company, Chicago, Ill. Mechanical pencil. 1,677,415; July 17.
Straub, Fritz, Basel, H. Schneider, Riehen, near Basel, and J. Spieler, assignors to Society of Chemical Industry in Basle, Basel, Switzerland. Metal compound of azo dyestuff and making same. 1,677,534; July 17.
Streeter, Albert B., assignor to Dual Motors Corporation, New York, N. Y. Fuel intake for two-cycle engines. 1,677,604; July 17.
Strobino, Gaston, Paterson, N. J. Sound reproducer. 1,677,605; July 17.
Struble, James F., Hutchinson, Kans. Well pump. 1,677,802; July 17.
Sumpter, Benjiman F., Wichita Falls, Tex., D. E. Winfree, Chickasha, Okla., and R. B. Robirds, Wichita Falls, Tex. Oil well derrick. 1,677,738; July 17.
Sunland Sales Cooperative Association. (See Pitts, Edmund M., assignor.)
Superior Engineering Company. (See Claflin, Charles A., assignor.)
Superior Screw & Bolt Manufacturing Company, The (See Simkins, H. D., and Burkhardt, assignors.)
Surface Combustion Company. (See Hepburn, William M. assignor.)
Surface Combustion Company. (See Vaughn, Sidney P., assignor.)

Sussmann, Hugo, Chemnitz, Germany. Stocking frame. 1,677,219; July 17.
Swain, Joseph G., assignor to The Firestone Steel Products Company, Akron, Ohio. Wheel. 1,677,854; July 17.
Swan, Joseph G., assignor to The Firestone Steel Products Company, Akron, Ohio. Counterweight. 1,677,855; July 17.
Swanberg, Floyd L. (See Scoville, Eugene M., assignor.)
Sweetland, Ernest J., Montclair, N. J. Gas diffuser. 1,677,502; July 17.
Sweetland, Ernest J., Montclair, N. J. Filter. 1,677,603; July 17.
Sweetser, George T., Bronxville, N. Y. Soft collar. 1,677,504; July 17.
Swift, George L., assignor to Brown & Bigelow, St. Paul, Minn. Milk-bottle cap. 1,677,155; July 17.
Symington Company, The. (See Barrows, Donald S., assignor.)
Symington Company, The. (See Kadel, Byers W., assignor.)
Szilvay, Cornelius, Budapest, Hungary. Apparatus for extinguishing fire. 1,677,875; July 17.
Tamarin, Bernard J., Philadelphia, Pa. Vacuum-cleaner handle. Des. 75,815; July 17.
Tapley, Osborne F., New York, N. Y., Metal-finishing machine. 1,677,375; July 17.
Tater-Flakes Company. (See Alexander, Harry S., assignor.)
Taylor, Albert, Henryville, Ind. Radio-receiving-set cabinet. Des. 75,814; July 17.
Taylor, Stephen H., Ludlow, Ky. Water wheel. 1,677,464; July 17.
Technicolor Motion Picture Corporation. (See Troland, Leonard T., assignor.)
Technicolor Motion Picture Corporation. (See Troland, L. T., and Ball, assignors.)
Technicolor Motion Picture Corporation. (See Weaver, Eastman A., assignor.)
Tenger, Albert R., Marshfield, Oreg. Cultivator, weeder, and digger. 1,677,803; July 17.
Tex. Engineering Corporation. (See Textorius, Knut O. B., assignor.)
Textiles Development Corporation. (See Manley, Fred B., assignor.)
Textorius, Knut O. B., assignor to Tex. Engineering Corporation, New York, N. Y. Method and machine for making cord tires. Re17,036; July 17.
Thaete, Maximilian W., assignor of one-half to M. J. Thaete, Denver, Colo. Valve-seat reamer. 1,677,465; July 17.
Thaete, Millie J. (See Thaete, Maximilian W., assignor.)
Thayer, Allan C., assignor to U. R. Loranger, Detroit, Mich. Gas scrubber for refrigerating apparatus. 1,677,804; July 17.
Thibaut, Richard E., Inc. (See Hoffman, Harry L., assignor.)
Thomson, Clarence Y., sr., Chapman Ranch, Tex., assignor to International Harvester Company. Tractor cultivator attachment. 1,677,505; July 17.
Thorpe, George E. (See Thorpe, Thomas W. and G. E.)
Thorpe, Thomas W. and G. E., Des Moines, Iowa. Producing wells and strainer shoes for the same. 1,677,606; July 17.
Thronsen, Sigurd. (See Colbeck, F. W., and Thronsen.)
Tifft, Thomas D., (See Herthel, E. C., and Tifft.)
Titeflex Metal Hose Co. (See Herbst, W. K., and Stone, assignors.)
Torson, Harry A. (See Butler, J. M., and Torson.)
Townsend, Harry E., Brooklyn, N. Y. Assembling machine. 1,677,739; July 17.
Tremont Products Corporation. (See Smith, Raymond D., assignor.)
Tregoning, William C., Cleveland Heights, Ohio. Separable electrical connection. 1,677,256; July 17.
Trewendt, Gert. (See Ullmann, F., and Trewendt.)
Trey, Serge. (See Engel-Kron, G. M., and Trey.)
Troland, Leonard T., Malden, and J. A. Ball, Wollaston, assignors, by mesne assignments, to Technicolor Motion Picture Corporation, Boston, Mass. Registering and cementing cinematographic films. 1,677,309; July 17.
Troland, Leonard T., Malden, assignor, by mesne assignments, to Technicolor Motion Picture Corporation, Boston, Mass. Cinematographic apparatus. 1,677,310; July 17.
Trufant, Russell A., Middleboro, Mass. Barricade. 1,677,693; July 17.
Trumbull Electric Manufacturing Company, The. (See Getchell, Benjamin E., assignor.)
Tunison, Burnell R., Elizabeth, N. J. Ore concentration. 1,677,416; July 17.
Turkington, Victor H., Caldwell, N. J., assignor to Bakelite Corporation, New York, N. Y. Resinous composition and making same. 1,677,417; July 17.
Ullmann, Fritz, Charlottenburg, and G. Trewendt, assignors to J. Michael & Co., Berlin, Germany. Manufacture of arsenic acid. 1,677,257; July 17.
Ulman, Rosana dü F., assignor to A. Rothstein, Chicago, Ill. Garment. 1,677,258; July 17.
Underwood Elliott Fisher Company. (See Campbell, George W., assignor.)
Underwood Elliott Fisher Company. (See Smith, Jesse A. B., assignor.)
Union Switch & Signal Company, The. (See Gilson, Robert M., assignor.)
Unique Manufacturing Company. (See Goller, Eugene E., assignor.)
United Royalties Corporation. (See Earle, Lee E., assignor.)
United Shoe Machinery Corporation. (See Bates, Arthur, assignor.)
United Shoe Machinery Corporation. (See Pope, Joseph H., assignor.)
U. S. Slicing Machine Company. (See Folk, Joseph, assignor.)
Universal Power Shovel Company. (See Bradley, Merrill L., assignor.)
Van Buren, John, Brooklyn, N. Y. Sealing mechanism for containers. 1,677,259; July 17.
Van Cleave, William F., assignor of one-half to R. M. Barnhart, Dallas, Tex. Fuselage for aeroplanes. 1,677,535; July 17.
Vanderbilt, R. T., Company. (See Alton, William H., assignor.)
Van Tassel Company. (See Dunham, Henry V., assignor.)
Van Valkenberg, Eber H., McKeesport, Pa., assignor of one-half to O. Silverstein, Spokane, Wash. Landing gear. 1,677,418; July 17.
Vaughn, Sidney P., U. S. Navy, Choctaw County, Miss., assignor to Surface Combustion Company, New York, N. Y. Apparatus for burning explosive gaseous mixtures. 1,677,156; July 17.
Vickery, Henry M., Oakland, Calif. Bumper. 1,677,506; July 17.
Vitrolite Company, The. (See Gibian, Eric H., assignor.)
Vitrolite Company, The. (See Gunther, L., and Gibian, assignors.)
Vitrolite Company, The. (See Sohn, F., and Marmion.)
Vock, William A., Redondo Beach, and H. E. Lynn, Torrance, Calif. Casing cutter. 1,677,507; July 17.
Vogdes, Francis B., Schenectady, N. Y., assignor to General Electric Company. Frequency-responsive instrument. 1,677,694; July 17.
Vogt, Theodore, Fairview, N. J. Automobile handling apparatus. 1,677,695; July 17.
Von Beckerath, Hans, Berlin, Germany, assignors to Siemens & Halske Aktiengesellschaft, Siemensstadt, near Berlin, Germany. Telephone system. 1,677,325; July 17.
Vortex Mfg. Co., The. (See Baur, Hugo J., assignor.)
Vossen, Bartholomäus. (See Wagner, H., and Vossen.)
Wadhams Oil Company. (See Steen, Svend A., assignor.)
Wagner, Hermann, Bad Soden-on-the-Taunus, and B. Vossen, Hochst-on-the-Main, Germany, assignor to Grasselli Dyestuff Corporation, New York, N. Y. 1-methyl-2.5.6-trichloro-3-aminobenzene-4-sulphonic acid and preparing the same. 1,677,536; July 17.
Wagner, Max, assignor to Benz & Cie. Rheinische Automobil- u. Motoren-Fabrik Aktiengesellschaft, Mannheim, Germany. Steering gear. 1,677,619; July 17.)
Wahl Company, The. (See Straka, John, assignor.)
Walker Manufacturing Company. (See Walker, W. H., Mizer, and Dearsley, assignors.)
Walker, Warren H., J. J. Mizer, and I. E. Dearsley, assignors to Walker Manufacturing Company, Racine, Wis. Lifting jack. 1,677,466; July 17.
Walker, William L. (See Kivlan, John L., assignor.)
Walkley, Lucius V., Plantsville, Conn. Screw driver. 1,677,572; July 17.
Walther, Fritz. (See Röger, K., Schoenleben, and Walther.)
Warner & Swasey Company, The. (See Cole, L. M., Hulter, and Lewis, assignors.)
Warner and Swasey Company, The. (See Lange, M. E., and Evans, assignors.)
Warren Brothers Company. (See Schutte, August E., assignor.)
Watkins, Harold L., and L. J. Eveland, Los Angeles, Calif. Fabric puffer. 1,677,573; July 17.
Waukesha Motor Co. (See Pope, Arthur W., jr., assignor.)
Wayne Company. (See Merriman, Carroll L., assignor.)
Weatherhead, Albert J., jr., Cleveland, Ohio. Combined valve and pipe coupling. 1,677,740; July 17.
Weaver, Allan, Brooklyn, N. Y., assignor to American Telephone and Telegraph Company. System for measuring contact rebounding. 1,677,157; July 17.
Weaver, Eastman A., Brookline, assignor, by mesne assignments, to Technicolor Motion Picture Corporation, Boston, Mass. Photography. 1,677,665; July 17.
Webb, Edward A. (See Rees, Alphy, assignor.)
Wechter, S., Company. (See Jaffe, Lawson L., assignor.)
Weed, Harley D., Garvin, assignor of twelve and one-half per cent to H. K. Kvanbeck and twelve and one-half per cent to J. Kvanbeck, Minneota, and seven and one-half per cent to A. Mattson and seven and one-half per cent to D. Mattson, Taunton, Minn. Rotary motor. 1,677,805; July 17.
Weinberger, Julius, New York, N. Y., assignor to Radio Corporation of America. Electric phonograph circuit. 1,677,806; July 17.
Weiss, Carl W., Brooklyn, N. Y. Universal joint. 1,677,311; July 17.
Weller, Randolph V., Rochester, N. Y. Ironing machine. 1,677,666; July 17.
Wellman-Seaver-Morgan Company, The. (See Smith, Sydney, assignor.)
Wenzel, Albert W. (See Wenzel, Jacob B., assignor.)

Wenzel, Jacob B., Bloom, Colo., assignor to A. W. Wenzel, Newark, N. J. Packing ring. 1,677,158; July 17.
Werdehoff, Albert B., Birmingham, assignor to Chrysler Corporation, Detroit, Mich. Tire carrier. 1,677,574; July 17.
Werner, Wilbur S., assignor to The Kelley-Koett Manufacturing Company, Covington, Ky. Electric transformer. 1,677,537; July 17.
Wertheimer, Leo, assignor, by mesne assignments, to Amcoin Coffee System Company, Inc., Buffalo, N. Y. Coffee urn. 1,677,221; July 17.
Webster Electric Company. (See Kleckner, Arthur C., assignor.)
Wessel, Walter, Lester, Pa., assignor to Westinghouse Electric and Manufacturing Company. Blade fastening. 1,677,807; July 17.
Westinghouse Electric & Manufacturing Company. (See Lovell, William V., assignor.)
Western Electric Company. (See Adams, Arthur H., assignor.)
Western Electric Company. (See Borgeson, Sidney E., assignor.)
Western Electric Company. (See Brown, Alfred B., assignor.)
Western Electric Company. (See Colbeck, F. W. and Thronsen, assignors.)
Western Electric Company. (See Fay, Joseph W., assignor.)
Western Electric Company. (See Ford, Ben K., assignor.)
Western Electric Company. (See Grondahl, Hans H. C., assignor.)
Western Electric Company. (See Haase, Carl O., assignor.)
Western Electric Company. (See Hodge, John C., assignor.)
Western Electric Company. (See Karcher, John C., assignor.)
Western Electric Company. (See Kochendorfer, Frederic S., assignor.)
Western Electric Company. (See Kochendorfer, F. S., and Gill, assignors.)
Western Electric Company. (See Pugh, Emerson, assignor.)
Western Electric Company. (See Santschi, Arthur E., assignor.)
Western Electric Company Incorporated. (See Selvig, John N., assignor.)
Western Electric Company. (See Whited, Burns L., assignor.)
Western Union Telegraph Company, The. (See Dudley, William A., assignor.)
Westinghouse Electric and Manufacturing Company. (See Baxter, H. G., and Krantz, assignors.)
Westinghouse Electric & Manufacturing Company. (See Butcher, Charles A., assignor.)
Westinghouse Electric & Manufacturing Company. (See Portescue C. L., and Evans, assignors.)
Westinghouse Electric and Manufacturing Company. (See Goldsborough, Shirley L., assignor.)
Westinghouse Electric & Manufacturing Company. (See Hengstenberg, Paul M., assignor.)
Westinghouse Electric & Manufacturing Company. (See Jackson, Ray P., assignor.)
Westinghouse Electric & Manufacturing Company. (See Mottlau, August J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Payne, Halsey D., assignor.)
Westinghouse Electric & Manufacturing Company. (See Rosenbaum, Bruno, assignor.)
Westinghouse Electric & Manufacturing Company. (See Sandin, Maurits J., assignor.)
Westinghouse Electric & Manufacturing Company. (See Schneider, Stephan, assignor.)
Westinghouse Electric & Manufacturing Company. (See Sleeper, Harvey P., assignor.)
Westinghouse Electric and Manufacturing Company. (See Wessel, Walter, assignor.)
Westinghouse Electric & Manufacturing Company. (See Woodson, James C., assignor.)
Westinghouse Electric & Manufacturing Company. (See Zworykin, Vladimir K., assignor.)
Whaley, Emery G., assignor of one-half to F. E. Sackrider, Enid, Okla. Pressure-control device for use in coupling oil-well casing. 1,677,538; July 17.
Whitaker, William T., Alkins Park, Pa. Holder for mops. 1,677,741; July 17.
White, Jessee M., Philadelphia, Pa. Battery connecter. 1,677,312; July 17.
Whited, Burns L., Chicago, Ill., assignor to Western Electric Company, Incorporated, New York, N. Y. Material-working machine. 1,677,159; July 17.
Whitehead, Richard H., assignor to The New Haven Clock Co., New Haven, Conn. Clock case. Des. 75,816; July 17.
Whitman, Harold C., Bedford, N. Y. Blanket. 1,677,260; July 17.
Whitney, Horace E., assignor to Dover Stamping & Manufacturing Company, Cambridge, Mass. Pail. 1,677,222; July 17.
Whittall, M. J., Associates. (See Bauer, Marius A., assignor.)
Wichert, Alfred, Mannheim-Neuostheim, Germany, assignor to Aktiengesellschaft Brown, Boveri & Cie., Baden, Switzerland. Pneumatic control apparatus. 1,677,575; July 17.
Wicks, John, Oak Park, assignor, by mesne assignments, to Automatic Electric Inc., Chicago, Ill. Toll-service trunking system. 1,677,876; July 17.
Wilhelm, Friedrich. (See Sautermeister, C., and Wilhelm.)
Williams, Charles H. (See Green, T. L., and Williams.)
Williams, Elmo H., Pearl Harbor, Hawaii. Device for improving stance in connection with the game of golf, 1,677,261; July 17.
Williams, Ralph T., assignor to Roth Brothers & Co., Chicago, Ill. Exit-lighting system. 1,677,696; July 17.
Wilming, Valdemar, assignor to G. Koefoed, Copenhagen, Denmark. Device for mixing amalgam for tooth fillings and stoppings. 1,677,697; July 17.
Wilson, Stephen G., Philadelphia, Pa. Polishing device. 1,677,742; July 17.
Winfree, Douglas E. (See Sumpter, B. F., Winfree, and Robirds.)
Winogradoff, Alexander, assignor to Inecto, Inc., New York, N. Y. Dyeing fibers. 1,677,508; July 17.
Winthrop Chemical Company. (See Gunzler, H., and Neubert, assignors.)
Wintroath, John A., assignor to Peerless Pump Company, Los Angeles, Calif. Oil-tube water seal. 1,677,262; July 17.
Wittig, Auguste, Eckernforde, Germany. Chamber pot. 1,677,223; July 17.
Wood, Frederick H., Chicago, Ill. Lock and seal for screws. 1,677,607; July 17.
Woodman, Mark G., assignor of one-third to D. G. Fisher and one-third to V. F. Shantz, Chicago, Ill. Manufacture of iron. 1,677,420; July 17.
Woodson, James C., East Pittsburgh, Pa., assignor to Westinghouse Electric & Manufacturing Company. Electric heating unit. 1,677,313; July 17.
Woodstock Typewriter Company. (See Youngberg, Conrad D., assignor.)
Woolfenden, Henry L., Detroit, Mich. Bathtub. 1,677,160; July 17.
Wollman, Harry P., Washington, D. C. Air compressor. 1,677,539; July 17.
Woolwine, George. (See Rose, B. E., and Woolwine.)
Wright & Ditson-Victor Co. (See Roewade, Edward E., assignor.)
Wright Manufacturing Company. (See Sheeley, Earl, assignor.)
Wright, Morris S., Worcester, Mass. Electric switch. 1,677,509; July 17.
Wright, Wallace C., Brookfield, N. H., assignor to American Shoe Machinery Company, East Boston, Mass. Automatic moisture control. 1,677,856; July 17.
Wulkan, Eugene, Vienna, Austria, assignor to Haberland Manufacturing Company, Allwood, N. J. Making cold swelling starch. 1,677,314; July 17.
Wurzer, Joseph, Carroll, Iowa. Draft equalizer. 1,677,608; July 17.
Yager, George L. (See Yager, Ralph C. and G. L.)
Yager, Ralph C. and G. L., assignors to Yager Sheet Metal Company, Oakland, Calif. Louver ventilator. 1,677,421; July 17.
Yager Sheet Metal Company. (See Yager, Ralph C. and G. L., assignors.)
Youngberg, Conrad D., assignor to Woodstock Typewriter Company, Woodstock, Ill. Typewriter. 1,677,315; July 17.
Zaner-Bloser Company, The. (See Bloser, Parker Z., assignor.)
Zillox, John, assignor to Park Metalware Company, Orchard Park, N. Y. Wire coupler. 1,677,376; July 17.
Zimmerli, Adolph, New Brunswick, N. J., assignor, by mesne assignments, to Acetol Products, Inc. Apparatus for producing glass substitutes. 1,677,576; July 17.
Zimmerman, Arthur C., Dayton, Ohio. Treatment of magnesium and magnesium alloys to inhibit corrosion. 1,677,667; July 17.
Zumbalen, Joseph H. (See Rose, Dalton K., assignor.)
Zweig, Joseph, Brooklyn, assignor to Metropolitan Lamp Co. Inc., New York, N. Y. Lighting fixture. Des. 75,817; July 17.
Zworykin, Vladimir K., Wilkinsburg, Pa., assignor to Westinghouse Electric & Manufacturing Company. Photoelectric cell. 1,677,316; July 17.

ALPHABETICAL LIST OF INVENTIONS

FOR WHICH

PATENTS WERE ISSUED ON THE 17TH DAY OF JULY, 1928.

NOTE.—Arranged in accordance with the first significant character or word of the name (in accordance with city and telephone directory practice). **Includes patents, reissues, and designs.**

Abrading device. P. Sivertsen. 1,677,497; July 17.
Acetylene lines, Protection of. J. L. Anderson. 1,677,225; July 17.
Acid and preparing the same, 1-methyl 2 5 6-trichloro-3-aminobenzene-4-sulphonic. H. Wagner and B. Vossen. 1,677,536; July 17.
Acid, Cyclopentenyl alkyl acetic. R. Adams. 1,677,123; July 17.
Acid, Manufacture of arsenic. F. Ullmann and G. Trewendt. 1,677,257; July 17.
Acid resins obtained from the refining of mineral-oil derivatives into neutral bitumens, Working up. C. Sauermeister and F. Wilhelm. 1,677,731; July 17.
Acids and making same, Compound of gall. A. Gams and P. Scheidegger. 1,677,554; July 17.
Adjustable seat. J. M. Dorton. 1,677,434; July 17.
Addressing machine. H. E. Hubbard. 1,677,344; July 17.
Aerial machine and means therefor, Inflating and driving an. C. L. Stokes. 1,677,308; July 17.
Aircraft. A. Rees. 1,677,088; July 17.
Air heater. T. R. Dissett. 1,677,552; July 17.
Airplane and zeppelin, Combination. W. F. Short. 1,677,150; July 17.
Airplanes, Safety device for. A. Jost. 1,677,638; July 17.
Alarm: *See*—
Low-water alarm.
Aligning device. G. R. Maupin. 1,677,837; July 17.
Animal trap. M. E. and F. G. Dorsch. 1,677,470; July 17.
Antenna. E. F. W. Alexanderson. 1,677,698; July 17.
Anti-skid device. R. E. Martin. 1,677,353; July 17.
Antrum drill. T. E. Grove. 1,677,337; July 17.
Applicator, Internal. W. J. Kirk. 1,677,612; July 17.
Applying minor members to sheet articles, Method of and machine for. G. C. Snyder. 1,677,736; July 17.
Arsenic and producing it, Water-soluble organic compound of. M. S. Kharasch. 1,667,392; July 17.
Assembling machine. H. E. Townsend. 1,677,739; July 17.
Assembling members, Method of and apparatus for. J. W. Fay. 1,677,178; July 17.
Assembly press. J. P. Ferris. 1,677,800; July 17.
Antrum drill. T. E. Grove. 1,677,337; July 17.
1,677,584; July 17.
Automobiles, Device for actuating the coupling and the brake in. V. Jessen. 1,677,718; July 17.
Awning construction. B. Cohen. 1,677,581; July 17.
Awning, Stormproof. R. L. Meyers. 1,677,646; July 17.
Baby walker. O. C. Sanger. 1,677,213; July 17.
Bag: *See*—
Coal bag.
Tea bag.
Hand bag.
Bag and cushion, Combined. H. Berton. 1,677,743; July 17.
Bagasse handling. W. Montgomery. 1,677,725; July 17.
Ball: *See*—
Twine ball.
Ball-bearing spindle construction. T. M. Prudden. 1,677,686; July 17.
Ball race elements, Making. B. G. Slee. 1,677,841; July 17.
Bar: *See*—
Glazing bar.
Towel bar.
Barricade. R. A. Trufant. 1,677,693; July 17.
Basket, Fireplace. W. T. Bailey. 1,677,540–1; July 17.
Basket handle. G. H. Smith. 1,677,152; July 17.
Bathtub. H. L. Woolfenden. 1,677,160; July 17.
Battery-charging system, Automatic. C. E. Lomax. 1,677,644; July 17.
Battery connecter. J. M. White. 1,677,312; July 17.
Battery mold, Storage. G. F. Langermeier. 1,677,241; July 17.
Battery-terminal clamp. G. Hardes. 1,677,445; July 17.
Bearing. W. F. A. Casey, G. Cavin, and C. E. Brooks. 1,677,171; July 17.
Bearing for shafts, Self-aligning. H. E. Derr, sr. 1,677,514; July 17.
Bearing, Land-roller. S. K. Dennis. 1,677,127; July 17.
Bearing, Self-oiling. T. C. Leake. 1,677,879; July 17.
Bearings and manufacturing such cages, Laminated cage for antifriction. A. H. Linde. 1,677,833; July 17.
Beater. L. E. Earle. 1,677,754; July 17.
Beating gold leaf or sheets of other metal and such like, Apparatus for. W. Blacker. 1,677,513; July 17.
Bed. G. Shand. 1,677,218; July 17.
Bending machine. J. Y. Brown and J. R. Browning. 1,677,746; July 17.

Bittel-handling machines, Pick-up and centering device for. S. Smith. 1,677,873–4; July 17.
Billiard-cue tip. T. W. and C. Guthrie. 1,677,282; July 17.
Bird trap. J. M. Maxwell. 1,677,723; July 17.
Blanket. H. C. Whitman. 1,677,260; July 17.
Blanket-napping machine. H. V. Prothers. 1,677,298; July 17.
Bleacher, Portable. H. D. Oberdorfer. 1,677,362; July 17.
Bleaching composition. E. M. Jones. 1,677,283; July 17.
Block machine, Concrete. B. F. Krehbiel. 1,677,480; July 17.
Blower. E. Hartmetz. 1,677,446; July 17.
Board: *See*—
Game board.
Boat, Fire-fighting. H. Y. Haden. 1,677,769; July 17.
Boat, Motor. H. Schmitt. 1,677,495; July 17.
Boats, Propelling. J. Y. Propst. 1,677,847; July 17.
Boiler: *See*—
Locomotive boiler.
Steam boiler.
Boiler for stills. E. V. Oliver. 1,677,795; July 17.
Boilers, Making. R. W. Birchfield. 1,677,033; July 17.
Boilers, Soot-blower apparatus for steam. C. L. Davidson. 1,677,751; July 17.
Bolt: *See*—
Panic bolt.
Bottle. P. A. Ginter. Des. 75,787–9; July 17.
Bottle cap, Milk-. G. L. Swift. 1,677,155; July 17.
Bottle or the like, R. B. Annis. Des. 75,763; July 17.
Bottle washer. W. Skwierawski. 1,677,571; July 17.
Bottles and jars, Friction cap for. E. Scofield. 1,677,253; July 17.
Bottles, Measuring cap for. J. A. Reiser. 1,677,567; July 17.
Box: *See*—
Stuffing box.
Suction box.
Box. F. J. Schleicher. Des. 75,808; July 17.
Box clamp, Battery-. C. L. Mabey. 1,677,789; July 17.
Box-strap tie. L. M. Harvey. 1,677,522; July 17.
Brace: *See*—
Folding brace.
Bracket construction. A. Person. 1,677,204; July 17.
Bracket for parallel rails, rods, and the like, Supporting. J. E. Gloekler. 1,677,764; July 17.
Brake: *See*—
Vehicle brake.
Vehicle power brake.
Brake lining and making same. I. J. Novak. 1,677,842; July 17.
Brake-operating means. V. Bendix. 1,677,381; July 17.
Brick mason's gauge. A. O. Graham. 1,677,821; July 17.
Brooch. H. D. Croft. 1,677,815; July 17.
Brush. H. E. Smith. Des. 75,811; July 17.
Brush-making machine. W. S. Elliot and W. Noble. 1,677,672; July 17.
Building construction. H. R. Bristol. 1,677,267; July 17.
Building construction. J. S. Ketterman. 1,677,140; July 17.
Bumper. H. M. Vickery. 1,677,506; July 17.
Burner: *See*—
Gas burner.
Oil burner.
Hydrocarbon burner.
Burner for stoves, Gas. W. Olsen and S. Rasmussen. 1,677,289; July 17.
Cabinet. E. L. Schwab. 1,677,410; July 17.
Cabinet, Bath. R. J. Kideney. 1,677,503; July 17.
Cabinet, Radio-receiving-set. A. Taylor. Des. 75,814; July 17.
Cable connecter for outlet boxes. H. V. Gould. 1,677,628; July 17.
Cable, Stranded. C. A. Parsons, J. Rosen, A. W. Grey, and R. W. Midgley. 1,677,458–9; July 17.
Cake, Preparing. S. F. McDonald. 1,677,245; July 17.
Can. J. E. R. Hayes. 1,677,234; July 17.
Can washer. O. H. Hansen. 1,677,443; July 17.
Candle fitting, Imitative. R. D. Smith. 1,677,412; July 17.
Car, Amusement. J. C. and R. J. Lusse. Des. 75,802; July 17.
Car, Tipping. O. Ballert. 1,677,263; July 17.
Cars, Adjustable sill step for railway dump. A. C. Schmohl. 1,677,373; July 17.
Carbonaceous and other materials, Treatment of. F. Frank. 1,677,757–8; July 17.
Carburizing furnace, Continuous. W. M. Hepburn. 1,677,136; July 17.

Carburetor for internal-combustion engines. W. S. Guthrie. 1,677,233; July 17.
Carburetors, Attachment for. J. F. Abel. 1,677,609; July 17.
Carrier: *See*—
Pencil carrier.
Tire carrier.
Carrier-receiving system. H. Affel. 1,677,224; July 17.
Case: *See*—
Utility case.
Case or container, Tie. C. Lobner. 1,677,146; July 17.
Cash register. S. Arton. 1,677,510; July 17.
Casing cutter. W. A. Vock and H. E. Lynn. 1,677,507; July 17.
Casing for electrical apparatus. A. C. Kleckner. 1,677,350; July 17.
Casting machine, Matrix-setting and type-line. K. Röger, H. Schoenleben, and F. Walther. 1,677,462; July 17.
Catch device, Safety. F. L. Mills. 1,677,647; July 17.
Cellulose-bearing material, Saccharification of. J. Perl. 1,677,406; July 17.
Cellulose composition. O. Drossbach and O. Jordan. 1,677,753; July 17.
Cements rich in alumina, Manufacturing. A. Hasselbach. 1,677,182; July 17.
Chamber pot. A. Wittig. 1,677,223; July 17.
Chart, Accounting-machine demonstration. J. A. B. Smith. 1,677,569; July 17.
Cigarette machinery. W. E. Molins. 1,677,680; July 17.
Cinematographic apparatus. L. T. Troland. 1,677,310; July 17.
Circuit interrupter, Automatic reclosing. C. A. Butcher. 1,677,863; July 17.
Circuits, Automatic reversing system for multiplex. W. A. Dudley. 1,677,859; July 17.
Circuits, Control of electric. H. Bany and D. C. Hoffmann. 1,677,702; July 17.
Clamp: *See*—
Battery-terminal clamp.
Form clamp.
Box clamp.
Pipe-patch clamp.
Electric-fixture clamp.
Clamp plate. H. S. Jandus. Des. 75,798–800; July 17.
Clamps, Making. W. R. Barney. 1,677,264; July 17.
Clarifier, Gasoline. A. C. Beck and A. S. Morningstar. 1,677,324; July 17.
Clasp. G. H. Roberts. 1,677,849; July 17.
Cleaner: *See*—
Shade cleaner.
Cleaning boiler tubes, Apparatus for. J. P. Martinussen. 1,677,836; July 17.
Cleaning device, Suction. W. A. Frantz. 1,677,625; July 17.
Clock, Alarm. W. F. McKinley. 1,677,790; July 17.
Clock, Calendar. R. N. Reid. 1,677,872; July 17.
Clock case. R. H. Whitehead. Des. 75,816; July 17.
Closure cap. W. L. Morrison. 1,677,403; July 17.
Cloth sponging and shrinking machine. M. E. Popkin. 1,677,367; July 17.
Clothes wringer, Power-operated. J. T. Hume. 1,677,863; July 17.
Clutch and brake mechanism for hoisting drums, Combined. 1,677,327; July 17.
Clutch mechanism and control therefor. M. I. Bradley. Assigned to S. O. Hale. 1,677,338; July 17.
Clutch, Positive. W. T. Carling. 1,677,705; July 17.
Coal bag. W. K. Cromwell, jr. 1,677,583; July 17.
Coal-loading and track-cleaning machine. H. H. Harrison, H. W. Allender, and R. L. Fout. 1,677,824; July 17.
Coating machine. C. L. Jones. 1,677,453; July 17.
Collar package. D. B. Becker. 1,677,511; July 17.
Collar, Soft. G. T. Sweetser. 1,677,504; July 17.
Combustion engine, Two-cycle supercharging. E. A. Sperry. 1,677,305; July 17.
Composite product and making same. A. B. Merrill. 1,677,360; July 17.
Compressor, Air. H. P. Wollman. 1,677,539; July 17.
Compressor, Fluid. E. A. Rix. 1,677,369; July 17.
Compressor, Rotary. P. Schauer. 1,677,216; July 17.
Concrete mixer. J. E. Bushnell. 1,677,813; July 17.
Condenser. R. S. Curley. 1,677,173; July 17.
Conditioning sheet articles and of and for applying minor members to sheet articles such as envelopes, for example, Method of and machine for. G. C. Snyder. 1,677,735; July 17.
Connecter. D. A. Bowen. 1,677,326; July 17.
Connecter. L. O. Smith. 1,677,734; July 17.
Container. F. S. Oppenheim. 1,677,565; July 17.
Container, Display. E. M. Pitts. 1,677,654; July 17.
Container for dental impression outfits. G. Robinet. 1,677,493; July 17.
Container, Fuse. R. S. Benett. Des. 75,769; July 17.
Container, Grease-gun grease. S. A. Steen. 1,677,603; July 17.
Control apparatus, Pneumatic. A. Wichert. 1,677,575; July 17.
Control device for use in coupling oil-well casing, Pressure-. E. G. Whaley. 1,677,538; July 17.
Convection and radiant heater, Combination. S. J. Delaney. 1,677,621; July 17.
Conveyer. J. F. Noecker. 1,677,487; July 17.
Conveying and drying apparatus. N. Marshall. 1,677,526; July 17.
Cooker, Automatic. H. S. Murray. 1,677,564; July 17.
Cooking apparatus. F. Blattner, jr., and E. Janke. 1,677,227; July 17.
Cooking utensil. J. McEwan. 1,677,593; July 17.
Cooler: *See*—
Ice-water cooler.
Cooling incandescent coke, Apparatus for. A. Moettell. 1,677,196; July 17.
Cord-fabric and tire making machine. H. I. Morris. 1,677,400; July 17.
Counterweight. J. G. Swain. 1,677,855; July 17.
Counting and dispensing machine, Pill. R. K. Clauss. 1,677,546; July 17.
Coupler, Wire. J. Zilliox. 1,677,376; July 17.
Coupling. E. J. Kroeger. 1,677,865; July 17.
Crank-shaft pins, Machine for milling. A. J. Gifford and B. S. T. Bishop. 1,677,761; July 17.
Crate, Steaming. P. Daugert, H. Frey, and J. J. Dunleavy. 1,677,385; July 17.
Crustacea, Treating. J. J. Barry. 1,677,579; July 17.
Crystallization of the body dissolved therein, Producing in a solution the. A. Delas. 1,677,551; July 17.
Cuff button or similar article. F. C. Rile. Des. 75,807; July 17.
Cuff link. J. Pejchar. Des. 75,806; July 17.
Cultivator. P. Cantin. 1,677,329; July 17.
Cultivator teeth. A. J. Peterson. 1,677,596; July 17.
Cultivator, weeder, and digger. A. R. Tenger. 1,677,803; July 17.
Cup. T. M. Cleland. Des. 75,773; July 17.
Curtains, Apparatus for adjusting automobile. R. E. Naumburg. 1,677,287; July 17.
Cut-out, Electric. G. F. Lincks. 1,677,720; July 17.
Cut-out, Electrical. J. F. Stokes. 1,677,692; July 17.
Cut-out, Thermal plug. M. J. Sandin. 1,677,298; July 17.
Cutter: *See*—
Casing cutter.
Vegetable cutter.
Cutter and cutting kerfs, Chain. E. C. Morgan. 1,677,399; July 17.
Cutter mechanism for plastic material. T. L. Green and C. H. Williams. 1,677,180; July 17.
Cutting attachment, Kafir-corn-. A. L. Johnson. 1,677,479; July 17.
Cylinder cock. L. Joyner. 1,677,781; July 17.
Cylinders, Adjusting locking. J. Croning. 1,677,432; July 17.
Decorated box. F. Eberbart. Des. 75,782; July 17.
Derrick, Oil-well. B. F. Sumpter, D. E. Winfree, and R. B. Robirds. 1,677,738; July 17.
Diazosalt, Solid. F. Keller and K. Schnitzspahn. 1,677,640; July 17.
Diazosalts of ortho-amino-phenolarylethers, Solid. F. Keller and K. Schnitzspahn. 1,677,558; July 17.
Differential mechanism. R. K. and E. K. Ortt. 1,677,682; July 17.
Discharging praline cores from the powdering box, Device for. C. Göpel. 1,677,179; July 17.
Dish, Serving. M. M. Pinney. 1,677,845; July 17.
Disk wheel. G. H. Forsyth. 1,677,755; July 17.
Disks, Forming tapered cross-section. E. D. Lowrie. 1,677,722; July 17.
Dispenser, Cup. H. J. Baur. 1,677,166; July 17.
Dispenser, Liquid-soap. J. M. Dabrowski. 1,677,750; July 17.
Dispenser, Soap. W. J. Cousins. 1,677,709; July 17.
Display device. H. S. Alexander. 1,677,318; July 17.
Display device. L. Moses. 1,677,840; July 17.
Displaying automobile numbers, Device for. R. C. Carty. 1,677,580; July 17.
Ditches, Back filler for. J. H. Hodgen. 1,677,342; July 17.
Door control, Automatic electric. H. C. Blodgett. 1,677,129; July 17.
Door, Stove and oven. W. Moll. 1,677,286; July 17.
Draft equalizer. J. Wurzer. 1,677,608; July 17.
Draining pad. J. R. Kinney. 1,677,641; July 17.
Drawer, Adjustable compartment metal. G. C. Brainard, J. A. Fitch, and G. T. Gourley. 1,677,544; July 17.
Drier: *See*—
Portable drier.
Drill: *See*—
Antrum drill.
Dyeing fibers. A. Winogradoff. 1,677,508; July 17.
Dyestuff and making same, Metal compounds of azo. F. Straub, H. Schneider, and J. Spieler. 1,677,534; July 17.
Egg-case filling and inverting apparatus. D. Parker. 1,677,290; July 17.
Electric controller. N. D. Levin. 1,677,243; July 17.
Electric-fixture clamp. G. Arras. 1,677,164; July 17.
Electric heater. A. C. Gilbert. 1,677,281; July 17.
Electric roaster. W. J. Noonan. 1,677,651; July 17.
Electric switch. H. D. Dunton. 1,677,713; July 17.
Electric switch. N. S. Wright. 1,677,509; July 17.
Electric switch, Automatic. B. E. Getchell. 1,677,335; July 17.
Electric switch, Key locking. M. J. Lewis. 1,677,719; July 17.
Electrical connecters, Liner for. M. M. Clayton. 1,677,332; July 17.
Electrical connection. J. R. Kearney. 1,677,783; July 17.
Electrical connection, Separable. W. C. Trogoning. 1,677,256; July 17.

Electrical distribution system. E. F. W. Alexanderson. 1,677,699–700; July 17.
Electrical quantities, Device for indicating the quotient of two. D. Albrecht. 1,677,378; July 17.
Electrically heated apparatus. A. E. Santschi. 1,677,214; July 17.
Electrode for evacuated electric devices. P. M. Hengstenberg. 1,677,341; July 17.
Electron-discharge device. W. A. MacDonald. 1,677,355; July 17.
Electroplating and the like, Apparatus for. De Verre. 1,677,817; July 17.
Engine: *See*—
Combustion engine. Sleeve-valve engine.
Internal-combustion engine.
Engine. D. Magusiak. 1,677,483; July 17.
Engines, Fuel intake for two-cycle. A. B. Streeter. 1,677,604; July 17.
Exercising plaything. I. A. Shanton. 1,677,532; July 17.
Extinguishing fire, Apparatus for. C. Szilvay. 1,677,875; July 17.
Extractor and dilator, Ureteral stone. W. A. Council. 1,677,671; July 17.
Eyeglass frame. F. McFadden. Des. 75,804; July 17.
Fabric: *See*—
Splicing fabric. Weftless fabric.
Gauze fabric.
Fabric puffer. H. L. Watkins and L. J. Eveland. 1,677,373; July 17.
Fan, Electric. H. Hubbell, jr. Des. 75,795; July 17.
Fastener. F. S. Carr. 1,677,858; July 17.
Fastener. W. H. Pierce. 1,677,869–70; July 17.
Fastener. G. E. Prentice. 1,677,408; July 17.
Fastener, Bag. W. C. Hlering. 1,677,137; July 17.
Fastener, Bag. B. Stember. 1,677,154; July 17.
Fastener, Sash. A. M. Hilty. 1,677,825; July 17.
Fastener, Sash. S. Segal. 1,677,309; July 17.
Fastening, Blade. L. Wessel. 1,677,807; July 17.
Fastening, Envelope. J. Lloyd. 1,677,867; July 17.
Fastening loop. H. A. Austin. 1,677,670; July 17.
Faucet. T. Larrigan. 1,677,242; July 17.
Feeding and delivering mechanism and process, Glass. E. T. Ferngren. 1,677,436; July 17.
Feeding and working articles, Method of and machine for. B. K. Ford. 1,677,133; July 17.
Fence construction. H. Miller. 1,677,195; July 17.
Field induction furnace, Rotary. E. F. Northrup. 1,677,528; July 17.
Films, Registering and cementing cinematographic. L. T. Troland and J. A. Ball. 1,677,309; July 17.
Filter. E. J. Sweetland. 1,677,503; July 17.
Finger ring. J. Schumer. Des. 75,809; July 17.
Fish bait. J. L. Donaly. 1,677,176; July 17.
Fish, Treating. D. D. Peebles. 1,677,364; July 17.
Flag holder and support therefor. L. A. Ames. 1,677,379; July 17.
Flashing, Sill. G. L. Cherry. 1,677,130; July 17.
Float. M. W. Iden. 1,677,450; July 17.
Flooring, Dividing strip for terrazzo. P. Galassi. 1,677,760; July 17.
Flow meter. E. M. Scoville. 1,677,411; July 17.
Flow regulator, Liquid-. O. B. Schellberg. 1,677,732; July 17.
Flower pot-base former. J. Kelso. 1,677,391; July 17.
Flue cap, Deflector-. J. A. McCarthy. Des. 75,803; July 17.
Flue heater. W. D. Johnston. 1,677,636; July 17.
Fluid motor. D. Bonetto. 1,677,745; July 17.
Fly net for horses. A. Montels. 1,677,859; July 17.
Folding brace. E. W. Cummings. 1,677,620; July 17.
Forging press, Electrically-driven. A. Friederici. 1,677,471; July 17.
Form clamp. J. F. Costello. 1,677,384; July 17.
Frame: *See*—
Side frame. Stocking frame.
Frame component. F. Amiot. 1,677,577; July 17.
Framework, Machine. A. B. Brown. 1,677,108; July 17.
Frequency-responsive instrument. F. B. Vogdes. 1,677,694; July 17.
Fruit press, Power-driven. J. P. Ferrari. 1,677,517; July 17.
Fruit-treating apparatus. A. W. Conklin. 1,677,229; July 17.
Fuel, Handling and feeding pulverized. G. P. Jackson and A. V. Adamson. 1,677,779; July 17.
Fuel, Motor. D. Costaguta. 1,677,273; July 17.
Furnace: *See*—
Carbonizing furnace. Field induction furnace.
Furnace for heating rivets by means of oxygen and acetylene gases. F. Bourlenaux. 1,677,467; July 17.
Furnaces, Operating open-hearth. A. L. Stevens. 1,677,664; July 17.
Fuselage for aeroplanes. W. F. Van Cleave. 1,677,535; July 17.
Game board. P. R. Compton. 1,677,707; July 17.
Game, Indoor golf. R. Johnson. 1,677,557; July 17.
Garment. F. Lerner. 1,677,145; July 17.
Garment. I. L. Lesavoy. 1,677,188; July 17.
Garment. R. du P. Ulman. 1,677,258; July 17.
Garter. G. Abraham. 1,677,423; July 17.
Gas burner. W. S. Bowen. 1,677,811; July 17.
Gas burner. H. E. Kerr. 1,677,787; July 17.
Gas diffuser. E. J. Sweetland. 1,677,502; July 17.
Gas outlet. E. W. Horton and H. G. Richardson. 1,677,634; July 17.
Gas, Producing combustible. W. W. Kemp. 1,677,785; July 17.
Gas-purification process. F. W. Sperr, jr. 1,677,304; July 17.
Gas scrubber for refrigerating apparatus. A. C. Thayer. 1,677,804; July 17.
Gas, Treating methane. G. Olivier. 1,677,363; July 17.
Gases and vapors, Absorption plant for. F. Rottmann and F. Brohmeyer. 1,677,409; July 17.
Gases through boilers, Control of. J. B. Crane. 1,677,749; July 17.
Gaseous mixtures, Apparatus for burning explosive. S. P. Vaughn. 1,677,156; July 17.
Gasometer. K. Jagschitz. 1,677,524; July 17.
Gate: *See*—
Vehicle gate.
Gate. B. W. Cook. 1,677,708; July 17.
Gate construction. C. A. Carlson. 1,677,330; July 17.
Gauge: *See*—
Brick-mason's gauge.
Gauge. G. H. Allen. 1,677,424; July 17.
